U.S. GOVERNMENT END USERS: Oracle programs, including any operating system, integrated software, any programs installed on the hardware, and/or documentation, delivered to U.S. Government end users are "commercial computer software" pursuant to the applicable Federal Acquisition Regulation and agency-specific supplemental regulations. As such, use, duplication, disclosure, modification, and adaptation of the programs, including any operating system, integrated software, any programs installed on the hardware, and/or documentation, shall be subject to license terms and license restrictions applicable to the programs. No other rights are granted to the U.S. Government.

This software or hardware is developed for general use in a variety of information management applications. It is not developed or intended for use in any inherently dangerous applications, including applications that may create a risk of personal injury. If you use this software or hardware in dangerous applications, then you shall be responsible to take all appropriate failsafe, backup, redundancy, and other measures to ensure its safe use. Oracle Corporation and its affiliates disclaim any liability for any damages caused by use of this software or hardware in dangerous applications.

This software and related documentation are provided under a license agreement containing restrictions on use and disclosure and are protected by intellectual property laws. Except as expressly permitted in your license agreement or allowed by law, you may not use, copy, reproduce, translate, broadcast, modify, license, transmit, distribute, exhibit, perform, publish or display any part, in any form, or by any means. Reverse engineering, disassembly, or decompilation of this software, unless required by law for interoperability, is prohibited.

The information contained herein is subject to change without notice and is not warranted to be error-free. If you find any errors, please report them to us in writing.

This software or hardware and documentation may provide access to or information on content, products and services from third parties. Oracle Corporation and its affiliates are not responsible for and expressly disclaim all warranties of any kind with respect to third-party content, products, and services. Oracle Corporation and its affiliates will not be responsible for any loss, costs, or damages incurred due to your access to or use of third-party content, products, or services.

Table of Contents

1. Preface	1-1
1.1 Intended Audience	1-1
1.2 Documentation Accessibility	1-1
1.3 Access to Oracle Support	1-1
1.4 Structure	1-1
1.5 Related Information Sources	1-1
2. Transaction Host Integration Matrix	2-1
3. Dashboards	3-1
3.1 System Administrator Dashboard	3-1
3.2 Administrator Maker Dashboard	3-23
3.3 Administrator Approver Dashboard	3-32
3.4 Approve the transaction	3-41
4. User Management	4-1
4.1 User Management - Create	4-2
4.2 User Management - Search and View	4-15
4.3 User Management - Edit	4-29
4.4 Reset Password	4-38
5. Party Preferences	5-1
5.1 Party Preferences- Search	5-2
5.2 Party Preferences - Create	5-5
5.3 Party Preferences- View	5-12
5.4 Party Preferences - Edit	5-18
6. Party to Party Linkage	6-1
6.1 Party to Party Linkage- Search	6-2
6.2 Party To Party Linkage - Create	6-4
6.3 Party to Party Linkage- View	6-6
6.4 Party To Party Linkage - Edit and De-link	6-7
7. Merchant Management	7-1
7.1 Merchant Management – Search	7-2
7.2 Merchant Management – Outward Remittance	7-5
7.3 Merchant Management – Inward Remittance	7-13
7.4 Merchant Management - Delete	7-21

8. Electronic Bill Presentment and Payment	8-1
8.1 Biller Onboarding	8-2
9. Limits Definition	9-1
9.1 Limits Definition - View	9-2
9.2 Limits Definition - Create	9-5
9.3 Limits Definition - Delete Limit	9-10
10. Limit Package Management	10-1
10.1 Limit Package Management - View	10-2
10.2 Limit Package Management - Create	10-6
10.3 Limit Package Management - Edit.....	10-9
10.4 Limit Package Management - Clone	10-14
10.5 Limit Package Management - Delete	10-16
11. User Limits	11-1
11.1 User Limits - View	11-2
11.2 User Limits - Edit	11-7
12. Transaction Group Maintenance	12-1
12.1 Transaction Group Maintenance - View	12-2
12.2 Transaction Group Maintenance - Create	12-4
12.3 Transaction Group Maintenance - Edit.....	12-5
12.4 Transaction Group Maintenance - Delete	12-8
13. Party Account Access	13-1
13.1 Party Account Access - Mapping (Create)	13-2
13.2 Party Account Access- View.....	Error! Bookmark not defined.
13.3 Party Account Access - Edit	Error! Bookmark not defined.
13.4 Party Account Access - Delete	13-23
14. User Account Access	14-1
14.1 User Account Access - Mapping (Create)	14-2
14.2 User Account Access- Search.....	14-19
14.3 User Account Access - Edit	Error! Bookmark not defined.
14.4 User Account Access - Delete	14-32
15. Party Resource Access	15-1
15.1 Party Resource Access - Mapping (Create)	15-2
15.2 Party Resource Access- View	15-6
15.3 Party Resource Access - Edit.....	15-9
15.4 Party Resource Access - Delete.....	15-12

16. User Resource Access	16-1
16.1 User Resource Access - Mapping (Create).....	16-3
16.2 User Resource Access- Search	16-10
16.3 User Resource Access - Edit.....	16-15
16.4 User Resource Access - Delete	16-18
17. Approvals	17-1
17.1 Workflow Management	17-2
17.2 Approval Rules	17-22
17.3 Approval Rules – Select User Type.....	17-23
17.4 Approval Rules - Admin User - Admin Approval Rules	17-23
17.5 Approval Rules - Corporate User - Approval Rule	17-32
18. Origination Workflow Configuration	18-1
18.1 Search Workflow.....	18-2
18.2 Single Product Application.....	18-5
18.3 Bundle Application	18-17
19. Service Request Form Builder	19-39
19.1 Service Request Definition - Summary.....	19-39
19.2 Service Request Definition - Search and View.....	19-40
19.3 Service Request Form Builder - Create.....	19-48
19.4 Service Request Form Builder - Edit	19-57
19.5 Deactivate/Activate Service Request	19-62
20. Feedback.....	20-1
20.1 Feedback Template Maintenance	20-1
20.2 Feedback Analytics.....	20-18
21. SMS Banking	21-1
21.1 SMS Banking - Edit.....	21-3
21.2 Missed Call Banking - Search	21-4
21.3 Missed Call Banking - Edit.....	21-6
22. System Rules.....	22-1
23. First Time Login	23-7
24. Transaction Aspects	24-1
24.1 View Transaction Aspects	24-2
24.2 Update Transaction Aspects	24-3
25. ATM / Branch Maintenance	25-1

25.1	ATM/ Branch Maintenance - Search	25-2
25.2	ATM/ Branch Maintenance - Add	25-5
25.3	ATM/ Branch Maintenance - Edit.....	25-13
25.4	ATM/ Branch Maintenance - Delete	25-15
26.	Product Mapping	26-1
26.1	Product Mapping - View	26-2
26.2	Product Mapping - Edit	26-5
26.3	Product Mapping - Create	26-7
27.	User Profile Maintenance	27-1
27.1	User Profile - View	27-2
27.2	User Profile - Edit.....	27-3
28.	Payee Restriction Setup	28-1
28.1	Payee Restriction Setup - View	28-2
28.2	Payee Restriction Setup - Edit.....	28-5
28.3	Payee Restriction Setup - Create	28-8
29.	Forex Deal Maintenance	29-1
29.1	Add Currency Pairs.....	29-1
29.2	Update Forex Deal.....	29-3
30.	Biller Category Maintenance	30-1
30.1	Biller Category Maintenance - Summary	30-2
30.2	Biller Category Maintenance - Add Category	30-3
30.3	Biller Category Maintenance - Edit Category	30-4
30.4	Biller Category Maintenance - Delete.....	30-5
31.	Touch Point Maintenance.....	31-1
31.1	Touch Point Maintenance - View	31-2
31.2	Touch Point Maintenance - Edit	31-5
31.3	Touch Point Maintenance - Create.....	31-7
32.	Touch Point Group Maintenance	32-1
32.1	Touch Point Group Maintenance - View.....	32-1
32.2	Touch Point Group Maintenance - Edit	32-4
32.3	Touch Point Group Maintenance - Create.....	32-6
33.	Role transaction Mapping	33-1
33.1	Search Application Role	33-2
33.2	Edit Application Role.....	33-6
33.3	Delete Application Role	33-10

33.4	Create Application Role	33-11
34.	Entitlements	34-1
34.1	Entitlements - View	34-1
34.2	Entitlements - Edit.....	34-3
35.	User Segment Maintenance	35-1
35.1	User Segment Maintenance - Search	35-2
35.2	User Segment Maintenance - Edit.....	35-6
35.3	User Segment Maintenance - Create	35-9
36.	Authentication	36-1
36.1	Authentication - View	36-2
36.2	Authentication - Edit.....	36-6
36.3	Authentication - Create	36-10
37.	Security Questions Maintenance.....	37-1
37.1	View Security Questions.....	37-2
37.2	Security Questions Maintenance - Edit	37-3
37.3	Security Questions Maintenance - Create.....	37-4
38.	Password Policy Maintenance.....	38-1
38.1	Password Policy Maintenance - Search	38-2
38.2	Password Policy Maintenance - View.....	38-3
38.3	Password Policy - Create	38-7
38.4	Password Policy Maintenance - Edit	38-11
39.	Security Keys.....	39-1
39.1	Password Encryption and Decryption with Public and Private Key Pairs	39-1
39.2	JWT Encryption Key	39-1
40.	User Group - Subject Mapping	40-1
40.1	User Group - Subject Mapping - Search	40-2
40.2	User Group - Subject Mapping - Create	40-4
40.3	User Group - Subject Mapping - Modify	40-7
41.	Alerts Maintenance	41-1
41.1	Alerts Maintenance - Search	41-2
41.2	Alerts Maintenance- Create.....	41-8
41.3	Alerts Maintenance- Edit	41-15
41.4	Alerts Maintenance- Delete	41-16
42.	Mailers	42-1

42.1	Mailers - Search and View.....	42-1
42.2	Mailers - Create	42-5
42.3	Mailers - Edit.....	42-7
42.4	Mailers - Delete.....	42-10
43.	Account Aggregation.....	43-1
43.1	External Bank Maintenance.....	43-2
44.	Spend Category.....	44-1
44.1	Spend Category - Search.....	44-2
44.2	Spend Category - Create.....	44-4
44.3	Spend Category - Edit	44-6
45.	Goal Category Maintenance.....	45-1
45.1	Goal Category - Search.....	45-2
45.2	Goal Category - Create	45-6
45.3	Goal Category - Edit.....	45-8
46.	Manage Brand.....	46-1
46.1	Manage Brand - Create	46-3
46.2	Manage Brand - View	46-22
46.3	Manage Brand - Edit.....	46-23
46.4	Manage Brand - Delete	46-42
46.5	Brand Mapping	46-44
47.	Dashboard Builder	47-1
47.1	Dashboard Builder – View	47-4
47.2	Dashboard Builder – Create	47-5
47.3	Dashboard Builder – Design – Create Administrator Template	47-9
47.4	Dashboard Builder – Edit.....	47-13
47.5	Dashboard Builder – Delete	47-15
47.6	Dashboard Mapping – Summary.....	47-17
48.	Relationship Maintenance.....	48-1
48.1	Relationship Mapping	48-1
48.2	Relationship Matrix	48-6
49.	Transaction Blackout.....	49-1
49.1	Transaction Blackout - Search	49-2
49.2	Transaction Blackout - Create	49-5
49.3	Transaction Blackout - Edit.....	49-8
49.4	Transaction Blackout - Delete	49-11

50.	Working Window	50-1
50.1	Transaction Working Window - Search	50-2
50.2	Transaction Working Window - Create.....	50-7
50.3	Transaction Working Window - Edit	50-12
50.4	Transaction Working Window - Delete	50-16
51.	Audit Log.....	51-1
51.1	Search Audit Details	51-1
52.	File Upload	52-1
52.1	File Identifier Maintenance	52-1
52.2	User File Identifier Mapping.....	52-24
52.3	File Upload – Bill Presentment	52-1
52.4	Uploaded Files Inquiry	52-4
53.	OAuth 2.0	53-1
53.1	Identity Domain Maintenance	53-2
53.2	Resource Server Maintenance	53-10
53.3	Client Maintenance	53-17
54.	User Group Management	54-1
54.1	User Groups - Summary.....	54-2
54.2	User Groups - Admin User – Create	54-3
54.3	User Groups - Admin User – Search Summary	54-4
54.4	User Groups - Admin User – Edit Group.....	54-6
54.5	User Groups - Corporate User – Search Party	54-8
54.6	User Groups - Corporate User – Create.....	54-10
54.7	User Groups - Corporate User – Group Summary.....	54-11
54.8	User Groups - Corporate User – Edit Group.....	54-14
55.	Print Password	55-1
55.1	Print Password - Search.....	55-2
55.2	Print Password - Print.....	55-5
56.	User Alerts Subscription	56-1
56.1	User Alerts Subscription - Search	56-2
56.2	Subscribe/ Unsubscribe Alerts	56-6
57.	Request Processing.....	57-1
57.1	Request Processing - Summary.....	57-2
57.2	Service Request Details (For Service Requests available out of the box).....	57-5
57.3	Service Request Details (Requests created using Service Request-Form Builder)	57-8

58. Reports	58-1
59. Report Generation	59-1
59.1 Adhoc Reports	59-2
59.2 Schedule Reports	59-3
59.3 API Consumption Report	59-10
59.4 Biller Registration Report	59-18
59.5 Biller Reconciliation report	59-24
59.6 Bill Payment Pay Later Report	59-30
59.7 Date Wise User Creation Report	59-36
59.8 EPI Payment Reconciliation Report	59-42
59.9 FATCA & CRS Declaration Report	59-48
59.10 File Identifier wise Party User Mapping Report	59-62
59.11 Party User wise File Identifiers Mapping Report	59-68
59.12 Party wise Approval Rule report	59-74
59.13 Party wise File Identifiers Mapping Report	59-80
59.14 Party wise Payee Maintenance Report	59-86
59.15 Party wise User Group Report	59-92
59.16 Party Wise Workflows Report	59-98
59.17 User Segment Summary Report	59-104
59.18 Wallets Creation for a Date Range Report	59-110
59.19 Wallet KYC report	59-116
59.20 Wallets Transaction Activity Report	59-123
60. My Reports	60-1
60.1 My Reports - Adhoc	60-1
60.2 My Reports - Scheduled	60-3
61. User Report Mapping	61-1
61.1 User Report Mapping - Search	61-2
61.2 User Report Mapping - Create	61-6
61.3 User Report Mapping - Edit	61-7
62. Message Maintenance	62-1
62.1 Message Maintenance - View	62-1
62.2 Message Maintenance - Edit	62-3
63. User Helpdesk	63-1
64. Mailbox	64-1
64.1 Mails	64-2

64.2	Alerts.....	64-10
64.3	Notifications	64-12
65.	Security Settings	65-1
65.1	Set Security Question	65-1
65.2	Change Password	65-7
66.	My Profile	66-1
67.	Session Summary	67-1
68.	Forgot Password	68-1
69.	Forgot Username.....	69-1

1. Preface

1.1 Intended Audience

This document is intended for the following audience:

- Customers
- Partners

1.2 Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc>.

1.3 Access to Oracle Support

Oracle customers have access to electronic support through My Oracle Support. For information, visit

<http://www.oracle.com/pls/topic/lookup?ctx=acc&id=info> or visit

<http://www.oracle.com/pls/topic/lookup?ctx=acc&id=trs> if you are hearing impaired.

1.4 Structure

This manual is organized into the following categories:

Preface gives information on the intended audience. It also describes the overall structure of the User Manual.

Introduction provides brief information on the overall functionality covered in the User Manual.

The subsequent chapters provide information on transactions covered in the User Manual.

Each transaction is explained in the following manner:

- Introduction to the transaction
- Screenshots of the transaction
- The images of screens used in this user manual are for illustrative purpose only, to provide improved understanding of the functionality; actual screens that appear in the application may vary based on selected browser, theme, and mobile devices.
- Procedure containing steps to complete the transaction- The mandatory and conditional fields of the transaction are explained in the procedure. If a transaction contains multiple procedures, each procedure is explained. If some functionality is present in many transactions, this functionality is explained separately.

1.5 Related Information Sources

3. Dashboards

Dashboard allows an administrator user to access various administrative functions of the channel banking system. The role of the System/Bank administrator is to manage and administer day-to-day functions of a bank. Administrators can perform various tasks such as doing Day 1 maintenances, maintenances pertaining to retail / corporate banking, creation of roles, user creation, maintenance of party preferences etc.

Dashboards provides a quick view of the most relevant functions, to achieve a particular objective or complete a process. OBDX supports role specific dashboards for an administrator user.

- System Administrator Dashboard
- Administrator Maker Dashboard (Bank Administrator maker)
- Administrator Approver Dashboard (Bank Administrator checker)

Note: All Administrative maintenances are supported only on 'Desktop' form factor and not supported on 'Mobile' and 'Tablet' .

3.1 System Administrator Dashboard

A System Administrator is responsible for setting up and maintaining the system. System Administrators are the members of the information technology department of the Bank who are mainly responsible for Bank's Day 1 maintenances or other day to day maintenances like Role Transaction Mapping, password policy maintenance and rules and roles maintenances etc.

Note: By default System Administrator role is given access to all the administrative functions. If the Bank wants to change the entitlements, the same can be done using Role Transaction Mapping function.

Summary

Note: Above diagram depicts the transactions available on dashboard. Apart from these transactions, there are other transactions available in the toggle menu.

System Administrator Dashboard – Overview

The System Administrator dashboard comprises of Quick Links, each of which when clicked launches into the respective item.

The screenshot displays the System Administrator Dashboard for Futura Bank. At the top, there is a navigation bar with the following elements: "System Administrator", "ATM/Branch", "English", and "UBS 14:3 AT3 Branch". Below this, the "futura bank" logo is visible on the left, and a search icon, a notification icon with a red badge showing "91", and a user greeting "Welcome, Sam David" with the last login time "Last login 11 May 11:46 AM" are on the right.

The dashboard is organized into several sections:

- Onboarding:** Includes links for User Management, Merchant Management, and Biller Onboarding.
- Communications:** Includes links for User Group Subject Mapping, Alerts Maintenance, and Mailers.
- Configuration:** Includes links for System Configuration, System Rules, Transaction Aspects, ATM/Branch Maintenance, Product Mapping, and User Profile Maintenance.
- Security:** Includes links for Authentication, Security Question Maintenance, and Password Policy Maintenance.
- Payments:** Includes links for Payment Purpose Mapping, Payee Restrictions, Biller Category Maintenance, Forex Deal Maintenance, and Network Preference Maintenance.
- Authorization and Access Controls:** Includes links for Touch Points, Touch Point Groups, Role Transaction Mapping, Entitlements, and User Segments Maintenance.
- Personal Finance:** Includes links for Spend Category Maintenance, Goal Category Maintenance, and External Bank Maintenance.
- Limits:** Includes links for Limit Definition, Limit Package Management, and User Limits.
- Templates:** Includes links for Service Request- Form Builder, Feedback Template, SMS and Missed Call Banking, Manage Brand, and Dashboard Builder.
- Activity Log (3):** A table with columns for Date, Description, Party Name, Reference No, and Status. It shows "No data to display" and a pagination control for "Page 1 (0 of 0 Items)".
- Controls & Monitoring:** Includes links for Transaction Blackout, Transaction Working Window, Audit Log, Feedback Analytics, Relationship Mapping, and Relationship Matrix.
- Notifications:** A section showing a notification from "05 Dec 3:26 PM" titled "Test Mail to Admin" with a "View All" link.

At the bottom of the dashboard, there is a copyright notice: "Copyright © 2006, 2020, Oracle and/or its affiliates. All rights reserved. | Security Information | Terms and Conditions".

Dashboard Overview

Icons

Following icons are present on the System Administrator dashboard:

-  : Clicking this icon takes you to the dashboard.
-  : Clicking this icon takes you to the Mailbox screen.
-  : Click this icon and enter the transaction name to search the transactions.
-  : Click this icon to view the user's profile and for logout option
-  : Click the toggle menu to access the list of all the transactions.

Toggle Menu Transactions

Following items are present on the Toggle Menu:

- **Your Current View is:** Select your role as System Administrator. The drop-down to select the role is available only if the user is mapped with more than one role.
- **Select Language:** Select your desired language from the drop-down list.
-  **Configuration** : Click this menu to access the configuration like System Rules, System Configuration, Transaction aspects etc.
-  **Authorization and Access Co...** : Click this menu to setup access controls and authorization related transactions like maintain touch points, Application role creation and entitlement mapping etc.
-  **Security** : Click this menu to access the security setup related transactions like setting up second factor authorization, password policy etc.
-  **Limits** : Click this menu to manage limits.
-  **Onboarding** : Click this menu to onboard and manage Party, users, merchants and billers.
-  **Access Management** : Click this menu to set up account access rules for a corporate.
-  **Approvals** : Click this menu to access and setup Approval workflow and rules for Corporate and Administrator users.

-  **Payments** : Click here to access maintenances with respect to payments.
-  **Personal Financial Managem...** : Click this menu to plan finances and track expenditures. It consists of sub menu items like Spend Category Maintenance, Goal Category Maintenance and External Bank Maintenance.
-  **Reports** : Click this menu to generate reports and view the generated reports.
-  **File Upload** : Click this menu to create a file identifier and map it to the user along with file upload and inquiry
-  **Communication** : Click this menu to access User Group Subject Mapping, Alert Maintenance and Mailers.
-  **Controls and Monitoring** : Click this menu for controlling and monitoring the transactions like transaction blackout, working window and Audit log.
-  **User Experience** : Click this menu to manage and build your customize dashboards.
-  **Templates** : Click this menu to manage service request form, feedback and SMS banking templates.
-  **OAuth** : Click this menu to manage and limit the third party authorization access to an HTTP service.
-  **Others** : User Group Management, Print Password, Alert Subscription, Request Processing and User Help Desk.
-  **Mail Box** : Click this menu to view the Mails, Alerts and Notifications.
-  **Account Setting** : Click this menu to view the user's profile and login details like start date and time, end date and time, Channel and IP address of the last sessions of the logged in user.
-  **ATM/Branch Locator** : Click to view the address and location of the ATMs and the branches of the Bank.
-  **Security Settings** : Click here to setup security questions and change password.
-  **Help** : Click this menu to launch the online help.
-  **About** : Click this menu to view the information about the application like version number, copyright etc.

Note: The user will be shown the above options only if he has the access to the all the transactions falling under that group.

Administrative Transactions

Following transactions are present on the System Administrator dashboard and in the menu:

- **On-boarding**

(a) User Management

User Management function enables the System Administrator to onboard and manage users along with their login credentials for channel banking access. This module facilitates channel banking access to the bank's internal users (administrators) and external users (customers).

User will get access to all the entities and clients mapped to it. Also the limit packages can get assigned once the user selects the accessible entities.

(b) Merchant Management

Merchant Management facilitates System Administrator to set up and maintain merchants using channel banking platform. This is to enable the customers to initiate merchant based payments using channel banking facility. This option allows the administrator to create / onboard new merchants, view existing merchants and modify their details, if required.

(c) Party Preferences (Through Toggle menu)

Party Preferences maintenance enables Bank administrator to define certain parameter values as per the corporate entities requirements. Following preferences can be set for a corporate party:

- Cumulative Daily/Monthly limits per transaction
- Transaction limits for users
- Approval flow – Parallel or Sequential or none
- To enable Channel access or not
- To enable Forex Deal creation or not
- To enable a Corporate Administrator or not.

(d) Party To Party Linkage (Through Toggle menu)

Party to Party linkage is required by medium and large corporates if the user(s) of the parent company needs to access accounts of the subsidiary companies. For e.g. consider a case wherein 'ABC Industries' is the parent company with a subsidiary company 'PQR Enterprises' and the users of ABC Industries needs to access accounts of PQR Enterprises to carry out transactions and/or inquiries. The corporate will provide a mandate/ board resolution to the bank for creation of Party to Party linkage. Bank administrator will setup a Party to Party linkage by selecting the parent party and the parties to be linked.

(e) Biller Onboarding

Using Biller Onboarding, System Administrators can create billers. The system administrator defines payment methods accepted by biller (e.g. Current and Savings Account, Credit Card, Debit Card etc.) while creating a biller. He also maintains category of the biller, full address of the biller and location/ area in which the biller operates or provides his services.

System Administrator creates billers, which are then made available to the customers to register themselves with these billers to receive and pay bills online.

- **Communications**

- (a) **User Group Subject Mapping**

This maintenance facilitates mapping of subjects, to user groups in the bank, to streamline communication between the bank's users and its end customers.

Once User Groups are mapped to certain transactions or modules, users, in that group can reply to communication pertaining to the specific subject. The communication channel used is the bank's secure mailbox.

This option allows the System Administrator to search and view existing User Group – Subject mapping, modify the existing mapping and to create a new User Group – Subject mapping.

- (b) **Alert Maintenance**

Alerts maintenance allows the System Administrator to define required parameters for each alert that is to be sent to the banks customers.

This option allows the System Administrator to search and view existing alerts, create a new alert and modify or delete an existing alert.

- (c) **Mailers**

Mailers are information or a messages published by the Bank, to communicate about the Banks Products, services and other information to its users. A Bank may send mailers to announce a limited period promotional offer, launch of a product or service, etc.

The System Administrator creates Mailers which are sent to specific users, parties or user segments (all Retail / Corporate / Admin) users. Mailers can be customized to reach some or all users, to be sent now or on a specific date and time, in the future.

- **Configuration**

- (a) **System Configuration**

Using this option System Administrator defines the basic components of this application which is necessary to run the application. The creating of system configuration is done at 'Day 0' configuration.

(b) System Rules

System rules are defined to set different parameters for each enterprise role. The parameters that can be set for each enterprise role (Retail or Corporate Users) are Party Mapping, Limits Check, Party Preferences Check, Account Transaction Mapping, and Approvals Check. If these parameters are enabled, application will check for a fulfillment of the maintenances, before final processing.

E.g. If Approval check flag is enabled for 'Corporate User' type of enterprise role; transactions initiated by corporate users will follow the approval maintenance. If approval check flag is disabled for Retail Users, transactions initiated by retail user will not follow the approval maintenance and will get auto-approved by the system.

This screen allows the System Administrator to search and view existing system rules, create new system rule, and modify an existing system rule.

(c) Transactions Aspects

Using this option, System Administrator can define the aspects for a transaction. Depending on the aspects defined for a transaction through this maintenance, the transaction will be available/unavailable for selection in the respective maintenance screen.

User can view the aspects for a selected transaction and also edit the aspects i.e. enable/disable the aspects for the selected transaction.

(d) ATM/ Branch Maintenance

ATM Branch Locator feature available to the bank customers enables the users to locate the bank's ATMs/ branches available within a specific radius of his current location.

For the customers, to fetch the relevant information related to ATMs and Branches, system administrator maintains the data at their local databases. The basic details of ATMs and Branches are fetched from the core banking application, which is further enriched and stored in local database. This is a one-time activity at the time of implementation. Subsequently, as and when branches and ATMs are added, or any details regarding them updated, the administrator performs the necessary updates to the bank database.

Using this option, the System Administrator can search and view the ATM/ branch and its details (Fetched from Core Banking application) which include branch/ ATM id, branch name, address details, phone number, work timings and services offered by the bank. New ATM and branch details can also be manually added, viewed and edited.

The bank administrator can manually add new branch/ ATM details one by one, or add multiple branches / ATMs details simultaneously through file upload.

(e) Product Mapping

Product Mapping feature allows the System Administrator to map products with the channel. The business users will be able to access accounts related to the products mapped to the channel.

The System Administrator will be allowed to register the banks products to be made available to bank users for opening further accounts.

(f) User Profile Maintenance

This function enables the System/ Bank Administrator user to manage the user profile details that needs to be shown and needs to be made available for modification for Retail users. Details maintained on user profile includes date of birth, PAN card number, Aadhar number, passport number, national ID, driving license, communication address, email ID, and contact number, fax number, etc.

In a multi entity scenario, Administrator can do this setup for each entity by selecting the entity.

(g) First Time login

Using this option System administrator can configure the steps for banks business users to follow when the first-time login into the application. This step includes accepting Terms and Conditions, Setting up Security Questions, My profile, and limit information. The first-time login events are configurable at the Entity Level. Bank Admin would be able to define the mandatory and skippable steps for each entity. Post first-time login to the application, the system will check the configured steps for the logged-in entity and will be displayed to the user.

- **Security**

(a) Authentication

Passwords are the most common form of authentication used in the world today. But passwords are commonly forgotten and easily compromised. Two-factor authentication (2FA) adds an extra layer of security by requiring users to use two different authentication factors to verify user's identity.

The two step verification or Two Factor Authentication is an extra layer of security that is a subset of "multi factor authentication" that requires not only a password and username but also something that user has or something user knows or something they are e.g. tokens, OTP, biometrics etc. Using a Two Factor Authentication process can help to lower the number of cases of identity theft on the Internet, as well as phishing via email. For security reason authentication is used by user (Retail/ Corporate) while performing transactions through internet channel.

The two factor Authentication requires two different kinds of evidences before executing any transaction successfully. This option enables the system administrator to maintain authentication pattern for each transaction of a specific user segment.

The types of two factor authentication used in the application are as follows:

- Security Question
- Soft Token
- One Time Password (OTP)

(b) Security Question Maintenance

Application allows the System Administrator user to set up security questions, which will then be used as another layer of security (Over and above the Login credentials), before a user (Retail/ Corporate) can complete transactions through the internet channel.

Through the Manage Security Questions functionality, the administrator user can create and modify security questions that need to set and answered by user for completing any transaction. Administrator can add the security questions, if required.

(c) Password Policy Maintenance

Password policy maintenance enables System Administrator to define password parameters for users. Using this option System Administrator create, view and edit password policy for different user role/segments (Admin, Retail, and Corporate). Password policy maintenance contains following sections:

- **Password Validators:** This section contains the validations for a password. The validations include minimum and maximum length of the password, allowed characters in a password, repetitive and successive characters allowed, details to be excluded in the password like, date of birth, first and last name, user ID and party ID, and bank defined restricted passwords. User can also define number of successive incorrect attempts allowed, and number of previous password disallowed.
- **Password Expiry Parameters:** This section contains details about password expiry period, first password expiry period, and whether to force user to change password if there is a change in password policy (so that users can change their password as per the new password policy).

(d) Security Keys (Through Toggle menu)

Security key includes:

Password Encryption and Decryption with Public and Private Key Pairs:

Encryption and decryption allow communication between two parties to disguise information. The sender encrypts information before sending it and the receiver decrypts the information after receiving it. While in transit, the information is encrypted to ensure that it is protected from an intruder.

- Public and Private key pair helps to encrypt information that ensures sensitive data is protected during transmission. Whatever is encrypted with a Public Key can only be decrypted by its corresponding Private Key and vice versa.
- JWT Encryption Key: A JSON web token is a JSON object to represent a set of information. On sign in, user is authenticated and JWT token is generated. This JWT is subsequently passed to make API calls. To keep sensitive information hidden from the bearer (client) or third parties, JWT should be encrypted. A single key can be used to encrypt the data, if the JWT is encrypted with the key then the data can be decrypted using the same key.

- **Payments**

(a) Payee Restrictions

Payee Restriction Set up maintenance allows System Administrator to restrict the number of payees that a retail user can create for each payment network per day.

System Administrator can also restrict the total number of payees irrespective of payment network that the retail user can create per day.

This option allows the administrator to create payee restriction maintenance, View and Edit existing maintenance.

(b) Biller Category Maintenance

System Administrator creates new biller categories and map it to the billers. E.g. administrator can create biller category as 'Insurance' and use it as Biller Category when creating billers related to insurance.

The System administrators can change the order of the categories as per their priority by dragging the categories. In the business user screen, these categories appear in the same order for selection to the customers, as defined by the administrators.

(c) Forex Deal Maintenance

Using Forex Deal Maintenance option, System Administrator can maintain currency pair. The maintained currency pairs are made available to corporate users to book deals and utilize those while making payments. Based on the treasury system, timer window can also be set for each currency pair so that the deal expires after the setup time, which helps corporate user to get the latest rate possible.

- **Personal Finance**

(a) Spend Category Maintenance

Using this option, the System Administrator can maintain the spend categories. Spend Category maintenance allows the administrator to create, modify or expire categories under which user can map expenses.

(b) Goal Category Maintenance

Goal Category maintenance allows the System Administrator to create, modify or expire goal categories. This maintenance is done only for Retail users and is not applicable to corporate.

The System Administrator created categories are linked with a product which will decide the other key parameters which will govern the Goal category. These parameters could be:

- Goal Amount Range (Minimum and Maximum Value)
- Interest Rate Offered
- Tenure Range (Minimum and Maximum)

The System Administrator can search and view goal categories, create a new goal category, and modify an existing goal category.

(c) External Bank Maintenance

The account aggregation feature empowers customers to view information of financial accounts that are external to OBDX, in addition to the customer's OBDX accounts. This feature also provides the customer with a consolidated view of accounts, net worth and recent transactions, across OBDX and external bank accounts.

To enable a retail user to access external bank accounts, and aggregate accounts with OBDX, the system administrator has to perform External Bank Maintenance

- **Authorization and Access Controls**

(a) Touch Points

Touch Points are different channels/ medium through which transactions or inquiries can be performed in OBDX. These can be created or modified under this section.

Touch Points in OBDX are of type 'Internal' and 'External'. Internal Touch Points are defined as part of Day 0 definition whereas External Touch Points are typically third party applications that can be defined by the System/ Bank Administrator as part of onboarding in OBDX

(b) Touch Points Groups

Touch Points are different channels e.g. Internet, Mobile, SMS, Third Party applications etc. through which the OBDX services can be accessed. This maintenance enables the System Administrator user to group two or multiple touch points together for the purpose of defining common limits for a transaction accessed from any touch point grouped together.

(c) Role Transaction Mapping

This function enables System Administrator to create Application Role and transaction mapping to application roles will be done for Touch Points. Administrator can create the application roles for the User Segments (Retail/ Corporate/ Administrator) and map the transactions to the application roles for internal as well as external touch points. The benefit of mapping the transactions on a touch point is that the Bank can control transaction access at each touch point.

(d) Entitlements

Entitlements are the transactions that the user can perform. Each Entitlement is linked to a single or group of resources.

Using this transaction user can view and edit the services and UI components linked to an entitlement for different actions i.e. Perform, Approve, and View.

(e) User Segment Maintenance

In order to offer appropriate product and services to the customers, banks can employ some method of segmentation. Banks can group customers into different segments based on different attributes of the customer; it could be demographic information, geographical information, behavioral information etc.

Banks can have different communication mailers, authentication mechanisms transaction limits and branding aspects based on customer segmentation.

User segment maintenance screen, allows the system administrator to create new segments and subsequently use these segments to define specific maintenances at user segment level. Limits can also be defined specific to a user segment. Within each user segment, limits package can be associated to different touch points.

- **Limits**

(a) Limit Definition

Limits are defined by the bank to set up amount and duration based restrictions on the transactions that can be carried out by the user.

As part of Limits Definition maintenance, the System Administrator can define:

- **Transaction Limits:** It is the initiation limit with minimum and maximum amount, defined typically for a user with role 'Maker'.
- **Cumulative Limits:** It is the collective transaction amount limit for all the transactions that can be performed during a day and maximum **number of transactions in a day**.
- **Cooling Period Limits:** It is the time set by the bank during which fund transfer is not allowed to a newly added payee.

This option allows the System Administrator to search and view limits, create limits and edit / delete existing limits.

(b) Limits Package Management

As part of the Limits Package definition, the created limits can be mapped to relevant transactions and/or roles.

The Limits Packages once created can be associated at User Level, Party Level and Role Level at an touch point level.

This option allows the System Administrator to search and view Limit Package, create a new Limit Package, and edit / delete existing Limit Package.

(c) Transaction Group Maintenance (Through Toggle menu)

Transaction group maintenance enables the System Administrator user to create and maintain group of transactions. Administrator can maintain a transaction group for the purpose of defining consolidated transaction limits. Once limits are assigned at transaction group, these limits acts as collective limit for selected transactions in a group.

(d) User Limits

This option allows the System Administrator to view the current available and utilized limits of specific retail user and also can modify (increase or decrease) the limits as per the requirement.

The user limits can be set for specific transaction level or at transaction group level or for a specific channel or for a group of channels.

The different types of limits are as follows:

- Daily Count- Permitted number of transactions in a day
- Daily Amount- Cumulative amount of transactions in a day
- Monthly Count- Permitted number of transactions in a month
- Monthly Amount- Permitted number of transactions in a month

• **Templates**

(a) Service Request Form Builder

Service Request Form Builder transaction allows the system administrator to define service requests by defining its attributes and by building the form (Request page that should be available to business user) which are then available for Retail users for creating a new Service Request.

(b) Feedback Template

Using this option, the System Administrator can maintain the feedback templates by defining the feedback question, selecting the rating scale, adding new questions along with new options, selecting the transactions for which feedback capture needs to be enabled.

The administrator can also decide whether an additional question is to be asked for a scale weight and select the applicable options for the question.

(c) SMS and Missed Call Banking

Using this option, the System Administrator can maintain the sms and missed call templates. The templates can be defined as:

- **SMS:** You can set the template / format of the message, which the account holder will be sending to the bank to receive the information in a specified format.
- **Missed Call:** You can set the template / format the account holder will receive, once he / she gives a miss call on the specified phone number.

(d) Manage Brand

Banks can have varied requirements with regards to the theme and for look and feel of the application.

Manage Brand is an administrative maintenance that allows the System Administrator to define the preferred theme for the application.

There is a list of categories on the left of the screen to choose from. System administrator can click and navigate the categories to upload their bank logo, select the preferred colors of the headers, back ground, Font, label, buttons etc. System administrator can also set the font style and font size.

(e) Dashboard Builder

Dashboard Builder is an administrative maintenance that allows the System Administrator to create and configure dashboard templates for Retail and Corporate users.

System Administrator can configure new dashboards by dragging and dropping the desired widget at desired location in template. And also can add and edit rows and columns while configuring new dashboard to add more widgets. Facility is also provided to search, view, edit and delete the configured dashboards.

These configured dashboards are responsive and can adapt to any type device that Bank wants to enable it to the customers' i.e. desktop, mobile and tablet. System allows the user to design new template and preview on different types of devices before enabling it.

The administrator can define multiple dashboards with the various attributes/ widgets. Further these templates can be mapped to the user segment, party or even to a specific user.

• Controls & Monitoring**(a) Transaction Blackout**

The System Administrator can maintain a transaction blackout, for a period, when transaction/s are not accessible to users of the bank's retail and corporate or even to Bank administrators, for a preset time period.

The administrator may use the time, when a transaction is blacked-out, to do necessary maintenances.

Through this maintenance, the System Administrator can create a transaction blackout, User can search and view existing blackouts, and modify these if required. User can delete future dated blackouts.

(b) Transaction Working Window

A working window is maintained, by the System Administrator for each transaction for which a value date is applicable for processing. In order to enable such transactions on the channel, it is mandatory to define a working window for all the days of a week as Day 0 Maintenance. By performing this maintenance, the System Administrator defines the channel working window for each day of the week for a specific transaction.

Further, administrator can also define the processing pattern if the transaction is initiated by customers after the window is closed. Through this maintenance, the System Administrator can create a working window for a transaction, and also can create an exception to the normal window. User can search and view existing maintenances, and modify these if required.

(c) Audit Log

Audit log is set of records that provide information about operations performed in the application and details of the user who has performed it along with date and time when it was performed. The System Administrator can search and view the Audit Log.

(d) Feedback Analytics

Using this option, the System Administrator can analyze the feedback for different transactions. System Administrator can view top and bottom three transactions based on average customer review or he can search for individual transactions for a selected time period. Feedback Analytics gives the bank a quick analysis of the feedback information collected. The analytics covers information the average of feedback ratings transactions have got, trends in how the average ratings have changes, the top and bottom transactions in terms of ratings etc. The analytics helps banks in quickly identifying the pain points in customer journeys in the system points out the specific areas for improvement and action.

Using this option, the System Administrator can analyze the feedback given by users of the system.

(e) Relationship Mapping

Customer Relationship Maintenance enables the System Administrator to set up the transaction access logic for Bank's retail customers from Digital Banking Platform based on their account - mode of operation or relationship.

E.g. If a customer relationship (Mode of operation) is 'Either or Survivor', provide an access of all transactions whereas, if a customer relationship (Mode of operation) is 'Jointly', provide an access of all Inquiries and restrict all financial transactions from Digital Banking Platform. Such account and transaction access rules can be set up by the System Administrator using 'Relationship Maintenance Module'.

(f) Relationship Matrix

Relationship Matrix maintenance allows the System Administrator to define the transaction access based on the account relationships. Administrator can enable or disable each transaction for each relationship code. OBDX first checks if the transaction is enabled in a role attached to a user and then if it is enabled in relationship matrix. If both the conditions are satisfied, an access of a transaction and of an account is provided to the user.

Additional options accessible via Menu

- **Access Management**

Account Access**(a) Party Account Access**

Bank Administrator can set up account and transaction access rules at the corporate party level. The administrator can provide access to accounts held by the party with the bank as available in the core banking system. Bank Administrator maker can search and view accounts and transactions mapping done at primary party and linked party. User can create, modify and delete such mapping.

(b) User Account Access

Alerts maintenance allows the System Administrator to define required parameters for each alert that is to be sent to the banks customers.

This option allows the System Administrator to search and view existing alerts, create a new alert and modify or delete an existing alert.

Resource Access**(a) Party Resource Access**

As part of Resource Access Management, administrator can define access on resources other than account like Remitter List from Virtual Account Management for a Corporate Party.

(b) User Resource Access

As part of Resource Access Management, administrator can define access on resources other than account like Remitter List from Virtual Account Management for a specific corporate user.

Approvals**(a) Workflow Management**

Approval workflows are created to support requirements where multiple levels of approval are required in a specific sequence for a transaction/maintenance. Each workflow can be configured to have up to 5 levels of approval with a specific user or a user group configured at each level.

System Administrator can search and view approval workflows maintained and create new workflows. As a part of creating workflows, user can add various levels of approvals and map users or user groups to each level. User can also modify workflows maintained.

(b) Rules Management

The Administrator, can set up rules for approvals. Applying a rule makes the requirement for an approval more customized. For instance, through this screen, the bank administrator can create a rule, so that all administrator maintenances initiated by a certain user-group, always require approval.

- **Reports**

- (a) **Report Generation**

Using this option, the System Administrator, can generate various adhoc reports. Application provides an option to generate reports using Oracle Analytics Publisher and / or by using an internal application.

- (b) **My Reports**

On accessing 'My Reports' menu, the System Administrator, can view the last 10 reports generated with the respective report status. He can choose to search a specific report using the search criteria or can opt to view/ download detailed report.

- (c) **User Report Mapping**

The user report mapping maintenance allows the Bank Administrators to map the report or set of reports to a specific corporate user. The corporate users can generate and view the reports which they have an access to.

Bank administrator searches a corporate user based on the party id and view the reports mapped to him, he can also un-map the reports from specific corporate user so that access of the specific report/ s can be removed to that corporate user.

The System Administrator can also map the accounts of primary and linked parties for which the reports can be generated by a corporate user, so that corporate user can generate the report only for the accounts mapped to him.

- **File Upload**

- (a) **File Identifier Maintenance**

System Administrator, can create file identifiers (FI) for a corporate entity. A File Identifier is always mapped to a specific single file template. It permits configuration of corporate preferences like approval type (file level/ record level) for a particular type of file. This is a pre-requisite for the File Uploads functionality, for a corporate.

- (b) **User File Identifier Mapping**

Through this option Administrator, can map a file identifier to a user to grant access rights to the user, for this specific file type. This maintenance enables a user to upload a specific file, approve the uploaded file and view its status. System administrator can map / un-map file identifiers to a User. Further, user can enable or disable the sensitive data check. This is a pre-requisite maintenance, for the File Uploads functionality, for a corporate.

- (c) **File Upload**

This option allows the System administrator user to upload the files containing EBPP Billers. Billers uploaded will be available for retail users to register and make online bill payment & pre-paid recharge transactions.

- (d) **Uploaded File Inquiry**

Through this option the user can view the Billers file uploaded and their status.

- The search can be filtered on various parameters like status and file reference ID.
- The user can track the status of the file and if there is an error in the file, he / she can download the error file to arrive at the exact reason for error.
- For files in the 'Processed' status, the user can download Response file, to vet status of processing (in the host) for each record, of the file.
- The user can track file history and also check Individual record details.

- **OAuth**

- (a) **Identity Domain Maintenance**

The Identity Domain corresponds to the notion of a tenant and each identity domain corresponds to an identity store. All artifacts such as resource server and client needs to be created under an identity domain.

As part of the Identity Domain definition, Identity store as well as token settings can be defined.

Currently only 'Embedded LDAP' i.e. DB Authenticator as Identity Store is supported.

- (b) **Resource Server Maintenance**

The resource server is the server that contains the user's information that is being accessed by the third party application and handles authenticated requests after the application has obtained an access token.

Resource Server is always associated to one Identity Domain. Through this maintenance, the administrator can define scopes for the resource server. Scopes are transactions or inquiries that are provided to the client so that the TPP/client can transact or inquire on behalf of the customer with an access token provided the customer has provided consent to the TPP.

- (c) **Client Maintenance**

Clients are Third Party Provides (TPPs) that can access information from the resource server on behalf of the user provided the user has provided consent to the TPPs. As part of this definition, the administrator can define client details i.e. client ID, client name, scopes, redirect URLs etc.

- **Others**

- (a) **User Group Management**

The System Administrator, can create administrator and corporate user groups with two or more users. User can search and views already maintained groups, and also modify these. The maintained administrator user groups are used for further maintenances like – User Group Subject Mapping or while creating approval rules.

(b) Print Password

When a new user opens an account in the bank and registers for internet banking, the bank sends the printed password along with some other documents like Welcome letter, Terms & Conditions document and applicable promotional offers to the registered user via courier or post. This screen allows the Bank Administrator to print the password along with these documents for new users as well as for existing users who have requested for reset password.

(c) Alert Subscription

The System Administrator, can subscribe users to mandatory alerts, through this option. In addition, Retail and Corporate users of the bank, can subscribe to alerts, and choose whether they want alerts delivered through Email, SMS or in their secured mailbox. The bank administrator processes the subscription request, received from customers. (For non-mandatory alerts).

(d) Request Processing

Service requests allows the System Administrator to search and view all the service requests that have been initiated by the Bank customers and are available with various statuses like Open, Completed and Rejected. Bank Administrator can search the service requests with specific search criteria and can update the status of open service requests.

(e) User Help Desk

This option enables the Administrator to create business user's session and perform the transaction requested by business user if he has forgotten his internet banking password or is unable to perform a transaction using his internet banking.

To authenticate the user, system will send an OTP to the customer and the same OTP needs to be communicated to the administrator user so that he can enter it on the screen to create user's session.

(f) Message Maintenance

Using this option, System Administrator can inquire the existing Error Messages defined in the system for an OBDX error code. It also allows you to modify the text defined for a message code for a particular Language.

- **Notifications**

The notification section allows the System Administrator user to view last 'N' number of notifications sent by the bank. Click **View All** to view all the notifications sent by the bank.

Note:

- 1) If the setup requires an approval workflow, it will be initiated. Once approved by the required number of approvers, the maintenance will be effective.
- 2) If the setup does not require an approval workflow or is self / auto approved, the maintenance will come into effect on confirmation.

- **Activity Log**

The System Administrator can view the log of activities here. For ease of use, he can provide a Date Range and search.

Icons

-  : Click this icon to search the transactions that are performed on a particular date. It has two fields From and To, you can select the start and end date to search the transaction.

(a) Corporate

In the Corporate activity log, the System Administrator, can view the activities performed for a corporate party id. The following fields are displayed.

- Date: Date of the maintenance
- Description: Description of the maintenance
- Party Name: Party Name
- Reference Number: Reference number of the maintenance.
- Status: Status of the maintenance

(b) Administrative Maintenance

Through the Admin Activity log, the System Administrator can view the Bank Administrator activities. The following fields are displayed:

- Date: Date of the maintenance
- Description: Description of the maintenance
- Reference Number: Reference number of the maintenance.
- Status: Status of the maintenance

(c) Bulk File Administrator

In Bulk File Activity Log, the Administrator can view the bulk file activities. The following fields are displayed.

- Date: Date of the maintenance
- File Identifier: Unique code assigned to files as required by parties
- File Name: Name assigned to files.
- Initiated by: Initiator of the Party Maintenance.
- Reference No: Reference number of the maintenance.
- Status: Status of the maintenance.

(d) Bulk Record Administrator

In Bulk Record Activity Log, the Administrator can view the bulk record activities. The following fields are displayed.

- Date: Date of the maintenance

- File Identifier: Unique code assigned to files as required by parties
- File Name: Name assigned to files
- Initiated by: Initiator of the Party Maintenance.
- Reference No: Reference number of the maintenance.
- Status: Status of the maintenance

Transaction Journey

Click the **Reference Number** link in the **Activity Log** section to view the Transaction Journey.

This screen displays the transaction details and transaction journey of corporate and administrator transactions. It displays the current status of transaction whether it is Initiated, Approved or Processed.

The screenshot displays the Futura Bank interface. At the top right, there are navigation options: 'ATM/Branch', 'English', and 'UBS 14.3 AT3 Branch'. The user profile shows 'Welcome, Sam David' with a last login of '11 May 11:46 AM'. The main content area is divided into two sections:

Limit Definition

Limit Type	Cooling Period
Limit Code	Limit001
Limit Description	Limit001
Currency	USD

Transaction Journey

From Time	To Time	Cumulative Transaction Amount
0dd : 0hh : 0mm	1dd : 2hh : 10mm	\$0.00
1dd : 2hh : 10mm	2dd : 5hh : 10mm	\$0.00
0dd : 1hh : 0mm	1dd : 0hh : 0mm	£10,000.00

The Transaction Journey flow diagram shows three stages: **Initiation**, **Approval**, and **Completion**. The 'Initiation' stage is marked with a blue circle containing an upward arrow and includes the text 'Administrator User' and '09 Dec 05:50 PM'. The 'Completion' stage is marked with a blue circle containing an upward arrow and includes the text 'Processed' and '09 Dec 05:50 PM'. A 'Back' link is located at the bottom left of the journey diagram.

Transaction Journey

The screen displays the details of the transaction that is to be approved for review.

Transaction Journey

Transaction Journey

This section displays the status of transactions that has been initiated by the maker. Transaction journey displays the status as:

- Initiation
- Approval
- Completion

3.2 Administrator Maker Dashboard

Bank Administrator Maker's role involves the maintenances which are mainly required for day to day business in banks. Maintenances like onboarding the users on Digital Platform and providing them the account and transactions access, etc.

Note: Transactions appearing in toggle menu for Bank Administrator – Maker is same as 'System Administrator' transactions depending upon the access provided to the associated role in Role Transaction Mapping maintenance.

Summary

Maker Dashboard - Overview

The Bank administrator – Maker dashboard comprises of:

- Quick Links
- Activity Log

Dashboard Overview

Icons

Following icons are present on the maker's dashboard:

-  : Clicking this icon takes you to the dashboard.
-  : Clicking this icon takes you to the Mailbox screen.
-  : Click this icon and enter the transaction name to search the transactions.
-  : Click this icon to view the user's profile and for logout option
-  : Click the toggle menu to access the list of all the transactions.

Toggle Menu Transactions

Following items are present on the Toggle Menu:

- Your Current View is:** Select your role as maker. The drop-down to select the role is available only if the user is mapped with more than one role.
- Select Language:** Select your desired language from the drop-down list.
-  : Click this menu to access the configuration like System Rules, System Configuration, Transaction aspects etc.
-  : Click this menu to setup access controls and authorization related transactions like maintain touch points, Application role creation and entitlement mapping etc.

-  **Security** : Click this menu to access the security setup related transactions like setting up second factor authorization, password policy etc.
-  **Limits** : Click this menu to manage limits.
-  **Onboarding** : Click this menu to onboard and manage Party, users, merchants and billers.
-  **Access Management** : Click this menu to set up account access rules for a corporate.
-  **Approvals** : Click this menu to access and setup Approval workflow and rules for Corporate and Administrator users.
-  **Payments** : Click here to access maintenances with respect to payments.
-  **Personal Financial Managem...** : Click this menu to plan finances and track expenditures. It consists of sub menu items like Spend Category Maintenance, Goal Category Maintenance and External Bank Maintenance.
-  **Reports** : Click this menu to generate reports and view the generated reports.
-  **File Upload** : Click this menu to create a file identifier and map it to the user along with file upload and inquiry
-  **Communication** : Click this menu to access User Group Subject Mapping, Alert Maintenance and Mailers.
-  **Controls and Monitoring** : Click this menu for controlling and monitoring the transactions like transaction blackout, working window and Audit log.
-  **User Experience** : Click this menu to manage and build your customize dashboards.
-  **Templates** : Click this menu to manage service request form, feedback and SMS banking templates.
-  **OAuth** : Click this menu to manage and limit the third party authorization access to an HTTP service.
-  **Others** : User Group Management, Print Password, Alert Subscription, Request Processing and User Help Desk.
-  **Mail Box** : Click this menu to view the Mails, Alerts and Notifications.

-  **Account Setting**: Click this menu to view the user's profile and login details like start date and time, end date and time, Channel and IP address of the last sessions of the logged in user.
-  **ATM/Branch Locator**: Click to view the address and location of the ATMs and the branches of the Bank.
-  **Security Settings**: Click here to setup security questions and change password.
-  **Help**: Click this menu to launch the online help.
-  **About**: Click this menu to view the information about the application like version number, copyright etc.

Note: The user will be shown the above options only if he has the access to the all the transactions falling under that group.

Quick Links

On-boarding

(a) User Management

Bank Administrator can search and view users, create users and modify users. User can reset passwords of the users. Bank Administrator can also change the user status (lock/unlock) and grant/deny the channel access to a user, through this option.

(b) Party Preferences

Party Preferences maintenance enables Bank administrator to define certain parameter values as per the corporate entities requirements. Following preferences can be set for a corporate party:

- Cumulative Daily/Monthly limits per transaction
- Transaction limits for users
- Approval flow – Parallel or Sequential or none
- To enable Channel access or not
- To enable Forex Deal creation or not
- To enable a Corporate Administrator or not.

Approvals

(a) Workflow Management

Approval workflows are created to support requirements where multiple levels of approval are required in a specific sequence for a transaction/maintenance. Each workflow can be configured to have up to 5 levels of approval with a specific user or a user group configured at each level.

Bank Administrator Maker can search and view approval workflows maintained and create new workflows. As a part of creating workflows, user can add various levels of approvals and map users or user groups to each level. User can also modify workflows maintained.

(b) Rules Management

The Bank administrator – Maker, can set up rules, for approvals. Applying a rule makes the requirement for an approval more customized. For instance, through this screen, the bank administrator can create a rule, so that all administrator maintenances initiated by a certain user-group, always require approval.

Account Access

(a) Party Account Access

Bank Administrator can set up account and transaction access rules at the corporate party level. The administrator can provide access to accounts held by the party with the bank as available in the core banking system. Bank Administrator maker can search and view accounts and transactions mapping done at primary party and linked party. User can create, modify and delete such mapping.

(b) User Account Access

Using this option Bank Administrator can set up account and transaction access for user(s) of the corporate party. This maintenance can be done only after the Party Account Access is setup for the party of the user(s). Bank Administrator maker can search and view account and transaction mapping of a specific user. User can create, modify and delete mapping of a user to an account / transaction.

Resource Access**(a) Party Resource Access**

As part of Resource Access Management, administrator can define access on resources other than account like Remitter List from Virtual Account Management for a Corporate Party.

(b) User Resource Access

As part of Resource Access Management, administrator can define access on resources other than account like Remitter List from Virtual Account Management for a specific corporate user.

File Upload**(a) File Identifier Maintenance**

Bank administrator – Maker, can create file identifiers (FI) for a corporate entity. A File Identifier is always mapped to a specific single file template. It permits configuration of corporate preferences like approval type (file level/ record level) for a particular type of file. This is a pre-requisite for the File Uploads functionality, for a corporate.

(b) User File Identifier Mapping

Through this option Bank Administrator – Maker, can map a file identifier to a user to grant access rights to the user, for this specific file type. This maintenance enables a user to upload a specific file, approve the uploaded file and view its status. Bank administrator maker can map / un-map file identifiers to a User. Further, user can enable or disable the sensitive data check. This is a pre-requisite maintenance, for the File Uploads functionality, for a corporate.

Origination Administrator**Others****(a) Request Processing**

Service requests allows the Bank Administrator- maker to search and view all the service requests that have been initiated by the Bank customers and are available with various statuses like Open, Completed and Rejected. Bank Administrator can search the service requests with specific search criteria and can update the status of open service requests.

(b) Feedback

Using this option, the Administrator can maintain the feedback templates by defining the feedback question, selecting the rating scale, adding new questions along with new options, selecting the transactions for which feedback capture needs to be enabled.

The administrator can also decide whether an additional question is to be asked for a scale weight and select the applicable options for the question.

(c) User Help Desk

This option enables the Administrator to create business user's session and perform the transaction requested by business user if he has forgotten his internet banking password or is unable to perform a transaction using his internet banking.

To authenticate the user, system will send an OTP to the customer and the same OTP needs to be communicated to the administrator user so that he can enter it on the screen to create user's session.

Note:

- If the setup requires an approval workflow, it will be initiated. Once approved by the required number of approvers, the maintenance will be effective.
- If the setup does not require an approval workflow or is self / auto approved, the maintenance will come into effect on saving and confirming.

Activity Log

The Bank Administrator – Maker, can view the log of activities here. For ease of use, user can provide a Date Range and search.

Icons

- : Click this icon to search the transactions that are performed on a particular date. It has two fields From and To, you can select the start and end date to search the transaction.

(a) Corporate Activity Log

In the Corporate activity log, the bank administrator – Maker, can view the activities of corporate users. The following fields are displayed.

- Date: Date of the maintenance
- Description: Description of the maintenance
- Party Name: Party Name
- Reference Number: Reference number of the maintenance.
- Status: Status of the maintenance

(b) Administrative Activity Log

Through the Admin Activity log, the bank administrator - maker can view the bank admin activities. The following fields are displayed:

- Date: Date of the maintenance
- Description: Description of the maintenance
- Reference Number: Reference number of the maintenance.
- Status: Status of the maintenance

(c) Bulk File Administrator Activity Log

In Bulk File Activity Log, the Bank Administrator – maker, can view the bulk file activities. The following fields are displayed.

- Date: Date of the maintenance
- File Identifier: Unique code assigned to files as required by parties
- File Name: Name assigned to files.
- Initiated by: Initiator of the Party Maintenance.
- Reference No: Reference number of the maintenance.
- Status: Status of the maintenance

(d) Bulk Record Administrator Activity Log

In Bulk Record Activity Log, the Bank Administrator – maker, can view the bulk record activities. The following fields are displayed.

- Date: Date of the maintenance
- File Identifier: Unique code assigned to files as required by parties
- File Name: Name assigned to files
- Initiated by: Initiator of the Party Maintenance.
- Reference No: Reference Number of the maintenance.
- Status: Status of the maintenance

Transaction Journey

Click the **Reference Number** link in the **Activity Log** section to view the Transaction Journey.

This screen displays the transaction details and transaction journey of corporate and administrator transactions. It displays the current status of transaction whether it is Initiated, Approved, Locked or Completed.

The screenshot displays the 'Create Approval Rules' configuration page. At the top, there is a navigation bar with 'futura bank' logo, a search icon, and user information: 'Welcome, Leo Thomas' and 'Last login 29 Apr 10:37 AM'. The main content area is divided into several sections:

- Rule Type:** A set of tabs including 'Financial', 'Non Financial', 'Maintenance', 'Non Account Financial', and 'Administrator' (which is selected).
- Rule Code:** Rule001
- Rule Description:** Rule001
- Initiator:**
 - Initiator Type:** 'User' (selected) and 'User Group'.
 - PS Maker (PSMaker)
 - User
- Transactions:** All Admin Maintenances
- Workflow Details:**
 - Approval Required:** 'Yes' (selected) and 'No'.
 - Workflow:** approverAakash, Level 1, Aakash aa Aakash
- Transaction Journey:** A horizontal timeline with three stages:
 - Initiation:** Represented by an upward arrow icon, with the text 'Leo Thomas' and '30 Dec 01:20 PM' below it.
 - Approval:** Represented by a downward arrow icon.
 - Completion:** Represented by an upward arrow icon, with the text 'Processed' and '30 Dec 01:20 PM' below it.

A 'Back' button is located at the bottom left of the main content area. At the very bottom of the page, there is a copyright notice: 'Copyright © 2006, 2020, Oracle and/or its affiliates. All rights reserved. | Security Information | Terms and Conditions'.

The screen displays the details of the transaction that is to be approved for review.

Transaction Journey

This section displays the status of transactions that has been initiated by the maker. Transaction journey displays the status as:

- Initiation
- Approval
 - Locked
- Completion

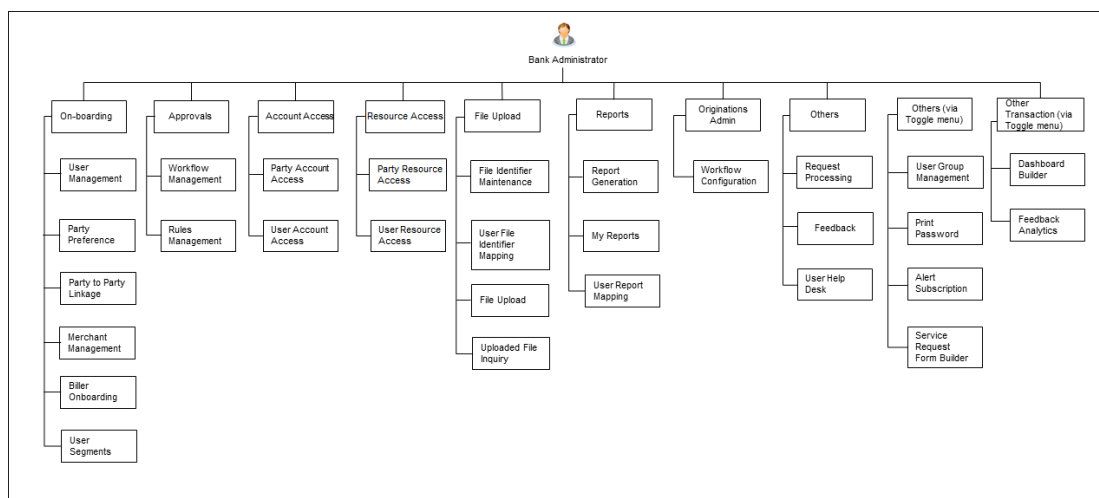

1. Click **Back** to navigate to the **Dashboard**.

3.3 Administrator Approver Dashboard

This dashboard is available for Bank administrator users whose main responsibility is of approving the transactions initiated by Bank administrator in maker role. Approver has the responsibility to ensure correctness of the maintenances as per the bank and corporate mandate, to ensure speedy and accurate processing.

Note: Toggle menu transactions of Bank Administrator – Approver is same as ‘System Administrator’ transactions depending on the access as provided to the user.

Workflow

Approver Dashboard - Overview

The Bank Administrator – Approver dashboard comprises of:

- Pending Approvals
- Quick Links
- Other options accessed via menu
- Activity Log

Dashboard Overview

Icons

Following icons are present on the approver's dashboard:

-  : Clicking this icon takes you to the dashboard.
-  : Clicking this icon takes you to the Mailbox screen.
-  : Click this icon and enter the transaction name to search the transactions.
-  : Click this icon to view the user's profile and for logout option
-  : Click the toggle menu to access the list of all the transactions.

Toggle Menu Transactions

Following items are present on the Toggle Menu:

- **Your Current View is:** Select your role as Approver. The drop-down to select the role is available only if the user is mapped with more than one role.
- **Select Language:** Select your desired language from the drop-down list.
-  **Configuration**: Click this menu to access the configuration like System Rules, System Configuration, Transaction aspects etc.
-  **Authorization and Access Co...**: Click this menu to setup access controls and authorization related transactions like maintain touch points, Application role creation and entitlement mapping etc.
-  **Security**: Click this menu to access the security setup related transactions like setting up second factor authorization, password policy etc.
-  **Limits**: Click this menu to manage limits.
-  **Onboarding**: Click this menu to onboard and manage Party, users, merchants and billers.
-  **Access Management**: Click this menu to set up account access rules for a corporate.
-  **Approvals**: Click this menu to access and setup Approval workflow and rules for Corporate and Administrator users.

- Date: Date of the maintenance
- File Identifier: Unique code assigned to files as required by parties
- File Name: Name assigned to files
- Initiated by: Initiator of the Party Maintenance.
- Reference No: Reference number of the maintenance.
- Status: Status of the maintenance

Quick Links

Onboarding

(a) User Management

The Bank Administrator can search and view users, create users and modify users. User can reset passwords of the users. Also user can lock / unlock a user, through this option.

(b) Party Preferences

Party Preferences maintenance enables Bank Administrator to define certain parameter values as per the corporate entities requirements. Following preferences can be set for a corporate party:

- Cumulative Daily/Monthly limits per transaction
- Transaction limits for users
- Approval flow – Parallel or Sequential or none
- To enable Channel access or not
- To enable Forex deal or not

- To enable a Corporate Administrator or not.

Approvals

(a) Workflow Management

Approval workflows are created to support requirements where multiple levels of approval are required in a specific sequence for a transaction/maintenance. Each workflow can be configured to have up to 5 levels of approval with a specific user or a user group configured at each level.

Bank Administrator Approver can search and view approval workflows maintained and create new workflows. As a part of creating workflows, user can add various levels of approvals and map users or user groups to each level. User can also modify workflows maintained.

(b) Rules Management

The Bank administrator – Approver, can set up rules, for approvals. Applying a rule makes the requirement for an approval more customized. For instance, through this screen, the Bank Administrator can create a rule, so that all administrator maintenances initiated by a certain user-group, always require approval.

Account Access

(a) Party Account Access

Bank Administrator can set up account and transaction access rules at the corporate party level. The administrator can provide access to accounts held by the party with the bank as available in the core banking system. Bank administrator Approver can search and view accounts and transactions mapping done at primary party and linked party. User can create, modify and delete such mapping.

(b) User Account Access

Using this option Bank Administrator can set up account and transaction access for user(s) of the corporate party. This maintenance can be done only after the Party Account Access is setup for the party of the user(s). Bank administrator Approver can search and view account and transaction mapping of a specific user. User can create, modify and delete mapping of a user to an account / transaction.

Resource Access

(a) Party Resource Access

As part of Resource Access Management, administrator can define access on resources other than account like Remitter List from Virtual Account Management for a Corporate Party.

(b) User Resource Access

As part of Resource Access Management, administrator can define access on resources other than account like Remitter List from Virtual Account Management for a specific corporate user.

File Upload

(a) File Identifier Maintenance

Bank administrator – Approver, can create file identifiers (FI) for a corporate entity. A File Identifier is always mapped to a specific single file template. It permits configuration of corporate preferences like approval type (file level/ record level) for a particular type of file. This is a pre-requisite for the File Uploads functionality, for a corporate.

(b) User File Identifier Mapping

Through this option bank administrator – Approver, can map a file identifier to a user to grant access rights to the user, for this specific file type. This maintenance enables a user to upload a specific file, approve the uploaded file and view its status. Bank administrator Approver can map / un-map file identifiers to a User. Further, user can enable or disable the sensitive data check. This is a pre-requisite maintenance, for the File Uploads functionality, for a corporate.

Others

(a) Request Processing

Service requests allows the bank administrator- approver to search and view all the service requests that have been initiated by the maker and are pending for approvals. This option also allows him to approve or reject the service requests.

(b) Feedback

Using this option, the Administrator can maintain the feedback templates by defining the feedback question, selecting the rating scale, adding new questions along with new options, selecting the transactions for which feedback capture needs to be enabled.

The administrator can also decide whether an additional question is to be asked for a scale weight and select the applicable options for the question.

(c) User Help Desk

This option enables the Administrator to create business user's session and perform the transaction requested by business user on his behalf in case, he has forgotten his internet banking password or is unable to perform a transaction using his internet banking.

To authenticate the user, system will send an OTP to the customer and the same OTP needs to be communicated to the administrator user so that he can enter it on the screen to create user's session.

Activity Log

The Bank administrator – Approver, can view the log of activities here. For ease of use, he can provide a Date Range and search.

Icons

- : Click this icon to open the section in a new window.

- : Click this icon to search the transactions that are performed on a particular date. It has two fields From and To, you can select the start and end date to search the transaction.

(a) Corporate Activity Log

In the Corporate activity log, the Bank administrator – Approver, can view the activities of corporate users. The following fields are displayed.

- Date: Date of the maintenance
- Description: Description of the maintenance
- Party Name: Party Name
- Initiated by: Initiator of the Party Maintenance.
- Reference Number: Reference number of the maintenance.
- Status: Status of the maintenance

(b) Administrative Activity Log

Through the Admin Activity log, the Bank administrator – Approver, can view the bank admin activities. The following fields are displayed:

- Date: Date of the maintenance
- Description: Description of the maintenance
- Initiated by: Initiator of the Party Maintenance.
- Reference No: Reference number of the maintenance.
- Status: Status of the maintenance

(c) Bulk File Administrator Activity Log

In Bulk File Activity log, the Bank Administrator – approver, can view the bulk file activities. The following fields are displayed.

- Date: Date of the maintenance
- File Identifier: Unique code assigned to files as required by parties
- File Name: Name assigned to files
- Initiated by: Initiator of the Party Maintenance.
- Reference No: Reference number of the maintenance.
- Status: Status of the maintenance

(d) Bulk Record Administrator Activity Log

In Bulk Record Activity Log, the Bank Administrator – approver, can view the bulk record activities. The following fields are displayed.

- Date: Date of the maintenance
- File Identifier: Unique code assigned to files as required by parties
- File Name: Name assigned to files

- Initiated by: Initiator of the Party Maintenance.
- Reference No: Reference number of the maintenance.
- Status: Status of the maintenance

3.4 Approve the transaction

The transactions that have been initiated by the maker and are pending for approvals are listed here. The approver user logs in to the application, user views all the transactions that are pending for approvals.

The approver can Lock the transaction, which are waiting for his approval, with comment if any. Once a transaction is locked, no action (like approve, reject) will be allowed on that transaction. Approver who is part of the approval workflow of the locked transaction and is authorized to approve the transaction, will be able to unlock that transaction by going to transaction approval page.

Approver can also Lock a transaction, in case he wants to verify something operationally before approving it. Once the transaction is locked, the same will not be available for approval and the transaction status will be changed to 'Locked'. Maker will be able to see transaction with "Locked" status in his activity log. Once a transaction is locked, no action (like approve, reject, send to modify) will be allowed on that transaction.

Any approver, who is authorized to approve that transaction, will be able to unlock it by going to transaction approval page. Once the transaction is unlocked, it will be available for approval to the users as per the workflow

How to reach here:

Approver Dashboard > Pending for Approvals section

To approve the transaction:

1. Click the **Reference Number** link of the transaction that is to be approved, in the **Pending for Approval** section. The transaction screen appears for review and approval.

Transaction to approve

This screen displays the details of the transaction that is to be approved for review.

Transaction Journey

This section displays the status of transactions that has been initiated by the maker. Transaction journey displays the status as:

- Initiation
- Approval
- Completion

-
2. Click **Approve** to approve the initiated transaction. The **Transaction Approval** screen appears.
OR
Click **Reject** to reject the transaction.
OR
Click **Lock** to Lock the transaction
OR
Click **Back** to navigate to the **Dashboard**.
 3. Enter the remarks and click **Approve**.
OR
Enter the remarks and click **Reject**.
OR
Click **Cancel** to cancel the transaction.
The screen with success message appears.

FAQ

1. How can I access different dashboards if multiple roles are assigned to me?

A drop down is available on the top navigation bar to switch between the different dashboards if multiple roles are assigned to you.

1. Will I be able to see the current status of a transaction initiated by me?

Yes, transaction journey section shows the latest status of the transaction along with the date, time and name of the user last acted on the same.

2. What are quick links; can I change the transactions appearing under quick link section?

Quick links gives you easy access to some of the more commonly used transactions/maintenances in the system. You cannot change the transactions appearing under quick link section.

3. Can I remove/grant access of a transaction to System/Bank administrator?

Yes, transaction access can be given or removed for a particular application role from role transaction mapping function.

[Home](#)

4. User Management

User Management function enables System/ Bank Administrator to onboard and manage users and their login credentials for channel banking access. This module facilitates channel banking access to the bank's internal users (administrators) and external users (customers).

This function also lets the System/Bank Administrator to define the various touch points from which the user can access the channel banking and limit package applicable for the same.

Users can also be mapped to a User Segment, so that the attributes applicable at the segment level should get applied to the user. Currently user segments are only applicable for user type Retail.

In a multi entity scenario, this function enables system/ bank administrator to provide access to multiple entities to users.

Internal Users

- System Administrator
- Bank Administrator

External Users

- Retail User
- Corporate User
- Non Customer- Corporate users
- Corporate Administrator

Pre-Requisites

- User Segment and Application roles are maintained
- Transactions are associated with each Application role
- Transaction (User Management) access is provided to System/Bank Administrator.
- Approval rule set up for Bank administrator to perform the actions.
- Party Preference is maintained for corporate user

Workflow

Features Supported In Application

The User Management module allows the system/bank administrator to

- Create User
- View User
- Edit User
- Reset Password

How to reach here:

System/ Bank Administrator Dashboard > Onboarding > User Management

OR

System/ Bank Administrator Dashboard > Toggle menu > Onboarding > User Management

Note: Non Customer Corporate users (for which the linked party id is not maintained in UBS or in Core banking system), can also be on boarded on OBDX. For such cases i.e. for non customer corporate users (counterparties on boarded by Corporates) the system will look for the party ID in OBSCF/OBCMS.

4.1 User Management - Create

System/Bank Administrator logs into the system and navigates to the User Management screen. This function allows the administrator to create internal and external users.

Note: In case of multi entity implementation, if the system/bank administrator has access to multiple entities, then the administrator can select the entity from the entity switcher on which the user needs to be on boarded. The selected entity of the user as part of onboarding will be the default/home entity of the user being created.

To create a new user:

1. In the **User Management** screen, click **Create**. The **User Management - Create New User** screen appears.
 2. From the **User Type** list, select the appropriate type for the user being created.
 - If the user type selected is **Retail User** or **Corporate User**, then the **Party ID** and **Party Name** fields appear.
 - If the user type selected is **Administrator**, then the **Personal Information**, **Contact Details**, **Roles**, **Touch Points**, and **Accessible Entity Details** sections appear.
- OR
- Click **Back** to navigate to previous screen.
- OR
- Click **Cancel** to cancel the transaction.

Create User - Select User Type

The screenshot shows the 'User Management' section of the Futura Bank interface. At the top, there's a navigation bar with 'Maker', 'ATM/Branch', 'English', and 'UBS 14.3 AT3 Branch'. Below that, the 'futura bank' logo is on the left, and a search bar with the text 'Search for transactions example Pay Bills' is on the right. The main content area is titled 'User Management' and contains a form with the following fields:

- User Type:** A dropdown menu currently showing 'Retail User'.
- Username:** An empty text input field.
- Party ID:** An empty text input field with a 'Search Party Name' link below it.

Below the form, there are three buttons: 'Search', 'Cancel', and 'Clear'. To the right of the form is a 'Note' box with the following text:

Note

This function enables you to onboard and manage users, their personal information and their login credentials for channel banking access.

You can also define the various Touch Points from which the user can access the application and limit package applicable for the same.

User Status change (lock/unlock) and whether the channel access has to be given to the user can be simply be managed and updated from the search results.

At the bottom right of the form area, there is a 'Create' button and a help button that says 'Hey, I am here to help if you need it!'.

Field Description

Field Name	Description
User Type	User type for which the new user is to be created. The user can be: <ul style="list-style-type: none"> • Corporate • Retail • Administrator

Create User – Map Party ID

If the user type to be created is selected as Retail or Corporate User, then an option is provided to search for the party that is present in the core banking system. The user can search for the party either using the party ID or party name.. The matching results are displayed on the screen.

In case of a party search by party ID, it is an exact match and Party ID entered by the user gets validated from the core banking application. After the core banking application validation is successful, party name gets displayed on the screen.

In case of a party search by name, system displays the matching party records. The records have parties listed with both Party ID and Party Name information. User can select the record by clicking on the Party ID from the list.

The screenshot displays the 'User Management' interface for Futura Bank. At the top, there's a navigation bar with 'Maker', 'ATM/Branch', 'English', and 'UBS 14.3 AT3 Branch'. Below this, the 'User Management' section includes search filters for 'User Type' (set to 'Retail User'), 'Username', and 'Party ID'. A 'Search Party Name' button is also present. A 'More Search Options' dropdown is visible with 'Search' and 'Clear' buttons. The search results are shown in a table with columns: Full Name, User Name, Status, and Channel Access. The table lists 12 users, all with 'Unlocked' status and 'Granted' channel access. A 'Note' box on the right provides instructions on how to use the function and includes a 'Create' button. The page footer contains copyright information for Oracle.

Select the limits package to be associated to the user for the accessible entity for each touch point. This section is only applicable for retail and corporate type of user.	
Touch Points/ Group	Name of touch points/ groups under a specific entity to which the limit packages are to be mapped.
Package	List of the packages which can be mapped to touch points/ groups. Only limit packages maintained for the selected touch point will get listed here.
Roles	For the accessible entity selected/added, system will default the roles same as that of home entity of the user. The administrator cannot define separate roles for each of the entities.
Select Touch Points	The touch points (banking channels) allows a user to perform transactions using the touch points. The touch points could be: <ul style="list-style-type: none"> • Mobile Application • Mobile (Responsive) • Internet • Missed Call Banking • SMS Banking • Wearables • Snapshot • Siri / Chatbot • API Access • Soft Token Application

- v. In the **User Name** field, enter the required details. Click **Check Availability** to check the uniqueness of the user ID. If the user ID is already used, then enter a unique valid username.
- vi. In the rest of the **Personal Information** section, enter the required details.
- vii. In the **Contact Details** section, enter the required details.
- viii. In the **User Groups** field, enter the user groups that the user must be added to. This field is present if a corporate user type is being onboarded.

- ix. In the **Limits** section, select the limit packages to be mapped to touch points from the limit package list.
 - Click  to reset the limit package assigned.
 - Click  to view the details of a touch point group. The **View Details** popup window appears. For more information, refer the **Touch Points Group - View Details** section below.
- x. From the **User Segment** list, select the appropriate segment for the user in **Limits and Roles** section. This field is present if a retail user type is being onboarded.
- xi. Select the checkbox (s) against the **Roles**, to map to the selected **User Segment**.
- xii. In the **Touch Points** section, select the check boxes beside the touch points to be mapped to the user.
- xiii. Add the accessible entities for the user and select the party and limits for that entity (applicable only if Bank has Multi Entity setup), as follows:
 1. Click **Add Accessible Entity** button, to add accessible entity to a user.
 2. From the **Entity Name** list, select the name of the entity.
 3. In the **Party ID** field, enter the party ID.
 4. In the **Party Name** field, enter the party name.
 5. Click **Search**. The search result is displayed.
 6. Select the appropriate party ID.
 7. In the **Limits** section, select the appropriate limit package under the **Package** for each touch point.

Touch Points Group - View Details

This pop-up screen appears on clicking  beside a touch point group in the **Limits** section, which appears when onboarding corporate or retail user types.

Field Description

Field Name	Description
Group Code	Group code defined for touch point group.
Group Description	Group description defined for touch point groups.
Group Type	Type of touch point i.e. whether touch point is of type internal or external.
Touch Points	List of the internal or external touch points.

- b. If you select the **Administrator** option from the **User Type** list:
 - i. In the **Organization** field, enter the organization of the employee.
 - ii. In the **Manager** field, enter the name of the manager of the user being created.
 - iii. In the **Employee Number** field, enter the six digit employee number of the user.
 - iv. In the **Personal Information** section, enter the required details.
 - v. In the **Contact Details** section, enter the required details.
 - vi. In the **Roles** section, select the roles to be assigned to the administrator.
 - vii. In the **Touch Points** section, select the check boxes beside the touch points to be mapped to the user.
 - viii. Add the accessible entities for the user (applicable only if Bank has Multi Entity setup)
4. Click **Save** to save the user details.
OR
Click **Cancel** to cancel the transaction.

- OR
Click **Back** to navigate to the previous screen.
5. The **Review** screen appears. Verify the details, and click **Confirm**.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Back** to navigate to the previous screen.
The user will be navigated back to the create screen
6. The success message of user creation appears along with the transaction reference number.
Click **OK** to complete the transaction.

4.2 User Management - Search and View

Using this option, System/ bank administrators can search and view details of the existing users. Administrator selects the user type of the user to be searched.

System/ bank administrators can also change the user status or the channel access permission for a user using this screen.

Default search is available with User Name, but the user can also be searched by providing other details like First Name, Last Name, Party ID. Email ID and Mobile Number.

To search for a user:

1. Enter the search criteria, click **Search**.
The search results appear on the **User Management** screen based on the search parameters.
OR
Click **Cancel** if you want to cancel the transaction.
OR
Click **Clear** if you want to reset the search parameters.

Field Description

Field Name	Description
User Type	Type of user to be searched. The user can be: <ul style="list-style-type: none"> • Corporate User • Administrator • Retail User
User Name	To search the user with the user name. Partial search is allowed. The User ID is case insensitive.
More Search Options	
Below fields appears if you click the More Search Options link.	
First Name	Allows to search based on first name or given name of the user.
Last Name	Allows to search based on last name/ surname of the user.
Email	Allows to search based on email id of the user.
Mobile Number	Allows to search based on mobile number of the user.
Party ID	Allows to search based on Party id. This field appears if you select Retail or Corporate User option from User Type list.

To view the user details:

1. Enter the search criteria and click **Search** in the **User Management** screen.
The search results appear based on the search parameters.

