1. Preface

1.1 Intended Audience

This document is intended for the following audience:

- Customers
- Partners

1.2 Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc>.

1.3 Access to Oracle Support

Oracle customers have access to electronic support through My Oracle Support. For information, visit

<http://www.oracle.com/pls/topic/lookup?ctx=acc&id=info> or visit

<http://www.oracle.com/pls/topic/lookup?ctx=acc&id=trs> if you are hearing impaired.

1.4 Structure

This manual is organized into the following categories:

Preface gives information on the intended audience. It also describes the overall structure of the User Manual.

Introduction provides brief information on the overall functionality covered in the User Manual.

The subsequent chapters provide information on transactions covered in the User Manual.

Each transaction is explained in the following manner:

- Introduction to the transaction
- Screenshots of the transaction
- The images of screens used in this user manual are for illustrative purpose only, to provide improved understanding of the functionality; actual screens that appear in the application may vary based on selected browser, theme, and mobile devices.
- Procedure containing steps to complete the transaction- The mandatory and conditional fields of the transaction are explained in the procedure. If a transaction contains multiple procedures, each procedure is explained. If some functionality is present in many transactions, this functionality is explained separately.

1.5 Related Information Sources

3. Liquidity Management

Liquidity Management solution provides with an ability to the corporate customers to manage their liquidity by optimizing interest by offsetting account balances, reducing interest costs, maximizing net returns and by providing greater visibility over cash positions. It helps to mobilize and manage funds corrective actions, helps to reduce external borrowing and liquidity risk, manages foreign currency liquidity requirements, and enhances visibility of cash across the group.

As a part of Liquidity Management module of Oracle Banking Digital Experience, following features are available to the corporate customers of the Bank.

- **Liquidity Management Overview Dashboard**

The liquidity management dashboard provides an important information to the corporate on digital banking platform. Various widgets are a part of the dashboard which gives the complete information about the corporate position.

- Position of a corporate by region/geographical location
- Position of a corporate by currency
- Net corporate position along with assets and liabilities information
- Top sweeps in local currency and cross currency
- Sweep Monitor

- **Account Structure Maintenance:**

Account structure is an efficient tool to optimize the working capital of the business. The objective of creating an account structure is to bring together the credit and debit balances of different current and savings accounts into one single concentration account of a corporate. This enables the corporate customer to manage daily liquidity in their business in a consolidated fashion to derive maximum benefits at minimal cost.

Oracle Banking Digital Experience enables the corporate users to maintain account structures by providing sweep or pool instructions.

As a part of account structure maintenance, Oracle Banking Digital Experience enables the customer to,

- **Build Account Structure**

Application allows the corporate user to build new account structure using digital banking platform. While building a structure, corporate can capture.

- Structure Type and Details (Sweep, Pool, Hybrid)
- Account Mapping and specify the hierarchies
- Check basic validations
- Set up instructions between each account pair.

- View and Edit Account Structure

A facility is provided to corporates to search the account structures maintained between the internal and external accounts of their parties. Further, can see and edit the structure details along with the instructions set between an account pair.

- Pause account structure and Adhoc Execution

Corporates can pause the processing of a structure for a specific time period and also can initiate an adhoc execution of sweeps for specific structure.

- **Log Monitor**

A feature is enabled to the corporate user to select the structure and view the sweep logs of a structure with specific statuses

- Executed
- Pending
- Exceptions (Failed executions)

- **Liquidity Management using Virtual Accounts**

The Liquidity Management module in Oracle Banking Digital Experience can handle both real accounts as well as Virtual Accounts. Below are the key points:

- In order to be able to do liquidity management using Virtual Accounts, the bank must also be using the Virtual Accounts module of Oracle Banking Digital Experience along with product processors (Oracle Banking Virtual Accounts Management and Oracle Banking Liquidity Management). Further the product processors must have an integrated setup.
- The party/customer and user must have the necessary access management rights enabled for Virtual Accounts in liquidity management.
- Once the Virtual Accounts are visible, rest of the steps in creating liquidity management structure, capturing sweep instructions etc. remain same for both real and Virtual Accounts. At this point only Sweep structures are allowed for Virtual Accounts.
- The Virtual Account balances visible on the screen are fetched from Oracle Banking Virtual Account Management.

