## 1.4 Structure

This manual is organized into the following categories:

*Preface* gives information on the intended audience. It also describes the overall structure of the User Manual.

*Introduction* provides brief information on the overall functionality covered in the User Manual.

The subsequent chapters provide information on transactions covered in the User Manual.

Each transaction is explained in the following manner:

- Introduction to the transaction
- Screenshots of the transaction
- The images of screens used in this user manual are for illustrative purpose only, to provide improved understanding of the functionality; actual screens that appear in the application may vary based on selected browser, theme, and mobile devices.
- Procedure containing steps to complete the transaction- The mandatory and conditional fields of the transaction are explained in the procedure. If a transaction contains multiple procedures, each procedure is explained. If some functionality is present in many transactions, this functionality is explained separately.

## 3. Host – To – Host File Inquiry

Corporates often look forward for an option to make multiple transactions and multiple maintenances quickly and conveniently through a single file upload typically for processing the salary of the corporate staff, for making the vendor payments or even for managing their Virtual Accounts or creating invoices on buyers through uploading a file.

Salary payments, fund transfers, vendor payments are a few examples of financial transactions that can be supported through bulk file upload. Similarly upload of multiple payee creation records is an example of a non-financial file upload.

---

**Note:** The host - to - host file inquiry facilitates viewing of the Bulk files uploaded via Oracle Banking Electronic Data Exchange for Corporates

---

### 3.1 Host -To - Host File inquiry

Using this option, the user can view the files uploaded by the corporate using Oracle Banking Electronics Data Exchange (OBEDX) application (only those files that the user has access to) and their status, On OBDX platform.

## **FAQ**

1. **If a payment file is in the approved status, does it mean that all the records are successfully liquidated?**

No, the file still has to successfully pass validations in the host system, before records are processed.

[Home](#)

## 4. File Approval

This option allows the approver to approve / reject the uploaded file. File approval could be either

- File Type
- Record Type

In a File type Approval, the approver accepts or rejects the entire file, and all records are either processed or rejected. While in a Record type approval, the approver could approve some records, and reject others. Only the approved records are processed further.

### How to reach here:

*Approver Dashboard > Pending for Approvals*

### 4.1 File Approval

Once a file is uploaded and pre-processing checks are successfully completed, the file is pending approval, and is in the respective Approver's queue.

#### To approve / reject a file:

1. In the **Pending for Approval** section, click the **Host-to-Host Bulk Files** tab. All the uploaded files that require approval appears.
2. Select the multiple files and click **Approve** to approve the transactions.