User Management - Search Results

The screenshot displays the 'User Management' search results page. At the top, there's a navigation bar with 'System Administrator', 'ATM/Branch', 'English', and 'UBS 14.3 AT3 Branch'. Below that, the 'futura bank' logo is visible. The search filters include 'User Type' set to 'Retail User', 'Username' set to 'ryanp', and 'Party ID' with a 'Search Party Name' link. There are 'Search' and 'Clear' buttons. The search results table has columns for 'Full Name', 'User Name', 'Status', and 'Channel Access'. One result is shown: 'Sam Bill' with 'User Name' 'RyanPBohr', 'Status' 'Unlocked', and 'Channel Access' 'Granted'. A 'Page 1 of 1 (1 of 1 items)' indicator is present. A 'Note' box on the right contains text about user onboarding and management, and a 'Create' button. A 'Cancel' button is at the bottom left of the search results area.

Limits - Touch Point/Groups	
	Limits package associated to the user for the accessible entity. This field is only applicable for retail and corporate.
Touch Points/ Group	Name of touch points/ groups maintained under a specific entity for which the limit packages are mapped.
Package	Name of the limit package mapped against specific touch points /touch point groups.
Roles	For the accessible entity selected/ added, system will default the roles same as that of home entity of the user. The administrator cannot define separate roles for each of the entities.

- Click **Edit** to edit the user details.
OR
Click **Reset Password** to reset user's password. For more information refer, **Reset password** section.
If user clicks '**No**', the action gets cancelled.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Back** to navigate to the previous screen.
OR
Click  **Download profile** to download the user details.

User Management - Change user status

This section allows you to lock and unlock a user.

To lock or unlock a user:

- Enter the search criteria, click **Search**.
The search results appear on the **User Management** screen based on the search parameters.

Lock / Unlock User

The screenshot displays the 'User Management' screen. At the top, there's a navigation bar with 'System Administrator', 'ATM/Branch', 'English', and 'UBS 14.3 AT3 Branch'. Below that, the 'futura bank' logo is on the left, and a user profile 'Welcome, Leo Thomas' is on the right. The main content area is titled 'User Management' and contains search filters for 'User Type' (Retail User) and 'Username' (ryalp). There are 'Search' and 'Clear' buttons. Below the filters is a 'Search Results' table with the following data:

Full Name	User Name	Status	Channel Access
Sam Bill	RyanPBohr	Unlocked 	Granted 

At the bottom of the table, there's a 'Cancel' button. On the right side, there's a 'Note' box with text explaining the function and a 'Create' button. The footer contains copyright information: 'Copyright © 2006, 2020, Oracle and/or its affiliates. All rights reserved. | Security Information | Terms and Conditions'.

- Click  in the **Status** column to lock / unlock a user. The **User Status Maintenance** screen appears.

3. In the **Lock Status** field move the slider to lock / unlock a user.
4. In the **Reason** field enter the appropriate description.
5. Click **Submit** to save.
OR
Click **Cancel** to close.

User Management - Channel Access Permission

This section allows the administrator to grant / revoke channel access for a user. In case Bank administrator changes the channel access from grant to revoke, user will not be able to access his channel banking.

Note: Channel Access feature is only available and displayed if the Application is configured on DB Authenticator as Identity Management system.

To grant or revoke channel access:

1. Enter the search criteria, click **Search**.
The search results appear on the **User Management** screen based on the search parameters.

Channel Access

2. Click  in the Channel Access column to grant / revoke channel access to a user. The User Channel Access screen appears.

3. In the **Channel Access** field move the slider to grant / revoke channel access rights for a user.

4. In the **Reason** field enter the appropriate description.
5. Click **Submit** to save.
OR
Click **Cancel** to close.

4.3 User Management - Edit

This function enables the Administrator to edit the existing user details.

To edit or update a user details:

1. Enter the search criteria, click **Search**.
The search results appear on the **User Management** screen based on the search parameters.
OR
Click **Clear** if you want to reset the search parameters.
OR
Click **Cancel** if you want to cancel the transaction.
2. In the **User Management - Search Results** section, click the **User Name** link of the record for which you want to edit the user details.
The **User Management - View** screen appears.
3. Click **Edit** to update the user information.
OR
Click **Reset Password** to reset user's password. For more information refer, **Reset password** section.
If user clicks **No**, the action gets cancelled.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Back** to navigate to the previous screen.

OR
Click **Cancel** to cancel the transaction.
OR
Click **Back** to navigate to the previous screen.
15. The success message of updates appears.
Click **OK** to complete the transaction.

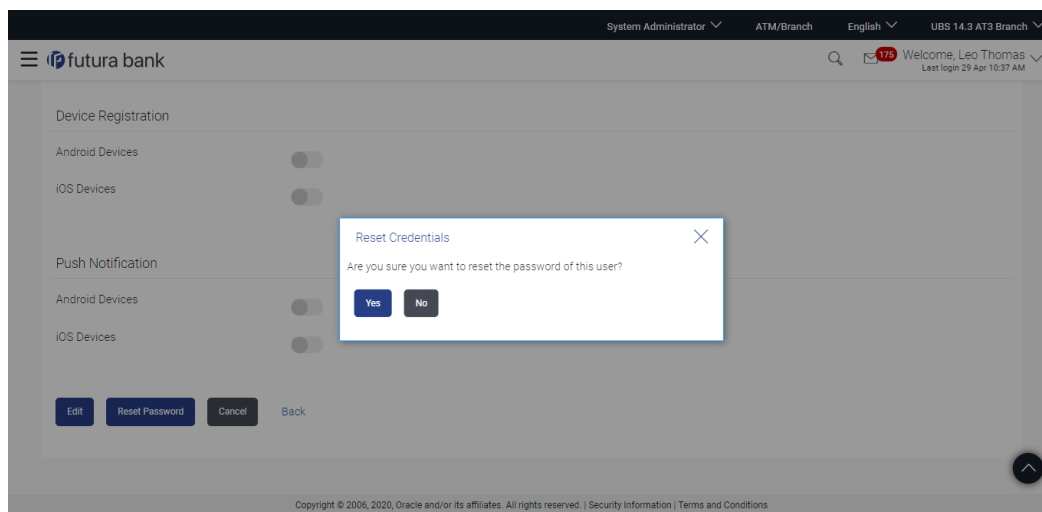

4.4 Reset Password

This function enables the Administrator to reset the password.

To reset password:

1. Enter the search criteria, click **Search**.
The search results appear on the **User Management** screen based on the search parameters.
OR
Click **Clear** if you want to reset the search parameters.
OR
Click **Cancel** if you want to cancel the transaction.
2. In the **User Management - Search Results** section, click the **User Name** link of the record for which you want to edit the user details.
The **User Management - View** screen appears.
3. Click **Edit** to update the user information.
OR
Click **Reset Password** to reset user's password. A warning message '**Are you sure you want to reset the password of this user?**' appears on the screen.

Reset Password popup screen

4. If Administrator clicks **Yes**, a reset password confirmation screen is displayed.
5. User for whom the password is being reset gets the link to generate the new password on his/her registered email ID/mobile number (as per the alert mode maintained by bank).
6. User clicks on the link received on his/her email id and reset password screen appears.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Back** to navigate to the previous screen.

Reset Password screen for end user

Field Description

Field Name	Description
Password	New password for channel access.

Field Name	Description
Re-enter Password	Re-enter the new password to confirm.

7. In the **Password** field, enter the password.
OR
Click  icon to enter the new password using the virtual keyboard.
(See Password Condition section on the application screen to view the policy of setting a new password.)
8. In the **Re-enter Password** field, re-enter the password.
OR
Click  icon to re-enter the password using the virtual keyboard.
9. Click **Submit**.
OR
Click **Cancel** to cancel the transaction.
10. The success message of changing the password appears. Click **Login** on confirmation screen to log in to the application.

Note: Password Conditions gets highlighted in green if the user's password is meeting the Password Policy criteria and similarly in Red if the password is not as per the Password Policy maintained.

FAQ

1. Who can create / update the user?

System administrator, bank administrator and corporate administrator can create or edit the users. Corporate Administrator can create user for the part ID he belongs to.

2. Can I edit the party id mapped to the user?

No, party ID mapped to the user cannot be edited.

3. When does the system update a user status as 'locked'?

User status can get locked if he has exceeded the maximum number of attempts allowed for entering a wrong password.

4. When will the System/ Bank Administrator use Revoke Channel Access feature?

Incase if the customer does not want to use his channel banking and requests bank to disable his internet banking, bank user can do the same by revoking the channel access for his user. Similarly if a corporate user leaves a corporate house, his channel access should be revoked using this feature, so that he should not be able to access the company accounts.

5. Can I set the user name which is already used in the application?

No, uniqueness of a user name/user ID is checked while creating or modifying a user.

6. Can I edit personal and contact details of Retail user?

No, personal and contact details of Retail user are fetched from the core banking application and cannot be edited using User Management functionality.

7. Can one assign multiple Application roles to a user?

Yes, multiple Application roles can be assigned to the user. e.g. Corporate user is acting as maker of few transactions and approver of few other transactions.

8. What are the different child roles available out of box?

Following are the Application role associated with each application role out of box.

Application Role	Application Roles
Retail User	Customer
Corporate User	<ul style="list-style-type: none"> • Maker • Checker • Viewer • Corporate Admin Maker • Corporate Admin Checker • Non Customer Maker • Non Customer Checker • Non Customer Viewer • Non Customer Corp Admin Maker • Non Customer Corp Admin Checker
Administrator	<ul style="list-style-type: none"> • Admin Maker • Admin Checker

9. If I update the limit package associated with a user, what will happen to the in-flight transactions?

Yes, new limit package can be mapped to a user. Limits get applied from an immediate effect if the effective date is less than or equal to current date. And if the effective date is future date, the limit package will be applied from the date available in the package.

10. If I update the Application role associated to a user, what will happen to the in-flight transactions?

In case of any update of Application roles mapped to the user as edit user functionality, the privileges associated with new child roles get applied to the user with an immediate effect. So if any transaction is pending with approver for approval, user can view and approve those transactions only if checker role is mapped to him. As soon as checker role is unmapped, then user will not be able to view and approve the transactions which were pending for his approval.

11. Can administrator with one entity have right to create users in different entity?

No, administrator can only create users in his own entity only.

12. Can I assign a user Segment to a Corporate User?

No, User Segment can only be attached to a Retail user.

13. Can I assign additional roles to a Retail user associated to a Segment?

Yes, system displays all the application roles which are not linked to a segment against the roles field, these roles can be attached to a user in addition to the roles attached to a segment.

14. If a user's User ID is locked and he/she has requested for a reset password, does the admin needs to unlock it separately ?

No, the user ID will automatically get unlocked at the time of resetting the password by Admin.

[Home](#)

5. Party Preferences

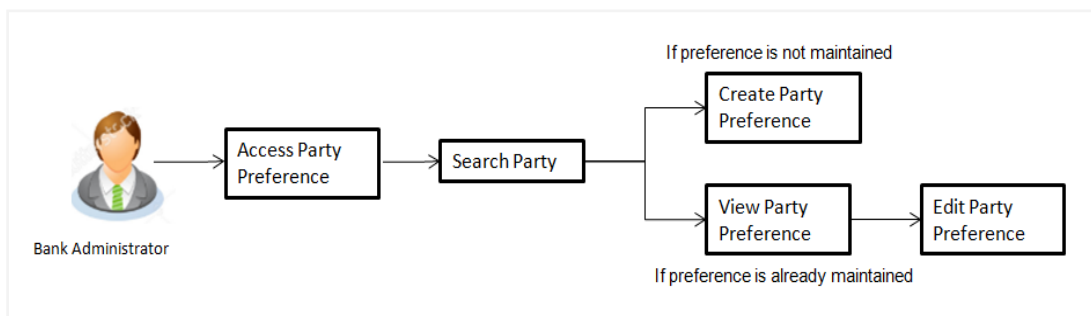

Party Preference setup allows the administrator to onboard the party on OBDX along with definition of attributes like limits, Approval flow, grace period etc. This maintenance is done only for corporate type of parties and is not applicable for retail type of parties. Parameter values maintained against a corporate party defines the system behavior for the following:

- Cumulative daily limits per transaction for the corporate party
- Transaction limits for the users
- Type of approval flow applicable
- Channel access preferences
- Availability of corporate administrator facility

Pre-Requisites

- Transaction access is provided to Bank Administrator.
- Approval rule set up for Bank Administrator to perform the actions.
- Party for which preference needs to be set up is created in core banking application.

Workflow

Features Supported In Application

Party Preference maintenance available for bank administrator in the application includes:

- Create Party Preferences
- View Party Preferences
- Edit Party Preferences

How to reach here:

System/ Bank Administrator Dashboard > Toggle Menu> Onboarding > Party Preferences

OR

Bank Administrator Dashboard > Onboarding > Party Preferences

Note: For Non Customer Corporates (for which the party id is not maintained in UBS or in Core banking system), can also be on boarded on OBDX using Party Preference. For such cases i.e. for non customer corporate (counterparties on boarded by Corporates) the system will look for the party ID in OBSCF/OBCMS.

5.1 Party Preferences- Search

Bank Administrator logs into the system and navigates to the Party Preferences screen.

System displays a screen to enter the party information (party ID or party name) and search party for which the preferences are to be maintained or viewed.

User can enter the party ID (if known) or the party name with a minimum of 5 characters. System matches the input provided by the user with the party name records and displays the matching party records.

In case of a party search by party ID, it is an exact match and system displays the party preference maintained if any, else displays an option to create party preference.

In case of a party search by account type and account number, system displays the associated party ID and Party name in the search results. The records have parties listed with both Party ID and Party Name information. User can select the record by clicking on the Party ID from the list.

To search party preferences of party:

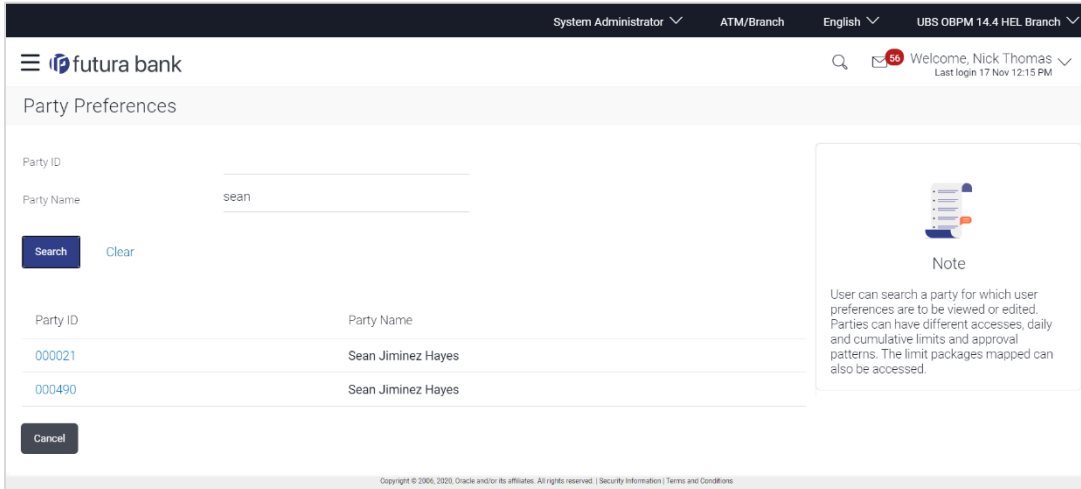

1. In the **Party ID** field, enter the party ID whose party preferences you want to view.
OR
In the **Party Name** field, enter the name of the party whose party preferences you want to view.
OR
In the **Account Type** field, select account type (i.e. CASA,TD & Loan) and Enter account number of party whose party preferences you want to view
2. Click **Search**.
If party preference is already maintained, user is directed to **Party Preference – View** screen.
If party preference is not maintained, user is directed to **Party Preference – Create** screen.
In case of invalid party, error message is shown on the screen.
OR
Click **Clear** to reset the details.
OR
Click **Cancel** to cancel the transaction and navigate the user back to **Dashboard**.

Party Preferences- Search (Party Id)

In case of a party search by name, system displays the matching party records. The records have parties listed with both Party ID and Party Name information. User can select the record by clicking on the Party ID from the list.

Party ID	Party ID for which the party preference to be maintained/ viewed.
Party Name	Party Name of a party for which the party preference to be maintained or viewed.
Account Type	Account type of Party for which the party preference to be maintained/ viewed. Account type can either CASA, TD & Loan.
Account Name	Account Number of a party for which the party preference to be maintained or viewed.

- Click **Edit** to edit the party preferences.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Back** to navigate to previous screen.

5.2 Party Preferences - Create

Using this option, Bank Administrator can configure party preferences for a specific party.

To create the party preferences:

1. In the **Party ID** field, enter the party ID you want to view the party preferences you want to view. Party ID entered by the user gets validated from the core banking application. After the core banking application validation is successful, a check is performed in application to verify if preferences are already maintained for a party.
If the preferences are already maintained then user is directed to **Party Preference – View** screen.
2. Click **Search**.
The party preference maintained for the party ID appears based on the entered search parameters.
OR
Click **Clear** to reset the details.
OR
Click **Cancel** to cancel the transaction and navigate the user back to **Dashboard**.
3. Click the desired party ID link under the **Party ID** column.
The **Party Preferences** screen appears.

Field Description

Field Name	Description
Edit	
Party ID	Party ID for which the party preference to be edited will be displayed.
Party Name	Party Name of a party for which the party preference to be edited will be displayed.
Details	
Grace Period	Provision of certain period of time is made to allow user to approve the transaction after the actual due date. <hr/> Note: The tooltip with information will appear on dashboard in the Pending_for_Approvals section only when the user hovers on grace period. <hr/>
Grace Period Expiry Alert	Enter the days prior to Grace Period Expiry, to alert Maker and Approver regarding transaction approval expiry period. <hr/> Note: 1) The value entered in this field should be less than the value entered in Grace Period field. 2) If there is no Grace Period present, then this will not get enabled. <hr/>
Occurrence	Specify the alert preference. The options are: <ul style="list-style-type: none"> • Recurring- an alert will be sent in a row before the grace period expiry date or until the transaction is approved (whichever is earlier) . • One Time- an alert would be sent only once with respect to value set in Grace Period <hr/> Note: 1) The field will become 'Conditional Mandatory' if the user inputs value in the Grace Period Expiry Alert field. 2) If there is no Grace Period present, then this will not get enabled. <hr/>

Field Name	Description
Alert on Transaction Expiry	<p>Specify if the alert is required to be sent on the Transaction Expiry Date.</p> <p>The options are:</p> <ul style="list-style-type: none"> • Yes • No <hr/> <p>Note:</p> <p>1) The field will become 'Conditional Mandatory' if the user inputs value in the Grace Period Expiry Alert field. 2) If there is no Grace Period present, then this will not get enabled.</p> <hr/>
File Encryption Key	<p>File Encryption key is the unique key provided to the corporate for encrypting/decrypting the bulk files that he is uploading.</p>
Approval Flow	<p>The approval type for the party.</p> <p>The options are:</p> <ul style="list-style-type: none"> • Sequential • Parallel • No Approval
Channel Access	<p>Whether users associated with a party can start transacting through internet and mobile banking.</p> <p>The options are:</p> <ul style="list-style-type: none"> • Enable : Allows bank administrator to enable the party for application channel access • Disable: Allows bank administrator to disable the party for application channel access
Forex Deal Creation	<p>Whether users associated with a party can create forex deals.</p> <p>The options are:</p> <ul style="list-style-type: none"> • Enable : Allows bank administrator to enable the party for forex deals • Disable: Allows bank administrator to disable the party for forex deals

Field Name	Description
Corporate Administrator Facility	This is to enable a corporate to have their corporate administrator facility. Only if this facility is enabled, a corporate administrator type of user can be created under a party in editable form. The options are: <ul style="list-style-type: none"><li data-bbox="683 468 813 495">• Enable<li data-bbox="683 510 813 537">• Disable

Accessible roles

This field only gets enabled if the user has selected Corporate Admin facility as 'enabled' in the previous field.

Select the roles for which the corporate administrator can onboard the new users. Corporate administrator will be able to onboard, modify, reset password, enable/disable user ID and grant/deny channel access (using User Management screen) only for the users having the roles assigned in this field.

Corporate Administrator will be able to view the details of all the users using User Management screen) associated to his party irrespective of the roles assigned here.

The options are:

- Corporate Admin Maker – If this is selected, corporate administrator will be able to onboard a user in corporate admin maker role.
- Corporate Admin Checker – If this is selected, corporate administrator will be able to onboard a user in corporate admin checker role.
- Maker – If this is selected, corporate administrator will be able to onboard a user in corporate maker role.
- Checker – If this is selected, corporate administrator will be able to onboard a user in corporate maker role.
- Viewer – If this is selected, corporate administrator will be able to onboard a user in corporate viewer role.

For Non Customer Corporate, the options are:

- Non Customer Corporate Admin Maker – If this is selected, non-customer corporate administrator will be able to onboard a user in non-customer corporate admin maker role.
- Non Customer Corporate Admin Checker – If this is selected, non-customer corporate administrator will be able to onboard a user in corporate non-customer admin checker role.
- Non Customer Corporate Maker – If this is selected, non-customer corporate administrator will be able to onboard a user in corporate maker role.
- Non Customer Corporate non-customer Checker – If this is selected, corporate administrator will be able to onboard a user in non-customer corporate maker role.
- Non Customer Corporate Viewer – If this is selected, corporate administrator will be able to onboard a user in non-customer corporate viewer role.

Note: If a non customer corporate is being onboarded then bank admin should select the non customer corporate roles.

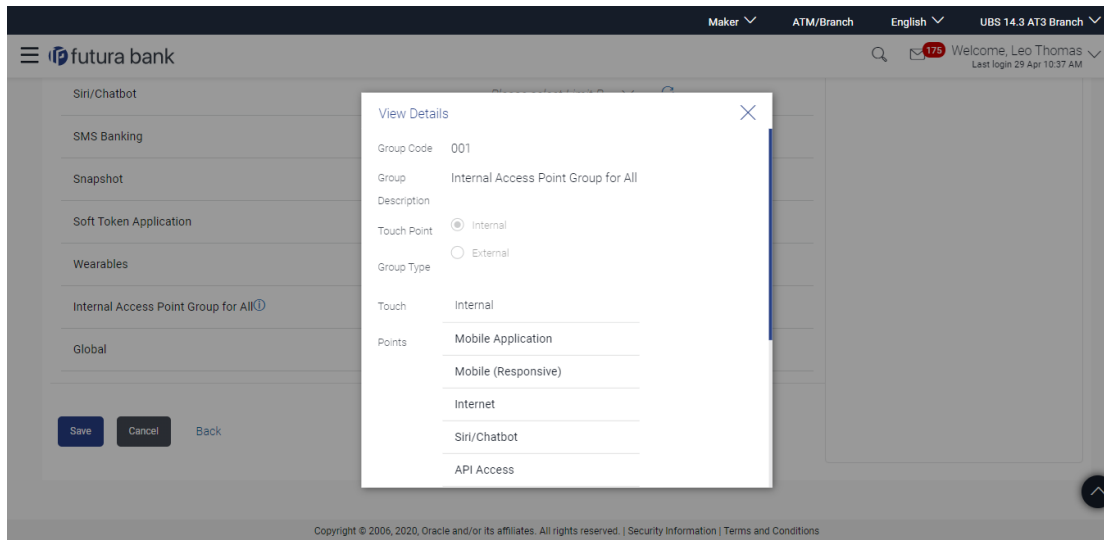

Field Name	Description
Cumulative Daily Limit	
	Name of the limit package defined. It allows Bank Administrator to map cumulative level limits to the party. All the limit packages maintained are listed. The cumulative limit set for the touch point / group. In case of multi entity set up, limit packages needs to be mapped at each entity level.
Touch Points/ Group	Name of touch points/ groups under a specific entity to whom the limit packages are to be mapped.
Package	List of the packages which are to be mapped to touch points/ groups. Only limit packages maintained for the selected touch point will get here.
User Limits	
	Name of the limit package. It allows mapping user level limits to the party. All the limit packages maintained are listed. The user limit set for the touch point / group. In case of multi entity set up, limit packages needs to be mapped at each entity level.
Touch Points/ Group	Name of touch points/ groups under a specific entity to whom the user limit packages are to be mapped.
Package	List of the packages which are to be mapped to touch points/ groups. Only user limit packages maintained for the selected touch point will get here.

4. In the **Grace Period** field, enter the number of grace period.
5. In the **Grace Period Alert** field, enter the days prior to Grace Period Expiry, to alert Maker and Approver regarding transaction approval expiry period.
6. In the **Occurrence** field, specify the alert preference.
7. In the **Alert On Transaction Expiry** field, specify whether to sent alert on the transaction expiry date or not.
8. In the **File Encryption Key** field, enter the unique File Encryption key provided to the corporate for encrypting/decrypting the bulk files that he is uploading.
9. In the **Approval Flow** field, select the appropriate option.
10. In the **Channel Access** field, select the appropriate option.
11. In the **Forex Deal Creation** field, select the appropriate option.
12. From the **Enable for Corporate Administrator** list, select the appropriate option.
13. From the **Cumulative Daily Limits** list, select the appropriate option.
14. From the **User Limit** list, select the appropriate option.

Note: Click  to refresh the option.

15. Click  to view the details of touch points group. The **View Details** popup window appears.

View Details - Touch Point Group

Field Description

Field Name	Description
Group Code	Group code defined for touch point group.
Group Description	Group description defined for touch point groups.
Touch Point / Group Type	Type of touch point i.e. whether touch point is of type internal or external.
Touch Points	List of the internal or external touch points.

16. Click **Save** to save Party Preference. User is directed to the **Party Preference - Review** page post necessary validations.
 OR
 Click **Back** to navigate to previous screen.
 OR

17. The **Review** screen appears. Verify the details, and click **Confirm**.
 OR
 Click **Edit** to make the changes if any.
 OR
 Click **Cancel** to cancel the transaction and navigate back to **Dashboard**.

18. The success message of updation appears.
Click **OK** to complete the transaction.

FAQ

1. What is sequential type of approval flow?

Under Sequential approval flow, the approval can be done only in the sequence as mentioned in approval workflow. So, at the 1st level of approval, users/user groups who are assigned to authorize only can view and approve the transaction. After the transaction is approved by level 1 user, users/user groups having rights for 2nd level of approval will be able to view and authorize the transaction. The transaction is marked as approved only after the user at the last level approves/authorizes it.

2. What is Parallel type of approval flow?

It is “Non-Sequential” type of approval flow which doesn’t follow any specific sequence. Any user (who is part of the approval flow) from any approval level can pick up the transaction/maintenance and approve it. The transaction/maintenance is marked as approved if one user from each approval level (as configured) has approved/authorized the transaction.

3. What is cumulative daily limit package?

This limit package acts as a cumulative limit for all users of a party and is utilized as and when any user authorizes the transaction as a final approver. The daily limit per transaction and number of transactions allowed limit is checked and updated against the cumulative limit set.

4. What is User limit package?

This limit package is applicable for all users of the party (Users to whom this party ID is mapped as primary Party ID). This package will be overridden by User level limits package, if defined, at User level in User Management screen.

5. Can administrator delete Party Preference?

No, party preference cannot be deleted but can be disabled.

6. If I change the approval type from sequential to parallel or vice versa, what happens to the in-flight transactions/maintenances?

Edited approval type is applicable for new transactions initiated post modification. Previously initiated transactions (in flight transactions/maintenances) which are pending approval will follow an approval type which was applied at the time of transaction initiation.

7. If I edit the ‘Allowed Roles field’ and remove one of the options supported earlier, what impact will it have to the existing users on-boarded on that role?

If the Bank administrator edits and removes the roles mapped as ‘Allowed Roles’, the removed role will not be available to corporate administrator while creating new user and editing existing user. Old users whom the role is already mapped will continue to get the privileges.

8. Can I edit the limit packages? How does it impact the transactions?

Yes, new limit package can be mapped for party. Limits get applied from an immediate effect if the effective date is less than or equal to current date. And if the effective date is future date, the limit package will be applied from the date available in the package.

9. Is it mandatory to map packages for all the touch points and groups available under each entity?

Mapping the limit package (CCL) for global is mandatory. However the mapping limit packages (CCL) for each touch point and for all groups is not mandatory. Whereas, administrator needs to operationally ensure that packages are mapped to the relevant touch point/groups which are accessible by the party users.

In case of customer user limit packages (CUL), if the package will be overridden by User level limits package, if defined, at User Maintenance. Or packages maintained for a user segment at system rules will be applicable if not package mapping is not defined at user or party level.

10. Can I manually define Global touch point group?

No, Touch Point – Global is nothing but a group of all internal and external touch points available in the application. This group cannot be maintained manually.

[Home](#)

6. Party to Party Linkage

Party to Party linkage is required by medium and large corporates if the user(s) of the parent company needs to access accounts of the subsidiary companies. For e.g. consider a case wherein say 'ABC Industries' is the parent company with a subsidiary company 'PQR Enterprises' and the users of ABC Industries need to access accounts of PQR Enterprises to carry out transactions and/or inquiries. The corporate will provide a mandate/ board resolution to the bank for creation of Party to Party linkage. Bank Administrator will setup a Party to Party linkage by selecting the parent party and the parties to be linked.

Pre-Requisites

- Transaction access is provided to Bank Administrator.
- Approval rule set up for Bank Administrator to perform the action.
- Party preferences should be maintained for the parent as well as the party to be linked
- Channel Access should be enabled for both the parent as well as the party to be linked

Workflow

Features Supported In Application

The following options are available as part of Party to Party linkage maintenance

- Search a party for Party to Party linkage
- Create Party to Party linkage
- View an existing Party to Party Linkage
- Edit and Delink Party to Party Linkage

How to reach here:

System/ Bank Administrator Dashboard > Toggle menu> OnBoarding > Party To Party Linkage

6.1 Party to Party Linkage- Search

Once the logged in user navigates to Party to Party Linkage screen, user will have an option to enter the party information (party ID or party name) and search party.

User can enter the party ID (if known) or the party name with a minimum of 5 characters. In case of search by party name, system matches the input provided by the user with the party name records and displays the matching party records.

In case of a party search by party ID, it will be an exact match and system will display the party details with appropriate options of linkage creation (if no linkage maintained) and created linkage(s) (if maintained) for the input parent party ID.

Party to party Linkage - search by party ID

The screenshot shows the 'Party To Party Linkage' search interface. The search criteria are: Parent Party ID: 002263, Parent Party Name: Monica. There are 'Create', 'Cancel', and 'Back' buttons. A sidebar on the right contains a 'Create and Maintain Party to Party Linkage' section with explanatory text.

Copyright © 2006, 2020, Oracle and/or its affiliates. All rights reserved. | Security Information | Terms and Conditions

In case of a party search by name, system will display the matching party records. The records will have parties listed with both Party ID and Party Name information. User will select the record by clicking on the Party ID from the list.

Party to Party Linkage - search by party name

The screenshot shows the 'Party To Party Linkage' search interface. The search criteria are: Party ID: (empty), Party Name: moni. There are 'Search' and 'Clear' buttons. Below the search area is a table of results:

Party ID	Party Name
002263	Monica
002261	MONICA

There is a 'Cancel' button below the table. A sidebar on the right contains a 'Create and Maintain Party to Party Linkage' section with explanatory text.

Field Description

Field Name Description

Party ID Parent party ID of the corporate user to which you want to link other party.

Party Name Name of the parent party.

To search the party to party linkage:

1. In the **Party ID** field, enter the parent party id of the user.
OR
In the **Party Name** field, enter the parent party name of the user.
2. Click **Search**.
OR
Click **Clear** to clear the search parameters.
OR
Click **Cancel** to cancel the transaction and navigate the user back to 'Dashboard'.
The **Party to Party Linkage** screen with search results with parent party identified and list of linked parties.

6.2 Party To Party Linkage - Create

The Bank Administrator gets a request to create a Party to Party Linkage in the system with details of the parent party and the party to be linked. As part of linkage creation, more than one party can be linked to the parent party selected.

To create a new party to party linkage:

1. Search the parent party by party ID or party name as specified in **Party to Party Linkage - Search** section.
2. Click **Create**. The **Party To Party Linkage - Create** screen with parent party details will appear.
OR
Click **Cancel** to cancel the transaction and navigate back to 'Dashboard'.
OR
Click **Back** to navigate to the previous screen.

Party To Party Linkage - Create

The screenshot shows the 'Party To Party Linkage - Create' interface. At the top, there's a navigation bar with 'futura bank' and user information 'Welcome, Leo Thomas'. The main content area displays the parent party details: 'Parent Party ID: 002263' and 'Parent Party Name: Monica'. Below this, there are three buttons: 'Create' (blue), 'Cancel' (grey), and 'Back' (text). To the right, there is a box titled 'Create and Maintain Party to Party Linkage' with the following text: 'This function enables you to link parties to a parent party. Once you have created a party linkage, you will be able to subsequently provide access of the linked party accounts to that of the parent company and its users through the Account Access feature. You can create new party linkages to a parent party or can search for existing party linkages to view and edit the same.'

3. There is a linked party section with an option to search a party to be linked.
4. Search a party to be linked by party ID or party name as specified in 'Party Search' section. Once the party appears in the linked party section, there is an option to remove the linkage if there is an erroneous selection. This can be done by clicking the  icon.
5. Click **Add** to if the user wishes to Add more than one linked party to the selected parent party.

FAQ

1. I am unable to maintain Party to Party linkage with an error of Channel Access not maintained?

Party to Party linkage cannot be maintained if Channel Access is disabled either for the parent party and/or selected linked party. You can maintain channel access by visiting party preferences screen and selecting parent party and/or linked party.

Navigation: (i) Dashboard > OnBoarding > Party Preferences (ii) Dashboard > Party Preferences

2. I am unable to maintain Party to Party linkage with an error of Party Preference not maintained?

Party to Party linkage cannot be maintained if party preference is not maintained either for the parent party and/or selected linked party. You can maintain party preference by visiting party preferences screen and selecting parent party and/or linked party.

Navigation: (i) Dashboard > OnBoarding > Party Preferences (ii) Dashboard > Party Preferences

3. I am unable to delink a party (linked party)?

Linkage with the parent party cannot be removed/deleted if there is an active Party Account Access linkage or User Account Access maintained. User will need to delete the party account and user account access linkage for the linked party and then proceed with deletion of party to party linkage.

4. Can a linked party have more than one parent party?

No. A party cannot be linked to more than one parent party i.e. if a party has been linked to a parent party then that party cannot be linked to another party.

5. Can there be multiple associations between the parent and the linked party?

No. The parent party cannot be linked to the linked party with linked party as the parent. For e.g. if there is a linkage already maintained with P1 (parent party) to P2 (child party) then system will not allow another linkage of P1 and P2 with P2 as parent and P1 as child party.

6. Can the parent party be a linked party to another party?

Yes, the parent party to a linked party can exist as a linked party to another parent party.

7. Have created a linkage between the parent party and linked party but it is not reflecting in the system even after a successful maintenance save message?

There is a possibility that the maintenance is saved but the status is 'Pending Approval'. For the maintenance, if there is an approval required then the changes will reflect only once the approver(s) approve the submitted request. If the setup does not require an approval workflow or is self / auto approved, then the linkage will be effected for the party immediately.

7. Merchant Management

Merchant Onboarding facilitates the system administrator to set up and maintain merchants using the channel banking platform. This, in turn, enables the users to initiate merchant based payments using the channel banking facility. This is also helpful in maintaining merchant which will act as a payment aggregator for sourcing funds from external sources to the wallet account.

Using this option, the system administrator can create and maintain merchant details in the application. Administrators can map the CASA account of the merchant, to enable the merchant payments. The system administrator can also select the required remittance type to be mapped for the merchant payments while creating a merchant.

The remittance type can be:

- Outward
- Inward

Pre-requisites

- Transaction access is provided to the System Administrator
- Approval rule set up for System Administrator to perform the actions
- Checksum type and checksum algorithm is maintained
- Enterprise roles are maintained in the application
- Merchant's account is maintained in the host system

Workflow

Features Supported In Application

The following features are available for merchant maintenance:

- Create Merchant
- View Merchant Details
- Edit Merchant details
- Delete Merchant

How to reach here:

System Administrator Dashboard > Onboarding > Merchant Onboarding > Merchant Management

OR

System/ Bank Administrator Dashboard > Toggle Menu > Onboarding > Merchant Management

7.1 Merchant Management – Search

From this screen, the administrator is able to search existing merchant maintenances based on the search parameters provided. On being displayed the search results based on the search criteria defined, the administrator is able to view the details of any merchant maintenance by selecting a record.

To search merchant:

1. Navigate to the **Merchant Management** screen.

Search Merchant

The screenshot displays the 'Merchant Management' search interface. At the top, there is a navigation bar with user information: 'Maker', 'ATM/Branch', 'English', and 'UBS 14.3 AT3 Branch'. Below this, the 'futura bank' logo is visible. The main content area is titled 'Merchant Management' and contains two input fields: 'Merchant id' and 'Merchant Description'. Below these fields are three buttons: 'Search' (blue), 'Cancel' (grey), and 'Clear' (grey). To the right of the search form is a 'Note' box with a document icon and the following text: 'Through this function you can set up and maintain merchant accounts, which will enable users to initiate merchant based payments online. You can also search for an existing merchant maintenance to view details of the merchant and to edit or delete the maintenance. Click on the Create option provided to create a new merchant maintenance.' Below the note is a 'Create' button. In the bottom right corner, there is a chatbot icon with a speech bubble that says 'Hey, I am here to help if you need it!'.

Field Description

Field Name	Description
Merchant Id	Enter the unique ID of the merchant whose details you want to view.
Merchant Description	Enter the description of the merchant whose details you want to view.

2. In the **Merchant Id** field, enter the unique id of the merchant.
OR
In the **Merchant Description** field, enter the description of the merchant.
3. Click **Search**. The **Merchant Management** screen with search results appears based on the search parameters.
OR
Click **Clear**, if you want to reset the search parameters.
OR
Click **Cancel**, if you want to cancel the transaction.
OR
Click **Create** to create another merchant maintenance.

Merchant Management - Search Results

The screenshot shows the 'Merchant Management' interface. At the top, there's a navigation bar with 'futura bank' and user information: 'Welcome, Leo Thomas', 'Last login 01 May 08:55 PM'. Below the navigation, there are search filters: 'Merchant id' and 'Merchant Description' (with 'merchant' entered). There are 'Search' and 'Clear' buttons. The search results are displayed in a table:

Merchant Id	Merchant Description
00013	Merchant 1
00014	Merchant 2
12345500	Merchant 3

Below the table, there's a pagination control: 'Page 1 of 1 (1-3 of 3 items)'. There are also 'Cancel' and 'Create' buttons. A 'Note' box on the right provides instructions on how to use the merchant maintenance function. At the bottom, there's a copyright notice: 'Copyright © 2006, 2020, Oracle and/or its affiliates. All rights reserved. | Security Information | Terms and Conditions'.

Field Description

Field Name	Description
Merchant Id	The facility to search for a specific merchant maintenance record on the basis of the unique ID/key assigned to the merchant by the bank.
Merchant Description	The facility to search for a specific merchant maintenance based on the description of the merchant.

Search Results

The following details are displayed per merchant record which are retrieved based on the search criteria identified in the fields defined above.

Field Name	Description
Merchant Id	The unique ID/key assigned to the specific merchant by the bank.
Merchant Description	The description of the merchant corresponding to the merchant Id.

4. To view the details of a specific merchant, click the record. The **Merchant Management - View** screen appears.

7.2 Merchant Management – Outward Remittance

Outward remittance involves the transfer of money from the customer's accounts to merchant accounts through QR Code. The Merchant Management screen allows the system administrator to view, create, edit and delete the merchant details.

7.2.1 Merchant Management – Outward Remittance – View

On selecting a specific merchant record by clicking on the link provided on the merchant description, the screen displaying the details of the selected merchant is displayed.

Merchant Management – View

The screenshot displays the 'Merchant Management' interface for 'futura bank'. The page title is 'Merchant Management'. The user is logged in as 'Leo Thomas' with the last login on '01 May 08:55 PM'. The interface shows the following details for a merchant:

- Remittance Type:** OUTWARD
- Merchant Id:** 000034
- Merchant Description:** Outward Remittance
- QR Code:** (Link to QR Code)

Accounts:

- Credit Account Details:**
 - Account Type:** CASA
 - Account Number:** AT30424700017
- Service Charge Account Details:**
 - Define another account for service charge
 - Default customer's debit account number as request parameter

Account Number	The merchant's account number. This field appears if Define Account number for service charge check box is selected.
Default customer's debit account number as request parameter	This check box is selected if the customer's debit account number is defaulted as request parameter.
Response Redirections	
Success URL	The URL for sending the response of the transaction if it is a successful transaction.
Failure URL	The URL for sending the dynamic response of the transaction if it is a failed transaction.
Checksum Details	

Field Name	Description
Checksum Type	The checksum type.
Checksum Algorithm	The checksum algorithm.
Security Key	Input the security key. Field will be displayed if a value is selected in checksum algorithm.

1. Click the **QR Code** link to view the QR Code of the merchant. A pop-up screen with QR code appears. You can also download the QR Code so as to send it to the merchant through offline mode.
2. Click **Edit** to edit merchant details. The user is directed to the **Merchant Management - Edit** screen.
OR
Click **Back to navigate to the previous screen**.
OR
Click **Cancel** to cancel the transaction.

OR
Click **Delete** to delete the merchant maintenance.

QR code

The QR code is displayed if the system administrator clicks on the QR code link on the Merchant Maintenance details screen. The administrator is provided with the facility to download the QR code so as to send it to the merchant through any offline mode.

3. Click  to download the QR Code image of the merchant.

7.2.2 Merchant Management – Outward Remittance – Create Merchant

The system administrator can create a new merchant so that the bank’s customers can make payments to the merchant using channel banking or by scanning the QR code of the Merchant without entering merchant account details. The QR code is generated once the merchant is created by the bank administrator.

To create a merchant:

1. In the **Merchant Maintenance screen**, click **Create**. The **Merchant Management – Create** screen appears.

Create Merchant

The screenshot shows the 'Create Merchant' form in the Futura Bank Merchant Management system. The form is divided into several sections:

- Select Remittance Type:** Radio buttons for 'Outward Remittance' (selected) and 'Inward Remittance'.
- Merchant Information:** Merchant id (000034) and Merchant Description (Outward Remittance).
- Accounts:**
 - Credit Account Details:** Account Type (Current and Savings), Account Number (masked with asterisks), and Confirm Account Number (AT30424700017).
 - Service Charge Account Details:** Checkboxes for 'Define another account for service charge' (unchecked) and 'Default customer's debit account number as request parameter' (checked).
- Response Redirections:** Success URL (https://www.futurabank.com/success) and Failure URL (https://www.futurabank.com/failure).
- Checksum Details:** Checksum Type (None) and Checksum Algorithm (None).

At the bottom of the form are buttons for 'Save', 'Cancel', and 'Back'. A sidebar on the right titled 'Merchant Onboarding' contains a lightbulb icon and text explaining the function: 'Through this function you can set up and maintain merchant accounts, which will enable users to initiate merchant based payments online. You can also search for an existing merchant maintenance to view details of the merchant and to edit or delete the maintenance.'

4. Click the **Delete** option available on the Merchant Management – View screen.
5. The application displays a message asking the applicant to confirm deletion.

Merchant Management - Delete

6. Click **Yes** to delete the merchant. A confirmation page appears with a success message and the status of deletion.
OR
Click **No** if you do not wish to delete the Merchant Maintenance.
7. Click **OK**.

FAQ

1. Who can create or edit merchants?

The System administrator can create and edit the merchants.

2. Can I specify the account number which is not held within this Bank?

No, Merchant account number/GL should be of the same bank.

3. When will the newly added merchants be available to customers?

Newly added merchants will be made available to the customers with immediate effect.

4. What is the significance of defining separate account numbers for service charge account?

Service charges, if applicable, for an online transaction initiated by a customer will be accounted separately in the merchant's account number maintained for service charge credits.

8. Electronic Bill Presentment and Payment

Electronic bill presentment and payment (EBPP) is a process that enables the billers to create, and present the bills / invoices online to their customers. This feature also enables the customers/ users to pay the bills online. The EBPP services are widely used in many areas like utility bill payment, fund transfer through net banking against various purchases of utility products and services by the users, payment to service providers, mobile/ DTH bill payment etc.

The main advantage of electronic bill presentment and payment is that users/ customers can pay their bills anytime quickly and conveniently, which saves lots of time and paper work.

Note: Electronic bill presentment and payment (EBPP) module will work only with third party and is not yet qualified with UBS.

[Home](#)

8.1 Biller Onboarding

Bank customers initiate bill (utility) payments from their accounts using channel banking facility by selecting billers maintained by the Bank. Using Biller Onboarding, System Administrators can create billers. The system administrator also defines payment methods accepted by biller (e.g. Current and Savings Account, Credit Card, Debit Card etc) while creating a biller, category of the biller, full address of the biller and location/ area in which the biller operates or provides his services.

System Administrator creates billers, which are then made available to the customers to register themselves with these billers to receive and pay bills online.

This option allows the System Administrator to search and view the list of existing billers in the system.

Pre-Requisites

- Transaction access is provided to System Administrator.
- Approval rule set up for System Administrator to perform the actions.
- Billers are maintained in core banking application.

Workflow

Features Supported In Application

This option allows the System Administrator to:

- Search Biller
- Create Biller
- View Biller
- Edit Biller

How to reach here:

System/ Bank Administrator Dashboard > Toggle Menu > Onboarding > Biller Onboarding
 OR
System Administrator Dashboard > Onboarding > Biller Onboarding

8.1.1 Biller Onboarding - Search

Using this option, System Administrators search the existing billers based on parameters like Biller ID, Biller Name, Biller Category and Biller Location. The search result displays a list of all biller types, that is Presentment only, Payment only and Presentment + Payment & Recharge type of billers.

Biller Onboarding - Search Biller

The screenshot shows the 'Biller Onboarding' section of the Futura Bank system. At the top, there is a navigation bar with 'System Administrator', 'ATM/Branch', 'English', and 'UBS 14.3 AT3 Branch'. Below this is the 'futura bank' logo and a user greeting 'Welcome, Leo Thomas' with a last login time of '01 May 08:55 PM'. The main content area is titled 'Biller Onboarding' and contains a search form with three input fields: 'Biller Name', 'Biller Category' (with a 'Select' dropdown), and 'Biller Location' (with a 'Select' dropdown). Below the fields are three buttons: 'Search', 'Cancel', and 'Clear'. To the right of the search form is a 'Create and Maintain Biller' panel with a 'Create' button. At the bottom right, there is a chatbot bubble that says 'Hey, I am here to help if you need it!'. The footer contains copyright information: 'Copyright © 2006, 2020, Oracle and/or its affiliates. All rights reserved. | Security Information | Terms and Conditions'.

Field Description

Field Name	Description
Biller Name	The name of the biller.
Biller Category	The name of the biller category to which the biller belongs.
Biller Location	Location of the biller

To search billers:

8. In **Biller Name** field, enter the name of the biller that is to be searched.
OR
In **Biller Category** field, enter the category to which the biller belongs.
OR
In **Biller Location** field, enter the location of the biller.
9. Click **Search**, to search the billers.
OR
Click **Clear** if you want to reset the search parameters.

OR
Click **Cancel** if you want to cancel the transaction.

Billers Onboarding - Search Result

The screenshot shows the 'Biller Onboarding' interface. At the top, there's a navigation bar with 'System Administrator', 'ATM/Branch', 'English', and 'UBS 14.3 AT3 Branch'. Below that is the 'futura bank' logo and a user welcome message for 'Leo Thomas'. The main content area has search filters: 'Biller Name' with the value 'a', 'Biller Category' set to 'Select', and 'Biller Location' set to 'Select'. There are 'Search' and 'Clear' buttons. Below the filters is a table with the following data:

Biller Name and Id	Biller Category	Biller Location
Biller ABC 353	Internet	Mumbai
Biller XYZ 187	DTHN	Mumbai
PQR Biller 403	Electricity2	Mumbai
TUV Biller 141	DTHN	Mumbai

Below the table is a pagination control showing 'Page 1 of 1 (1-4 of 4 items)' and a 'Cancel' button. On the right side, there is a 'Create and Maintain Biller' sidebar with a 'Create' button and explanatory text about online bill payment and recharge.

Field Description

Field Name	Description
Search Result	
Biller Name and Id	The name of the biller.
Biller Category	The name of the biller category to which the biller belongs.
Biller Location	Location of the biller

10. Click **Create** to create a new biller.

8.1.2 **Biller Onboarding - Create**

Using this option, the System Administrator can create a biller with specific labels. System Administrator defines whether the biller accepts:

- Quick Bill Payment(bill payment without customer registration) - for Payment type billers only
- Quick Recharge(pre-paid recharge without customer registration) - for Recharge type billers only
- Bill payments past due date- for presentment only type biller
- Part bill payment - for presentment only type biller
- Excess bill payment - for presentment only type biller

The administrator also defines the various payment methods accepted by the biller like Current and Savings Account, Credit Card, Debit Card etc. System administrator can also upload image of biller's logo and sample bill, if available.

To create a biller:

11. In the **Biller Onboarding** screen, click **Create**. The **Biller Onboarding - Create** screen appears.

Create and Maintain Biller

Biller Details

This section details key attributes of a biller like whether customer gets bills presented or not, the type of service biller provides etc. This section also captures sample bill image that is displayed to customer while adding the biller to pay bills online.

Biller Address

This section has the full address of the Biller and Location. Location indicates business geography of the biller and is a key attribute of identification, especially if the biller operates in multiple geographies.

Billers Specifications

When adding a biller, customer has to key in unique identities that he has with biller (Ex: Account ID, Customer No. etc). The labels of these IDs are maintained in this section along with their data type and whether they are mandatory for customer.

Payment Terms

This section captures validations & checks that get done when customer is paying a bill. Whether customer can pay bill after due date and from where he can pay the bills: Account, Credit or Debit cards etc. are decided by the flags maintained here.

Biller Address

Address Line 1: ABC Lane

Address Line 2: _____

Address Line 3: _____

Field Description

Field Name	Description
Billers Name	The name of the biller.
Billers Type	The option to select biller type. The biller type can be: <ul style="list-style-type: none"> • Presentment: Biller is of Presentment type • Payment: Biller is of Payment type • Presentment and Payment: Biller is of Presentment + Payment type • Recharge: Biller is of Recharge type
Billers Category	Category to which biller belongs, ex: Telecom, Internet etc.
Billers Currency	Currency of the biller.
Billers Status	The status of the biller. The options are: <ul style="list-style-type: none"> • Active • Inactive
Sample Bill Image	The image of the physical bill presented by the biller, which is to be uploaded by the user. This helps the user to compare and identify Relationship number fields. This field appears only for biller types Presentment and Presentment and Payment.
Billers Logo	The biller logo which is to be uploaded by the user. This logo appear as an icon on the screen after uploading. Both for biller sample bill and logo JPG & PNG file formats only are supported.
Billers Address	
Address Line 1 to 3	Address of the biller.
City	City of the biller.
State	State of the biller.

Field Name	Description
Country	Country of the biller.
PIN/ Zip Code	Pin/ Zip code of the biller.
Biller Location	Location of the biller. Location could be City or, Country or State or combination of these values.
Biller Specifications	
Biller Label 1	<p>Relationship # 1 that the user has with the biller. This label will be displayed in customer screens (ex: Add Biller) to capture customer's unique id with biller.</p> <p>The user can select data type, maximum length of the field and whether the field is mandatory or optional. The Biller Label 1 field is mandatory.</p> <p>Click the Add Row link to add more relationships of the user with the biller.</p> <p>The user can add up to 10 rows to define the different biller labels.</p>
Data Type	<p>It captures the biller label data types.</p> <p>The options are:</p> <ul style="list-style-type: none"> • Text • Numeric • Alphanumeric • Data • List of Values- allowed to specify the multiple values in the corresponding field which will be further made available to the customer for selection as a part of biller addition. <p>This attribute is available in Biller Label field.</p>
Max Length	The maximum length allowed for the biller label. This attribute is available in Biller Label field.
Payment Terms and Validations	
Account Number	Account number of the biller.

Field Name	Description
Allow	<p>Select whether Part Payment, Excess Payment, Late Payment, Quick Bill Payment and Quick Recharge is allowed by the biller.</p> <p>The options are:</p> <ul style="list-style-type: none"> • Part Payment: The option identifies whether the biller allows bill payment for an amount less than bill amount. This option appears for 'Presentment' and 'Presentment and Payment' type of biller. • Excess Payment: The option identifies whether the biller allows bill payment for amount more than bill amount. This option appears for 'Presentment' and 'Presentment and Payment' type of biller. • Late Payment: The option identifies whether the biller allows late bill payment i.e. Payment after due date. This option appears for 'Presentment' and 'Presentment and Payment' type of biller. • Quick Bill Payment: The option identifies whether the biller allows 'Quick bill payment' i.e. paying the bills without registering the biller. This option appears for 'Payment' and 'Presentment and Payment' type of biller. • Quick Recharge: The option identifies whether the biller allows "Quick recharge" i.e. doing recharge transactions without registering the biller. This option appears for 'Recharge' type of biller.
Payment Methods	<p>Select the payment method accepted by the biller.</p> <p>The options are:</p> <ul style="list-style-type: none"> • CASA • Debit Card • Credit Card
Auto Payment Buffer Days	<p>The number of days before bill due date, when the auto payment will be triggered by the system.</p> <p>This field appears for Presentment and Presentment and Payment type of billers.</p>

Field Name	Description
Validation Type	<p>The type of validation that the biller will employ to validate customers who add the biller for bill payment through channel banking.</p> <p>The options are:</p> <ul style="list-style-type: none"> • Auto • Offline • Online <p>For more information on each validation type, refer the Note on Customer Validation, at the end of the Biller Onboarding – Create section.</p>
Validation URL	<p>Redirection URL for customer validation.</p> <p>This field appears if you select the Online option from the Validation Type field.</p> <hr/> <p>Note: Out of the box OBDX does not provide</p> <ol style="list-style-type: none"> File upload/download for offline validation and Any adapters for online validations <hr/>

- In **Biller Name** field, enter the name of the biller that is to be searched.
- From the **Biller Type** list, select the appropriate biller type.
- From the **Biller Category** list, select the appropriate option.
- From the **Biller Currency** list, select the appropriate option.
- From the **Biller Status** list, select the appropriate option.
- Drag image or click **Choose Files** to select and upload the Sample Bill Image and Biller Logo if required.
- In the **Biller Address** section, enter the relevant address details of the biller.
- In the **Biller Specifications** section, enter the Relationship # 1 in the Biller Label 1 field.
- Click the **Add Row** link to add more relationship numbers of the user with the biller.
- In **Account Number** field, enter the account number of the biller.
- To enable the Part Payment, Excess Payment, Late Payment, Quick Bill Payment and Quick Recharge facilities, select the appropriate check boxes depending on the Biller Type.
- To enable the payments from current and savings account, debit card or credit card, select CASA, Debit Card or Credit Card check box.
- In the **Validation Type** field, select the appropriate option.
- If you select **Online** as **Validation Type**, enter the redirection URL in the **Validation URL** field.
- Click **Save**.
OR
Click **Cancel** to cancel the transaction.

- OR
Click **Back** to navigate to the previous page.
27. The **Review** screen appears. Verify the details, and click **Confirm**.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Back** to navigate to the previous page.
28. The success message along with the transaction reference number and status appears.
Click **OK** to complete the transaction.

Note: 1) Bank Administrator can use the 'Bulk file Upload' feature to create multiple billers.

2) Customer Validation: When a channel customer does an Add Biller transaction, he is essentially registering with the biller to make online bill payments. At this stage some billers may want to validate that the customer is genuine. The validation is performed based on the Validation Type field, as follows:

- **Auto:** When a biller is on boarded with validation type as Auto, customers who add this biller do not need any validation from biller and their registrations are auto-approved and they can initiate online bill payments to this biller.

- **Offline:** When a biller is on boarded with validation type as Offline, for retail or corporate customers who add this biller, their registration status is set to Pending. This means that the biller will have to do an offline validation of these registrations. These can either be approved or rejected. OBDX does not provide any OOTB mechanism for downloading Pending registrations and changing their status by the banker or biller.

- **Online:** When a biller is on boarded with validation type as Online, for retail or corporate customers who add this biller, their registrations need to be validated by the biller, online. The online validation can be a redirect to the biller's website, where validation can be performed through REST type web service. OBDX does not provide any OOTB implementation for the online validation.

8.1.3 Biller Onboarding - View

System Administrator can view the list of all the current registered billers. The billers type can be of Presentment, Payment, Presentment & Payment and Recharge type.

To view the biller:

29. In the **Biller Onboarding** screen, enter the search criteria and click Search. The **Biller Onboarding** screen with search results appears.
OR
Click **Clear** to reset the search parameters.
OR
Click **Cancel** to cancel the search process.
30. Click the **Biller Name** link of the record for which you want to view the details. The **Biller Onboarding - Biller Details** screen appears.

9. Limits Definition

Limits are defined by the bank to set up amount and duration based restrictions on the transactions that can be carried out by the user.

As part of limits definition maintenance, following types of limits can be defined:

- Transaction: It is the initiation limit with minimum and maximum amount defined typically for a user with role 'Maker'
- Cumulative: It is the collective transaction amount limit for all the transactions that can be performed during a day/month and maximum number of transaction in a day/month
- Cooling Period: Payee cooling period limit is a time and the amount limit set by the bank during which fund transfer is not allowed or allowed till the specified limit, to a newly added payee.
- Limit package maintenance allows the administrator to map these definitions to every transaction.

Pre-Requisites

- Transaction access is provided to System Administrator.
- Approval rule set up for System Administrator to perform the actions.

Workflow

Features supported in application

Using this option system administrator can perform the following actions:

- Search/ View Limits
- Create Limit
- Delete Limits

How to reach here:

System Administrator Dashboard > Limits > Limits Definition

OR

System/ Bank Administrator Dashboard > Toggle menu > Limits > Limits Definition

9.1 Limits Definition - View

Using this option, administrator can search for particular limit based on different search parameters. The search results displays a limit list based on different search filters selected.

If the search parameters are not specified, records of all the limits maintained in the application for selected limit type are displayed.

To search and view limits:

1. In the **Limits Definition** screen, enter the search parameters and click **Search**. The **Limits Definition** screen with search results appears based on the searched criteria.

OR

Click **Clear** to reset the search parameters.

OR

Click **Cancel** to cancel the search process.

Limits Definition - Search

The screenshot shows the 'Limits Definition' search interface in the Futura Bank system. The page includes search filters and a table of results.

Search Filters:

- Limit Code: _____
- Limit Description: _____
- Limit Type: Transaction Cumulative Cooling Period
- Updated On: _____

Buttons: Search, Clear, Cancel

Table of Results:

3. Click **Delete** to delete the limit.
OR
Click **Back** to navigate to the previous screen.
OR
Click **Cancel** to cancel the transaction and navigate back to dashboard.

9.2 Limits Definition - Create

Using this option, System Administrator can create a limit as required.

To create a transaction limit:

1. In the **Limits Definition** screen, click **Create**. The **Limits Definition - Create** screen with **Transaction** tab appears.

Limits Definition - Transaction - Create

The screenshot displays the 'Limits Definition' form in the Futura Bank system. The form is titled 'Limit Definition' and has three tabs: 'Transaction', 'Cumulative', and 'Cooling Period'. The 'Transaction' tab is selected. The form fields are as follows:

- Limit Type:** Transaction (selected)
- Limit Code:** TXNLimit
- Limit Description:** Transaction Limits
- Currency:** GBP
- Minimum Amount:** £10.00
- Maximum Amount:** £100,000.00

At the bottom of the form, there are three buttons: 'Save', 'Cancel', and 'Back'. On the right side, there is a help box titled 'Create Limit Definition' with the following text:

You can define following types of limits on the transactions

- Transaction – Minimum and maximum transaction initiation limit.
- Cumulative – Collective amount of a transaction and total number of transaction limit.
- Cooling Period – Limits for newly added payees

Map these limit definitions to a transaction as a part of limit package.

At the bottom right, there is a chatbot icon with the text 'Hey, I am here to help if you need it!'.

Field Description

Field Name	Description
Limit Type	The type of limit. The limit type for selection are: <ul style="list-style-type: none"> • Transaction – It is the initiation limit with minimum and maximum amount • Cumulative – It is a duration based limit with maximum amount and number of transactions for a day/month • Cooling Period – Payee cooling period limit is a time and the amount limit set by the bank during which fund transfer is not allowed or allowed till the specified limit, to a newly added payee.
Limit Code	The name of the limit with unique identifier.
Limit Description	Description of the limit.

Field Name	Description
Currency	The currency to be set for the limit.
Minimum Amount	The minimum amount for a transaction in selected currency.
Maximum Amount	The maximum amount for a transaction in selected currency.

- In the **Transaction** tab screen, enter the code in the **Limit Code** field.
- In the **Limit Description** field, enter the description of the limit.
- From the **Currency** field, select the appropriate currency for the limits.
- In the **Minimum Amount** and **Maximum Amount** field, enter the minimum and maximum amount for a transaction in local currency.
- Click **Save** to save the created limit.
OR
Click **Back** to navigate to previous screen.
OR
Click **Cancel** to cancel the transaction and navigate back to dashboard.
- The **Review** screen appears. Verify the details, and click **Confirm**.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Back** to navigate to previous screen.
- The success message of transaction submission appears.
Click **OK** to complete the transaction.

Limits Definition - Cumulative - Create

The screenshot displays the 'Limit Definition' form in the 'futura bank' system. The form is for creating a 'Cumulative' limit. The fields and their values are as follows:

- Limit Type:** Transaction, Cumulative (selected), Cooling Period
- Limit Code:** Limit_Cum
- Limit Description:** Cumulative Limit
- Frequency:** Daily (selected), Monthly
- Currency:** GBP
- Cumulative Transaction Amount:** £10,000,000.00
- Maximum Transactions:** Per Day, 1000

At the bottom of the form, there are buttons for 'Save', 'Cancel', and 'Back'. A sidebar on the right titled 'Create Limit Definition' provides instructions on defining limits. The footer of the page shows 'Copyright © 2006, 2020, Oracle and/or its affiliates. All rights reserved. | Security Information | Terms and Conditions'.

Field Description

Field Name	Description
Limit Type	<p>The type of limit.</p> <p>The limit type for selection are:</p> <ul style="list-style-type: none"> • Transaction – It is the initiation limit with minimum and maximum amount • Cumulative – It is a duration based limit with maximum amount and number of transactions for a day/month • Cooling Period – Payee cooling period limit is a time and the amount limit set by the bank during which fund transfer is not allowed or allowed till the specified limit, to a newly added payee.
Limit Code	The name of the limit with unique identifier.
Limit Description	Description of the limit.
Frequency	<p>The specific duration for which the limits can be utilized and available.</p> <p>The options are:</p> <ul style="list-style-type: none"> • Daily • Monthly
Currency	The currency to be set for the limit.
Cumulative Transaction Amount	The collective amount in selected currency for transactions that can be performed in a day.
Maximum Transactions	The maximum number of transactions that can be performed per day.

To create a cumulative limit:

1. Click the **Cumulative** tab. The **Limits Definition - Create** screen with **Cumulative** tab appears.
2. Enter the relevant information in **Limit Code** and **Limit Description** field.
3. From the **Frequency** field, select the appropriate duration for the limits.
4. From the **Currency** field, select the appropriate currency for the limits.
5. In the **Cumulative Transaction Amount** field, enter the collective amount of transaction in local currency.
6. In the **Maximum Transactions** field, enter the value for maximum number of transactions.

7. Click **Save** to save the created limit.
OR
Click **Back** to navigate to previous screen.
OR
Click **Cancel** to cancel the transaction and navigate back to dashboard.
8. The **Review** screen appears. Verify the details, and click **Confirm**.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Back** to navigate to previous screen.
9. The success message of transaction submission appears.
Click **OK** to complete the transaction.

Limits Definition - Cooling Period – Create

The screenshot shows the 'Limit Definition' form in the Futura Bank system. The form is for creating a 'Cooling Period' limit. The fields are as follows:

- Limit Type: Transaction, Cumulative, **Cooling Period**
- Limit Code: Limit12
- Limit Description: Cooling Period Limits
- Currency: GBP
- From Time: 0dd : 0hh : 0mm
- To Time: 1 9 0
- Cumulative Transaction Amount: £10.00
- From Time: 1dd : 9hh : 0mm
- To Time: 5 0 0
- Cumulative Transaction Amount: £1,000.00

The sidebar on the right provides instructions on how to define different types of limits:

- You can define following types of limits on the transactions
- Transaction – Minimum and maximum transaction initiation limit.
- Cumulative - Collective amount of a transaction and total number of transaction limit.
- Cooling Period – Limits for newly added payees. Map these limit definitions to a transaction as a part of limit package.

Field Description

Field Name	Description
Limit Type	<p>The type of limit.</p> <p>The limit type for selection are:</p> <ul style="list-style-type: none"> • Transaction – It is the initiation limit with minimum and maximum amount • Cumulative – It is a duration based limit with maximum amount and number of transactions for a day/month • Cooling Period – Payee cooling period limit is a time and the amount limit set by the bank during which fund transfer is not allowed or allowed till the specified limit, to a newly added payee.

Field Name	Description
Limit Code	The name of the limit with unique identifier.
Limit Description	Description of the limit.
Currency	The currency to be set for the limit.
From Time	The cooling period start time. It can be in days and/or hours and/or minutes For example a new payee will be 'active' after a cooling period of 0 days & 0 hours & 30 minutes
To Time	The cooling period end time. It can be in days and/or hours and/or minutes. For example a new payee will be 'active' after a cooling period of 0 days & 0 hours & 30 minutes.
Cumulative Transaction Amount	The collective transaction amount in selected currency for a defined cooling period.

To set up multiple amount and time limit slabs:

1. Click the **Cooling Period** tab. The **Limits Definition - Create** screen with Cooling Period tab appears.
2. Enter the relevant information in **Limit Code** and **Limit Description** field.
3. From the **Currency** field, select the appropriate currency for the limits.
4. From the **From Time** and **To Time** field, select the appropriate day, hours and minutes.
5. In the **Cumulative Transaction Amount** field, enter the collective amount that is applicable for the defined cooling period.
6. Click **Add Time Period** if you want to create more than one amount and time limit slabs.
7. Click **Save** to save the created limit.
OR
Click **Back** to navigate to previous screen.
OR
Click **Cancel** to cancel the transaction and navigate back to dashboard.
8. The **Review** screen appears. Verify the details, and click **Confirm**.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Back** to navigate to previous screen.

- The success message of transaction submission appears.
Click **OK** to complete the transaction.

Note: You can click  to delete a record.

9.3 Limits Definition - Delete Limit

Using this option, System Administrator can delete a limit definition created earlier. Limit definition can be deleted only if it is not in use (available as a part of any limit package).

To delete a limit:

- In the **Limits Definition** screen, enter the search parameters and click **Search**. The **Limits Definition** screen with search results appears based on the searched criteria.
OR
Click **Clear** to reset the search parameters.
OR
Click **Cancel** to cancel the search process.

Limits Definition - Search

The screenshot shows the Oracle Limits Definition Search interface. At the top, there is a navigation bar with 'System Administrator', 'ATM/Branch', 'English', and 'UBS 14.3 AT3 Branch'. Below this is a header with the 'futura bank' logo and a user profile for 'Leo Thomas'. The main content area is titled 'Limit Definition' and contains a search form with the following fields:

- Limit Code:
- Limit Description:
- Limit Type: Transaction Cumulative Cooling Period
- Updated On:

Below the search form are 'Search' and 'Clear' buttons. To the right of the search form is a 'Limit Definition' panel with a 'Create' button. Below the search form is a table with the following data:

Limit Code	Limit Description	Limit Type	Updated On
CMLim	CMLim	Cumulative	22 May 2019
swe3	swe3	Cumulative	24 May 2019
nehcumlimit1	nehcumlimit1	Cumulative	29 May 2019
nehnewcumlimit	nehnewcumlimit	Cumulative	17 Jul 2019
SCF_CUM_LMT_PKG	scf invoice create limit package	Cumulative	20 Sep 2019
SCF_CUM_GBP_INV	scf invoice cum limit for gbp	Cumulative	21 Sep 2019
nehscfumlimit	nehscfumlimit	Cumulative	23 Oct 2019
ScumD	ScumD	Cumulative	04 Nov 2019
UBS143DailyCLD1	Max Trans 150 Cum Trans Amt 75000	Cumulative	22 May 2019
AJMonthlyCLz	AJMonthlyCLz	Cumulative	22 May 2019

At the bottom of the table, there is a pagination control showing 'Page 1 of 6 (1-10 of 51 items)' and a 'Cancel' button.

- Click the **Limit Code** of the record for which you want to view the details. The **Limits Definition -View** screen appears.

4. Click **Yes** to confirm the deletion.
OR
Click **No** to cancel the deletion process.
5. The success message of transaction submission appears.
Click **OK** to complete the transaction.

FAQ

1. Can I delete transaction and/ or cumulative/ cooling period limit definitions against a transaction in limit package?

No, existing limits against a transaction cannot be deleted; it can only be edited if effective date is starting from a future date.

2. Can I maintain multiple definitions for each limit type?

Yes, you can maintain multiple limit definitions under each limit type.

3. What is a significance of defining different slab limits in case of cooling period limit type?

Payee cooling period limit is a time and the amount limit set by the bank during which fund transfer is not allowed or allowed till the specified limit, to a newly added payee. Administrator can set up 2 or more time slabs to define the payee limits. E.g.

- 0 mins to 30 Mins – Amount limit – \$ 0
- 31Min to 60 Mins – Amount limit is \$ 5000.

Customer cannot transfer any amount till first 30 mins from the time payee is added. From 31 to 60 mins, customer can maximum transfer upto \$ 5000 subject to sufficient transaction and cumulative limits available.

10. Limit Package Management

Limit package is a group of transaction limits. As part of the limit package management, defined limits (created through 'Limit Definition') can be mapped to each transaction or to a transaction group (Created using Transaction Group Maintenance). Each package is associated with a specific channel/Touch point or with a group of Touch points.

The limits packages once created can be mapped to

- Enterprise Roles (Retail/Corporate/Administrator) – using System Rules
- User Segment – using System Rules maintenance
- Party – using Party Preferences (Cumulative User Limits and Cumulative Customer limits)
- User – using User Management

Prerequisites:

- Transaction access is provided to System Administrator.
- Approval rule set up for System Administrator to perform the actions.
- Transaction aspects - limit parameter is enabled for required transactions,
- Transactions groups are maintained as required.
- Touch Point and touch point groups are maintained as required.
- Limit definitions are maintained.

Workflow

Features supported in application

Following functions can be performed by the bank administrator as part of the limit package maintenance

- Search/ View Limit Package
- Create Limit Package
- Edit Limit Package

- Clone Limit Package
- Delete Limit Package

How to reach here:

System Administrator Dashboard > Limits > Limit Package Management
OR

System/ Bank Administrator Dashboard > Toggle menu > Limits > Limits Package

10.1 Limit Package Management - View

Using this option, Administrator can search for specific limit package based on different search parameters like package code, user segments to for which the package is enabled, touch point/touch point groups to which a package can be mapped etc. The search results displays a list or particular limit package/s based on different search filters selected.

If the search parameters are not specified, records of all the packages maintained in the application are displayed.

To search and view limit package:

1. In the **Limit Package Management** screen, click **Search**. The **Limit Package Management** screen with search results appears based on the searched criteria.
OR
Click **Clear** to reset the search parameters.
OR
Click **Cancel** to cancel the search process.

Limit Package Management - Search

The screenshot displays the 'Limit Package Management' search interface. At the top, there are navigation tabs for 'System Administrator', 'ATM/Branch', 'English', and 'UBS 14.3 AT3 Branch'. The user is identified as 'Welcome, Leo Thomas' with a last login time of '02 May 11:21 AM'. The search filters include 'Package Code', 'Package Description', and 'More Search Options'. A 'Search' button and a 'Clear' button are present. The search results are displayed in a table with the following columns: Package Code, Package Description, Touch Point, Currency, Updated On, and Roles.

Package Code	Package Description	Touch Point	Currency	Updated On	Roles
nehnewsfpackage	nehnewsfpackage	APINTERNET	GBP	21 Sep 2019	retailuser

Limit Package
You can now create a limit package for specific transaction and for group of transactions. Also you can define applicable Touch Point for a package. To speed up the process you can clone an existing limit package. If you want to create fresh package, ensure to maintain necessary transaction groups, Touch Point groups and required limit definitions before you proceed.

Currency	Currency in which the limit package is created.
Updated On	Date on which limit package was updated.
Roles	The limit is applicable to specific party or role (s).

- Click the **Limit Package Code** of the record for which you want to view the details. The **Limits Package Management - View** screen appears.

Limit Package Management - View

The screenshot displays the 'Limit Package Management - View' interface. At the top, there's a navigation bar with 'System Administrator', 'ATM/Branch', 'English', and 'UBS 14.3 AT3 Branch'. The main header shows 'futura bank' and a user profile for 'Leo Thomas'. The central content area is titled 'Limit Package Management' and lists the following details:

- Limit Package Code: nehnewsfpackage
- Limit Package Description: nehnewsfpackage
- Touch Point: Internet
- Role: retailuser
- Currency: GBP

Below this, transaction details are shown:

- Transaction Name: Invoice Creation - Record Level Approval
- Cumulative Limit Daily: nehcumlimit1 - nehcumlimit1
- Transaction Limit: nehlimitxn - nehlimitxn

At the bottom of the details section, there are buttons for 'Clone', 'Edit', 'Delete', 'Cancel', and 'Back'. To the right, a 'Limit Package Details' box contains instructions: 'You can edit the parameters set for each transaction available in a package or can delete the package by clicking on Delete button. Ensure this package is not in use before you proceed to delete. To speed up the process you can clone an existing limit package. You may also choose to go back to the previous screen or cancel the operation.' A chatbot bubble at the bottom right says 'Hey, I am here to help if you need it!'.

Field Description

Field Name	Description
Limit Package Code	The unique code assigned to the limit package.
Limit Package Description	Description of the limit package.
Touch Point/ Touch Point Group	Name of the touch point or group mapped to a limit package.
Roles	The party or role (s) to which limit is applicable.
Currency	Currency in which the limit package is created.
Transactions / Transaction Groups - Limits	
Transactions / Transaction Group Name	Name of the transaction group that is mapped to the limit package.

Field Name	Description
Effective Date	The date from which the limit package is effective for the transaction/transaction group.
Expiry Date	Expiry date of a specific limit linked to a transaction. This field will be displayed only if expiry date is maintained for each transaction.
Cumulative Limit Daily	The daily cumulative limit set for the specific transaction. It displays the limit name and description along with the cumulative transaction amount and transaction count.
Cumulative Limit Monthly	The cumulative limit set for the specific transaction on basis on month. It displays the limit name and description along with the cumulative transaction amount and transaction count.
Transaction Limit	The transaction limit set for the specific transaction. It displays the limit name and description along with the minimum and maximum transaction amount set for the specific transaction.
Cooling Limit	The cooling limit set for the specific transaction. It displays the limit name and description along with the amount and time limit.

3. Click **Clone** to make another limit package with similar details.

OR

Click **Edit** to edit the limit package.

OR

Click **Delete** to delete the limit.

OR

Click **Cancel** to cancel the transaction and go back to Dashboard.

OR

Click **Back** to navigate to the previous screen.

10.2 Limit Package Management - Create

An administrator can create a new limit package using this maintenance. User has to define touch point or a touch point group and a currency in which a package is to be created. The touch points and groups defined are listed for selection. An administrator can also create a limit package for Global Touch point group (a group which is created automatically with all available internal and external touch points) A package can also be enabled for mapping at multiple user segments.

An administrator can add multiple transactions and transaction groups in a package and can assign limit definitions created for each transaction and for a group.

Further, these packages can be assigned at each touch point/group level while defining user segment parameters, party preferences and while creating business users.

To create a limit package:

1. In the **Limit Package Management** screen, click **Create**. The **Limit Package Management - Create** screen appears.

Limit Package Management - Create

Field Description

Field Name	Description
Limit Package Code	The unique code of the limit package.

Field Name	Description
Limit Package Description	Description of the limit package.
Touch Point	<p>Touch point or a group of touch point for which a package is to be created.</p> <p>The options are:</p> <ul style="list-style-type: none"> • Touch Point • Touch Point Group • Global: This a group of touch points created automatically (default touch point group has all internal and external touch points).
Touch Point	<p>Internal and external touch points defined using touch point maintenance is available for selection.</p> <p>This field is displayed and enabled if you select Touch Point option in the Touch Point field.</p>
Touch Point Group	<p>Internal and external touch points groups defined using touch point group maintenance are available for selection.</p> <p>This field is displayed and enabled if you select Touch Point Group option in the Touch Point field.</p>
Available To Role	User segment/s for which a package is to be enabled for mapping.
Currency	The currency to be set for the limit package.
Transactions/ Transaction Group - Limits	
Transactions/ Transaction Group Name	The transaction or transaction group name, to assign the limits to it.
Effective Date	Date from which the limits should be applied for a selected transaction or transaction group.
Cumulative Limit Daily	<p>Cumulative transaction limits which are applicable for each day.</p> <p>All the limit definitions maintained with cumulative – daily limit type and with the same currency as defined at package level are listed for selection.</p>
Cumulative Limit Monthly	<p>Cumulative transaction limits which are applicable for each month.</p> <p>All the limit definitions maintained with cumulative – monthly limit type and with the same currency as defined at package level are listed for selection.</p>

Field Name	Description
Transaction Limit	Transaction minimum and maximum initiation limits. All the limit definitions maintained with transaction – limit type and with the same currency as defined at package level are listed for selection.
Cooling Limit	All the limit definitions maintained with cooling period – limit type and with the same currency as defined at package level are listed for selection.

2. In the **Limit Package Code** field, enter the code for the limit package.
3. In the **Limit Package Description** field, enter the description of the limit package.
4. In the **Touch Point** field, select the appropriate option.
 - a. If you select **Touch Point**;
 - i. From the **Touch Point** list, select the appropriate option.
 - b. If you select **Touch Point Group**;
 - i. From the **Touch Point Group** list, select the appropriate option.
 - c. Select **Global**, to create a limit package for a group of all touch points.
5. From **Available To Role** list, select the appropriate role.
6. From **Currency** list, select the appropriate currency to be associated with the Limit Package. It enables the **Transactions / Transaction Group - Limits** section.
7. From the **Transaction / Transaction Group Name** from the list, select the appropriate option for the limit package in the **Transactions / Transaction Group - Limits** section.

Note: Click [View Details](#) link to view transaction group details.

View Details -Transaction Group Details

The screenshot displays the 'Transaction Group Maintenance' page in the Futura Bank system. A 'View Details' modal window is open, showing a table of transactions for a specific group. The table has columns for 'Sr No.' and 'Transactions'. The data rows are:

Sr No.	Transactions
1	Adhoc Internal Transfer - Limits
2	Adhoc International Transfer

The background interface shows fields for 'Limit Package Code', 'Limit Package Description', 'Available To Role' (Retail User), 'Currency' (GBP), 'Transaction Name' (Create Forex Deal), 'Effective Date' (17 Jul 2019), 'Expiry Date', 'Cumulative Limit Daily', and 'Transaction Limit'. A 'Delete Transaction' button is visible at the bottom right of the modal.

Field Description

Field Name	Description
Group Code	Search the transaction groups with group code.
Group Description	Search the transaction groups with group description.
No. of Transactions	Number of transactions associated with the transaction groups.

8. Select the **Effective Date** from the calendar for the limit package in the **Transactions / Transaction Group - Limits** section.
9. From the **Cumulative Limit Daily, Cumulative Limit Monthly, Transaction Limit and Cooling Limit** lists, select the appropriate limits.
10. Click **Add Transaction** and repeat the steps 4 to 6, if you want to assign limits for more transactions.
OR
Click **Add Transaction Group** and repeat the steps 4 to 6, if you want to assign limits for more transactions groups.
11. Click **Save** to save the limit package.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Back** to navigate back to previous screen.
12. The **Review** screen appears. Verify the details, and click **Confirm**.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Back** to navigate back to previous screen.
13. The success message of transaction submission appears.
Click **OK** to complete the transaction.

Note: You can click  to delete a transaction or cooling limit of a transaction.

10.3 Limit Package Management - Edit

Using this option, System Administrator can update or edit a limit package created for a specific channel/touch point. User is not allowed to edit the code, currency and touch point details, whereas can add or remove the transactions/transaction groups available as a part of package. And also can edit the limit definitions mapped against each type of limit.

To edit a limit package:

1. In the **Limit Package Management** screen, click **Search**. The **Limits Package Management** screen with search results appears based on the searched criteria.
OR

Click **Clear** to reset the search parameters.
 OR
 Click **Cancel** to cancel the search process.

Limit Package Management - Search

2. Click the **Limit Package Code** of the record for which you want to modify the details. The **Limits Management-View** screen appears.

Limit Package Management – View

3. Click **Edit**. The **Limit Package Management - Edit** screen appears.

Limit Package Management - Edit

The screenshot displays the 'Limit Package Management - Edit' interface. It features a header with 'futura bank' and user information. The main content area is divided into two sections for different limit packages. The first package, 'nehnewsfpackage', is set for 'Retail User: x' and 'GBP' currency. The second package, 'Create AccountAggregationPayment', has an effective date of '02 May 2020' and an expiry date of '31 Aug 2020'. Both packages have specific cumulative and transaction limits. A 'Delete Transaction' button is visible next to the second package. At the bottom, there are 'Save', 'Cancel', and 'Back' buttons.

Field Description

Field Name	Description
Limit Package Code	The unique code of the limit package. This information cannot be edited.
Limit Package Description	Description of the limit package. Details provided previously will be shown in an editable form.
Touch Point	Touch point or a group of touch point/Global touch point group for which a package is created. Touch point name or a group package name will be shown in non-editable form.
Available To Role	User segment/s for which a package is enabled for mapping. Details provided previously will be shown in an editable form.
Currency	The currency which is set for the limit package. This information cannot be edited.