3.1 Overview (Dashboard)

Dashboard provides a quick view of the most relevant functions, to achieve a particular objective or complete a process. Cash and Liquidity Management Dashboard provides the detailed information about the corporate position. The dashboard is organized in the form of different widgets. Screen displays the consolidated balance available in all accounts enabled for liquidity management with the number of accounts mapped to the logged in user.

The widgets shown in on the Liquidity Management Dashboard are as follows:

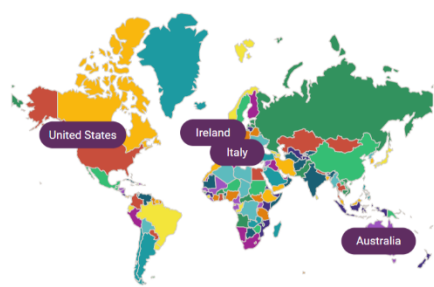

- Position by Region
- Position by Currency
- Balances Summary
- Top 5 sweeps in local currency and in cross currency
- Sweep Monitor
- Quick Links

Dashboard Overview

Position By Region

This widget displays the information of the corporate position based on the internal and external current and savings account across different geographical location. Total available balance in all the accounts which are enabled for liquidity management and which are mapped to the logged in user is converted in local currency, consolidated by region and the information is shown in the world map. Also the region wise balance is displayed in the tabular form.

By clicking on the specific region in world map, corporate can view the number of accounts held under a region in different currencies along with the balances. Further drill down is available to view the region-currency wise account summary.

Position By Region

Australia EUR

Party Name	Account Number	Account Type	Balance
ALL SPORTS	xxxxxxxxxxxx0103	Internal	EUR200,000.00
ALL SPORTS	xxxxxxxxxxxx0056	Internal	EUR200,000.00
ALL SPORTS	xxxxxxxxxxxx0114	Internal	EUR200,006.77
ALL SPORTS	xxxxxxxxxxxx0045	Internal	EUR1,299,630.40
ALL SPORTS	xxxxxxxxxxxx0125	Internal	-EUR899,630.40

Page 1 of 1 (1-5 of 5 items) < 1 >

Ok

Balances Summary

- Region Name – Name of the region for which the user wants to view the corporate position
- Currency – Currency in which the accounts are held under the selected region
- Party Name – Name of the party mapped to the corporate accounts
- Account Number – Account number held by the corporates
- Account Type – The type of the account Internal/External
- Net Balance – Balance in the account

Position By Currency

Corporate user can view the position of the corporate by currency based on the internal and external current and savings account which are enabled for liquidity management and mapped to the user. Further drill down is available to view the currency wise account summary grouped by region.

Position By Currency - EUR				Position By Currency	
Party Name	Account Number	Account Type	Net Balance	Currency	Balance
ALL SPORTS	xxxxxxxxxxx0103	Internal	EUR200,000.00	GBP	GBP1,759,593.84
ALL SPORTS	xxxxxxxxxxx0056	Internal	EUR200,000.00	EUR	EUR1,000,006.77
ALL SPORTS	xxxxxxxxxxx0114	Internal	EUR200,006.77		
ALL SPORTS	xxxxxxxxxxx0045	Internal	EUR1,299,630.40		
ALL SPORTS	xxxxxxxxxxx0125	Internal	-EUR899,630.40		