Field Name	Description
Transactions/ Transaction Group - Limits	
Transactions/ Transaction Group Name	The transaction or transaction group name, to assign the limits to it.
Effective Date	Date from which the limits should be applied for a selected transaction or transaction group.
Expiry Date	Date from which the limits will be deactivated.
Cumulative Limit Daily	Cumulative transaction limits which are applicable for each day. Already assigned package if any is shown in an editable form. All the limit definitions maintained with cumulative – daily limit type and with the same currency as defined at package level are listed for selection.
Cumulative Limit Monthly	Cumulative transaction limits which are applicable for each month. Already assigned limit definition if any is shown in an editable form. All the limit definitions maintained with cumulative – monthly limit type and with the same currency as defined at package level are listed for selection.
Transaction Limit	Transaction minimum and maximum initiation limits. Already assigned definition if any is shown in an editable form. All the limit definitions maintained with transaction – limit type and with the same currency as defined at package level are listed for selection.
Cooling Limit	Already assigned definition if any is shown in an editable form. All the limit definitions maintained with cooling period – limit type and with the same currency as defined at package level are listed for selection.

4. Edit the required details, e.g. Touch point, Touch point group, roles, cumulative and/ or transaction, Transaction Group and/ or cooling limit.

Note: Click [View Details](#) link to view transaction group details.

View Details -Transaction Group Details

Field Description

Field Name	Description
Group Code	Search the transaction groups with group code.
Group Description	Search the transaction groups with group description.
No. of Transactions	Number of transactions associated with the transaction groups.

5. Click **Add Transaction**, if you want to add a new transaction.
OR
Click **Add Transaction Group**, if you want to add a new transaction group.
OR
Click  to delete an existing transaction/ transaction group.
6. Click **Save** to save the changes made to the limit package.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Back** to navigate back to previous screen.
7. The **Review** screen appears. Verify the details, and click **Confirm**.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Back** to navigate back to previous screen.
8. The success message of transaction submission appears.
Click **OK** to complete the transaction.

10.4 Limit Package Management - Clone

To speed up the process of creating new limit package, System Administrator can clone an existing limit package. All the values available in an existing package are shown in an editable format, administrator is allowed to make changes in it and save the package with different name.

To clone a limit package:

1. In the **Limit Package Management** screen, click **Search**. The **Limits Package Management** screen with search results appears based on the searched criteria.
OR
Click **Clear** to reset the search parameters.
OR
Click **Cancel** to cancel the search process.

Limit Package Management - Search

The screenshot shows the 'Limit Package Management' search interface. At the top, there are navigation elements: 'System Administrator', 'ATM/Branch', 'English', and 'UBS 14.3 AT3 Branch'. The user is identified as 'Leo Thomas' with a 'Welcome' message and 'Last login 02 May 11:21 AM'.

The search filters include:

- Package Code:
- Package Description:
- Role:
- Touch Point/ Group: Touch Point Touch Point Group Global
- Currency:
- Updated On:

There are 'Search' and 'Clear' buttons. Below the filters is a table with the following columns: Package Code, Package Description, Touch Point, Currency, Updated On, and Roles.

Package Code	Package Description	Touch Point	Currency	Updated On	Roles

- The success message of limit package deletion appears.
Click **OK** to complete the transaction.

FAQ

1. Can I delete transaction and/ or cumulative limits against a transaction in limit package?

No, existing limits against a transaction cannot be deleted; it can only be edited if effective date is starting from a future date.

2. I am unable to delete a limit through limit maintenance?

There is a possibility that the limit that you are trying to delete is associated in the limit package against a transaction(s).

3. I am unable to delete limits package through limit maintenance?

There is a possibility that the limit package that you are trying to delete is associated at any of the entities i.e. User / Party / Segment/ Enterprise Role level.

4. As part of edit, what can I update in the limits package maintenance?

You can edit the transaction and/ or cumulative limits against the transaction. You can delete the transaction(s) from the limits package and/or you can also add new transaction(s) as part of the limits package

5. What is the significance of 'Available to Roles' in Limits package?

The roles defined in Limits package will make the package available to the users of that role only.

6. Have created/ edited/ deleted Limits and/ or Limits package but it is not reflecting in the system even after a successful maintenance save message?

There is a possibility that the maintenance is saved but the status is 'Pending Approval'. For the maintenance, if there is an approval required then the changes will reflect only once the approver(s) approve the submitted request. If the setup does not require an approval workflow or is self / auto approved, then the same will reflect immediately.

7. How can I define the touch point groups?

A separate menu option 'Touch Point Group Maintenance' is available using which you can maintain internal and external touch point groups.

8. How can I define the transaction groups?

A separate menu option 'Transaction Group Maintenance' is available using which you can maintain group of transactions.

9. **Can I manually define Global touch point group?**

No, Touch Point – Global is nothing but a group of all internal and external touch points available in the application. This group cannot be maintained manually,

10. **Will the limits be applicable for newly added touch point or transactions in a respective groups?**

Yes, limits will also be applicable for transaction or touch points added at a later stage in respective groups which are mapped as a part of limit package.

11. **How the limit will be utilized, if you add a new transaction to the group for which customers have already initiated transactions during the day but before group formation?**

Limits assigned at individual transaction level will be utilized for the transaction Initiated before the transaction group formation. These limits will not be considered for group limit utilization.

12. **Can I delete a transaction group which is a part of any limit package?**

No, a transaction group cannot be deleted if a group is already associated with the limit package.

13. **How the limits will be applied if the limit definitions are mapped for a specific transaction and to a group in which the same transaction is available?**

Limits mapped for a transaction and group will be checked. Only if the sufficient limits are available at both the level, then user will be allowed to perform the transaction.

Example:

User level daily transaction limit of Domestic Transfer internet banking channel = 100000

User level daily transaction limit of Domestic Transfer for mobile banking channel = 50000

User level daily consolidated touch points transaction limit for Domestic Transfer = 120000

Days	User action	Internet – Touch Point Limit	Mobile – Touch Point limit	Touch Point Group – User level limits
	For internet as a touch point, Domestic Transfer transaction limit assigned by the Bank is 100000.	100000		120000
	For Mobile as a touch point, Domestic Transfer transaction limit assigned by the Bank is 50000		50000	
	This means, user can perform maximum transaction worth 100000 from internet and maximum of 50000 from mobile daily. And touch point group limit maintained is 120000 for a day User level will override the limits defined at user segment/type level			
	<ol style="list-style-type: none"> 1. User preforms Domestic Transfer transaction worth 20000 from mobile touch point. 2. Now, user will be allowed Domestic transfer transaction of 100000 from internet and 30000 from mobile for that day 3. As per touch point group limits, user will be allowed to perform domestic transfer transaction of 100000 from either internet banking OR mobile banking. 	100000	30000	100000
	<ol style="list-style-type: none"> 1. User preforms Domestic transfer transaction of 50000 from internet \ on the same day. 2. Now, user will be allowed maximum of 50000 Domestic transfer transaction from internet banking and 30000 from mobile banking for that day. 3. Whereas, as per consolidated touch point limit, user will be allowed to perform Domestic Transfer transaction worth 50000 from either internet or from mobile. 	50000	30000	50000
	<ol style="list-style-type: none"> 1. Now user preforms Domestic transfer transaction of 20000 from mobile. 2. Then user will be allowed to perform the transaction of 50000 	50000	10000	30000

Days	User action	Internet – Touch Point Limit	Mobile – Touch Point limit	Touch Point Group – User level limits
	<p>from internet and 10000 from mobile for that day.</p> <p>3. As per consolidated touch point limit, user will be allowed Domestic Transfer transaction of 30000 from either internet or mobile.</p> <p>4. Now, user will be allowed transaction of 30000 only from internet as consolidated channel limit is reduced to 30000.</p>			
	<p>1. After above transaction, if user utilizes 30000 from internet then internet limit will be 20000</p> <p>2. Now, if user performs Domestic transfer transaction of any amount from mobile or internet then user will be displayed an error message. As touch point group limits are exhausted.</p>	20000	10000	0.00

11. User Limits

Using this option the System/Bank Administrator can view the current available and utilized limits of specific retail user and also can modify (increase or decrease) the limits as per the requirement.

The user limits can be set for specific transaction level or at transaction group level or for a specific channel or for a group of channels.

The different types of limits are as follows:

- Daily Count- Permitted number of transactions in a day
- Daily Amount- Cumulative amount of transactions in a day
- Monthly Count- Permitted number of transactions in a month
- Monthly Amount- Permitted number of transactions in a month

Prerequisites:

- Transaction access is provided to System Administrator.
- Limit package are assigned.
- Approval rule set up for System/Bank Administrator to perform the actions.

Workflow

Features supported in application

Following functions can be performed by the System administrator as part of the maintenance:

- Search/ View User Limits
- Edit User Limits

How to reach here:

System Administrator Dashboard > Limits > User Limits

OR

System/ Bank Administrator Dashboard > Toggle menu > Limits > User Limits

11.1 User Limits - View

Using this option, System Administrator can search and view the current available and utilized limits of specific retail user.

To search and view user limits:

1. Enter the search criteria, click **Search**.
The search results appear on the **User Limits** screen based on the search parameters.
OR
Click **Cancel** if you want to cancel the transaction.
OR
Click **Clear** if you want to reset the search parameters.

User Limits - Search

The screenshot shows the 'User Limits' search interface. At the top, there is a navigation bar with 'System Administrator', 'ATM/Branch', 'English', and 'UBS 14.3 AT3 Branch'. Below this is the 'futura bank' logo and a user profile for 'Leo Thomas' with a last login of '02 May 11:21 AM'. The main content area is titled 'User Limits' and contains a search form with the following fields: 'User Type' (set to 'Retail User'), 'Username', 'First Name', 'Last Name', 'Email', 'Mobile Number', and 'Party ID'. There is a 'Search Party Name' link below the Party ID field. A 'Less Search Options' link is also present. At the bottom of the form are three buttons: 'Search', 'Cancel', and 'Clear'. To the right of the form is a 'User Limits' information box with a document icon and text explaining that users can now enforce limits for transactions and check utilized/available limits. A chatbot bubble at the bottom right says 'Hey, I am here to help if you need it!'. The footer contains the copyright notice: 'Copyright © 2006, 2020, Oracle and/or its affiliates. All rights reserved. | Security Information | Terms and Conditions'.

 OR
 Click **Cancel** to cancel the transaction.
 OR
 Click **Back** to navigate back to previous screen.
 8. The success message of limits updation appears.
 Click **OK** to complete the transaction.

FAQ

1. **Can I delete transaction and/ or cumulative group of transactions for which the limits are assigned using this function?**

No, the transactions and/or group of transactions available in the limit package cannot be deleted or new transaction/transaction group can be added using this maintenance.

2. **Will the changes made in the user's limits will be applicable to all other users whom the same package is mapped?**

No, the changes made in the limits will be applicable only the user of whom the details are being changed. Other users will continue to enjoy the same limits.

3. **Will the changes made in the user's limits will be effective immediately?**

The limits will be effective from the date mentioned as 'Effective Date' while updating the limits. If the effective date is current date and day 0 flag is set as 'Next Day' for change in limits applicability. Then the changed limits will be applicable from the next day.

4. **How can I reassure of changing the specific limits, as the screen has lot of information?**

As a part if user limits change review screen, only the transactions of which the limits are changed are shown on the screen with highlighted values. You can recheck the information and confirm the changes.

5. Can I make the changes in the limits assigned to corporate users?

No, changes cannot be done for the limits assigned to corporate users using this maintenance.

12. Transaction Group Maintenance

Transaction group maintenance enables the System Administrator to create and maintain group of transactions. Administrator can maintain a transaction group for the purpose of defining consolidated transaction limits. Once limits are assigned at transaction group, these limits acts as collective limit for selected transactions in a group.

For e.g., If the cumulative limit daily (for payment transaction group) is set to GBP 2000, then in a day, customer will be allowed to perform transactions up to GBP 2000 only, spanning across all selected transactions in a group.

Prerequisites:

- Transaction access is provided to system administrator.
- Approval rule set up for system administrator to perform the actions.
- Transactions are available for grouping.

Workflow

Features supported in application

The administrator can perform the following actions:

- Create Transaction Group
- Search/ View Transaction Group
- Edit Transaction Group
- Delete Transaction Group

How to reach here:

System/ Bank Administrator Dashboard > Toggle menu > Limits > Transaction Group Maintenance

12.1 Transaction Group Maintenance - View

Using this option, System Administrator can search and view details of particular transaction group based on different search parameters like group code or group description. The search results displays a summary of matching transaction groups.

Further, System Administrator can view the details of transaction groups created for the purpose of maintaining limits.

To search and view transaction group:

1. In the **Transaction Group Maintenance** screen, enter the search parameters and click **Search**.
The **Transaction Group Maintenance** screen with search results appears based on the search criteria.
OR
Click **Cancel** to cancel the search process.
OR
Click **Clear** to reset the search parameters.

Transaction Group Maintenance - Search

The screenshot shows the 'Transaction Group Maintenance' screen. At the top, there's a navigation bar with 'System Administrator', 'ATM/Branch', 'English', and 'UBS 14.3 AT3 Branch'. Below that, the 'futura bank' logo is visible. The main area has search fields for 'Group Code' and 'Group Description' (with 'all' entered). There are 'Search' and 'Clear' buttons. Below the search fields is a table with columns: Group Code, Group Description, and No of Transactions. The table lists several groups. To the right, there's a 'Create and Maintain Transaction Groups' panel with a 'Create' button and a help bubble that says 'Hey, I am here to help if you need it!'. At the bottom, there's a 'Cancel' button and a copyright notice: 'Copyright © 2006, 2020, Oracle and/or its affiliates. All rights reserved. | Security Information | Terms and Conditions'.

3. Click **Delete**. The **Delete Warning** message appears.

Delete Transaction Group

The screenshot shows the same 'Transaction Group Maintenance - View' page as above, but with a 'Transaction Group Deletion' dialog box open in the center. The dialog box has a title bar 'Transaction Group Deletion' and a close button (X). The main text of the dialog asks 'Are you sure you want to delete this Transaction Group?'. Below the text are two buttons: 'Yes' and 'No'.

4. Click **Yes** to confirm the deletion.
OR
Click **No** to cancel the deletion process.
5. The success message of transaction group deletion appears.
Click **OK** to complete the transaction.

FAQ

1. Can I club one transaction as a part of multiple groups?

Yes, one transaction can be clubbed as part multiple groups.

2. Where can I use these transaction groups?

You can define a transaction limits using 'Limit Package Management' for these transaction groups.

3. Can I edit a transaction group which is a part of any limit package?

Yes, you can edit the transaction group details if a group is already associated with the limit package.

4. How the limit will be utilized, if you add a new transaction to the group for which customers have already initiated transactions during the day but before group formation?

Limits assigned at individual transaction level will be utilized for the transaction Initiated before the transaction group formation. These limits will not be considered for group limit utilization.

5. Can I delete a transaction group which is a part of any limit package?

No, if a transaction group cannot be deleted if a group is already associated with the limit package.

13. Party Account Access

System/Bank Administrator can set up account and transaction access rules at the corporate party level. The System/ Bank Administrator can provide access to accounts held by the party with the bank as available in the core banking application or the respective mid-office application.

Using this function system administrator can manage access for Current and Savings Accounts, Term Deposit Loan accounts along with Liquidity Management enabled Real Accounts (including External Accounts if any) and VAM enabled Real and virtual accounts for a Corporate.

Upon navigating to the specific category tab viz. Demand Deposits, Term Deposits, Loans etc., the administrator can select a global check box of 'Map all accounts' to enable all the existing accounts under the selected category for channel banking. If specific accounts are required to be given access then the user needs to select the respective check boxes preceding the account number.

Note: Access Management for Loan Accounts are for accounts fetched from Core Banking System i.e. FCUBS. It is not supported for accounts from Oracle Banking Corporate Loan (OBCL) system.

As part of this maintenance, own accounts and transaction mapping as well as accounts of the linked parties can be mapped to the parent party.

Note:

- 1) Linked Party Access Management can be provided to parent party or users of the parent party only for Account Types CASA, TD and Loans.
- 2) Linked party account mapping is not supported for Account Types 'VAM-Real Accounts, Virtual Accounts and Liquidity Management'.

If there is any party to party linkage maintained in the mid-office system 'OBLM', then those accounts will appear in own account linkage itself on the OBDX side for access management.

Pre-Requisites

- Party preferences should be created for the party for which access is to be maintained
- Channel Access should be enabled for party for which account access is to be maintained
- Account access maintenance for linked party accounts can be done once there is a party to party linkage maintained.
- Transaction access is provided to Bank Administrator.
- Approval rule set up for Bank Administrator to perform the actions.

Workflow

Features Supported In Application

The following options are available as part of this maintenance:

- Party Account Access - Mapping (Own accounts and linked party accounts)
- Party Account Access – View (Own accounts and linked party accounts)
- Party Account Access - Edit (Own accounts and linked party accounts)
- Party Account Access - Delete (Own Accounts and linked party accounts)

How to reach here:

Bank Administrator Dashboard > Account Access > Party Account Access

OR

System/ Bank Administrator Dashboard > Toggle menu > Account Access > Party Account Access

13.1 Party Account Access - Mapping (Create)

The Bank Administrator gets a request with the list of account(s) and transactions for which access needs to be provided to the party.

To provide the party with account and transaction access:

1. In the **Party ID** field, enter the party id of the user.
OR
In the **Party Name** field, enter the party name of the user.
2. Click **Search**. For a searched party, two sections **Own Account Mapping Summary** and **Linked Party Account Mapping Summary** appears.
Linked party account mapping will only be available if the selected party has Party to Party Linkage maintained.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Clear** to clear the search parameters.

In the **Party Name** field, enter the party name of the user.
2. Click **Search**. For a searched party, two sections **Own Account Mapping Summary** and **Linked Party Account Mapping Summary** appears.
Linked party account mapping will only be available if the selected party has Party to Party Linkage maintained.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Clear** to clear the search parameters.
3. If there is no mapping done for a party (own/ linked), the message **No Accounts mapped for the party** with **Map** appears.
4. Click **Account Type** i.e. Current and Savings / TD / Loans/ Liquidity Management/ Virtual Account Management – Real Account/ Virtual Account in the summary details for the party, which will navigate to the view page.
All the accounts held by the selected party as a relationship with the bank as available in the core banking system or respective mid-office system will be fetched and displayed in the respective categories i.e. Current and Savings, Term Deposits, Loans, Liquidity Management, Virtual Account Management – Real Account and Virtual Account.
OR
Click **Cancel** to cancel the transaction and navigate back to 'Dashboard'.
OR
Click **Back** to navigate to the previous screen.
5. In case the selected party is mapped as a parent party to another party, select on the account type in the linked party summary section.
6. The cookie message displayed indicating the administrator that account mapping for other category tabs can be viewed by visiting the respective tabs.

13. Click **Save** to save the changes.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Back** to navigate to the previous screen.
14. The **Party Account Access - Review** screen appears. Verify the details, and click **Confirm**.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Back** to navigate to the previous screen.
15. The screen with success message appears. Click **OK** to complete the transaction.

13.4 Party Account Access - Delete

As part of this option, own account mapping and/or linked party account mapping can be deleted.

To delete account and transaction access for the party:

1. In the **Party ID** field, enter the party id of the user.
OR
In the **Party Name** field, enter the party name of the user.
2. Click **Search**. For a searched party, two sections **Own Account Mapping Summary** and **Linked Party Account Mapping Summary** appears.
Linked party account mapping will only be available if the selected party has Party to Party Linkage maintained.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Clear** to clear the search parameters.
3. If there is no mapping done for a party (own/ linked), the message **No Accounts mapped for the party** with **Map** appears.
4. Click **Account Type** i.e. Current and Savings / TD / Loans/ Liquidity Management/ Virtual Account Management – Real Account/ Virtual Account in the summary details for the party, which will navigate to the view page.
All the accounts held by the selected party as a relationship with the bank as available in the core banking system or respective mid office system will be fetched and displayed in the respective categories i.e. Current and Savings, Term Deposits, Loans, Liquidity Management, Virtual Account Management – Real Account and Virtual Account.
OR
Click **Cancel** to cancel the transaction and navigate back to 'Dashboard'.
OR
Click **Back** to navigate to the previous screen.
5. In case of mapping of linked party accounts to the parent party, select on the account type in the linked party summary section.
6. Navigate to the specific category tab viz. Current and Savings, Term Deposits, Loans, Liquidity Management, Virtual Account Management – Real Account, Virtual Account etc., the administrator can view both the accounts for which access has been provided and the ones for which access is not provided.
7. Click **Delete**. The application prompt the administrator with a message Are you sure you want to delete Party Account Access setup for linked Party ID – Party name with an option of Yes / No.
8. Click **Yes** to proceed with the deletion request.
It will navigate to confirmation page with a success message and the status.
OR
Click **No** if you do not wish to proceed with deletion.
9. The success message and the status appear.
10. Click **OK** to complete the transaction.

FAQ

1. Is it necessary to setup Party Account Access Management before setting up User Account Access?

Yes. The party account access management setup must be done before the user level mapping of accounts and transactions.

2. What is the significance of Auto and Manual option in 'Map Accounts'?

This feature allows the administrator to configure access policies for accounts and associated transactions which may get added subsequently in the future.

Auto: Gives access to the newly added accounts and transactions of the party as soon as the account is opened. This option can be selected whenever bank administrator wishes to provide access by default

Manual: Denies the newly added accounts and transactions by default. This is to ensure that access to accounts and transactions is provided only upon receiving specific instructions from corporates

3. Party Account Access has not been maintained for the party for Own or Linked party, still there is no 'Map' button available?

It is possible that the channel access and/or party preferences has not been maintained for the party whose accounts needs to be provided for access to the selected party. There will be an appropriate message provided to the user below the party details. Before proceeding with account access, administrator can visit 'Party Preferences' screen and maintain the preferences and/or channel access for the party.

4. Will Party Account Access – Deletion for a party (Own/Linked) lead to automatic deletion of User Account Access?

Yes. Deletion of account access for a party will lead to automatic deletion of access for the users of that party.

5. If I remove access of account(s) and transaction(s) for a party, will it lead to automatic access removal for the users of that party

Yes. Access removal at party level for an account and/or transaction will automatically remove access at user level of the selected party.

6. I have mapped/edited/deleted party account access for a party but it is not reflecting in the system even after a successful maintenance save message?

There is a possibility that the maintenance is saved but the status is 'Pending Approval'. For the maintenance, if there is an approval required then the changes will reflect only once the approver(s) approve the submitted request. If the setup does not require an approval workflow or is self / auto approved, then the same will reflect immediately.

[Home](#)

14. User Account Access

Using this option the Bank Administrator can set up account and transaction access for user(s) of the corporate party. This maintenance can be done only after the Party Account Access is setup for the party of the user(s). The user level mapping of accounts and transactions must be done in order to provide access to the accounts for performing transactions to the specific user. If this step is not followed, the corresponding user will not be able to view any accounts on the dashboard screen or at the individual transactions.

Note: User Account Access is a non-mandatory step. If the Admin does not maintain the user account access for any of the corporate users, system will refer to the party account access rules maintained for his associated party ID.

Pre-Requisites

- Account Access should be maintained for the party of the user for which access is to be maintained
- Account Access for the party should be maintained for linked party accounts if the user needs access to linked party accounts.
- Party preferences should be created for the party of the user for which access is to be maintained
- Channel Access should be enabled for party of the user for which account access is to be maintained
- Transaction access is provided to Bank Administrator.
- Approval rule set up for Bank Administrator to perform the actions.

Workflow

Features Supported In Application

The following options are available as part of this maintenance:

- User Account Access - Mapping (Own accounts and linked party accounts)
- User Account Access – View (Own accounts and linked party accounts)
- User Account Access - Edit (Own accounts and linked party accounts)
- User Account Access - Delete (Own Accounts and linked party accounts)

How to reach here:

Bank Administrator Dashboard > Account Access > User Account Access

OR

System/ Bank Administrator Dashboard > Toggle Menu > Account Access > User Account Access

14.1 User Account Access - Mapping (Create)

This option lets the administrator to provide account access to specific users of a party.

To provide the user with account and transaction access:

1. In the **Party ID** field, enter the party id of the user.
OR
In the **Party Name** field, enter the party name of the user.
2. Click **Search**.
For a searched party, there will be a list of users displayed with information like user ID, contact details of the user and an indicator whether there is an account mapping done for the user.
Click on user ID to navigate to **Account Access summary** section with two sections **Own Account Mapping Summary** and **Linked Party Account Mapping Summary**. Linked party account mapping will only be available if the selected party has Party to Party Linkage maintained.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Clear** to clear the search parameters.

User Account Access – Search

The screenshot displays the 'User Account Access' search interface in the Futura Bank system. At the top, there is a navigation bar with 'System Administrator', 'ATM/Branch', 'English', and 'UBS 14.3 AT3 Branch'. The main header shows the Futura Bank logo and a user welcome message for Leo Thomas. The search form includes two input fields: 'Party ID' and 'Party Name'. Below these fields are three buttons: 'Search' (in blue), 'Cancel' (in grey), and 'Clear' (in light grey). To the right of the search form is a 'Note' box with a Futura Bank logo and the following text: 'The function enables you to set up account and transaction access rules for a corporate user. You can decide the account(s) along with transaction(s) for each of the selected account that the corporate user needs to be provided access. Accounts of the parent as well as of the linked party (if any) will be available for access definition.'

13. Click **Save**.
OR

- Click **Cancel** to cancel the transaction.
OR
Click **Back** to navigate to the previous screen.
14. The **User Account Access - Review** screen appears. Verify the details, and click **Confirm**.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Back** to navigate to the previous screen.
15. The screen with success message appears. Click **OK** to complete the transaction.

This option lets the administrator to provide account access to specific users of a party.

To provide the user with account and transaction access:

- In the **Party ID** field, enter the party id of the user.
OR
In the **Party Name** field, enter the party name of the user.
- Click **Search**.
For a searched party, there will be a list of users displayed with information like user ID, contact details of the user and an indicator whether there is an account mapping done for the user.
Click on user ID to navigate to **Account Access summary** section with two sections **Own Account Mapping Summary** and **Linked Party Account Mapping Summary**. Linked party account mapping will only be available if the selected party has Party to Party Linkage maintained.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Clear** to clear the search parameters.

User Account Access – Search

The screenshot displays the 'User Account Access' search page. At the top, there is a navigation bar with 'System Administrator', 'ATM/Branch', 'English', and 'UBS 14.3 AT3 Branch'. Below this is the 'futura bank' logo and a user profile for 'Leo Thomas' with a last login of '03 May 05:48 PM'. The main content area has two input fields: 'Party ID' and 'Party Name'. Below these fields are three buttons: 'Search' (blue), 'Cancel' (grey), and 'Clear' (light blue). To the right of the search fields is a 'Note' box with a document icon and the following text: 'The function enables you to set up account and transaction access rules for a corporate user. You can decide the account(s) along with transaction(s) for each of the selected account that the corporate user needs to be provided access. Accounts of the parent as well as of the linked party (if any) will be available for access definition.'

Description

Party ID

The party ID searched by the Bank Administrator.

Field Name	Description
Party Name	The name of the party.
User ID	User ID of the selected user.
User Name	User name of the selected user.
Account Mapping	
Current and Savings/ Term Deposits/ Loans/ Liquidity Management/ Virtual Account Management – Real Account/ Virtual Account	
Apply Party Level Changes Automatically	User will get access to accounts that are allowed/ disallowed at the party level.
Map All Transactions to All Accounts	Mapping all the transactions to all the existing accounts.
Account Number	List of account numbers present in a particular account type.
Currency	Account currency.
Product Name	Name of the product.
Account Status	Status of the account access for the party

11. To map the transactions to the account, click  against the particular account number to view the transaction mapping.
12. Select the respective check boxes preceding the transaction to be mapped.
OR
Select **Map All Transactions**, if you want to map all the transactions to all accounts.
13. Select **Apply Party Level Changes Automatically** to automatically apply the party changes.
14. Click **Save**.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Back** to navigate to the previous screen.
15. The **User Account Access - Review** screen appears. Verify the details, and click **Confirm**.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Back** to navigate to the previous screen.
16. The screen with success message appears. Click **OK** to complete the transaction.

14.2 User Account Access- Search

The Bank Administrator can view the list of account(s) and transactions for which access has been provided to the user.

To view the account and transaction access:

1. In the **Party ID** field, enter the party ID of the user.
OR
In the **Party Name** field, enter the party name of the user.
2. Click **Search**.
For a searched party, there will be a list of users displayed with information like user ID, contact details of the user and an indicator whether there is an account mapping done for the user.

14.3 User Account Access - Edit

The Bank Administrator gets a request with the list of account(s) and transactions for which access details needs to be edited for a selected user of the party.

To edit account and transaction access for the user:

1. In the **Party ID** field, enter the party id of the user.
OR
In the **Party Name** field, enter the party name of the user.
2. Click **Search**.
For a searched party, there will be a list of users displayed with information like user ID, contact details of the user and an indicator whether there is an account mapping done for the user.
3. Click on **user ID** to navigate to Account Access summary section for the user with two sections **Own Account Mapping Summary** and **Linked Party Account Mapping Summary**.
Linked party account mapping will only be available if the selected party has Party to Party Linkage maintained.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Clear** to clear the search parameters.
4. Click **Account Type** i.e. Current and Savings / TD / Loans/ Liquidity Management/ Virtual Account Management – Real Account/ Virtual Account in the summary details for the party, which will navigate to the view page.
OR
Click **Cancel** to cancel the transaction and navigate back to 'Dashboard'.
OR
Click **Back** to navigate to the previous screen.
5. In case of mapping of linked party accounts to the parent party, select on the account type in the linked party summary section.
6. Navigate to the specific category tab viz. Current and Savings, Term Deposits, Loans, Liquidity Management, Virtual Account Management – Real Account, Virtual Account etc., the administrator can view both the accounts for which access has been provided and the ones for which access is not provided.
7. Click **Edit**. The **User Account Access - Edit** screen appears.
This enables the selection and de-selection option against the accounts. There is also an option to edit checkbox **Apply Party Level Changes Automatically** to apply/ remove the party changes.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Back** to navigate to the previous screen.
8. Click **Account Type** for which you want to edit the mapping of the accounts.
The cookie message displayed indicating the administrator that account mapping for other category tabs can be viewed by visiting the respective tabs.

14.4 User Account Access - Delete

The Bank Administrator gets a request with the user information of a party for which access details needs to be deleted. As part of this option, own account mapping and/or linked party account mapping can be deleted for a user.

To delete account and transaction access for the user:

1. In the **Party ID** field, enter the party id of the user.
OR
In the **Party Name** field, enter the party name of the user.
2. Click **Search**.
For a searched party, there will be a list of users displayed with information like user ID, contact details of the user and an indicator whether there is an account mapping done for the user.
3. Click on **user ID** to navigate to Account Access summary section for the user with two sections **Own Account Mapping Summary** and **Linked Party Account Mapping Summary**.
Linked party account mapping will only be available if the selected party has Party to Party Linkage maintained.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Clear** to clear the search parameters.
4. Click **Account Type** i.e. Current and Savings / TD / Loans/ Liquidity Management/ Virtual Account Management – Real Account/ Virtual Account in the summary details for the party, which will navigate to the view page.
OR
Click **Cancel** to cancel the transaction and navigate back to 'Dashboard'.
OR
Click **Back** to navigate to the previous screen.
5. In case of mapping of linked party accounts to the parent party, select on the account type in the linked party summary section.

6. Navigate to the specific category tab viz. Current and Savings, Term Deposits, Loans, Liquidity Management, Virtual Account Management – Real Account, Virtual Account etc., the administrator can view both the accounts for which access has been provided and the ones for which access is not provided.
7. Click **Delete**.
The application will prompt the administrator with a deletion message with an option of Yes / No.
8. Click **Yes** to proceed with the deletion request. It will navigate to confirmation page with a success message and the status.
OR
Click **No** if you do not wish to proceed with deletion.
9. Click **OK** to complete the transaction.

FAQ

1. **Is it necessary to setup Party Account Access Management before setting up User Account Access?**

Yes, party account access management setup must be done before the user level mapping of accounts and transactions.

2. **User Account Access has not been maintained for the user for Own or Linked party, still there is no 'Map' button available?**

It is possible that the account access maintenance has not been done for the party to which the user belongs to. In such a case, bank admin will need to maintain account access for the party and only then proceed with User Account Access.

3. **Will Party Account Access – Deletion for a party (Own/Linked) lead to automatic deletion of User Account Access?**

Yes, deletion of account access for a party will lead to automatic deletion of access for the users of that party.

4. **If I remove access of account(s) and transaction(s) for a party, will it lead to automatic access removal for the users of that party?**

Yes, access removal at party level for an account and/or transaction will automatically remove access at user level of the selected party.

5. **I am unable to see some of the account(s) and/or transaction(s) for mapping as part of User Account Access that were available in Party Account Access for the party of the user?**

There is a possibility that these accounts and/or transactions have not been provided access at party level of the selected user. The accounts and transactions that are unmapped at party level will not be visible at user level of the selected party.

6. Have mapped/edited/deleted user account access for a party but it is not reflecting in the system even after a successful maintenance save message?

There is a possibility that the maintenance is saved but the status is 'Pending Approval'. For the maintenance, if there is an approval required then the changes will reflect only once the approver(s) approve the submitted request. If the setup does not require an approval workflow or is self / auto approved, then the same will reflect immediately.

[Home](#)

15. Party Resource Access

Using this maintenance, the System/ Bank Administrator can provide access to Virtual Account Management Resource 'Remitter List'. The Party Resource Access screen lists the remitter IDs for the selected Corporate.

The administrator can select a global check box of 'Map All Remitter List ' to enable all the existing remitter list under the party for channel banking. If specific remitters are required to be given access then the user needs to select the respective check boxes preceding the remitter ID.

Pre-Requisites

- Party preferences should be created for the party for which access is to be maintained
- Channel Access should be enabled for party for which resource access is to be maintained
- Transaction access is provided to Bank Administrator.
- Approval rule set up for Bank Administrator to perform the actions.

Workflow

Features Supported In Application

The following options are available as part of this maintenance:

- Party Resource Access - Mapping
- Party Resource Access – View
- Party Resource Access - Edit
- Party Resource Access - Delete

How to reach here:

Bank Administrator Dashboard > Resource Access > Party Resource Access
 OR

System/ Bank Administrator Dashboard > Toggle menu Access Management > Resource Access > Party Resource Access

15.1 Party Resource Access - Mapping (Create)

The Bank Administrator gets a request with the Virtual Account Management Remitter list for which access needs to be provided to the party.

To provide the party with remitters access:

1. In the **Party ID** field, enter the party id of the user.
OR
In the **Party Name** field, enter the party name of the user.
2. Click **Search**. For a searched party, **Remitter List Mapping Summary** appears.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Clear** to clear the search parameters.

Party Resource Access - Search

The screenshot displays the 'Party Resource Access' search results in the Futura Bank system. The search criteria are: Party ID: 001630, Party Name: McLeods M Chemicals, and Module Name: Virtual Account Management (Remitter List). The 'Remitter List Mapping Summary' table shows one remitter list mapped. A 'Note' box explains the function's purpose.

Resource Type	Total Number of Remitter Lists	Number of Remitter Lists Mapped
Remitter List	1	1

Note
The function enables you to set up resource (Program, Facility and Remitter List) and transaction access rules for a corporate customer. You can decide the resources along with transaction(s) for each of the selected resources that needs to be provided access for the corporate customer.

Field Description

Field Name	Description
Party ID	The party id searched by the bank administrator.
Party Name	The name of the party.
Module Name	The name of the module. Only Virtual Account Management (Remitter List) is supported.

Remitter List Mapping Summary

3. If there is no mapping done for a party, there will be a message **No Remitter List mapped** with Map button.
4. Click **Map**. The **Party Resource Access - Create** screen appears.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Back** to navigate to the previous screen.

5. Click against the particular Remitter List to view the mapped transactions.
 OR
 Click **Edit** to update transaction mapping.
 OR
 Click **Cancel** to cancel the transaction.
 OR
 Click **Back** to navigate to the previous screen.

15.3 Party Resource Access - Edit

The Bank Administrator gets a request with the list of remitter lists and transactions under each Remitter List for which access details needs to be edited for the party.

To edit remitter lists and transaction access for the party:

1. In the **Party ID** field, enter the party id of the user.
 OR
 In the **Party Name** field, enter the party name of the user.
2. Click **Search**. For a searched party, **Remitter List Mapping Summary** appears.
 OR
 Click **Cancel** to cancel the transaction.
 OR
 Click **Clear** to clear the search parameters.
3. If there is no mapping done for a party, the message **No Resource mapped for the party** with **Map** option appears.

4. Click the **Remitter Type** link to view/edit the details. The **Party Resource Access- View** screen appears.
5. Click **Edit**. The **Party Resource Access - Edit** screen appears.
This enables the selection and de-selection option against the Remitter List IDs and allows changing the map remitters from Auto to Manual and vice-versa.
OR
Click **Next** to go to the next tab (Transaction Mapping).
OR
Click **Delete** to delete the Party Resource Access setup.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Back** to navigate to the previous screen.

16. User Resource Access

Using this option the System/ Bank Administrator can set up remitter list mapping and transaction access for user(s) of the corporate party. This maintenance can be done only after the Party Resource Access is setup for the party of the user(s).

Pre-Requisites

- Resource Access should be maintained for the party of the user for which access is to be maintained
- Party preferences should be created for the party of the user for which access is to be maintained
- Channel Access should be enabled for party of the user for which resource access is to be maintained
- Transaction access is provided to Bank Administrator.
- Approval rule set up for Bank Administrator to perform the actions.

Workflow

Features Supported In Application

The following options are available as part of this maintenance:

- User Resource Access - Mapping
- User Resource Access – View
- User Resource Access - Edit
- User Resource Access - Delete

How to reach here:

Bank Administrator Dashboard > Resource Access > User Resource Access

OR

System/ Bank Administrator Dashboard > Toggle Menu > Resource Access > User Resource Access

16.1 User Resource Access - Mapping (Create)

This option allows the administrator to provide access to specific users of a party.

To provide the user with account and transaction access:

1. In the **Party ID** field, enter the party id of the user.
OR
In the **Party Name** field, enter the party name of the user.
2. Click **Search**.
For a searched party, there will be a list of users displayed with information like user ID, full name of the user and initials of the user.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Clear** to clear the search parameters.

User Resource Access – Search

The screenshot shows the 'User Resource Access' search interface. At the top, there is a navigation bar with the following items: 'System Administrator', 'ATM/Branch', 'English', and 'UBS 14.3 AT3 Branch'. Below this is the 'futura bank' logo and a search bar containing 'Welcome, Leo Thomas' and 'Last login 04 May 05:58 AM'. The main content area is titled 'User Resource Access' and contains two input fields: 'Party ID' and 'Party Name'. Below these fields are three buttons: 'Search', 'Cancel', and 'Clear'. To the right of the input fields is a 'Note' box with the following text: 'The function enables you to set up resource (Program, Facility and Remitter List) and transaction access rules for a corporate customer. You can decide the resources along with transaction(s) for each of the selected resources that needs to be provided access for the corporate customer.' At the bottom right of the interface is a blue button that says 'Hey, I am here to help if you need it!' and a circular help icon.

4. Click the **Remitter List** link. The **User Resource Access – View** screen, displaying remitter list mapping appears.
5. Click **Edit**. The **User Resource Access - Edit** screen appears.
This enables the selection and de-selection option against the remitter list. There is also an option to edit check box **Apply Party Level Changes Automatically** to apply/ remove the party changes.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Back** to navigate to the previous screen.

User Resource Access – Edit

The screenshot shows the 'User Resource Access' edit screen. At the top, there's a navigation bar with 'System Administrator', 'ATM/Branch', 'English', and 'UBS 14.3 AT3 Branch'. Below that, the 'futura bank' logo and user information 'Welcome, Leo Thomas' are visible. The main content area is titled 'User Resource Access' and displays the following details:

- Party Name: McLeods M Chemicals
- User ID: ritcorpmaker
- User Name: Abhishek kumar
- Module Name: Virtual Account Management (Remitter List)

There are two steps indicated: '1 Remitter List Mapping' and '2 Transaction Mapping'. The 'Remitter List Mapping' section includes two checked checkboxes: 'Apply Party Level Changes Automatically' and 'Map All Remitter Lists'. Below this is a table with the following data:

Remitter List ID	Remitter List Name	Status
<input checked="" type="checkbox"/> 2233551	MMC	Active

At the bottom, there are three buttons: 'Next', 'Cancel', and 'Back'. A copyright notice is visible at the very bottom: 'Copyright © 2006, 2020, Oracle and/or its affiliates. All rights reserved. | Security Information | Terms and Conditions'.

6. Select the respective check boxes preceding the **Remitter List ID** to be mapped.
OR
Select **Map All Remitter List**, if you want to map all the Remitter Lists available.
Select/ De-select check box **Apply Party Level Changes Automatically** to apply/remove the party changes.
7. Click **Next**. The **User Resource Access - Edit** screen with mapped remitter list appears.
OR
Click **Back** to navigate to the previous screen.
OR
Click **Cancel** to cancel the transaction.
8. To map the transactions to the remitter lists, click ▶ against the particular Remitter List ID to view the transaction mapping.

9. Select the respective check boxes preceding the transaction to be mapped.
OR
Select **Map All Transactions**, if you want to map all the transactions to all Remitter Lists.
10. Click **Save**.
OR
Click **Back** to navigate to the previous screen.
OR
Click **Cancel** to cancel the transaction.
11. The **User Resource Access - Review** screen appears. Verify the details, and click Confirm.
OR
Click Edit to edit the transaction.
OR
Click Cancel to cancel the transaction.
12. The **User Resource Access - Confirmation** screen with success message appears along with the reference number and status of the transaction.
Click OK to complete the transaction.

16.4 User Resource Access - Delete

The Bank Administrator gets a request with the user information of a party for which access details needs to be deleted. As part of this option, remitter list mapping can be deleted for a user.

To delete remitter and transaction access for the user:

1. In the **Party ID** field, enter the party id of the user.
OR
In the **Party Name** field, enter the party name of the user.
2. Click **Search**.
For a searched party, there will be a list of users displayed with information like user ID, full name of the user and initials of the user.
3. Click the **User Name** link against the user record for which you want to delete the details.
The **User Resource Access – Mapping Summary** screen appears.
4. Click the **Remitter List** link. The **User Resource Access – View** screen, displaying remitter list mapping appears.
5. Click **Delete**. The application will prompt the administrator with a deletion message with an option of Yes / No.
OR
Click **Edit** to modify the remitter list mapping.
OR
Click **Next** to go to the next screen. The **User Resource Access – View (Transaction Mapping)** screen appears.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Back** to navigate to the previous screen.
6. Click **Yes** to proceed with the deletion request. It will navigate to confirmation page with a success message and the status.
OR
Click **No** if you do not wish to proceed with deletion.
7. Click **OK** to complete the transaction.

[Home](#)

17. Approvals

Each user is assigned a particular task to perform as per their position in the hierarchy of the bank/corporate. For instance, some user(s) may be given rights to do data entry for transactions such as domestic fund transfer, draft issuance by logging in to channel banking. Transaction created by initiator in the system is routed to the appropriate authorized signatory or group of signatories for approval depending upon the rules configured. A transaction once approved by all the required approvers gets processed.

Approval Management function enables the Bank Administrator to configure approval flows for various financial and non-financial transactions on channel banking for bank's customers and for administrators.

Approval flow includes configuration of rules for the users with following access types:

- Maker/ Initiator – User who is a creator of the transaction.
- Authorizer/ Approver – User who authorizes the transactions created by the maker. His authorization rights are maintained by an administrator.

Features supported in application

Approval management supported for Bank administrator users includes;

- Approval Workflow Maintenance
- Approval Rule Maintenance

Note: Approval Workflow and Rules can also be maintained for Non Customer Corporates (for which the party id is not maintained in UBS or in Core banking system). For Non Customer Corporate (counterparties on boarded by Corporates) the system will look for the party ID in OBSCF/OBCMS.

Business scenario

AES Corporation wants to enable approval workflow for all financial transactions. The requirement is – All the financial transactions will be initiated by 'Officers' of the corporate. The transactions initiated by 'Officers' should be sent to 'Assistant Managers' for 1st level approval. After the transaction is approved by any one user from a group of 'Assistant Managers' then the transaction should be sent to 'Managers' for final level of approval. The transaction processing should happen only after final approval.

17.1 Workflow Management

Approval workflows are created to support requirements where multiple levels of approval are required in a specific sequence for a transaction/maintenance. Each workflow can be configured to have up to five levels of approval with a specific user or a user group configured at each level.

Workflows can be created independently and can be attached to a specific transaction/maintenance as part of the Approval Rule configuration.

Prerequisites

- Transaction access is provided to Bank Administrator.
- Party preference is maintained.
- Multiple users are maintained under a party or as Bank Administrators
- Approval rule set up for Bank Administrator to perform the actions.
- Necessary user groups are maintained using User Group Management.

Workflow

Features supported in application

Approval Rule maintenance allows Bank Administrator to:

- View Approval Workflows
- Create Approval Workflows
- Edit Approval Workflows

How to reach here:

System/ Bank Administrator Dashboard > Toggle Menu > Approvals > Workflow Management

OR

Bank Administrator Dashboard > Approvals > Workflow Management

17.1.1 Approval Workflow – Select User Type

Bank Administrator logs into the system and navigates to the Approval Workflow screen. On accessing the 'Approval Workflow Management' menu, bank administrator has to select the user type for whom the workflows are to be maintained.

Approval Workflow – Select User Type

1. Click **Admin User** to access the workflow management of bank administrator users. The **Admin Workflow Management** screen appears.
2. Click **Corporate User** to access the workflow management of bank administrator users. The **Workflow Management** screen appears.

17.1.2 Approval Workflow - Admin User - Admin Workflow Management

Admin Workflow Management

Field Description

Field Name	Description
Workflow Code	Code of the already maintained approval workflow.
Workflow Description	Description of the already maintained approval workflow.

- Click **Create** to create new admin workflow. The **Admin Workflow Management – Create** screen appears.
OR
Click **Cancel** to cancel the operation and navigate the user back to 'Dashboard'.
OR
Enter the search parameters and click **Search** to search the matching records.
OR
Click **Clear** to clear the input search parameters.

17.1.3 Admin Workflow Management – Search

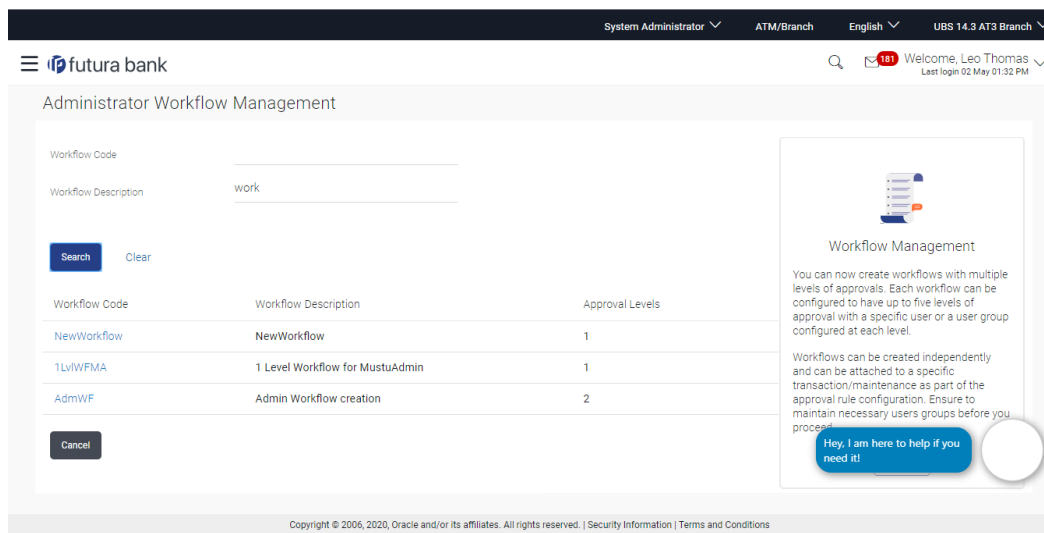

Bank Administrator user can search the workflows maintained for administrator users.

Workflows maintained (if any) for admin users are displayed on the screen after searching with valid input. User can view the details of existing workflow by clicking on the search results or can create new approval workflow using this screen.

To search the approval workflow for admin users:

1. In the **Admin Workflow Management** screen, enter the search parameters and click **Search**. The **Admin Workflow Management** screen with search results appears based on the searched criteria.

Admin Workflow Management – Search

Field Description

Field Name	Description
Workflow Code	The approval workflow code to search the approval workflows.
Workflow Description	The approval workflow description to search the approval workflows.
Search Results	
Workflow Code	Unique code of the already maintained approval workflow.
Workflow Description	Description of the already maintained approval workflow.
Approval Level	Number of approval levels in each workflow.

2. Click the **Work Flow code** link, to view details of the selected Approval Workflow. The **Workflow Management - View** screen appears.
 OR
 Click **Cancel** to cancel the operation and navigate back to 'Dashboard'.
 OR
 Click **Create** to create new Approval Workflow for admin users.

17.1.4 Admin Workflow Management – View

Further drill down is given on the each workflow to view the details of the users/ user groups who are the part of workflow.

Admin Workflow Management – View

The screenshot shows the 'Administrator Workflow Management' page in the Futura Bank system. The workflow code is '111_Admin' and the description is 'Admin Team'. Under 'Approval Details', there are three levels: Level 1 (User: Jack Nikon pmgadmin), Level 2 (User Group: AdmGrp), and Level 3 (User: Administrator User superadmin). A 'Work Management' sidebar on the right explains that workflows can have up to five levels of approval with specific users or user groups at each level. The page includes 'Edit', 'Cancel', and 'Back' buttons at the bottom left.

This screenshot shows the same workflow management page with a 'User Group' modal window open on the right. The modal displays details for the 'AdmGrp' user group, including its name and description. Below this, there is a search bar and a table of users. The table has columns for 'Initials', 'User ID', and 'Full Name'. Two users are listed: Donald Bohr (User ID: 144Admin5) and Maxi Bohr (User ID: 144Admin4). The modal also shows a pagination control for the user list, currently on page 1 of 1.

Field Description

Field Name	Description
View	
Workflow Code	Workflow code is displayed.
Workflow Description	Workflow description is displayed.
Approval Details	
Approval Level	User / user group maintained at each approval level. There can be up to five levels of approval levels.
User Name / User Groups	User or a user group maintained at each level of approval. On Approval -Workflow screen, Admin User can click on the Name of the user group that is part of the workflow to see the list of users which are part of that Group User can search specific user name, by using the search window on Group Details overlay.

- Click **Edit** to edit the workflow. The **Admin Workflow Management - Edit** screen with values in editable form appears.
OR
Click **Cancel** to cancel the operation and navigate back to 'Dashboard'.
OR
Click **Back** to go back to the previous screen.

17.1.5 Admin Workflow Management – Create

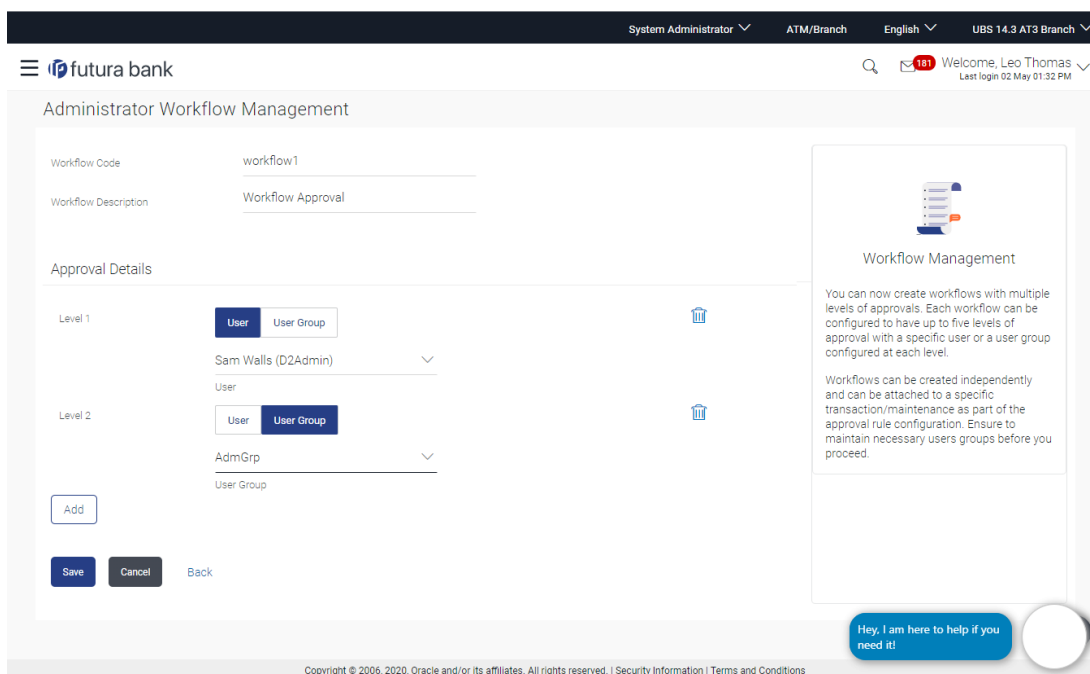

Bank Administrator can create approval workflows for the Admin users. By default, user can specify minimum one and maximum five levels of approvals as a part of workflow.

Administrator can set either an individual user or user group of a corporate as a part of each level of approval. Approval type (sequential/non-sequential/no authorization) is defined at the party preference.

To create an approval workflow:

- In the **Admin Workflow Management** screen, click **Create**. The **Admin Workflow Management - Create** screen appears.

Admin Workflow Management – Create

Field Description

Field Name	Description
Create	
Workflow Code	To specify approval workflow code.
Workflow Description	To specify approval workflow description.
Approval Details	
Approval levels for a user / user group. You can click Add for multi level approval process.	
Approval Level	Approval levels for a user / user group. User can click Add for multi level approval process.
User / User Group	To select specific user or a user group at each level of approval.

2. In the **Workflow Code** field, enter the workflow code.
 3. In the **Workflow Description** field, enter the name of the workflow.
 4. In the **Approval Details** section, from the **Level 1** field, click appropriate user / user group.
 5. From the **User Name / User Groups** list, select the approver user name.
 6. Click **Add** to add the selected user/ user group at specific level of approval.
- OR

7. Click  icon to remove specific approval level.
8. Click **Save** to save Approval Workflow.
OR
Click **Cancel** to cancel the operation and navigate back to 'Dashboard'.
OR
Click **Back** to go back to previous screen.
9. The **Admin Workflow Management - Create - Review** screen appears post necessary validations. Verify the details, and click **Confirm**.
OR
Click **Cancel** to cancel the operation and navigate back to 'Dashboard'.
OR
Click **Back** to go back to previous screen.
10. The success message of saving the created approval workflow appears along with the transaction reference number and status.
Click **OK** to complete the transaction and navigate back to the 'Dashboard'.

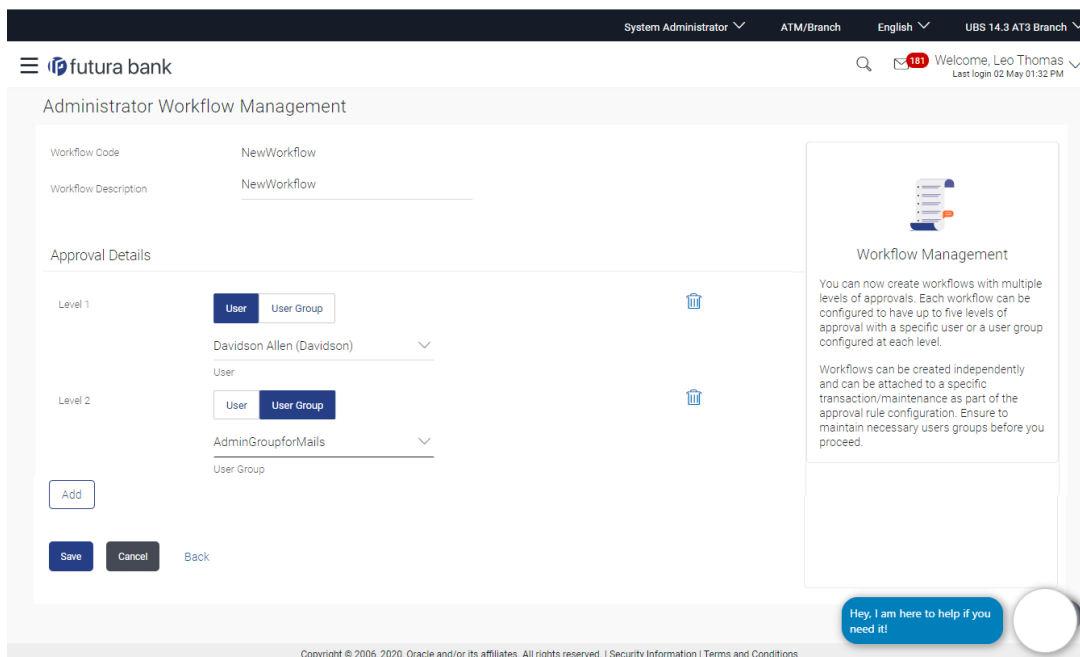

17.1.6 Admin Workflow Management - Edit

This function enables the Bank Administrator to update the description of the workflow and also to remove existing and add the new approval levels. Edited workflows are applicable for new transactions initiated post workflow update, whereas the previously initiated and transactions pending approval follows the old workflow.

To edit an approval workflow:

1. In the **Admin Workflow Management** screen, click the **Work Flow code** link, for which you want to view the details. The **Admin Workflow Management - View** screen appears.
2. Click **Edit**. The **Admin Workflow Management - Edit** screen appears.

Admin Workflow Management - Edit

Field Description

Field Name	Description
Edit	
Workflow Code	Workflow code is displayed.
Workflow Description	Workflow description is displayed in editable form.
Approval Details	
Approval Level	Approval levels for a user / user group. Administrator can remove or add approval levels in a workflow.
User Name / User Groups	User or a user group maintained at each level of approval. Administrator can edit an existing user/user group maintained at each level and can also specify user/user group for additional approval level.

3. Edit the required details.
4. Click **Add** to add the selected user/ user group at specific level of approval.
OR
Click  icon to remove specific approval level.

5. Click **Save** to save Approval Workflow.
OR
Click **Cancel** to cancel the operation and navigate back to 'Dashboard'.
OR
Click **Back** to cancel the operation and to go back to previous screen.
6. The **Admin Workflow Management – Edit - Review** screen appears post necessary validations. Verify the details, and click **Confirm**.
OR
Click **Cancel** to cancel the operation and navigate back to 'Dashboard'.
OR
Click **Back** to cancel the operation and to go back to previous screen.
7. The success message of saving the approval workflow modification appears along with the transaction reference number and status.
Click **OK** to complete the transaction and navigate back to 'Dashboard'.

17.1.7 Approval Workflow - Corporate User - Workflow Management

System displays a screen to enter the party information (party ID or party name) and search party for which the approval workflows are to be maintained/ viewed.

User can enter the party ID (if known) or the party name with a minimum of five characters.

System matches the input provided by the user with the party name records and displays the matching party records.

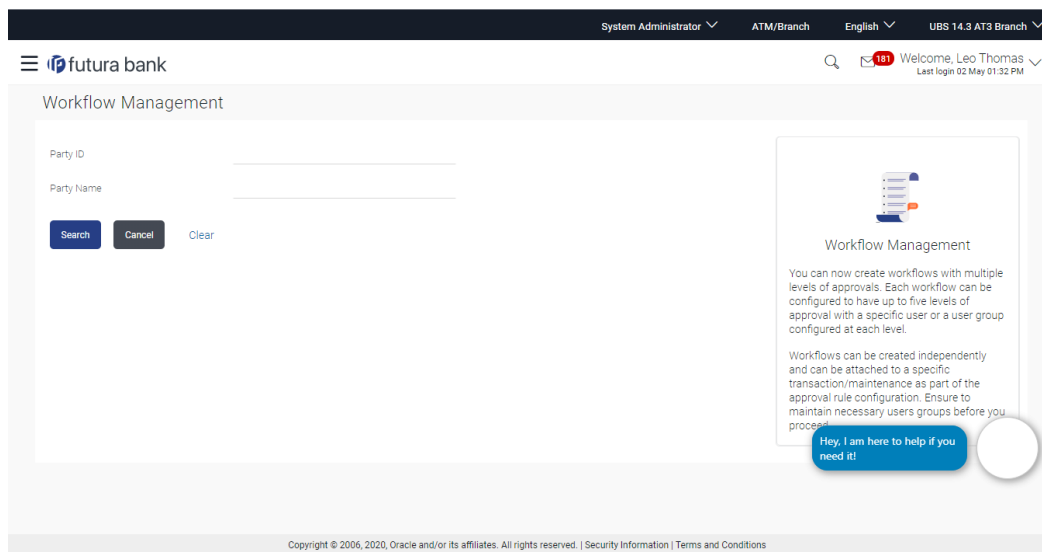

In case of a party search by party ID, it is an exact match and system displays the workflows maintained if any.

In case of a party search by name, system displays the matching party records. The records have parties listed with both Party ID and Party Name information. User can select the record by clicking on the Party ID from the list.

Note:

- 1) Once a transaction is initiated by the Corporate maker, system checks for the account access of all the approver/s (found as part of approval rule/workflow maintained). In case approver/s at one or more level does not have the required account access for the account/s involved in the transaction, system rejects the transaction and an alert will be triggered to initiator notifying the same.
 - 2) Approval Workflow can also be maintained for Non Customer Corporates (for which the party id is not maintained in UBS or in Core banking system). For such cases i.e. non customer corporate (counterparties on boarded by Corporates) the system will look for the party ID in OBSCF/OBCMS.
-

Workflow Management

Field Description

Field Name	Description
Party ID	Party IDs as per search input. Note: For Non Customer Corporates (counterparties on boarded by Corporates) the system will look for the party ID in OBSCF/OBCMS.
Party Name	Party name of the party ID.

Enter the search parameters and click **Search** to search the matching records.
 OR
 Click **Cancel** to cancel the operation and navigate the user back to 'Dashboard'.
 OR
 Click on '**Clear**' to clear the input search parameters.

17.1.8 Workflow Management – Summary

Clicking on Workflow Code Hyperlink, workflows maintained (if any) under a party are displayed on the screen. User can opt to view the details of existing workflows or can create new approval workflow using this screen.

Workflow Management – Summary

The screenshot displays the 'Workflow Management' interface in the Futura Bank system. At the top, the user is logged in as 'McLeodschecker' with the last login time of '18 Apr 05:06 PM'. The main content area shows a table with the following data:

Party ID	Party Name	Workflow Code	Workflow Description	Approval Levels
007327	Ravindra Thapa	007327wf	007327wf	1

Buttons for 'Create', 'Back', and 'Cancel' are visible. A sidebar on the right provides additional context: 'Workflow Management' and 'You can now create workflows with multiple levels of approvals. Each workflow can be configured to have up to five levels of approval with a specific user or a user group configured at each level. Workflows can be created independently and can be attached to a specific transaction/maintenance as part of the approval rule configuration. Ensure to maintain necessary users groups before you proceed.'

Field Description

Field Name	Description
Party ID	Party ID of which workflows to be viewed/ edited.
Party Name	Party name of Party ID of which workflows to be viewed/ edited.
Workflow Code	Code of the already maintained approval workflow. This field will be displayed only if there are existing approval workflows available under a party.
Workflow Description	Description of the already maintained approval workflow. This field will be displayed only if there are existing approval workflows available under a party
Approval Levels	Number of approval levels in each workflow. This field will be displayed only if there are existing approval workflows available under a party.

1. Click the **Workflow Code** link to view details of the selected Approval Workflow. The **Workflow Management - View** screen appears.
OR
Click **Create**. The **Workflow Management - Create** screen appears.
OR
Click **Cancel** to cancel the operation and navigate back to 'Dashboard'.
OR
Click **Back** to go back to previous screen.

17.1.9 Workflow Management – View

Further drill down is provided on the each workflow to view the details of the users/ user groups who are the part of workflow.

To view the approval workflow for corporate users:

1. In the **Workflow Management** screen, enter the search parameters and click **Search**. The **Workflow Management** screen with search results appears based on the searched criteria.
2. Click the **Workflow Code** link to view details of the selected Approval Workflow. The **Workflow Management - View** screen appears.

Workflow Management – View

The screenshot shows the 'Workflow Management - View' interface. At the top, there is a navigation bar with 'System Administrator', 'ATM/Branch', 'English', and 'UBS OBPM 14.4 HEL Branch'. Below this is the 'futura bank' logo and a search bar. The main content area is titled 'Workflow Management' and contains the following details:

- Party ID: 000462
- Party Name: ABZ Solutions
- Workflow Code: 100_PMG
- Workflow Description: Pmg G1

Under 'Approval Details', there are three levels of approval:

- Level 1:** User 'Jane JOe corpchecker1' (ID: JJ)
- Level 2:** User Group '100_pmg' (ID: 1G)
- Level 3:** User 'Kim Martin corpchecker2' (ID: KM)

At the bottom, there are buttons for 'Edit', 'Cancel', and 'Back'. On the right side, there is a 'Workflow Management' informational box with a document icon and text explaining that workflows can be configured with up to five levels of approval and can be attached to specific transactions or maintenance as part of approval rule configuration.

FAQ

1. What is approval management?

Approval Management enables a bank administrator to set up approval conditions for various transactions on channel banking. The approval management allows setting up the maker / checker flow, wherein a transaction is initiated by a maker and the same is authorized by a single / multiple checkers depending on the configuration.

2. What is approval workflow maintenance?

Approval workflows are created to support requirements where multiple levels of approval are required in a specific sequence for a transaction/maintenance. Each workflow can be configured to have up to 5 levels of approval with a specific user or a user group configured at each level.

3. How many approval levels can I set up in the system?

Administrator can set up minimum one and maximum five levels of approvals as a part of approval workflow.

4. Can I get the list of users associated with a group from workflow management screen?

No, list of the users associated with a group cannot be viewed using workflow management screen. However you can view the same from User Group Management screen.

[Home](#)

17.2 Approval Rules

This function enables the Bank Administrator to set up conditions for approval as per the bank/corporate requirements. Rule can be set up for financial transactions, non-financial, non account financial transactions, and for maintenances. Flexibility exists to define approval rules with conditions stating that 'specific transaction' if initiated by a 'specific user/ user group' has to be approved by a 'specific approver/approver group' along with other attributes like amount range etc.

Prerequisites:

- Transaction access is provided to Bank Administrator
- Party preference is maintained for setting up rules for corporates
- Corporate and Administrator users are maintained
- Workflow configuration is maintained if approval required is to be set as 'Yes'
- Approval rule set up for Bank Administrator to perform the actions
- Necessary user groups and approval workflows are maintained

Features supported in application

The Approval Rule maintenances allow the bank administrator to:

- Create Approval Rules
- View Approval Rules
- Edit Approval Rules
- Delete Approval Rules

Workflow

How to reach here:

System/ Bank Administrator Dashboard > Toggle Menu > Approvals > Rule Management > Approval Rules

OR

Bank Administrator Dashboard > Approvals > Rule Management

17.3 Approval Rules – Select User Type

Bank Administrator logs into the system and navigates to the Rule Management screen. On accessing the 'Approval Rules Management' menu, Bank Administrator has to select the user type for which the rules are to be maintained.

Approval Rules – Select User Type

1. Click **Admin User** to access the Approval Rules of Bank Administrator users. The **Admin Approval Rules** screen appears.
2. Click **Corporate User** to access the Approval Rules of Corporate users. The **Approval Rules** screen appears.

17.4 Approval Rules - Admin User - Admin Approval Rules

Admin Approval Rules

Field Description

Field Name	Description
Rule Code	Search rules with a rules code of the already maintained approval rule.
Rule Description	Search rules with a rule description of the already maintained approval rule.

3. Click **Create** to create new admin workflow. The **Admin Approval Rules – Create** screen appears.
 OR
 Enter the search parameters and click **Search** to search the matching records.
 OR
 Click **Cancel** to cancel the operation and navigate the user back to 'Dashboard'.
 OR
 Click on '**Clear**' to clear the input search parameters.

17.4.1 Admin Approval Rules – Search

Approval rules maintained (if any) for administrator users are displayed on the screen after searching with valid input. User can to view the details of existing rule or can create new approval rule using this screen.

To search the approval rules for admin users:

1. In the **Admin Approval Rules** screen, enter the search parameters and click **Search**. The **Admin Approval Rules** screen with search results appears based on the searched criteria.

Admin Approval Rules – Search

Field Description

Click **Back** to go back to previous screen.

17.4.2 Admin Approval Rules – View

Further drill down is given on the each workflow to view the details of the users/ user groups who are the part of workflow.

To view the admin approval rules:

1. In the **Admin Approval Rules** screen, click the **Rule Code** link, for which user wants to view the details. The **Admin Approval Rules - View** screen appears.

Admin Approval Rules - View

The screenshot displays the 'Admin Approval Rules - View' interface. At the top, there's a navigation bar with 'System Administrator', 'ATM/Branch', 'English', and 'UBS 14.3 AT3 Branch'. Below this is the 'futura bank' logo and a search bar. The main content area is titled 'Administrator Approval Rules' and shows the following details:

- Rule Code:** WayneR
- Rule Description:** approval rule for WayneR admin
- Initiator:**
 - Initiator Type:** User (selected), User Group
 - User Name / User Groups:** Wayne Rooney (WayneR)
- Transactions:** All Admin Maintenances
- Workflow Details:**
 - Approval Required:** Yes (selected), No

At the bottom of the main content area, there are buttons for 'Edit', 'Delete', 'Cancel', and 'Back'. On the right side, there is a 'Rules Management' sidebar with a list icon and text: 'Here you can view the details of an existing rule. Click on Edit button to update the existing rules. Please note that the Rule code is not editable. In case you want to delete the rule, click on Delete button.'

Field Description

Field Name	Description
View	
Rule Code	Approval rule code.
Rule Description	Approval rule description.
Initiator	
Initiator Type	Initiator type specified while creating a rule.
User Name / User Groups	Name of the user or user group defined as initiator for the rule condition.
Transactions	Transaction for which the rule is set up.
Workflow Details	

Field Name	Description
Approval Required	Field displays whether approval is required or not for the set condition.
Workflow Details	Field displays the approval workflow details along with the defined approval levels. This field appears if you select Yes in the Approval Required field.

- Click **Edit** to edit the approval rule. The **Admin Approval Rule - Edit** screen with values in editable form appears.
OR
Click **Delete** to delete the approval rule.
OR
Click **Cancel** to cancel the operation and navigate back to 'Dashboard'.
OR
Click **Back** to go back to previous screen.
The application will prompt the administrator with a deletion message, Click **Yes** to confirm.
User is directed to **Admin Approval Rule – Delete** confirmation page.

17.4.3 Admin Approval Rules – Create

Approval rules can be setup based on the following parameters.

- Transactions
- Initiator
- Specific User
- User Group

Bank Administrator can create multiple approval rules for Administrator users. In a scenario when a transaction is initiated and multiple rules are applicable as per set conditions, then the complex rule amongst all the applicable rules is applied for approval.

User can further define if for a condition, the transaction should be auto approved (which means there is no approval workflow and the transaction gets approved as soon as initiator submits the transaction) or should follow a set approval workflow and should get approved by the defined set of approvers. The same is achieved by attaching a workflow maintained for the administrator users.

To create an approval rule:

- In the **Admin Approval Rules** screen, click **Create**. The **Admin Approval Rules - Create** screen appears.

Admin Approval Rules - Create

The screenshot shows the 'Admin Approval Rules - Create' form. The form fields are as follows:

- Rule Code:** WayneR
- Rule Description:** approval rule for WayneR admin
- Initiator:** Wayne Rooney (WayneR)
- Initiator Type:** User (selected from 'User' and 'User Group' options)
- Transactions:** All Admin Maintenances
- Workflow Details:** Approval Required: Yes (selected from 'Yes' and 'No' options)

At the bottom of the form are buttons for 'Save', 'Cancel', and 'Back'. A sidebar on the right titled 'Rules Management' contains a diagram and text explaining the functionality: 'In Rules Management functionality you can assign approval rules for transactions initiated by a specific user or user groups. Once in the Create screen you can define the details of the rule like - rule description, user/user groups to whom the rules apply as initiators, transactions that need approval, whether approval is needed and if yes, the workflow that the approval has to go through.'

Field Description

Field Name	Description
Rule Code	To specify approval rule code.
Rule Description	To specify approval rule description.
Initiator	
Initiator Type	Initiator type who initiates the transaction. This has options as 'User' and 'User Group'.
User Name / User Groups	Name of the user or user group as initiator. If initiator is selected as User, then all the users belongs to administrator user segment will be listed for selection. If initiator is selected as User Group, then all the user groups belongs to the administrator user segment will be listed for selection.

Field Name	Description
Transactions	All transactions to set the approval rules are listed. User can select specific transaction or all admin transactions.
Workflow Details	
Approval Required	Option to decide whether approval is required or not for the set condition.
Workflow	Field has description of the approval workflow. All workflows maintained for the administrator type of user segment are listed here along with the defined approval level for each of them. This field appears if you select Yes in the Approval Required field.

2. In the **Rule Code** field, enter the code.
3. In the **Rule Description** field, enter the rule name.
4. From the **Initiator Type** field, click appropriate user / user group and select the user/ user group.
5. From the **Transaction** list, select the transactions to be mapped to the rule.
6. In the **Workflow Details** section, select whether approval is required for the mapped transactions.
 - a. If you select **Yes** option, select the appropriate **Workflow**.
7. Click **Save** to save the approval rule.
OR
Click **Cancel** to cancel the operation and navigate back to 'Dashboard'.
OR
Click **Back** to go back to previous screen.
8. The **Approval Rule - Create Review** screen appears. Verify the details, and click **Confirm**.
OR
Click **Cancel** to cancel the operation and navigate back to the 'Dashboard'.
OR
Click **Back** to go back to previous screen.
9. The success message of saving the created approval rule appears along with the transaction reference number and status.
Click **OK** to complete the transaction and navigate back to 'Dashboard'.

17.4.4 Admin Approval Rules - Edit

Bank Administrator can edit the approval rules. An Administrator is allowed to change the description of the rule and is also allowed to change the parameters associated with the specific approval rule.

Edited rules are applicable for new transactions initiated post rule update. Previously initiated transactions which are pending approval will follow a rule which was applied at the time of transaction initiation.

To edit an approval workflow:

1. In the **Admin Approval Rules** screen, click the **Rule Code** link, for which you want to view the details. The **Admin Approval Rules - View** screen appears.
2. Click **Edit**. The **Admin Approval Rules - Edit** screen appears.

Admin Approval Rules - Edit

Field Description

Field Name	Description
Edit

Initiator	

Field Name	Description
Initiator Type	Initiator type who initiates the transaction will be displayed in editable form.
User Name / User Groups	Name of the user or user group as initiator will be displayed in editable form. If initiator is selected as User, then all the users belonging to the administrator type of user segment will be listed for selection. If initiator is selected as User Group, then all the user groups belonging to the administrator type of user segment will be listed for selection.
Workflow Details	
Approval Required	Whether approval is required will be displayed in editable form.
Workflow Details	Details of the approval workflow along with the defined approval levels for a condition will be displayed in editable form. This field appears if you select Yes in the Approval Required field.

3. Edit the required details.
4. Click **Save** to save the approval rule.
OR
Click **Cancel** to cancel the operation and navigate back to 'Dashboard'.
OR
Click **Back** to cancel the operation and to go back to previous screen.
5. The **Admin Approval Rule - Edit Review** screen appears post necessary validations. Verify the details, and click **Confirm**.
OR
Click **Cancel** to cancel the operation and navigate back to 'Dashboard'.
OR
Click **Back** to cancel the operation and to go back to previous screen.
6. The success message of saving the approval rule modification appears along with the transaction reference number and status.
Click **OK** to complete the transaction and navigate back to 'Dashboard'.

17.5 Approval Rules - Corporate User - Approval Rule

17.5.1 Approval Rules - Corporate User - Search

System displays a screen to enter the party ID or party name to search the approval rules that are maintained. User can enter the party ID (if known) or the party name with a minimum of 5 characters. System matches the input provided by the user with the party name records and displays the matching party records.

In case of a party search by party ID, it is an exact match and system displays the rules maintained if any.

In case of a party search by name, system displays the matching party records. The records have parties listed with both Party ID and Party Name information. User can select the record by clicking on the Party ID from the list.

Note:

- 1) Once a transaction is initiated by the Corporate maker, system checks for the account access of all the approver/s (found as part of approval rule/workflow maintained). In case approver/s at one or more level does not have the required account access for the account/s involved in the transaction, system rejects the transaction and an alert will be triggered to initiator notifying the same.
 - 2) Approval rules can also be maintained for Non Customer Corporates (for which the party id is not maintained in UBS or in Core banking system). For such cases i.e. non customer corporate (counterparties on boarded by Corporates) the system will look for the party ID in OBSCF/OBCMS.
-

Approval Rules - Corporate User

The screenshot displays the 'Rules Management' page within the Futura Bank system. At the top, there is a navigation bar with 'System Administrator', 'ATM/Branch', 'English', and 'UBS 14.3 AT3 Branch'. Below this, the 'futura bank' logo is visible on the left, and a search icon, a user profile icon for 'Leo Thomas', and the text 'Welcome, Leo Thomas' and 'Last login 02 May 01:32 PM' are on the right. The main content area is titled 'Rules Management' and contains two input fields: 'Party ID' and 'Party Name'. Below these fields are three buttons: 'Search' (blue), 'Cancel' (grey), and 'Clear' (light blue). To the right of the input fields is a 'Rules Management' information box with a document icon and text explaining that it refers to parameters for approvals. At the bottom right, there is a blue button that says 'Hey, I am here to help if you need it!' next to a white circular icon. The footer contains copyright information: 'Copyright © 2006, 2020, Oracle and/or its affiliates. All rights reserved. | Security Information | Terms and Conditions'.

Field Description

Field Name	Description
Party ID	Party ID as per search input. Note: For Non Customer Corporate (counterparties on boarded by Corporates) the system will look for the party ID in OBSCF/OBCMS.
Party Name	Party name of the party ID.

To search the approval rules for corporate users:

1. In the **Approval Rules** screen, enter the party ID in the **Party ID** field.
OR
In the **Party Name** field, enter the party name.
2. Click **Search** to search the matching records. The **Approval Rules** screen with search results appears based on the searched criteria.
OR
Click **Cancel** to cancel the operation and navigate the user back to 'Dashboard'.
OR
Click **Clear** to clear the input search parameters.

Note: The Approval rule - Corporate User - Party Search Results screen appears only if no approval rule is created, else the search results displays the approval rules already created by the party.

Approval Rule – Summary

The screenshot displays the 'Rules Management' interface for Party ID 004308 (Sunrise Coffee). It includes a table of rules and a sidebar with a 'Rules Management' section.

Rule Code	Maker	Approval Required
1001_Fin_Pmg	pmgmaker	Yes
1003_Maint_pmg	pmgmaker	Yes
1004_Non_Acc_Fin_PMG	pmgmaker	Yes
1005_Admin_PMG	pmgmaker	Yes

Rules Management
Rules Management refers to parameters that drive the enterprise the approvals for financial, non-financial, maintenance and administrative transactions. You can search and view all the approval rules maintained for a party. You can edit the rules and update them.

- Click the **Rule code** link, to view details of the selected Approval Rule. The **Approval Rules - View** screen appears.
OR
Click **Create** to create new Approval Rule for corporate users.
OR
Click **Cancel** to cancel the operation and navigate back to 'Dashboard'.
OR
Click **Back** to go back to previous screen.

17.5.2 Approval Rule – Corporate User - Create

Bank Administrator can create approval rules for the corporate users. Administrator is allowed to create an approval rule only if the party preference is maintained and party is in active status.

Approval rules can be setup based on the following parameters.

- Type of Transaction
 - Financial Transactions
 - This option is used to setup approval rules for the transactions, this involves exchange of money.
 - E.g. Money Transfer, Draft Issuance, Redeem Term Deposit etc.
 - Non Financial Transactions
 - This option is used to setup approval rules for the transaction which are for an account, but does not involve exchange of money.
 - E.g. Cheque Book Request, Statement Request, Stop Cheque etc.
 - Maintenance
 - This option is used to setup approval rules for the transaction which are at the party level and not for a specific account
 - E.g. Payee Maintenance, Biller Maintenance etc.
 - Administration
 - Option is used to setup approval rules for the maintenances which corporate administrator can initiate. These are mainly configurations related transactions for that corporate
 - E.g. Account-Transaction mapping, Approval related maintenances etc.
 - Non Account Financial Transactions:
 - This option is used to setup approval rules for the transaction with amount range and no debit account
 - E.g. Initiate LC, Supply Chain Finance related transactions like create Invoice.
 - Initiator
 - Specific User
 - User Group
 - All Users
 - Accounts
 - Transactions
 - Currency
 - Amount Range

Administrator can create multiple approval rules for party users. In a scenario when a transaction is initiated and multiple rules are applicable as per set conditions, then the complex rule amongst all the applicable rules is applied for approval.

User can further define if for a condition, the transaction should be auto approved (which means there is no approval workflow and the transaction gets approved as soon as initiator submits the transaction) or should follow a set approval workflow and should get approved by the defined set of approvers. The same is achieved by attaching a workflow maintained for the corporate party.

To create an approval rule for corporate user:

1. In the **Approval Rules** screen, enter the search parameters and click **Search**. The **Approval Rules** screen with both Party ID and Party Name appears.
2. Click the **Party ID** link, to view details. The **Approval Rule - Summary** screen appears.
3. Click **Create**. The **Approval Rules - Create** screen appears.

Approval Rules – Corporate User - Create

The screenshot displays the 'Approval Rules - Create' interface. At the top, there is a navigation bar with 'System Administrator', 'ATM/Branch', 'English', and 'UBS OBPM 14.4 HEL Branch'. Below this is the 'futura bank' logo and a search bar. The main content area is titled 'Rules Management' and contains the following fields:

- Party ID:** 000462
- Party Name:** ABZ Solutions
- Rule Type:** Financial (selected), Non Financial, Maintenance, Non Account Financial, Administration
- Rule Code:** 110_Financial
- Rule Description:** CorpUser1 Financial
- Initiator:** User, User Group, All Users (selected)
- Transactions:** All Financial Transactions
- Accounts:** All
- Currency:** EUR
- Amount Range:** From Amount: EUR1.00, To Amount: EUR1,000,000.00
- Workflow Details:** Approval Required: Yes (selected), No; Workflow: nutMaker462

Below the workflow details, there is a list of users: Level 1, nutChecker, nutChecker, nutChecker. At the bottom left, there are 'Save', 'Cancel', and 'Back' buttons. On the right side, there is a 'Rules Management' sidebar with a description: 'Rules Management refers to parameters that drive the enterprise the approvals for financial, non-financial, maintenance and administrative transactions. You can search and view all the approval rules maintained for a party. You can edit the rules and update them.'

8. The success message of saving the approval rule modification appears along with the transaction reference number and status.
Click **OK** to complete the transaction and navigate back to 'Dashboard'.

FAQ

1. How many approval levels can I set up in the system?

Administrator can set up minimum one and maximum five levels of approvals as a part of approval workflow. Whereas, maximum levels of approvals that the user can set is configurable as Day0.

2. Which approval rule will get applied when multiple applicable approval rules are found for specific transaction?

In a scenario when a transaction is initiated and multiple rules are applicable as per set conditions, then the complex rule amongst all the applicable rules is applied for approval.

3. What happens to the approval process when approval rule gets edited and a transaction is pending with one of the approver for approval?

Edited rules are applicable for new transactions initiated post rule update. Previously initiated transactions which are pending for approval will follow a rule which was applied at the time of transaction initiation.

4. What happens if the transaction is initiated in the currency in which approval rule is not maintained?

If the rule is not maintained in specific currency, then the approval rule set in the local currency for the transaction and amount combination will be applied.

5. What happens if the approval rule in local currency is not maintained in above scenario?

If the approval rule is not set for both transaction currency and local currency, then transaction cannot be initiated.

18. Origination Workflow Configuration

Banks across different geographies can have varied requirements with regards to sequence of steps in originations for different products.

Workflow configuration is an administrative maintenance using which the bank administrator can define the sequence of the sections in application form for each of the products as well as for the bundle application.

There will be a default workflow defined in the system as part of Day0 definition for each of the product along with identified set of steps.

You can create and maintain the priority to be assigned to each product category that can be part of a bundled application. This will dictate the sequence of steps within the bundled application form.

Bank administrator will have an option to view the default workflow for each of the products. If the sequence defined for a product does not suit the bank requirements, the administrator can opt to create a custom workflow by re-arranging the steps.

Bank administrator also will have a choice to decide on the workflow to be applied for products i.e. default / custom.

Prerequisites

- Transaction access is provided to Bank Administrator
- Default Workflow with set of steps applicable for each product category is defined in the system

Features supported in application

Workflow configuration allows Bank Administrator to:

- **Single Product Application**
 - View Default Workflow
 - View Custom Workflow
 - Create Custom Workflow
 - Edit Custom Workflow
- **Bundle Application**
 - View Default Workflow
 - View Custom Workflow
 - Create Custom Workflow
 - Edit Custom Workflow

How to reach here:

System/ Bank Administrator Dashboard > Toggle Menu > Others > Origination Workflow Configuration

18.1 Search Workflow

Using this option Bank Administrator can view the workflow defined for the single as well as for bundle application

To search the origination workflow:

1. In the **Configure workflow for** field, click the desired product application tab. The **Flow Type, Status** and **Actions** column appears for the selected product application.

Origination Workflow Configuration

Field Description

Field Name	Description
Configure workflow for	<p>Select the desired product application for which the workflow needs to be viewed or custom workflow is to be defined.</p> <p>The options are:</p> <ul style="list-style-type: none"> • Single Product Application • Bundle Application
Select Product Category	<p>Select the product category name for which the workflow needs to be viewed or configured. The list will be populated based on the Day 0 configurations done in the application.</p> <p>The options are:</p> <ul style="list-style-type: none"> • Savings Account • Checking Account • Term Deposits • Credit Card • Auto Loan • Personal Loan • Home Loan • Education Loan <p>This field is appears only if the Single Product Application tab is selected in the Configure workflow for field.</p>
Flow Type	<p>Displays the available flow types for the product are displayed.</p> <p>The options are:</p> <ul style="list-style-type: none"> • Default • Custom
Status	<p>Indicates the status against the flow type i.e. whether the default or the custom flow is active / inactive. At any point in time, either the default or the custom flow type for a product can remain in active state.</p>

Field Name	Description
Actions	<p>Displays the available action buttons against each of the Flow Type.</p> <p>The action button can be:</p> <ul style="list-style-type: none"> • View: Click to view the workflow details and activate it for the selected product. • Create: Click to define new custom workflow for the selected product. <p>This option will be available only if there is no custom workflow defined for the selected product. Once the custom workflow is created, administrator can view or edit the custom workflow.</p>

2. In the **Actions** column, click **View** to view the default/ custom workflow details and activate it for selected product.
OR
Click **Create** to create a new custom workflow (Link is enabled only if no workflow is created for selected product).
OR
Click **Back** to navigate to the previous screen.

18.2 Single Product Application

Using this option, Bank administrator can view the sequence in which the origination steps will be presented as a part of the default workflow to the end customer when an application is initiated for the product available under the selected product category.

Administrator can further define the custom workflow for each product category if required.

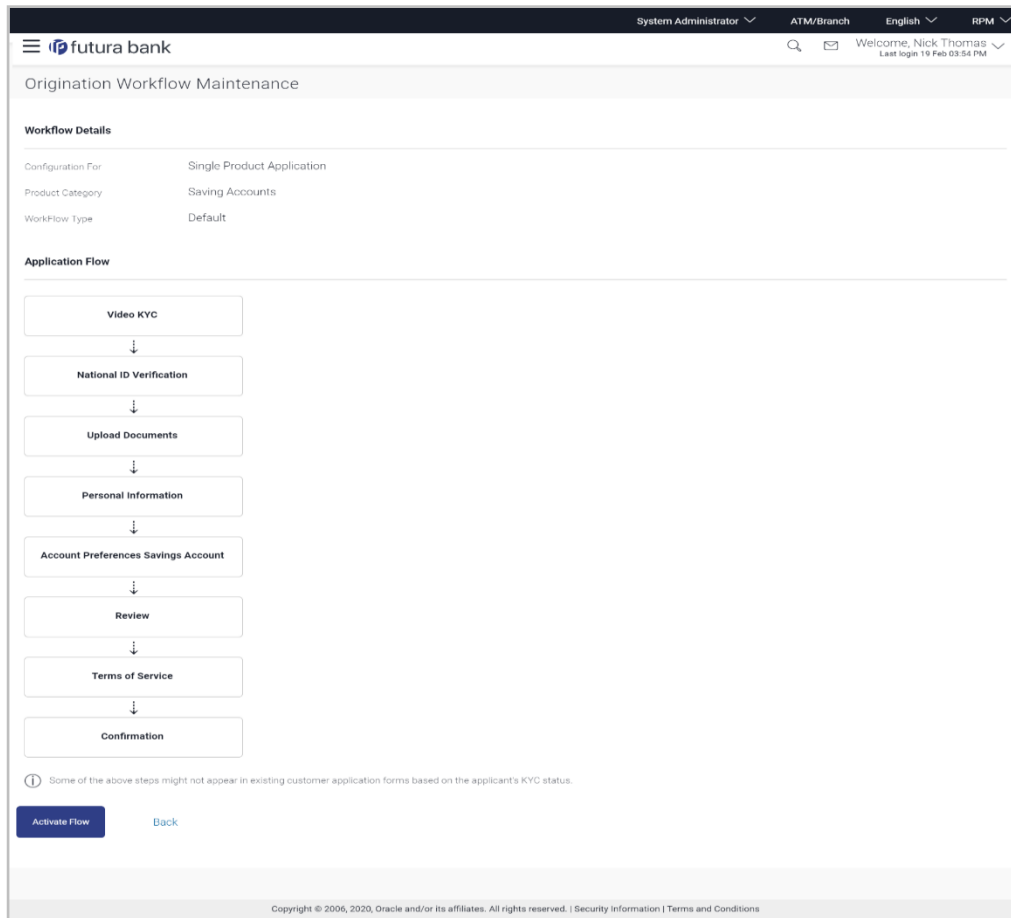

18.2.1 View Default Workflow

Using this option Bank Administrator can view the default workflow for the selected product.

To view the product application workflow:

1. In the **Configure workflow for** field, click the **Single Product Application** tab. The **Flow Type, Status** and **Actions** column appears for the selected product application.
 - b. From the **Select Product Category** list, select the desired product category. The **Flow Type, Status** and **Actions** column appears for selected product category.
 - c. In the **Action** column against the default workflow, click **View**. The **Origination Workflow Configuration - View** screen appears.

Origination Workflow Configuration - View

Field Description

Field Name	Description
Workflow Details	
Configuration for	Displays the type of application for which the workflow is configured.
Product Category	Displays the product name as selected in the previous screen.
Flow Type	<p>The flow type for the product against which the action of view is selected is displayed.</p> <p>The options are:</p> <ul style="list-style-type: none"> • Default
Application Flow	

Field Name	Description
Application Flow	Default application workflow steps defined for the selected product category is shown on the screen. It shows the sequence in which the information will be asked to the end user as a part of product application.

2. Click **Activate Flow** to make workflow active. The **Activate Flow** popup window appears.
 - d. Click **Yes** to activate the flow. The success message of workflow activation appears.
OR
Click **No** to cancel the transaction.

OR

Click **Back** to navigate to the previous screen.

18.2.2 Create Custom Workflow

Using this option, bank administrator can choose to create the new application workflow if required for specific product category. User can simply drag and drop the steps to change the sequence.

Administrator can even see and compare the custom workflow with the default workflow set for the selected product category and make the changes accordingly. Further user can choose to delete the specific step if required which is configured as an 'optional' step. The custom workflow is automatically activated upon creation.

However, all the steps configured as a product origination workflow will be shown to the end user based on the type of the customer who is initiating an application. E.g. for Guest user, the sequence of the steps defined in workflow will remain same, but for an existing customer having valid KYC in place will not be asked for furnishing the personal, employment information and even for providing the documents again if already present in bank's records.

Sequence configured as a part of custom workflow will have an impact on flows defined for bundled application.

To create the product application workflow:

3. In the **Configure workflow for** field, click the **Single Product Application** tab. The Flow Type, Status and Actions column appears for the selected product application.
4. In the **Actions** column, click **Create** to create a new workflow (Link is enabled only if no workflow is created for selected product). The **Origination Workflow Configuration - Create** screen appears.
The steps as defined in the default workflow will be displayed with an option to rearrange the steps in the order as required. At any point in time, the user will have an option to view the default workflow.

- The success message of workflow creation appears along with the transaction reference number and status of transaction. The workflow is automatically activated upon creation. Click **OK** to complete the transaction.

18.2.3 View Custom Workflow

Using this option Bank Administrator can view the custom application workflow created for the selected product category.

To view the product application workflow:

9. In the **Configure workflow for** field, click the **Single Product Application** tab. The Flow Type, Status and Actions column appears for the selected product application.
 - a. From the **Select Product Category** list, select the desired product category. The Flow Type, Status and Actions column appears for selected product category.
 - b. In the **Action** column against the **Custom** workflow, click **View**. The **Origination Workflow Configuration - View** screen appears.

Origination Workflow Configuration - View

The screenshot displays the 'Origination Workflow Maintenance' page for Futura Bank. At the top, there is a navigation bar with 'System Administrator', 'ATM/Branch', 'English', and 'RPM'. The user is identified as 'Welcome, Nick Thomas' with a last login of '19 Feb 03:54 PM'. The main content area is titled 'Origination Workflow Maintenance' and is divided into two sections: 'Workflow Details' and 'Application Flow'.
Workflow Details:
 - Configuration For: Single Product Application
 - Product Category: Term Deposits
 - WorkFlow Type: Custom
Application Flow:
 A vertical flowchart showing the following steps: Video KYC, National ID Verification, Term Deposit Details, Upload Documents, Personal Information, Review, Terms of Service, and Confirmation. Each step is connected to the next by a downward-pointing arrow.
 Below the flowchart, a note states: 'Some of the above steps might not appear in existing customer application forms based on the applicant's KYC status.'
 At the bottom of the configuration area, there are three buttons: 'Activate Flow' (blue), 'Edit' (dark grey), and 'Back' (light grey).
 The footer contains the copyright notice: 'Copyright © 2006, 2020, Oracle and/or its affiliates. All rights reserved. | Security Information | Terms and Conditions'.

Field Description

Workflow Details	
Configuration for	Displays the type of application for which the workflow is configured.
Product Category	Displays the product name as selected in the previous screen.

Field Name	Description
Flow Type	The flow type for the product against which the action of view is selected is displayed. The options are: <ul style="list-style-type: none"> • Custom
Application Flow (Custom)	
Application Flow	Custom application workflow configured by the bank administrator for the selected product category is displayed on the screen. It shows the sequence in which the information will be asked to the end user as a part of product application.

10. Click **Activate Flow** to make workflow active. The **Activate Flow** popup window appears.
 - e. Click **Yes** to activate the flow. The success message of workflow activation appears.
OR
Click **No** to cancel the transaction.

OR

- Click **Edit** to edit the workflow configuration. The **Origination Workflow Configuration - Edit** screen appears.
OR
Click **Back** to navigate to the previous screen.

18.2.4 Edit Custom Workflow

If the custom workflow defined for a product category does not suit the business needs, then bank administrator can edit the defined custom workflow by re-configuring the sequence of the steps in workflow. To edit custom workflow, bank administrator will need to follow the steps mentioned below.

As a part of editing a workflow, administrator can even see and compare the custom workflow with the default workflow set for the selected product category and make the changes accordingly. Administrator can further choose to delete the specific step if required which is configured as an 'optional' step.

To edit the product application workflow:

11. In the **Configure workflow for** field, click the **Single Product Application** tab. The Flow Type, Status and Actions column appears for the selected product application.
 - a. From the **Select Product Category** list, select the desired product category. The Flow Type, Status and Actions column appears for selected product category.
 - b. In the **Action** column against the **Custom** workflow, click **View**. The **Origination Workflow Configuration - View** screen appears.
12. Click **Edit** to edit the workflow configuration. The **Origination Workflow Configuration - Edit** screen appears.

Origination Workflow Configuration - Edit

The screenshot displays the 'Origination Workflow Configuration - Edit' interface. At the top, the user is logged in as 'System Administrator' with a search icon and a welcome message for 'Nick Thomas'. The main heading is 'Origination Workflow Maintenance'. Below this, the 'Workflow Details' section shows the configuration for 'Single Product Application' (Term Deposits, Custom Workflow Type). The 'Application Flow' section is divided into 'Default Flow' and 'Custom Flow'. The 'Default Flow' is a vertical sequence of steps: Video KYC, National ID Verification, Upload Documents, Personal Information, Term Deposit Details, Review, Terms of Service, and Confirmation. The 'Custom Flow' is a similar sequence, but the first three steps (Video KYC, National ID Verification, and Upload Documents) are marked as 'Optional Step' and include a trash icon for removal. Below the flows, there are three informational notes: 1) Changes to this application flow will have a resulting impact on bundled application flows. 2) Some of the above steps might not appear in existing customer application forms based on the applicant's KYC status. 3) This workflow will be automatically activated upon creation. At the bottom, there are 'Submit', 'Cancel', and 'Back' buttons, and a footer with copyright information: 'Copyright © 2006, 2020, Oracle and/or its affiliates. All rights reserved. | Security Information | Terms and Conditions'.

Field Description

Field Name	Description
Workflow Details	
Configuration for	Displays the type of application for which the workflow is configured.
Product Category	Displays the product name as selected in the previous screen.
Flow Type	<p>The flow type for the product against which the action of view is selected is displayed.</p> <p>The options are:</p> <ul style="list-style-type: none"> • Custom
Application Flow	
Default Flow	Default application workflow defined for the selected product category is displayed on the screen. It shows the sequence in which the information will be asked to the end user as a part of product application.
Custom Flow	Customized application workflow for the selected product. Drag and drop blocks to customize application workflow. User is allowed only to change the sequence of the steps or to delete the optional steps. However, user will not be allowed to change the sequence of few steps which are placed logically e.g. Review, Confirmation etc.

13. Click the cards marked with  icon and drop to the area where it needs to be placed in workflow.

Note: You can  icon to remove the step from the application flow if not required. This icon will be shown only besides the steps configured as an optional step.

14. Click **Submit** to save the transaction.
 OR
 Click **Cancel** to cancel the transaction.
 OR
 Click **Back** to navigate to the previous screen.
15. The **Review** screen appears. Verify the details, and click **Confirm**.
 OR
 Click **Cancel** to cancel the transaction.
 OR
 Click **Back** to navigate to the previous screen.
16. The success message of workflow updation appears along with the transaction reference number and status of transaction.
 Click **OK** to complete the transaction.

18.3 Bundle Application

Using this option Bank Administrator can create and maintain the priority to be assigned to each product category that can be part of a bundled application. This will dictate the sequence of steps within the bundled application form.

Based on the product category sequence, the workflows defined at the 'Single product application' are considered for auto-generating the workflow for a bundled application. When the bundled application is initiated by the end-user, common steps across the different products, will be asked only once to the end-user. However, uncommon steps will be sequenced based on the priority set as a part of bundled application only for the products selected by the customer in the bundle. Example:

Assume, the following is the workflow defined at each product category (defined using Single Product Application – custom flow) and the priority set against each product category (Defined using Bundled application – custom flow)

Checking Account (Priority set in bundled application workflow - 1)	Personal Loan (Priority set in bundled application workflow - 2)	Auto Loan (Priority set in bundled application workflow - 3)
Upload Documents	Upload Documents	Upload Documents
Personal Information	Financial Profile	Home Loan Requirements
Account Preferences	Personal Loan Requirements	Personal Information
Review	Personal Information	Financial Profile
Terms of Service	Employment Information	Employment Information
Confirmation	Review	Review
	Terms of Service	Terms of Service
	Confirmation	Confirmation

Now assume that the guest user is applying for a bundled application consisting of one product from all the above three product categories from the digital platform. In this scenario, the sequence in which the information asked as a part of the application will be as follows:

17. Upload Documents
18. Personal Information
19. Account Preferences
20. Financial Profile
21. Personal Loan Requirements
22. Employment Information
23. Home Loan Requirements

24. Review
25. Terms of Service
26. Confirmation

18.3.1 View Default Workflow

Using this option Bank Administrator can view the default workflow for the bundle application product. Bank Administrator can view the priority assigned to each product category that can be part of a bundled application. Apart from this, an option is provided to see the sequence of steps in which the information will be asked to the end customer in case of bundled application.

To view the bundle application workflow:

27. In the **Configure workflow for** field, click the **Bundle Application** tab. The Flow Type, Status and Actions column appears for the selected bundle product application.
 - a. In the **Action** column against the default workflow, click **View**. The **Origination Workflow Configuration - View** screen appears.

- m. Click **OK** to add the product categories to bundle application.

Note: You can add maximum of three Product Categories to view the resulting Application Flow.

39. Click **Activate Flow** to make workflow active. The **Activate Flow** popup window appears.

- n. Click **Yes** to activate the flow. The success message of workflow activation appears.
OR
Click **No** to cancel the transaction.
OR

Click **Edit** to edit the workflow configuration. The **Origination Workflow Configuration - Edit** screen appears.

OR

Click **Back** to navigate to the previous screen.

18.3.4 Edit Custom Workflow

If the custom workflow defined for a product does not suit the business needs, then bank administrator can edit the defined custom workflow To edit custom workflow, bank administrator will need to follow the steps mentioned below.

To edit the bundle application workflow:

40. In the **Configure workflow for** field, click the **Bundle Application** tab. The Flow Type, Status and Actions column appears for the selected bundle product application.
 - o. In the **Action** column against the **Custom** workflow, click **View**. The **Origination Workflow Configuration - View** screen appears.
41. Click **Edit** to edit the workflow configuration. The **Origination Workflow Configuration - Edit** screen appears.

Origination Workflow Configuration - Edit

The screenshot shows the 'Origination Workflow Configuration - Edit' screen. At the top, there's a navigation bar with 'System Administrator', 'ATM/Branch', 'English', and 'RPM'. Below that is the 'futura bank' logo and a user profile for 'Welcome, Nick Thomas'. The main heading is 'Origination Workflow Maintenance'. Under 'Workflow Details', it shows 'Configuration For: Bundled Application' and 'WorkFlow Type: Custom'. A section titled 'Product Priority for Bundled Application' contains two flow diagrams. The 'Default Flow' is a vertical stack of grey boxes: Auto Loans, Personal Loans, Saving Accounts, Checking Accounts, Credit Cards, Home Loans, and Term Deposits. The 'Custom Flow' is a vertical stack of white boxes with three dots in the top-left corner: Auto Loans, Personal Loans, Saving Accounts, Checking Accounts, Credit Cards, Home Loans, and Term Deposits. A 'Note' box on the right says: 'The priority defined for each individual product application on this page will be applicable for all bundled application combinations.' At the bottom, there are 'Submit', 'Cancel', and 'Back' buttons. The footer contains copyright information: 'Copyright © 2006, 2020, Oracle and/or its affiliates. Click **OK** to complete the transaction.

FAQ

5. Do I have to activate the custom flow once created?

No, custom flow gets auto activated upon creation.

6. Is it mandatory to create custom workflow?

No, bank can use default workflows if no changes are required in the flow.

7. What will be the expected system behaviour when the specific step is configured as an optional step?

If the step is configured as an optional step, user can choose to skip that step while filling the application form.

8. Can I delete the optional step from the workflow?

Yes, once you delete the optional step, end user will not be shown that step as part application origination

9. What will happen to the applications which are in draft status with the old origination workflow?

The application will be processed as per the new workflow defined by the banker. The information which is already filled by the customer will be pre-populated. In addition, user will be asked to provide the information if any as per the newly configured workflow.

10. How many custom flows can I create per product category?

Banker would be allowed to create only one custom flow. Modifications can be made in the custom flow at the later stage as per the bank's requirement.

11. Can I configure the workflows at the product level available under each product category?

No, as of now banker will be allowed to configure the workflows at product category level.

19. Service Request Form Builder

Service Request Form Builder transaction allows the system administrator to define service requests by defining its attributes and by building the form (Request page that should be available to business user) which are then available for Retail users for creating a new Service Request.

This screen is divided in three sections – Request Parameters, Build your Form and Preview

Request Parameters section lets the System/Bank Administrator to create a service requests by defining attributes like, SR Name, description, Product, Category name, SR type, severity, and status etc..

Second tab which is the **Form Builder** page lets the System/Bank administrator define the request form and the fields that needs to be available on the Service Request screen to retail user. Field attributes like field name, field type, allowed characters and error message with respect to that field can also be defined for each field.

Preview Section lets the administrator preview the Service Request form created in the same way as it will be shown to the retail user while raising the Service Request.

Pre-Requisites

- Transaction access is provided to System/Bank Administrator.

Features Supported In Application

The module supports following features:

- Create Service Requests Form
- Search and View Service Request
- Copy and Create a new Request
- Edit Service Requests

How to reach here:

System Administrator Dashboard > Templates > Service Request - Form Builder

OR

System/ Bank Administrator Dashboard > Toggle Menu > Others > Service Request - Form Builder

OR

Bank Administrator Dashboard > Quick Links > Service Request

19.1 Service Request Definition - Summary

Last three service requests that are created by the administrator are by default displayed on the Service Request Definition summary screen.

To view the service requests:

1. Navigate to the **Service Request Definition** screen. The initial (summary) page of the service request appears.

Service Request Definition - Summary

The screenshot displays the 'Service Request Definition' summary page. At the top, there is a navigation bar with 'System Administrator', 'ATM/Branch', 'English', and 'UBS 14.3 AT3 Branch'. Below this is the 'futura bank' logo and a user welcome message: 'Welcome, Leo Thomas' with a last login time of '02 May 05:42 PM'. The main content area is titled 'Service Request Definition' and includes a search bar for 'Request Name' with a 'Search Request Name' input field and 'Search', 'Cancel', and 'Clear' buttons. Below the search bar is a 'Recently Added Service Requests' table with three entries: 'Food card' (Created On 30 Apr 2020), 'credit card' (Created On 25 Apr 2020), and 'credit card' (Created On 27 Mar 2020). To the right of the table is a 'Create Service Request' section with a sub-header, a paragraph explaining the purpose of a service request, and a button that says 'Hey, I am here to help if you need it!'.

2. Click  against a specific service request record if you want to create a new Service Request definition by copying the definition of that service request.

19.2 Service Request Definition - Search and View

The System/Bank Administrator can search and view Service Request using a search criteria.

To search and view an existing Service Request definition:

1. In the **Request Name** field, enter the name of the service request.
OR
In the **Request Description** field, enter the description of the service request.
OR
From the **Product Name** list, select the name of the product.
OR
From the **Request Type** list, select the type of request.

19.3 Service Request Form Builder - Create

Service Request Form Builder feature allows the System/Bank Administrator to create Service requests. The Service Request Form Builder involves following steps to create a service request form.

- Request Parameters: This step involves entering the request name, description, product, type of service request etc.
- Build Your Form: In this steps System/ Bank administrator defines the various form fields and its attributes like field name, field type, field validations and error message which will be used to create business user's 'Service Request' screen for raising a new SR.
- Preview: After completing the screen creation System/Bank administrator previews the created Service Request in this step.

To create a new service request:

1. In the **Service Request Definition** screen, click Create. The **Service Request - Form Builder** screen appears.

Service Request Form Builder - Request Parameters

The screenshot displays the 'Service Request - Form Builder' interface for 'Request Parameters'. The top navigation bar shows 'System Administrator', 'ATM/Branch', 'English', and 'UBS 14.3 AT3 Branch'. The 'futura bank' logo is on the left, and a user welcome message 'Welcome, Leo Thomas' is on the right. The main content area features a progress indicator with three steps: 1. Request Parameters, 2. Build Your Form, and 3. Preview. The 'Request Parameters' step is highlighted. The form includes the following fields and values:

- Request Name: Cheque Book Request
- Request Description: New Product and Category
- Product Name: Product (with a dropdown arrow and a link 'Could not find the Product? Add new')
- Request Category Name: Category (with a dropdown arrow and a link 'Could not find the Category? Add new')
- Request Type: Request (with a dropdown arrow)
- Applicable Status: Completed x, Delivered x
- Severity: Medium (with a dropdown arrow)
- Activation Status: Active (with a toggle switch)

At the bottom left, there are 'Next', 'Cancel', and 'Back' buttons. At the bottom right, there is a blue help button that says 'Hey, I am here to help if you need it!' and a circular icon. The footer contains the text: 'Copyright © 2006, 2020, Oracle and/or its affiliates. All rights reserved. | Security Information | Terms and Conditions'.

Click the **Upload** icon, if you want to upload an image.

21. Click **Next**. The **Service Request Form Builder - Preview** screen appears.
OR
Click **Cancel** to cancel the transaction and go back to Dashboard.
OR
Click **Back** to navigate back to the **Service Request Form Builder - Request Parameters** screen.

Service Request Form Builder - Preview

The screenshot displays the 'Service Request - Form Builder' interface. At the top, there is a navigation bar with 'System Administrator', 'ATM/Branch', 'English', and 'UBS 14.3 AT3 Branch'. Below this is the 'futura bank' logo and a user profile for 'Leo Thomas' with a last login time of '02 May 05:42 PM'. The main content area is titled 'Service Request - Form Builder' and shows a progress bar with three steps: 'Request Parameters', 'Build Your Form', and 'Preview'. The 'Preview' step is currently active, showing a 'Cheque Book Request' form. The form includes the following fields: 'Account Number' (text input), 'Delivery Location' (radio buttons for 'Branch Near Me' and 'My Address'), 'Number of Cheque Books' (dropdown menu), 'Number of Cheque Leaves' (dropdown menu), 'Country' (dropdown menu), 'City' (text input), 'Zip' (text input), and 'Address' (text input). A 'Note' field is also present. At the bottom of the form, there are 'Save', 'Cancel', and 'Back' buttons. A help button with the text 'Hey, I am here to help if you need it!' is also visible. The footer contains the copyright notice: 'Copyright © 2006, 2020, Oracle and/or its affiliates. All rights reserved. | Security Information | Terms and Conditions'.

22. Click **Save** to save the details.
OR
Click **Cancel** to cancel the transaction and go back to Dashboard.
OR
Click **Back** to navigate back to the previous page.
23. The **Review** screen appears. Verify the details, and click **Confirm**.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Back** to navigate back to the **Service Request Form Builder - Preview** screen.
24. The success message appears along with the reference number and status.
Click **OK** to complete the transaction.

19.3.1 Copy and Create a new Request

This option allows the system administrator to create a new service request by copying the already existing service request.

To create a new service request by copying the existing service request:

1. In the **Service Request** screen, enter the search criteria.
2. Click **Search**. The **Service Request Definition** screen with search results appears based on the searched criteria.

Service Request Definition

The screenshot shows the 'Service Request Definition' interface. At the top, there's a navigation bar with 'System Administrator', 'ATM/Branch', 'English', and 'UBS 14.3 AT3 Branch'. Below that, the 'futura bank' logo and user information 'Welcome, Leo Thomas' are visible. The main area is divided into search filters, a table of results, and a 'Create Service Request' panel.

Search Filters:

- Request Name: Search Request Name
- Request Description: Type Request Description
- Product Name: Product
- Request Type: Select Transaction
- Less Search Options
- Buttons: Search, Cancel, Clear

Table of Service Requests:

Request Name	Request Description	Product Name	Request Type	Activation Status	Copy

Recently Added Service Requests:

- Food card Created On 30 Apr 2020
- credit card Created On 25 Apr 2020
- credit card Created On 27 Mar 2020

Create Service Request Panel:

You can define a Service Request for various transactions or inquiries and also add the various attributes which needs to be displayed to the business user on Service Request Screen. Once you add a Service Request it starts appearing in the Business User's login page.

To speed up the process you can search and copy an existing Service Request or click below to start from scratch.

Create

3. Click against the record for which you want to create a new service request definition. A confirmation message of creating a copy of the service request appears. Click **Ok** to continue to the **Service Request Form Builder** screen. A copy of the Service requests selected will get open in editable mode, administrator can define a new name for the request, change the required fields and save the request.
OR

In the **Recently Added Service Request** section click  against the record for which you want to create a new service request definition.

19.4 Service Request Form Builder - Edit

The System Administrator can edit the available Service Requests definitions only if there are no service requests raised by the business user for that SR definition.

To modify the service request definition:

1. In the initial **Service Request Definition** screen, enter the search criteria and click **Search**. The **Service Request Definition** screen with search results appears based on the searched criteria.
OR
In the **Recently Added Service Request** section click the **Service Request** that you want to modify.
2. Click the **Request Name** of the record for which you want to edit the details. The **Service Request Form Builder - View** screen appears.
3. Click **Edit** to edit the service request.
OR
Click **Cancel** to cancel the transaction and go back to Dashboard.
OR
Click **Back** to navigate to the previous screen.

Information Header	The header name and the information notes that is to be displayed on information panel section of the Service request page of the business user.

5. Edit the required details.
OR
You can add more fields if required from **Form Fields** section.
6. Click **Next**. The **Service Request Form Builder - Preview** screen appears.
OR
Click **Cancel** to cancel the transaction and go back to Dashboard.
OR
Click **Back** to navigate back to the **Service Request Form Builder - Request Parameters** screen.
7. Click **Save** to save the details.
OR
Click **Cancel** to cancel the transaction and go back to Dashboard.
OR
Click **Back** to navigate back to the previous page.
8. The **Review** screen appears. Verify the details, and click **Confirm**.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Back** to navigate back to the **Service Request Form Builder - Preview** screen.
9. The success message appears along with the reference number and status.
Click **OK** to complete the transaction.

19.5 Deactivate/Activate Service Request

System/Bank Administrator can deactivate the Service Request which is no longer required by the bank and it will not be available to the business users.

The System/Bank administrator can also activate the service requests whenever it is required by the bank.

To deactivate the service request:

1. In the initial **Service Request Definition** screen, enter the search criteria and click **Search**. The **Service Request Definition** screen with search results appears based on the searched criteria.
2. Click the **Activation Status** link, of the service request record, which you want to deactivate. The **Service Request Definition** screen with **Update Activation Status** pop-up box appears.

Deactivate Service Request

The screenshot shows the 'Service Request Definition' interface in the Futura Bank system. A pop-up window titled 'Update Activation Status' is displayed over the main content. The pop-up contains a 'Status' toggle switch currently set to 'Active', a 'Remarks' text input field, and 'Ok' and 'Cancel' buttons. The background interface shows search filters for Request Name, Request Description, Product Name, and Request Type, along with a table of search results. The table has columns for Request Name, Request Description, Product Name, Request Type, Activation Status, and Copy. Two rows are visible: 'Copied Request' (Request Type: Request, Status: Active) and 'Copied Request new' (Request Type: Complaint, Status: Active).

3. In the **Status** toggle field, click the toggle to deactivate.
4. In the **Remarks** field, enter the remarks.
5. Click **Ok**. The success message appears.

Using the same flow Admin can activate a deactivated Service Request.

FAQ

1. How can I change the sequence of fields defined on form builder while creating the Service Request-form?

You can drag and drop the fields for changing the sequence of the form fields at the time of creation.

2. Can I edit the fields on preview page?

No, you cannot edit the form fields on preview page, but you can go back to form builder page and edit the fields.

3. Can I edit an existing Service Request Form ?

You can only update a Service Request form only if there are no service request raised for that Service Request- form, by business users.

4. Can I delete a Service Request –form ?

No, Service Request form cannot be deleted. However you can deactivate the Service Request –form and it will stop appearing in the business user's login.

5. Can I create two Service Request forms with the same names?

No, Service Request Forms are unique, so two forms cannot have the same names.

6. Can I maintain the Service Request forms in the language other than English?

No, as of now using this maintenance service request forms can be built in English only.

20. Feedback

Customer experience and satisfaction are very important aspects for the banks and it differentiates one bank from another, hence measuring customer satisfaction is exceedingly important. Feedback capture allows the customers to express their opinion on the services offered by the bank.

The following capabilities are available as part of feedback:

- Feedback Template definition
- Feedback capture on transaction completion
- General Feedback capture
- Feedback Analytics

As part of feedback template definition, the administrator can define the feedback question, the rating scale, question and option set along with deciding the set of transaction(s) for which feedback capture needs to be enabled.

The business users i.e. retail and corporate users will get an option to capture feedback on completion of transaction depending upon whether the transaction is part of the feedback template applicable to the role of the user.

The business user also has an option to capture general feedback if required and not necessarily perform a transaction to capture feedback.

Feedback captured by the user in terms of the rating and the options selected on the subsequent questions asked are stored in the system for the bank to carry out analysis for corrective actions if required. The administrator will have an option to view the details.

20.1 Feedback Template Maintenance

Using this option, the System Administrator can maintain the feedback templates by defining the feedback question, selecting the rating scale, adding new questions along with new options, selecting the transactions for which feedback capture needs to be enabled.

The administrator can also decide whether an additional question is to be asked for a scale weight and select the applicable options for the question.

How to reach here:

System Administrator Dashboard > Templates > Feedback Template

OR

Bank Administrator Dashboard > Others > Feedback Template Maintenance

OR

System / Bank Administrator Dashboard > Toggle Menu > Others > Feedback > Feedback Template Maintenance

20.1.1 Feedback Template Maintenance - Search

To search feedback template:

47. In the **Template ID** field, enter an appropriate template ID if you wish to search by template ID.
48. In the **Template Name** field, enter the name of the template to be searched.
49. Select appropriate role(s) if you wish to search the template based on the parameter **Applicable to Role**.
50. Click **Search**.
 - OR
 - Click **Clear** to reset the search parameters
 - OR
 - Click **Cancel** to cancel the transaction

Feedback Template Maintenance-Search

The screenshot displays the 'Feedback Template Maintenance-Search' interface. At the top, there is a navigation bar with 'System Administrator', 'ATM/Branch', 'English', and 'UBS 14.3 AT3 Branch'. Below this is the 'futura bank' logo and a user welcome message: 'Welcome, Leo Thomas Last login 02 May 11:21 AM'. The main form area is titled 'Feedback Template Maintenance' and contains the following elements:

- Template Id**: A text input field with the placeholder 'Enter Template id'.
- Template Name**: A text input field with the placeholder 'Enter Template Name'.
- Applicable to Role**: Two radio button options: 'Corporate User' and 'Retail User'.
- Buttons**: 'Search' (blue), 'Cancel' (grey), and 'Clear' (grey).
- Feedback Template Definition**: A box on the right containing a description: 'Feedback template allows definition of Feedback Question, Scale selection, Question bank along with applicable options and selection of transactions for which feedback needs to be enabled' and a 'Create' button.

At the bottom of the page, there is a copyright notice: 'Copyright © 2006, 2020, Oracle and/or its affiliates. All rights reserved. | Security Information | Terms and Conditions'.

Field Description

Field Name	Description
Template ID	Specify the template ID you want to search.
Template Name	Specify the template name you want to search.
Applicable To Role	Select the role if you wish the search the template based on the role.

Search Results

Field Name	Description
Template ID	Displays the template ID of the applicable template based on the search criteria.
Template Name	Displays the template name of the applicable template based on the search criteria.
Applicable To Role	The role to which the searched feedback template is applicable.

51. Click the link under the **Template ID** column. The **Feedback Template Maintenance** screen appears with the details of the feedback template i.e. template ID, template name, feedback question, question and option set along with the set of transactions for which template is applicable.

Feedback Template – View

The screenshot shows the 'Feedback Template Maintenance' screen in the Futura Bank system. The page header includes the Futura Bank logo, user information (System Administrator, ATM/Branch, English, UBS 14.3 AT3 Branch), and a welcome message for Leo Thomas. 20.1.2 Feedback Template Maintenance - Edit

Using this option, the administrator can modify details in the feedback template i.e. update feedback question, change the rating scale, add new questions and options, add / remove transactions from the template.

To edit or modify feedback template:

1. Search the Feedback template by specifying different search criteria and click **Search**. The search results appear on the **Feedback Template Maintenance** screen based on the search parameters.
2. Click the link under the **Template ID** column. The **Feedback Template Maintenance** screen appears.
3. Click  to edit the details in respective section of the feedback template. The **Feedback Template Maintenance - Edit** screen appears.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Back** to navigate to the previous screen.
4. The administrator will be navigated to the respective section i.e. feedback template details or scale definition or select question or link transaction depending on the edit option selected against the respective section.
5. As part of feedback template details, feedback question, template ID, template name and applicable to role can be modified
6. As part of scale definition, the administrator can change the rating scale
7. As part of select question section, the administrator can add new questions and also add new options for existing as well as new questions defined.
8. As part of link transaction section, the administrator can add new transactions as well as remove existing transactions.

Administrator can also add new options, to the existing questions associated to each scale weight of the rating scale applicable to general feedback as well as for transactions
9. Edit the required details in the respective section and click **Save** if you need to go to review page
OR
Click **Next**, to go to the next step in the process and edit details wherever required.
OR
Click **Back** to go to the previous page.
OR
Click **Cancel** to cancel the transaction

10. The **Review** screen appears. Verify the details, and click **Confirm**.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Back** to go to previous screen.
11. The success message with reference number appears.
Click **OK** to complete the transaction.

20.1.3 Feedback Template Maintenance - Create

Using this option, the administrator can create feedback template for a specific user type i.e. retail / corporate by defining the details i.e. the feedback question, selecting the rating scale, addition of new questions along with options, select transactions for which the feedback capture needs to be enabled.

To create feedback template:

1. Navigate to the **Feedback Template Maintenance** screen and click **Create**. The **Feedback Template Maintenance - Create** screen appears.
2. In the **Template ID** field, enter the template ID.
3. In the **Template Name** field, enter the name of the template.
4. Select the role(s) for which the feedback template is applicable by selecting check box in the **Applicable to Role** field.
5. In the **Feedback Question** field, enter the name of the feedback question.

Feedback Template Maintenance - Create

The screenshot displays the 'Feedback Template Maintenance - Create' interface. At the top, there is a navigation bar with 'System Administrator', 'ATM/Branch', 'English', and 'UBS 14.3 AT3 Branch'. Below this is the 'futura bank' logo and a user profile for 'Leo Thomas' with a 'Welcome' message and 'Last login 02 May 11:21 AM'. The main content area is titled 'Feedback Template Maintenance' and contains a form with the following fields:

- Template Id:** 007
- Template Name:** OBDX_007
- Applicable to Role:** Corporate User, Retail User
- Feedback Question:** OBDX Experience Feedback

At the bottom of the form are three buttons: 'Next' (blue), 'Cancel' (grey), and 'Back' (blue). To the right of the form is a 'Feedback Template Definition' sidebar with a document icon and the text: 'Feedback template allows definition of Feedback Question, Scale selection, Question bank along with applicable options and selection of transactions for which feedback needs to be enabled'. The footer of the page reads 'Copyright © 2006, 2020, Oracle and/or its affiliates. All rights reserved. | Security Information | Terms and Conditions'.

Field Description

Field Name	Description
Template ID	Enter the template ID.

Field Name	Description
Template Name	Enter the template name for the template being created.
Applicable To Role	Select the role(s) for which the template will be applicable. You can select multiple roles and the system will resolve the template based on the role of the user when the user wishes to capture feedback.
Feedback Question	Define the feedback question. This is the question that will be asked to the user as part of feedback capture on which he/she can rate on the rating scale.

6. Click **Next**. The select scale screen section in the feedback template maintenance screen is displayed.
 OR
 Click **Cancel** to cancel the transaction.
 OR
 Click **Back** to navigate to the previous screen.

Feedback Template Maintenance - Select Scale

The screenshot displays the 'Feedback Template Maintenance' interface. At the top, there is a navigation bar with 'System Administrator', 'ATM/Branch', 'English', and 'UBS 14.3 AT3 Branch'. Below this is the 'futura bank' logo and a user welcome message: 'Welcome, Leo Thomas' with 'Last login 02 May 11:21 AM'. The main content area shows the following details:

- Template Id: 0021
- Template Name: OBDX_0021
- Applicable to Role: retailuser
- Feedback Question: feedback_question

A progress indicator shows three steps: 1. Select Scale (selected), 2. Select Question, and 3. Link Transaction. Below the progress bar, three scale options are presented:

- Scale 1: 5 stars (selected)
- Scale 2: 5 hearts
- Scale 3: 5 thumbs up

At the bottom, there are three buttons: 'Next' (highlighted in blue), 'Cancel', and 'Back'. A footer contains the copyright notice: 'Copyright © 2006, 2020, Oracle and/or its affiliates. All rights reserved. | Security Information | Terms and Conditions'.

Field Description

Field Name	Description
Select Scale	Select the required scale. The scale will be available for the user to rate as part of feedback capture.

7. In the **Select Scale** field, select the appropriate option.
8. Click **Next**. The select question section as part of **Feedback Template Maintenance** screen is displayed.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Back** to navigate to the previous screen.

Feedback Template Maintenance - Select Question

The screenshot displays the 'Feedback Template Maintenance' interface for 'futura bank'. The user is logged in as 'System Administrator' at 'ATM/Branch' in 'English' for 'UBS 14.3 AT3 Branch'. The user's name is 'Leo Thomas' and the last login was on '02 May 11:21 AM'.

The main content area is titled 'Feedback Template Maintenance' and shows the following details:

- Template Id: 021
- Template Name: OBDX_Ret_User
- Applicable to Role: retailuser

A progress bar indicates the current step is 'Select Question' (step 2 of 3). The steps are: 1. Select Scale, 2. Select Question, 3. Link Transaction.

Three questions are displayed, each with a set of options and a text input field for additional feedback:

Question 1: What went wrong?
Options: Difficult to locate the transaction, Transaction can be made available on alternate channel, Error while using, There should be less clicks for the transaction, Too much information capture, Not Sure, Add-On-Features, Application is slow, System took too long to process the request.

Question 2: Tell us, what areas can be improved?
Options: System took too long to process the request, Not Sure, UI, UI, Transaction can be made available on alternate channel, UI, Navigation and User Experience.

Question 3: What did you feel was very bad in the process?
Options: There should be less clicks for the transaction, System took too long to process the request, Transaction can be made available on alternate channel, Application is slow, Error while using, Difficult to locate the transaction, UI, Add-On-Features.

At the bottom, there is an 'Add Another question' section with an 'Add' button. Below that are 'Next', 'Cancel', and 'Back' buttons.

Link Transactions

Field Name	Description
Feedback Type	<p>Indicates whether feedback type is general or is specific to transaction.</p> <p>The options are:</p> <ul style="list-style-type: none"> • General: This is very generic in nature and not feedback specific to a transaction. The template defined will be applicable when the user wishes to leave feedback generally through the menu option. • Transactions: This is in case wherein administrator wants to define the template very specific to a set of transaction or a set of transactions.

13. Select the applicable feedback type i.e. general or transactions or both
14. If you select **General** option, there will be a panel available to define questions along with options against each of the scale weights of the rating scale. It is not mandatory to assign a question to each scale weight.
15. If you select **Transaction** option, there will be a panel available to select the transactions in the '**Select transaction**' field and also define questions along with options against each of the scale weights of the rating scale. It is not mandatory to assign a question to each scale weight.
16. Click **Save** to save the template information.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Back** to navigate to the previous screen.
17. The **Review** screen appears. Verify the details, and click **Confirm**.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Back** to go to previous screen.

FAQ

1. Can I define multiple feedback questions as part of the template definition?

No. Only one feedback question can be defined as part of the template and this will be asked to the business user on which he/she will rate. The same question will be applicable to General feedback and for transactions.

2. What is the relevance of the questions and option set defined as part of select question section?

The questions and options defined as part of the select question section are used for association to the scale weights if required which will be asked to the user on he/she selecting the weight on the rating scale as part of actual feedback capture.

3. Can I have separate questions associated at scale weight level for different transactions?

Yes, you will need to select and group transactions for which you wish to have common questions and options at scale weight level. Click on Add Another Transaction to add transactions that require different set of questions and options at scale weight level.

4. Can I remove the questions associated at scale weight level as part of edit?

No. Currently questions once defined can't be removed.

5. Can the same feedback template be applicable to multiple roles?

Yes, provided multiple roles have been selected in the 'Applicable to Role' field.

20.2 Feedback Analytics

Feedback Analytics gives the bank a quick analysis of the feedback information collected from the customers. The analytics covers information about the average of feedback ratings that transactions have got, trends in how the average ratings have changed the top and bottom transactions in terms of ratings etc. The analytics helps banks in quickly identifying the pain points in customer journeys and points out the specific areas for improvement and action.

Using this option, the System Administrator can analyse the feedback given by users.

The following information will be available to the administrator as part of analytics:

- Top three and bottom three transactions: Shows the top three and bottom three transactions based on user given rating
- Individual Transactions: Shows the user given ratings, distribution of the ratings given, the answer options chosen for the associated question & change of ratings over three time periods for an individual transaction
- All Transactions : Shows the user given ratings, distribution of the ratings given, and change of ratings over three time periods
- General Feedback: Shows the user's general feedback i.e. Average rating for the selected time period, Rating over time (last month, last quarter, last year), Recent comments by user grouped based on ratings, and the Customer response for the question associated with each rating

How to reach here:

Administrator Dashboard > Control & Monitoring > Feedback Analytics

20.2.1 Top Three and Bottom Three Transactions

Top three and bottom three transactions

Field Description

Field Name	Description
Top / Bottom 3 Transactions	Displays the top / bottom three transactions in graphical format. It also displays the ratings given by the user to that particular transaction.

20.2.2 Individual Transactions

To view individual transactions:

53. From the **Data Set** list, select the user for which the transaction is to be searched.
54. From the **Touch Point** list, select the banking channel.
55. From the **Select Transaction** list, select the transaction name for which the feedback is to be searched.
56. From the **Time Frame** list, select the duration in number of months / years.
57. Click **Submit**. The search results are displayed.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Clear** to clear the search criteria.

Individual Transactions

The screenshot displays the 'Feedback Analytics' dashboard for 'Individual Transactions'. The interface includes a navigation bar with user information (System Administrator, ATM/Branch, English, UBS 14.3 AT3 Branch) and a welcome message for Leo Thomas. The main content area is titled 'Feedback Analytics' and features four tabs: 'Top 3 & Bottom 3 Transactions', 'Individual Transactions' (selected), 'All Transactions', and 'General Feedback'. Below the tabs, there are filters for 'Data Set' (RetailUser), 'Touch Point' (Internet), 'Select Transaction' (Cheque Book Request), and 'Time Frame' (Select Period). The date range is set from 01 Jun 2017 to 22 Jun 2018. Action buttons for 'Submit', 'Cancel', and 'Clear' are visible.

The dashboard is divided into three main sections:

- Ratings:** Shows an average rating of 2 (represented by two stars) and a total of 1 rating. A pie chart indicates that 100% of the ratings are 2-star ratings.
- Rating Over Time:** A line chart showing the percentage of 2-star ratings over the last 1 Year, 3 Months, and 1 Month. The values are consistently at 100%.
- Customer Review:** Displays the most recent 5 comments, with the top comment showing a 5-star rating (*****).

Below these sections is the 'Customer Response' area, which lists responses to the question 'What went wrong?'. The top response is '1. Too much information capture', which has received 100% of the responses.

21. SMS Banking

SMS and Missed call banking gives business user the control to manage his/her account whenever and wherever needed by sending a SMS or by giving a missed call on a designated number.

Business user just needs to register his/her mobile number with the bank and explicitly opt for SMS/Missed Call banking services to access the required information.

Using this option, the system administrator can maintain the following templates

- **SMS Banking:** The template for an event and locale combination can be created by defining the input keyword, data attributes, whether PIN required and response message.
- **Missed Call Banking:** The template for an event and locale combination can be created by defining the contact number on which the customer would need to give a missed call and response message.

How to reach here:

System Administrator Dashboard > Templates > SMS and Missed Call Banking > SMS

SMS Banking - Search

The screenshot shows the 'SMS Banking' search interface. At the top, there is a navigation bar with 'System Administrator', 'ATM/Branch', 'English', and 'UBS 14.3 AT3 Branch'. Below this is the 'futura bank' logo and a user greeting: 'Welcome, Leo Thomas' with 'Last login 02 May 11:21 AM'. The main content area is titled 'SMS Banking' and has two tabs: 'SMS' (selected) and 'Missed Call'. Under the 'SMS' tab, there are two dropdown menus: 'Event Name' and 'Locale'. Below these are 'Search' and 'Cancel' buttons. To the right, there is a section titled 'SMS and Missed Call Banking' with a brief description of the function and a note about defining templates for SMS and Missed Call Banking.

To search SMS template:

1. From the **Event Name** list, select the appropriate event.
2. From the **Locale** list, select the language.
3. Click **Search**. The View screen appears, depending on the search criteria.

OR

Click **Cancel** to cancel the transaction.

SMS Banking - View

Field Description

Field Name	Description
Event Name	Select the event name.
Locale	Select the locale of the template. Currently only 'English' is supported
Event Name	Displays the event name as selected on the search page for which the template details are to be viewed.
Locale	Displays the language in which the SMS template is defined i.e. input syntax as well as the response message
Pin Required	Indicates whether PIN is required while requesting information from the bank.
Input	<p>Displays the input syntax containing the keyword, data attribute(s) and PIN (if required) for the selected event and locale combination</p> <p>The format in which the user needs to send the text message with the required attribute(s) to receive appropriate information.</p> <p>For example: If the account holder wishes to receive account balance information from the bank and the template is defined as MBAL <PIN> <AccountNumber>, user's PIN is defined as 5678, and account number is AT30012100012, then user will need to send SMS as MBAL 5678 AT30012100012.</p>

Field Name	Description
Response	Displays the response message along with the data attributes as defined for the event and locale combination. It is the response message that the account holder would be receiving on sending a SMS for a specific inquiry or transaction
Data Attributes	Displays the data attributes used as part of response message for the respective event.

- Click **Edit** to if you want to edit the SMS template.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Back** to navigate to the previous screen.

21.1 SMS Banking - Edit

Using this option, System Administrator can modify the SMS Banking template defined for an event and locale combination.

To edit or update a SMS template:

- Select the Event and Locale and click **Search**. You will be navigated to the SMS Banking Template in View mode.
- Click **Edit** to modify the details. The **SMS Banking- Edit** screen appears.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Back** to navigate to the previous screen.

SMS Banking - Edit

The screenshot displays the 'SMS Banking - Edit' interface. At the top, the user is identified as 'System Administrator' with roles 'ATM/Branch' and 'English'. The current branch is 'UBS 14.3 AT3 Branch'. The user is logged in as 'Leo Thomas' on '02 May 11:21 AM'. The main content area shows the 'SMS Banking' configuration for a 'Missed Call' event. The event name is 'Stop Cheque Book Request' and the locale is 'English'. A 'Pin Required' toggle is enabled. The input field lists data attributes: 'BNKSTCHRO', 'PIN', 'ACCOUNTNO', and 'CHEQUENO'. The response field contains the text: 'Request to stop cheque for number #ChequeNumber# has been received'. At the bottom, there are 'Save', 'Cancel', and 'Back' buttons.

3. As part of edit, you can modify the keyword defined for the event, include new data attributes in the input syntax or remove existing data attributes, modify the response message and also include new data attributes as part of response message.
4. Click **Save** to update the changes.
OR
Click **Back** to navigate to previous screen.
OR
Click **Cancel** to cancel the transaction.
5. The **Review** screen appears. Verify the details, and click **Confirm**.
OR
Click **Back** to go to previous screen.
OR
Click **Cancel** to cancel the transaction.
6. The success message about modification appears.
Click **OK** to complete the transaction.

21.2 Missed Call Banking - Search

How to reach here:

Administrator Dashboard > Templates > SMS and Missed Call Banking > Missed Call

Missed Call Banking - Search

The screenshot shows the Futura Bank Administrator Dashboard. At the top, there is a navigation bar with the following items: System Administrator (dropdown), ATM/Branch (dropdown), English (dropdown), and UBS 14.3 AT3 Branch (dropdown). Below this is a search bar and a user profile section showing 'Welcome, Leo Thomas' and 'Last login 02 May 11:21 AM'. The main content area is titled 'Missed Call' and has two tabs: 'SMS' and 'Missed Call' (which is selected). Under the 'Missed Call' tab, there are two dropdown menus: 'Event Name' and 'Locale'. Below these are two buttons: 'Search' and 'Cancel'. To the right of the search form is a panel titled 'SMS and Missed Call Banking' with the following text: 'The function allows the administrator to define the template for SMS as well as Missed Call Banking. In case of SMS Banking, for each event and locale combination, input syntax (keyword and data attributes) as well as response message can be defined. For Missed Call Banking, for each event and locale combination, contact number along with response message can be defined.'

Missed Call Banking - Search

To search Missed Call Banking template:

1. From the **Event Name** list, select the appropriate event.
 2. From the **Locale** list, select the language.
 3. Click **Search**. The View screen appears, depending on the search criteria.
- OR
- Click **Cancel** to cancel the transaction

Missed Call Banking - View

Field Description

Field Name	Description
Event Name	Select the event name from the list.
Locale	Select the locale of the template. Currently only 'English' is supported.
Event Name	Displays the event name as selected on the search page for which the template details are to be viewed
Locale	Displays the locale as selected on the search page for which the template details are to be viewed It is the language in which the information is communicated to the account holder on request.
Contact Number	Displays the contact number defined for the selected event and locale combination on which the user needs to give a missed call to get the required information.
Response	Displays the response message as defined for the event and locale combination with the required data attributes. It is the response message that the account holder would be receiving when he gives a missed call on a specific contact number
Data Attributes	Data attributes that are used as part of response message for the respective event.

4. Click **Edit** if you want to edit the missed call template.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Back** to navigate to the previous screen.

21.3 Missed Call Banking - Edit

Using this option, System Administrator can modify the Missed Call Banking template defined for an event and locale combination.

To edit or update a missed call template:

1. Select the Event and Locale from the list and click **Search**. You will be navigated to the **Missed Call Banking** template in View mode.
2. Click **Edit** to modify the details. The **Missed Call Banking- Edit** screen appears.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Back** to navigate to the previous screen.

Missed Call Banking - Edit

The screenshot displays the 'Missed Call Banking - Edit' interface. At the top, there is a navigation bar with 'System Administrator', 'ATM/Branch', 'English', and 'UBS 14.3 AT3 Branch'. Below this is the Futura Bank logo and user information: 'Welcome, Leo Thomas' and 'Last login 02 May 11:21 AM'. The main content area is titled 'Missed Call' and has two tabs: 'SMS' and 'Missed Call'. The 'Missed Call' tab is active. The form contains the following fields:

- Event:** Last 5 transactions
- Locale:** English
- Contact Number:** 9869288402
- Response:** Your last 5 transactions for account number #AccountNumber# are #Transactions#

Below the form, there is a 'Data Attributes' section with a 'Transactions' attribute and an 'Add Data Attribute' button. At the bottom of the form, there are 'Save', 'Cancel', and 'Back' buttons. The footer of the page contains the copyright notice: 'Copyright © 2006, 2020, Oracle and/or its affiliates. All rights reserved. | Security Information | Terms and Conditions'.

3. As part of edit, you can modify the contact number as well as the response message
4. Edit the required details.
5. Click **Save** to update the changes.
OR
Click **Back** to navigate to previous screen.
OR
Click **Cancel** to cancel the transaction.

6. The **Review** screen appears. Verify the details, and click **Confirm**.
OR
Click **Back** to go to previous screen.
OR
Click **Cancel** to cancel the transaction.
7. The success message about modification appears.
Click **OK** to complete the transaction.

FAQ

1. How can the business user register for SMS Banking?

User can send a SMS with the required keywords and data attributes defined by the bank to a specified contact number. User needs to send the SMS from his/her registered mobile number with the bank. Alternatively he/she can login to Internet Banking and register for SMS Banking.

2. Is it mandatory to have a PIN in each of the request for SMS Banking?

It will depend on the template defined for event and locale combination. If PIN is required, then user needs to define the PIN as part of registration process and subsequently send that as part of the request.

3. Does the user need to specify an account number as part of the request while sending SMS?

No, it is not necessary. If the user does not specify the account number, system will return response for the primary account number if defined.

4. For which account does system return the response in case of Missed Call Banking?

System will always return the response for the primary account number (if defined) on receipt of request through missed call banking

5. User is unable to receive information and getting an error, how can he/she find the correct keyword?

User might be getting an error due to keyword and/or account number not being valid or the required data attributes not present. He/she can find the keywords by sending a help message and system will return the set of business functions supported through SMS Banking along with keywords for each of the transactions.

6. Should the user be on-boarded on channel platform for him/her to access SMS Banking?

Yes, the user needs to be on-boarded on OBDX with SMS Banking as a touch point enabled to access SMS Banking.

22. System Rules

System rules are defined to set different parameters for each enterprise role (User Type- Retail, Corporate and Administrator). Various parameters that can be set for each enterprise role are Party Mapping required Limits check, Party Preferences check, Account Transaction Mapping and Approvals check. Enabling these parameters at enterprise role, enforces the system to check if respective maintenances are available for users associated with those enterprise roles.

E.g. if Approval check flag is enabled for 'Corporate User' type of enterprise role; then transactions initiated by corporate type of users will follow the approval maintenance for a party mapped to user and vice versa.

This screen allows the System Administrator to search and view existing system rules, and create new system rule.

Pre-Requisites

- Transaction access is provided to System Administrator.
- Approval rule set up for System Administrator to perform the actions.
- Enterprise roles are maintained in application.
- Touch point groups are maintained, if required.
- Limit packages are maintained.

Workflow

Features Supported In Application

This option allows the System Administrator to:

- Maintain system rules
- View system rules
- Edit system rules

How to reach here:

System Administrator Dashboard > Configuration > System Rules

OR

System/ Bank Administrator Dashboard > Toggle Menu > Configuration > System Rules

System Rules

The screenshot displays the 'System Rules' configuration page for the 'Retail User' role. It includes a 'Note' box, a table of mandatory screens, and a list of touch points with their packages and actions.

Note: Use this feature to maintain parameter preferences for each enterprise role. You can search for existing system rules defined to view and/or modify the rule and can also create a new system rule as required.

Account Relationship Check	<p>Account Relationship check is required or not.</p> <hr/> <p>Note: The Account relationship check has to be disabled for the corporate user.</p> <hr/>
Limits Check	Limits check is required or not.
Limits - Entity Level Configuration	
If limit check is required, assign a limit package.	
In case of multi entity set up, limit packages needs to be mapped at each entity level.	
Name of the entity	Name of entity under which limit packages are to be mapped is shown in the header.
Touch Points/ Group	Name of touch points/ groups under a specific entity to whom the limit packages are to be mapped. Also an option is provided to map the limit package at Global level (a group created with all internal and external touch points)

Field Name	Description
Package	List of the packages which are to be mapped to a touch points/ groups. Only limit packages maintained for the selected touch point will get listed here.

To set the system rules:

1. From the **Enterprise Role** list, select the appropriate option.
2. In the **Party Mapping Required** field, select the appropriate option.
3. In the **Party Preferences Check** field, select the appropriate option.
4. In the **Account Transaction Mapping Check** field, select the appropriate option.
5. In the **Approvals Check** field, select the appropriate option.
6. In the **Account Relationship Check** field, select the appropriate option.
7. In the **Limits Check** field, select the appropriate option.
 - a. Click  of desired entity to whom limit package to be mapped. Displays the list of touch points/ groups to map limit package.
 - b. From the **Package** list, select the appropriate option.

Note: Click  to refresh the option.

- c. Repeat steps a to b of step 8 for all touch points/ groups.
 - i. Click  to view the details of touch points group. The **View Details -Touch Point Group** popup window appears.

View Details -Touch Point Group

Field Description

Field Name	Description
Group Code	Group code defined for a touch point group.
Group Description	Group description defined for a touch point groups.
Touch Point Group Type	Type of touch point i.e. whether touch point is of type internal or external.
Touch Points	List of the internal or external touch points.

8. Click **Submit** to save system rules.
OR
Click **Cancel** to cancel the transaction.
The success message appears.
9. The **System Rules - Review** screen appears. Verify the details, and click **Confirm**.
OR
Click **Back** to make the changes if any.
OR
Click **Cancel** to cancel the transaction and navigate back to 'Dashboard'.
10. The success message of System Rules maintenance appears along with the transaction reference number. Click **OK** to complete the transaction.

FAQ

1. Who can create-edit this maintenance?

System Administrator can create and edit this maintenance.

2. How can I find out what checks are granted to a particular role and can I change it?

You can select a role and view the checks mapped to the role, you can also edit the type of checks.

3. How can I group the touch points?

A separate menu option 'Touch Point Group Maintenance' is available to the system administrator user to maintain the groups. Groups maintained under specific entity are shown on the System Rules screen against which a consolidated limit package can be assigned.

4. Is it mandatory to map packages for all the touch points and groups available under each entity?

Mapping the limit packages for each touch point and for all groups available under each entity is not mandatory. But it is mandatory to map a limit package at Global level for each entity.

23. First Time Login

Whenever a new user logs into the application for the first time with the user name and password provided by bank, there are certain tasks that he/she needs to fulfil before being able to access the online services of the bank. These steps are configured by Bank and can include accepting Terms and Conditions, Setting up Security Question, My profile and limit information.

The first time login event are configurable at Entity Level. Bank Admin would be able to define the mandatory and skippable steps for each entity.

Post first time login to the application , system will check the configured steps for the logged in entity and will be displayed to user. Once the user completes the first time login steps for his primary entity, and switches to another entity, system will check if the user has completed the first time login steps for the switched entity, if not system will ask the user to complete the same for the switched entity.

Note:

Each step will either have Next or Skip button basis on the configuration (mandatory/optional) done by Bank Administrator.

User will be allowed to skip Non-Mandatory Steps.

Pre-Requisites

- Transaction access is provided to System Administrator.
- Enterprise roles are maintained in application.
- Touch point groups are maintained, if required.
- Limit packages are maintained.

Features Supported In Application

Field Description

Field Name	Description
Enterprise Role	Name of enterprise roles set in application. The options can be: <ul style="list-style-type: none"> • Corporate User • Administrator • Retail User On selecting an application role, system rules maintained if any, are shown in editable form.
First Time Login Steps	First time login steps to be followed or not. Administrator can also configure the steps along with the order of the steps that need to be displayed to use
Below field are displayed if the First Time Login Steps option is enabled	
Select	Option to decide whether that transaction is to be displayed as part of the first time login steps.
Name of Screen	Name of the transaction which is to be included as part of First Time Login Steps process.

Field Name	Description
Level	Display the Level for First Time Login event .whether its Entity or Enterprise Level (non-editable)
Mandatory	Option which will decide whether the transaction is mandatory to execute as part of First Time Login Steps process.
Reorder	Order in which the transactions will get displayed when the user logs in for the first time. Administrator can click on the reorder icon and configure the order of steps in which these steps need to be displayed to user.

To set up the First Time Login Steps:

1. In the **First Time Login Steps** field, select the appropriate option.
 - d. To include in the **First Time Login Steps** process, select the checkbox(s) against the transaction and configure the steps.
 - e. Slide Mandatory option to enabled /disabled the execution of transaction in the **First Time Login Steps** process.
 - f. Slide  icon to set order in which transaction are executed in the **First Time Login Steps** process.
2. Click **Submit** to save First Time Login events.
OR
Click **Cancel** to cancel the transaction.
The success message appears.
3. The **First Time Login - Review** screen appears. Verify the details, and click **Confirm**.
OR
Click **Back** to make the changes if any.
OR
Click **Cancel** to cancel the transaction and navigate back to 'Dashboard'.
4. The success message of First Time Login maintenance appears along with the transaction reference number. Click **OK** to complete the transaction.

FAQ

1. **Who can create-edit this maintenance?**
System Administrator can create and edit this maintenance.
2. **How can I find out first time login checks are granted to a particular role and can I change it?**

You can select a role and view the first time login checks mapped to the role, you can also edit the type of checks ,reorder it and define it those checks are mandatory or not post login to the application

3. If user closes the window without completing any mandatory step post first time login in to application , what will be the system behaviour?

In case the user closes the window without completing any mandatory step, user will be asked to set up the same in his subsequent login.

24. Transaction Aspects

Using this option, System Administrator can define the aspects for a transaction. Depending on the aspects defined for a transaction through this maintenance, the transaction will be available/unavailable for selection in the respective maintenance screen.

User can view the aspects for a selected transaction and also edit the aspects i.e. enable/disable the aspects for the selected transaction.

The following aspects are available for a transaction:

- Limits Check
- Approvals
- Grace Period
- Working Window
- Blackout
- 2 Factor Authentication
- Audit
- e-Receipts
- Customer Relationship Matrix

Pre-Requisites

System Administrator has access to the specified transaction

Note: There are certain transactions in the system for which all the aspects are not applicable. In such cases on selection of the transaction, the aspect(s) that are not applicable will not get displayed to user.

Features supported in Application:

- View Transaction Aspects
- Edit Transaction Aspects

How to reach here:

System Administrator Dashboard > Configuration > Transaction Aspects

OR

System/ Bank Administrator Dashboard > Toggle Menu > Configuration > Transaction Aspects

24.1 View Transaction Aspects

System Administrator can view the aspects enabled/disabled for a transaction.

To view the transaction aspects:

1. From the **Transaction** list, select the transaction for which you wish to view the defined aspects.

Transaction Aspects

The screenshot displays the 'Transaction Aspects' page. At the top, there is a navigation bar with 'System Administrator', 'ATM/Branch', 'English', and 'UBS 14.3 AT3 Branch'. Below this is the 'futura bank' logo and a user profile for 'Welcome, Leo Thomas' with a last login time of '01 May 04:56 PM'. The main content area has a search bar labeled 'Transaction' with the placeholder 'Please Select any transaction'. Below the search bar are three buttons: 'Search', 'Cancel', and 'Clear'. To the right of the search bar is a 'Note' box with a document icon and the following text: 'Using this option, you can define the aspects for a transaction. Depending upon the aspects maintained, the transaction will be available/unavailable for selection in the respective maintenance screen. You can view the aspects for a selected transaction and can also edit the aspects i.e. enable/disable the aspects for the same.' At the bottom right, there is a blue button that says 'Hey, I am here to help if you need it!' and a circular help icon. The footer contains the copyright notice: 'Copyright © 2006, 2020, Oracle and/or its affiliates. All rights reserved. | Security Information | Terms and Conditions'.

Field Description

Field Name	Description
Transaction	The name of the transaction for which aspects are to be listed.

2. Click **Search**. The **Transaction Aspects- View** screen appears.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Clear** to reset the selected transaction.

Transaction Aspects- View

The screenshot shows the 'Transaction Aspects- View' interface. At the top, there's a navigation bar with 'System Administrator', 'ATM/Branch', 'English', and 'UBS 14.3 AT3 Branch'. Below that, the 'futura bank' logo is visible. The main content area is titled 'Transaction Aspects' and shows a transaction named 'Own Account Transfer'. Underneath, there's a section for 'Aspects' with four items: 'Working Window', 'Approval', 'Grace Period', and 'Audit', each with a toggle switch. To the right, a 'Note' box contains text explaining the purpose of these aspects. At the bottom left, there are three buttons: 'Edit', 'Cancel', and 'Back'. A copyright notice is at the very bottom.

Field Description

Field Name	Description
Transaction	The name of the transaction for which aspects are to be listed.
Aspects	
List of Aspects	The list of aspects for a transaction.

3. Click **Edit** to modify the aspects.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Back** to navigate back to previous screen.

24.2 Update Transaction Aspects

Using this option user can update the listed aspects for a transaction by enabling or disabling it.

To modify the transaction aspects:

1. From the **Transaction** list, select the appropriate transaction.
2. Click **Search**. The Transaction Aspects- View screen appears.
3. Click **Edit** to modify the aspects i.e. the aspect for a transaction can be enabled/disabled. The **Transaction Aspects- Edit** screen appears.

- OR
 Click **Cancel** to cancel the transaction.
 OR
 Click **Back** to navigate back to previous screen.

Transaction Aspects- Edit

The screenshot displays the 'Transaction Aspects- Edit' interface. At the top, the navigation bar shows 'System Administrator', 'ATM/Branch', 'English', and 'UBS 14.3 AT3 Branch'. Below this, the 'futura bank' logo is on the left, and a search icon, a notification icon with '179', and a user greeting 'Welcome, Leo Thomas' with 'Last login 01 May 04:56 PM' are on the right. The main content area is titled 'Transaction Aspects' and shows a transaction named 'Own Account Transfer'. Under the 'Aspects' section, there are four rows, each with a label and a toggle switch: 'Working Window', 'Approval', 'Grace Period', and 'Audit'. At the bottom left of this section are three buttons: 'Save', 'Cancel', and 'Back'. On the right side, there is a 'Note' box with a document icon and text explaining that these aspects define transaction availability. At the bottom right of the note box is a blue button that says 'Hey, I am here to help if you need it!' and a circular icon.

Field Description

Field Name	Description
Transaction	The name of the transaction for which aspects are to be updated.
Aspects	
List of Aspects	The list of aspects applicable for the selected transaction.

- Click on the toggle button against the respective aspect to enable/disable the aspect
- Click **Save** to confirm the changes.
 OR
 Click **Cancel** to cancel the transaction.
 OR
 Click **Back** to navigate back to previous screen.
- The **Review** screen appears. Verify the details, and click **Confirm**.
 OR
 Click **Edit** to make the changes if any. User is directed to the **Transaction Aspects- Edit screen** with values in editable form.
 OR
 Click **Cancel** to cancel the transaction.
- The success message appears confirming the modification of aspects for the transaction.

25. ATM / Branch Maintenance

ATM Branch Locator feature available to the bank customers enables the users to locate the bank's ATMs/ branches available within a specific radius of his current location.

Default radius is 2.5 Kms which can be configured by updating the value of DEFAULT_SEARCH_RADIUS in digx_fw_config_all_b. Changed value will be in effect post server restart.

For the customers, to fetch the relevant information related to ATMs and Branches, System Administrator maintains the data at their local databases. The details of ATMs and Branches are fetched from the core banking application, which is further enriched and stored in local database. This is a one-time activity at the time of implementation. Subsequently, as and when branches and ATMs are added, or any details regarding them updated, the administrator performs the necessary updates to the bank database.

Using this option, the System Administrator can search and view the ATM/ branch and its details (Fetched from core banking application) which include branch/ ATM ID, branch name, address details, phone number, work timings and services offered by the bank. New ATM and branch details can also be manually added, viewed and edited.

The System Administrator can manually add new branch/ ATM details one by one, or add multiple branches / ATMs details simultaneously through file upload.

Pre-requisites

- Transaction access is provided to System Administrator.
- Approval rule set up for System Administrator to perform the actions.
- ATM and Branches are maintained in core banking application.

Workflow

Features Supported In Application

- Add ATM/ branches
- View ATM/ branches
- Edit ATM/ branches
- Delete ATM / branches

How to reach here:

System Administrator Dashboard > Configuration > ATM/ Branch Maintenance

OR

System/ Bank Administrator Dashboard > Toggle Menu > Configuration > ATM/ Branch Maintenance

25.1 ATM/ Branch Maintenance - Search

Using this option, System Administrator can search for particular ATM/ Branch based on search parameters. The search results display a list of ATM/ Branch corresponding to the search inputs.

If the search parameters are not specified, records of all the limits maintained in the application are displayed.

To search the ATM/ branch:

1. Click **Search**. The **ATM/ Branch Maintenance** screen with search results appears based on the searched criteria.
OR
Click **Clear** to reset the search parameters.
OR
Click **Cancel** to cancel the search process.

ATM/ Branch Maintenance - Search

The screenshot displays the 'ATM/Branch Maintenance' search interface. At the top, there is a navigation bar with 'System Administrator', 'ATM/Branch', 'English', and 'UBS 14.3 AT3 Branch'. The main header shows 'futura bank' and a user profile for 'Leo Thomas' with a 'Welcome, Leo Thomas' message and 'Last login 01 May 04:56 PM'.

The search form includes the following fields and controls:

- Country:** A dropdown menu with 'Select' as the placeholder.
- City:** A text input field.
- ATM/Branch ID:** A text input field.
- Filters:** Two checkboxes for 'ATM' and 'Branch'.
- Buttons:** 'Search' (blue) and 'Clear' (grey).

Below the search form is a table with the following data:

ATM/Branch ID	Address
7890	plot no 40,padmavathy,Chennai,India
1234	x,cxc,mumbai,India
5656	ds,sd,mum,India

At the bottom of the table, there is a pagination control showing 'Page 1 of 1 (1-3 of 3 items)' and a 'Cancel' button.

On the right side, there is a 'Note' box with the following text:

ATM and Branch locations/addresses are maintained in this functionality. You can search for the existing ATM/branch locations by keying in the search parameters like Country, City & Branch/ATM IDs.

Click on 'Create' if you want to Add a new ATM/Branch location details. In the search results click on the ATM/Branch code to view the details of that ATM/Branch and to further Edit & Delete the details.

A 'Create' button is located at the bottom of the note box.

At the very bottom of the page, there is a copyright notice: 'Copyright © 2006, 2020, Oracle and/or its affiliates. All rights reserved. | Security Information | Terms and Conditions'.

Field Description

Field Name	Description

Field Name	Description
------------	-------------

- Retail Branch

- In the **ATM/ Branch ID** field, enter the unique id for ATM/ branch.
 - In the **ATM/ Branch Name** field, enter the name of the new ATM/ branch.
 - In the **Coordinates** field, click the **Search Location** link to enter the location. The coordinate value appears in the field.
 - In the **Address Line 1, 2** field, enter the address of the new ATM/ branch.
 - In the **City** field, enter the city of the ATM/ branch.
 - From the **Country** list, select the country of the new ATM/ branch.
 - In the **Phone Number** field, enter the phone number of the bank branch.
 - Click **Add** to add the ATM/ branch details.
OR
Click **Cancel** to cancel current transaction.
 - The **Add ATM/ Branch Details - Review** screen appears post necessary validations. Verify the details, and click **Confirm**.
OR
Click **Edit** to make the changes if any.
User is directed to the **Add ATM/ Branch Details** screen with values in editable form.
OR
Click **Cancel** to cancel the operation and navigate back to 'Dashboard'.
 - The success message of saving the ATM/ Branch maintenance appears along with the transaction reference number and status of the transaction.
Click **OK** to complete the transaction and navigate back to 'Dashboard'.
5. In the **ATM/ Branch Maintenance - Add Branch Details** screen, if you select **Multiple ATM/ Branches** option, the **ATM/ Branch Maintenance - Add ATM/ Branch Details** screen for uploading the files appears.

ATM/ Branch Maintenance - Add Multiple ATM/ Branch Details

Field Description**Field Name Description**

Add ATM/ Branch Details

Add New Buttons to be selected for adding either the ATM or the branch details.

Input Type Options to add single or multiple ATM/ branch details.

- Single ATM/ Branch
- Multiple ATM/ Branches

File Select the file to be uploaded.

6. In the **Input Type** field, click the appropriate option to add the single or multiple ATM/ branch option.
 - a. If you select **Multiple ATM/ Branches** option, the fields for uploading file (specific file format is mentioned here – XML only) appears on the **ATM/ Branch Maintenance - Add ATM/ Branch Details** screen.
 - b. In the **File** field, select the file to be uploaded.
 - c. Click **Add** to add the ATM/ branch details.
OR
Click **Cancel** to cancel current transaction.
 - d. The **Add ATM/ Branch Details - Review** screen appears post necessary validations. Verify the details, and click **Confirm**.
OR
Click **Edit** to make the changes if any.
User is directed to the **Add ATM/ Branch Details** screen with values in editable form.
OR
Click **Cancel** to cancel the operation and navigate back to 'Dashboard'.
 - e. The success message of saving the ATM/ Branch maintenance appears along with the transaction reference number and status of the transaction.
Click **OK** to complete the transaction and navigate back to 'Dashboard'.

25.3 ATM/ Branch Maintenance - Edit

Using this option, System Administrator can update or edit an ATM/ branch details.

To edit an ATM/ branch details:

1. In the **ATM/ Branch Maintenance** screen, click **Search**. The **ATM/ Branch Maintenance** screen with search results appears based on the search criteria.
OR
Click **Clear** to reset the search parameters.
OR
Click **Cancel** to cancel the search process.
2. Click the **ATM/ Branch ID** link of the record for which you want to view the details. The **ATM/ Branch Maintenance - View** screen appears.
3. Click **Edit** to edit the ATM/ branch details. The **ATM/ Branch Maintenance - Edit** screen appears.

ATM/ Branch Maintenance - Edit

The screenshot displays the 'ATM/ Branch Maintenance - Edit' interface. At the top, there's a navigation bar with 'System Administrator', 'ATM/Branch', 'English', and 'UBS 14.3 AT3 Branch'. Below this is the 'futura bank' logo and a user welcome message: 'Welcome, Leo Thomas' with a last login time of '01 May 04:56 PM'. The main content area is titled 'ATM/ Branch Maintenance' and contains a form with the following fields:

- ATM ID: 7890
- ATM Name: SBI
- Coordinates: 67, 77 (with a 'Search Location' link)
- Address Line 1: plot no 40
- Address Line 2: padmavathy
- Address Line 3: nagar
- Address Line 4: (empty)
- City: Chennai
- Country: India (dropdown menu)
- Services Offered:
 - Non-MetroATM
 - MetroATM
 - Cardless Cash

At the bottom left of the form are 'Save', 'Cancel', and 'Back' buttons. On the right side, there is a 'Note' box with the text: 'In the Edit screen you can modify the existing details of the ATM/Branch. Details like ATM/Branch Name, address, coordinates and services offered can be modified.'

Field Description

Field Name	Description
------------	-------------

ATM/ Branch ID	Unique key to identify the ATM / branch. This field is not editable.
-----------------------	---

Field Name	Description
ATM/ Branch Name	Name of the ATM / branch which is to be edited.
Latitude	The location of the ATM/ branch in term of latitude which is the angular distance, north or south of the equator (an imaginary circle around the Earth halfway between the North Pole and the South Pole).
Longitude	The location of the ATM/ branch in term of longitude which is angular distance, east or west of the prime meridian (an imaginary line running from north to south through Greenwich, England).
Address Line 1 - 4	The address of the ATM / branch that corresponds with the ATM / branch ID.
City	The city of the ATM / branch that corresponds with the ATM / branch ID.
Country	The country of the ATM / branch.
Work Timings	The operating hours of the branch / ATM. This field is only applicable when the user is editing details of the Branch .
Additional Details	Additional details if any. This field appears if you are viewing the details of a Branch of the bank .
Phone Number	The phone number of the branch / ATM. This field is only applicable when the user is editing details of the Branch .
Services Offered	The services offered by the bank branch/ ATM.

4. In the **ATM/ Branch Name** field, edit the name of the new ATM/ branch if required.
5. In the **Coordinates** field, click the **Search Location** link to enter the location. The coordinate value appears in the field. Modify, if required.
6. In the **Address Line 1, 2** field, edit the address of the new ATM/ branch if required.
7. In the **City** field, edit the city of the ATM/ branch (if required).
8. From the **Country** list, select the country of the new ATM/ branch.
9. In the **Phone Number** field, edit the phone number of the bank branch if required.
10. Click **Save** to update the ATM/ branch details.
OR
Click **Cancel** to cancel current transaction.
OR
Click **Back** to navigate back to previous screen.

11. The **Edit ATM/ Branch Details - Review** screen appears post necessary validations. Verify the details, and click **Confirm**.
OR
Click **Edit** to make changes if any.
User is directed to the **Edit ATM/ Branch Details** screen with values in editable form.
OR
Click **Cancel** to cancel the operation and navigate back to 'Dashboard'.
12. The success message of saving the ATM/ Branch maintenance appears along with the status of the transaction.
Click **OK** to complete the transaction and navigate back to 'Dashboard'.

25.4 ATM/ Branch Maintenance - Delete

The System Administrator can delete the ATM and branch details.

To delete ATM/ branch details:

1. In the **ATM/ Branch Maintenance** screen, click **Search**. The **ATM/ Branch Maintenance** screen with search results appears based on the search criteria.
OR
Click **Clear** to reset the search parameters.
OR
Click **Cancel** to cancel the search process.
2. Click the **ATM/ Branch ID** link of the record for which you want to view the details. The **ATM/ Branch Maintenance - View** screen appears.
3. Click **Delete** to delete the ATM/ branch details.
The application will prompt the administrator with a deletion message with an option of Yes / No.