Page 1 of 1 (1-5 of 5 items) < 1 >

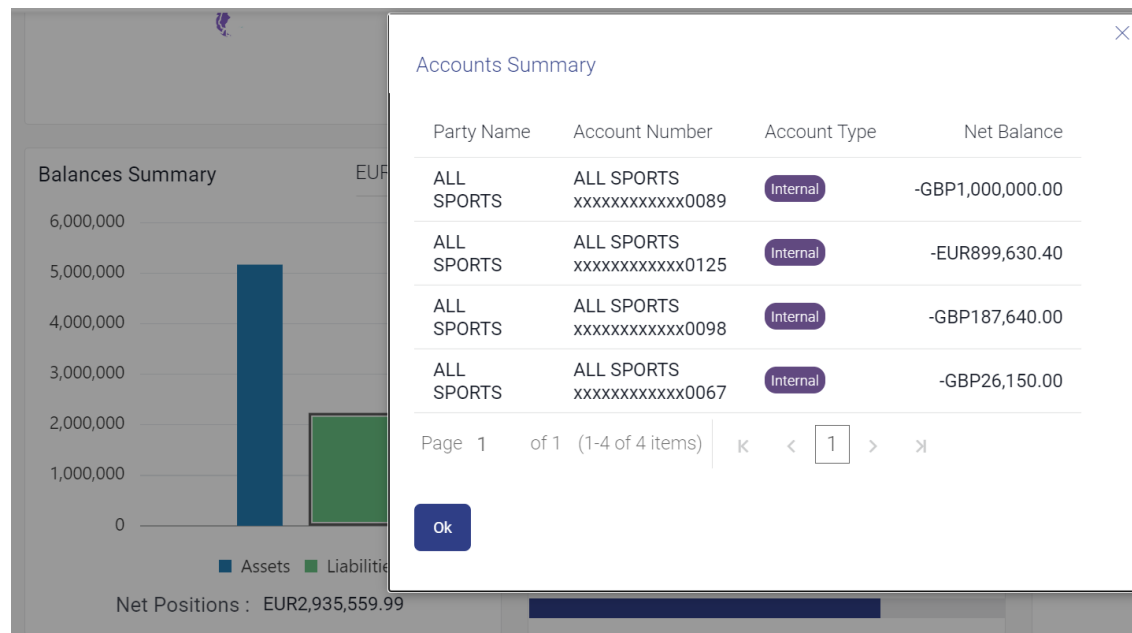

Ok

- Party Name - Name of the party mapped to the corporate accounts
- Account Number – Account number held by the corporates
- Account Type – The type of the account Internal/External
- Net Balance – Net balance in the account.

Assets and Liabilities with Net Position

The section displays the total position of assets and liabilities in graphical form specific to Liquidity Management. The information is based on the balances available in the Liquidity Management enabled current and savings accounts. Default, corporate position is shown in the local currency, whereas the user can choose to view the information in specific currency.

A further drilldown is available on the Assets and Liabilities column, which opens an overlay with the individual account details.

Quick Links

The following commonly used transactions can be initiated from this section:

- Create Structure - allowing the corporate users to create new account structure using digital platform
- Structure List - allowing the corporate users to view the account structures maintained between the accounts of their parties

Top 5 Sweeps in Currency

This section displays the top five latest sweeps based on the sweep amount in the form of bar graph. The sweeps of last 30 days are converted in local currency for comparison and the highest number of sweeps are listed along the Account Structure IDs. User can further choose to view the information in specific currency.

User can see the top sweeps based on the account structures access availability. Account Structure access is granted only if the user has access to all accounts participating in the account structure.

Top 5 Cross Currency Sweeps

The section displays the list of top five cross currency sweeps which are executed in last 30 days. By default, the 5 sweep outs in local currency which are swept-in in child account in cross currency are listed. User can further choose to view the top sweeps of specific currency.

User can see the top sweeps based on the account structures access availability. Account Structure access is granted only if the user has access to all accounts participating in the account structure.

Sweep Monitor

This section allows the user to view the last 5 upcoming, pending, executed and the logs which went into an exception along with the sweep details. User can choose to download sweep log or can also choose to view the detailed information of sweeps by clicking on 'View All'.

Click **View All** to view all the logs via 'Log Monitors' transaction.

Click **Download** to download the log record in PDF or CSV formats.

Click  to refresh the logs.

4. Account Structure Maintenance

Account structure is an efficient tool to optimize the working capital of a business processes. A suitable physical account structure provides greater degree of control and flexibility, to the corporate treasuries. It also allows the better visibility and control of corporate accounts. With the account structures corporate customers gets the holistic view of all group of accounts to take funding or investment decisions

The structure reflects the hierarchical relationship of the accounts as well as the corporate strategies in organizing accounts relationships.

Account Structures are broadly classified as under:

- **Sweeping:**

Sweeping works on principles of automatic fund transfer between parent and child accounts to aggregate balances physically and achieves the mobilization and consolidation of the available balances into a central account called header account. Oracle Banking Digital Experience enables the corporate customer to define various forms of Sweeps/Cash Concentration methods while building the sweep type of account structure. Sweeps are executed automatically based on a pre-arranged sweep instruction set by the customer at account structure level and at account pair level and per the set frequency.

- **Notional Pooling:**

Notional pooling refers to the off set of interest income and expense (credit and debit interest), resulting from the varying cash positions in different accounts held with the bank. It is mechanism for calculating interest on the combined credit and debit balances of accounts that a corporate chooses to cluster together, without actually transferring any funds. The balances in accounts are pooled on a notional basis.

Account structure maintenance of Oracle Banking Digital Experience enables the corporate customer to build their own account structures between the accounts enabled for liquidity management. Further the application also supports viewing and modifying existing account structures using digital banking platform.

Pre-requisites:

- Transaction and Party ID access is provided to corporate user.
- Approval rule set up for corporate user to perform the actions.
- Accounts are enabled at in the respective host application for liquidity management.
- Account and Transaction access has been provided to the user

Workflow

Features supported in application

Account structure allows the corporate user to

- Build an Account Structure
- View Account Structure
- Edit Account Structure
- Adhoc Execution
- Pause Account Structure
- Copy Account Structure

How to reach here:

Toggle menu > Liquidity Management > Structure List

4.1 Account Structures

Account Structures page displays the summary of all the account structures mapped to the logged in corporate user, in a tabular form. Account Structures are listed based on the User- Account access maintenance. Account Structure access is granted only if the user has access to all accounts participating in the account structure.

Different types of structures (Sweep, Pool and Hybrid) and statuses (Active, Inactive and Paused) are depicted in different colors for easy identification. An option is also provided on the screen to search the specific structure with the name associated with it. The user can also choose to create a new structure from this screen.

In case there are no structures mapped to the logged in user, a screen with the related information and an option to create a new account structure is shown to the user.

Account Structures

Field Description

Field Name	Description
Search	Specify the search criteria allows the user to search the structures by entering partial or full structure details in the table and displays the structures that contains those values in the fields. In case of no matching structures as per the search criteria provided is available, then an image with the specific result and an option to create new structure is provided on the screen.
Structure Code	Displays the unique id associated to each account structure. Note: For the structures in Modification - Pending Approval status – On clicking on the link, the user will get the option to view both Active Structure and Pending Approval Structure . Note: For the structures in Creation - Rejected status – On clicking on the link, the user will get the option to view details and copy the structure to initiate new structure creation request.
Structure Name	Displays the name of the account structure.

Field Name	Description
Effective Date	Displays the Effective date from when the instruction has been setup.
End Date	Displays the end date till when the instruction has been setup.
Priority	Displays the priority of the account structure.
Type	<p>Displays the type of account structure.</p> <p>The options are:</p> <ul style="list-style-type: none"> • Sweep - Funds moved physically with in the account structure • Pool - Notional movement of funds, the account balances are notionally consolidated and 'interest computations' carried out on such notional balances • Hybrid – A structure is a combination of sweep and pool instructions.
Status	<p>Displays the status of account structure.</p> <p>The options are:</p> <ul style="list-style-type: none"> • Active • Inactive • Paused
Bank Approval Status	<p>Displays the bank approval status of the account structure.</p> <p>The options are:</p> <ul style="list-style-type: none"> • Creation – Pending Approval • Modification – Pending Approval • Approved • Creation – Rejected • Modification – Rejected
Comments	Click Comments icon to view the approval / rejection comments.
<p>The following fields appear on clicking the filter icon  available on the screen.</p>	
Status	<p>Select the status of the account structure by which the data is to be filtered.</p> <p>The options are:</p> <ul style="list-style-type: none"> • Active • Inactive • Paused

Field Name	Description
Structure Type	<p>Select the type of the account structure by which the data is to be filtered.</p> <p>The options are:</p> <ul style="list-style-type: none"> • Sweep - Funds moved physically between the parent and child account pairs. • Pool - Notional movement of funds, the account balances are notionally consolidated and 'interest computations' carried out on such notional balances • Hybrid – A structure is a combination of sweep and pool instructions.

1. In the **Search** field, enter the complete or partial name of the specific account structure and displays all the records wherever matches found.
The related Account Structure detail record appears.
2. Click  to refine and display the account structure based on account structure 'Status' and 'Structure Type'.
The **Filter** overlay screen appears.

- a. Select the **Status** checkbox.
 - b. Select the **Structure type** from the list.
 - c. Click **Apply** to reset the refine criteria.
OR
Click **Reset** to reset the refine criteria.
3. Click **Add** to create a new Account Structure.
 4. Click **Cancel** to cancel the operation and navigate back to the Dashboard.

4.2 Create Account Structure

The Liquidity Management module enables the corporate customer to build their own account structures between the accounts enabled for liquidity management and are mapped to the user.