ATM/ Branch Maintenance - Delete

The screenshot shows the 'ATM/ Branch Maintenance' view screen. The form displays the following details:

- ATM ID: 7890
- ATM Name: SBI
- Latitude: 67
- Longitude: 77
- Address Line 1: plot no 40
- Address Line 2: padmavathy
- Address Line 3: nagar
- City: Chennai
- Country: India
- Services Offered:
 - Non-MetroATM
 - MetroATM
 - Cardless Cash

A 'Delete' dialog box is displayed in the center, with the text: 'Delete. Are you sure you want to delete the maintenance?'. It has 'Yes' and 'No' buttons. The background form has 'Edit', 'Delete', 'Cancel', and 'Back' buttons at the bottom.

4. Click **Yes** to delete ATM / Branch. It will navigate to confirmation page with a success message and the status.
OR
Click **No** if you do not wish to delete the ATM / Branch.
5. Click **OK** to complete the transaction.

FAQ

1. In which format I can upload a file with ATM and Branch details?

You can upload a file in xml format to add new branches and ATMs.

2. Do I need to remember the latitude and longitude while updating single ATM/Branch?

No, you may search the location. Based on the location selected latitude and longitude data will be auto fetched and shown on the screen.

3. Can I edit the address and other details of already saved ATM/Branch?

Yes, an option to edit the information of already saved ATM/Branches is provided.

[Home](#)

26. Product Mapping

Product mapping feature allows the System Administrator to map products to users from the channel.

System Administrator can map products maintained in the core banking system to different User type and all the users falling under that user type can open accounts for the mapped products only. This option is currently enabled for Term Deposit and Recurring Deposit module.

For example: A user can open a term deposit or a recurring deposit only under those products which are mapped to the User Type/User Segment assigned to the user. Products which are not mapped, will not be available (for opening deposit accounts) to a channel user. This will be a part of Day 1 setup.

Note: For User Type – Retail, product mapping can be done for User Type and User Segment combination.

Pre-Requisites

- Transaction access is provided to System Administrator.
- Approval rule is set up for System Administrator to perform the actions.
- Necessary products are maintained in core banking application.

Workflow

Features Supported In Application

The module supports following features:

- View Product Mapping
- Edit Product Mapping
- Create Product Mapping

How to reach here:

System Administrator Dashboard > Configuration > Product Mapping

OR

System/ Bank Administrator Dashboard > Toggle Menu > Configuration > Product Mapping

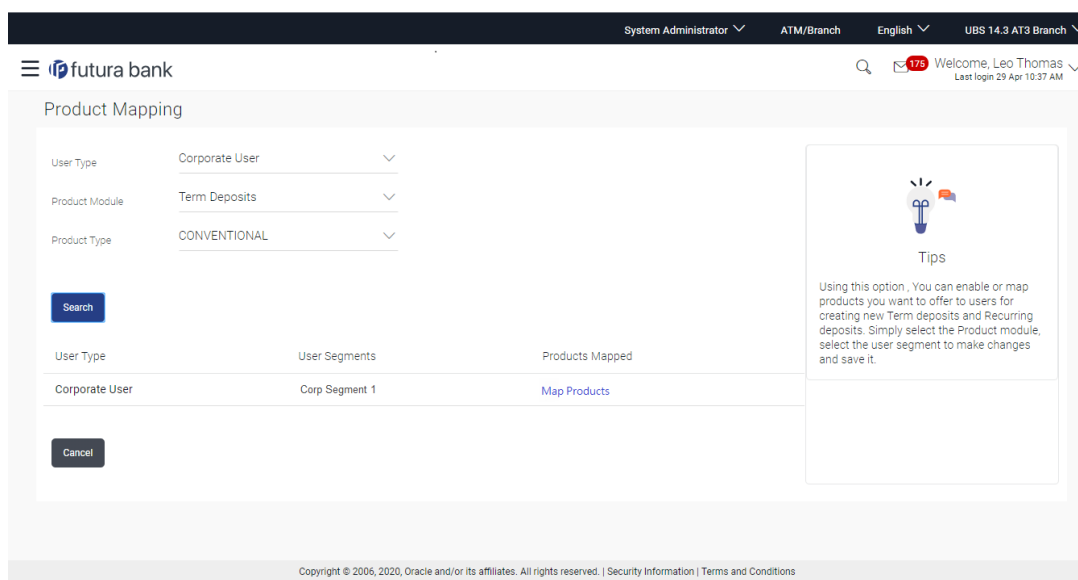

26.1 Product Mapping - View

Using Product mapping view option, System Administrators can view the list of products mapped to the product module. The System Administrator can view the mapping details by clicking the User Segments link.

To view the product mapping:

1. Navigate to the **Product Mapping** screen. The **Product Mapping** screen with mapped products appears.
OR
Click **Cancel** to cancel the transaction and navigate to the dashboard.

Product Mapping

Field Description

Field Name	Description
User Type	The user type available for mapping products.
Product Module	Following product modules are available for mapping: <ul style="list-style-type: none"> • Term Deposit • Recurring Deposit
Product Type	The type of products available to be mapped to the user segment or to the role for that product module.

Field Name	Description
------------	-------------

Search Result

User Type	The user for which products are mapped.
User Segment	The user segments for which products mapped. This field is applicable only for Retail user type.
Products Mapped	The number of products mapped to the user segment or user type for that product type and product module.

2. Click the **Product Mapped** link of the user record for which you want to view the details. The **Product Mapping - View** screen appears.

3. Click **Edit** to edit the user-segment - product mapping.
OR
Click **Cancel** the operation and navigate to the 'Dashboard'.
OR
Click **Back** to navigate to the previous screen.

26.2 Product Mapping - Edit

This function enables the System Administrator to edit the product mapping. The System Administrator can map or delete the products to the product module.

To edit or update the product mapping:

1. In the **Product Mapping** screen, click the **Product Mapped** link of the user record for which you want to edit the details.
The **Product Mapping - View** screen appears.
2. Click **Edit** to edit the user-segment - product mapping. The **Product Mapping – Edit** screen appears.
OR
Click **Cancel** the operation and navigate to the 'Dashboard'.
OR
Click **Back** to navigate to the previous screen.

Product Mapping - Edit

The screenshot shows the 'Product Mapping - Edit' screen in the Futura Bank system. The header includes the user's name 'Leo Thomas' and last login time '29 Apr 10:37 AM'. The main content area displays a table of product mappings for a 'Corporate User' in the 'Term Deposits' module, specifically for 'CONVENTIONAL' product types. The table lists various deposit products with their respective currencies and amounts. Two rows are selected with checkboxes.

Select	Product Name	Expiry Date	Status	Currency	Minimum Amount	Maximum Amount
<input checked="" type="checkbox"/>	Branch Local Holiday TD	NA	Active	EUR	1000	95000000
		NA	Active	GBP	1	50000000
		NA	Active	KWD	500	70000000
<input checked="" type="checkbox"/>	Rate chart allowed deposit with TopUp	NA	Active	EUR	1000	95000000
		NA	Active	GBP	500	50000000
		NA	Active	INR	1000	90000000
		NA	Active	KWD	500	70000000
		NA	Active	USD	1500	70000000
<input type="checkbox"/>	Compounding interest deposit	NA	Active	EUR	1000	50000000
		NA	Active	GBP	5000	95000000
		NA	Active	INR	1000	80000000
		NA	Active	USD	1500	70000000

At the bottom of the table, there are three buttons: 'Save', 'Cancel', and 'Back'.

Field Description

Field Name	Description
Edit	
User Type	The user for which products are mapped.
Product Module	One of the following product modules for which the mapping is to be edited: <ul style="list-style-type: none"> • Term Deposit • Recurring Deposit
Product Type	The list of product type, available for mapping.
User Segment	The user segment, for which products are mapped.
Product Name	Name of the product which is mapped to the user type for the selected product type and product module.
Expiry Date	The expiry date of the product. If the product is expired, an 'Expired' flag is shown against products.
Status	The current status of the product.
Currency	The currency in which products are maintained.
Minimum Amount	The minimum permissible amount for opening deposit under the selected product.
Maximum Amount	The maximum permissible amount for opening deposit under the selected product.

3. Edit View the defined values for fields, in an editable form.
4. Edit the required details.
5. Click **Save** to save the changes.
OR
Click **Cancel** to cancel the operation and navigate back to 'Dashboard'.
OR
Click **Back** to navigate to previous screen.
6. The **Review** screen appears. Verify the details, and click **Confirm**.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Back** to navigate to previous screen.

- The success message of transaction submission appears along with the transaction reference number and status.
Click **OK** to complete the transaction.

26.3 Product Mapping - Create

This option enables the System Administrator to select the products and map it to the Product Module.

To create a new product mapping:

- Navigate to the **Product Mapping** screen.
- Select the User Type for which the product mapping needs to be maintained
- Select the User Segment (applicable only for Retail user type).

Product Mapping

The screenshot displays the 'Product Mapping' interface. At the top, there is a navigation bar with 'System Administrator', 'ATM/Branch', 'English', and 'UBS 14.3 AT3 Branch'. The main header shows 'futura bank' and a user greeting 'Welcome, Leo Thomas' with a last login time of '29 Apr 10:37 AM'. The 'Product Mapping' section contains three dropdown menus: 'User Type' set to 'Corporate User', 'Product Module' set to 'Term Deposits', and 'Product Type' set to 'CONVENTIONAL'. A blue 'Search' button is located below these menus. A table below the search button has three columns: 'User Type', 'User Segments', and 'Products Mapped'. The first row shows 'Corporate User', 'Corp Segment 1', and a blue link 'Map Products'. A 'Cancel' button is at the bottom left. On the right side, a 'Tips' box with a lightbulb icon contains the text: 'Using this option, you can enable or map products you want to offer to users for creating new Term deposits and Recurring deposits. Simply select the Product module, select the user segment to make changes and save it.'

- Click **Map Products**.
The **Product Mapping - Create** screen appears.

Note: The **Map Products** link is available only if no products are mapped to the user segment.

Field Name	Description
User Segment	The user segment, for which products are to be mapped.
Product Name	Name of the product which is mapped to the user type for the selected product type and product module.
Expiry Date	The expiry date of the product. If the product is expired, an 'Expired' flag is shown against products.
Status	The current status of the product.
	Note: Only the active products are displayed
Currency	The currency in which products are maintained.
Minimum Amount	The minimum permissible amount for opening deposit under the selected product.
Maximum Amount	The maximum permissible amount for opening deposit under the selected product.

5. From the **User Type** list, select user for which products are mapped.
6. From the **Product Module** list, select product modules which are available for mapping.
7. From the Product Type list, select product type available for mapping.
8. Select the checkbox(s) for the product which has to be mapped to the user.
9. In the Minimum Amount field, enter the minimum permissible amount for opening deposit under the selected product.
10. In the Maximum Amount field, enter the maximum permissible amount for opening deposit under the selected product.
11. Click Save to save the mapping.
OR
Click Cancel to cancel the operation and navigate back to 'Dashboard'.
OR
Click Back to navigate to previous screen.
12. The Review screen appears. Verify the details, and click Confirm.
OR
Click Cancel to cancel the transaction.
OR
Click Back to navigate to previous screen.
13. The success message of transaction submission appears along with the transaction reference number and status.
Click OK to complete the transaction.

FAQ

1. For which type of products, product mapping functionally is available?

As of now, product mapping feature is enabled only for Term Deposit and Recurring Deposit type of products for retail users and Term Deposit for corporate users.

2. Can customer view the account details of an account opened under a product which is not mapped?

Yes, user can view the account details of an account opened under a product which is not mapped. The restriction will only be for opening new account from channel.

3. What will happen once the products mapped gets expired?

The expired products will no longer be available for product mapping. Also customers will not be able to open new accounts using expired product.

4. What will happen if the products are not mapped to any user segment and are only mapped to user type?

In this case, all the products mapped to the user type will be available for account opening to the users associated to that user type.

27. User Profile Maintenance

This function enables the System/Bank Administrator user to manage the user profile details that needs to be shown and needs to be made available for modification for Retail users. Details maintained on user profile includes date of birth, PAN card number, Aadhar number, passport number, national ID, driving license, communication address, email ID, and contact number, fax number, etc.

In a multi entity scenario, Administrator can do this setup for each entity by selecting the entity.

Note: For the business users to be able to modify the 'My Profile' fields, the modification of those fields should be allowed in FCUBS or in the backend Host System.

FCUBS has a separate maintenance for allowing modification of user's details, please make sure that modification of the required user details in enabled (if the FCUBS is configured as a backend system).

Pre-requisites

- User must have a valid Login credentials
- Transaction access is provided to system administrator.
- Approval rule set up for Bank administrator to perform the actions.

Workflow

Features supported in application

The administrator can perform the following actions:

- View User Profile
- Edit User Profile

How to reach here:

System/ Bank Administrator Dashboard > Configuration > User Profile Maintenance

27.1 User Profile - View

This screen displays the setup done for user profile maintenance done for user type -Retail

To view user profile details:

1. Navigate to the **User Profile Maintenance** screen, the user profile maintained for the user appears.

User Profile Maintenance- View

The screenshot displays the 'User Profile Maintenance' interface for a user named Leo Thomas. The interface includes a header with the bank logo and user information, and a main content area with the following sections:

- Details to be displayed on User Profile:** A grid of input fields for Personal Information (Adhaar Card Number, Driving License, Passport, Pan Card Number) and Contact Information (Fax Number, Contact Number(Mobile), Communication Address, Email ID, Contact ISD Number(Mobile)).
- User Details:** A table with columns for field names and 'Modification Allowed' (toggle switches).

User Details	Modification Allowed
Fax Number	<input type="checkbox"/>
Contact Number(Mobile)	<input type="checkbox"/>
Communication Address	<input type="checkbox"/>
Email ID	<input type="checkbox"/>
Contact ISD Number(Mobile)	<input type="checkbox"/>
Adhaar Card Number	<input type="checkbox"/>
Driving License	<input type="checkbox"/>
Passport	<input type="checkbox"/>
Pan Card Number	<input type="checkbox"/>

At the bottom left, there are 'Edit' and 'Cancel' buttons. The footer contains the copyright notice: 'Copyright © 2006, 2020, Oracle and/or its affiliates. All rights reserved. | Security Information | Terms and Conditions'.

OR
Click **Edit** to modify the user profile details.
6. The success message of user profile maintenance completed successfully appears along with the transaction reference number and status.

FAQ

1. Can this maintenance be done for Corporate and Admin users as well?

No, this maintenance can only be done for Retail users.

2. Can the System/bank administrator select any value from the personal /contact information field and the same will start appearing on the business user's profile screen?

Yes, the values selected by Bank administrator will be displayed to business user in his/her profile, provided those fields are supported by host system.

28. Payee Restriction Setup

Bank customers add payees or beneficiaries to transfer funds from one account to another. Bank can limit the number of payees that can be added by the retail user in a day.

Payee Restriction set up maintenance allows the System Administrator to restrict the number of payees that a retail user can create for each payment network per day.

System Administrator can also restrict the total number of payees irrespective of payment network that the retail user can create per day.

Payee restriction setup can be done for a User type and also for a User type and Segment combination.

Prerequisites:

- Transaction access is provided to System Administrator
- Approval rule set up for System Administrator to perform the actions

Workflow

Features supported in Application

Payee Restriction Setup maintenance is created only once at the 'Day 1' configuration by the System Administrator. However it can later be viewed and modified.

This option allows an administrator to:

- Create Payee Restriction Maintenance
- View Existing Maintenance
- Edit Maintenance

How to reach here:

System Administrator Dashboard > Payments > Payee Restrictions

OR

System/ Bank Administrator Dashboard > Toggle Menu > Payments > Payee Restrictions

28.1 Payee Restriction Setup - View

Using this option, administrator can search for particular payee restriction set up based on different search parameters. The search results displays a payee restriction set up based on search filters selected.

System displays the payee restriction set up for the search criteria entered. When System Administrator user is accessing Payee Restriction Set-up for the very first time, the limit set up for payment network type is defaulted to 'No'.

To view payee restriction setup:

1. From the **User Type** list, select the appropriate user whose payee restriction setup to be viewed.
2. From the **User Segment** list, select the appropriate name of segment whose payee restriction setup to be viewed.
3. Click **View**. The **Payee Restriction Setup** screen with payee restriction setup appears.
OR
Click **Cancel** to cancel the process.

Payee Restriction Setup

Field Description

Field Name	Description
User Type	Select the user type for which payee restriction setup details needs to be searched.

Field Name Description

User Segment Select the name of segment or which payee restriction setup details needs to be searched.

Payee Restriction Setup

The screenshot displays the 'Payee Restriction Setup' page for a retail user. The page is divided into several sections for configuring restrictions:

- User Type:** retailuser
- User Segment:** SegmentL
- Cumulative Payee Restriction:** A toggle set to 'Yes'. The 'Total number of Payees permitted per day' is set to 30.
- Internal Payment:**
 - Account Payee:** A toggle set to 'Yes'.
- Domestic Payment:**
 - Account Payee:** A toggle set to 'Yes'.
 - Payee Restriction:** A toggle set to 'Yes'. The 'Payees per day' limit is 40.
 - Draft Payee:** A toggle set to 'Yes'. The 'Payees per day' limit is 40.
- International Payment:**
 - Account Payee:** A toggle set to 'Yes'. The 'Payees per day' limit is 0.
 - Draft Payee:** A toggle set to 'Yes'.

At the bottom left, there are 'Edit' and 'Cancel' buttons. On the right side, a callout box titled 'Maintain Payee Restrictions' provides instructions: 'Define restrictions on the number of payees that can be added by retail users on a daily basis. This feature enables you to define a daily cumulative payee creation limit that will be applicable across all transactions as well as individual payee creation limits per transaction. Once defined, you can view and edit this maintenance as required.'

Field Description

Field Name Description

User Type The user type for which payee restriction setup is done.

User Segment The user segment for which payee restriction setup is done.

Field Name	Description
Cumulative Payee Restriction	Whether the cumulative payee restriction is enabled or not.
Total number of Payees permitted per day	Displays the total number of payees that are permitted, if the cumulative payee restriction is enabled.
Internal Payment	
Account Payee - Payee Restriction	Whether the account payee restriction is enabled or not, for internal payment.
Payees Per Day	Displays the total number of payees that are permitted, if the account payee restriction for internal payment is enabled.
Domestic Payment	
Account Payee - Payee Restriction	Whether the account payee restriction is enabled or not, for domestic payment. For India region this will be applicable for all the payments falling under domestic type of payment (NEFT, RTGS and IMPS).
Payees Per day	Displays the total number of payees that are permitted, if the account payee restriction for internal payment is enabled.
Draft Payee - Payee Restriction	Whether the account payee restriction is enabled or not, for a domestic draft payment.
Payees Per Day	Displays the total number of payees that are permitted, if the account payee restriction for internal payment is enabled.
International Payment	
Account Payee - Payee Restriction	Whether the account payee restriction is enabled or not, for international payment.
Payees Per Day	Displays the total number of payees that are permitted, if the account payee restriction for international payment is enabled.
Draft Payee - Payee Restriction	Whether the account payee restriction is enabled or not, for international draft payment.

Field Name	Description
Payees Per Day	Displays the total number of payees that are permitted, if the account payee restriction for international draft payment is enabled.

4. Click **Edit** to edit the payee restriction set up.
The **Payee Restriction Set-up-Edit** screen with values in editable form appears.
OR
Click **Cancel** to cancel the operation and navigate back to 'Dashboard'.

28.2 Payee Restriction Setup - Edit

System Administrator can modify existing payee restriction maintenance.

Using this option, System Administrator can edit the payee restriction option for a specific payment network. Also an edit is permitted on number of payees per payment network and for cumulative combined limit irrespective of payment network.

To edit a payee restriction setup:

1. Click **Edit**. The **Payee Restriction Setup - Edit** screen appears.

9. Click **OK** to complete the transaction and navigate back to 'Dashboard'.

FAQ

1. **Will edited maintenance be applicable from immediate effect?**

No, edited maintenance will be applicable from next calendar date.

2. **What happens if the user's cumulative payee limit for a day is fully utilized but network for which he is creating a payee is available?**

System will first check the availability of cumulative payee limit. If available, will check network level payee availability limit. If both the conditions are met, user is allowed to create a payee.

3. **Is this maintenance is also applicable for corporate type of users?**

No, currently this maintenance is applicable only to Retail Users.

29. Forex Deal Maintenance

Using this option System Administrator can maintain currency pair. The maintained currency pairs are made available to corporate users to book deals and utilize those while making payments.

Features supported in application

Using this option System Administrator can perform the following actions:

- Maintain currency Pair

How to reach here:

System Administrator Dashboard > Payments> Forex Deal Maintenance

OR

System/ Bank Administrator Dashboard > Toggle Menu > Payments> Forex Deal Maintenance

29.1 Add Currency Pairs

Using this option System Administrator can define currency pairs.

To add currency pair:

1. From the **Currency Pair** list, select the appropriate currency pair.
2. Click **Add** to add the currency pair.

Forex Deal Maintenance - Create

The screenshot displays the 'Forex Deal Maintenance' interface. At the top, there is a navigation bar with 'System Administrator', 'ATM/Branch', 'English', and 'UBS 14.9 AT3 Branch'. Below this is the 'futura bank' logo and a user profile for 'Welcome, Sweta Thakur' with a last login time of '29 Apr 10:38 AM'. The main content area is titled 'Forex Deal Maintenance' and contains the following elements:

- Add Currency Pair Details:** A dropdown menu for 'Currency Pair' with the text 'Please Select' and a downward arrow. Below it is a blue 'Add' button.
- Selected Currency Pairs:** A table with two columns: 'Currency Pair' and 'Action'. The table contains one entry: 'GBP-AUD' with a trash icon in the 'Action' column. Below the table is a pagination control showing 'Page 1 of 1 (1 of 1 items)' and navigation arrows.
- Buttons:** 'Save' and 'Cancel' buttons are located at the bottom left of the form area.
- Note:** A callout box on the right contains a note icon and the following text: 'Admin user can choose the currency pair out of the suggested options. The maintained currency pairs will be available for users to book deals and utilize those while making payments. Based on the type of treasury system, timer can also be set for each currency pair.' Below the note is an 'Edit Active Pairs' button.

30. Biller Category Maintenance

Using this function System Administrator can create new biller categories and can upload an image (image file type allowed SVG & PNG only) for that biller, which will appear as icon for these categories. These categories are mapped to billers when system administrator is creating billers. E.g. administrator can create biller category as 'Insurance' and link this Biller Category when creating Insurance billers like 'United Healthcare' and 'Healthspring' and 'WellCare Health Plans'.

The System administrators can change the order of the categories as per their priority by dragging the categories. In the Biller Category drop-down these categories appear in the same order for selection to the customers, as defined by the administrators.

Pre-Requisites

- Transaction access is provided to System Administrator.
- Approval rule set up for System Administrator to perform the actions.

Workflow

Features Supported In Application

This option allows the System Administrator to:

- Manage Biller Category
- Add Biller Category
- Edit Biller Mapping Category
- Delete Biller Category

How to reach here:

System Administrator Dashboard > Payments > Biller Category Maintenance

OR

System/ Bank Administrator Dashboard > Toggle Menu > Payments > Biller Category Maintenance

30.1 Biller Category Maintenance - Summary

Biller Category Maintenance screen displays a list of all the billers along with the biller icon and number of billers mapped to the selected biller category.

Biller Category Maintenance - Summary

Biller Icon	Biller Category	Mapped Billers			
	Water	0			
	BroadBank	0			
	Cable	0			
	LIC	0			

[Add Category](#)

[Back](#)

Create and Maintain Category

[Add Category](#)

Create new categories and map billers here. When creating new billers of bill payment, if you cannot find the ideal category to map then new categories can be created here.

Category Icon

An icon also needs to be uploaded at the time of creating a category. This icon will be displayed to customer in bill payment screens.

Update Priority

The order in which the customers see categories in Biller category drop-down will be as set here. You can re-arrange the order by selecting and dragging a category up or down

Field Description

Field Name	Description
Biller Icon	The image associated with the category. Displays the preview of the image uploaded for the category.
Biller Category	The name of the biller category.
Mapped Billers	The number of billers mapped to the category at a given point of time.

- Click the **Add Category** link to add a new biller category.
OR
Click to edit the biller category.
OR
Click to delete existing biller category.
OR
Click the **Back** to navigate to the previous screen.

30.2 Billers Category Maintenance - Add Category

Using this option, the System Administrator can add a new biller category.

To add a new biller category:

- In the **Billers Category Maintenance** screen, click the **Add Category** link to add a new biller category. The **Billers Category Maintenance** screen with a row to add new category appears.

Billers Category Maintenance - Edit Category

Field Description

Field Name	Description
Biller Icon	The image associated with the category. Displays the preview of the image uploaded for the category.
Biller Category	The name of the biller category. Category name should be unique. Category name entered here will appear as a Biller Category drop-down to the customers screens.

- Click the **Biller Icon** field, select and upload the biller image. OBDX provides a set of icons for categories out of the box. These image files have to be copied to the user's local drive before selection. Alternatively user can select his own icon images as long as they are in SVG or PNG format.
- In the **Biller Category** field, enter the name of the biller category.

8. Click .
OR
Click  to cancel the transaction.
OR
Click the **Remove** link to remove the uploaded image and upload a new biller image.
9. The success message of saving the biller category appears along with the status and reference number.
Click **OK** to complete the transaction.

30.3 Biller Category Maintenance - Edit Category

System Administrator can modify the existing biller category using this screen.

To edit a biller category:

10. In the **Biller Category Maintenance** screen, select and click  against the record for which you want to edit the biller category. The **Biller Category Maintenance** screen appears in the editable form.

Biller Category Maintenance - Edit Category

The screenshot displays the 'Biller Category Maintenance' interface. At the top, there's a navigation bar with 'System Administrator', 'ATM/Branch', 'English', and 'UBS 14.3 AT3 Branch'. Below that, the 'futura bank' logo and user information 'Welcome, Sweta Thakur' are visible. The main content area is titled 'Biller Category Maintenance' and features a table with the following data:

Biller Icon	Biller Category	Mapped Billers			
	Water	0			
	BroadBank	0			
	Cable	0			
	LIC	0			

Below the table are 'Add Category' and 'Back' buttons. On the right, a panel titled 'Create and Maintain Category' provides instructions: 'Add Category', 'Create new categories and map billers here. When creating new billers of bill payment, if you cannot find the ideal category to map then new categories can be created here.', 'Category Icon' (An icon also needs to be uploaded at the time of creating a category. This icon will be displayed to customer in bill payment screens.), and 'Update Priority' (The order in which the customers see categories in Biller category drop-down will be as set here. You can re-arrange the order by selecting and dragging a category up or down).

Copyright © 2006, 2020, Oracle and/or its affiliates. All rights reserved. | Security Information | Terms and Conditions

11. In the **Biller Icon** field, click the **Remove** link to remove the uploaded image and upload a new biller image, if required.
12. In the **Biller Category** field, edit the name of the biller category, if required.
13. Click .
OR
Click  to cancel the transaction.

14. The success message of saving the biller category appears along with the status and reference number. Click **OK** to complete the transaction.
15. Click and drag  against a record to re-arrange the biller categories, if required.

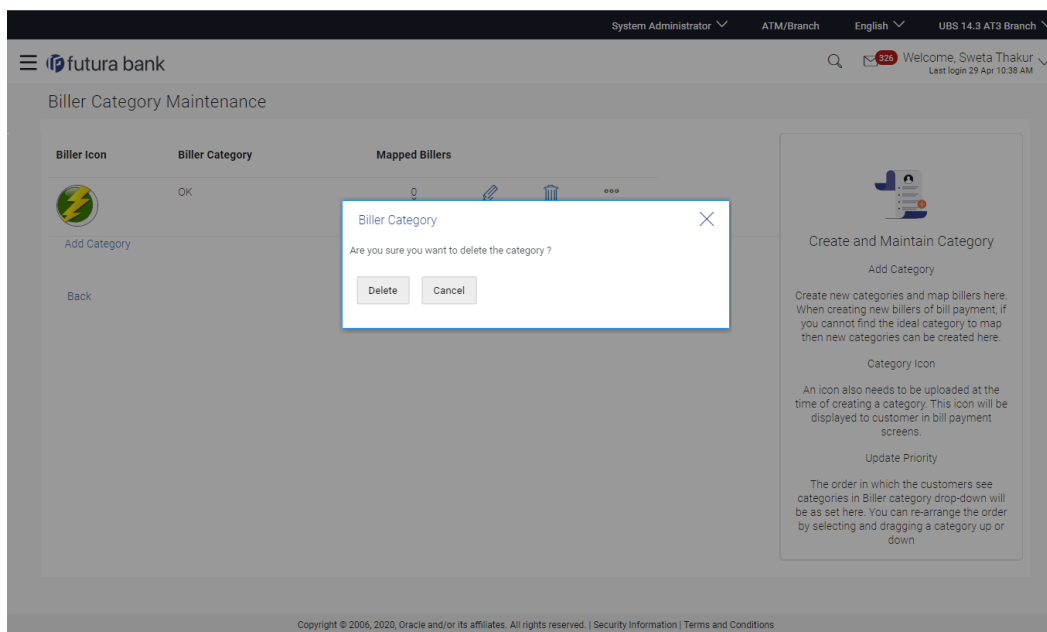

30.4 Biller Category Maintenance - Delete

Using this option the system administrator can delete a biller category. As part of this option, only those biller category can be deleted if there are no billers mapped to the existing biller category.

To delete a biller category:

16. In the **Biller Category Maintenance** screen, select and click  against the record for which you want to delete the biller category. The application prompts the administrator with a message 'Are you sure you want to delete the category' with an option of Yes / No.

Biller Category Maintenance - Delete

17. Click **Yes** to proceed with the deletion request.
It will navigate to confirmation page with a success message along with the status and reference number.
OR
Click **No** if you do not wish to proceed with deletion.
18. Click **OK** to complete the transaction.

FAQ

1. Can I link a biller to multiple biller categories?

No, one biller can be linked only to one biller category.

2. Can I delete a biller category which is having billers mapped to it?

No, biller category can only be deleted if no billers are mapped to a category.

3. Can I change the icon image associated with a category?

Yes, you can change the image as long as the new images are in PNG or SVG format.

4. If I change the order of the categories, how long does it take to come into effect in the system?

The change happens in real time (or after checker approves the change). You will start seeing the revised order of categories in all Biller Category drop-downs immediately.

31. Touch Point Maintenance

Touch points are different channels/medium through which transactions or inquiries can be performed in OBDX.

Touch points in OBDX are of type 'Internal' and 'External'.

Internal Touch points are defined as part of Day 0 definition whereas External Touch Points are typically third party applications that can be defined by the System Administrator as part of onboarding in OBDX.

Internal Touch Points defined/available as parts of OBDX system are as follows:

- Internet
- Mobile App
- Mobile Browser
- SMS
- Missed Call
- Siri/Chatbot
- Snapshot
- Wearables

External Touch Points enable the user to perform inquiries and transactions from Third Party applications provided the user has provided consent to the Third Party Application. Each Third Party application i.e. Client defined on the OAuth Server is onboarded as an External Touch Point.

As part of Touch Point Maintenance, Touch Points can be defined/created, viewed/inquired and modified by the System Administrator

Prerequisites

- Transaction Access has been provided to the System Administrator
- Approval Rules have been setup for approval of Touch Point Maintenance

Workflow

Features supported in application

The administrator can perform the following actions:

- Search/ View Touch Point
- Create Touch Point
- Edit Touch Point

How to reach here:

System Administrator Dashboard > Access Policies > Touch Points
OR

System/ Bank Administrator Dashboard > Toggle Menu > Authorization and Access Controls
> Touch Points

31.1 Touch Point Maintenance - View

Using this option, System Administrator can search and view details for specific touch point based on different search parameters like Touch Point ID or Touch Point name.

To search and view touch point:

1. In the **Touch Point Maintenance** screen, enter the search parameters and click **Search**. The **Touch Point Maintenance** screen with search results appears based on the search criteria.
OR
Click **Cancel** if you want to cancel the transaction.
OR
Click **Clear** to reset the search parameters.

Touch Point Maintenance - Search

The screenshot displays the 'Touch Point Maintenance' search interface. At the top, there are navigation tabs for 'System Administrator', 'ATM/Branch', 'English', and 'UBS 14.3 AT3 Branch'. The user is identified as 'Welcome, Sweta Thakur' with a 'Last login 29 Apr 11:19 AM' timestamp. The search criteria are: Touch Point Name 'mobile'. The search results table is as follows:

Touch Point Name and ID	Touch Point Type
Mobile (Responsive) APMOBRESP	Internal
Mobile Application APMOBAPP	Internal

Page 1 of 1 (1-2 of 2 items) | < 1 >

On the right sidebar, there is a section titled 'Create and Maintain Touch Point' with a 'Create' button. The text below the button states: 'Touch Points are different channels through which the OBDX services can be accessed. Touch Points could be internal like Internet, Mobile, SMS etc and it could also be third party applications i.e. vendor/partners accessing application resources provided OBDX user has given consent to the third party.'

Copyright © 2006, 2020, Oracle and/or its affiliates. All rights reserved. | Security Information | Terms and Conditions

Field Description

Field Name	Description
Touch Point ID	Specify the touch point ID to search a specific Touch point by ID.
Touch Point Name	Specify the touch point name to search a Touch point by name.
Search Results	
Touch Point Name and ID	Displays the touch point name and unique ID defined for a Touch point.
Touch Point Type	Displays the touch point type i.e. internal/ external against the Touch points.

- Click the **Touch Point Name and ID** link to view details of the touch point. The **Touch Point Maintenance - View** screen appears.

Touch Point Maintenance - View

The screenshot displays the 'Touch Point Maintenance - View' interface. At the top, the navigation bar includes 'System Administrator', 'ATM/Branch', 'English', and 'UBS 14.3 AT3 Branch'. The user is identified as 'Welcome, Sweta Thakur' with a last login of '29 Apr 11:19 AM'. The main content area is titled 'Touch Point Maintenance' and shows the following details:

- Touch Point Id:** APMOBRESP
- Touch Point Name:** Mobile (Responsive)
- Touch Point Type:** Radio buttons for INTERNAL and EXTERNAL.
- Touch Point Status:** Toggle switch (ON).
- Headless Mode:** Toggle switch (ON).
- Two Factor Authentication:** Toggle switch (ON).
- Default Available:** Toggle switch (ON).
- Self On Board Touch Points:** Toggle switch (ON).
- Skip First Time Login Flow:** Toggle switch (ON).

At the bottom left, there are buttons for 'Edit', 'Cancel', and 'Back'. On the right side, a sidebar titled 'Create and Maintain Touch Point' contains an icon of a mobile phone and a text box explaining that touch points are channels for OBDX services, which can be internal (like internet, mobile, SMS) or third-party applications.

Copyright © 2006, 2020, Oracle and/or its affiliates. All rights reserved. | Security Information | Terms and Conditions

Field Description

Field Name	Description
Touch Point ID	Unique ID defined for the Touch Point. For Open Id flow in Open Banking, this should always be same as the Client ID.
Touch Point Name	Name of the touch point.
Touch Point Type	Type of touch point i.e. whether touch point is of type internal or external.
Client ID	Client ID of the touch point if touch point is of type internal or external.
Scope	The applicable scope(s) defined for touch point in case of type External .
Upload Logo	The logo of the Third Party. This field is displayed if the Touch Point Type is External .
Touch Point Status	Status of the Touch Point i.e. whether it is Inactive or Active. If touch point is marked as Inactive, then the system will not honor the request i.e. transaction or inquiry is initiated from that touch point.
Headless Mode	Mode in which the touch point operates i.e. headless mode enabled / disabled. If headless mode is enabled, it means the touch point is capable of working without user interface and session parameters <hr/> Note: By default, the mode is in disabled state. <hr/>
Two Factor Authentication	Two Factor Authentication enabled / disabled for the touch point.
Default Available	Touch point default available to users. If enabled, then the user gets access to touch points which are default available.
Self On Board Touch Points	Whether the user can self on board himself on the touch point or by bank administrator.
Skip First Time Login Flow	Displays if Skip First Time Login Flow option is checked by the user. If this option is enabled for the selected touch point, user will not be shown the first time login steps (configured in system rule), when he/she logs in for the first time.
Consent Required	To decide if Consent definition and validation is required for a Touch Point i.e. TPPs. For UK Open Banking, it should always be defined as 'Y'.

3. Click **Edit** to modify touch point details.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Back** to navigate back to previous screen.

31.2 Touch Point Maintenance - Edit

Using this option, System Administrator can modify the details of a touch point

To modify touch point details:

1. In the **Touch Point Maintenance** screen, enter the search parameters and click **Search**.
The **Touch Point Maintenance** screen with search results appears based on the search criteria.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Clear** to reset the search parameters.
2. Click the **Touch Point Name and ID** link to view details of the touch point. The **Touch Point Maintenance - View** screen appears.
3. Click **Edit** to modify the touch point details.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Back** to navigate back to previous screen.

Touch Point Maintenance - Edit

The screenshot displays the 'Touch Point Maintenance' configuration page. The top navigation bar includes 'System Administrator', 'ATM/Branch', 'English', and 'UBS 14.3 AT3 Branch'. The user is identified as 'Welcome, Sweta Thakur' with a last login time of '29 Apr 11:19 AM'. The main form contains the following fields and controls:

- Touch Point Id:** A text input field containing 'APMOBRESP'.
- Touch Point Name:** A text input field containing 'Mobile (Responsive)'.
- Touch Point Type:** Radio buttons for 'INTERNAL' (selected) and 'EXTERNAL'.
- Client Id:** A text input field.
- Touch Point Status:** A toggle switch that is currently turned on.
- Headless Mode:** A toggle switch that is currently turned off.
- Two Factor Authentication:** A toggle switch that is currently turned on.
- Default Available:** A toggle switch that is currently turned on.
- Self On Board Touch Points:** A toggle switch that is currently turned off.
- Skip First Time Login Flow:** A toggle switch that is currently turned off.

At the bottom of the form are 'Save', 'Cancel', and 'Back' buttons. A sidebar on the right titled 'Create and Maintain Touch Point' provides a brief explanation of touch points and their access channels.

Field Description

Field Name	Description
Touch Point ID	Displays the Unique ID for the Touch Point and cannot be modified.
Touch Point Name	Displays the name of the touch point. The same can be modified.
Touch Point Type	Displays the type of touch point i.e. whether touch point is of type internal or external. The same can be modified
Client ID	Displays the Client ID of the touch point if touch point is of type External. The same can be modified. This field is mandatory for External type of touch point.
Scope	Displays the applicable scope(s) defined for touch point in case of type External. The same can be modified i.e. new scopes can be added and/or existing can be removed.
Upload Logo	The logo of the Third Party. This field is displayed if the Touch Point Type is External .
Touch Point Status	Displays the status of touch point. The same can be modified to enable to an active state or disable to make it inactive.

Field Name	Description
Headless Mode	Displays the mode in which the touch point operates i.e. headless mode enabled / disabled. The same can be modified to enable/disable the mode
Two Factor Authentication	Displays if Two Factor Authentication is enabled/disabled for the touch point. The same can be modified.
Default Available	Displays if Touch point is available to users by default. If enabled, then the user gets access to touch points which are default available.
Self On Board Touch Points	Displays if Touch point can be on boarded by the user. The same can be modified.
Skip First Time Login Flow	Displays if Skip First Time Login Flow option is checked by the user. If this option is enabled for the selected touch point, user will not be shown the first time login steps (configured in system rule), when he/she logs in for the first time. The same can be modified.
Consent Required	To decide if Consent definition and validation is required for a Touch Point i.e. TPPs. For UK Open Banking, it should always be defined as 'Y'. The same can be modified.

4. Modify the required details, e.g. Touch Point Name, Touch Point Type, Client ID, Scope, Logo, Touch Point Status, Headless Mode, Two Factor Authentication, Default Available and Self On board Touch Points.
5. Click **Save** to save the touch point details.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Back** to navigate back to previous screen.
6. The **Review** screen appears. Verify the details, and click **Confirm**.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Back** to navigate back to previous screen.
7. The success message of Touch Point Maintenance saved successfully appears along with the transaction reference number.
Click **OK** to complete the transaction.

31.3 Touch Point Maintenance - Create

Using this option, System Administrator can create new touch point of type Internal or External

To create a touch point:

1. In the **Touch Point Maintenance** screen, click **Create**. The **Touch Point Maintenance - Create** screen appears.

Touch Point Maintenance - Create

The screenshot displays the 'Touch Point Maintenance - Create' interface. The top navigation bar includes 'System Administrator', 'ATM/Branch', 'English', and 'UBS 14.3 AT3 Branch'. The user is identified as 'Welcome, Sweta Thakur' with a 'Last login 29 Apr 11:19 AM' timestamp. The main form contains the following fields and controls:

- Touch Point id:** 110001
- Touch Point Name:** Mobile
- Touch Point Type:** Radio buttons for INTERNAL and EXTERNAL (EXTERNAL is selected).
- Client id:** EXT1123
- Scope:** Account Balance Inquiry (with a close icon 'x')
- Upload Logo:** A small icon representing a logo.
- Touch Point Status:** Toggle switch (ON).
- Headless Mode:** Toggle switch (OFF).
- Two Factor Authentication:** Toggle switch (ON).
- Self On Board Touch Points:** Toggle switch (OFF).
- Skip First Time Login Flow:** Toggle switch (OFF).
- Consent Required:** Toggle switch (ON).

At the bottom left, there are 'Save', 'Cancel', and 'Back' buttons. On the right side, a box titled 'Create and Maintain Touch Point' contains a diagram and text explaining that touch points are channels for OBDX services, which can be internal (Internet, Mobile, SMS) or third-party applications. It notes that OBDX user consent is required for third-party access.

Field Description

Field Name	Description
Touch Point ID	Specify the unique ID for the Touch Point. For Open Id flow in Open Banking, this should always be same as the Client ID.
Touch Point Name	Specify the name for the Touch Point.
Touch Point Type	Select the type of Touch point type i.e. whether the type is Internal or External
Client ID	Specify the Client ID for the touch point. This field is mandatory for External Type of Touch point.
Scope	Specify the applicable scope(s) for the touch point. This field is enabled, if you select External option in the Touch Point Type field.

Field Name	Description
Upload Logo	Upload logo of the Third Party Provider through browse and upload image option. This field is enabled, if you select External option in the Touch Point Type field.
Touch Point Status	Select the status for the touch point i.e. whether it is active/inactive.
Headless Mode	Select the mode in which the touch point operates i.e. whether headless mode is to be enabled for a touch point. <hr/> Note: By default this mode is in disabled state. <hr/>
Two Factor Authentication	Select if Two Factor Authentication is required for a touch point.
Default Available	Select if Touch point is to be default made available to users. If enabled, then the user gets access to touch points which are default available
Self On Board Touch Points	Select if user will self on board himself on the touch point or by the bank administrator. If the bank administrator on boards the user on a touch point, then the same needs to be disabled.
Skip First Time Login Flow	Select if user wants to skip the first time login flow for a touch point. If this option is enabled for the selected touch point, user will not be shown the first time login steps (configured in system rule), when he/she logs in for the first time.
Consent Required	Select if user wants Consent definition and validation is required for a Touch Point i.e. TPPs. For UK Open Banking, it should always be defined as 'Y'.

2. In the **Touch Point ID** field, enter the unique ID for the touch point.
3. In the **Touch Point Name** field, enter the name for touch point.
4. In the **Touch Point Type** field, select the appropriate option i.e. Internal or External.
5. In the Client ID field, enter the client ID
 - a. If you select **External**;
 - i. Click **Scope**; select the appropriate scope from the drop-down.
 - ii. Click on upload icon to upload a logo for the external type of touch point.
6. Click the **Touch Point Status** toggle to enable it to mark the touch point 'Active'.
7. Click the **Headless Mode** toggle to enable the touch point in headless mode.
8. Click the **Two Factor Authentication** toggle to enable 2FA for a touch point.

9. Click the **Default Available** toggle to make the touch point available to users by default in case of self-onboarding.
10. Click the **Self On board Touch Point** toggle if the user will self-onboard himself on the touch point and not by bank administrator.
11. Click the **Skip First Time Login Flow** toggle if the user wants to skip it for touch point.
12. Click **Save** to save the Touch Point details.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Back** to navigate back to previous screen.
13. The **Review** screen appears. Verify the details, and click **Confirm**.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Back** to navigate back to previous screen.
14. The success message of touch point creation successfully appears along with the transaction reference number.
Click **OK** to complete the transaction.

[Home](#)

32. Touch Point Group Maintenance

Touch points are different channels e.g. Internet, Mobile, SMS, Third Party applications etc. through which the OBDX services can be accessed. This maintenance enables the System Administrator user to group two or multiple touch points together for the purpose of defining common limits for a transaction accessed from any Touch point grouped together.

Further this maintenance facilitates user to view and modify the touch point groups.

Prerequisites

- Transaction access is provided to system administrator.
- Approval rule set up for system administrator to perform the actions.
- Multiple touch points are maintained.

Workflow

Features supported in application

The administrator can perform the following actions:

- Create Touch Point Groups
- Search/ View Touch Point Groups
- Edit Touch Point Groups

How to reach here:

System Administrator Dashboard > Access Policies > Touch Point Groups
OR

System/ Bank Administrator Dashboard > Toggle Menu > Authorization and Access Controls > Touch Point Groups

32.1 Touch Point Group Maintenance - View

Using this option, System Administrator can search and view details for particular touch point groups based on different search parameters like group code and/or group description.

To search and view touch point group:

1. In the **Touch Point Group Maintenance** screen, enter the search parameters and click **Search**.

The **Touch Point Group Maintenance** screen with search results appears based on the search criteria.
 OR
 Click **Cancel** to cancel the search process.
 OR
 Click **Clear** to reset the search parameters.

Touch Point Group Maintenance - Search

Field Description

Field Name	Description
Group Code	Search the touch point groups with group code.
Group Description	Search the touch point groups with group description.
Search Results	
Group Code	Displays the group code defined for Touch Point Groups.
Group Description	Displays the group description defined for Touch Point Group.
No of Touch Points	Displays the number of touch points associated with the touch point groups.

2. Click the **Group Code** link to view the touch point group details. The **Touch Point Group Maintenance - View** screen appears.

Touch Point Group Maintenance - View

Field Description

Field Name	Description
Group Code	Group code defined for touch point group.
Group Description	Group description defined for touch point groups.
Touch Point Group Type	Type of touch point group i.e. whether touch point group type is internal or external.
Internal Touch Points	Displays internal touch points which are part of touch point group in disable mode.
External Touch Points	Displays external touch points which are part of touch point group in disable mode.

3. Click **Edit** to add or remove the touch points from the touch point group.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Back** to navigate back to previous screen.

32.2 Touch Point Group Maintenance - Edit

Using this option, System Administrator can add or remove the touch points from the touch point group. Clubbing of touch points as a part of multiple groups is not allowed. Touch points already grouped as a part of other groups will not be available for selection.

To modify touch point group:

1. In the **Touch Point Group Maintenance** screen, enter the search parameters and click **Search**.
The **Touch Point Group Maintenance** screen with search results appears based on the search criteria.
OR
Click **Cancel** to cancel the search process.
OR
Click **Clear** to reset the search parameters.
2. Click the **Group Code** link to view the touch point group details. The **Touch Point Group Maintenance - View** screen appears.
3. Click **Edit** the **Touch Point Group Maintenance - Edit** screen appears.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Back** to navigate back to previous screen.

Touch Point Group Maintenance - Edit

Field Description

Field Name	Description
Group Code	Group code defined for touch point group.
Group Description	Group description defined for touch point groups.
Touch Point Group Type	Displays the type of touch point group i.e. whether touch point group is of type internal or external. The same can be modified.
Touch Points	

Field Name	Description
Internal Touch Points	<p>Displays all the internal touch points. Touch points which are the part of a group will be shown as pre-selected.</p> <hr/> <p>Note:</p> <p>1) User can de-select a pre-selected internal touch points which are already part of the group.</p> <p>2) Other Internal touch points which are not part of any other group will be listed for selection.</p> <p>3) The touch points which are already a part of one of the groups will be shown in disable mode. (one Touch point can be part of on group only)</p> <hr/>
External Touch Points	<p>Displays all the external touch points. Touch points which are the part of a group will be shown as pre-selected.</p> <hr/> <p>Note:</p> <p>1) User can de-select an external touch points which are already part of a group will be shown as pre-selected.</p> <p>2) Other external touch points which are not part of any other group will be listed for selection.</p> <p>3) The touch points which are already a part of one of the group will be shown in disable mode.</p> <hr/>

4. Modify the required details, e.g. Group Description, Internal / External Touch Points.
5. Click **Save** to save the touch point group details.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Back** to navigate back to previous screen.
6. The **Review** screen appears. Verify the details, and click **Confirm**.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Back** to navigate back to previous screen.
7. The success message of Touch Point Group Maintenance saved successfully appears along with the transaction reference number.
Click **OK** to complete the transaction.

32.3 Touch Point Group Maintenance - Create

Using this option, System Administrator can create a new touch point group and add touch points to a group.

Note: System Administrator cannot club one touch point as part of multiple groups. While creating group, touch points which are already part of a group will not be available for selection.

To create a touch point group:

1. In the **Touch Point Group Maintenance** screen, click **Create**. The **Touch Point Group Maintenance - Create** screen appears.

Touch Point Group Maintenance - Create

Field Description

Field Name	Description
Group Code	Unique group code defined for touch point group.
Group Description	Touch point group description defined for touch point groups.
Touch Point Group Type	Select the type of Touch point group type i.e. whether the type is Internal or External.
Touch Points	
Internal Touch Points	Displays all the internal touch points maintained.
	<hr/> <p>Note: 1) Internal touch points which are not part of any other group will be listed for selection. 2) Touch points which are already a part of any other group will be shown in disabled mode.</p> <hr/>
External Touch Points	Displays all the external touch points maintained.
	<hr/> <p>Note: 1) External touch points which are not part of any other group will be listed for selection. 2) Touch points which are already a part of any other group will be shown in disabled mode.</p> <hr/>

2. In the **Group Code** field, enter the unique group code for touch point group.
3. In the **Group Description** field, enter the touch point group description.
4. In the **Touch Points** field, select the checkbox against the Internal / External Touch Points.

Note: To select all available Internal / External Touch Points in one instance, select the checkbox adjacent to Internal / External Touch Points.

5. Click **Save** to save the Touch point group details.
 OR
 Click **Cancel** to cancel the transaction.
 OR
 Click **Back** to navigate back to previous screen.
6. The **Review** screen appears. Verify the details, and click **Confirm**.
 OR
 Click **Cancel** to cancel the transaction.
 OR
 Click **Back** to navigate back to previous screen.

7. The success message of Touch Point Group Maintenance saved successfully appears along with the transaction reference number.

FAQ

1. **From where can I get the list of touch points which I can club together?**

Internal and external touch points maintained by the System Administrator using 'Touch Point Maintenance' will be listed for group creation.

2. **Can I club internal and external touch points together in one group?**

No, clubbing of internal and external touch points together in one group is not allowed.

3. **Can I club one touch point as a part of multiple groups?**

No, one touch point can be a part of only one group.

4. **Where can I use these touch point groups?**

You can create a transaction limit package using 'Limit Package Management' for touch point group.

[Home](#)

33. Role transaction Mapping

OBDX application has many roles for different type of users defined under different user types i.e. Retail, Corporate, and Admin. These roles are defined for internal as well as for external touch points.

Application roles mapped to Internal Touch Points (Internet, Mobile Application, SIRI, Chatbot, etc.) are used by OBDX itself, whereas Application roles mapped to External Touch Points are defined for being used by third party system. Each External role is mapped to a scope (defined in Identity Management System) and the same scopes are mapped to External Touch Points in **Touch Point Maintenance** screen.

For Internal Touch Points, a user can perform only those transactions which are mapped to the application role assigned to that user. Whereas for External Touch Points, third party system can only perform only those transactions (on behalf of the user), which are mapped to the application role, mapped to the scope assigned to that external touch point (third party system).

Using this option the system administrator can define an Application role. Application Roles are mapped to Entitlements for various Touch Points, so that System Administrator can decide which all transactions should be available for which touch points.

Apart from the transactions, OBDX widgets are also available as entitlement and can be mapped to the application roles.

System displays only those menu options widgets and dashboard which are mapped to the application role assigned to the logged in user. For e.g. If a user with application role 'Retail' does not have access to transactions widgets & dashboard related to Wealth Management module, then those transactions, widgets and dashboard will not be shown on the UI to user.

Note: The users can have access only to those transactions, dashboards and widget which are mapped to the role associated to the him/her.

Pre-Requisites

- Transaction access is provided to System Administrator.
- Approval rule set up for System Administrator to perform the actions.

Workflow

Features supported in application

Using this option System Administrator can perform the following actions:

- Create Application Roles
- View Application Roles
- Edit Application Roles
- Delete Application Roles

How to reach here:

System Administrator Dashboard > Authorization and Access Controls > Role Transaction Mapping

OR

System/ Bank Administrator Dashboard > Toggle Menu > Authorization and Access Controls > Role Transaction Mapping

33.1 Search Application Role

Using this option, System Administrator can search application roles based on the search criteria. By default all the application roles will be displayed on this screen, Administrator can filter the list by entering the values in search criteria.

To search application role/ application roles:

1. In the **User Type** field, select the user type.
2. In the **Application Role Name** field, enter the name of the application role.
3. Click **Search**.
The search result based on search criteria displayed in **Application Role Details** section.
OR
Click **Clear** to reset the search parameters.
OR
Click **Cancel** to cancel the search process and to go back to dashboard.

Search Application Roles - Search Results

The screenshot shows the 'Role Transaction Mapping' interface. At the top, there's a navigation bar with 'System Administrator', 'ATM/Branch', 'English', and 'URS 14.3 AT3 Branch'. Below that, the 'futura bank' logo and user information 'Welcome, Sweta Thakur' are visible. The main content area is titled 'Role Transaction Mapping' and features a search filter for 'User Type' set to 'All'. A search bar for 'Application Role Name' is present with 'Search', 'Cancel', and 'Clear' buttons. The 'Application Role Details' section has two tabs: 'Internal' (selected) and 'External'. The table below lists roles and their display names:

Internal	External
Administrator	
user_main_admin	user maintenance admin
role	description
AdminMaker	AdminMakerDisplayName
AdminChecker	AdminCheckerDisplayName
AuthAdmin	AuthAdminDisplayName
AuditAdmin	AuditDisplayName
usermaker	usermakes
Corporate	
NonCustomerChecker	NonCustomerCheckerDisplayName
NonCustomerMaker	NonCustomerMakerDisplayName
NonCustomerViewer	NonCustomerViewerDisplayName
CorporateAdminChecker	CorporateAdminCheckerDisplayName
Checker	CheckerDisplayName
Viewer	ViewerDisplayName
CorporateAdminMaker	CorporateAdminMakerDisplayName
Maker	MakerDisplayName
Retail	
Customer	CustomerDisplayName
Member	MemberDisplayName
testret	testret
Wallet	Wallet

A 'Note' box on the right states: 'An Application may have several Application Roles for different type of users under different User Segments i.e. Retail, Corporate and Admin. These roles can be defined for internal as well as for external Touch Points and various transactions needs to be mapped to it. Click below to create an Application Role and map it to various transactions for selected Touch Points.' A 'Create' button is located below the note.

Field Description

Field Name	Description
User Type	User type for which the application role is created. Retail, Corporate and Administrator are three types available in the application.
Application Role Name	Name of the application role.

Application Role Details

Application roles can be views based on Touch Point Type-Internal and External in different tabs. Application roles are grouped and displayed User Segment wise.

Field Name **Description**

User Type Name of the User Type.

Application Role Name Name of the application role.

Application Role Description Description of the application role.

4. Click on the **Application Role Name** to view the details. **Role Transaction Mapping - View** screen appears.

Role Transaction Mapping - View

Field Description

Field Name	Description
Application Role View	
Application Role Name	Name of the application role.
Description	Description of the application role.
User Type	User type for which the application role is created.
Touch Point Type	Type of Touch Point.
User Segment	Segment of the user for which the application role is created. This is applicable only for Retail user type and Internal touch point type.
Map Transactions	
Module Name	Name of the module for which role transaction mapping is done.
Map Transactions to Touch Points	Touch points for which the transaction mapping is done for application role.
Transactions	Displays all the transactions for the selected module which are mapped to the application role for the selected touch points. Transactions are grouped under Transaction Categories and Module.
Type of Action	Name of the action that can be performed for that transaction by the user to which this application role is assigned. <ul style="list-style-type: none"> • Perform- This action lets the user to perform or initiate that transaction and should be given to maker role. • Approve- This action lets the user to approve that transaction and should be given to approver role • View- This action lets the user to view the initiated and approved transactions by other users and should be given to viewer role.

5. Click  against the particular category to view the transaction mapping details.

6. Click  to modify the transaction role mapping. The **Role Transaction Mapping** screen appears in editable form.
OR
Click **Delete** To delete the application role along with the transaction mapping. (Deletion of any role is only allowed if there are no users attached to that role)
OR
Click **Back** to navigate back to previous screen.
OR
Click **Cancel** to cancel the search process and to go back to dashboard.

33.2 Edit Application Role

Using this option System Administrator can edit or update the details of an existing role transaction mapping.

To modify role transaction mapping:

1. Repeat step 1 to 4 of **Search Application Role** section.
2. Click  against the **Map Transactions**.
Screen in editable mode appears.

Role Transaction Mapping - Edit

The screenshot displays the 'Role Transaction Mapping - Edit' interface. At the top, the user is identified as 'System Administrator' at 'ATM/Branch' in 'English' at 'UBS 14.3 AT3 Branch'. The user's name 'Sweta Thakur' and last login time '29 Apr 01:24 PM' are also visible.

The main form contains the following fields:

- Application Role Name: Checker
- Description: CheckerDisplayName
- User Type: CorporateUser
- Touch Point Type: INTERNAL

The 'Map Transactions' section features a list of modules with checkboxes for selection:

- Loan x
- Process Management x
- Pre-Login Transactions x
- Liquidity Management x
- Transfers x
- File Upload x
- Forex x
- Electronic Bill Payment x
- Open Banking x
- Virtual Account Management x
- Mobile App Maintenance x
- Associated Party x
- Supply Chain Finance x
- Widget x
- Credit Facility x
- Essentials x
- Cash Management x
- Customer Servicing x
- Term Deposit x
- Trade Finance x
- Payments x
- Current Account Savings Account x
- Invoice Management x
- Reports x
- Dashboards x

Below the module list, there are checkboxes for 'Map Transactions to Touch Points':

- Mobile Application
- Mobile (Responsive)
- Internet
- Siri/Chatbot
- SMS Banking
- Wearables
- Snapshot
- Missed Call Banking
- API Access
- Soft-Token Application

At the bottom left, there are 'Next' and 'Back' buttons. The footer contains the copyright notice: 'Copyright © 2006, 2020, Oracle and/or its affiliates. All rights reserved. | Security Information | Terms and Conditions'.

Note: Application Role Name, User Type, and Touch Point Type fields cannot be edited.

3. Update the role description if required.
4. Add/ remove the user segment as per requirement.
5. Select/ deselect module names for which the transaction mapping is to be done.
6. Check/uncheck the touch points for which the transaction mapping is to be done.
7. Click **Next** to link/ delink transactions.
OR
Click **Back** to go back to previous screen.

Note: If the administrator deselects a module from Module name field, transaction mapping done for all the transactions under that module will get removed for that module. Similarly if the administrator unchecks an existing touch point, transaction mapping done for all modules for that touch point will get removed for that Touch Point.

33-8

8. Modify the transactions mapping for different touch points. Click  against the particular category to view and update the transaction mapping.
9. Click on the next touch point tab, a pop up window appears for asking **Copy data from touch point**.

Copy data from touch point Confirmation popup window

- a. Click **Yes** to select the touch point from which the data has to be copied.
- b. Copy transaction mapping details of touch point to another popup window.

Copy data from touch point Confirmation popup window

- a. From the **Select** list, select the touch point from the list.
 - b. Click **Apply**.
OR
Click **No**. to do the mapping operationally.
10. Modify the transactions mapping for current touch points if required.
 11. Click **Save** to save the updates.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Back** to navigate back to previous screen.
 12. The screen with success message appears. Click **OK** to close the message screen.

33.3 Delete Application Role

Using this option System Administrator can delete an existing role transaction mapping. Deletion of any role is only allowed if there are no users attached to that role.

To delete role transaction mapping:

1. Repeat step 1 to 4 of **Search Application Role** section.
2. Click **Delete** to delete the application role along with the transaction mapping.
The **Delete Warning** message appears.

Delete Application Role

3. Click **Yes**.
The **Role Transaction Mapping** screen with the successful role deletion message appears.
OR
Click **No** to cancel the transaction.

33.4 Create Application Role

Using this option System Administrator can define an application role and map transactions to it for selected touch points.

To create an application role transaction mapping:

1. In the **Role Transaction Mapping** screen, click Create. The **Role Transaction Mapping - Create** screen appears.

Application Role Creation

The screenshot shows the 'Role Transaction Mapping' interface. At the top, there's a navigation bar with 'System Administrator', 'ATM/Branch', 'English', and 'UBS 14.3 AT3 Branch'. Below that, the 'futura bank' logo and user information 'Welcome, Sweta Thakur' are visible. The main content area is titled 'Role Transaction Mapping' and contains a form with two sections: 'Application Role Creation' (marked with a '1') and 'Map Transaction' (marked with a '2').

The 'Application Role Creation' section includes the following fields:

- Application Role Name: Retail 001
- Description: Retail User 001
- User Type: Retail User (dropdown)
- Touch Point Type: INTERNAL (dropdown)
- User Segment: SegmentL x, testL x

At the bottom of the form, there are three buttons: 'Map Transaction' (blue), 'Cancel' (grey), and 'Back' (grey).

Field Description

Field Name	Description
Application Role Name	Name of the application role.
Description	Description of the application role.
User Type	Type of the user for which the application role is to be created. The options are: <ul style="list-style-type: none"> • Retail User • Corporate User • Administrator

Field Name	Description
Touch Point Type	Type of Touch Point. The options are: <ul style="list-style-type: none"> • Internal: (for internal touch points like internet, Mobile Application, Siri, Chatbot etc.) • External : (for third Party applications)
User Segment	User segments of selected user type for which the maintenance is to be done. This field is applicable only for Retail user type and Internal touch point type.
Scope Name	List the scopes for the external touch point. This field is displayed and enabled, if you select External option in the Touch Point Type field. Once a scope is mapped to a role, it cannot be mapped to any other role.

2. In the **Application Role Name** field, enter the name of the application role.
3. In the **Description** field, enter the description of the application role.
4. From the **User Type** list, select appropriate type for which role is to be created.
5. From the **Touch Point Type** list, select appropriate option.
 - a. If you select **External**;
 - i. From the **Scope Name** list, select the appropriate scope to map to application role.
 - b. If you select **Internal and User Type as Retail**;
 - i. From the **User Segment** list, select the appropriate segments for which maintenance is to be done.
6. Click **Map Transaction** to map transaction to the role.
The **Application Role Creation** screen to add transaction modules and touch points appears.
OR
Click **Back** to navigate back to previous screen.
OR
Click **Cancel** to cancel the transaction and to go back to dashboard.

 15. The **Role Transaction Mapping - Review** screen appears. Verify the details, and click **Confirm**.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Back** to navigate back to the previous screen.
 16. The screen with success message of **Application Role Policy Map** appears. Click **OK** to complete the transaction.

FAQ

1. Is it mandatory to map transactions to the created application role?

Yes. You will need to associate transactions for at least one module for a touch point, once an application role is created.

2. Do I need to mandatorily map transactions for each touch point for the new application role created?

No, it is not mandatory to map transactions for each touch point for the new role created but if the same are not defined then on initiation of transaction from that touch point, system will give an access denied message.

3. Why am I unable to select an action against a specific entitlement for a transaction?

This could be because that the specific action is not applicable or relevant for an entitlement i.e. approve as an action is not applicable to inquiry entitlement for a transaction.

4. Can I copy the same transaction mapping for an application role from one touch point to another?

Yes, you can copy the details along with an option to decide from which touch point the details need to be copied. On selection of a touch point, system will prompt to select the touch point from which the entitlements need to be copied. If you had selected 'No' and later wish to copy the details, then you will need to click on the touch point tab again for the system to provide that option.

5. Once I select the module and touch points for transaction mapping to an application, can I include additional modules and touch points?

Yes, you can click on 'Edit' and include additional modules and touch points for mapping.

6. Can I associate multiple scopes to an application role of type external and how are they associated to external touch points?

No. Only one scope can be mapped to an application role to map transactions. Once a scope is mapped to an application role, that scope cannot be mapped to another application role. Multiple scopes can be associated to an external touch point as part of touch point definition and the same scope can be mapped to different external touch points.

[Home](#)

34. Entitlements

Entitlements are the transactions that the user can perform. Each Entitlement is linked to a single or group of resources. Access of these entitlements to a role is given basis on the necessity and relevance of entitlement to that role. For creation of role and mapping entitlements to that role please refer to Role Transaction Mapping screen.

Pre-Requisites

- Transaction access is provided to System Administrator.

Workflow

Features supported in application

Using this option system administrator can perform the following actions:

- View Entitlement
- Edit Entitlement

How to reach here:

System Administrator Dashboard > Authorization and Access Controls > Entitlements
 OR
System/ Bank Administrator Dashboard > Toggle Menu > Authorization and Access Controls > Entitlements

34.1 Entitlements - View

Using this option, Administrator can search and view the existing entitlements.

To search entitlement (s):

1. From the **Module Name** list, select the appropriate module for which the entitlements are to be viewed.
2. From the **Category Name** list, select the appropriate category of the selected module. 3. Enter the entitlement name.

3. Click **Search**. The based on the search criteria the list of entitlements appears.
- OR
- Click **Cancel** to cancel the transaction.
- OR
- Click **Clear** to reset the entered details.
- OR
- Enter the value directly in the **Entitlement Name** field and Click **Search**.

Entitlements - View

The screenshot displays the 'Entitlements' view in the Futura Bank system. At the top, there is a navigation bar with 'System Administrator', 'ATM/Branch', 'English', and 'UBS 14.3 AT3 Branch'. Below this, the 'futura bank' logo is visible along with a search icon and a user profile for 'Sweta Thakur' with the last login time '29 Apr 01:50 PM'. The main content area is titled 'Entitlements' and contains search filters for 'Module Name' (Admin Maintenance) and 'Category Name' (Alert Maintenance). There is an 'Entitlement Name' search field with 'Search' and 'Clear' buttons. The search results are grouped under 'Admin Maintenance' and include a sub-section for 'Alert Maintenance'. This section lists four entitlements: 'Create Alerts Maintenance', 'Delete Alerts Maintenance', 'Inquire Alerts Maintenance', and 'Edit Alerts Maintenance'. Each entitlement is associated with a 'Service' button and a 'User Interface Component' label, followed by a list of resource paths. A 'Note' box on the right side of the screen provides a definition of entitlements and explains the purpose of the current view. At the bottom of the interface, there is a 'Cancel' button and a copyright notice for Oracle.

Field Description

Field Name	Description
Module Name	Name of the module under which all transactions are maintained. This field lists all the module names for the entitlements maintained in the system.
Category Name	Name of the category.

Field Name	Description
Entitlement Name	Name of entitlement/ transaction.
Entitlement Details	
Module Name	Name of the module under which all transactions/ entitlements are maintained.
Category Name	Name of the category under the module. Under each module entitlements are grouped under a category.
Transaction Name	Name of entitlement/ transaction.
Service	Displays the list of service resources mapped to the entitlements.
User Interface Component	Displays the list of user interface components mapped to entitlements.
Action Name	Name of available actions for an entitlement. The options are: <ul style="list-style-type: none"> • Approve • Perform • View
Resource Name	Name of the resources mapped to entitlement for each action- Approve/Perform/View under Services or User Interface Component.

4. Click  against the particular category to view the entitlement under that category.
5. Select the **Service** or **User Interface Component** tab to view respective details.
6. Click  to update entitlement details.
OR
Click **Cancel** to cancel the transaction and go back to dashboard.

34.2 Entitlements - Edit

Using this option, Administrator can add or delete the resources under Services and User Interface Component.

To update entitlement details:

1. From the **Module Name** list, select the appropriate module for which the entitlements are to be viewed.

2. From the **Category Name** list, select the appropriate category of the selected module. 3. Enter the entitlement name.
3. Click **Search**. The based on the search criteria the list of entitlements appears.
OR
Enter the value directly in the **Entitlement Name** field and Click **Search**.
4. Click  against the particular category to view the entitlement under that category.
5. Click  to update entitlement details. The **Entitlements - Edit** screen appears.

[Home](#)

35. User Segment Maintenance

In order to offer appropriate product and services to the customers, banks can employ some method of segmentation. Banks can group customers into different segments on the basis of different attributes of the customer; it could be demographic information, geographical information, behavioral information etc.

Banks can have different communication mailers, authentication mechanisms, transaction limits and branding aspects on the basis of customer segmentation.

User segment maintenance screen allows the system administrator to create new segments and subsequently use these segments to define specific maintenances at user segment level. Limits can also be defined specific to a user segment. Within each user segment, limits package can be associated to different touch points.

Pre-Requisites

- Transaction access is provided to System / Bank Administrator.
- Application roles are maintained

Workflow

Features Supported In Application:

- Create User Segment
- Search and View User Segment
- Edit User Segment

How to reach here:

System/ Bank Administrator Dashboard > Toggle Menu > Authorization and Access Controls > User Segments

OR

System Administrator Dashboard > Authorization and Access Controls > User Segment Maintenance

35.1 User Segment Maintenance - Search

Using this option, System Administrator user can search the user segments maintained for retail users. The search result displays matching results based on search criteria entered.

System Administrator can view details of a specific segment by selecting the segment ID to get required details for a segment.

To search user segments:

1. In the **Segment Code** field, enter the segment code whose details you want to view.
OR
In the **Segment Name** field, enter the name of the segment whose details you want to view.
OR
From the **User Type** list, select the user type for which you wish to view user segment details. Currently only segments for user type 'Retail' can be defined.
2. Click **Search**.
The search results appear on the **User Segment Maintenance** screen based on the search parameters.
OR
Click **Clear** to reset the details.
OR
Click **Cancel** to cancel the transaction and the administrator will be navigated back to the **Dashboard**.

User Segment Maintenance- Search Result

The screenshot displays the 'User Segment Maintenance' interface. At the top, there is a navigation bar with 'System Administrator', 'ATM/Branch', 'English', and 'UBS 14.3 AT3 Branch'. The main header shows 'futura bank' and a user profile for 'Welcome, Sweta Thakur' with a last login time of '29 Apr 01:50 PM'. The search form includes fields for 'Segment Code', 'Segment Name', and 'User Type' (set to 'Please select'). There are 'Search' and 'Clear' buttons. The search results table is as follows:

Segment Code	Segment Name	User Type	Status
SegmentL	SegmentL	Retail User	Enabled
test	test	Retail User	Enabled
testL	testL	Retail User	Enabled
SegmentL2	SegmentL2	Retail User	Enabled
SegmentL3	SegmentL3	Retail User	Enabled

Field Description

Field Name	Description
Segment Code	System displays the Segment Code of the segment that was selected to view details.
Segment Name	System displays the name of the segment that was selected to view details.
User Type	System displays the user type of the segment that was selected to view the details.
Allowed Application Roles	System displays the application roles that are mapped to the selected segment.
Status	System displays the current status of the selected segment i.e. whether the segment is active / inactive. Note: If the user segment is no longer active and needs to be disabled then the same can be done in Edit mode.

Limits - Touch Points /Group/ Global

Limits package can be optionally attached at user segment level. All the touch points and touch point groups maintained in the system are listed under each entity in case of multi entity setup. Limits Package can be mapped for each touch point and for a touch point group.

Touch Points/ Group/ Global	Name of touch points/ groups/ global under a specific entity (with all internal and external touch points).
Internal Touch Points Group for All	Displays the touch points which are the part of a group.

Field Name	Description
Touch Points	<p>Displays the touch points (banking channels) which allows a user to perform transactions using the touch points.</p> <p>The touch points could be:</p> <ul style="list-style-type: none"> • Mobile Application • Mobile (Responsive) • Internet • Mobile Banking • Missed Call Banking • SMS Banking • Wearables • Snapshot • Siri / Chatbot

4. Click **Edit** to modify the segment details.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Back** to navigate to previous screen.

35.2 User Segment Maintenance - Edit

Using this option, System Administrator can modify the details of the existing user segment.

To edit the user segment details:

1. In the **Segment Code** field, enter the segment code whose details you want to modify.
OR
In the **Segment Name** field, enter the name of the segment whose details you want to modify.
OR
From the **User Type** list, select the user type whose user segment details you want to modify.
2. Click **Search**.
The search results appear on the **User Segment Maintenance** screen based on the search parameters.
OR
Click **Clear** to reset the details.
OR
Click **Cancel** to cancel the transaction. The **Dashboard** appears.
3. Click the **Segment Code** link of the record to select the segment for which you want to modify the details. The **User Segment Maintenance - View** screen appears.

- Click **Edit** to modify the User Segment details.
The **User Segment Maintenance - Edit** screen appears. .

User Segment Maintenance- Edit

The screenshot displays the 'User Segment Maintenance - Edit' interface. At the top, the user is logged in as 'System Administrator' at the 'UBS 14.3 AT3 Branch'. The page title is 'User Segment Maintenance'. The main form contains the following fields:

- Segment Code: SegmentL
- Segment Name: SegmentL
- User Type: Retail User
- Allowed Application Roles: (empty)
- Status:
- Rewards Enabled:

Below the form is a table of 'Limits' for the selected branch 'UBS 14.3 AT3 Branch':

Touch Points / Group	Package	Actions
API Access	Please select Limit P...	⌵
Internet	LPack143	⌵

Field Description

Field Name	Description
Segment Code	System displays the segment code of the segment selected and is non-editable.
Segment Name	System displays the name of the selected segment and is available for edit.
User Type	System displays the User type for the selected segment and is non-editable
Allowed Application Roles	System displays the application roles that have been mapped to the selected segment and are available for edit. As part of edit, new application roles can be mapped and existing roles can be removed.
Status	System displays the current status of the user segment and is available for edit. Note: You can modify the segment status to Active if the current state is Inactive and vice-versa.

Limits**Limit - Touch Points /Group**

Limits package can be optionally attached at user segment level. All the touch points and touch point groups maintained in the system are listed under each entity in case of multi entity setup. Limits Package can be mapped for each touch point and for a touch point group.

Touch Points/ Group Name of touch points/ groups maintained under a specific entity to which the limit packages can be mapped.

Package System lists the packages available for mapping to a touch point/ touch point group. If there was any limits package to a touch point/group mapped earlier, it will be shown in editable form.

Actions

Click  to reset the limit packages defined for a segment.

5. Edit the required details i.e. segment name, allowed Application Roles, Status, and Limits package for any of the touch point/touch point group.
6. Click **Save** to update the changes.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Back** to navigate to previous screen.

7. The **Review** screen appears. Verify the details, and click **Confirm**.
OR
Click **Edit** to make changes if any.
OR
Click **Cancel** to cancel the transaction and navigate back to **Dashboard**.
8. The success message of modification appears.
Click **OK** to complete the transaction.

35.3 User Segment Maintenance - Create

Using this option, System Administrator can create new user segment for a user type 'Retail'.

To create the user segment:

1. In the **User Segment Maintenance** screen, click **Create**. The **User Segment Maintenance - Create** screen appears.

Field Description

Field Name	Description
Segment Code	Enter the unique code for the user segment to be created.
Segment Name	Enter the name of the user segment to be created.
User Type	Select the User type from the list for which the user segment is to be created. Currently only user type 'Retail' is supported
Allowed Application Roles	Select the application role(s) that needs to be associated to the user segment being created. The selected application role(s) will be by default available to the users to whom the created segment is associated.

Limits

Limit - Touch Points /Group

In this section user can define limits package for a user segment so that, bank can have varying limits depending on the segment of the user.

Touch Points/ Group	Name of touch points/ groups maintained under a specific entity to which the limit packages can be mapped.
----------------------------	--

Note: The limits package will be associated to a touch point/touch point within a segment. It is not mandatory to associate limits package to each touch point / touch point group.

Package	Select the limits package from the list of packages available for mapping to a touch points/ groups.
----------------	--

Actions

Click  to reset the limit packages selected against the touch point.

2. In the **Segment Code** field, enter the unique code for the user segment to be created.
3. In the **Segment Name** field, enter the name of the user segment to be created.
4. In the **User Type** list, select the appropriate user type for the user segment being created.
5. In the **Allowed Application Roles** list, select the application role(s) to be mapped to the segment.
6. In the **Limits** section, select the limit packages to be mapped to touch points / touch point from the limit package list. The limits package selected as part of this definition will be applicable to the users to whom this segment is associated and will also depend on the limits preference applicability.

Note: Click  to reset the limit packages applicable to a segment.

7. Click **Save** to save the user segment details.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Back** to navigate to previous screen.
8. The **Review** screen appears. Verify the details, and click **Confirm**.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Back** to navigate to previous screen.
The user will be navigated back to the create screen.
9. The success message of transaction completion appears.
Click **OK** to complete the transaction.

FAQ

1. Is it mandatory to create a User Segment as part of Day 1 maintenances?

No. It is not mandatory to create User Segments as part of Day 1 definition. If User Segments are created, then the same will be available for association to user as part of User Onboarding but it is not mandatory to associate user segment to business users as part of onboarding.

2. What is the relationship between User Segment and Application Roles?

Association of application roles to user segment is not mandatory. Multiple application roles can be assigned to a user segment and those application roles will be by default available to all users who are assigned that segment. The same application role can be mapped to multiple user segments.

3. Can I remove specific application role(s) from the user level if I associate user segment?

The application role(s) that are mapped to a user segment cannot be removed from the user if the segment is associated to the user, however the application role(s) that are not associated to any user segment will be available for mapping/unmapping at user level.

4. What will happen if I disable a Segment which is associated to Users?

Access to all the maintenances done on that segment level like Dashboard Builder, Product mapping, 2FA, Limits will not be referred. System will start referring to the maintenance done for the User Type associated to the users attached to the disabled segment, for Dashboard Builder, Product mapping, 2FA and Limits.

Users associated to the disabled segment will not have access to the application roles attached to that segment, hence bank user should attach new segment or application operationally to those users.

[Home](#)

36. Authentication

Passwords are the most common form of authentication used in the world today. But passwords can easily be forgotten and commonly compromised. Two-factor authentication (2FA) adds an extra layer of security by requiring users to use two different authentication factors to verify their identity.

The two step verification or 2 Factor Authentication is an extra layer of security that is known as "multi factor authentication" that requires not only a password and username but also something that only, and only, the user knows e.g. tokens, OTP, answer of security questions etc. Using a Two Factor Authentication process can help to lower the number of cases of identity theft on the Internet, as well as phishing via email. For security reason authentication is used by user (Retail/Corporate) while performing transactions through digital platform.

The Two Factor Authentication requires two different kinds of evidence before executing transaction successfully. This option enables the System Administrator to maintain authentication pattern for each transaction of a specific user segment.

Second Factor authentication can be set for each User type (Retail & Corporate) and for user type and User Segment combination (as of now user segment is only available for Retail user type).

This maintenance can be setup for each entity in a multi entity setup, which enables banks in defining different authentication mode for a same transaction for each entity.

In a multi entity setup, if the user is changing his entity, post login, then system should ask for second factor authentication.

The types of 2 factor authentication used are as follows:

- OTP : A onetime password will sent on user's registered mobile number or email id .
- Security Questions: User will be asked to answer the security questions set up by him.
- Random Number based Soft Token: The token randomly changes on the soft token app after the system defined time, and user will be required to enter the same on screen to authenticate the transaction.
- Time based Soft Token : It is a time based soft token that gets generated on the soft token application. Token gets expired after a defined time and user will be required to generate a new token.
- Push Notifications based 2FA :User will get a push notification to authenticate and complete a transactions on his registered device (mobile/wearable), on initiation of a transaction from a different form factor .
- Since the user is required to authenticate the transaction on the device where he has received the push notification, It acts as an additional security wherein the user can approve/reject the transaction only from his registered device. For receiving push notifications user should allow the same for the respective app on his device.

Note: Two factor authentication is only for retail and corporate user.

Pre-requisites

- Transaction access is provided to System Administrator.

- Approval rule set up for Bank Administrator to perform the actions.
- Transactions are enabled for 2 Factor Authentication aspect.

Workflow

Features Supported In Application

The following options are available as part of this maintenance:

- View Authentication
- Edit Authentication
- Create Authentication

How to reach here:

System Administrator Dashboard > Security > Authentication
OR

System/ Bank Administrator Dashboard > Toggle Menu > Security > Authentication

36.1 Authentication - View

On accessing 'Authentication' menu, system displays the existing maintenance available for selected user segment to view the authentication setup for user segment:

To view the authentication setup for user segment:

1. From the **Enterprise Role** list, select the appropriate role.
2. From the **User Segment** list, select the appropriate user segment.

Authentication Setup

The screenshot shows the 'Authentication' setup page in the Futura Bank system. At the top, there is a navigation bar with 'system Administrator', 'ATM/Branch', 'English', and 'UBS 14.3 AT3 Branch'. Below the navigation bar, the 'Authentication' page is displayed. It features two dropdown menus: 'Enterprise Role' set to 'Retail User' and 'User Segment' set to 'Segment1'. There are three buttons: 'View', 'Cancel', and 'Back'. A 'Note' box on the right side of the page contains the following text: 'Now you can set up an extra layer of security by requiring users to use up to two different authentication factors to verify their identity. You can choose to maintain different authentication factors for each transaction or can even define no levels for transaction requiring no authentication.' At the bottom of the page, there is a copyright notice: 'Copyright © 2006, 2020, Oracle and/or its affiliates. All rights reserved. | Security Information | Terms and Conditions'.

Field Description

Field Name	Description
Enterprise Role	Name of enterprise roles set in application. The options are: <ul style="list-style-type: none"> • Retail User • Corporate User
User Segment	The user segments maintained by the Bank (applicable for Retail User type only).

3. Click **Cancel** to cancel the transaction.
OR
Click **Back** to go back to Dashboard.
OR
Click **View** to view the 2FA maintained for the user segment. The **Authentication - View** screen appears.

Note:

- 1) If the existing maintenance is not available for selected user segment, message will be displayed "2 Factor Authentication for this user segment has not been set up yet" with the **Set up now** button which launches the screen to maintain 2 Factor Authentication.
- 2) Only OTP should be maintained as the second factor authentication mode for 'Wallet Registration' event. Other second factor authentication modes like Soft Token and Security Questions are not supported for this event.
- 3) 2FA mode Push Notification based 2FA is not supported for the following transactions:
 - ▶ Login
 - ▶ Push Notification registration
 - ▶ Soft Token registration
- 4) If the user is changing his entity post login, system will check the 2FA mode configured for Login event for the changed/destination entity, and if the 2FA mode for 'Login' event is different for the changed/destination entity then the user will be asked for the incremental second factor authentication (as per the setup).
- 5) If the 2FA mode is same for both the entities, then on switching the entity user will not be asked for any second factor authentication.
- 6) Following modes of 2FA will be supported on Login event :
 - ▶ OTP
 - ▶ Soft Token

Click **Cancel** to cancel the operation and navigate back to 'Dashboard'.
OR
Click **Back** to go back to previous screen.
10. The **Authentication Review** screen appears. Verify the details, and click **Confirm**.
OR
Click **Edit** to make the changes if any.
The **Authentication – Edit** screen with values in editable form screen appears.
OR
Click **Cancel** to cancel the operation and navigate back to 'Dashboard'.
11. The success message of Authentication setup appears along with the transaction reference number.
Click **OK** to complete the transaction and navigate back to 'Dashboard'.

36.3 Authentication - Create

System Administrator can create authentication maintenance if the maintenance is not available.

To create the authentication setup for user segment:

1. From the **Enterprise Role** list, select the appropriate role.
2. From the **User Segment** list select the user segment (if applicable)

Authentication Setup

The screenshot displays the 'Authentication Setup' interface. At the top, there is a navigation bar with 'System Administrator', 'ATM/Branch', 'English', and 'UBS 14.3 AT3 Branch'. The main header shows 'futura bank' and a user profile for 'Sweta Thakur' with a 'Last login' timestamp. The main content area is titled 'Authentication' and contains a form with the following elements:

- Enterprise Role:** Retail
- User Segment:** SegmentL2
- Message:** 2 Factor Authentication for this user segment has not been set up yet.
- Buttons:** Set Up Now, Edit, Cancel, Back
- Note:** Now you can set up an extra layer of security by requiring users to use upto two different authentication factors to verify their identity. You can choose to maintain different authentication factors for each transaction or can even define no levels for transaction requiring no authentication.

Field Description

Field Name	Description
Create	
Enterprise Role	The enterprise role for which the 2 Factor Authentication is set-up.
User Segment	The user segment for which the 2 Factor Authentication is set-up from. The options are: <ul style="list-style-type: none"> • Retail User • Corporate User
Transactions	
Transaction Type	The transaction type for which the 2 Factor Authentication is set-up.
Level 1	The first level of two factor authentication mode (Security Questions, One Time Password , Soft Token, Push Notification based 2FA) set for the transaction type. The options are: <ul style="list-style-type: none"> • None • Security Question • One Time Password(OTP) • Soft Token • Push Notification
Number of Question	Number of security questions to be asked from user at level 1 authentication. This field appears only if the Security Question option is selected as the Authentication mode.
Level 2	The second level of two factor authentication mode (Security Questions, One Time Password , Soft Token, Push Notification based 2FA) set for the transaction type. The options are: <ul style="list-style-type: none"> • None • Security Question • One Time Password(OTP) • Soft Token • Push Notification

Field Name	Description
Number of Question	Number of security questions to be asked from user at level 2 authentication. This field appears only if the Security Question option is selected as the Authentication mode.

5. In **Transactions** section, in **Level 1** of authentication select the appropriate option.
 - a. If user selects Security Question option: In the Number of questions field enter the number of security questions to be asked.
6. In **Transactions** section, in **Level 2** of authentication select the appropriate option.
 - a. If user selects **Security Question** option: In the Number of questions field enter the number of security questions to be asked.

Note: Click **Apply to all** to apply the same kind of level 1 & level 2 authentications for all transaction types.

7. Click **Save** to save the changes made.
OR
Click **Cancel** to cancel the operation and navigate back to 'Dashboard'.
OR
Click **Back** to go back tom previous screen.
8. The **Authentication Create– Review** screen appears. Verify the details, and click **Confirm**.
OR
Click **Edit** to make the changes if any.
The **Authentication – Edit** screen with values in editable form appears.
OR
Click **Cancel** to cancel the operation and navigate back to '**Dashboard**'.
The success message of Authentication setup appears along with the transaction reference number.
Click **OK** to complete the transaction and navigate back to '**Dashboard**'.

FAQ

1. Can I also set the 2 Factor Authentication for transaction approval?

You don't have to set up separate 2 Factor Authentication for transaction approval. The 2 Factor Authentication set for transaction initiation will also applied for transaction approval as well.

2. When will the changes made in authentication maintenance be applied?

Changes made in the authentication maintenance will be effective from an immediate effect. This will be applicable to new transactions initiated as well as for transactions pending for approval post the changes are effective.

3. Is it mandatory to set authentication method at both the levels?

No, you may set 1 level authentication for specific transaction. This can be achieved by selecting specific authentication method at level 1 and by specifying 'None' option at level 2.

4. Can I set 'No additional authentication required' for specific transaction?

Yes, this can be achieved by selecting 'None' option at level1 and level 2. No additional authentication is required for transaction initiation and approval if both levels are set as 'None'.

5. Where can I define which security questions to be asked to the users?

A separate maintenance 'Manage Security Questions' is available to set the up the questions which are to be asked to the users as a part of authentication process.

6. Is it mandatory to set up 2 factor authentication for a User Type and User Segment Combination

No, User Segment is an optional field and is applicable for only for Retail type of users. If the Bank doesn't want to setup the authentication for a user segment, they can simply do it for each user type.

7. Can I set up this maintenance for each entity in case of a multi entity setup?

Yes, Authentication can be setup for each entity in case of a multi entity setup. User can select the entity from the entity selection drop-down available on the top right corner of the application to set up the maintenance.

8. If Push notifications is set a second factor authentication, then how will the user authenticate a transaction ?

User will receive a push notification on his registered device (mobile/wearable), he can click on the notification and authenticate and complete the transaction on the device where he has received the notification.

9. If the user initiates a transaction form his mobile app and Push notification is set as the 2FA for that transaction , in this case where will he receive the push notification ?

User will receive the notification on his registered device i.e. mobile or wearable. He can complete the transaction by clicking on the same on the mobile itself.

37. Security Questions Maintenance

This function allows the System Administrator to set up security questions, which will then be used as another layer of security (Over & above the Login credentials), before a user (Retail/ Corporate/ Administrator) can complete transactions through the internet channel.

Through the Manage Security Questions functionality, the administrator user can create and modify security questions. He / She can add the security questions, if required.

Features Supported In Application

The following options are available to the administrator user as part of this maintenance:

- View Security Questions
- Edit Security Questions (Add new)
- Setup Security Questions (1st time setup)

Pre-requisites

- Transaction access is provided to System Administrator.

Workflow

How to reach here:

System Administrator Dashboard > Security > Security Questions Maintenance

OR

System/ Bank Administrator Dashboard > Toggle Menu > Security > Manage Security Questions

37.1 View Security Questions

On accessing 'Manage Security Questions' option, system displays the existing security questions already maintained if any.

To view the existing security questions maintenance:

Security Questions Maintenance - View

The screenshot displays the 'Security Question Maintenance - View' page. At the top, there is a navigation bar with 'System Administrator', 'ATM/Branch', 'English', and 'UBS 14.3 AT3 Branch'. Below this is the 'futura bank' logo and a user welcome message: 'Welcome, Sweta Thakur' with 'Last login 29 Apr 01:50 PM'. The main content area is titled 'Security Question Maintenance' and contains a list of questions:

- Questions
- Test English2
- Test English1
- Test English3
- Test English4
- What is the brand of your first mobile?
- In what county were you born?
- What is your favourite teacher's name?
- How many siblings do you have?
- Which sport you like most?
- Test English5

At the bottom of the list are 'Edit' and 'Cancel' buttons. To the right of the list is a 'Note' box with the following text:

Note
Security questions are used to verify user's identity in case he forgets his password. Using this option, you can create new or can view/modify existing set security questions for a user. Once saved these Questions set is then made available to the end user to set up the answers.

At the bottom of the page, there is a copyright notice: 'Copyright © 2006, 2020, Oracle and/or its affiliates. All rights reserved. | Security Information | Terms and Conditions'.

Field Description

Field Name	Description
------------	-------------

View	
-------------	--

Questions	The list of security questions set for users, as an added layer of security.
------------------	--

Note: If the first-time maintenance is not already done, a message will be displayed "Security Questions has not been set up yet". With a button alongside – 'Set up now'

1. Click **Edit** to update the set of security questions. An editable screen appears.
OR
Click **Cancel** to cancel the transaction.

37.2 Security Questions Maintenance - Edit

System Administrator can modify existing maintenance for security questions. Administrator is allowed to add security questions but cannot delete the existing questions.

To edit the security questions set:

1. Click **View** to view the security questions already set. The **Security Questions Maintenance - View** screen appears.
2. Click **Edit**. The **Security Questions Maintenance – Edit** screen appears.

Security Questions Maintenance - Edit

The screenshot displays the 'Security Question Maintenance' interface. On the left, there is a list of questions, each with a 'Question' label and a text input field. The questions are: 'Test English2', 'Test English1', 'Test English3', 'Test English4', 'What is the brand of your first mobile?', 'In what county were you born?', 'What is your favourite teacher's name?', 'How many siblings do you have?', 'Which sport you like most?', and 'Test English5'. Below the list is an 'Add More' button. At the bottom of the list are 'Save', 'Cancel', and 'Back' buttons. On the right, there is a 'Note' box with the following text: 'Security questions are used to verify user's identity in case he forgets his password. Using this option, you can create new or can view/modify existing set security questions for a user. Once saved these Questions set is then made available to the end user to set up the answers.'

Field Description

Field Name	Description
Edit	
Questions	This section displays the security questions.
Questions	The list of security questions.

3. Click **Add More** to add more security questions.
 - a. Type the new question to be added in the set.

4. Click **Confirm** to save the changes made.
OR
Click **Cancel** to cancel the operation and navigate back to 'Dashboard'.
OR
Click **Back** to go back to previous screen.
5. The **Security Questions Maintenance – Review** screen appears. Verify the details, and click **Confirm**.
OR
Click **Cancel** to cancel the operation and navigate back to 'Dashboard'.
OR
Click **Back** to go back to previous screen.
The success message of security question setup appears along with the transaction reference number.
Click **OK** to complete the transaction and navigate back to 'Dashboard'.

37.3 Security Questions Maintenance - Create

As a part of first-time maintenance of Security Questions, the System Administrator can set-up security questions.

To set security questions:

Security Question Maintenance - Setup

Note: Since the security question maintenance is not available, message will be displayed "Security Questions have not been set up yet". Alongside a button – “Set up now”

1. Click **Set up now** to set-up security questions. The **Security Questions Maintenance - Create** screen appears.

Questions	The list of security questions

2. Type the security question to be added.

Note: Click  adjacent to question to delete the particular question.

3. Click **Add More** to add more security questions.
 - a. Type the new question to be added in the set.
4. Click **Save** to save the changes made.
 OR
 Click **Cancel** to cancel the operation and navigate back to 'Dashboard'.
 OR
 Click **Back** to go back tom previous screen.
5. The **Security Questions Maintenance – Review** screen appears. Verify the details, and click **Confirm**.
 OR
 Click **Cancel** to cancel the operation and navigate back to 'Dashboard'.
 OR
 Click **Back** to go back tom previous screen.

6. The success message of security question setup appears along with the transaction reference number.
Click **OK** to complete the transaction and navigate back to '**Dashboard**'.

FAQ

1. **Can I delete the existing security questions?**

No, you can add more questions, but cannot delete the existing questions.

2. **How many questions will be asked to the user as layer of security?**

Number of questions to be asked shall be defined while defining 'Authentication' mode using 'Authentication' maintenance.

38. Password Policy Maintenance

Password policy maintenance enables System Administrator to define password parameters for users. Using this option System Administrator can create, view and edit, password policy for different user types (Admin, Retail and Corporate). Password policy maintenance contains following sections:

- **Password Validators:** This section contains the validations for a password. The validations include minimum and maximum length of the password, allowed characters in a password, repetitive and successive characters allowed, details to be excluded in the password like, date of birth, first and last name, user ID and party ID and Bank defined restricted passwords. User can also define, number of successive incorrect attempts allowed, and number of previous passwords disallowed.
- **Password Expiry Parameters:** This section contains details about password expiry period in days, first password expiry period in days and whether to force user to change password if there is a change in password policy(so that users can change their password as per the new password policy).

Note: This feature will only be available with OBDX DB authenticator as Identity Management System.

Pre-requisites

- Provide transaction access to System Administrator.

Workflow

How to reach here:

System Administrator Dashboard > Security > Password Policy Maintenance

OR

System/ Bank Administrator Dashboard > Toggle menu > Security > Password Policy Maintenance

38.1 Password Policy Maintenance - Search

To search password policy:

1. In the **Policy Name** field, enter the password policy name.
2. Click **Search**. The search results corresponding to the search criteria are displayed.
OR
Click **Clear** to reset the entered details.
OR
Click **Cancel** to cancel the transaction.

Password Policy Maintenance -Search

The screenshot displays the 'Password Policy Maintenance' search interface. At the top, there is a navigation bar with 'System Administrator', 'ATM/Branch', 'English', and 'UBS 14.3 AT3 Branch'. Below this is the 'futura bank' logo and a user profile for 'Sweta Thakur' with a last login of '29 Apr 02:46 PM'. The main content area is titled 'Password Policy Maintenance' and contains a search form with the following fields:

- Policy Name:** admin
- Policy Description:** (empty)

Buttons for 'Search' and 'Clear' are located below the form. Below the search results, a table displays the following data:

Policy Name	Policy Description	User Type
AdminPolicy	CLIP Password Default Policy	administrator

Navigation controls show 'Page 1 of 1 (1 of 1 items)' with 'Cancel' and 'Create' buttons. A sidebar on the right provides a 'Create' button and a brief description of password policy maintenance options.

Field Description

Field Name	Description
Search Criteria	
Policy Name	Password policy name.
Policy Description	Brief description of the password policy.
Search Result	
Policy Name	Password policy name.
Policy Description	Brief description of the password policy.

Field Name	Description
User Type	Type of users for which the password policy to be applied.

38.2 Password Policy Maintenance - View

To view password policy details:

1. In the **Policy Name** field, enter the password policy name.
2. Click **Search**. The search results corresponding to the search criteria are displayed.
OR
Click **Clear** to reset the selected transaction.
OR
Click **Cancel** to cancel the transaction.

Password Policy Maintenance -Search

The screenshot displays the 'Password Policy Maintenance' search interface. At the top, there is a navigation bar with 'System Administrator', 'ATM/Branch', 'English', and 'UBS 14.3 AT3 Branch'. The main header shows 'futura bank' and a user profile for 'Sweta Thakur' with the last login time '29 Apr 02:46 PM'. The search form contains the following fields:

- Policy Name: admin
- Policy Description: (empty)

Buttons for 'Search' and 'Clear' are present. Below the form is a table with the following data:

Policy Name	Policy Description	User Type
AdminPolicy	CLIP Password Default Policy	administrator

Page navigation shows 'Page 1 of 1 (1 of 1 items)'. A 'Cancel' button is located below the table. On the right side, there is a 'Password Policy Maintenance' informational box with a 'Create' button.

3. Click the Policy Name link of the record for which you want to view the password policy details. The **Password Policy Maintenance - View** screen appears.

Password Policy Maintenance - View

The screenshot displays the 'Password Policy Maintenance - View' interface. At the top, the user is identified as 'System Administrator' at the 'ATM/Branch' location, with the language set to 'English' and the system version 'UBS 14.3 AT3 Branch'. The user's name 'Sweta Thakur' and last login time '29 Apr 02:46 PM' are also visible.

The main configuration area is titled 'Password Policy Maintenance' and includes the following fields:

- User Type:** Radio buttons for 'Corporate User', 'Administrator' (checked), and 'Retail User'.
- Policy Name:** 'AdminPolicy'.
- Policy Description:** 'CLIP Password Default Policy'.

The 'Password Validators' section contains:

- Password Length:** 6 min to 15 max.
- Allowed Characters:** Checkboxes for 'Upper Case', 'Lower Case', 'Special Characters', and 'Numbers', all of which are checked and set to 'Allowed'. There are also checkboxes for 'Mandatory' for each category, with 'Numbers' set to 'Mandatory'.
- Allowed Special Characters:** ! @ # \$ ()
- Repetitive Characters Allowed:** 4
- Successive Characters Allowed:** 4
- Exclusion Details in Password:** Oracle
- Restricted Passwords:** Oracle
- Successive Invalid Login Allowed:** 5
- Previous Password Disallowed:** 5

The 'Password Expiry Parameters' section includes:

- Password Expiry Period in Days:** 120 days
- Password Expiry Warning Period in Days:** 1 days
- First Password Expiry Period in Days:** 30 days
- Force Password Change with Policy Change:**

At the bottom of the form, there are three buttons: 'Edit' (blue), 'Cancel' (grey), and 'Back' (grey).

Field Description

Field Name	Description
User Type	Indicates the user type for which the password policy is applied. Multiple user types can be selected for a single policy. The user type are: <ul style="list-style-type: none"> • Corporate User • Administrator • Retail User
Policy Name	Password policy name.

Field Name	Description
Policy Description	Brief description of the password policy.
Password Validators	
Password Length	The minimum and maximum length of the password.
Allowed Characters	<p>Characters allowed in the password. Different types of characters are:</p> <ul style="list-style-type: none"> • Upper Case • Lower Case • Special Characters • Numbers
Allowed Special Characters	<p>The allowed Special characters in the password.</p> <p>The example of special characters could be, @, #, &, etc.</p> <p>This field only gets enabled if the Administrator has allowed special characters in the password (in Allowed Characters field).</p>
Repetitive Characters Allowed	<p>Number of repetitive characters allowed in the password.</p> <p>For example: If you enter 2 in this field, user can enter 2 repetitive characters in his password like aabcd. If user enters aaabcd as his password, system will display error.</p>
Successive Characters Allowed	<p>Number of successive characters allowed.</p> <p>For example: If you enter 4 in this field, then user cannot enter four successive characters (aaaa/1111) in the password.</p>
Exclusion Details in Password	<p>The exclusion options. It can be multiple values.</p> <p>Exclusion details includes:</p> <ul style="list-style-type: none"> • First Name • Last Name • User ID • Date of Birth • Party ID

Field Name	Description
Restricted Password	The restricted password. The multiple commonly used passwords which are entered by user which the Bank does not want it's user to define as password.. For example: If you enter restricted password as Password123, the system does not allow the user to set his password as 'Password123'.
Successive Invalid Login Allowed	The number of attempts allowed for login with incorrect password. User will get locked once he reached the maximum invalid attempts allowed.
Previous Password Disallowed	The disallowed number of historic passwords. For example: If you enter 5 in this field user can not define his last five passwords as his new password.
Password Expiry Parameters	
Password Expiry Period	The number of days after which the password will get expired.
Password Warning Period	The period in days in this field, post which user will get a warning message to change his password. This field gets only enabled if the Password Expiry Period is set.
First Password Expiry Period	The number of days after which user's first system generated password will get expired.
Force Password Change with Policy Change	The check box to force change the password if there is a change in any of the parameter in the password validators section.

-
4. Click **Edit** if you want to edit the password policy details.
OR
Click **Cancel** to cancel the password policy maintenance and to go back to dashboard.
OR
Click **Back** to navigate to the previous screen.

38.3 Password Policy - Create

To create a new password policy:

1. In the **Password Policy Maintenance** screen, click **Create**. The **Create New Password Policy** screen appears.
2. To apply the password policy, select the appropriate user type.
3. In the **Policy Name** field, enter the password policy name.
4. In the **Policy Description** field, enter the password description.
5. In the **Password Validators** section, enter the minimum and maximum length of the password in the **min** and **max** field.

Create New Password Policy

The screenshot displays the 'Create New Password Policy' interface. At the top, the user is identified as 'System Administrator' at 'ATM/Branch' in 'English' at 'UBS 14.3 AT3 Branch'. The page title is 'Password Policy Maintenance'. The form includes the following sections:

- User Type:** Radio buttons for Corporate User, Administrator (checked), and Retail User.
- Policy Name:** Text field containing 'AdminPolicy'.
- Policy Description:** Text field containing 'CLIP Password Default Policy'.
- Password Validators:**
 - Password Length:** 'min' field set to 6, 'max' field set to 15.
 - Allowed Characters:** Checkboxes for Upper Case, Lower Case, Special Characters, and Numbers, all checked. 'Mandatory' checkboxes are present for Upper Case, Lower Case, and Special Characters.
 - Allowed Special Characters:** Input field containing '!', '@', '#', '\$', '%', '&', '(', ')', and '}'.
 - Repetitive Characters Allowed:** Input field set to 4.
 - Successive Characters Allowed:** Input field set to 4.
 - Exclusion Details in Password:** Empty text area.
 - Restricted Passwords:** Input field containing 'Oracle'.
 - Successive Invalid Login Allowed:** Input field set to 5.
 - Previous Password Disallowed:** Input field set to 5.
- Password Expiry Parameters:**
 - Password Expiry Period in Days:** Input field set to 120.
 - Password Expiry Warning Period in Days:** Input field set to 1.
 - First Password Expiry Period in Days:** Input field set to 30.
 - Force Password Change with Policy Change:** Checked checkbox.

At the bottom, there are 'Save', 'Cancel', and 'Back' buttons. The footer contains the copyright notice: 'Copyright © 2006, 2020, Oracle and/or its affiliates. All rights reserved. | Security Information | Terms and Conditions'.

Field Description

Field Name	Description
User Type	<p>Indicates the user type for which the password policy is applied. Multiple user types can be selected for a single policy.</p> <p>The user type are:</p> <ul style="list-style-type: none"> • Corporate User • Administrator • Retail User
Policy Name	Password policy name.
Policy Description	Brief description of the password policy.
Password Validators	
Password Length	The minimum and maximum length of the password.
Allowed Characters	<p>Characters allowed in the password.</p> <p>Different types characters are:</p> <ul style="list-style-type: none"> • Upper Case • Lower Case • Special Characters • Number
Mandatory	<p>Select the Mandatory check box to make the selected allowed character mandatory in the password.</p> <p>This field only gets enabled if the user has selected 'Allowed' for that character.</p>
Mandatory Characters Allowed	<p>Number of mandatory characters that should be present in the password.</p> <p>This field only gets enabled if the user has selected 'Mandatory' for that character.</p>
Allowed Special Characters	<p>Special characters allowed in the password.</p> <p>The example of special characters could be, @, #, &, etc.</p> <p>This field only gets enabled if the Administrator has allowed special characters in the password (in Allowed Characters field).</p>

Field Name	Description
Repetitive Characters Allowed	<p>Number of repetitive characters allowed in the password.</p> <p>For example: If you enter 2 in this field, user can enter 2 repetitive characters in his password like, aabcd. If user enters aaabcd as his password, system will display error.</p>
Successive Characters Allowed	<p>Number of successive characters allowed.</p> <p>For example: If you enter 4 in this field, then user cannot enter four successive characters (aaaa/1111) in the password.</p>
Exclusion Details in Password	<p>Select the exclusion option from the list. You can select multiple values from the li</p> <p>Exclusion details includes:</p> <ul style="list-style-type: none"> • First Name • Last Name • User ID • Date of Birth • Party ID
Restricted Password	<p>Enter the restricted password. User can input multiple commonly used passwords which the Bank does not want it's user to define as password.</p> <p>For example: If you enter restricted password as Password123, the system does not allow the user to set his password as 'Password123'.</p>
Successive Invalid Login Allowed	<p>Enter the number of attempts allowed for login with incorrect password. User will get locked once he reached the maximum invalid attempts allowed.</p>
Previous Password Disallowed	<p>Enter the disallowed number of historic passwords. For example: If you enter 5 in this field user can not define his last five passwords as his new password.</p>
Password Expiry Parameters	
Password Expiry Period	<p>Enter the number of days after which the password will get expired.</p>

Field Name	Description
Password Warning Period	Enter the period in days in this field, post which user will get a warning message to change his password. This field should only be enabled if the Password Expiry Period is set.
First Password Expiry Period	Enter the number of days after which user's first system generated password will get expired.
Force Password Change with Policy Change	Select the check box to force change the password if there is a change in any of the parameter in the password validators section.

5. Modify the appropriate details.
6. Click **Save** to update the modified password policy details.
OR
Click **Cancel** to abort the edit password policy process.
7. The **Review** screen appears. Verify the details, and click **Confirm**.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Back** to navigate to previous screen.
8. The success message of password creation appears along with the transaction reference number.
Click **OK** to complete the transaction.

FAQ

1. **If I edit a password policy, will the new policy be applied for the existing users mapped under the user category?**

Yes, the new password policy will get applied to existing as well as new users.

2. **If an existing password policy has changed will the existing users be asked to change their password to meet criteria as per the new policy**

Existing users will only be asked to change their password if the **Force Password Change with Policy Change** checkbox is checked in the password policy.

3. **Will the user be shown any warning before the password expiry?**

Yes, user will be shown a message on his dashboard prompting him to change his password starting from the number of days maintained in password warning period until the password gets expired.

4. **Can the Bank define more than one password policy for a user type (Administrator/Corporate/Retail)?**

No, only one policy can be defined for a particular user type.

5. **Can the System Administrator delete a Password policy?**

No, deletion of password policy is not permitted; however system administrator can make changes to the existing password policy.

39. Security Keys

39.1 Password Encryption and Decryption with Public and Private Key Pairs

Encryption and decryption allow communication between two parties to disguise information. The sender encrypts information before sending it and the receiver decrypts the information after receiving it. While in transit, the information is encrypted to ensure that it is protected from an intruder.

Public and Private key pair helps to encrypt information that ensures sensitive data is protected during transmission. Whatever is encrypted with a Public Key can only be decrypted by its corresponding Private Key and vice versa.

39.2 JWT Encryption Key

A JSON web token is a JSON object to represent a set of information. On sign in, user is authenticated and JWT token is generated. This JWT is subsequently passed to make API calls.

To keep sensitive information hidden from the bearer (client) or third parties, JWT should be encrypted.

A single key can be used to encrypt the data, if the JWT is encrypted with the key then the data can be decrypted using the same key.

How to reach here:

System/ Bank Administrator Dashboard > Toggle Menu > Security > Security Keys

Security Keys

The screenshot displays the 'Security Keys' page in the Futura Bank administrator dashboard. The page is divided into three main sections, each with a 'Generate' button:

- Public and Private Key Pair:** Describes how this key pair helps encrypt information to ensure data protection during transmission. It notes that data encrypted with a Public Key can only be decrypted by its corresponding Private Key and vice versa.
- JWT Encryption Key:** Explains that to encrypt and decrypt a JWT, a symmetric key is needed, which can be generated by clicking the 'generate' button.
- API Key:** States that an API key is a unique identifier that helps the authentication server handle non-authenticated requests, and it can be generated by clicking the 'generate' button.

The page header shows the Futura Bank logo, a search bar, and user information: 'Welcome, Administrator User' with a last login time of '12 Aug 03:28 PM'. The footer contains copyright information: 'Copyright © 2006, 2020, Oracle and/or its affiliates. All rights reserved. | Security Information | Terms and Conditions'.

To generate the security keys:

1. The default behaviour in the product will be no encryption for password as well as JWT.
2. If encryption needs to be enabled, then the system administrator should generate the respective keys.
3. Click **Generate** against the **Public and Private Key Pair**. System will generate public as well as private keys.
4. Click **Generate** against the **JWT Encryption Key**. System will generate the symmetric key for encryption.
5. Click **OK** to navigate back to dashboard

Note: The server will need to be restarted post key generation.

40. User Group - Subject Mapping

This maintenance facilitates mapping of subjects, to user groups in the bank, to streamline communication between the bank's users and its end customers.

Once User Groups are mapped to certain transactions or modules, users, in that group can reply to communication pertaining to the specific subject. The communication channel used is the bank's secure mailbox. For instance, employees in the Credit Card department of the bank will be able to reply to / address queries raised by customers who are overdue on their payments or who want to seek clarification on their monthly statement.

Pre-Requisites

- Transaction access is provided to System Administrator.
- Approval rule set up for System Administrator to perform the actions.
- Administrator user groups are maintained.
- Maintain applicable subjects, for each Module

Workflow

Features Supported In Application

- Search User Group - Subject Mapping
- Create User Group - Subject Mapping
- Modify User Group - Subject Mapping

How to reach here:

System Administrator Dashboard > Communications > User Group Subject Mapping
OR

System/ Bank Administrator Dashboard > Toggle Menu > Communications > User Group Subject Mapping

40.1 User Group - Subject Mapping - Search

User Group – subject mapping search option allows System Administrator to view the existing User Group - Subject Mapping.

To view User Group - Subject Mapping:

1. In the **Mapping Code** field, enter the user group - subject mapping code for which you want to view the details.
OR
In the **Description** field, enter the user group - subject mapping description for which you want to view the details.
OR
From the **Group Code** list, select the group code already maintained to view the details of the same. Click **Search**, display results based on search criteria.
OR
Click **Clear** to reset the details.
OR
Click **Cancel** to cancel the transaction.

User Group - Subject Mapping - Search

The screenshot displays the 'User Group - Subject Mapping' search interface. At the top, there is a navigation bar with 'System Administrator', 'ATM/Branch', 'English', and 'UBS 14.3 AT3 Branch'. The main header shows 'futura bank' and a user greeting 'Welcome, Sweta Thakur' with a last login time of '29 Apr 02:46 PM'. The search form includes three input fields: 'Mapping Code', 'Description', and 'Group Code'. The 'Group Code' dropdown is currently set to 'AdminGroupforMails-AdminGroupf...'. Below the form are three buttons: 'Search', 'Clear', and 'Cancel'. Underneath the form is a 'Mapping Details' table with one row of data. To the right of the form is a 'Note' box with a 'Create' button.

Mapping Code	Description	Group Code
AdminGroupforMails	AdminGroupforMails	AdminGroupforMails

Note
You can map group of users of the Bank to various mail subjects. This ensures to simplify the communication between the Bank and end customers through secured mailbox.

Field Description

Field Name	Description
Mapping Code	The user group - subject mapping code.
Description	The user group - subject mapping description.

Field Name Description

Group Code The group code to enquire about user group subject mapping, already maintained.

2. Click the **Mapping Code** for which you want to view the mapping details. The **User Group - Subject Mapping - View** screen displays the mapping of subject to the user group.

FAQ

1. If a user has been mapped to all subjects in the CASA module, what does it mean?

If the bank user is mapped to all subjects in CASA, he will be able to receive and reply to the business users on those CASA subjects.

2. How does this maintenance help the bank and its customers?

This set-up is a way to allow or restrict access, to the users of the bank. This enables a secure communication channel between the bank and its end customers.

3. I am an employee of the bank, and I belong to the user group that is mapped to all Term Deposits subjects. Can I initiate an email and send it to the customer?

No, you cannot initiate a correspondence with a customer, you can only reply to his queries on Term Deposits, through the mailbox.

[Home](#)

41. Alerts Maintenance

Alerts maintenance allows the System Administrator to define required parameters for each alert that is to be sent to the banks internal (Administrators) and external users (Business users). User can define the alert messages to be sent to different recipients on different channels. Also the type of alert Mandatory or subscribed can be defined by the user for each event.

Application also supports actionable alerts. Actionable alerts help user taking an action on the alert message received so that he/she does not have to navigate to the respective transaction manually to take specific action on the message. These alerts can be defined for any of the delivery mode i.e. email, SMS, push notification and on screen.

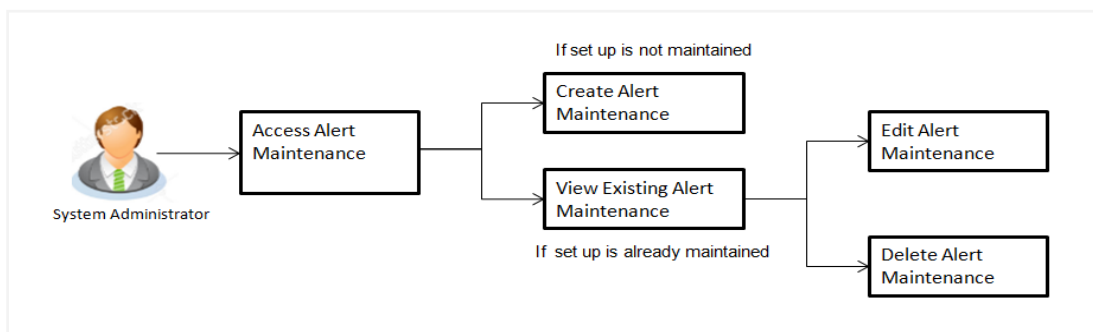

Factory shipped Actionable Alerts:

Corporate Approval – User will be able to click on the link available in the alert and he or she will be redirected to transaction approval page.

Pre-Requisites

- Transaction access is provided to System Administrator.
- Approval rule set up for System Administrator to perform the actions.
- Various events are maintained

Workflow

Features Supported In Application

Alert maintenance available features available to System Administrator users in the application:

- View alerts already maintained
- Create a new alert
- Edit an alert
- Delete an alert

How to reach here:

System Administrator Dashboard > Communications > Alert Maintenance
OR

System/ Bank Administrator Dashboard > Toggle Menu > Communications > Alert Maintenance

41.1 Alerts Maintenance - Search

Using this option, System Administrator can search and view the details of any alerts maintained based on the search parameters. If the search parameters are not specified, records of all the alerts maintained in the application are displayed (i.e. a blank search is allowed).

To view alerts:

1. From the **Module Name** list, select the appropriate option whose alerts you to view.
2. From the **Event Name** list, select the event, for which one wants to view the alerts maintained.
3. Click **Search**.
The alerts maintained appear based on the entered search parameters.
OR
Click **Clear** to reset the details.
OR
Click **Cancel** to cancel the transaction.

Alerts Maintenance- Search

The screenshot displays the 'Alert Maintenance' search interface. At the top, there are navigation elements including 'System Administrator', 'ATM/Branch', 'English', and 'UBS 14.3 AT3 Branch'. The user is identified as 'Welcome, Sweta Thakur' with a last login time of '29 Apr 02:45 PM'. The search filters are set to 'Deposits' for Module Name and 'Select' for Event Name. A table lists various alert events and their types.

Event Name	Module Name	Alert Type
Amend Recurring Deposit	Deposits	Mandatory
Amend Term Deposit	Deposits	Subscribed
Amend Term Deposit - Auto Approved	Deposits	Mandatory
Amend Term Deposit - Initiated	Deposits	Mandatory
RD Account Opened	Deposits	Mandatory
TD Account Opened	Deposits	Mandatory
Open Term Deposit - Auto Approved	Deposits	Mandatory
Open Term Deposit - Initiated	Deposits	Mandatory
Redeem Recurring Deposit	Deposits	Mandatory
Redeem Term Deposit	Deposits	Subscribed
Redeem Term Deposit - Auto Approved	Deposits	Mandatory
Redeem Term Deposit - Initiated	Deposits	Mandatory
Recurring Deposit Adhoc Statement Request	Deposits	Mandatory
Term Deposit Adhoc Statement Request	Deposits	Subscribed
Term Deposit Adhoc Statement Request - Auto Approved	Deposits	Mandatory
Term Deposit Adhoc Statement Request - Initiated	Deposits	Mandatory
Term Deposit Top-Up - Auto Approved	Deposits	Mandatory
Term Deposit Top-Up - Initiated	Deposits	Mandatory

A 'Note' box on the right states: 'Define & maintain the parameters that drive the internal & external alerts. For a module, you can define the events for alert generation, the text of the alert & whether its mandatory or subscription based for user. These parameters can be viewed, edited & deleted as required.' A 'Create' button is located below the note.

Field Description

Field Name Description

Module Name Name of the module to which alert is maintained.

Event Name The event activity associated with the alert based on the Module name selection.

Search Results

Event Name The event activity associated with the alert.

Module Name Name of the module to which the event was linked.

Alert Type The type of alert i.e. if the alert is a subscription based alert or is one that is sent by the bank by default.

The options are:

- Subscribed
 - Mandatory (Bank Notification)
-

4. To view the details of a specific alert, click the **Event Name** field, in the Search Results table. The **Alert Maintenance- View** screen with maintained details appears.

4. The **Alert Maintenance** screen with the successful object deletion message appears. Click **OK** to complete the transaction.

To view the list of events for **Alert Maintenance**, click [here](#) .

FAQ

1. What is a significance of Mandatory and Subscribe types of alerts?

Recipients will get an alert by default for the alert types defined as Mandatory and will have to subscribe for those alerts for which the alert type is defined as 'Subscribe'.

2. What is a reason for applying attribute masking?

The main reason for applying masking to a data field is to protect data that is classified as personal identifiable data, personal sensitive data or commercially sensitive data as a communication between the customer and Bank.

3. Can I define the masking for data attribute available in subject?

No, data attribute masking can be defined only for the data available in the message body.

4. Can I add an attribute masks for more the one data attribute for a specific recipient and channel?

Yes, you can add multiple attribute masks for different data attributes for a specific recipient and channel.

5. Can I delete specific recipient added for an alert event in Alert Maintenance?

Yes, administrator can delete specific recipient mapped to an event.

6. What happens to the in-transit transactions if I edit the alert maintenance for specific recipient?

An updated maintenance will be applicable for any new event performed after maintenance is saved successfully.

7. Can the administrator define any of the existing alerts as an actionable alert by defining the Action ID and Action Text?

No, actionable alerts cannot be configured by the Administrator, these alerts are factory shipped or can be defined at the time of implementation. Administrator can only define the Action Text for and can enable/disable the actionable alert.

42. Mailers

Mailers are information or messages published by the Bank, to communicate about the Bank's Products, services and other information to its users. Bank may send mailers to announce a limited period promotional product rate, launch of a product or service, etc.

Using this option, the System Administrator creates Mailers which are sent to specific users, parties or user segments. Mailers can be customized to reach some or all users, to be sent now or on a specific date and time, in the future.

Pre-Requisites

- Transaction access is provided to System Administrator
- Approval rule set up for Administrator to perform the actions

Workflow

Features Supported In Application

The Mailers module supports following features:

- Search and View Mailers
- Create Mailers
- Edit Mailers (Only for Scheduled Mailers)
- Delete Mailers (Only for Scheduled Mailers)

How to reach here:

System Administrator Dashboard > Communications > Mailers
OR

System/ Bank Administrator Dashboard > Toggle Menu > Communication > Mailers

42.1 Mailers - Search and View

Using Mailers – search option, System Administrators can search and view the list of mailers created in the application. System Administrator enters the mailer code or mailer description to search the user, however blank search is also allowed.

The information will be displayed sorted by Date of creation.

To search the mailer:

1. In the **Mailer Code** field, enter the mailer code to view the mailer details.
OR
In the **Mailer Description** field, enter the mailer description to view the mailer details.
2. Click **Search**.
3. The search results appear on the **Mailers** screen.
OR
Click **Clear** if you want to reset the search parameters.
OR
Click **Cancel** if you want to cancel the transaction.

Mailers - Search

The screenshot shows the 'Mailers' search page in the Futura Bank system. At the top, there are navigation menus for 'System Administrator', 'ATM/Branch', 'English', and 'UBS 14.3 AT3 Branch'. The user is identified as 'Welcome, Sweta Thakur' with a last login of '29 Apr 02:46 PM'. The search filters include 'Mailer Code' and 'Mailer Description' with 'Search' and 'Clear' buttons. The results table is as follows:

Mailer Code	Mailer Description	Date Created	Send Date	Status
ML111	Debit card Platinum	25 Nov 2019 11:41:41 AM	29 Nov 2019 12:00:00 AM	Expired
ML112	Credit Card desk2	25 Nov 2019 11:38:18 AM	27 Nov 2019 12:00:00 AM	Expired
newmailer1	newmailer1	05 Dec 2019 02:35:18 PM	07 Dec 2019 12:00:00 AM	Expired
TestMail	TestMailDesc	05 Dec 2019 03:26:38 PM	05 Dec 2019 12:00:00 AM	Sent
12345	Test	17 Dec 2019 10:32:38 AM	19 Dec 2019 12:00:00 AM	Expired
Mailer12	Mailer to test confirmation page	17 Dec 2019 10:39:22 AM	01 Jan 2020 12:00:00 AM	Expired
code10	description	26 Feb 2020 05:58:10 PM	26 Feb 2020 06:00:00 PM	Expired
code1	description	26 Feb 2020 05:51:36 PM	26 Feb 2020 06:00:00 PM	Expired
code7	description	26 Feb 2020 05:54:15 PM	26 Feb 2020 06:00:00 PM	Expired
code8	description	26 Feb 2020 05:56:06 PM	26 Feb 2020 06:00:00 PM	Expired

The 'Note' box on the right states: 'Mailers are information or messages published by the Bank, to communicate about the Bank's Products, services and other important information to its users. Bank may send mailers to announce a limited period promotional product rate, launch of a product or service etc. This option enables you to manage such mailers and send it to targeted customers.' There is a 'Create' button below the note.

Field Description

Field Name	Description
Mailer Code	The unique key to identify the mailer.
Mailer Description	The description of the mailer corresponding to mailer code.

Field Name	Description
Search Results	
Mailer Code	The mailer code.
Mailer Description	The description of the mailer corresponding to mailer code.
Date Created	The date on which the mailer was created.
Send Date	The date on which mailer is sent.
Status	The status of the mailer - viz., scheduled, sent and expired.

To view the mailer details:

1. In the **Mailer - Search Results** section, click the **Mailer Code** link of the record for which you want to view the details.
The search results appear on the **Mailers - View** screen appears.

Mailer - View

The screenshot displays the 'Mailer - View' interface for Futura Bank. At the top, there is a navigation bar with 'System Administrator', 'ATM/Branch', 'English', and 'UBB 14.3 AT3 Branch'. The main content area is titled 'Mailers' and contains a 'Mail' section with the following details:

- Mailer Code: ML112
- Mailer Description: Credit Card desk2
- Send Date: 27 Nov 2019 12:00:00 AM
- Expiry Date: 28 Dec 2019 12:00:00 AM
- Send Time: 0 Hour(s) & 0 Minute(s)
- Priority: Low
- Subject: Get Rs 1000 cash back
- Mail Body: Dear Customer, Get Rs 1000 cash back on purchase of Smart phone

43. Account Aggregation

Account aggregation feature allows retail users to link their external bank accounts to OBDX and provides with an ability to view and access all their savings, term deposits and loan accounts information anytime, anywhere using single digital platform. The benefit of account aggregation is that retail users get a snapshot of all financial accounts while being able to easily retrieve account details, such as net balance available across all the current and savings accounts, recent transactions, etc. in one place. Using this feature, the user log on to the application to see all financial accounts, instead of log in to several accounts to tally up a financial overview, which saves time and effort of the user.

As a part of Account Aggregation module OBDX enables a retail user to access external bank accounts, and aggregate accounts with OBDX, the system administrator has to perform External Bank Maintenance.

[Home](#)

43.1 External Bank Maintenance

Using external bank maintenance, System Administrators can add an external bank. The external bank logo, address, URL and other details can be maintained. In addition to this, the authorization details can be captured, that will enable linking of OBDX with the external bank. Multiple external APIs can be saved, to facilitate access of data, which will then be available for the perusal of the OBDX customer.

Pre-Requisites

- Transaction access is provided to System Administrator
- Approval rule set up for System Administrator to perform the actions

Workflow

Features Supported In Application

This option allows the System Administrator to:

- View External Bank Details
- Add External Bank
- Update External Bank Details
- Delete External Bank

How to reach here:

System Administrator Dashboard > Personal Finance > External Bank Maintenance

OR

System/ Bank Administrator Dashboard > Toggle Menu > Personal Financial Management > External Bank Maintenance

43.1.1 Search and View External Bank's Details

System Administrators can search and view the details of the external banks already maintained in the application.

To view external bank's details:

1. In the **Bank Name** field, enter the bank name to search for a specific external bank.
2. Click **Search**.
List of external banks matching search criteria appears in search summary section.
OR
Click **Cancel** to cancel the transaction and navigate the user back to **Dashboard**.
OR
Click **Clear** to reset the details.
OR
Click **ADD** to add new external bank.

External Bank Maintenance - Search Result

The screenshot displays the 'External Bank Maintenance' interface. At the top, there's a navigation bar with 'System Administrator', 'ATM/Branch', 'English', and 'UBS 14.3 AT3 Branch'. Below this, the 'futura bank' logo is on the left, and a search bar on the right shows 'Welcome, Sweta Thakur' with a last login time of '29 Apr 02:46 PM'. The main content area is titled 'External Bank Maintenance' and features a search form with a 'Bank Name' field containing 'Fio Bank', a 'Search' button, and a 'Clear' button. Below the search form is a table with columns: 'Bank Logo', 'Bank Name', 'Bank URL', 'Enable OAuth Details', and 'Enabled on'. The table contains one entry for 'Fio Bank' with a logo, the name 'Fio Bank', the URL 'https://www.fio.cz/', 'Enabled' status, and the date '12 Nov 2019'. Below the table is a pagination control showing 'Page 1 (0 of 0 items)' and a 'Cancel' button. On the right side, there's a sidebar titled 'Add and Maintain External Bank Accounts' with an 'Add' button and explanatory text about maintaining external banks for account aggregation.

Field Description

Field Name	Description
Bank Logo	The external Bank's logo.
Bank Name	The name of the external bank maintained in OBDX.
Bank URL	The URL of the external bank maintained in OBDX.

Field Name	Description
Enable OAuth Details	The status of the external bank's authorization details, if enabled or disabled.
Enabled on	If the status of an external bank is enabled, then date and time on which the bank is enabled for customers.

- Click **Bank Name** link on **External Bank Maintenance** screen.
The bank details maintained appears on **External Bank Maintenance - View** screen.

External Bank Maintenance - View

The screenshot shows the 'External Bank Maintenance - View' interface. At the top, there is a navigation bar with 'System Administrator', 'ATM/Branch', 'English', and 'UBS 14.3 AT3 Branch'. The main header includes the 'futura bank' logo and a user profile for 'Sweta Thakur' with a last login time of '29 Apr 02:46 PM'. The page title is 'External Bank Maintenance'.

The content is organized into three main sections:

- Bank Details:**
 - Bank Name: Fio Bank
 - Bank Address: t4 Rybna, Prague 110 00
 - Bank URL: https://www.fio.cz/
 - Bank Logo: NA
 - Bank Identifier: fio
- OAuth Authorization Details:**
 - Enable OAuth Details: Enabled
 - Authorization URL: http://mum00bob.in.oracle.com:3333/digx-auth/oauth2/auth?response_type=code&domain=OBDXThirdPartyAppDomain
 - Token URL: http://mum00bob.in.oracle.com:3333/digx-auth/v1/token
 - Revoke URL: http://mum00bob.in.oracle.com:3333/digx-auth/v1/revoke
 - Redirect URL: http://mum00boa:12777/oauthredirect.html
 - Client ID: obba721-6731-457c-b351-7320f0b7424
 - Client Secret Keys: *****
 - Scope: accounts
- External API Details:**
 - Account List: http://mum00bob.in.oracle.com:31003/digx/v1/accounts

At the bottom left, there are 'Edit' and 'Cancel' buttons. On the right side, there is a 'Notes' section with the text 'External Bank Account Details.' The footer contains the copyright notice: 'Copyright © 2006, 2020, Oracle and/or its affiliates. All rights reserved. | Security Information | Terms and Conditions'.

Field Description

Field Name	Description
Bank Details	
Bank Name	The name of the external bank maintained in OBDX.
Bank Address	The address of the external bank maintained in OBDX.
Bank URL	The URL of the external bank maintained in OBDX.
Bank Logo	The external Bank's logo.
Bank Identifier	The external bank identifier.
OAuth Authorization Details	
Enable OAuth Details	Displays the authorization details status for the external bank i.e. whether to enable /disable.
Authorization URL	Displays the authorization url.
Token URL	Displays the Token url.
Revoke URL	Displays the Revoke url.
Redirect URL	Displays the Redirect url.
Client ID	Displays the Client ID.
Client Secret Keys	Displays the Client secret keys.
Scope	Displays the applicable scope(s) for the external bank.
External API Details	
External API's	Displays the category of external API's exchanged between the Banks.
API URL	Displays the API URL.

4. Click **Edit** to edit the external bank details.
OR
Click **Delete** to delete the external bank details.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Back** to navigate to previous screen.

43.1.2 Add External Bank

System Administrators can add an external bank - so that it is available to the Retail User for account aggregation services (on successful authorization of this maintenance). System Administrators can add external bank details like Bank details, Bank Authorization details, multiple external APIs (to facilitate access of data between OBDX and the External Bank.)

To add external bank:

1. In the **External Bank Maintenance** screen, click **Add**. The **External Bank Maintenance - Create** screen appears.

External Bank Maintenance - Add

The screenshot displays the 'External Bank Maintenance - Add' interface. At the top, the navigation bar shows 'System Administrator', 'ATM/Branch', 'English', and 'UBS 14.3 AT3 Branch'. The user is identified as 'Welcome, Sweta Thakur' with a last login of '29 Apr 02:46 PM'. The main content area is titled 'External Bank Maintenance' and contains the following sections:

- Bank Details:**
 - Bank Name: FIO Bank
 - Bank Address: London Link Road, London
 - Bank URL: https://www.fio.com/
 - Bank Logo: Goal Category Image (Remove)
 - Bank Identifier: FIO
- OAuth Authorization Details:**
 - Enable OAuth Details:
 - Authorization URL: http://mum00boa.in.oracle.com:18777/?pa
 - Token URL: http://mum00boa.in.oracle.com:18777/?pa
 - Revoke URL: http://mum00boa.in.oracle.com:18777/?pa
 - Redirect URL: http://mum00boa.in.oracle.com:18777/?pa
 - Client ID: 112111
 - Client Secret Keys: ****
 - Scope: Accounts
- External API Details:**
 - Account List: http://mum00boa.in.oracle.com:18777
 - Add External API

At the bottom of the form are 'Save', 'Cancel', and 'Back' buttons. The right sidebar contains a 'Notes' section with the title 'External Bank Account Details'.

Field Description

Field Name	Description
Bank Details	
Bank Name	Specify the name of the external bank.
Bank Address	Enter address of the external bank.
Bank URL	Specify the URL of the external bank.
Bank Logo	Upload logo of the bank through browse and upload image option.
Bank Identifier	Enter the external bank identifier.
OAuth Authorization Details	
Enable OAuth Details	Select the authorization details status for the external bank i.e. whether to enable /disable.
Below fields is enabled only if the Enable OAuth Details field is enable under OAuth Authorization Details section	
Authorization URL	Specify the authorization URL.
Token URL	Specify the Token URL.
Revoke URL	Specify the Revoke url.
Redirect URL	Specify the Redirect url.
Client ID	Specify the Client ID.
Client Secret Keys	Specify the Client secret keys.
Scope	Specify the applicable scope(s) for the external bank.
External API Details	

Field Name	Description
External API's	<p>Select the external API's category, to access data between OBDX and the External Bank.</p> <p>The External API could be to access the following information of the User's External Bank accounts:</p> <ul style="list-style-type: none"> • Account List • Account Details • Account Summary • Account Activity
API URL	Specify the API URL.

2. In the **Bank Name** field, enter the external bank's name.
3. In the **Bank Address** field, enter the external bank's address.
4. In the **Bank URL** field, enter the external bank's url.
5. Click **Choose Files** or **Drag Files here**, browse and upload image of bank logo.
6. In the **Bank Identifier** field, enter the external bank's identifier.
7. Click the **Enable OAuth Details** toggle button to enable or disable the authorization details.

Note: **OAuth Authorization Details** are maintained for the external bank, if the status of the **Enable OAuth Details** field is enabled.

8. In the **Authorization URL** field, enter the external bank's authorization url.
9. In the **Token URL** field, enter the external bank's token url.
10. In the **Revoke URL** field, enter the external bank's revoke url.
11. In the **Redirect URL** field, enter the external bank's redirect url.
12. In the **Client ID** field, enter the external bank's client ID.
13. In the **Client Secret Keys** field, enter the external bank's client secret keys.
14. In the **Scope** field, enter the appropriate scope for the external bank.
15. From the **External APIs** list, select the external API's exchanged between the Banks in **External API Details** section.
16. Click **+ Add External API** to add more APIs.
The list appears to select the APIs.
 - a. From the drop-down list, select the appropriate option.
 - b. In the **API URL** field, enter the API url.
 - c. OR
Click  against the particular already added External API to delete it.

17. Click **Save** to update the changes.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Back** to navigate to previous screen.
18. The **Review** screen appears. Verify the details, and click **Confirm**.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Back** to navigate to previous screen.
19. The success message of external bank details creation appears.
Click **OK** to complete the transaction.

43.1.3 Update External Bank's Details

System Administrators can view and update the details of the external banks already maintained in the application. System Administrators can modify Bank details, Authorization details and External API information.

To edit External bank details:

1. In the **Bank Name** field, enter the bank name to search for the specific external bank.
2. Click **Search**.
List of external banks matching the search criteria appears in search summary section.
OR
Click **Cancel** to cancel the transaction and navigate the user back to Dashboard.
OR
Click **Clear** to reset the details.
3. Click **Bank Name** link on **External Bank Maintenance** screen.
The bank details maintained appears on **External Bank Maintenance - View** screen.
4. Click **Edit** to edit the external bank details. The **External Bank Maintenance - Edit** screen appears with values in editable form.

6. The **External Bank Maintenance** screen with the successful object deletion message appears. Click **OK** to complete the transaction.

[Home](#)

44. Spend Category

Using this option, the System Administrator can maintain the spend categories. Spend Category maintenance allows the System Administrator to create, modify or expire categories. For each of the Spend Category, System Administrator shall be able to map its corresponding sub categories under which the transactions will be tagged. This maintenance is done only for retail customers. Any time there can be a maximum of 7 categories available and each will have a unique category code. Spend categories cannot be deleted.

The each spend category can have up to four sub categories each.

Prerequisites

- Transaction access is provided to System Administrator
- Transactions which needs to be mapped to different categories are maintained
- Transaction description must have keywords which can be distinguished by rule engine for classification into subcategories

Workflow

Features Supported In Application

The Spend Category maintenance allows the System Administrator to:

- Search and View Spend Category
- Create Spend Category
- Edit Spend Category
- Add Spend Sub Category
- Edit Spend Sub Category

How to reach here:

System Administrator Dashboard > Personal Finance > Spend Category

OR

System/ Bank Administrator Dashboard > Toggle Menu > Personal Financial Management > Spend Category

44.1 Spend Category - Search

Using Spend category search option, System Administrators search the existing spend category. The search result displays a particular spend categories based on search criteria entered.

If the search parameters are not specified, then it displays all the records.

To search a spend category:

1. Enter the search criteria, click **Search**. The search results appear on the **Spend Category** screen based on the search parameters.
OR
Click **Clear** if you want to reset the search parameters.
OR
Click **Cancel** if you want to cancel the transaction.

Spend Category - Search

The screenshot shows the 'Spend Category Maintenance' page. At the top, there is a navigation bar with 'System Administrator', 'ATM/Branch', 'English', and 'UBS 14.3 AT3 Branch'. Below this is the 'futura bank' logo and a user profile for 'Welcome, Siveta Thakur' with a last login time of '29 Apr 02:46 PM'. The main content area has a search form with 'Category Code' and 'Category Name' input fields, a 'Search' button, and a 'Clear' link. Below the search form is a table with two columns: 'Category Code' and 'Category Name'. The table contains the following data:

Category Code	Category Name
Essentials	Essentials
Monthly Expenses	Monthly Expenses
Code 1	Shopping
Wallet_Fund	Wallet_Fund
Investment	Investment
Travel	Travel
Spend1	Education Fees

At the bottom of the table, there is a pagination control showing 'Page 1 of 1 (1-7 of 7 items)' and navigation arrows. A 'Cancel' button is located below the table. To the right of the table is a 'Note' box with a document icon and the following text: 'These are the various categories amongst which customer's expenses will be mapped. Maintenance of seven categories are allowed and each category will have a unique code. All categories can have subcategories to further bifurcate the expenses. Most common type of expenses can be categorized so that most of the customer's expenses get mapped.' Below the note is a 'Create' button.

FAQ

1. How many spend categories can a System Administrator can create?

A System Administrator can create maximum of seven categories. However this is a Data base configuration and can be increased or decreased at the time of implementation.

2. How many spend sub-categories can a System Administrator can create?

A System Administrator can create a maximum of four sub-categories under a main category.

3. What is category code used for?

It is used as a unique key to distinguish different categories.

4. How are the transactions being mapped to the categories?

The categories would be linked to a rule engine which will use some keywords in the description of transaction and get mapped to the category or sub category on its own.

[Home](#)

45. Goal Category Maintenance

Goal Category maintenance allows the System Administrator to create, modify or expire goal categories. For each of the Goal Category, System Administrator can map the Product under which the goals will be opened. This maintenance is done only for retail type of parties and is not applicable for corporate type of parties. Any time there can be a maximum of 10 categories available and each will have a unique category code.

Administrator created categories needs to be linked with a product which will decide the other key parameters which will govern the Goal category. These parameters would be:

- Goal Amount Range (Minimum and Maximum Value)
- Interest Rate Offered
- Tenure Range (Minimum and Maximum)

Prerequisites

- Transaction access is provided to System Administrator
- Products which needs to be mapped to different categories are well maintained
- Goal categories to be made are limited and cannot be deleted

Workflow

Features Supported In Application

Goal category maintenance available for System administrator include

- Search Goal Category
- Create Goal Category
- Edit Goal Category

How to reach here:

System Administrator Dashboard > Personal Finance > Goal Category

OR

System/ Bank Administrator Dashboard > Toggle Menu > Personal Financial Management > Goal Category

45.1 Goal Category - Search

Using this option, System Administrators can search the existing goal category already created. The search result displays matching results of the goal based on search criteria entered.

If the search parameters are not specified, then it displays all the records. The search criteria comprises of two parameters:

- Category Code
- Category Name

Category code will be a unique code which can be used by administrator to distinguish Goals which can vary on the product mapped.

To search a goal category:

1. Enter the search criteria, click **Search**. The search results appear on the **Goal Category** screen based on the search parameters.
OR
Click **Clear** if you want to reset the search parameters.
OR
Click **Cancel** if you want to cancel the transaction.

Search Goal Category

The screenshot displays the 'Goal Category Maintenance' page. At the top, there is a navigation bar with 'System Administrator', 'ATM/Branch', 'English', and 'UBS 14.3 AT3 Branch'. Below this is the 'futura bank' logo and a user welcome message: 'Welcome, Sweta Thakur' with 'Last login 29 Apr 02:46 PM'. The main content area has two input fields: 'Category Code' and 'Category Name'. Below these are three buttons: 'Search', 'Cancel', and 'Clear'. A table lists the following categories:

Category Code	Category Name	Product Type	Product	Status
CAR	CAR	TD	TD topup	Active
Education	Education	TD	TD topup	Active
HOME001	Home	TD	goal product	Active
olympics	Olympics tour	TD	goal product	Active
Tour	Tour	TD	TD topup	Active
Travel	Travel	TD	TD topup	Active

At the bottom of the table, it says 'Page 1 of 1 (1-6 of 6 items)'. To the right of the table is a 'Note' box with an icon of a document and the following text: 'These are the various categories amongst which customer's goals will be mapped. Each category will have a unique code for easier maintenance. Each category will have a product mapped to it and the category will have the limits accordingly. Option to have an image linked to the goal is also available.' Below the note is a 'Create' button. At the very bottom of the page, there is a copyright notice: 'Copyright © 2006, 2020, Oracle and/or its affiliates. All rights reserved. | Security Information | Terms and Conditions'.

Status	Status of the category, whether it is active or expired.

45.1.1 Goal Category - View

Using Goal category view option, the System Administrator can view the goal categories which already exist.

To view a goal category:

1. Enter the search criteria, click **Search**. The search results appear on the **Goal Category** screen based on the search parameters.
2. Click the Category Name link of the record for which you want to view the goal category. The **Goal Category - View** screen appears.

Goal Category - View

The screenshot shows the 'Goal Category Maintenance' interface for 'futura bank'. The user is logged in as Sweta Thakur. The page displays the following information:

- View**
 - Category Code: CAR
 - Category Name: CAR
 - Expiry Date: 30 Jun 2019
 - Category Image:
- Product Mapping**
 - Product: TD topup
- Product Details**
 - Initial Funding Limit: Min - 500 Max - 10000000000000
 - Currency: GBP
 - Top Up Allowed: OPTION_YES
 - Tenure: Min - 0 yrs Max - 7 Yrs
 - Interest Rate: [View Interest Rates](#)
 - Partial Withdrawal Allowed: OPTION_YES

Buttons for 'Edit' and 'Cancel' are visible at the bottom left. The footer contains copyright information: Copyright © 2006, 2020, Oracle and/or its affiliates. All rights reserved. | Security Information | Terms and Conditions

Field Description

Field Name	Description
Category Code	Unique ID maintained for the category for internal search for bank administrator.
Category Name	Name of the category.
Expiry Date	Expiry date of the goal category. If the expiry date reaches, the user will not be able to view the category.
Category Image	Image assigned for goal category.
Product Mapping	
Product	Name of the product mapped to the category under which the goal shall be opened.
Product Details	
Initial Funding Limit	The initial amount that the user can invest for his goal.
Tenure	The period of the goal created should fall within this range.

Field Name	Description
Currency	The currency with which a goal can be created.
Interest Rate	Click the View Interest Rates hyperlink to view the interest rate slab. Interest rate slab is set for the particular tenure, and is displayed according to the amount selected.
Top Up Allowed	Whether top up for the goal is allowed or not.
Partial Withdrawal Allowed	Whether partial withdrawal of the goal is allowed or not.

-
3. Click **Edit** to if you want to edit the goal category.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Back** to navigate to the previous screen.

45.2 Goal Category - Create

Using Goal category create option, the System Administrator can create new goal categories and sub categories.

To create a goal category:

1. In the **Goal Category** screen, click **Create**. The **Goal Category - Create** screen appears.

Goal Category - Create

The screenshot displays the 'Goal Category - Create' interface. At the top, the user is logged in as 'System Administrator' at 'ATM/Branch' in 'English' on the 'UBS 14.3 AT3 Branch'. The page title is 'Goal Category Maintenance'. The main form has the following fields:

- Category Code:** HOME001
- Category Name:** Home
- Expiry Date:** 14 Jun 2019
- Category Image:** A photograph of a house with a swimming pool, with a 'Remove' button below it.

Below the form is the 'Product Mapping' section, which includes a 'Product' dropdown menu currently set to 'goal product'. Underneath, there are 'Product Details' with the following information:

Initial Funding Limit	Min - 500 Max - 10000000000000	Tenure	Min - 0 yrs Max - 7 Yrs
Currency	GBP	Interest Rate	View Interest Rates
Top Up Allowed	OPTION_YES	Partial Withdrawal Allowed	OPTION_YES

At the bottom left, there are 'Save', 'Cancel', and 'Back' buttons. On the right side, a 'Note' box contains the following text:

A user can add multiple goal categories. Every goal category will have a product mapped to it which will be underlying for all the goals set under the category. It will have an expiry date after which no goals under that category can be set. A relevant image can be linked to the goal category which user can relate to.

Click **OK** to complete the transaction.

FAQ

1. Can I create a category with unique category code but a common category name?

No, category code and category name, both should be unique.

2. Can I delete a goal category?

No, goal category once created cannot be deleted. However you can update an expiry date.

3. How many Goal categories can be created?

Administrator can create a maximum of ten goal categories. At a time there can be a maximum of ten active goal categories. Expired goal categories are treated as inactive categories.

46. Manage Brand

Banks can have varied requirements with regards to the theme and for look and feel of the application.

Manage Brand is an administrative maintenance that allows the System Administrator to define the theme using brand logo, colors, fonts and font sizes.

System Administrator can configure the style / theme by selecting brand logo, header, background, label, button and font colors, font type and sizes for header text, menu, buttons etc. The administrator can define multiple themes with the above-mentioned attributes and once defined, the administrator can activate one of the themes from the available list. The administrator defines brand attributes for user segments.

This function also enables the System Administrator to create themes which will be available for Retail user for personalizing his view.

At any point in time, the administrator can deactivate a theme and activate another one.

Prerequisites

- Transaction access is provided to System Administrator

Features supported in application

- View Brand
- Create Brand
- Edit Brand
- Delete Brand
- Brand Mapping

How to reach here:

System Administrator Dashboard > User Experience > Manage Brand

OR

System/ Bank Administrator Dashboard > Toggle menu > User Experience > Manage Brand

Manage Brand – Summary

The screenshot shows the 'Manage Brand' page in the Futura Bank system. The page header includes the user 'System Administrator', 'ATM/Branch', 'English', and 'UBS 14.3 AT3 Branch'. The main content area has a 'Manage Brand' title and two tabs: 'Brand' (selected) and 'Mapping'. A table lists existing brands with columns for Brand Name, Brand Description, Date Created, and Actions. A 'Create' button is visible on the right side of the page.

Brand Name	Brand Description	Date Created	Actions
Rakuten Demo Brand	This is a demo brand for Rakuten	02 Dec 2019	View
test2	test2	29 Nov 2019	View
test1	test1	29 Nov 2019	View
test	test	29 Nov 2019	View
UI Refresh	New UI for 19.1	21 Jun 2019	View
Demo Brand	Demo Brand Description	19 Jun 2019	View

Footer	An example of how the footer will be displayed, based on brand definition.

3. In the **Brand Name** field, edit the name of the brand, if required.
4. In the **Brand Description** field, edit the description of the theme, if required.
5. Under the **Customized Brands** sections, click  and expand any sub section and make changes to any component as required.
6. Click **Update** to save the changes.
OR
Click **Cancel** to cancel the maintenance and navigate to the 'Dashboard'.
OR
Click **Reset** to clear the entered values in the screen.
OR
Click **Back** to navigate to previous screen.
7. The **Review** screen appears. Verify the details, and click **Confirm**.
OR
Click **Edit** to make the changes if any.
OR
Click **Cancel** to cancel the maintenance.
8. The success message appears along with the status of maintenance. Click **OK** to return to the dashboard.

46.4 Manage Brand - Delete

The System Administrator can delete a created brand maintained in the application.

To delete the brand:

1. In the **Action** column, click **View** against the brand which you want to delete. The **Manage Brand - View** screen appears.
2. Click **Delete**. A message appears asking the user to confirm brand deletion. Click **Delete** to confirm deletion of the brand.
OR
Click **Cancel** to cancel deletion and return to the **Manage Brand – View** screen.

Delete Brand

The screenshot displays the 'Brand Details' page in the Futura Bank Admin Console. The page header includes 'System Administrator', 'ATM/Branch', 'English', and 'UBS 14.3 AT3 Branch'. The user is identified as 'Welcome, Sweta Thakur' with a last login of '29 Apr 02:45 PM'. The 'Brand Details' section shows the following information:

Brand ID	22362
Brand Name	Demo Brand
Brand Description	Demo Brand Description
Available for business user	Available

The 'Delete' button is highlighted, and a confirmation dialog box is displayed in the center. The dialog box contains the following text:

Delete

Are you sure you want to delete an active brand?
Deleting an active brand will revert the application to factory theme.

Buttons: Delete, Cancel

The background page is dimmed, showing a list of components on the left and a preview of the application theme on the right. The preview includes a banner with the text 'Open banking is an emerging trend in f...' and several buttons labeled 'Primary Button', 'Secondary Button', 'Tertiary Button', and 'Help Button'. At the bottom of the page, there are 'Edit', 'Delete', and 'Back' buttons.

3. The success message appears along with the status of the maintenance. Click **Ok** to return to the dashboard.

46.5 Brand Mapping

Using this option System Administrator can map the existing brands to any user, party, role or entity.

46.5.1 Brand Mapping Search

To view the brand mapping details:

1. In the **Manage Brand** screen, click the **Brand Mapping** tab. The **Manage Brand - Brand Mapping** screen appears.

Brand Mapping

Field Description

Field Name	Description
Mapping Type	<p>A list of options for the mapping type to search which brand it is mapped to appear.</p> <p>The options are:</p> <ul style="list-style-type: none"> • User • Party • Segment • User Type • Entity

2. From the **Mapping Type** list, select the option for which you want to view the mapping. The **Manage Brand – Search Results** appear.

Manage Brand - Brand Mapping Summary

The screenshot shows the 'Manage Brand' interface with the 'Mapping' tab selected. A dropdown menu for 'Mapping Type' is set to 'Party'. The table below contains one entry:

Brand Id	Mapped Value	Mapping Type	Date Created	Actions
39163	004308	PARTY	09 Dec 2019	Delete

To the right of the table is a 'Brand Mapping' callout box with an icon of a hand pointing to a screen. The text inside the box reads: 'One brand theme can be linked to multiple User, Party, Role or Entity. Click below to start mapping your themes.' Below the text is a 'Create Mapping' button.

At the bottom of the interface, there is a copyright notice: 'Copyright © 2006, 2020, Oracle and/or its affiliates. All rights reserved. | Security Information | Terms and Conditions'.

Field Description

Field Name	Description
------------	-------------

Brand Mapping Summary

Brand Id	The identification number of the mapped theme.
Mapped Value	<p>The value, which is mapped to the brand.</p> <p>The mapped value depends on the selected mapping type. For example, If the mapping type is 'user' the mapping value will be 'user ID', If the mapping type is 'party' the mapping value will be 'party ID', If the mapping type is 'role' the mapping value will be user role, such as 'Corporate' 'Retail' and 'Administrator', If the mapping type is 'entity' the mapping value will be 'entities'.</p>
Mapping Type	The level at which the brand is mapped.
Date Created	The date on which the brand mapping was performed.
Actions	<p>The available actions that can be performed against the brand mapping are displayed.</p> <p>The options can be:</p> <ul style="list-style-type: none"> • Delete

3. Click **Delete** against a record to delete the brand mapping.
OR
Click **Create Mapping in the Help Panel**, to create a brand mapping.

46.5.2 Create Mapping

Using this option System Administrator can create a brand mapping.

To create the brand mapping:

1. In the **Brand Mapping** tab, click **Create Mapping button in the Help Panel**. The **Manage Brand - Create Mapping** screen appears.

Manage Brand- Create Mapping

Field Description

Field Name	Description
Mapping Type	Select the level at which the brand is to be mapped. The options are: <ul style="list-style-type: none"> • User • Party • User Type • Entity
Brand	Select a brand to be mapped at the level selected under Mapping Type.

Field Name	Description

3. The **Review** screen appears. Verify the details, and click Confirm.
OR
Click **Edit** to make the changes if any.
OR
Click **Cancel** to cancel the maintenance.
4. The success message appears along with the status of maintenance. Click **OK** to return to the dashboard.

[Home](#)

47. Dashboard Builder

Dashboard Builder provides an ability to the Bank to build custom dashboards.

Dashboard Builder is an administrative maintenance that allows the System Administrator to create and configure dashboard templates for Retail, Corporate and Administrator users.

System Administrator can configure new dashboards by dragging and dropping the desired widget at desired location in template. System administrator can define the dashboard for a user segment, application role, module and for a user type. Facility is provided to search, view, edit and delete the configured dashboards.

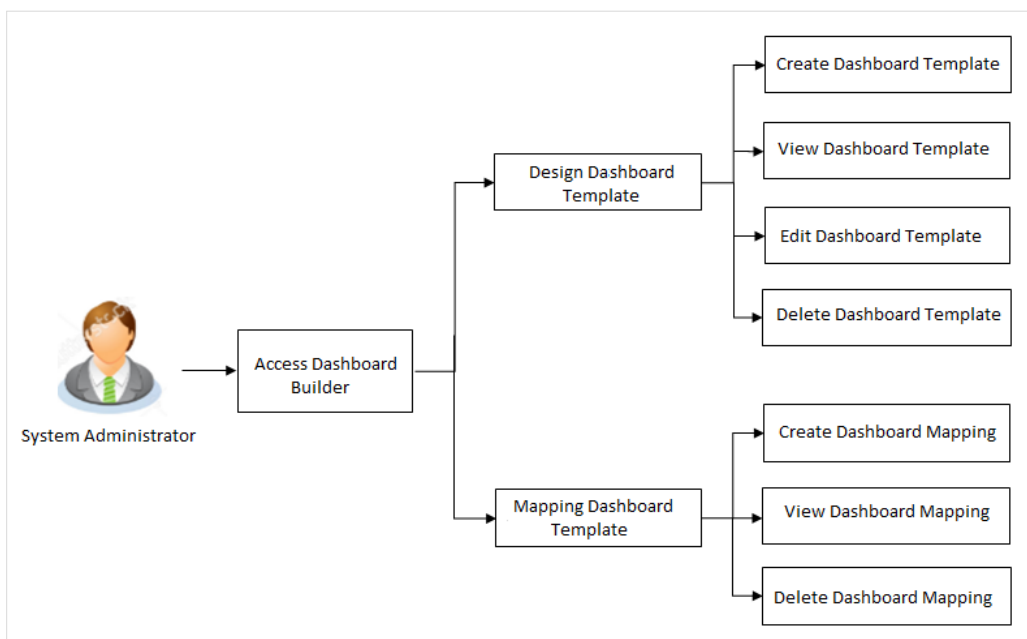

These dashboards are responsive and can adapt to any type of device i.e. desktop, mobile and tablet. System allows the user to design new template and preview it for different types of devices before enabling it. The user can also change the size of the widget (expand and compress) and can remove the widget from the template if desired. The widgets on the dashboard auto adjust itself according to the place available on the dashboard.

The administrator can define multiple dashboards with the various attributes/ widgets. Further these templates can be mapped to the roles, party or even to a specific user.

Prerequisites

- Transaction access is provided to System Administrator
- Approval rule set up for System Administrator to perform the actions
- Application roles are maintained in application and widgets are mapped to application roles

Workflow

Features supported in application

Design

- Create New Dashboard
- View Dashboard
- Edit Dashboard
- Delete Dashboard

Mapping

- View Dashboard Mapping
- Create Dashboard Mapping
- Delete Dashboard Mapping

How to reach here:

System Administrator Dashboard > User Experience > Dashboard Builder

OR

Bank Administrator Dashboard > Toggle Menu > User Experience > Dashboard Builder

Dashboard Builder – Summary

Dashboard Builder- Design summary page displays the list of already designed templates, with template name, description, dashboard type, value and date of creation. The administrator can view the dashboard template details by clicking the View link in the Action column against the respective template.

The screenshot shows the 'Dashboard Builder' application interface. At the top, there is a navigation bar with 'System Administrator', 'ATM/Branch', 'English', and 'UBS 14.3 AT3 Branch'. Below this is the 'futura bank' logo and a user profile for 'Sweta Thakur' with a 'Last login 05 May 01:30 PM' timestamp. The main content area is titled 'Dashboard Builder' and has two tabs: 'Design' (selected) and 'Mapping'. Under the 'Design' tab, there are radio buttons for 'User Type': 'Corporate User', 'Administrator' (selected), and 'Retail User'. Below this is a search bar for 'Template Name' with the placeholder text 'Search by Template Name'. A table lists several dashboard templates:

Template Name	Description	Type	Value	Date Created	Actions
Dashboard authadmin	Factory Dashboard for authadmin	Application Role	authadmin	05 May 2020	View
Dashboard auditadmin	Factory Dashboard for auditadmin	Application Role	auditadmin	05 May 2020	View
Dashboard adminchecker	Factory Dashboard for adminchecker	Application Role	adminchecker	05 May 2020	View
Dashboard adminmaker	Factory Dashboard for adminmaker	Application Role	adminmaker	05 May 2020	View
pie1	pie chart1	Application Role	AuthAdmin	05 Mar 2020	View

At the bottom left of the table area are 'Back' and 'Cancel' buttons. On the right side, there is a panel titled 'Build your own Dashboard' with the text 'You can create and configure dashboard templates and reuse them later.' and a 'Create' button.

Field Description

Field Name	Description
User Type	Specify the user type for which the dashboard template needs to be viewed. The options are: <ul style="list-style-type: none"> • Corporate User • Administrator • Retail User
Template Name	Name of the template that the administrator can enter to view the specific template.
Search Results	
Template Name	Displays the name of the custom dashboard template.
Description	Displays the description as defined for the custom dashboard template.
Type	Displays the type for which the dashboard template is created i.e. application role, segment, user type or module.
Value	Displays the name of the application role / segment / module for which the dashboard template is defined.
Date Created	Displays the date of dashboard template creation.
Actions	The available action buttons against the dashboard template are displayed. The action button can be: <ul style="list-style-type: none"> • View: Click to view the created dashboard template.

1. In the **Action** column, click **View** to view the already created dashboard template.
OR
Click Back to navigate to the previous screen.

47.1 Dashboard Builder – View

Using this option, System Administrator can view the details of already created dashboard template. The system administrator can view the template in desktop, tablet and for mobile mode by clicking the respective icons.

To search and view a dashboard template:

1. In the **Dashboard Builder – Summary** screen, select the appropriate type of user in the **User Type** field. All the dashboard templates of the selected user type appears on the screen.
OR
In the **Template Name** field, enter the name of the template that you want to search. The searched dashboard template appears on the screen.
2. In the **Action** column, click **View** against the template, which you want to view. The **Dashboard Builder - View** screen appears.
OR
Click **Back** to navigate to the previous screen.
OR
Click **Cancel** to cancel the transaction and navigate to the 'Dashboard'.

Dashboard Builder – View

3. Click **Edit** to modify the template. The **Dashboard Builder - Edit** screen appears.
OR
Click **Delete** to delete the dashboard template.
OR
Click **Cancel** to cancel the transaction and navigate to the 'Dashboard'.
OR
Click **Back** to navigate to the previous screen.
OR
Click the **Desktop/ Tab/ Mobile** icon to view the template in desktop, tab or mobile mode.

47.2 Dashboard Builder – Create

System Administrator can create new custom dashboard template for Retail, Corporate and Administrator user using this option.

As part of creation of custom dashboard, the administrator needs to select the appropriate tab for which the dashboard needs to be created/ designed i.e. user segment or module or application role or user type.

System will facilitate the user with a default dashboard available and the administrator can decide to create a custom dashboard by dragging and dropping new widgets available from the list of widgets.

Following types of dashboard can be created:

- Segment Dashboard - Design dashboard for a user segment
- Application Role Dashboard - Design dashboard for an application role
- Module Dashboard - Design dashboard for the available application modules i.e. CASA, Term Deposit, Loans etc.
- User Type Dashboard - Design dashboard for a user type i.e. Retail, Corporate or Administrator.

To create a new dashboard template:

1. In the **Dashboard Builder** screen, click **Create**. The **Dashboard Builder** screen appears in create mode.

Dashboard Builder - Create

The screenshot displays the 'Dashboard Builder - Create' interface. At the top, there is a navigation bar with 'System Administrator', 'ATM/Branch', 'English', and 'UBS 14.3 AT3 Branch'. Below this, the 'futura bank' logo is visible. The main content area is titled 'Dashboard Builder' and contains a form with the following fields:

- Template Name: Retail001
- Template Description: Retail Segment01
- Design: Desktop, Tab, Mobile
- Segment Dashboard: Application Role Dashboard, Module Dashboard, User Type Dashboard
- User Type: Corporate User, Administrator, Retail User

Below the form, there is a section titled 'Application Role Based Modules' with four preview thumbnails labeled 'Customer', 'Member', 'testret', and 'Wallet'. At the bottom of the form, there are 'Next', 'Cancel', and 'Back' buttons. The footer of the page contains the text: 'Copyright © 2006, 2020, Oracle and/or its affiliates. All rights reserved. | Security Information | Terms and Conditions'.

Field Description

Field Name	Description
Template Name	Name of the template that the System Administrator user wants to create.
Template Description	Description for the template.
Design	The type of device on which the template will be enabled.
Select Module	System lists the dashboard for the segments / application roles / user type / module depending on the option selected.
User Type	Select the user type for which the dashboard needs to be created. If dashboard needs to be created for a user segment then user type 'Retail' needs to be selected. User Segment is not supported for Corporate and Administrator user.

Field Name	Description
Select Module Icon	Select the dashboard icon that is displayed based on the selected segments / application roles / user type / module.
List of Dashboards	System displays the list of dashboards available for selection based on the selected module type.

2. In the **Template Name** field, enter the name of the new template that is to be created.
3. In the **Template Description** field, enter the description of the new template.
4. To enable the template for Desktop/ Tablet / Mobile, select the required options from the **Design** check box.
5. From the **Segment Dashboard/ Application Role Dashboard/ Module Dashboard/ User Type Dashboard** tabs, select the appropriate module. The **Dashboard Builder - Design** screen of the selected module appears.
For example, Retail is selected from the **User Type Dashboard**. The Dashboard Builder - Design template for Retail user appears.
6. In the **User Type** field, select the appropriate user type. If dashboard needs to be created for a user segment then user type 'Retail' needs to be selected. User Segment is not supported for Corporate and Administrator user.
7. Select the appropriate dashboard from the list of dashboards displayed based on the selected module.
8. Click **Next**. The **Dashboard Builder** template screen appears.
OR
Click **Cancel** to cancel the transaction and navigate to the 'Dashboard'.
OR
Click **Back** to navigate to previous screen.

Note: In case of Segment based and application role based dashboard, system will list the widgets based on the mapping of application role(s) to widgets in the Role to Transaction mapping.

System will always display the widgets (for dashboard building) mapped to a combination of application role and internet as touch point (definition in Role Transaction Mapping) irrespective of any device size the user selects.

Dashboard Builder - Create

The screenshot shows the Oracle Dashboard Builder interface. At the top, there is a navigation bar with the following items: System Administrator, ATM/Branch, English, and UBS 14.9 AT3 Branch. Below this is the 'futura bank' logo and a search bar. The main content area is titled 'Dashboard Builder' and shows a configuration screen for a dashboard. On the left, there is a 'Search Widgets' list with various widget categories like My Bills, Forex Calculator, Loan Calculator, etc. The main area displays a preview of the dashboard with several widgets: 'My Net Worth' (on 05 May 2020), 'Recent Activity' (Current And Savings), 'My Spends' (Last 30 days, £430,187.37 Total Spends), 'My Accounts' (Current & Savings: £10,764,896.94, Term Deposits: £8,000.00, etc.), 'Upcoming Payments' (John: £200.00, Own Account: £100.00, etc.), and 'Goals' (Currently, you have 1 active goal!). At the bottom, there are 'Save', 'Cancel', and 'Back' buttons.

9. Drag and drop the desired widgets from the widget list.
OR
In the **Search Widget** field, enter the name of the widget that you want to appear on the dashboard and click  .
OR
Drag and drop widgets of the dashboard to the desired location. System highlights the area where the widget can be dropped.
10. Click  on the upper right corner of the widget, if you want to expand the widget.
OR
Click  on the upper right corner of the widget, if you want to compress the widget.
OR
Click  on the upper right corner of the widget, if you want to remove the widget from the dashboard.

11. If the selected widget has multiple widgets on the same like quick links, select the required widget that you want to appear on the dashboard.
12. Click **Save** to save the template.
OR
Click **Cancel** to cancel the transaction and navigate to the 'Dashboard'.
OR
Click **Back** to navigate to previous screen.
13. The **Review** screen appears. Verify the details, and click **Confirm**.
OR
Click the **Desktop/ Tab/ Mobile** icon to review the created template in desktop, tab or mobile mode.
OR
Click **Cancel** to cancel the transaction.
A warning message of canceling the operation appears. Click **Yes** to confirm.
OR
Click **Back** to navigate to previous screen.
14. The success message appears along with the status of transaction.
Click **Ok** to complete the transaction.

47.3 Dashboard Builder – Design – Create Administrator Template

The system administrator can select a default dashboard available for administrator or can create a custom dashboard by dragging and dropping new widgets available from the list of components.

The administrator can create the administrator dashboard template either by selecting the administrative maintenance or group of administrative functions.

As part of administrative maintenances UI component, there are individual transaction quick links put in a single widget and basis on the application role to component mapping available, the administrator user on actual login will be shown only those quick links that his application role has access to.

As part of system functions UI component, there is a logical group of transactions that can placed as a widget on the dashboard by selecting the administrative function from the group.

To create a new administrative dashboard template:

1. In the **Dashboard Builder** screen, click **Create**. The **Dashboard Builder** screen appears in create mode.

Dashboard Builder - Create Administrator Template

Field Description

Field Name	Description
Template Name	Name of the template that the System Administrator user wants to create.
Template Description	Description for the template.
Design	The type of device on which the template will be enabled.
Select Module	System lists the dashboard for the segments / application roles / user type / module depending on the option selected.
User Type	Select administrator from the user type list.
List of Dashboards	System displays the list of dashboards available for selection based on the selected module type.

2. In the **Template Name** field, enter the name of the new template that is to be created.
3. In the **Template Description** field, enter the description of the new template.
4. To enable the template for Desktop/ Tablet / Mobile, select the required options from the **Design** check box.
5. From the **Segment Dashboard/ Application Role Dashboard/ Module Dashboard/ User Type Dashboard** tabs, select the appropriate module. The **Dashboard Builder - Design** screen of the selected module appears.
To create a dashboard for a newly created administrator application role or to customize the dashboard for an existing administrator application role, user will need to select Application Role Dashboard/ User Type Dashboard tab.
6. In the **User Type** field, select the administrator user.
7. Select the appropriate dashboard from the list of dashboards displayed based on the selected module.
8. Click **Next**. The **Dashboard Builder - Design** template for Administrator appears.
OR
Click **Cancel** to cancel the transaction and navigate to the 'Dashboard'.
OR
Click **Back** to navigate to previous screen.

Dashboard Builder - Design – Create Administrator Template

The screenshot displays the 'Customer Maintenances' section in the Oracle Dashboard Builder. The interface includes a sidebar with navigation options such as 'Search Widgets', 'Currency Exposure', 'Collateral Allocation', 'Administrative Activities', 'System Administrator Action Card', 'Dashboard Quick Links', 'System Administrator', 'Wallet Widget', 'Loan Summary', and 'Chatbot'. The main content area shows a form for creating a new template with the following fields:

- Dashboard Type: Desktop (selected), Tab, Mobile
- User Type: administrator
- Template Name: Admin
- Description: Admin001

Below the form, there are two tables. The first table, titled 'Party Maintenance', shows a list of templates with the following columns: Date, Description, Party Name, Initiated By, Reference No, and Status.

Date	Description	Party Name	Initiated By	Reference No	Status
14 Apr 4:51 AM	Create Workflow		Jack Maker	14046216BD09	In Progress
13 Apr 6:31 AM	Create Workflow		Jack Maker	130477991EAA	In Progress

10 Apr 1:00 PM	Create Workflow		Jack Maker	1004670BE6FC	In Progress
09 Apr 4:58 AM	Modify User		Jack Maker	0904093DA001	In Progress

The second table, titled 'Customer Maintenances', shows a list of templates with the following columns: Date, Description, Party Name, Reference No, and Status.

Date	Description	Party Name	Reference No	Status
05 May 11:11 AM	Create Party Preference	KARNA INDIV1	0505D7E9027D	Processed
05 May 4:48 AM	Modify User	Sunrise Coffee	0505EB0E3A93	Processed

At the bottom of the interface, there are buttons for 'Save', 'Cancel', and 'Back'. The footer contains the copyright information: 'Copyright © 2006, 2020, Oracle and/or its affiliates. All rights reserved. | Security Information | Terms and Conditions'.

9. Drag and drop the desired widgets from the widget list.
OR
In the **Search Widget** field, enter the name of the widget that you want to appear on the dashboard and click  .
OR
Drag and drop widgets of the dashboard to the desired location. System highlights the area where the widget can be dropped.
10. Click  on the upper right corner of the widget, if you want to expand the widget.
OR
Click  on the upper right corner of the widget, if you want to compress the widget.
OR
Click  on the upper right corner of the widget, if you want to remove the widget from the dashboard.
11. If the selected widget has multiple widgets on the same component like 'System Administrator Action Card', select the required widget that you want to appear on the dashboard.

Dashboard Builder - Component Input box

Field Description

Field Name	Description
Component Type	Select the component type, which you want to appear on your dashboard. This field is applicable only if the selected widget has multiple components.

- a. From the **Component Type** list, select the widget component that you want to appear on the dashboard.

- b. Click **Confirm**. The selected component appears as a widget on the selected location of your dashboard.
12. Click **Save** to save the template.
 - OR
 - Click **Cancel** to cancel the transaction and navigate to the 'Dashboard'.
 - OR
 - Click **Back** to navigate to previous screen.
13. The **Review** screen appears. Verify the details, and click Confirm.
 - OR
 - Click Cancel to cancel the transaction and navigate to the 'Dashboard'.
 - OR
 - Click Back to navigate to previous screen.
 - OR
 - Click the **Desktop/ Tab/ Mobile** icon to review the template in desktop, tab or mobile mode.
14. The success message appears.
 - Click **Go to Dashboard** to view your customized dashboard.

47.4 Dashboard Builder – Edit

The system administrator can modify the configured dashboard using the Edit option. The administrator can edit the dashboard widgets for desktop, tablet or mobile devices by clicking the specific icons.

Note:

- 1) Dashboard Builder - Edit section is common for Administrator user and business users.
 - 2) System Administrator will not be able to edit the factory shipped dashboards.
-

To edit the configured dashboard:

1. In the **Dashboard Builder - Summary** screen, click the **View** link, against the dashboard, which you want to edit. The **Dashboard Builder - View** screen appears.
2. Click the **Edit** link to modify the dashboard template. The **Dashboard Builder** screen appears in edit mode.
 - OR
 - Click the **Desktop/ Tablet/ Mobile** icon to edit the template in desktop, tablet or mobile mode.
 - OR
 - Click **Delete** to delete the dashboard template.
 - OR
 - Click **Cancel** to cancel the transaction.
 - OR
 - Click **Back** to navigate to the previous screen.

Click  on the upper right corner of the widget, if you want to compress the widget.
OR
Click  on the upper right corner of the widget, if you want to remove the widget from the dashboard.
5. Click **Save** to save the changes.
OR
Click **Cancel** to cancel the transaction and navigate to the 'Dashboard'.
OR
Click **Back** to navigate to previous screen.
6. The **Review** screen appears. Verify the details, and click Confirm.
OR
Click the **Desktop/ Tablet/ Mobile** icon to review the template in desktop, tablet or mobile mode.
OR
Click **Edit** to make the changes if any for the selected device type.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Back** to navigate to previous screen.
7. The success message appears along with the status of transaction.
Click **Ok** to complete the transaction.

47.5 Dashboard Builder – Delete

The System Administrator can delete the custom dashboard templates maintained in the application. Deleting specific template will also result in deleting the template and revert back to the default dashboard.

To delete the configured dashboard:

1. In the **Dashboard Builder - Summary** screen, click the **View** link, against the dashboard that you want to delete. The **Dashboard Builder - View** screen appears.
2. Click **Delete**. The application prompts the administrator with a warning message 'Are you sure you want to switch to default dashboard' with an option of Confirm / Cancel.

Dashboard Builder - Delete

The screenshot shows the Futura Bank Dashboard Builder interface. At the top, there is a navigation bar with the Futura Bank logo, a search icon, a notification bell with '352', and a welcome message for Sweta Thakur. Below the navigation bar, the main content area is titled 'Dashboard Builder'. A modal dialog box titled 'Dashboard Template' is open in the center, asking 'Are you sure you want to switch to default dashboard?' with 'Confirm' and 'Cancel' buttons. The background interface includes sections for 'Credit Facility', 'Collateral', 'Facility Allocation', and 'Collateral Category Allocation'. A table displays collateral amounts, with the value '\$8,070,955,280.00' circled in purple. The table has columns for 'AUDICAR', '\$1,385,870.00', '\$1,714,130.00', and '01 Apr 2020'. The page footer contains copyright information: 'Copyright © 2006, 2020, Oracle and/or its affiliates. All rights reserved. | Security Information | Terms and Conditions'.

3. Click **Confirm** to proceed with the deletion request.
It will navigate to confirmation page with a success message along with the status and reference number.
OR
Click **Cancel** if you do not wish to proceed with deletion.
4. Click **OK** to complete the transaction.

47.6 Dashboard Mapping – Summary

Using this option, System Administrator can map the configured dashboards to the user or party, or user type or user segments depending on the dashboard template selected. The system administrator can create mapping and can delete the mapping.

To view the Dashboard mapping summary:

1. In the **Dashboard Builder** screen, click the **Mapping** tab. The **Dashboard Builder - Mapping** summary screen appears.

Dashboard *Mapping* Summary

The screenshot shows the 'Dashboard Builder' interface with the 'Mapping' tab selected. The table below represents the data shown in the screenshot:

Dashboard Name	Dashboard Type	Mapped Value	Date Created	Actions
test 23623 new	Application Role Dashboard	ATCorpAuthu	09 Apr 2020	Delete
Collateral	Module Dashboard	swecfpmchecker	07 Apr 2020	Delete
swerole	Application Role Dashboard	swecfpmmaker	23 Mar 2020	Delete
ple1	Application Role Dashboard	pmgadmin	05 Mar 2020	Delete
ajChecker1	Application Role Dashboard	ATCorpAuthu	16 Jan 2020	Delete
checkerMap	Application Role Dashboard	cfpmchecker	19 Dec 2019	Delete

On the right side of the screen, there is a 'Mapping your templates' section with a 'Create Mapping' button. The text below the button reads: 'One dashboard template can be linked to multiple User, Party, Role or Entity. Click below to start mapping your templates.'

Field Description

Field Name	Description
Mapping Type	Select the mapping type to search the dashboard template. The options are: <ul style="list-style-type: none"> • User • Party • Segment • User Type
Dashboard Name	System displays the name of the dashboard template.
Dashboard Type	System displays the type of the dashboard i.e. module / application role / user type.

Field Name	Description
Mapped Value	<p>System displays the value that is mapped to the template.</p> <p>In case if the dashboard is mapped to the user, user ID to whom the dashboard is mapped will be shown as mapped value.</p> <p>In case if the dashboard is mapped to the party, party ID to whom the dashboard is mapped will be shown as mapped value.</p> <p>In case if the dashboard is mapped to the Role, role name to whom the dashboard is mapped will be shown as mapped value.</p>
Date Created	The date on which template mapping was created.
Actions	Link to delete the mapping.

- From the **Mapping Type** list, select the appropriate option for which you want to view the mapping. The **Dashboard Builder - Mapping Summary** screen appears.

47.6.1 Create Mapping

Using this option, System Administrator selects the dashboard type, the dashboard template and then map either to a user/party/user segment/user type. The mapping type will depend on the type of dashboard selected.

To map dashboard templates:

- In the **Dashboard Builder - Mapping** tab, click Create Mapping. The **Dashboard Builder - Create Mapping** screen appears.

Create Mapping

Field Description

Field Name	Description
Dashboard Type	Select the dashboard type that is to be mapped.

Field Name	Description
User Type	Select the user type for which the dashboard template needs to be mapped.
Template	Select the template from the list that needs to be mapped.
Mapping Type	<p>Select the mapping type i.e. the selected dashboard template to map to the required option.</p> <p>The options are:</p> <ul style="list-style-type: none"> • User • Party • Segment • User Type <p>The mapping type options will also depend on the dashboard type selected i.e. for user type dashboard, system will not have options of User, Party and Segment</p>
Mapping Value	The mapping value will depend on the option selected in the mapping type. For Party selected in the mapping type, the admin can capture the party for which the dashboard template is applicable. For user selected in the mapping type, the admin can capture the user for which the dashboard template is applicable. For segment selected as the mapping type, admin can capture the segment for which the dashboard template is applicable.
Party ID	Party Id to search a party that is to be mapped to the dashboard template. This field appears if you select Party option from the Mapping Type list.
Party Name	<p>Party name to search a party that is to be mapped to the dashboard template.</p> <p>This field appears if you select Party option from the Mapping Type list.</p>
User ID	<p>User ID that is to be mapped to the dashboard template.</p> <p>This field appears if you select User option from the Mapping Type list.</p>
Select Segment	<p>Select the user segment that is to be mapped to the dashboard template.</p> <p>This field appears if you select Segment option from the Mapping Type list.</p>

2. From the **Dashboard Type**, select the appropriate dashboard type i.e. Application Role Dashboard or Segment Dashboard or Module Dashboard or User Type Dashboard.
3. From the **User Type**, select the user type for which the Template mapping needs to be done.
4. Select the Template from the list that needs to be mapped.
5. From the **Mapping Type** list, select the appropriate option to be mapped.
 - a. If you select **User** option, enter the user name.
 - b. If you select **Party** option, enter the party Id in the **Party ID** field, and click Search. The Mapping Value appears. Click link under the Party ID column to view the party details.
OR
In the **Party Name** field enter the party name and click Search. The Mapping Value appears. Click link under the Party ID column to view the party details.
OR
Click Cancel to cancel the transaction.
OR
Click Clear to clear the entered value.
 - c. If you select **Segment** option, select the role from the **User Segment** list.
6. Click **Save**.
The success message along with the status of transaction appears.

47.6.2 Delete Mapping

Using this option System Administrator can delete the templates mapped to a User or Party or User Segment or to a User Type.

To delete the mapped dashboard template:

1. In the **Dashboard Builder** screen, click the **Mapping** tab. The **Dashboard Builder - Mapping** summary screen appears.
2. Select the **Mapping Type** from the list i.e. User / Party / Segment / User Type
3. In the **Action** column, click **Delete** against the template mapping that you want to delete. The application will prompt the administrator with a deletion message with an option of Confirm/ Cancel.

Delete Mapping

The screenshot shows the Oracle Futura Bank Dashboard Builder interface. The top navigation bar includes 'System Administrator', 'ATM/Branch', 'English', and 'UBS 14.3 AT3 Branch'. The main header displays 'futura bank' and a user profile for 'Siveta Thakur' with the last login time '05 May 01:30 PM'. The 'Dashboard Builder' section has two tabs: 'Design' and 'Mapping'. The 'Mapping' tab is active, showing a table of mappings. A 'Delete Mapping' dialog box is overlaid on the table, asking 'Are you sure you want to Delete?' with 'Confirm' and 'Cancel' buttons. The table lists mappings for various dashboard types, including 'test 23623 new', 'swerole', 'pie1', 'ajChecker1', and 'checkerMap', each with a 'Delete' link in the 'Action' column. A 'Create Mapping' button is visible on the right side of the interface.

Mapping Type	User				
Dashboard Name	Dashboard Type				
test 23623 new	Application Role Dashboard				
Collateral	Module Dashboard				
swerole	Application Role Dashboard	swecfpmmaker	23 Mar 2020		Delete
pie1	Application Role Dashboard	pmgadmin	05 Mar 2020		Delete
ajChecker1	Application Role Dashboard	ATCorpAuthu	16 Jan 2020		Delete
checkerMap	Application Role Dashboard	cfpmchecker	19 Dec 2019		Delete

4. Click **Confirm** to delete the mapping. It will navigate to confirmation page with a success message and the status.
OR
Click **Cancel** if you do not wish to delete the mapping.
5. Click **OK** to complete the transaction.

FAQ

1. Can I design new widgets using Dashboard Builder functionality?

No, designing of a new widget is not allowed using this functionality. Administrator can use the existing widgets and can design the required dashboard.

2. Can I design different dashboards for different device types (desktop, mobile and tablet) using one template?

Yes, you can design different dashboards for different types of devices using one template. An edit option is available while previewing the dashboard on each type of device, which will help the user to make the necessary changes for specific device type.

However the system will always display the widgets mapped to a combination of application role and internet as touch point, irrespective of any device size the user selects

3. Can I delete the template that is mapped to a user / party / segment / user type?

Yes, you can delete the template that are already mapped to a user / party / segment or user type. A warning message informing about the mapping deletion is shown to the administrator while deleting a template.

4. Can I map the same template to multiple users or parties?

Yes, you can map the same template to multiple parties or users. Separate entries are required for such mapping.

5. Can the system/bank administrator edit a Factory shipped dashboard ?

No, Factory shipped dashboards can't be modified. However system/bank administrator can modify a custom made dashboard. Can I design the dashboard and map for administrator types of users (Bank/system administrator and corporate administrator)?

6. Can I design a dashboard for System Admin or Bank Admin?

Yes, you can design the administrative dashboards using Dashboard Builder maintenance.

7. When will the newly mapped dashboard be visible to the end customer?

Newly mapped dashboard will be available to the end user with an immediate effect.

8. Can an end user (Retail/Corporate users) design their own dashboards or set their preferences to see required widgets?

Yes Retail and Corporate users can personalize and design their dashboard.

9. In case of dashboard templates available at user level, segment level, application role level and user type level, which dashboard will the system resolve? Also what is the order in which the dashboards are resolved?

If there is a dashboard template mapped at a user level, then the system will display the user level dashboard on login.

Before rendering the dashboard, system will first check if there is a dashboard at user level, followed by segment, application role and then at user type.

In case where a retail user has personalize his/her dashboard, the system will give the priority to user defined dashboard followed by Administrator defined dashboards as user, segment, application role and then at user type.

48. Relationship Maintenance

Customer Relationship Maintenance enables the System Administrator to set up the transaction access logic for Bank's retail customers from Digital Banking Platform based on their account - mode of operation or relationship.

E.g. If a customer relationship (Mode of operation) is 'Either or Survivor', provide an access of all transactions whereas, if a customer relationship (Mode of operation) is 'Jointly', provide an access of all Inquiries and restrict all financial transactions from Digital Banking Platform. Such account and transaction access rules can be set up by the System Administrator using 'Relationship Maintenance Module'.

This account relationship maintenance is a two-step process.

- Relationship Mapping Maintenance - Using this maintenance System Administrator can map OBDX relationship codes with core banking relationship codes
- Relationship Matrix Definition - Using this maintenance System Administrator can define the transaction access based on the account relationships

48.1 Relationship Mapping

Using this option a System Administrator can map OBDX account relationship codes with account relationship codes defined in Core Banking Application so that the corresponding matrix defined in OBDX will be followed based on the available account relationship in the core application.

Note: The relationship matrix maintenance is done using **Relationship Matrix Maintenance** transaction.

Prerequisites

- Transaction access is provided to System Administrator.
- Account relationship codes are maintained in OBDX and in Core Banking Application.

Workflow

Features supported in application

The administrator can perform the following actions:

- Create Relationship Mapping
- Search/ View Relationship Mapping
- Edit Relationship Mapping

How to reach here:

System Administrator Dashboard > Controls & Monitoring > Relationship Mapping
OR

System Administrator Dashboard > Toggle Menu > Controls & Monitoring > Relationship Mapping

48.1.1 Relationship Mapping Maintenance - View

By accessing this menu option, System Administrator can view the account relationship codes maintained in OBDX and paired with the codes maintained in Core Banking Application

Relationship code maintained in OBDX appears on left side of the screen and paired codes if any appears on right side of the screen

1. All the relationships maintained under user account appears on **Relationship Mapping Maintenance** screen.
OR
Click **Edit** to edit the maintenance.
OR
Click **Cancel** to cancel the transaction.

Note: Instead of the **Edit** option, the **Save** option available if user is accessing it for the first time.

Relationship Mapping Maintenance

The screenshot shows the 'Relationship Mapping Maintenance' page. At the top, there is a navigation bar with 'System Administrator', 'ATM/Branch', 'English', and 'UBS 14.3 AT3 Branch'. Below this is the 'futura bank' logo and a search bar. The main content area is titled 'Relationship Mapping Maintenance' and contains a table with the following columns: 'Relationship Name and ID' and 'Map Relationship'. The table lists various relationship types, each with a checkbox and a corresponding code.

Relationship Name and ID	Map Relationship
<input type="checkbox"/> Relationship Name and ID	Map Relationship
<input checked="" type="checkbox"/> Sole Owner (SOW)	SOW
<input checked="" type="checkbox"/> Joint And First (JAF)	JAF
<input checked="" type="checkbox"/> Joint And Other (JAO)	JAO
<input checked="" type="checkbox"/> Joint Or First (JOF)	JOF
<input checked="" type="checkbox"/> Authorized Signatory (AUS)	AUS
<input checked="" type="checkbox"/> Related For Inquiry (REL)	REL
<input checked="" type="checkbox"/> Partner (PAR)	PAR
<input checked="" type="checkbox"/> Trustee (TRU)	TRU
<input checked="" type="checkbox"/> Co-Borrower (COB)	COB
<input checked="" type="checkbox"/> Customer Contact Person (CON)	CON
<input checked="" type="checkbox"/> Developer (DEV)	DEV
<input checked="" type="checkbox"/> Proprietor (PRO)	PRO
<input checked="" type="checkbox"/> Third Party (THR)	THR
<input checked="" type="checkbox"/> Joint Or Other (JOO)	JOO
<input checked="" type="checkbox"/> Valuer (VAL)	VAL
<input checked="" type="checkbox"/> Custodian (CUS)	CUS
<input checked="" type="checkbox"/> Nominee (NOM)	NOM
<input checked="" type="checkbox"/> Guardian (GUR)	GUR
<input checked="" type="checkbox"/> Guarantor (GUA)	GUA
<input checked="" type="checkbox"/> Solicitor (SOL)	SOL
<input checked="" type="checkbox"/> Others (OTH)	OTH

At the bottom of the table, there are 'Edit' and 'Cancel' buttons. To the right of the table is a sidebar with a gift icon and the following text:

Want to control transaction access based on user's account relationship?

Map channel account relationship codes with account relationship codes defined in Core Banking Application.

Further enable the transactions for these relationships using Relationship Matrix maintenance.

At the bottom of the page, there is a copyright notice: 'Copyright © 2006, 2020, Oracle and/or its affiliates. All rights reserved. | Security Information | Terms and Conditions'.

Field Description

Field Name	Description
Relationship Name and ID	Lists all the relationships maintained in OBDX.
Map Relationship	Lists all the relationships maintained in Core Banking Application.

48.1.2 Relationship Mapping Maintenance - Edit

Using this option, System Administrator is allowed to map the newly added relationship codes with the codes defined in core application. As well as System Administrator can remove the relationship codes which are selected from the default list.

To modify relation mapping:

1. Navigating to **Relationship Mapping Maintenance** screen, application displays the All the relationships maintained under user account.
2. Click **Edit** to edit the maintenance.
OR
Click **Cancel** to cancel the transaction.

Relationship Mapping Maintenance - Edit

The screenshot displays the 'Relationship Mapping Maintenance' interface. At the top, the user is identified as 'System Administrator' with a dropdown menu. The current branch is 'ATM/Branch', the language is 'English', and the account is 'UBS 14-3 AT3 Branch'. A search bar contains the text 'Search for transactions example Pay Bills'. The user's name 'Welcome, Sweta Thakur' and last login time 'Last login 06 May 03:50 AM' are also visible.

The main content area is titled 'Relationship Mapping Maintenance' and contains a table with the following columns: 'Relationship Name and ID' and 'Map Relationship'. All rows have a checked checkbox in the first column.

Relationship Name and ID	Map Relationship
<input checked="" type="checkbox"/> Sole Owner (SOW)	SOW
<input checked="" type="checkbox"/> Joint And First (JAF)	JAF
<input checked="" type="checkbox"/> Joint And Other (JAO)	JAO
<input checked="" type="checkbox"/> Joint Or First (JOF)	JOF
<input checked="" type="checkbox"/> Authorized Signatory (AUS)	AUS
<input checked="" type="checkbox"/> Related For Inquiry (REL)	REL
<input checked="" type="checkbox"/> Partner (PAR)	PAR
<input checked="" type="checkbox"/> Trustee (TRU)	TRU
<input checked="" type="checkbox"/> Co-Borrower (COB)	COB
<input checked="" type="checkbox"/> Customer Contact Person (CON)	CON
<input checked="" type="checkbox"/> Developer (DEV)	DEV
<input checked="" type="checkbox"/> Proprietor (PRO)	PRO
<input checked="" type="checkbox"/> Third Party (THR)	THR
<input checked="" type="checkbox"/> Joint Or Other (JOO)	JOO
<input checked="" type="checkbox"/> Valuer (VAL)	VAL
<input checked="" type="checkbox"/> Custodian (CUS)	CUS
<input checked="" type="checkbox"/> Nominee (NOM)	NOM
<input checked="" type="checkbox"/> Guardian (GUR)	GUR
<input checked="" type="checkbox"/> Guarantor (GUA)	GUA
<input checked="" type="checkbox"/> Solicitor (SOL)	SOL
<input checked="" type="checkbox"/> Others (OTH)	OTH

At the bottom of the table, there are three buttons: 'Save', 'Cancel', and 'Back'.

On the right side, there is a sidebar with a gift icon and the following text:

Want to control transaction access based on user's account relationship?

Map channel account relationship codes with account relationship codes defined in Core Banking Application.

Further enable the transactions for these relationships using Relationship Matrix maintenance.

At the bottom of the page, there is a copyright notice: 'Copyright © 2006, 2020, Oracle and/or its affiliates. All rights reserved. | Security Information | Terms and Conditions'.

Field Description

Field Name	Description
Relationship Name and ID	To map the OBDX relationships with the relationship codes available in the Core Banking system. Note: Lists all the relationships maintained in OBDX.
Map Relationship	Relationship ID to be mapped with OBDX relationship ID. Note: Lists all the relationships maintained in Core Banking Application. If an existing mapping is available, a value will be shown in Map Relation field.

1. Select the checkbox against **Relationship Name and ID** to map Core Banking relationships to OBDX relationships.

Note:

- 1) Select the checkbox adjacent to **Relationship Name and ID** in header row to select all relationships in one instance.
 - 2) To unmap the relation mapping, uncheck the checkbox
2. In the **Map Relationship** field, enter the relationships value as maintained in Core Banking Application.
 3. Click **Save** to save the relationship mapping maintenance.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Back** to navigate back to previous screen.
 4. The **Review** screen appears. Verify the details, and click **Confirm**.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Back** to navigate back to previous screen.
 5. The success message of Relationship Mapping Maintenance saved successfully appears along with the transaction reference number.
Click **OK** to complete the transaction.

[Home](#)

48.2 Relationship Matrix

Relationship Matrix maintenance allows the System Administrator to define the transaction access based on the account relationships. Administrator can enable or disable each transaction for each relationship code.

OBDX first checks if the transaction is mapped to the role attached to the user and then if it is enabled in relationship matrix. If both the conditions are satisfied, an access of a transaction and of an account is provided to the user.

Prerequisites

- Transaction access is provided to System Administrator.
- Approval rule set up for System Administrator to perform the actions.
- Account relationship codes are maintained in OBDX and in Core Banking Application.
- Relationship mapping (mapping of OBDX relationship codes with codes maintained in Core Banking application) is maintained.

Workflow

Features supported in application

The administrator can perform the following actions:

- View Relationship Matrix
- Edit Relationship Matrix

How to reach here:

System Administrator Dashboard > Controls & Monitoring > Relationship Matrix Maintenance

48.2.1 Relationship Matrix Maintenance - View

Based on the account relationship and transaction access matrix, System Administrator will know the account relationships IDs for which the channel access has been granted.

To view relationship matrix:

1. Displays the details maintained under user account relationship and transaction access matrix in **Relationship Matrix Maintenance - View** screen.
OR
Click **Edit** to modify the maintenance.
OR
Click **Cancel** to cancel the transaction.

Note: Instead of the **Edit** option, the **Save** option available if user is accessing it for the first time.

Relationship Matrix Maintenance - View

The screenshot displays the 'Relationship Matrix Maintenance - View' screen. At the top, there is a navigation bar with 'System Administrator', 'ATM/Branch', 'English', and 'UBS 14.3 AT3 Branch'. Below this is the 'futura bank' logo and a search bar. The main content area is titled 'Relationship Matrix Maintenance' and contains a table with the following columns: 'Current and Savings', 'Deposits', 'Loans', and 'Credit Cards'. The 'Credit Cards' column is expanded, showing a list of transaction types with checkboxes for various roles: Authorized Signatory (AUS), Co-Borrower (COB), Customer Contact Person (CON), Custodian (CUS), Developer (DEV), Guarantor (GUA), Guardian (GUR), Joint And First (JAF), and Joint And Other (JAO). The 'Credit Cards' section is highlighted in grey. At the bottom of the table, there are 'Edit' and 'Cancel' buttons. The footer contains copyright information: 'Copyright © 2006, 2020, Oracle and/or its affiliates. All rights reserved. | Security Information | Terms and Conditions'.

Field Description

Field Name	Description
Module Name	<p>Name of the module under which all transactions are maintained for Relationship Matrix.</p> <ul style="list-style-type: none"> • Current and Savings • Deposits • Loans • Credit Cards
Transaction Name	<p>Lists all the transactions under a specific module for which a channel access has been granted based on account relationship and transaction access matrix.</p> <p>Under each module transactions are mainly grouped as:</p> <ul style="list-style-type: none"> • Inquiry • Transactions
Relationship ID	<p>Lists all the relationship IDs maintained in OBDX for which the codes available in core banking application are mapped.</p>

48.2.2 Relationship Matrix Maintenance - Edit

Using this option, System Administrator can modify the account relationship and transaction access matrix.

To modify relationship matrix:

1. Displays the details maintained under user account relationship and transaction access matrix in **Relationship Matrix Maintenance - View** screen.
2. Click **Edit** to modify the maintenance.
The **Relationship Matrix Maintenance - Edit** screen appears.

Relationship Matrix Maintenance - Edit

The screenshot shows the 'Relationship Matrix Maintenance - Edit' page. At the top, there's a navigation bar with 'System Administrator', 'ATM/Branch', 'English', and 'UBS 14.3 AT3 Branch'. Below that is the 'futura bank' logo and a search bar. The main content area is titled 'Relationship Matrix Maintenance' and contains a table with the following columns: 'Current and Savings', 'Deposits', 'Loans', and 'Credit Cards'. Under these, there are sub-columns for 'Transactions', 'Authorized Signatory (AUS)', 'Co-Borrower (COB)', 'Customer Contact Person (CON)', 'Custodian (CUS)', 'Developer (DEV)', 'Guarantor (GUA)', 'Guardian (GUR)', 'Joint And First (JAF)', and 'Joint And Other (JAO)'. The rows include categories like 'Inquiry', 'CASA Inquiries', 'CASA Interest Certificate', 'Read Debit card Limit', 'List Debit cards', 'Account Details', 'Cheque Status Inquiry', 'Account Activity', 'Payments Inquiries', 'Transactions', 'Credit Cards', 'Term Deposits - Financial', 'PFM', 'Credit Card Financial', 'CASA', and 'Payments'. Each cell in the table contains a checked checkbox. At the bottom of the table are 'Save', 'Cancel', and 'Back' buttons. A copyright notice is visible at the very bottom of the page.

Field Description

Field Name	Description
------------	-------------

Module Name	Name of the module under which all transactions are maintained for Relationship Matrix.
--------------------	---

- Current and Savings
- Deposits
- Loans
- Credit Cards

Transaction Name	Lists all the transactions of a specific account for which a channel access has been granted based on account relationship and transaction access matrix.
-------------------------	---

The transaction categories are:

- Inquiry
- Transactions

Select/ deselect the transactions to maintain relationship matrix.

Field Name	Description
Relationship ID	Lists all the relationship IDs maintained in OBDX for which the codes available in core banking application are mapped.

3. Select the check box available in the header of transaction category (Inquiry and Transactions), to select all transactions for selected category in one instance.
OR
Select the check box available against the **Relationship ID** for each transaction.

Note:

- 1) Select / deselect the check box against the Transaction category (Inquiry and Transactions) to select all transactions under it.
 - 2) To unmap the relation mapping, deselect the check box.
-

4. Repeat step 2 for all modules as per requirement.
5. Click **Save** to save the relationship matrix maintenance.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Back** to navigate back to the previous screen.
6. The **Review** screen appears. Verify the details, and click **Confirm**.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Back** to navigate back to previous screen.
7. The success message of Relationship Matrix Maintenance saved successfully appears along with the transaction reference number.
Click **OK** to complete the transaction.

FAQ

1. Is relationship mapping a mandatory step?

Yes, relationship mapping is a mandatory step, without which the accounts will not be fetched from the core banking application.

2. Will all transactions available be listed under a respective module on relationship matrix screen?

Transactions for which the Customer Relationship Matrix maintenance flag is enabled in 'Transaction Aspects' screen will be listed under the respective modules.

3. Will a user get the access of a transaction and of an account, based on the relationship matrix definition?

No, OBDX first checks if the transaction is mapped to the role attached to the user and then if it is enabled in relationship matrix. If both the conditions are satisfied, access of the transaction and of account is provided to the user.

4. What will happen if an inquiry access for current and savings accounts module have been granted for a specific relationship code e.g. JAF (Joint and First) and not provided for a non-inquiry transactions?

In the above case user having an account with the relationship code JAF, will be able to access all inquiry transactions from digital platform but the account will not be listed in non-inquiry transaction screen.

[Home](#)

49. Transaction Blackout

A blackout period is duration of time when access to something usually available is prohibited.

When a System Administrator maintains a transaction blackout, for a period, transaction/s are not accessible to users of the bank's retail and corporate or even to the administrator users for a preset time period.

The system administrator may use the time, when a transaction is blacked-out, to do necessary maintenances.

Pre-Requisites

- Transaction access is provided to System Administrator.
- Approval rule set up for system administrator to perform the actions.

Workflow

Access Transaction (during blackout) – Blackout message needs to be displayed

Check the flow, message part is against access of transaction outside blackout period.

Features Supported In Application

The following options are available as part of this maintenance:

- Create a new Transaction Blackout Maintenance
- Search and View Transaction blackouts already maintained
- Delete or Edit transaction blackouts maintained.

How to reach here:

System Administrator Dashboard > Controls & Monitoring> Transaction Blackout
OR

System/ Bank Administrator Dashboard > Toggle Menu > Controls & Monitoring> Transaction Blackout

49.1 Transaction Blackout - Search

This function allows the System Administrator to search for transactions under a particular user type and also to create a new Transaction blackout. The search is available on the basis of User type, Transaction Type, Transaction and date. The search result displays only those transactions under a user type for which the 'Transaction Blackout' is maintained.

To search for transactions under a particular user type:

1. Enter the search criteria.
2. Click **Search**, displays results based on search criteria.
OR
Click **Clear** to reset the details.
OR
Click **Cancel** to cancel the transaction.

Transaction Blackout- Search

The screenshot shows the 'Transaction Blackout' search interface. At the top, there's a navigation bar with 'System Administrator', 'ATM/Branch', 'English', and 'UBS 14.3 AT3 Branch'. Below that, the 'futura bank' logo and a search bar containing 'transa' are visible. The main content area is titled 'Transaction Blackout' and contains several filters: 'Date' (Select date), 'User Type' (Select), 'Transaction Type' (Inquiries), and 'Transaction' (Facility Transaction Summ...). There are 'Search' and 'Clear' buttons. Below the filters is a table with the following data:

Transaction	Start Date	End Date	Blackout Type	Status
Facility Transaction Summary	13 Mar 2020	13 Mar 2020	Full	Completed
Facility Transaction Summary	15 Mar 2020	15 Mar 2020	Daily	Completed
Facility Transaction Summary	23 Mar 2020	23 Mar 2020	Daily	Completed

On the right side, there's a 'Transaction Blackout' section with a 'Create' button and a description: 'Make transactions inaccessible to customers for periods when maintenance is planned by setting up transaction blackout. Search for an existing blackout to view and edit or delete the maintenance. Click on the Create option provided to the setup a new transaction blackout maintenance.'

Field Description

Field Name	Description
------------	-------------

Date	Date of the transaction blackout.
-------------	-----------------------------------

Field Name	Description

- View the table with search results. This table contains the start date and end date of the blackout maintenance. Transaction for which the blackout is applicable, the type of blackout (full or daily) and the status – whether the blackout is ongoing, or scheduled for some day in the future.
- Click on the field **Transaction** to view more details.

Transaction Blackout- View details

The screenshot shows the 'Transaction Blackout' details page in the Futura Bank system. The page header includes 'System Administrator', 'ATM/Branch', 'English', and 'UBS 14.3 AT3 Branch'. The main content area displays the following details:

- Transaction:** Facility Transaction Summary
- User Type:** Administrator, Corporate User, Prospect, Retail User
- Blackout Type:** **Full** (selected), Daily
- Start On:** 13 Mar 2020, 15:30
- End On:** 13 Mar 2020, 15:40
- Status:** Completed

At the bottom of the form are buttons for **Edit**, **Delete**, **Cancel**, and **Back**. A sidebar on the right contains a 'Transaction Blackout' section with a description: 'Make transactions inaccessible to customers for periods when maintenance is planned by setting up transaction blackout. Click on Edit button to update the existing blackout. In case you want to delete the blackout, click on Delete button'.

Field Description

Field Name	Description
------------	-------------

Transaction	The specific transaction, for which a blackout is maintained.
--------------------	---

User Type	The type of user for whom the transaction is blacked out.
------------------	---

The user types could be:

- Corporate User
- Administrator
- Retail User
- Prospect

Blackout Type	Type of black out.
----------------------	--------------------

- Full: Indicates that it will be complete transaction blackout for the set date and time.
- Daily: Indicates that it will be daily blackout for the set date and time.

Field Name	Description
Start On	Start date and time for the blackout. This field will be displayed if the Blackout type is selected as ' Full '.
End On	End date and time for the blackout. This field will be displayed if the Blackout type is selected as ' Full '.
Date Range	Blackout start and end date. This field will be displayed if the Blackout type is selected as ' Daily '.
Time Range	Blackout start and end time. This field will be displayed if the Blackout type is selected as ' Daily '.
	<hr/> <p>Note: When blackout type is full - the following fields are displayed and enabled: Start On (Date and Time) End On and (Date and Time) When blackout type is Daily - the following fields are displayed and enabled - Date Range - From and To. Time Range - From and To. And, an option to Add Time</p> <hr/>
Status	The transaction blackout status. The options are: <ul style="list-style-type: none"> • Ongoing: Indicates that blackout is ongoing. • Scheduled: Indicates that scheduled for some day in the future.

5. Click **Edit** to edit the maintenance.
OR
Click **Delete** to delete the maintenance.
OR
Click **Cancel** to close the blackout creation process.
OR
Click **Back** to navigate to previous screen.

49.2 Transaction Blackout - Create

System Administrator can create new transaction blackout maintenance for the selected transaction. User needs to select the particular transaction and user type for whom blackout needs to be applied.

Further user can set up blackout type:

- Full – Black out for the entire period.
- Daily - Blackout between start and end time daily, for the days set.

To create new transaction blackout:

1. Click **Create**.
2. From the **Transaction** list select the appropriate option.
 - Note :
 - You can select multiple transactions out of the listed transactions for setting up the blackout in one go.
 - There will be an option as 'All transactions' in the dropdown, on selecting the same all the listed transactions, will get selected for maintaining the blackout.
3. From the **User Type** select the appropriate option.
4. From the **Blackout Type** select the appropriate option:
5. If you select **Full Day**:
 - a. From the **Start On** list, select the start date and time of the transaction blackout.
 - b. From the **End On** list, select the end date and time of the transaction blackout.
6. If you select **Daily**:
 - a. From the **Date Range** list select the start and end date of the transaction blackout.
 - b. From the **Time Range** list select the start and end time of the transaction blackout.

Note: You can click **+Add Time Range** button, to add multiple time options for transaction blackout.

Transaction Blackout- Create

The screenshot shows the 'Transaction Blackout' creation interface. At the top, there is a navigation bar with 'System Administrator', 'ATM/Branch', 'English', and 'UBS 14.3 AT3 Branch'. Below this is the 'futura bank' logo and a search bar. The main form area is titled 'Transaction Blackout' and contains the following fields:

- Transaction Type:** Inquiries (dropdown)
- Transaction:** Account Details (dropdown)
- User Type:**
 - Administrator
 - Corporate User
 - Prospect
 - Retail User
- Blackout Type:** Full (selected), Daily
- Start On:** 09 May 2020 23:30
- End On:** 10 May 2020 00:00

At the bottom left of the form are buttons for 'Save', 'Cancel', and 'Back'. On the right side, there is a box titled 'Transaction Blackout' with an icon of a calendar and the text: 'Make transactions inaccessible to customers for periods when maintenance is planned by setting up transaction blackout.'

7. Click **Save** to create the transaction blackout. User will be directed to the Transaction Blackout-Create - review page post necessary validations.
OR
Click **Cancel** to cancel the operation and navigate back to 'Dashboard'.
OR
Click **Back** to navigate to previous screen.
8. The **Review** screen appears. Verify the details, and click **Confirm**.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Back** to navigate to previous screen.
9. The success message appears along with the transaction reference number. Click **Ok** to complete the transaction.

49.3 Transaction Blackout - Edit

System Administrator can modify existing blackout instructions. This screen displays the inputs captured for Daily/Full, End date and End time in the create transaction blackout screen in an editable form. Whereas user is not allowed to edit Transaction.

To modify blackout instructions:

1. Enter the search criteria like **Transaction, Date, or User Type**.

Note: Alternately, the user can perform a blank search.

2. Click **Search**, displays results based on search criteria.
OR
Click **Clear** to reset the details.
OR
Click **Cancel** to cancel the transaction.
3. Click on the transaction.
4. Click **Edit** to edit the maintenance.

Editing a scheduled Maintenance

The screenshot displays the 'Transaction Blackout' configuration interface. At the top, the user is identified as 'System Administrator' at 'ATM/Branch' in 'English' for 'UBS 14.3 AT3 Branch'. The page title is 'Transaction Blackout'. The main content area is divided into two columns. The left column contains the configuration form: 'Transaction' (empty), 'User Type' (with checkboxes for Administrator, Corporate User (checked), Prospect, and Retail User), 'Blackout Type' (with 'Full' selected and 'Daily' as an alternative), 'Start On' (13 Mar 2020, 15:30), and 'End On' (13 Mar 2020, 15:40). Below the form are 'Save', 'Cancel', and 'Back' buttons. The right column features a 'Facility Transaction Summary' section with a 'Transaction Blackout' icon and a descriptive text: 'Make transactions inaccessible to customers for periods when maintenance is planned by setting up transaction blackout.' The footer contains copyright information: 'Copyright © 2006, 2020, Oracle and/or its affiliates. All rights reserved. | Security Information | Terms and Conditions'.

10. The **Review** screen appears. Verify the details, and click **Confirm**.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Back** to navigate to the previous screen.
11. The success message appears along with the transaction reference number. Click **OK** to complete the transaction.

49.4 Transaction Blackout - Delete

System Administrator can delete existing blackout instructions. User is allowed to delete future dated blackouts. Deleting ongoing blackout will stop the blackout and the transaction will be available to the users post approved by necessary levels of approvals.

To delete maintenance:

1. Enter the search criteria like **Transaction, Date, or User Type**.

Note: Alternately, the user can perform a blank search.

2. Click **Search**, displays results based on search criteria.
OR
Click **Clear** to reset the details.
OR
Click **Cancel** to cancel the transaction.
3. Click **Edit** to edit the maintenance.
OR
On the Detailed View screen, click **Delete** to delete the maintenance.
OR
Click **Cancel** to close the blackout creation process.
OR
Click **Back** to navigate to previous screen.
4. The Pop-up Message to confirm deletion appears.

Deleting an Ongoing / scheduled Maintenances

5. On the Detailed View screen, of the blackout, click **Delete**.
6. The Pop-up Message to confirm deletion appears.
7. Click **Yes** to delete.
OR
Click **No** to go back to the maintenance.
8. The **Review** screen appears. Verify the details, and click **Confirm**.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Back** to navigate to previous screen.
9. The success message appears along with the transaction reference number. Click **OK** to complete the transaction.

FAQ

1. Can I edit an Ongoing Transaction Blackout?

Only the End time and End Date of the ongoing blackout can be edited, that too only if it is greater than the current system date and time.

2. Can I edit scheduled Transaction Blackout?

Yes. System Administrator has more flexibility in editing a scheduled transaction blackout.

3. Can I delete an ongoing Transaction blackout?

Yes, ongoing transaction blackout can be deleted. Deleting ongoing blackout will stop the blackout and the transaction will be available to the users post approved by necessary levels of approvals.

4. Any notification will be sent to the users about the planned blackout?

Administrator can send a notification to the users using the mailers feature available.

5. What happens when user tries to access the transaction which is blacked out?

A message is shown on the screen informing about transaction blackout.

[Home](#)

50. Working Window

A transaction working window is the period in a day, when a transaction can be initiated, approved and processed. This is essentially like business hours, for a transaction. It is a time window within which electronic payments, such as domestic transfers, international transfers etc., must be submitted for an entry in the system so that the transaction is processed with same value date.

A working window is maintained, by the System Administrator for each transaction for which the value date is applicable for processing. In order to enable such transactions on channel, it is mandatory to define the working window for all the days of a week as day 0 maintenance. By doing this maintenance, user defines the channel working window for each day of the week for a specific transaction. Further, administrator can also define the processing pattern if the transaction is initiated by customers after the window is closed. Transactions, that are initiated or approved outside of the working window, are either processed on the next value date or rejected. Transaction working window can also be maintained for specific date which will be considered as exceptional working window, e.g. maintenance for specific public holiday. Working window set for an exception, overrides the normal working window.

Administrator can set up two different weekly and exceptional working windows for a specific transaction for different user types (Retail and Corporate User).

Pre-Requisites

- Transaction access is provided to System Administrator
- Approval rule set up for System Administrator to perform the actions
- Enable only those transactions for which the working window maintenance is applicable

Workflow

Features Supported In Application

The following options are available as part of this maintenance:

- Create a Transaction Working Window and an Exception for a particular date for all seven days
- Search and View Transaction working windows and Exceptions already maintained
- Delete or Edit transaction working windows / Exceptions maintained.

How to reach here:

System Administrator Dashboard > Controls and Monitoring > Working Window

OR

System/ Bank Administrator Dashboard > Toggle Menu > Controls and Monitoring > Working Window

50.1 Transaction Working Window - Search

This function allows the System Administrator to search the working windows which are already maintained. The search is available on the basis of specific date, transaction and user type.

The screen is broadly divided into:

- Normal Window
- Exception Window

To search the working windows:

1. Select the working window.
2. If you select **Normal Window** tab,
 - a. Enter the search criteria like **Transaction, Effective Date, or User Type**.
 - b. Click **Search**, displays results based on search criteria.
OR
Click **Clear** to clear the search parameters.
OR
Click **Cancel** to cancel the transaction.

Search Normal Window

The screenshot shows the 'Transaction Working Window' search interface. It includes a search bar at the top with the futura bank logo and user information. The main area has tabs for 'Normal Window' and 'Exception Window'. Below the tabs are search filters for 'Effective Date', 'Transaction', and 'User Type'. A 'Search' button is present. Below the filters, a table displays the search results for the 'Normal Window'.

Day Of Week	Window Type	From Time	To Time
Monday	Open All Day	00:00	23:59
Tuesday	Open All Day	00:00	23:59
Wednesday	Open All Day	00:00	23:59
Thursday	Open All Day	00:00	23:59
Friday	Open All Day	00:00	23:59
Saturday	Closed All Day	00:00	00:00
Sunday	Closed All Day	00:00	00:00

Below the table, there is a 'Treatment Outside Normal Window' section with the value 'Process on Next Value Date' and a 'Cancel' button.

Field Description

Field Name	Description
Normal Window	
Effective Date	Effective date of working window.
Transaction	The specific financial transaction, for which a working window is maintained.
User Type	The type of user for whom the transaction working window is being maintained. The user types could be: <ul style="list-style-type: none"> • Corporate User • Retail User
Search Result

Treatment Outside Normal Window: Process on Next Value Date, Reject Transaction

Save | Cancel | Back

Transaction Working Window

Use this feature to define the daily working window for financial transactions and also to specify the handling of transactions processed outside of the working window. You can also define an exception working window that will be considered over and above the regular working window maintenance. Additionally, you can search for existing working window maintenances to view and edit or delete, as per requirements.

Field Description

Field Name	Description
Effective Date	Effective date of working window.
User Type	The type of user for whom the transaction working window is being maintained. The user types could be: <ul style="list-style-type: none"> • Corporate User • Retail User
Transaction	The specific financial transaction, for which a working window is maintained.
Window Type	Type of working window for the transaction. The type can be: <ul style="list-style-type: none"> • Limited Time • Open All Day • Closed All Day
From Time	Start time of transaction working window. This field is enabled if you select Limited Time from the Window Type field.
To Time	End time of transaction working window. This field is enabled if you select Limited Time from the Window Type field.
Other Details	
Treatment Outside Normal Window	Indicates the treatment outside normal window: The options are: <ul style="list-style-type: none"> • Process on Next Value Date • Reject Transaction

-
- d. View the effective date, from when the modified maintenance will be effective. Modify if required.
- e. The user can view the days of the week – from Monday through Sunday with a drop-down of three values against each day(Open all Day, Closed all day, Limited Time)

Note: For open all day and closed all day options, system defaults from and to time values of– 00:00 and 23:59 hours, for the former and 00:00 hours, for the latter. For the limited time option, specify from and to time, to define the transaction working window.

- f. View the preferred processing, when transaction is initiated or approved outside of the working window.
Either Process on Next Value Date or Reject Transaction Modify if required.
3. Click **Save** to create the transaction working window.
OR
Click **Cancel** to close the exception creation process.
OR
Click **Back** to navigate to the previous screen.
4. The **Review** screen is displayed. Verify the details, and click **Confirm**.
OR
Click **Edit** to modify details if any.
OR
Click **Cancel** to cancel the transaction.
5. The success message is displayed along with the transaction reference number. Click **OK** to complete the transaction.

To modify exception window:

1. Select the working window.
2. If you select **Exception Window** tab,
 - a. Enter the search criteria like **Transaction**, **Effective Date**, or **User Type**.
 - b. Click **Search**, displays results based on search criteria.
OR
Click **Clear** to clear the search parameters.
OR
Click **Cancel** to cancel the transaction.
 - c. Click **Edit** to edit the working window - exception, from the Detailed View page.
OR
Click **Delete** to delete the maintenance.

Edit Exception Window

The screenshot displays the 'Transaction Working Window' interface in the Futura Bank system. At the top, there is a navigation bar with 'System Administrator', 'ATM/Branch', 'English', and 'UBS 14:3 AT3 Branch'. Below this, the user is logged in as 'Sweta Thakur' with the last login time '06 May 05:18 PM'. The main content area is titled 'Transaction Working Window' and has two tabs: 'Normal Window' and 'Exception Window'. The 'Exception Window' tab is active, showing a form with the following fields:

- Exception Date:** Radio buttons for 'Specific Date' (selected) and 'Date Range'. The date '05/09/20' is entered.
- User Type:** Checkboxes for 'Corporate User' and 'Retail User', both of which are checked.
- Transaction:** A dropdown menu showing 'Internal Transfer Pay Now'.
- Remarks:** A text field containing 'service not available'.

At the bottom of the form, there are three buttons: 'Next', 'Cancel', and 'Back'. On the right side, there is a sidebar with a 'Transaction Working Window' section containing a description: 'Use this feature to define the daily working window for financial transactions and also to specify the handling of transactions processed outside of the working window. You can also define an exception working window that will be considered over and above the regular working window maintenance. Additionally, you can search for existing working window maintenances to view and edit or delete, as per requirements.'

Field Description

Field Name	Description
Exception Date	Exception date or date range, when processing for a transaction, overrides that set in the normal transaction working window. The exception date could be: <ul style="list-style-type: none"> • Specific Date: Exception for a single day • Date Range: Exception for a date range
User Type	Type of user, whether the transaction exception is applicable for a retail or corporate user.
Transaction	The specific transaction, for which exception is being maintained.
Remarks	Reason for exception for e.g. a national holiday.
Exceptions	

Field Name	Description
Window Type	Type of working window for the exception. Window types: <ul style="list-style-type: none"> Limited Time: Transaction is applicable for a limited time. Open all Day: Transaction can be done for the entire day. Close all Day: Transaction is closed for the whole day.
Time Range	Business hours of the transaction. This field is enabled, if you select Limited Time , option from the Window Type list.

3. Update the required details.
4. Click **Save** to create the transaction working window.
OR
Click **Back** to navigate to the previous screen.
OR
Click **Cancel** to close the exception creation process.
5. The **Review** screen is displayed. Verify the details, and click **Confirm**.
OR
Click **Edit** to modify details if any.
OR
Click **Cancel** to cancel the transaction.
6. The success message is displayed along with the transaction reference number. Click **OK** to complete the transaction.

50.4 Transaction Working Window - Delete

System Administrator can delete existing working window maintenance. User is allowed to delete future dated maintenances.

To delete normal window:

1. Select the working window.
2. If you select **Normal Window** tab,
 - a. Enter the search criteria like **Transaction**, **Effective Date**, or **User Type**.
 - b. Click **Search**, displays results based on search criteria.
OR
Click **Clear** to clear the search parameters.
OR
Click **Cancel** to cancel the transaction.

- c. Click **Edit** to edit the working window, from the Detailed View page.
OR
Click **Delete** to delete the working window, from the Detailed View page.

Delete Normal Window

The screenshot shows the 'Transaction Working Window' page in the Futura Bank system. The page has a header with 'System Administrator', 'ATM/Branch', 'English', and 'UBS 14.3 AT3 Branch'. The main content area is titled 'Transaction Working Window' and has two tabs: 'Normal Window' (selected) and 'Exception Window'. Below the tabs are search filters for 'Effective Date' (with a calendar icon), 'User Type' (with a dropdown), and 'Transaction' (with a dropdown set to 'Internal Transfer Pay Now'). There are 'Search' and 'Clear' buttons. The 'Effective Date' is set to '07 May 2020'. Below this is a table with columns for 'Day Of Week', 'Transaction', 'Int', 'Re', and 'ime'. The table lists days from Monday to Sunday with their respective working hours. At the bottom of the table are 'Edit' and 'Delete' buttons. A 'Cancel' button is also present at the bottom left. A modal dialog box titled 'Delete Working Window' is open in the center, asking 'Are you sure you want to delete this Working Window Maintenance?' with 'Confirm' and 'Cancel' buttons. On the right side, there is a 'Transaction Working Window' section with a 'Create' button and a descriptive text block.

To delete exception window:

1. Select the working window.
2. If you select **exception Window** tab,
 - a. Enter the search criteria like **Transaction**, **Effective Date**, or **User Type**.
 - b. Click **Search**, displays results based on search criteria.
OR
Click **Clear** to clear the search parameters.
OR
Click **Cancel** to cancel the transaction.

- c. Click **Edit** to edit the working window, from the Detailed View page.
OR
Click **Delete** to delete the working window - exception, from the Detailed View page.

Delete Exception Window

- The user can delete a future transaction working window or an exception with an effective date in the future.
- Navigate to the particular working window or the exception and click on Delete.
- The system displays a pop-up message with Confirm and Cancel buttons. On confirming deletion, system displays a transaction successful message, provides a reference number and the status of the maintenance (e.g. pending approval)
- If the user chooses to cancel the transaction, he's directed to the admin dashboard

FAQ

1. Can I set the transaction working window from the current date?

No, you cannot set the transaction working window date from current date. You can set that from future date.

2. If a particular day, have both a normal working window set, and an exception – which will take precedence?

Working window set for an exception, overrides the normal working window set.

3. If the normal working window for a transaction is set for Open all Day and an Exception is set as Closed all Day, will I be able to initiate transaction, on that day?

No, I will not be able to initiate the transaction on that day. The transaction will either have the next working day's value date or be rejected.

4. Can I delete or edit current applicable normal working window?

No, current applicable normal working window cannot be edited or deleted. User can add a new window with future effective date.

5. Can I set 'behavior of transaction outside working window' for exceptional days?

No, behavior of transaction outside working window for exceptional date maintenance will remain same as normal window maintenance.

51. Audit Log

Audit log is set of records that provide information about operations performed in the application and details of the user who has performed it along with date and time when it was performed.

Audit logs are useful both for maintaining security and for auditing any disputed transaction. As part of this function, the bank administrator and/or system administrator can view details about the transactions and maintenances performed by different user(s) in the system.

The administrator can search records by providing specific search parameters and system will display matching records for the search criteria. Maintenances created/edited/deleted/inquired by bank administrator can be audited through this function by the system administrator. Maintenances created/edited/deleted/inquired by corporate administrator can be audited through this function by the bank as well as system administrator.

Transactions carried out by corporate users can be audited if required by the Corporate or Bank administrator and also by system administrator.

Prerequisites

- Transaction access is provided to System and Bank administrator.
- Transactions are available under respective users to check audit log.

How to reach here:

System Administrator Dashboard > Controls and Monitoring > Audit Log

OR

System/ Bank Administrator Dashboard > Toggle menu > Controls & Monitoring > Audit Log

51.1 Search Audit Details

To view audit log:

1. From the **Date and Time** list, select the period for which you want to view the audit log.
2. Enter required search criteria. Click **Search**.
Audit log appears based on the entered search parameters.
OR
Click **Clear** to reset the details.
OR
Click **Cancel** to cancel the transaction and navigate the user back to **Dashboard**.

User Type	To be selected if the search is to be based on the user type. Multiple user types can be selected. Following are user types. <ul style="list-style-type: none"> • Retail User • Corporate User • Administrator
Reference Number	Search based on Reference number of the transaction.
Search Result	
Date / Time	The date and time of the activity i.e. transaction/maintenance.
User ID/ Name	User ID and Name of the user who performed the transaction or carried out the maintenance. Click on the hyperlink available on the User ID to view the Request/response details of the transaction/maintenance in json format.
Party ID/ Name	Party ID and Party name for which the maintenance or transaction was carried out.
User Type	User type of the user who performed an activity i.e. maintenance/transaction.
Event	Name of transaction/maintenance for which audit details of transaction are logged.
Action	Name of transaction action. <ul style="list-style-type: none"> • Enquired • Initiated • Created • Edited • Deleted • Approved
Reference Number	Reference number of the transaction/maintenance.

Field Name	Description
Status	Status of the transaction. The options are: <ul style="list-style-type: none">• Success• Failed

FAQ

1. Do I need to enter all the parameters to search?

No. You need to enter at least the date and time criteria to proceed with audit search. Rest of the search parameters are optional and can be entered if the search results are to be narrowed down.

2. I do not remember the party ID for input, can I search a party if I need to view audit details for a specific party?

Yes. You can search a party by clicking 'Search Party' and searching the party by entering the party name.

3. As part of input search criterion/parameters, in the action field there are certain options disabled. Is there a specific reason?

If you select any maintenance in the activity field, 'Initiated' as an action will not be available. If you select any transaction in the activity field, 'Created', 'Edited' or 'Deleted' as actions will not be available.

[Home](#)

52. File Upload

File Uploads facilitates processing of multiple transactions through a single file. This is a faster way of processing transactions than entering single screen transactions. Salary payments, fund transfers, vendor payments are few examples of financial transactions that can be supported through file upload. A non-financial transaction to facilitate upload of multiple payee details, at a single instance, is also possible through file upload.

OBDX has made File Upload functionality available for both Corporate and Bank Users.

Some of the file uploads available for Corporate User are:

- Internal payments (within the bank)
- Domestic payments (within the country)
- International payments (cross border)
- Mixed payments
- Create Payees / Beneficiaries
- Create Virtual Accounts, Structure & Identifiers

File upload available for Bank User

- Bill Presentment

Oracle Banking Digital Experience File Upload module enables banks to process files of payments according to agreed operational and business rules and save time. File Uploads facility is simple to use, has daily transaction limits and comes with the security of dual / multi signatory approvals.

- File Upload Set up: Enables the administrator to create file identifiers, and map users to file identifiers.
- File Upload Servicing: Enables the corporate user to upload, view and approve files, (files that the user has access to).

File Upload Set up

File Upload set up covers the maintenance part of file upload and is performed by an administrator user. As a part of the initial set-up, the administrator user -

- Creates a File Identifier for a File Template using the 'File Identifier' option
- Maps a File Identifier to a user using the 'User File Identifier Mapping' option

52.1 File Identifier Maintenance

Bank Administrator can create file identifiers (FI) to upload files for corporate as well as bank administrator users. This enables the corporate users and bank administrators to process file uploads. A File Identifier is always mapped to a specific file template. It permits configuration of party preferences like approval type (file level / record level) for a particular type of file.

Prerequisites

- Transaction access is provided to Bank Administrator
- User Creation
- Set up Party Account access (for corporate file upload)
- Set up Transaction Account access (for corporate file upload)
- Set up Approval Rules (for corporate file upload)

Features Supported In Application

- Search File Identifier
- Create File Identifier
- Edit File Identifier

How to reach here:

System/ Bank Administrator Dashboard > Toggle Menu > File Upload > File Identifier Maintenance

OR

Bank Administrator Dashboard > Quick Links > File Identifier Maintenance

52.1.1 File Identifier Maintenance – User Type Selection

Bank Administrator logs into the system and navigates to the File Identifier Maintenance screen. On accessing the 'File Identifier Maintenance' menu, bank administrator has to select the user type.

File Identifier Maintenance – User Type Selection

1. Click **Administrator** to access the file identifier for bank administrator users. The File Identifier Maintenance screen appears.
2. Click **Corporate User** to access the file identifier of corporate users. The File Identifier Maintenance screen appears.

52.1.2 File Identifier Maintenance - Administrator User – Summary

For the bank administrators the only file upload available is for the uploading of Bill Presentment file. Once the logged in user navigates to File Identifier Maintenance (Administrator User) screen, user can view the record details of the File Identifiers already created.

To search and view the file identifiers:

1. Navigate to the **File Identifier Maintenance** screen. The **File Identifier** - summary screen appears.

File Identifier - Summary

The screenshot shows the 'File Identifier Maintenance' screen. At the top, there is a navigation bar with 'futura bank' logo, a search bar, and user information: 'Welcome, Administrator User' and 'Last login: 27 Aug 12:22 PM'. Below the navigation bar, the title 'File Identifier Maintenance' is displayed. The main content area contains a table of file identifiers and a note on the right.

Sr. no.	File Identifier	Description	Transaction Type	Approval Type
1	TestFICreate	TestFICreate	Bulk Bill Upload	File
2	BBUAdmin	BBUAdmin	Bulk Bill Upload	File
3	MakeCheckBBU	MakeCheckBBU	Bulk Bill Upload	File
4	SDMCBIIIULKF	SDMCBIIIULKF	Bulk Bill Upload	File
5	SDCMixBulkUpload	SDCMixBulkUpload	Bulk Bill Upload	File

Note
Assignment of file identifiers to different parties can be done. Approval type needs to be set as whether it would be record level or file level. File template can be selected for the maintenance. Once this is created for a party, account level changes can be done from User File Identifier mapping screen.

6. The success message appears along with the transaction reference number and status. Click **OK** to complete the transaction and navigate back to 'Dashboard'.

52.1.5 File Identifier Maintenance - Corporate User – Search and View

Once the logged in user navigates to File Identifier Maintenance (for Corporate User) screen, user can search and view the files that are uploaded under a party with the future date with file type as SDSC(Single Debit Single Credit), SDMC (Single Debit Multiple Credit), and MDMC (Multiple Debit Multiple Credit) and view the record details of the File Identifiers already created.

To search and view the file identifiers:

1. In the **Party ID** field, enter the party id of the user.
OR
In the **Party Name** field, enter the name of the party.
2. Click **Search**. The **File Identifier Maintenance** screen with search results appears.
OR
Click **Clear** to clear the search parameters.
OR
Click **Cancel** to cancel the operation and navigate back to 'Dashboard'.

File Identifier Maintenance - Search

The screenshot displays the 'File Identifier Maintenance' interface. At the top, the user is identified as 'System Administrator' at 'ATM/Branch' in 'English' on 'UBS 14.3 AT3 Branch'. The user's name 'Sweta Thakur' and last login time '06 May 05:18 PM' are also visible. The search criteria are set to Party ID '004308' and Party Name 'Sunrise Coffee'. The 'File Identifiers' table contains the following data:

Sr. no.	File Identifier	Description	Transaction Type	Approval Type
1	Bhavns	Bhavns	Internal Funds Transfer	File
2	InternalFTDeSDMC	InternalFTDeSDMC	Internal Funds Transfer	File
3	InternalFTMDMC	InternalFTMDMC	Internal Funds Transfer	Record

A 'Note' box on the right states: 'Assignment of file identifiers to different parties can be done. Approval type needs to be set as whether it would be record level or file level. File template can be selected for the maintenance. Once this is created for a party, account level changes can be done from User File Identifier mapping screen.' A 'Create' button is located below the note. At the bottom left, there are 'Cancel' and 'Back' buttons. The footer contains copyright information: 'Copyright © 2006, 2020, Oracle and/or its affiliates. All rights reserved. | Security Information | Terms and Conditions'.

Field Description

Field Name	Description
Party ID	Party ID of the corporate for whom the file identifier is created.
Party Name	Party name corresponding to the party id.
File Identifiers	
Sr. No.	Serial number of the record.
File Identifier	Unique code/ name assigned as per party preferences for handling of payment files.
Description	File name / code description corresponding to the file upload code.
Transaction Type	Type of transaction: The Transaction types could be: <ul style="list-style-type: none"> • Internal Funds Transfer • Domestic Funds Transfer • International Funds Transfer • Mixed Transfer • Internal Payee • Domestic Payee • International Payee • Mixed Payee • Domestic Demand Draft Payee • International Demand Draft Payee • Create Virtual Accounts • Delete Virtual Accounts • Create Virtual Account structure • Create Virtual Identifier • Create Invoice • Bulk Bill Upload
Approval Type	The approval type is at file level or record level.

- Click the **File Identifier** link against the record, for which you want to view the details. The **File Identifier Maintenance- View** screen appears.
OR
Click **Cancel** to cancel the operation and navigate back to 'Dashboard'.

OR
Click **Back** to go back to previous screen.

File Identifier Maintenance - View

The screenshot displays the 'File Identifier Maintenance - View' interface. At the top, there is a navigation bar with 'System Administrator', 'ATM/Branch', 'English', and 'UBS 14.3 AT3 Branch'. Below this is the 'futura bank' logo and a user welcome message: 'Welcome, Sweta Thakur' with 'Last login 05-May 05:18 PM'. The main content area is titled 'File Identifier Maintenance' and contains a 'Details' section with the following information:

Party Id	004308
Party Name	Sunrise Coffee
File Identifier	InternalFTMDMC
Description	InternalFTMDMC
File Template	Internal Funds Transfer Delimited MDMC
Maximum No Of Records	100
Partial Preprocessing Tolerance(%)	50
Transaction Type	Internal Funds Transfer
Accounting Type	Multiple Debit Multiple Credit
File Type	DELIMITED
Format Type	CSV/XML/XLS/XLSX
Approval Type	<input checked="" type="radio"/> Record Level <input type="radio"/> File Level

At the bottom of the details section, there are three buttons: 'Edit', 'Cancel', and 'Back'. A footer at the very bottom of the page reads: 'Copyright © 2006, 2020, Oracle and/or its affiliates. All rights reserved. | Security Information | Terms and Conditions'.

Field Name Description

Party ID The party id searched by the bank administrator.

Party Name Party name corresponding to the party ID.

Details

File Identifier Unique code/ name assigned for handling of payment files.

Description File name / code description corresponding to the file upload code.

File Template Predefined file templates.
Following file templates are available:

- Domestic Funds Transfer Delimited SDSC
- Domestic Funds Transfer Fixed SDSC
- Domestic Funds Transfer Delimited MDMC
- Domestic Funds Transfer Fixed MDMC

Field Name	Description
------------	-------------

-
- Domestic Funds Transfer Delimited SDMC
 - Domestic Funds Transfer Fixed SDMC
 - Domestic Funds Transfer Delimited SDSC with Account ID defined at File Identifier level
 - Internal and Domestic Funds Transfer Delimited SDMC

-

Field Name	Description
	<ul style="list-style-type: none"> Bulk Bill Upload
Maximum No of Records	Maximum number of records permissible in the uploaded file.
Partial Processing Tolerance (%)	The partial processing tolerance for a file (in percentage terms). Suppose, the user sets this value at 60% - this implies that if 60% or more, of the records in a file clear the validation stage, then the file can go for further processing. If less than 60% of the records in a file clear the validation stage, then the file is rejected.
Debit Account Number	Account number from which amount is to be debited. This field appears for templates having AcctId defined at FI level .
Transaction Type	Type of transaction: The Transaction type can be: <ul style="list-style-type: none"> Internal Funds Transfer Domestic Funds Transfer International Funds Transfer Mixed Transfer Internal Payee Domestic Payee International Payee Mixed Payee Domestic Demand Draft Payee International Demand Draft Payee Virtual Account Virtual Account Structure Virtual Identifier Virtual Account Structure Create Invoice Bulk Bill Upload

Field Name	Description
Accounting Type	<p>Accounting type of transaction:</p> <p>The accounting type can be:</p> <ul style="list-style-type: none"> • SDSC: Single Debit Single Credit • SDMC: Single Debit Multi Credit • MDMC: Multi Debit Multi Credit <p>This field does not appear for Demand Draft Payees, Domestic Payees, Internal payees, International Payee and Mixed Payees, Invoice and Virtual Account templates.</p>
File Type	The file type - delimited or fixed length.
Format Type	<p>The format in which file is uploaded.</p> <p>The format could be .CSV, .XML, .XLS, .XLSX.</p>
Approval Type	<p>The approval type is at file level or record level.</p> <ul style="list-style-type: none"> • File Level - The approver accepts or rejects the entire file, and all records are either processed or rejected en-masse. • Record Level - The approver could approve some records, and rejects others. Payments are processed only for approved records.

-
- Click **Edit** to modify the file identifier.
OR
Click **Back** to navigate to the previous screen.
OR
Click **Cancel** to cancel the operation and navigate back to 'Dashboard'.

52.1.6 File Identifier Maintenance - Corporate User - Create

Using this option the administrator user can create a new file identifier.

To create a file identifier:

- In the **Party Id** field, enter the party id of the user.
OR
In the **Party Name** field, enter the name of the party.
- Click **Search**. The **File Identifier Maintenance** screen with search results appears.
OR
Click **Clear** to clear the search parameters.
OR
Click **Cancel** to cancel the operation and navigate back to 'Dashboard'.
- Click **Create**. The **File Identifier Maintenance - Create** screen appears.

7. The **File Identifier Maintenance – Edit - Review** screen appears. Verify the details, and click **Confirm**.
OR
Click **Cancel** to cancel the operation and navigate back to 'Dashboard'.
OR
Click **Back** to navigate to the previous screen.
8. The success message appears along with the transaction reference number and status.
Click **OK** to complete the transaction and navigate back to 'Dashboard'.

FAQ

1. For bank administrators which transactions have file upload support?

Currently the file upload feature for bank administrators is available for addition of billers only.

2. What are the different transaction types, accounting types and file formats supported?

The following table details the different transaction types, accounting types and file formats supported. A file identifier with a specific template is a combination of the parameters below:

Sr. No.	Parameter	Types
1	Transaction Type	Internal funds Transfer Domestic Funds Transfer International Funds Transfer Mixed Transfer Admin Biller (available only for admin user) Payee Files (Internal / Domestic / International Or Mixed Payee Files) Virtual Account related (Accounts, Structure & Identifiers creation) Invoice Creation Bulk Bill Upload
2	Accounting Type	Single Debit, Single Credit (SDSC) Single Debit, Multi Credit (SDMC) Multi Debit, Multi Credit (MDMC)
3	Approval Type	File Level Record Level
4	Format Type	CSV, XML, XLS, XLSX

3. Why do we have different accounting types?

File templates support different accounting types, and business users can use the template that best support their needs. Details with business examples below:

Sr No.	Accounting Type	Business Example	Approval Type
1	Single Debit, Single Credit (SDSC)	A corporate may want to make monthly payments to its various vendors from one central account. So though the debit account is the same across all records, the credit accounts are different and the debit accounting entry is not consolidated.	Record Type or File Type
2	Single Debit, Multi Credit (SDMC)	A corporate may want to make monthly salary payments to all its employees. A single consolidated debit entry is required to be passed, against multiple credits to different accounts.	File Type
3	Multi Debit, Multi Credit (MDMC)	This file format caters to a lot of one to one transfers between two parties for various payments. Organizations that are brokers or intermediaries in trade contracts, may find this format more suitable for their business needs.	Record Type

4. What is the business rationale of having different approval types?

A record type approval, gives more flexibility to the corporate user – in the sense, that even if some records are not validated, the file could still be processed (only those records that have passed validations) and file type approval, gives more control to the corporate user. Since all records in the file have to pass validations, before a file is processed.

5. Who can create File Identifiers for a corporate party?

Only a bank administrator or a corporate administrator with required rights can create file identifiers for a corporate party.

6. What is a 'File Upload Template'?

A template that is used to upload a file is called as file template. It distinguishes one file from another depending on:

- a) Transaction type of the file
- b) Format of the file to be uploaded
- c) Approval type set-up for the file
- d) Accounting type of a payment file

[Home](#)

52.2 User File Identifier Mapping

This function can be used by the administrator to map the required file identifier to a specific user or a set of users so that the user can upload and view the required file types. In case of corporate user the mapping will be done for the Party ID and for bank administrators mapping will be done for the User ID.

Prerequisites

- Transaction access is provided to Bank Administrator User Creation
- Party and Account access (for corporate file upload)
- Set up Transaction and account access (for corporate file upload)
- Set up Approval Rules (for corporate file upload)
- File Identifier Maintenance

Features Supported In Application

- Search User File Identifier Mapping
- Create User File Identifier Mapping
- Edit User File Identifier Mapping

How to reach here:

System/ Bank Administrator Dashboard > Toggle Menu > File Upload > User File Identifier Mapping

OR

Bank Administrator Dashboard > Quick Links > User File Identifier Mapping

52.2.1 User File Identifier Mapping – User Type Selection

Bank Administrator logs into the system and navigates to the User File Identifier Mapping screen. On accessing the 'User File Identifier Mapping' menu, bank administrator has to select the user type.

User File Identifier Mapping – User Type Selection

1. Click **Administrator** to access file identifier for bank administrator users. The User File Identifier Mapping screen appears.
2. Click **Corporate User** to access the file identifier of corporate users. The User File Identifier Mapping screen appears.

52.2.2 User File Identifier Mapping – Administrator - Search

Using this option the administrator can search and view the file identifiers mapped to the user.

To search and view the file identifiers:

1. In the **User File Identifier Mapping** screen, enter any one search criteria.
2. Click **Search**. The **User File Identifier Mapping** screen with search results appears.
OR
Click **Cancel** to cancel the operation and navigate back to 'Dashboard'.
OR
Click **Clear** to clear the search parameters.

User File Identifier Mapping - Search

The screenshot shows the 'User File Identifier Mapping - Search' interface. At the top, there's a navigation bar with 'System Administrator', 'ATM/Branch', 'English', and 'UBS 14.3 AT3 Branch'. The main content area has a search form with 'User Type' set to 'Administrator' and 'User Name' set to 'amit'. Below the form are 'Search', 'Cancel', and 'Clear' buttons. A table below the form shows user details for 'Mark Waugh (amitadmin)' with email 'amit.w.harkare@oracle.com' and phone '9001234567'. A 'Mapping' column is also present. A 'Note' box explains that this screen is used to map file identifiers to different users of a party.

Field Description

Field Name	Description
User Type	The type of user as selected in the User File Identifier Mapping – User Type Selection screen. The options are: <ul style="list-style-type: none"> • Administrator • Corporate User
User Name	To search the user with the user name. Partial search is allowed.
More Search Options	Below fields appears if you click the More Search Options link.
First Name	To search based on first name or given name of the user.

Field Name	Description
------------	-------------

Last Name	To search based on last name/ surname of the user.
------------------	--

Email	To search based on email id of the user.
--------------	--

Mobile Number	To search based on mobile number of the user.
----------------------	---

Search Result

Initials	The initials of the user.
-----------------	---------------------------

User Details	The details of the user like user name or user id.
---------------------	--

Contact Details	Email and contact number of the user.
------------------------	---------------------------------------

Mapping	Displays whether the file identifier is mapped to the user.
----------------	---

-  - denotes that the file identifier is mapped to the user
-  - denotes that the file identifier is not mapped to the user.

3. Click  against the file identifier record of which you want to view the details. The **User File Identifier Mapping - View** screen appears.

FAQ

1. Can all users of a particular corporate access all file types, mapped to the corporate?

User/s have to be mapped to file identifiers to be able to access files. For example, only the user/s of Human Resource Department of a corporate may have access to upload / view and enquire status of salary files.

Mapping File Identifier's to specific users thus enables access of certain types of file/s to certain user/s.

2. If a user is mapped to a File Identifier and he has uploaded a file – but after this, he is no longer mapped to the File Identifier – can he view the status of the file?

No, the user will not be able to view the status of the file, if he is not mapped to it, at the point in time when he is checking for the status.

52.3 File Upload – Bill Presentment

Using this option bank administrator can upload a file containing multiple bills which are to be presented for payment on behalf of the biller .

Prerequisites

- File Identifier Maintenance
- User – File Identifier Mapping

Features Supported In Application

- Upload a File

How to reach here:

Corporate Dashboard > Toggle Menu > File Upload > File Upload

OR

Corporate Dashboard > Quick Links > File Upload

File Upload

Field Description

Field Name	Description
File Identifier	File identifier created earlier, in order to identify the file. This will list the file identifiers assigned by the administrator user to the logged in user for handling of file uploads.
File Name	Browse and select the file to be uploaded.

To upload a file:

6. From the **File Identifier** list, select the file identifier.
The file identifier details appear.

7. In the **File Name** field, select the file to be uploaded.

File Upload

The screenshot shows the 'File Upload' page in the Futura Bank system. The page header includes the bank logo, a search bar, and user information: 'Welcome, tata sup' and 'Last login: 26 Aug 07:06 PM'. The main content area is titled 'File Upload' and contains the following fields:

- File Identifier:** A dropdown menu with the selected value 'BBUAdmin-BBUAdmin'.
- Transaction Type:** A dropdown menu with the selected value 'Bulk Bill Upload'.
- File Format Type:** A dropdown menu with the selected value 'CSV, XLS, XLSX'.
- Approval type:** A dropdown menu with the selected value 'File Level'.
- File Name:** A text input field containing 'BCFTemplate.CSV'.

At the bottom of the form, there are two buttons: 'Upload' and 'Cancel'. The footer of the page contains the copyright notice: 'Copyright © 2006, 2020, Oracle and/or its affiliates. All rights reserved. [SecurityInformation] Terms and Conditions'.

Field Description

Field Name	Description
File Identifier	Select the File identifier created earlier and mapped to the user in order to identify the file.
Transaction Type	Displays the transaction type of the file upload. Information is displayed based on the parameters defined at the file identifier selected by the user.
File Format Type	Displays the format in which the file can be uploaded. The file formats could be: <ul style="list-style-type: none"> • CSV • XLS • XLSX Information is displayed based on the parameters defined at the file identifier selected by the user.

Field Name	Description
Approval Type	<p>Displays approval level of the file.</p> <p>For bill presentment type of a file, the approval type will always remain as Fil Level approval.</p> <ul style="list-style-type: none"> File Level: In a file type approval, the approver accepts or rejects the entire file, and all records are either processed or rejected. <p>Information is displayed based on the parameters defined at the file identifier selected by the user.</p>
Accounting Type	<p>Displays accounting type of the file.</p> <p>This field is displayed for the files which are financial in nature.</p>
File Name	<p>Choose the file from the local machine for upload.</p> <p>Post choosing the file, displays the file name.</p>

8. Click **Upload**.
OR
Click **Cancel** to abort the file uploading process.
9. The success message along with the file reference ID and status of the transaction appears.
Click **OK** to complete the file upload.
OR
Click the **File Reference ID** to inquire about the uploaded file status.
The Uploaded File Inquiry screen appears.
OR
Click **Home** to go to the Dashboard screen.

52.4 Uploaded Files Inquiry

Through this option the user can view the files uploaded by the bank administrator user using OBDX platform (only those files that the user has access to) and their status.

- The search can be filtered on various parameters like status and file reference ID.
- The user can track the status of the file and if there is an error in the file, he / she can download the error file to arrive at the exact reason for error.
- For files in the 'Processed' status, the user can download Response file, to vet status of processing (in the host) for each record, of the file.
- The user can track file history and also check Individual record details.

Prerequisites

- File Identifier Maintenance

- User – File Identifier Mapping

Features Supported In Application

- View Uploaded File & its Status (Uploaded File Inquiry)

How to reach here:

Corporate Dashboard > Toggle Menu > File Upload > Uploaded File Inquiry

OR

Corporate Dashboard > Quick Links > Uploaded File Inquiry

52.4.1 Uploaded File Inquiry – Default View

On accessing 'Uploaded File Inquiry' option from the menu, by default screen displays the summary of the files uploaded on that day with respective statuses. User can choose to view the details of the file by clicking on the File Reference ID or can even choose to search the files uploaded on previous days clicking search filters.

The screenshot displays the 'Uploaded Files Inquiry' interface. At the top, there's a navigation bar with 'futura bank' logo and a search bar. Below it, the title 'Uploaded Files Inquiry' is centered. The main area contains several filter fields: 'File Identifier' (dropdown), 'Transaction Type' (dropdown), 'File Reference ID' (text input), and 'From Date' (calendar icon) set to '27 Aug 2021'. There are also 'File Name' and 'File Status' (dropdown) fields. 'Search' and 'Clear' buttons are positioned below the filters. A 'File Status' legend is provided, defining terms like 'Uploaded', 'Processing In Progress', 'Approved', 'Rejected', etc. The footer shows 'Copyright © 2006, 2020. Oracle and/or its affiliates. All rights reserved.' and links for 'Security Information' and 'Terms and Conditions'.

52.4.2 Uploaded File Inquiry – Search Filters

On clicking the  search filters gets enabled on the screen, bank administrator can search and view the files that are uploaded under a party with the file identifier, date range, transaction type, transaction reference ID and view the record details under the same.

User is expected to provide at least two search parameters to get the better result.

To search and view the uploaded files

3. Click  to expand the search criteria.
The search section appears.
4. Enter any two search criteria in the search section.

5. Click **Search**. The search results appear on the **Uploaded File Inquiry** screen based on the search parameters.
- OR
- Click **Clear** to reset the search criteria.
- OR
- Click **Cancel** to close the search panel.

6. Click the **File Reference ID** link to view the details. The **Uploaded File Inquiry - File Details** screen appears.

OR

Click  against a specific file upload record to delete the record. A delete icon will be shown against a record, only when if a record is of a future date and is fully approved.

52.4.3 Uploaded File Inquiry – File Details – Bill Presentment

On clicking on the File Reference ID from the summary page of bill payment file, following screen is displayed to the user. The user can view the files uploaded by the bank administrator for bill presented for payments. Screen displays the basic file details like name, status, reference id etc. along with the file journey.

User can download file, error report if the file is in error status and even can download response file to know the record level details.

File details section also shows the records of the file in a summarized view along with respective status of each record. User can further delete the specific record if of the future date or not processed.

User can also choose to view the record details by clicking on the link available on each record. User gets directed to the screen which shows the individual record details along with the file details using which the record was uploaded. Each record details is specific to the transaction type which user is inquiring.

Note: The maximum number of records permissible in the uploaded file is a configurable parameter at the File Identifier.

File Details

The screenshot displays the 'Uploaded Files Inquiry' interface. At the top, there are navigation options for 'Approver', 'ATM/Branch', and 'English'. The user is logged in as 'Joe chk' with the last login on 27 Aug 11:52 AM. The main content area is titled 'Uploaded Files Inquiry' and contains a 'File Details' section. This section lists the following information:

- File Name:** bulkbillupload_sdsc_2.txt
- File Reference ID:** 342401302307
- File Status:** Processed
- Response File Download:** (with a download icon)
- Transaction Type:** Bulk Bill Upload
- Number of Records:** 1

A 'File Workflow' diagram shows a sequence of five steps: 1. Uploaded, 2. Verified, 3. Approved, 4. Processing In Progress, and 5. Processed. The 'Processed' step is highlighted with a blue circle. Below the workflow is a 'File Summary' table with the following data:

Reference No.	Bill Due Date	Amount	Party Id	Type	Record Status
342401302307000001	30 Mar 2020	EUR22.90	Darren Bulk Flet 000295	Bulk Bill Upload	Completed

At the bottom of the page, there is a copyright notice: 'Copyright © 2006, 2020, Oracle and/or its affiliates. All rights reserved. | Security | Information | Terms and Conditions'.

Field Description

Field Name	Description
File Name	File name of the uploaded file. User can download the file by clicking in the icon available besides the file name.
Transaction Type	Displays the transaction type associated with the file.
File Reference ID	Displays the file reference number, which was generated while uploading the file.
Number of Records	Displays the total number of records uploaded as a part of the file.
File Status	Displays the status of the file uploads.
Error Report	Shows an icon to download the error file in case the uploaded file faced some runtime issue and failed to execute.
Response File Download	Shows an icon to download the error response file.
Transaction Reference ID	The transaction reference number, which was generated at the time of transaction execution.
File Workflow	Flow displaying various stages and status of file upload.

7. In the **File Name** field, click  to download the originally uploaded file.
In the **Response File Download** field click  to download the response file.
8. Click **Download as** to download the file in .pdf or .csv format.
OR
Click **Delete** to delete the uploaded file.
OR
Click **Back** to navigate to the previous screen.

Note: If there is an error during file verification (i.e. the file is in error status), an option will be available to download the generated error file.

FAQ

1. What are some of the validations that a file goes through at various stages, in its life cycle?

The following are the validations performed on an uploaded file by OBDX and subsequently by the Host, before file is liquidated.

Sr No	Events	Applicable to	Checks
1	On File Upload	All Files	File contents should not match an already uploaded file
2	On File Upload	All Files	File should not exceed the Maximum Size limit
3	On File Upload	All Files	The File Extension type should be the ones permitted
4	On File Upload	All Files	The file should not be Malicious
5	At Pre-Processing	All Files	The format for all fields, should be as templated viz., Date, Currency in accordance with ISO standards, CIF- numeric, account number-alphanumeric etc.
6	At Pre-Processing	All Files	The CIF should be valid, should exist
7	File At Pre-Processing	All Files	CIF and Debit account should belong to each other
8	At Pre-Processing	All Files	User should have access to Debit Account (If applicable for the type of file selected)
9	At Pre-Processing	All Files	Debit account should not be in closed status (If applicable for the type of file selected)
10	At Pre-Processing	All Files	Transaction Limits are not violated at user level (If applicable for the type of file selected)
11	At Pre-Processing	All Files	Payment date should not be in the past (If applicable for the type of file selected)

Sr No	Events	Applicable to	Checks
12	At Pre-Processing	All Files	Payment date should not be a holiday as per the host calendar maintenance (If applicable for the type of file selected)
13	At Pre-Processing	All Files	Debit account should be a CASA account, not loan or TD (If applicable for the type of file selected)
14	At Pre-Processing	All Files	Debit currency in the file, should match the currency of the CASA account (If applicable for the type of file selected)
15	At Pre-Processing	Internal Files	Transaction currency should match either the debit or credit CASA (If applicable for the type of file selected)
16	At Pre-Processing	Internal Files	The Credit Account should be a CASA account, not loan or TD (If applicable for the type of file selected)
17	At Pre-Processing	All SDSC and SDMC files	A file with multiple records, should have the same debit account (If applicable for the type of file selected)
18	At Pre-Processing	Internal Ad hoc	The Purpose of remittance should be valid (If applicable for the type of file selected)
19	At Pre-Processing	Domestic Files	The NEFT / RTGS code should be valid (If applicable for the type of file selected)
20	At Approval	All Files	Cumulative limits should not be violated either for the Approver and the Party (If applicable for the type of file selected)
21	Validations in Core	All Files	The Debit account should have sufficient balance (If applicable for the type of file selected)
22	Validations in Core	All Files	Debit account should not be in dormant status (If applicable for the type of file selected)
23	Validations in Core	All Files	Debit account should not be in debit block status (If applicable for the type of file selected)

Sr No	Events	Applicable to	Checks
24	Validations in Core	Internal Files	The Credit CASA account should not be closed (If applicable for the type of file selected)
25	Validations in Core	Internal Files	There should not be a Credit Block on the CASA account (If applicable for the type of file selected)
26	Validations in Core	International Files	The BIC / SWIFT code should be valid, as per the BIC / Clearing directory as maintained in the host system (If applicable for the type of file selected)

2. If some records in a file are liquidated, others are deleted, what will the status of the file be?

The following table shows the file status which is followed to depict various status of the file upload. So if all the records of file are liquidated then the file status is processed, and if any of the records in the file is liquidated while all the other are rejected the file status will be processed, and if any of the records is liquidated and rest all have an error the file status will be processed with exception.

Verified	Approved	Processing in Progress	Liquidated	Rejected	Deleted	Error	File Status
All							Verified
	All						Approved
		All					Processing in Progress
			All				Processed
				All			Rejected
					All		Deleted
						All	Error
			1	1			Processed
			1		1		Processed

Verified	Approved	Processing in Progress	Liquidated	Rejected	Deleted	Error	File Status
			1			1	Processed with exception
			1	1	1		Processed
			1	1	1	1	Processed with exception
				1	1		Deleted
				1		1	Processed with exception
					1	1	Processed with exception

3. If a payment file is in the approved status, does it mean that all the records are successfully liquidated?

No, the file still has to successfully pass validations in the host system, before records are processed.

4. Can a user delete the entire file or deletion of only individual records within a file is allowed?

Whether only records can be deleted, or the entire file will be deleted depends on the accounting type of the file, and the approval type (Record Level or File level)

The table below throws light on the combinations allowed

Sr No	Accounting Type	Authorization Type	File / Record Deletion allowed?
1	SDMC	File Level	Not allowed
2	SDSC	File Level	Not allowed
3	SDSC	Record Level	Only records can be deleted, and not the entire file
4	MDMC	Record Level	Only records can be deleted, and not the entire file

5. If a working window is set for the File Upload transaction – how will processing be impacted outside of the working window?

Outside of the transaction working window set for file uploads, processing will depend on whether the file has a Record Level approval or a File Type approval.

Files with a File Type approval – will be rejected, outside of the transaction working window
Files with Record Type approval – if some records are processed within the working window, will be completed – if processing of some records, falls outside of the working window – these will be rejected.

6. What is the impact of limits on processing of File Upload transactions?

File uploads transaction will utilize limits depending on if the transfer is an internal, domestic, or international funds transfer.

Further, for domestic funds transfer – limits are defined for each network – NEFT, RTGS and IMPS. Limits will be checked at the pre-processing's stage for file uploads.

7. After a file is successfully uploaded, is the user provided notifications on its status?

Yes, Users mapped to the FI – initiators and approvers of the file, are provided with alerts / notification, as file progresses from the Uploaded stage to Approved to Processing in Progress to the Processed stage. Alternately, users can log in to view the status of the file.

53. OAuth 2.0

The OAuth 2.0 authorization framework enables a third-party application to obtain limited access to an HTTP service, either on behalf of a resource owner by orchestrating an approval interaction between the resource owner and the HTTP service, or by allowing the third-party application to obtain access on its own behalf.

- **Client** - It is the third party app (running on mobile or on browser) that makes requests to the resource server for protected resources on behalf of the resource owner. The resource owner must give the app permission to access the protected resources.
- **Resource owner** - The person who is capable of granting access to a protected resource.
- **Resource server** - The resource server needs some kind of authorization before it will serve up protected resources to the app.
- **Authorization server** - The authorization server is implemented in compliance with the OAuth 2.0 specification, and it is responsible for validating authorization grants and issuing the access tokens that give the app access to the user's data on the resource server.

The following administrative maintenances needs to be done as part of OAuth Server Setup:

- Identity Domain Definition
- Resource Server Definition
- Client Definition

[Home](#)

53.1 Identity Domain Maintenance

The Identity Domain corresponds to the notion of a tenant and each identity domain corresponds to an identity store. All artifacts such as resource server and client needs to be created under an identity domain.

As part of the Identity Domain definition, Identity store as well as token settings can be defined.

Currently only 'Embedded LDAP' i.e. DB Authenticator as Identity Store is supported.

Pre-Requisites

- Transaction access is provided to System Administrator.

Features supported in application

Using this option System Administrator can perform the following actions:

- Create Identity Domain
- Edit Identity Domain details
- View Identity Domain details

How to reach here:

System/ Bank Administrator Dashboard > Toggle menu > OAuth > Identity Domain Maintenance

53.1.1 Identity Domain Maintenance - Search

User can search for any maintained Identity Domains by entering the required search parameters.

To search for an Identity Domain

1. In **Identity Domain Maintenance** screen, enter the Identity Domain Name.
2. Click **Search**. The search results appears.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Clear** to clear the search parameters.

Refresh Token Expiry Time	Displays the maintained expiry time for refresh token with token type 'Authorization Code'.

- Click **Edit** to edit the Identity Domain details. User is directed to the **Identity Domain Maintenance - Edit** screen with values in editable form.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Back** to navigate to previous screen.

53.1.2 Identity Domain Maintenance – Edit

This function enables the System Administrator to edit the details of maintained identity domains. As part of edit, System Administrator can modify the details i.e. URLs as well as token settings for an identity domain.

To edit or update an identity domain:

1. In **Identity Domain Maintenance** screen, in the **Identity Domain Name** field, enter the identity domain name.
2. Click **Search**. The search results appears.
3. Click the **Name** link of the record whose details you want to view.
The **Identity Domain Maintenance – View** screen appears.
4. Click **Edit** to modify the identity domain details.
The **Identity Domain Maintenance – Edit** screen appears in editable form.

Identity Domain Maintenance – Edit

The screenshot displays the 'Identity Domain Maintenance – Edit' interface. At the top, there is a navigation bar with 'System Administrator', 'ATM/Branch', 'English', and 'UBS 14.3 AT3 Branch'. Below this is the 'futura bank' logo and a user profile section for 'Sweta Thakur' with a 'Last login 06 May 06:00 PM' timestamp. The main content area is titled 'Identity Domain Maintenance' and is divided into two sections: 'Identity Domain Definition' and 'Token Settings'.

Identity Domain Definition:

- Identity Domain Name: OBDXMobileAppDomain
- Identity Domain Description: OBDXMobileAppDomain
- Identity Store: Embedded LDAP (dropdown menu)
- Consent Page URL: /consent.jsp
- Error Page URL: /error.jsp

Token Settings:

- Token Type: Access Token
- Access Token Expiry Time: 1 23:59 (with a refresh icon)
- Is Refresh Token Enabled:
- Refresh Token Expiry Time: 2 00:30 (with a refresh icon)
- Token Type: Authorization Code (with a tooltip that says 'Enter a time on or after 00:00.')
- Access Token Expiry Time: 4 00:00 (with a refresh icon)
- Is Refresh Token Enabled:

At the bottom of the form, there are three buttons: 'Save', 'Cancel', and 'Back'. The footer contains the copyright notice: 'Copyright © 2006, 2020, Oracle and/or its affiliates. All rights reserved. | Security Information | Terms and Conditions'.

5. Update the details as required.
6. Click **Save** to save the changes.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Back** to navigate to previous screen.

7. The **Review** screen appears. Verify the details, and click **Confirm..**
 OR
 Click **Cancel** to cancel the transaction.
 OR
 Click **Back** to cancel the operation to navigate to previous screen.
8. The success message of identity domain details modification appears along with the reference number.
 Click **OK** to complete the transaction.

53.1.3 Identity Domain Maintenance – Create

This function enables the System Administrator to create an identity domain. As part of Identity Domain definition, the administrator can define the identity store, different URLs i.e. redirect and Error URLs and the token settings.

To create an identity domain:

1. Click **Create** to create a new Identity Domain. The **Identity Domain Maintenance - Create** screen appears.

Identity Domain Maintenance – Create

Field Description

Field Name	Description
Identity Domain Definition	

Field Name	Description
Identity Domain Name	Specify the name of the Identity Domain.
Identity Domain Description	Specify the Identity Domain description.
Identity Store	Select the Identity store to be mapped for the identity domain. Currently only Embedded LDAP is supported for the identity store.
Consent page URL	Specify the Consent page URL. This is the page on which the user will get re-directed to provide consent to the Third Party Provider (TPP)
Error page URL	Specify the Error page URL. This is the page on which the user will get re-directed to in case of incorrect details.
Token Setting	
Token Type	Displays the token type as Access Token. Token settings can be defined for both token types i.e. Authorization Code and Access Token
Access Token Expiry Time	Specify the expiry time for the access token.
Is Refresh Token Enabled	Specify whether the refresh token needs to be enabled. If enabled, the TPP will be provided with a refresh token along with access token.
Refresh Token Expiry Time	Specify the expiry time for refresh token. This field will be enabled to enter the expiry time only if Refresh Token is enabled.
Token Type	Displays the token type as Authorization Code. Token settings can be defined for both token types i.e. Authorization Code and Access Token
Access Token Expiry Time	Specify the expiry time for the access token for token type as authorization code
Is Refresh Token Enabled	Specify whether the refresh token needs to be enabled. If enabled, the TPP will be provided with a refresh token along with access token for token type Authorization Code.
Refresh Token Expiry Time	Specify the expiry time for refresh token. This field will be enabled to enter expiry time only if Refresh Token is enabled for token type 'Authorization Code'

2. In the **Identity Domain Name** field, enter name for an identity domain to be created.
3. In the **Identity Domain Description** field, enter description for an identity domain to be created.
4. From the **Identity Store** list, select the Identity store for the identity domain.
5. In the **Consent Page URL** field, enter URL for the consent page on which the user needs to be re-directed for providing consent to the TPP.
6. In the **Error Page URL** field, enter URL for the error page on which the user needs to be re-directed in case of incorrect details entered.
7. In the **Access Token Expiry Time** field for token type **Access Token**, enter the expiry time for the access token in days and hh:mm format.
8. Click the **Is Refresh Token Enabled** toggle to 'Y' if there is a need to provide with a refresh token along with an access token.
 - a. In the **Refresh Token Expiry Time** field, enter the expiry time for the refresh token in days and hh:mm format.
9. In the **Access Token Expiry Time** field of **Authorization Code Token** type, enter the expiry time for the access token in days and hh:mm format.
10. Click the **Is Refresh Token Enabled** toggle to 'Y' if there is a need to provide with a refresh token along with an access token for token type 'Authorization Code'
 - a. In the **Refresh Token Expiry Time** field, enter the expiry time for the refresh token in days and hh:mm format. This expiry time is for refresh token with token type 'Authorization Code'
11. Click **Save** to save the changes.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Back** to navigate to previous screen.
12. The **Review** screen appears. Verify the details, and click **Confirm..**
OR
Click **Cancel** to cancel the transaction.
OR
Click **Back** to cancel the operation to navigate to previous screen.
13. The success message of identity domain details creation appears along with the transaction reference number.
Click **OK** to complete the transaction.

[Home](#)

53.2 Resource Server Maintenance

The resource server is the server that contains the user's information that is being accessed by the third party application and handles authenticated requests after the application has obtained an access token.

Resource Server is always associated to one Identity Domain. Through this maintenance, the administrator can define scopes for the resource server. Scopes are transactions or inquiries that are provided to the client so that the TPP/client can transact or inquire on behalf of the customer with an access token provided the customer has provided consent to the TPP.

Pre-Requisites

- Transaction access is provided to System Administrator.

Features supported in application

Using this option System Administrator can perform the following actions:

- Create Resource Server
- Edit Resource Server
- View Resource Server

How to reach here:

System/ Bank Administrator Dashboard > Toggle menu > OAuth > Resource Server Maintenance

53.2.1 Resource Server Maintenance - Search

User can search for any maintained Resource Servers by entering the required search parameters.

To search for a Resource Server.

1. In **Resource Server Maintenance** screen, in the **Resource Server Name** field, enter name of the resource server that is to be searched.
2. From the **Identity Domain** list, select the appropriate identity domain from which resource servers are to be searched. One Identity Domain can have multiple resource servers associated.
3. Click **Search**. Based on the input search parameters, system will display the search results i.e. Resource Server Name and Description.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Clear** to clear the search parameters.

Resource Server Maintenance – Search

The screenshot shows the 'Resource Server Maintenance' search interface. At the top, there is a navigation bar with 'System Administrator', 'ATM/Branch', 'English', and 'UBS 14.3 AT3 Branch'. Below this is the 'futura bank' logo and a user profile for 'Sweta Thakur' with the last login time '06 May 06:00 PM'. The main content area has a title 'Resource Server Maintenance' and two input fields: 'Resource Server Name' and 'Identity Domain' (set to 'Select'). There are 'Search', 'Cancel', and 'Clear' buttons. To the right, a 'Note' box explains that a resource server contains user information accessed by third-party applications. A 'Create' button is at the bottom of the note.

Resource Server Maintenance – Search Summary

This screenshot shows the search results for the resource server. The 'Identity Domain' is now set to 'OBDXMobileAppDomain'. The search results table shows one entry: 'OBDXMobileAppResServer' with the description 'OBDXMobileAppResServer'. The page indicates 'Page 1 of 1 (1 of 1 items)'. A 'Cancel' button is located at the bottom left of the results area. The note on the right side of the page is identical to the previous screenshot.

Field Description

Field Name	Description

[Home](#)

53.3 Client Maintenance

Clients are Third Party Provides (TPPs) that can access information from the resource server on behalf of the user provided the user has provided consent to the TPPs. As part of this definition, the administrator can define client details i.e. client ID, client name, scopes, redirect URLs etc.

Pre-Requisites

- Transaction access is provided to System Administrator.

Features supported in application

Using this option System Administrator can perform the following actions:

- Create Client
- Edit Client
- View Client

How to reach here:

System/ Bank Administrator Dashboard > Toggle menu > OAuth > Client Maintenance

53.3.1 Client Maintenance - Search

User can search for any maintained Clients by entering the required search parameters.

To search for any maintained client

1. In **Client Maintenance** screen, enter the **Client Name** as one of the search criteria.
2. Click **Search**. The search summary appears.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Clear** to clear the search parameters.

Client Maintenance – Search

The screenshot shows the 'Client Maintenance' search interface. At the top, there is a navigation bar with 'System Administrator', 'ATM/Branch', 'English', and 'UBS 14.3 AT3 Branch'. Below this is the 'futura bank' logo and a user profile for 'Sweta Thakur' with a 'Last login' timestamp. The main content area is titled 'Client Maintenance' and contains a search form with the following fields:

- Client Id:
- Client Name:
- Identity Domain:
- Client Type:

Below the form are three buttons: 'Search' (blue), 'Cancel' (grey), and 'Clear' (grey). To the right of the form is a 'Client' summary box with a 'Create' button. The summary box contains a 'Client' icon and the text: 'Clients are Third Party Providers that can access information from the resource server on behalf of the user if the user has provided consent to the Third Party Providers.'

At the bottom of the page, there is a copyright notice: 'Copyright © 2006, 2020, Oracle and/or its affiliates. All rights reserved. | Security Information | Terms and Conditions'.

Client Maintenance – Search Summary

The screenshot displays the 'Client Maintenance' search interface. At the top, there's a navigation bar with 'System Administrator', 'ATM/Branch', 'English', and 'UBS 14.3 AT3 Branch'. The 'futura bank' logo is on the left, and a user profile 'Welcome, Sweta Thakur' is on the right. The main content area has a search form with fields for 'Client Id', 'Client Name', 'Identity Domain' (dropdown set to 'OBDXMobileAppDomain'), and 'Client Type' (dropdown set to 'Please Select'). A 'Search' button and a 'Clear' link are below the form. A table below the form shows one search result with columns for Client Id, Client Name, Identity Domain, and Client Type. A 'Create' button is located to the right of the search results. At the bottom, there's a 'Cancel' button and a copyright notice.

Field Description

Field Name	Description
Client ID	Specify the Client ID that is to be searched.
Client Name	Specify the Client Name if the client needs to be searched based on client name.
Identity Domain	Select the Identity Domain in which the client needs to be searched.
Client Type	Select the type of client based on which search is to be done.
Search Result	
Client ID	System displays the client ID of the client based on the input search parameters.
Client Name	System displays the client name of the client based on the input search parameters.
Identity Domain	System displays the name of identity domain to which client belongs.
Client Type	System displays the client type for the searched client.

- Click on **Client Id** link to view details of the selected client.

Client Maintenance – View

The screenshot shows the 'Client Maintenance - View' page in the Futura Bank system. The page header includes 'System Administrator', 'ATM/Branch', 'English', and 'UBS 14.3 AT3 Branch'. The user is identified as 'Welcome, Sweta Thakur' with a last login of '06 May 06:00 PM'. The main content area is titled 'Client Maintenance' and displays the following details:

Client Definition	
Client Id	2d79e939e0424mobapp8e5fab436fb5581
Client Name	OBDXMobileAppClient
Client Description	OBDXMobileAppClient
Identity Domain	OBDXMobileAppDomain
Client Type	Confidential Client
Grant Type	PASSWORD REFRESH_TOKEN
Redirect URL	
Redirect URL	http://localhost:8080/Sample.jsp
Scope	
Resource Server	OBDXMobileAppResServer
Scope	OBDXLoginScope ValidateDeviceScope
Default Scope	OBDXMobileAppResServer.ValidateDeviceScope

At the bottom of the client details, there are three buttons: 'Edit', 'Cancel', and 'Back'. The footer of the page contains the copyright notice: 'Copyright © 2006, 2020, Oracle and/or its affiliates. All rights reserved. | Security Information | Terms and Conditions'.

Field Description

Field Name	Description
Client Definition	
Client ID	Displays the Client ID of the selected Client
Client Name	Displays the Client Name of the selected client.
Client Description	Displays the Client description of the selected client.
Identity Domain	Displays the name of the Identity Domain to which client belongs.
Grant Type	Displays the grant type for the selected client.
Redirect URL	
Redirect URL	Displays the redirect page URLs for the selected client.

Field Name	Description
Scope	
Resource Server	Displays the name of the resource server to which the mapped scopes belong.
Scope	Displays the scope name defined for the client.
Default Scope	Displays the default scope defined for the client.

- Click **Edit** to update details of the client. User is directed to the **Client Maintenance - Edit** screen with values in editable form.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Back** to navigate to previous screen.

53.3.2 Client Maintenance – Edit

This function enables the System Administrator to update the details of the maintained clients. System Administrator can update specific client details, Redirect URL, and scopes.

To update client details:

- In **Client Maintenance** screen, enter the search criteria.
- Click **Search**. The search summary appears.
- Click the **Client ID** link of the record whose details you want to view. The **Client Maintenance – View** screen appears.
- Click **Edit** to update the client details. The **Client Maintenance – Edit** screen appears in editable form.

Client Maintenance – Edit

The screenshot displays the 'Client Maintenance - Edit' interface for 'futura bank'. The page is divided into three main sections:

- Client Definition:** Contains fields for Client Id (2d79e939e0424mobapp8e5fab436fb5581), Client Name (OBDXMobileAppClient), Client Description (OBDXMobileAppClient), Identity Domain (OBDXMobileAppDomain), Client Secret (with a 'Generate' button), Client Type, and Grant Type (Password and Refresh Token).
- Redirect URL:** Shows a single URL: http://localhost:8080/Sample.jsp, with an 'Add Redirect URL' button and a 'Remove URL' icon.
- Select Scopes:** Includes Resource Server (OBDXMobileAppResServer), Scope (OBDXLoginScope and ValidateDeviceScope), and Default Scope (OBDXMobileAppResServer:Validate...). It also has 'Add Scope' and 'Add Default Scope' buttons, and a 'Remove Default Scope' icon.

At the bottom of the form, there are 'Save', 'Cancel', and 'Back' buttons. The footer contains copyright information: 'Copyright © 2006, 2020, Oracle and/or its affiliates. All rights reserved. | Security Information | Terms and Conditions'.

5. Update the details as required.
6. Click **Save** to save the changes.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Back** to navigate to previous screen.
7. The **Review** screen appears. Verify the details, and click **Confirm..**
OR
Click **Cancel** to cancel the transaction.
OR
Click **Back** to navigate to previous screen.
8. The success message of client details modification appears along with the transaction reference number.
Click **OK** to complete the transaction.

53.3.3 Client Maintenance – Create

This function enables the System Administrator to create a new client i.e. Third Party Provider and define details like Client ID, Client Secret, Scopes, Redirect URLs etc.

To create client:

1. Click **Create** to create a new client. The **Client Maintenance - Create** screen appears.

Client Maintenance – Create

Field Description

Field Name	Description
Client Definition	
Client ID	Specify the Client ID or click Generate to auto-generate the client Id for the client to be created.

Field Name	Description
Client Name	Specify the client name for the client to be created.
Client Description	Specify the client description for the client to be created.
Identity Domain	Select the Identity Domain to which client belongs.
Client Secret	Specify the client secret or click Generate to auto-generate the client secret for the client to be created.
Client Type	Select the client type for the client to be created.
Grant Type	Select the grant type for the client to be created. User can select multiple grant types.
Redirect URL	
Redirect URL	Specify the redirect page URL. It is the page that the user will need to be re-directed to post Authorization Code flow
Select Scopes	
Resource Server	Select the resource server from which the scopes need to be selected for the client.
Scope	Select the scope to be defined for the client. User can select multiple scopes from the same resource server.
Default Scope	Select the default scope to be defined for the client.

2. In the **Client Id** field, enter the client Id or click **Generate** to auto-generate the client Id for the client to be created.
3. In the **Client Name** field, enter name for the client to be created.
4. In the **Client Description** field, enter description for the client to be created.
5. From the **Identity Domain** list, select the identity domain in which the client needs to be created.
6. In the **Client Secret** field, enter the client secret or click **Generate** to auto-generate the client secret for the client to be created.
7. From the **Client Type** list, select the appropriate client type for the client to be created.
8. From the **Grant Type** list, select the appropriate grant type for the client to be created.

Note: Click  to add Redirect page URL.

OR

Click  to remove already added Redirect page URL.

9. From the **Default Scope** list, select the default scope to be defined for the client.

Note: Click **Add Scope** to add scope.

OR

Click **Add Default Scope** to add default scope.

OR

Click  to remove already added default scope.

10. Click **Save** to save the changes.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Back** to navigate to previous screen.
11. The **Review** screen appears. Verify the details, and click **Confirm**.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Back** to cancel the operation to navigate to previous screen.
12. The success message of client creation appears along with the reference number.
Click **OK** to complete the transaction.

54. User Group Management

User group is a set of x users with similar interests and goals.

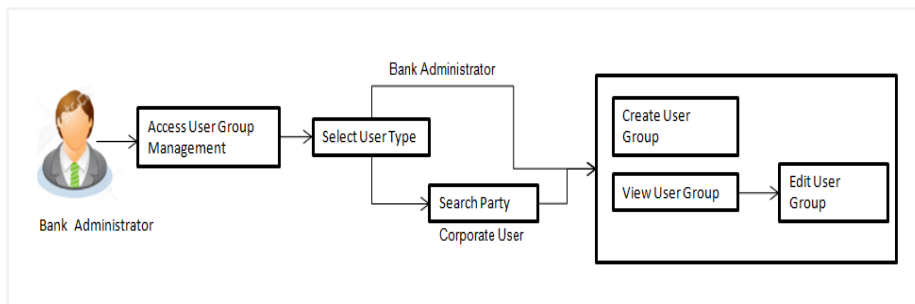

Using User Group Management option Bank administrator can maintain the user groups of Bank administrator and of corporate users of same party ID. User groups maintained by administrators for Bank administrator users and corporate users are used while creating approval workflows and approval rules.

Also the user groups created for Bank administrator type of user are used for mapping secured mail subjects. Each subject category can be linked to a group of Bank Administrator users. So that administrators will receive the mails only of the subjects mapped to the users.

Prerequisites:

- Transaction access is provided to Bank Administrator.
- Multiple corporate and administrator users are maintained.
- Approval rule set up for Bank administrator to perform the actions.
- Party preference for which the groups are to be created is maintained and is active.

Workflow

Features Supported In Application

User Group Management allows Bank Administrator to:

- Create User Groups
- View User Groups
- Modify User Groups

How to reach here:

System/ Bank Administrator Dashboard > Toggle menu > Others > User Group Management

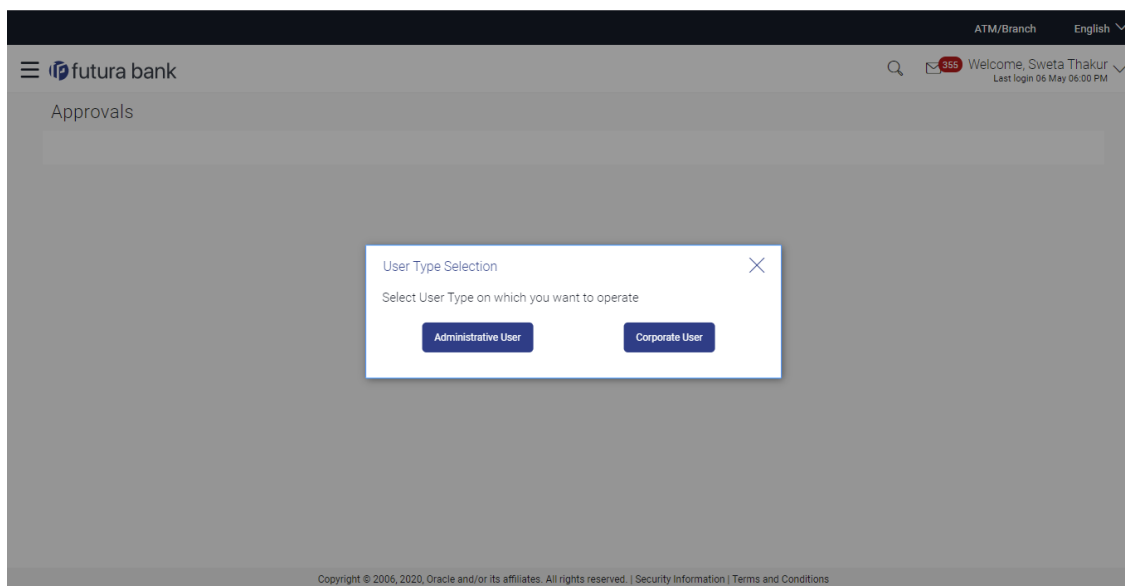

Note: User Groups can also be maintained for Non Customer Corporates (for which the party id is not maintained in UBS or in Core banking system). For such cases i.e. non customer corporate (counterparties on boarded by Corporates) the system will look for the party ID in OBSCF/OBCMS.

54.1 User Groups - Summary

Bank Administrator logs into the system and navigates to the User Group screen. On accessing the 'User Group Management' menu, Bank Administrator has to select the user type for whom the user groups are to be maintained.

1. The **User Type Selection** screen appears. Select the appropriate option.
Click **Admin User** to access the user group management of Bank Administrator users.
Click **Corporate User** to access the user group management of corporate users.

User Type Selection

User Group- Admin User:

Bank Administrator user can search the user groups maintained for administrator users.

2. Click **Search** to search the matching records.
OR
Click **Cancel** to abort the user group maintenance process.
OR
Click **Clear** to reset the entered details.

54.2 User Groups - Admin User – Create

Bank Administrator can create user groups for the Administrator users. Administrator can create multiple user groups and one user can be part of multiple user groups, whereas creating a user group without any user is not allowed.

To create a user group:

1. The **User selection** screen appears. Select the appropriate option.

Admin User Group -Create

Field Description

Field Name	Description
Create	
Group Code	User group code.
Group Description	Description provided to the user group.
Search Results - User Group	
User Name	User name list to select and add a user to the user group. All the administrator users will be listed down
User ID	User IDs of each user selected from user list are displayed.

2. Click **Create**.
3. In the **Group Code** field, enter the group code.
4. In the **Group Description** field, enter the group name.

5. In the **User Group** section, click **Add** to add the selected user in the User Group. Once added, the user name will be removed from the user drop-down to avoid duplication of users.
6. Click **Save** to create the user groups.
OR
Click **Cancel** to close the maintenance creation process.
OR
Click **Back** to navigate to the previous screen.
7. The **Review** screen appears. Verify the details, and click **Confirm**.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Back** to navigate to the previous screen.
8. The success message of user group creation appears along with the transaction reference number.
Click **OK** to complete the transaction.

Note: You can click  to delete a record.

54.3 User Groups - Admin User – Search Summary

User Groups maintained (if any) for administrator users are displayed on the screen after searching with valid input. User can opt to view the details of existing user groups or can create new user group using this screen.

1. In **Administrator User Group** screen, in the **Group Code** field, enter the group code.
OR
In the **Group Description** field, enter the group name.
2. Click **Search**. The search summary appears.

Admin User – Search Summary

The screenshot displays the 'Administrator User Groups' search summary interface. At the top, there is a navigation bar with 'System Administrator', 'ATM/Branch', 'English', and 'UBS 14.3 AT3 Branch'. The main content area includes a search form with 'Group Code' and 'Group Description' fields, a 'Search' button, and a 'Clear' button. Below the form is a table with the following data:

Group Code	Group Description	Users
ADMINUSERGROUP	ADMINUSERGROUP	4
AdminGroupforMails	AdminGroupforMails	3
Group111	Group Admin	1
johnadmin	johnadmin	1
AdmGrp	User group of admins	2
bhavgc	bhavgc	1
OBPMAdmMail	OBPMAdmMail	1
AdminSwe	AdminSwe	2

On the right side of the screen, there is a 'Create' button and a message: 'Administrator User Groups. Customers are grouped into user segments so that banks can offer appropriate products and services. You can create new user segments and use it subsequently to define specific maintenances at user segment level if required.'

Group Description	Description of the already maintained User group.
Users	Number of users associated with each user group.

- Click **Create** to create new user group.
OR
Click **Back** to navigate to previous screen.
OR
Click **Cancel** to abort the user group maintenance process.
OR
Click on **Group Code Hyperlink** to view details of the selected User Group.
Further drill down is given on the each user group to view the details of the users mapped to each group.

Admin User – View Group Details

The screenshot displays the 'Administrator User Groups' interface. At the top, there is a navigation bar with 'System Administrator', 'ATM/Branch', 'English', and 'UBS 14.3 AT3 Branch'. Below this, the 'futura bank' logo is visible along with a search icon and a user greeting: 'Welcome, Sweta Thakur' with a 'Last login 06 May 06:00 PM' timestamp.

The main content area is titled 'Administrator User Groups' and shows the following details:

- Group Code:** ADMINUSERGROUP
- Group Description:** ADMINUSERGROUP
- User Information:**
 - mukadmin:** Name: Mukhtar Siddique, Mobile Number: 9082335673
 - subadmin**
 - PSMaker**
 - SWATIADMIN**

At the bottom of the user information section, there are three buttons: 'Edit', 'Cancel', and 'Back'. To the right, a sidebar titled 'Administrator User Groups' contains a description: 'Customers are grouped into user segments so that banks can offer appropriate products and services. You can create new user segments and use it subsequently to define specific maintenances at user segment level if required.'

At the very bottom of the page, a copyright notice reads: 'Copyright © 2006, 2020, Oracle and/or its affiliates. All rights reserved. | Security Information | Terms and Conditions'.

Field Description

Field Name	Description
View	
Group Code	User Group code is displayed.
Group Description	User Group code description is displayed.
User Name	User name of the user who is part of the selected user group is displayed.
User ID	User ID of the user who is part of the user group is displayed.

4. Click **Back** to navigate to previous screen.
OR
Click **Cancel** to abort the user group maintenance process.
OR
Click **Edit** to edit the user group. User is directed to the **User Group-Edit** screen with values in editable form.

54.4 User Groups - Admin User – Edit Group

This function enables the Bank Administrator to edit the description of existing user groups. Bank Administrator can also add new users and remove existing users of the user group as part of this function. A check is performed on minimum and maximum number of users allowed as a part of user group while adding or removing the users from the user group.

To edit or update a user group:

1. In **Admin User Group** screen, in the **Group Code** field, enter the group code.
OR
In the **Group Description** field, enter the group name.
2. Click **Search**. The search summary appears.
3. Click the **Group Code** link of the record whose details you want to view.
The **User Groups - View** screen appears.
4. Click **Edit** to edit the user group.
The **User Groups - Edit** screen displays the mapping of the user group.

Admin User – Edit Group

Field Description

Field Name	Description
Summary	
Group Code	User Group description is displayed in editable form.
Group Description	User name of the user who is part of the user group. User name list to select and add a new user to the user group.
Users	Number of users available in each user group. (This field will be displayed only if there are existing user groups available under a party).

- Click **Add** to add the selected user in the User Group. Once added, the user name will be removed from the user drop-down to avoid duplication of users.
Click  to remove a user from the User Group.
- Click **Save** to save the User Group .The **User Group-Create - Review** screen post necessary validations appear.
OR
Click **Cancel** to cancel the operation and navigate back to 'Dashboard'
OR
Click **Back** to cancel the operation to navigate to previous screen.
- Verify the details, and click **Confirm**. The **User Group-Edit – Confirmation** screen appears.
OR
Click **Cancel** to cancel the transaction.

OR

Click **Back** to cancel the operation to navigate to previous screen.

- The success message of user group creation appears along with the transaction reference number.
Click **OK** to complete the transaction and navigate back to 'User Groups' screen.

54.5 User Groups - Corporate User – Search Party

Bank Administrator logs into the system and navigates to the User Group Management screen.

- The **User Type Selection** screen appears. Select the appropriate option.
Click **Corporate User** to access the user group management of corporate users.

System displays a screen to enter the party information (party ID or party name) and search party for which the user groups are to be maintained/ viewed.

User can enter the party ID (if known) or the party name with a minimum of 5 characters. System matches the input provided by the user with the party name records and displays the matching party records.

In case of a party search by party ID, it is an exact match and system displays the user groups maintained if any.

Corporate User – Search Party

The screenshot displays the 'User Groups' search interface. At the top, there is a navigation bar with 'System Administrator', 'ATM/Branch', 'English', and 'UBS 14.3 AT3 Branch'. Below this, the 'futura bank' logo is visible on the left, and a user profile 'Welcome, Swieta Thakur' with 'Last login 06 May 06:00 PM' is on the right. The main content area is titled 'User Groups' and contains two input fields: 'Party ID' and 'Party Name'. Below these fields are three buttons: 'Search' (blue), 'Cancel' (grey), and 'Clear' (text link). To the right of the input fields is a sidebar with a 'User Groups' icon and a text box explaining that customers are grouped into user segments for product and service offerings, and that new segments can be created and maintained at the user segment level.

System displays a screen to enter the party information (party ID or party name) and search party for which the user groups are to be maintained/ viewed.

In case of a party search by name, system displays the matching party records. The records have parties listed with both Party ID and Party Name information. User can select the record by clicking on the Party ID from the list.

Corporate User – Search by Party name

The screenshot displays the 'User Groups' management page in the futura bank system. At the top, the user is logged in as 'System Administrator' at 'ATM/Branch' in 'English' for 'UBS 14.3 AT3 Branch'. The search criteria are Party ID: 004308 and Party Name: Sunrise Coffee. Below the search criteria are buttons for 'Create', 'Back', and 'Cancel'. A table lists the following user groups:

Group Code	Group Description	Users
Grp001	GrpSun	10
Grp002	GrpSun	10
GROUPC1111	GroupCorporate	5
GrpSec	GrpSec desc	1
uggc2	uggc desc	1
test1	test1 desc	2
DtechTestReviewScn	DtechTestReviewScreen	2
uggc1	uggc desc	1
CGrp2	User group of corporate checkers	1

An informational box titled 'User Groups' explains that customers are grouped into user segments for product and service offerings, and that new user segments can be created to define specific maintenances at the user segment level if required.

OR
Click **Back** to cancel the operation to navigate to previous screen.
8. The success message of user group creation appears along with the transaction reference number.
Click **OK** to complete the transaction and navigate back to 'User Groups' screen.

FAQ

1. Can a user be the part of multiple user groups created under a party?

Yes, same user can be part of multiple user groups. Whereas creating a user group without any user is not allowed.

2. Where can these Administrator User Groups be used?

User groups created for Administrator users are used for approval and for User Group – mail subject mapping.

Approval - User groups maintained by administrators are used while creating approval workflows and approval rules.

Secured Mailbox - Each subject category is linked to a group of Bank Administrator users. Depending upon the mail-subject mapping to each Bank Administrator user, administrators will receive the mails only of the subjects mapped to the users and initiated by bank's customers.

3. Can I delete an existing user group?

No, user groups cannot be deleted but can be edited. Administrator can add new users and remove existing users of the user group.

4. Can I add users of linked party ID while creating a user group for primary party?

No, only users of primary party can be the part of user group.

55. Print Password

When a new user opens an account in the bank and registers for channel banking, the bank sends the printed password along with some other documents like Welcome letter, Terms & Conditions document and applicable promotional offers to the registered user via courier or post. This screen allows the Bank Administrator to print the password along with these documents for new users as well as for existing users who have requested for reset password.

Pre-Requisites

- Application roles and child roles are maintained
- Transaction access is provided to Bank Administrator.

Workflow

Features Supported In Application

The Print Password allows the Bank Administrator to

- Print Password and other welcome documents for new and existing users

How to reach here:

System/ Bank Administrator Dashboard > Toggle Menu > Others > Print Password

Print Password

The screenshot shows the 'Print Password' page in the futura bank system. The page header includes 'System Administrator', 'ATM/Branch', 'English', and 'UBS 14.3 AT3 Branch'. The main content area has a search form with the following fields and options:

- User Type: Administrator (dropdown)
- User Name: (text input)
- First Name: (text input)
- Last Name: (text input)
- Email ID: (text input)
- Mobile Number: (text input)
- Password Generation From: (text input)
- Password Generation To: (text input)
- Password Type: (dropdown with buttons for New, Reset, All)

At the bottom of the search form are buttons for Search, Cancel, and Clear. A 'Note' box on the right side of the page contains the following text:

Note

Users created by user management system will appear on this page under the new category and their passwords can be printed from the print option provided. The user whose password has to be printed can be searched by options provided. Passwords created are bifurcated into two categories as 'new' for new users of the bank and 'reset' for existing users who has requested for the password reset. Once password for a user gets printed, the corresponding record gets deleted.

Search Results

Full Name	First name and last name of the user.
User Name	User Name of the user.
Print Status	Print status of the password. If the password printing gets failed due to some reason for a user, system will show the status as 'error in printing' for that record. If the record gets successfully printed that record will get removed from the list. For the records which are not printed yet, this status remains blank.

- Click **Search**.
The search results appear on the **Print Password** screen based on the search parameters.
OR
Click **Clear** if you want to reset the search parameters.
OR
Click **Print** if you want to print the password letter, welcome letter, terms and conditions documents.
OR
Click **Cancel** if you want to cancel the transaction.

55.2 Print Password - Print

This feature allows the Bank Administrator to print the password letter, welcome letter, terms and conditions document etc.

To print the password letter for the user:

1. In the **Print Password - Search Results** section, select the user record for which you want to print the password letter.
2. Click **Print**. The 'Select Documents' pop up window appears.

Print Password

The screenshot displays the 'Print Password' page in the Futura Bank system. The page header includes the Futura Bank logo and a user profile for Sweta Thakur. The main content area is titled 'Print Password' and contains search filters for 'User Type' (Corporate User), 'User Name', 'Password Generation From', 'Password Generation To', and 'Password Type'. A 'Select Documents' modal window is open in the foreground, allowing the user to choose documents to print. The modal has three options: 'Promotional Offer' (checked), 'Welcome Letter' (checked), and 'Terms and Conditions' (unchecked). Below the modal, a table lists user records with columns for user name and ID. The table shows records for Steven Gerrard, MAHESH SINGH, Marinho Gerrard, Steven Gerrard, David Marinho, Richard Stanford, and Ashok Jain. At the bottom of the page, there is a copyright notice: 'Copyright © 2006, 2020, Oracle and/or its affiliates. All rights reserved. | Security Information | Terms and Conditions'.

Field Description

Field Name	Description
Select Documents	
Terms & Conditions	Document containing terms and conditions of the bank.
Welcome Letter	Welcome letter for the user for opening the account.
Promotional Offer	Promotional offers of the bank.

3. Select the documents, which you desire to print.

4. Click **Print** to print the documents.

OR

Click **Cancel** to cancel the printing.

Note: For printing the password, the implementation team will need to write a utility. For more information on implementation of 'Print Password', refer **Oracle Banking Digital Experience Security Guide**.

FAQ

1. **Can the password be only printed by the same Administrator user who has created the user/reset the password or it can be done by any other Administrator user as well?**

All the reset/new passwords can be printed by all the admin users who have access to Print Password Screen.

2. **Can the Bank maintain separate documents for each type of user role?**

No, documents cannot be maintained as per the user role. Same documents will be available for all type of users (Retail/Corporate/Administrator).

56. User Alerts Subscription

Using this option System/Bank Administrator can subscribe alerts for a user for selected events. Retail and Corporate users of the bank, can contact the bank to subscribe to alerts. The Bank Administrator subscribes users to alerts, delivered through Email, SMS, through push notification or in their on-screen mailbox.

Note that this functionality is for non-mandatory alerts.

The subscribed alert types are:

- User Level Alerts
- Customer Level Alerts
- Account Level Alerts

Pre-Requisites

- Transaction access is provided to Bank Administrator.
- Approval rule set up for Bank Administrator to perform the actions.
- Maintain Alerts, so that these are available for subscription
- Customers (retail and corporate users) are maintained

Workflow

Features Supported In Application

- Search alerts subscribed
- Subscribe / unsubscribe to alerts

How to reach here:

System/ Bank Administrator Dashboard > Toggle menu > Others > User Alerts Subscription

56.1 User Alerts Subscription - Search

Using this option, the Bank Administrator can search and view the details of alerts subscribed for the Retail or Corporate users of a Party. Here, bank admin is required to search user to whom alert maintenance is to be set up by entering party id of retail/ corporate user .

Once party id is identified application will display all the user records on boarded for selected Party Id with their Alerts Subscription Status. For the users whose alerts subscription is completed will be displayed with an indicator as alert subscription is done. Once, Admin selects the user, he will be navigated to User alert subscription detailed page.

All the alerts subscribed for a party will be displayed in the respective categories viz. Current and Savings, Term Deposits, Loans etc. in a table.

To view subscribed alerts for a Party:

1. In the **Party Id** field, enter the party id of the user.
OR
In the **Party Name** field, enter the name of the party.
2. Click **Search**. The party id will be displayed based on the search criteria.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Clear** to clear the search parameters.

User Alerts Subscription – Party Search

The screenshot displays the 'User Alerts Subscription' search interface. At the top, there is a navigation bar with 'System Administrator', 'ATM/Branch', 'English', and 'UBS OBPM 14.4 HEL Branch'. The main header includes the 'futura bank' logo and a search bar. The user is logged in as 'Jack Nikon' with the last login time '12 Aug 12:52 PM'. The search form contains two input fields: 'Party ID' with the value '000462' and 'Party Name'. Below these are three buttons: 'Search', 'Cancel', and 'Clear'. A table below the form shows the search results:

Party ID	Party Name
000462	ABZ Solutions

At the bottom of the table, there is a pagination control showing 'Page 1 of 1 (1 of 1 items)' and navigation arrows. A 'Note' box on the right side of the interface states: 'As Bank Administrator you can subscribe alerts for users or update existing ones. Start by searching for the customer by using party id or party Name. Select the customer you want and proceed to do the alert subscription'. The footer contains the copyright information: 'Copyright © 2006, 2020, Oracle and/or its affiliates. All rights reserved. | Security Information | Terms and Conditions'.

Field Description

Field Name	Description
Party ID	Party Id of the user.
Search Party Name	Enter Party Id, and click to search the party name of the user.
Search Result	
Party Id	Display Party ID
Party Name	Display Party name

To view subscribed alerts for a User:

- From the **User Name** list, select the appropriate option whose alerts you wish to view.
- In the **User Name** field, enter the user name.
- Click **Search**.

The search result appears based on the search criteria.

OR

Click **Back** to go back to previous step.

User Alerts Subscription – User Search

The screenshot shows the 'User Alerts Subscription' page in the Futura Bank system. At the top, there is a navigation bar with 'System Administrator', 'ATM/Branch', 'English', and 'UBS OBPM 14.4 HEL Branch'. The user is logged in as 'Jack Nikon'.

The main content area has a search bar for 'Party ID' (000462) and 'Party Name' (ABZ Solutions). Below this is a table with columns for 'Initials', 'User Name', and 'Full Name'. The table lists several users, with some having a 'Subscribed' status indicated by a green badge.

Initials	User Name	Full Name	Status
SD	SDVAMVVR	Shashodhar Dutta	Subscribed

FAQ

- 1. Which alerts can the Bank Administrator subscribe or unsubscribe, for the retail or corporate user?**

The alerts which are not mandatory can be subscribed or unsubscribed, by the Bank Administrator for the retail/corporate user.

- 2. What if a Retail or Corporate customer wants to opt-out of alerts?**

The Bank Administrator can unsubscribe the alerts for a Retail or Corporate customer. Please note that the customer will continue to receive the mandatory alerts irrespective of his choice on the subscribed alerts.

[Home](#)

57. Request Processing

This feature enables the Bank Administrator to view the details of each service request initiated by business user and hence, enables the administrator to take an informed decision regarding the approval or rejection of the service request. Alternately, the administrator can also select multiple service request records from the summary page to approve or reject multiple requests at once. The search criteria provided enables the administrator to filter service requests based on various criteria such as request type, status, reference number, etc.

For the requests built using Service Request Form builder feature, once the Administrator approves/rejects a Service Request, he can change the status of the request and can also enter the comments while updating the status.

Below are the Service Requests that are available out of the box in the system:

- Credit Card Supplementary
- Credit Card PIN Request
- Replace Credit Card
- Update Card Limits
- Update Credit Card Auto Payment
- Register Credit Card Auto Payment
- Deregister Credit Card Auto Payment
- Activate Credit Card
- Hotlist Debit Card
- Cancel Debit Card
- Debit Card PIN Request
- Apply Debit Card
- Replace Debit Card
- Block Debit Card (temporary block)
- Unblock Debit Card (remove temporary block)
- Upgrade Debit Card

Apart from the above mentioned Service Requests, Bank can define new Service Requests definitions using Service Request-Form builder.

Pre-Requisites

- Transaction access is provided to Bank Administrator.

Features Supported In Application

The module supports following features:

- View details of Service Request raised by customers
- Approve / Reject Service Requests
- Changes status of Service Request and input comments (for service requests built using Service Request-form builder)

How to reach here:

System/ Bank Administrator Dashboard > Toggle Menu > Others >Request Processing
OR

Bank Administrator Dashboard > Others >Request Processing

57.1 Request Processing - Summary

To view service requests:

1. Select the **Request Processing** option on the dashboard or menu. The initial (summary) page of the Request Processing appears.

Field Description

Field Name	Description
Search Criteria	
Product	The administrator can search for service requests based on type of product.
Request Category	The administrator can search for service requests based on service request category. Category list gets populated on the basis of the product name selected.
Severity	The administrator can search for service requests based on severity of the service request.
Status	The administrator can search for service requests based on status. On selecting a status, the administrator is required to mandatorily specify a date range so as to be displayed all the service requests that were initiated within the specified date range and that are in the particular status.
Request Name	The administrator can search for service requests on the basis of name of the service request.
Request Type	The administrator can select the type of service request to be displayed in the search result records.
Reference No	The administrator can search for a service request based on reference number that was generated at the time the service request was initiated.
Date Range	The administrator can search for service requests initiated between two dates by specifying a date range. The administrator cannot specify a date range that exceeds 30 days. (The maximum date range is configurable).
First Name	The administrator can search for service requests initiated by a particular business user by specifying the user's first name
Last Name	The administrator can search for service requests initiated by a particular business user by specifying the user's last name or surname
User Name	The administrator can search for service requests initiated by a particular business user by specifying the user's user name.
Party ID	The administrator can search for service requests initiated by business users on the basis of party ID.
Search Results	
Date	The date on which the service request was raised.

Field Name	Description
Request Name	The name of the service request.
Requested by	The name of the customer who has raised the service request.
User Name	The user name of the customer who has raised the service request
Party ID	The party ID of the user who has raised the service request.
Reference No	The reference number generated at the time the service request was raised.
Status	The current status of the service request.

- Click on a specific service request record to view the details of that service request.
OR
Select the checkbox of one or multiple service requests to approve or reject service requests.

To search for specific service requests:

- Enter the required information in the search criteria fields.
- Click **Search**. The specific service request records are displayed based on the search criteria specified.
OR
Click **Reset** to clear the search parameters.

Service Request - Search Result

The screenshot shows the 'Request Processing' interface for futura bank. At the top, there are navigation links for 'System Administrator', 'ATM/Branch', 'English', and 'UBS 14.3 AT3 Branch'. The user is logged in as 'Sweta Thakur' with the last login on 04 May 2020 at 06:00 PM. The interface includes search filters for Products (Credit Card), Severity, Request Name, Request Category, Status (Pending), and Request Type (All). Below the filters are 'Search' and 'Reset' buttons. A table displays the search results with columns for Date, Request Name, Requested By, User Name, Party ID, Reference No, and Status. The table contains 7 rows of data, all with a 'Pending' status. At the bottom, there are 'Approve' and 'Reject' buttons, and a 'Cancel' button. The page number is 1 of 1, and there are 7 items in total.

Date	Request Name	Requested By	User Name	Party ID	Reference No	Status
2020-05-01	Update Card Limits	Williamson Son1	RyantslamBohr	***707	2149	Pending
2020-04-30	Credit Card PIN Request	Williamson Son1	retallpmg	***968	2148	Pending
2020-04-30	Update Card Limits	Williamson Son1	retallpmg	***968	2147	Pending
2020-04-29	Addon Card	Vikram J Gupta	ATRetu192	***327	2132	Pending
2020-04-29	Register Credit Card Auto Payment	Vikram J Gupta	ATRetu192	***327	2131	Pending
2020-04-29	Replace Credit Card	Vikram J Gupta	ATRetu192	***327	2130	Pending
2020-04-29	Credit Card PIN Request	Vikram J Gupta	ATRetu192	***327	2129	Pending

- Click on a specific service request record to view the details of that service request.
OR
Select the check box of one or multiple service requests to approve or reject service requests.

57.2 Service Request Details (For Service Requests available out of the box)

This page is displayed once the Bank Administrator selects a service request record from the previous summary page. This screen comprises of three sections which display the details of the service request, the details of the initiator of the service request and also the transaction journey i.e. a time line graph depicting the stages of the service request.

Below are the Service Requests that are available out of the box in the system:

- Credit Card Supplementary
- Credit Card PIN Request
- Replace Credit Card
- Update Card Limits
- Update Credit Card Auto Payment
- Register Credit Card Auto Payment
- Deregister Credit Card Auto Payment
- Activate Credit Card
- Hotlist Debit Card
- Cancel Debit Card
- Debit Card PIN Request
- Apply Debit Card
- Replace Debit Card
- Block Debit Card (temporary block)
- Unblock Debit Card (remove temporary block)
- Upgrade Debit Card

To view the service requests details:

1. Enter the required information in the search criteria fields.
2. Click **Search**. The specific service request records are displayed based on the search criteria specified.
OR
Click **Reset** to clear the search parameters.
3. Click on a specific service request record to view the details of that service request. The service request details appears on the **Service Request Details** screen.

Service Request Details

The screenshot displays the 'Service Request Details' page. At the top, there is a navigation bar with 'System Administrator', 'ATM/Branch', 'English', and 'UBS 14.3 AT3 Branch'. Below this is the 'futura bank' logo and a search bar containing 'servi'. The user is identified as 'Welcome, Sweta Thakur' with a last login of '06 May 06:00 PM'.

The main content area is titled 'Service Request Details' and contains the following information:

Reference No	2149
Date Requested	01 May 2020
Request Type	
Account Id	xxxxxxxxxxxx0014
Debit Card Id	AT3005XXXXXX
Username	Williamson Son1
User ID	RyanIslamBohr
Party ID	***707

Below the table, there is a progress indicator with two steps: '1 ADMIN_PE' and '2 COMPLETE'. At the bottom left, there are buttons for 'Approve', 'Reject', 'Cancel', and 'Back'.

On the right side, there is a 'Note' box with the following text:

Note
This screen allows you to view and process the service requests that have been raised by the Retail users.
You need to Approve or Reject the request first and then you can update the status of the same. There is an option to provide comments while updating the request status so that the reason or any other important information can be captured and referred on a later date.

At the bottom of the screen, there is a copyright notice: 'Copyright © 2006, 2020, Oracle and/or its affiliates. All rights reserved. | Security Information | Terms and Conditions'.

Field Description

Field Name	Description
Request Details	
Reference No	The reference number generated at the time the service request was raised.
Date Requested	The date on which the service request was raised.
Request Type	The type of service request initiated.
User Details	
User Name	The user name of the business user who initiated the service request.

Field Name	Description
User ID	The user Id of the business user who initiated the service request.
Party ID	The party Id of the user who initiated the service request.

Transaction Journey

This section displays the stages of the service request in the form of a timeline graph. Details pertaining to when the service request was initiated along with when the service request was approved or rejected are displayed with the help of this timeline.

- Click **Approve** to Approve the Service Request.
OR
Click **Reject** to Reject the Service Request.
- Click **Back** to navigate back to the **Request Processing - Summary** screen.

57.2.1 Approve or Reject Service Requests (For Service Requests available out of the box)

The Bank Administrator can take action on service requests initiated by business users by either approving or rejecting requests. The Administrator can select multiple service requests to approve or reject from the Service Request Summary page and can also approve or reject a service request individually after having viewed the details of the request from the Service Request Details page.

To approve / reject service requests from Service Requests Summary page:

- Select the check boxes of the service requests that you wish to take action on.
The pop up on which to specify remarks for Approval/Rejection is displayed.
- Enter **Remarks** and click **Approve/Reject**.
The service requests get approved / rejected.

Multiple Service Request Approve or Reject

The screenshot displays the 'Request Processing' page in the Futura Bank system. The page header includes 'System Administrator', 'ATM/Branch', 'English', and 'UBS 14.3 ATB Branch'. The user is logged in as 'servi' with a welcome message for Sweta Thakur. The page shows a table of service requests with columns for Date, Request Name, Requested By, User Name, Party ID, Reference No, and Status. A dialog box titled 'Approve' is open, showing 'Selected Transactions (1)' and a text area for 'Remarks' containing 'Request Accepted'. The dialog has 'Approve' and 'Cancel' buttons.

Date	Request Name	Requested By	User Name	Party ID	Reference No	Status	
<input checked="" type="checkbox"/>	2020-05-01	Update Card Limits	Williamson Son1	RyanIslamBohr	***707	2149	Pending
<input type="checkbox"/>	2020-04-30	Credit Card PIN Request	Williamson Son1	retailpmg	***968	2148	Pending
<input type="checkbox"/>	2020-04-30	Update Card Limits	Williamson Son1	retailpmg	***968	2147	Pending

To approve / reject a service request from the Service Requests Details page:

1. Select the service request on which you wish to take action from the **Service Request Summary** page
2. Click **Approve** or **Reject** button.
The pop up on which to specify remarks for Approval/Rejection is displayed.
3. Enter Remarks and click **Approve/Reject**.
The service requests get approved/ rejected.

Individual Service Request Rejection

The screenshot shows the 'Service Request Details' page for a request with Reference No. 904. A 'Reject' dialog box is open, prompting the user to provide a comment (max length 100) in the 'Remarks' field, with 'reject the request' entered. The dialog has 'Reject' and 'Cancel' buttons. To the right, a 'Note' section states: 'This screen allows you to view and process the service requests that have been raised by the Retail users. You need to Approve or Reject the request first and then you can update the status of the same. There is an option to provide comments while updating the request status so that the reason or any other important information can be captured and referred on a later date.'

57.3 Service Request Details (Requests created using Service Request-Form Builder)

This page appears for the service requests created using 'Service Request Form Builder' screen.

The Bank Administrator selects a service request record from the summary page. This screen comprises of three sections which display the request attributes, the details of the service request and the user details.

To view the service requests details:

1. Enter the required information in the search criteria fields.
2. Click **Search**. The specific service request records are displayed based on the search criteria specified.
OR
Click **Reset** to clear the search parameters.
3. Click on a specific service request record to view the details of that service request.
The service request details appears on the **Request Processing** details screen.

58. Reports

Using this option, Administrators can generate various adhoc and schedule banking reports. Application provides an option to generate and schedule reports using Oracle Analytics Publisher Oracle Analytics and also by using an internal application. The adoption Oracle Analytics Publisher provides a simple and easy tool for the Operational and MIS reports

Prerequisites:

- Transaction access is provided to Bank Administrator
- Approval rule set up for Bank Administrator to perform the actions.
- Oracle Analytics Publisher is configured.

Workflow

Features supported in application

Reports module allows Bank Administrator to

- Generate and schedule Customer and Administrative Reports
- View/ Download generated Reports.
- View User Report Mapping
- Create User Report Mapping
- Edit User Report Mapping
- View Scheduled Report

[Home](#)

59. Report Generation

Bank Administrator logs into the system and navigates to Report Generation screen. On accessing 'Report Generation menu, Bank Administrator has to select an option if an adhoc report is to be generated or report needs to be scheduled.

Reports are categorized as:

- Adhoc Reports: When a report needs to be generated immediately on a need basis
- Schedule Reports: When report generation needs to be scheduled at fixed intervals e.g. daily, weekly, monthly etc.

After selecting the report generation category, user has to select a type of a report which needs to be generated. Other reports parameters with respect to each report are displayed on the screen as input fields so that report can be requested with specific data.

Note: If 2 factor authentication is enabled, the reports get generated only after successful authentication.

The list of reports is:

- API Consumption Report
- Bill Payment Pay Later Report
- Biller Reconciliation Report
- Biller Registration Report
- Date wise User Creation Report
- EPI Payment reconciliation Report
- FATCA & CRS Declaration Report
- File Identifier wise Party User Mapping Report
- Party User wise File Identifiers Mapping Report
- Party wise Approval Rule Report
- Party wise File Identifiers Mapping Report
- Party wise Payee Maintenance Report
- Party wise User Groups Report
- Party wise Workflows Report
- User Segment Summary Report
- Wallet Transaction Activity Report
- Wallets KYC Report
- Wallets Creation for a Date Range Report

How to reach here:

59.3.2 API Consumption - Schedule Reports

The reports that are generated in specific time frame such as daily, weekly, monthly, quarterly, and annually are categorized under scheduled reports.

To generate the API consumption schedule report:

1. Click the **Schedule** tab.
2. From the **Report Name** list, select the appropriate report to be generated. The respective report generation screen appears.

API Consumption Report - Schedule Report

The screenshot shows the 'API Consumption Report - Schedule Report' interface. The top navigation bar includes 'System Administrator', 'ATM/Branch', 'English', and 'UBS 14.3 AT3 Branch'. The main header shows 'futura bank' and a user greeting 'Welcome, Sweta Thakur' with the last login time '07 May 10:55 AM'. The 'Reports' section has two tabs: 'Adhoc' and 'Schedule'. The 'Schedule' tab is active, displaying a form with the following fields:

- Report Name: API Consumption Report
- Report Format: PDF
- Select Frequency: WEEKLY
- Start Generating: 05/08/20 11:40
- Stop Generating: 05/31/20 11:40
- Duration: 07 May 2020 to 17 May 2020
- Frequency: DAILY
- Touch Point: Internet
- Party Id: 004368
- User Segment: Corporate User
- User Id: pmfmaker01

At the bottom of the form, there are buttons for 'Schedule Report', 'Cancel', and 'Clear'. A link 'View Scheduled Reports' is also present. A 'Tips' box on the right side of the form contains the following text:

Tips
With this option, you can schedule reports which are internal or related to customers. You need to select the Report Name, Frequency and Duration for which you want to generate it. Once submitted you can either go to My Reports option and can view or download reports from there or can simply click on View Scheduled Reports link provided on the same page.

61. User Report Mapping

The user report mapping maintenance allows the Bank Administrators to map the report or set of reports to a specific corporate user. The corporate users can generate and view the reports of which they have an access to.

Bank Administrator searches a corporate user based on the party ID and view the reports mapped to him, he can also un-map the reports from specific corporate user so that access of the specific report/ s can be removed to that corporate user.

The Bank Administrator can also map the accounts of primary and linked parties for which the reports can be generated by a corporate user, so that corporate user can generate the report only for the accounts mapped to him.

How to reach here:

Administrator Dashboard > Toggle menu > Reports > User Report Mapping
OR

Bank Administrator Dashboard > Toggle menu > Reports > User Report Mapping

User Report Mapping

The screenshot displays the 'User Report Mapping' page within the Futura Bank system. At the top, there is a navigation bar with 'System Administrator', 'ATM/Branch', 'English', and 'UBS 14.3 AT3 Branch'. Below this, the 'futura bank' logo is visible on the left, and a user profile 'Welcome, Sweta Thakur' with 'Last login 07 May 12:20 PM' is on the right. The main content area is titled 'User Report Mapping' and contains a search form with two input fields: 'Party ID' and 'Party Name'. Below these fields are three buttons: 'Search' (in blue), 'Cancel' (in grey), and 'Clear' (in light blue). To the right of the search form is an 'Info' box with a document icon and the following text: 'With this function, you can map the reports to the users of a party. All you have to do it select the User for which you want to map the reports. Link it with the required parameters and save your changes.' At the bottom of the page, there is a small copyright notice: 'Copyright © 2006, 2020, Oracle and/or its affiliates. All rights reserved. | Security Information | Terms and Conditions'.

Field Description

Field Name	Description

11. Click **Ok** to complete the transaction.

[Home](#)

63. User Helpdesk

This feature will allow Bank administrator to create business user's session and perform the transaction requested by business user if he has forgotten his internet banking password or is unable to perform a transaction using his internet banking.

To authenticate the user, system will send an OTP to the customer and the same OTP needs to be communicated to the administrator user so that he can enter it on the screen to create user's session.

Note: OTP should be maintained as the second factor authentication for 'Create Helpdesk Session' event in Authentication setup.

How to reach here:

System/ Bank Administrator Dashboard > Toggle Menu > Others > User Helpdesk
OR
Bank Administrator Dashboard > Others > User Helpdesk

User Helpdesk - Search

To search user helpdesk:

1. From the **User Type** list, select the user.
2. In the **User Name** field, enter the name of the user.
OR
In the **Party ID** field, enter the party ID.
3. Click **Search**.

User Helpdesk - Search

The screenshot displays the 'User Helpdesk' search interface. At the top, there are navigation links for 'System Administrator', 'ATM/Branch', 'English', and 'UBS 14.3 AT3 Branch'. The user is logged in as 'Sweta Thakur' with the last login time '07 May 01:05 PM'. The search form includes a dropdown for 'User Type' (Retail User), a text field for 'User Name' (retail), and a text field for 'Party ID'. A 'Search' button and a 'Clear' link are provided. The search results are displayed in a table with the following data:

Full Name	User Name	Party ID	User Segment
Snehal Retail	sretail	007787	retailuser
Snehal Retail	Sretail1	007789	retailuser
Pizza Retail	retail01	006207	retailuser
Parag Kinikar	pskretail	008708	retailuser
SWATI THITE	shiniretail	009162	retailuser
SWATI THITE	SWATIRETAIL143	009387	retailuser
Fred Williams	192RetailUser143	008998	retailuser
Retail User	sneretail	009195	retailuser
SWATI THITE	SWATIRETAIL	009162	retailuser
Jack Paul	Jretail	007303	retailuser

The table shows 10 results. The pagination indicates 'Page 1 of 3 (1-10 of 26 items)'. There are 'Cancel' and 'Ok' buttons at the bottom of the search results area. A 'Help Desk' sidebar on the right provides instructions: 'This function allows you to perform transaction on behalf of Retail or Corporate User. You can simply search the user by his user User ID or Party ID. Select the user from the list, and enter the OTP communicated by User to authenticate the User. Post successful authentication, you can perform any transaction on the user's session.'

Field Description

Field Name	Description
User Type	The user type for which the help desk session has to be created.
User Name	User name (User ID) of the user for which help desk session has to be created.
Party ID	Party ID of the user for which the help desk session has to be created. Administrator can enter either the party ID or the user name.

Search Result

Full Name	Displays the full name of the user.
User Name	Displays the user name (user ID) of the user.
Party ID	Displays the party ID of the user.
User Type	Displays the type of the user (Retail/Corporate).

-
4. Click on the **User Name**. Session of the selected user gets displayed.

User Helpdesk - Detail

The header displays the user name on behalf of whom the session is in progress. You can click  icon to close the active session. Once the active session is successfully closed, the Administrator will be navigated to the Dashboard.

The screenshot shows the Futura Bank user dashboard. At the top, there is a navigation bar with 'Default Dashboard', 'ATM/Branch', and 'English'. Below this is the 'futura bank' logo and a search bar. The main content area is divided into several sections:

- My Net Worth:** A circular gauge showing 'I Have £21,219,763.12'. A legend lists: Current & Savings (£21,219,763.12), Term Deposit (£0.00), Recurring Deposit (£0.00), and Wallet (£0.00). Buttons for 'I Have' and 'I Owe' are present.
- Recent Activity:** A table showing a transaction on 22 Mar 2019 for £4,000,000.00 Cr. A dropdown menu shows 'Current And Savi...' and 'xxxxxxxxxxxxxxxx0068'. A 'View More' link is at the bottom.
- My Spends:** A circular gauge showing '100%' for 'Uncategorized' spends. Total Spends are £1,331.33. A 'View All' link is at the bottom.
- My Accounts:** A list of account types with balances: Current & Savings (£21,219,763.12), Term Deposits (£0.00), Recurring Deposits (£0.00), Loans and Finances (£149,643.52), and Credit Card (£600.00). Each item has a right-pointing arrow.
- My Bills:** A message stating 'No bills presented due for payment'. Links for 'Quick Recharge', 'Quick Bill Pay', and 'View All Bills' are at the bottom.
- Upcoming Payments:** A message stating 'Relax! You currently do not have any Upcoming Payments'. A 'Set Repeat Transfers' link is at the bottom.
- Payments:** A grid of icons for 'Transfer Money', 'Pay Bills', 'Favorites', 'Manage Payees', 'Request Money', and 'View Repeat Transfers'.
- Service Request:** A message stating 'No Actions Pending'. Links for 'Raise New Request' and 'Track Request' are at the bottom.
- Notifications:** A message stating 'No New Notifications. Check this section for new notifications'. A 'View All' link is at the bottom.
- My Advisors:** A message: 'Please contact Futura Bank for getting your advisors details. 1800-000-000'. An icon of a person and a laptop is shown.
- Available Balance:** A message: 'Available Balance £0.00'. An icon of a person and a laptop is shown. Links for 'Add Money', 'Send Money', and 'View Statement' are at the bottom.
- FuturaMax:** A promotional banner with the text: 'With FuturaMax, you can manage your money at one place.' and a 'Link Account' button.

At the bottom of the dashboard, there is a footer: 'Copyright © 2006, 2020, Oracle and/or its affiliates. All rights reserved. | Security Information | Terms and Conditions'.

FAQ

- 1. Can the Bank administrator create the helpdesk session for a new user (who has channel banking facility but has never logged in)?**

No, for new users helpdesk session cannot be created, new users must login himself for the first time.

- 2. Can the administrator set the 2FA mode anything else other than OTP for 'Create Helpdesk session' event in the Authentication screen?**

System does not restrict the administrator from selecting a mode while setting up 2FA for 'Create Helpdesk session', however Administrator must set OTP as the 2FA mode for creating user helpdesk session.

- 3. Can the administrator create the helpdesk session for the user, whose status is updated as 'Locked'?**

No, the system will alert Bank Administrator to update the status of the user to "Unlock" from the User Management before creating the helpdesk session.

[Home](#)

64. Mailbox

Mailbox is a two way communication channel between Bank customers and Bank administrators. Customers communicate with the bank via secured mailbox facility. Customers can send mail messages to the bank with specific pre-defined subjects for their queries/ complaints /feedback. In application, as day 0 maintenance each subject category is linked to a group of bank administrators' users. Depending upon the mail-subject mapping to each bank administrator user, administrators will receive the mails only of the subjects mapped to the users.

Administrators can view the number of received e-mails and access all received and sent e-mails from their secured mailbox. User can click the message to read the detailed content of the message. The subject of the message gives a brief understanding of what the message is about. User can view the message details, the sender information and also view the chain of messages exchanged if any.

The complete chain of message helps user to understand and know the information exchanged with the bank on a particular subject. Bank administrators can also view the alert messages sent by the bank on various banking events.

As a Day 0 maintenance, Bank has to define whether the OBDX mailbox should point to the UBS-interaction module or to the internal mailbox. In case if the mailbox is pointed to the UBS-Interaction module, the mail initiated by customers will be sent to the UBS bank user for his action and will not be sent to the OBDX administrator.

Pre-Requisites

- Roles and departments for various Bank Administrator must be defined in reference to mail section
- Alerts must be pre-set by bank and gets auto triggered if subscribed by customer or set as mandatory

Features supported in Application:

- **Inbox:** Where bank administrators can view the messages sent by the customers and also can reply and delete the mails.
- **Sent Mail folder:** This allows user to view the mails replied by logged in user. Also an option is provided to delete the mails.
- **Deleted Mail Folder:** This allows the user to view mails deleted from user's inbox and sent folders and can permanently delete the mails. There is an option to restore the deleted mails to respective folder.
- **Alerts:** View the alerts sent by the bank and received by logged in user. Also an option is provided to delete the alerts.
- **Notifications** - This section allows the logged in user to view all the notifications sent by the bank. Also an option is provided to delete the notifications.

How to reach here:

System/ Bank Administrator Dashboard > Toggle Menu >Mailbox > Mails
OR

System/ Bank Administrator Dashboard > Click 

64.1 Mails

The Mails functionality consist of the following sections:

- **Inbox** : can view messages and can also reply to the messages received
- **Sent Mail**: can view the messages that have been sent by logged in user
- **Deleted Mail**: can view the messages deleted by logged in user from Inbox and Sent Mail folder

Mailbox- Mails

The screenshot shows the Futura Bank Mailbox interface. At the top, there is a navigation bar with 'System Administrator', 'ATM/Branch', 'English', and 'UBS 14.3 AT3 Branch'. Below this, the 'futura bank' logo is visible. The main content area is titled 'Mailbox' and contains a list of folders: 'Inbox', 'Sent Mail', and 'Deleted Mail'. The 'Inbox' folder is selected, showing a list of two emails. The first email is from 'SWATI THITE' with the subject 'Re: Change Communication Address', received on '05 May 2020 02:20:35 PM'. The second email is from 'Pizza Retail' with the subject 'Change Communication Address', received on '05 May 2020 02:13:44 PM'. The interface also shows a 'Cancel' button and a footer with copyright information: 'Copyright © 2006, 2020, Oracle and/or its affiliates. All rights reserved. | Security Information | Terms and Conditions'.

Field Description

Field Name Description

Inbox	Folder that lists the messages sent to Bank Administrator. Number of unread mails if any will be displayed.

FAQ

1. Can Bank Administrator initiate fresh mails?

No, Bank administrator can not initiate fresh mail. Administrator will be allowed only to reply to the mails received in their inbox.

2. Will Bank Administrators receive all mails initiated by bank's customers?

Bank Administrators will receive only those mails of which the mail subject is mapped to individual user or group of users. E.g. Mail initiated by customer with subject 'Change of communication address' will only be sent to the users whom this subject is mapped.

3. Can Bank Administrator view reply sent by other Administrator to customer's mail?

Yes, bank administrators can view the mails replied by other administrators, only if the mail subject is mapped to the user.

4. Can Bank Administrator delete multiple mails?

Yes, user can select multiple mails and delete the same.

5. Can Bank Administrator restore the deleted mails?

Deleted mails from inbox and sent mail folder will be stored in Deleted Mails folder. User can view the details of deleted mail and can restore the mail back in respective folders. Mails will get permanently deleted from user's view if further deleted from 'Deleted Mail folder'.

65. Security Settings

Security settings includes changing of password and setting of security questions for the user.

Pre-requisites

- User must have a valid Login credentials
- Transaction access is provided to Bank Administrator

Workflow

Features supported in application

The Security Settings maintenance allow the Bank Administrator to:

- Changing of old password to new Password
- Set Security Questions
- View Security Questions
- Edit Security Questions

How to reach here:

System/ Bank Administrator Dashboard > Toggle Menu > Security Settings

65.1 Set Security Question

Security Questions are the second layer of authentication mode set by the Bank to complete various transactions.

This feature allows the administrator user to set up the answers of the security questions, which will then be used as another layer of security (Over and above the Login credentials).

User will be asked to answer these security questions to complete the transactions for which bank would have set Security Question as the second factor authentication.

How to reach here:

Administrator Dashboard > Toggle Menu > Security Settings > Set Security Question

Set Security Question

The screenshot shows the 'User Security Questions' page in the Futura Bank interface. At the top, there is a navigation bar with 'System Administrator', 'ATM/Branch', 'English', and 'UBS 14.3 AT3 Branch'. Below this is the Futura Bank logo and a user profile for 'Sweta Thakur' with a last login of '07 May 01:05 PM'. The main content area has two tabs: 'Set Security Question' (active) and 'Change Password'. Under the 'Set Security Question' tab, there is a list of security questions:

Security Question	What is the brand of your first mobile?
Security Question	What is your favourite teacher's name?
Security Question	How many siblings do you have?
Security Question	In what county were you born?
Security Question	Which sport you like most?

At the bottom of the list are three buttons: 'Edit', 'Cancel', and 'Back'. To the right of the list is a 'Note' box with the following text:

Note

Security questions works as an added layer of security that helps in protecting your account against fraudulent activities.

You must:

- Choose answers that are difficult for others to guess
- Choose questions which you have not answered on public or on social media sites

At the bottom of the page, there is a copyright notice: 'Copyright © 2006, 2020, Oracle and/or its affiliates. All rights reserved. | Security Information | Terms and Conditions'.

To set up security questions:

Note: Since security questions have not been set-up by the user, message will be displayed "Security Questions are not set up yet".

1. Click **Set up now** to set-up security questions. The **User Security Question** screen appears.
OR
Click **Cancel** to cancel the operation and navigate back to 'Dashboard'.
OR
Click **Back** to go back to the previous screen.

Field Description

Field Name	Description
Email	Enter your email ID that is registered with the bank.
Date of birth	Enter your date of birth.

2. In the **Email** field, enter your email ID that is registered with the bank.
3. In **Date of birth** field, enter your date of birth.
4. Click **Submit**.
OR
Click **Cancel** to cancel the transaction.
5. The verification screen appears if the transaction is configured for Two Factor Authentication.
6. Enter the details required for second factor authentication.
The **Forgot Username** confirmation screen appears.

Forgot Username – Confirmation Page

7. A message stating that the username has been sent to your registered email address appears. Click the **Click here** link to log in to the application.

Note: If a user has more than one user ID with the same email ID and DOB, then he/she will not be able to retrieve his/her User ID using the above function. In that case, the user will have to contact the bank for retrieving his/her user ID.