While building a structure, corporate user is expected to capture:

- Basic parameters of the structure
- Choose Accounts for mapping and specifying the hierarchies
- Linking of Accounts
- Check basic validations
- Set up instructions between each account pair

The **Liquidity Management Structure Creation** screen enables the user to build the different types of Liquidity Management Structures that meets the business needs of fund movement and concentration.

The account structures can be created as follows:

- Sweep Structure
- Pool Structure
- Hybrid Structure

How to reach here:

Toggle menu > Liquidity Management > Overview > Quick Links > Create Structure

OR

Toggle menu > Liquidity Management > Create Structure

OR

Toggle menu > Liquidity Management > Structure List > Click Add

1. Navigate to the **Liquidity Management Structure Creation** screen.

OR

In the **Account Structure - Summary** screen, click **Add**.

The **Liquidity Management Structure Creation** appears.

4.2.1 Create Sweep Structure

The **Create Sweep Structure** screen enables the user to build the sweep structure to move funds as per the business requirements.

1. On the **Liquidity Management Structure Creation** screen, click **Get Started** button under the **Sweep Structure** section.

The **Create Sweep Structure - Structure Parameters** appears.

Create Sweep Structure - Structure Parameters

The first step of sweep structure creation involves defining the basic details of the sweep structure like structure name, effective date, end date, etc.

2. In the **Structure Name** field, enter the name of the account structure.
3. From the **Structure Priority** list, select the priority of the account structure.
4. From the **Effective Date** and **End Date** list, select the appropriate date to set up the instruction.
5. From the **Charge Account** list, select the charge account.
6. In the **Default Sweep Instructions** section, select the Sweep Method for the structure.
7. In the **Frequency** section, select the Frequency and Reverse Frequency for the structure.
8. In the **Other Instructions** section, select the appropriate instructions for Sweep Structure.

Create Sweep Structure - Structure Parameters

Field Description

Field Name	Description
Structure Name	Specify the name of the sweep structure that is to be created.
Structure Priority	Specify the priority of the account structure.
Effective Date	Select the date from which the sweep structure execution should take place.
End Date	Select the date till which the sweep structure execution should take place.

Field Name	Description
Charge Account	<p>Click Search icon and select the charge account from which the charges can be collected.</p> <hr/> <p>Note:</p> <ul style="list-style-type: none"> • Only accessible accounts will be displayed. This field is non-mandatory. • User can search the Charge Account by Account Name, Account Number, Branch or Currency based on the parameters set in the system configuration and also displays these details in the search results and the respective fields once the required account is selected. <hr/>
Interest Method	<p>Displays the method by which the interest is calculated.</p> <p>By Default, this field will appear as "Interest". This field is non-editable.</p>
Default Sweep Instructions	
<p>(Information specified here is defaulted at each parent-child account pair whereas user can override and define a specific frequency for a specific pair of account as a part for instruction set up)</p>	
Sweep Method	<p>Select the sweep method that is to be applied to the structure.</p> <p>The options are:</p> <ul style="list-style-type: none"> • Zero Balance Model • Fixed Amount Model • Collar Model • Target Model - Constant • Target Model - Fixed • Threshold Model • Range Based Model • Cover Overdraft Model • Percentage Model
Frequency	
Frequency	<p>Select the frequency at which the account structure should be executed.</p> <p>The list displays the frequencies for which BOD is enabled.</p>
Reverse Frequency	<p>Select the reverse frequency at which the reverse sweep for account structure should be executed.</p> <p>The list displays the frequencies for which the BOD is enabled.</p> <hr/>

Field Name	Description
Other Instructions	
Sweep on Currency Holiday	Move the slider to enable the sweep on currency holiday.
Consider Post Sweep Balance	Move the slider to consider the post sweep balance.
Currency Holiday Rate	Select the interest rate on Currency Holiday. The options are <ul style="list-style-type: none"> • Previous Day Rate This field is enabled only if the user toggle on the Sweep on Currency Holidays .
Holiday Treatment	Select the holiday treatment. The options are <ul style="list-style-type: none"> • Holiday • Next Working Date • Previous Working Date
Maximum Backward days	Specify the maximum backward days. This field is enabled only if the user select Previous Working Date from the Holiday Treatment.
Backward Treatment	Select the backward treatment. The options are <ul style="list-style-type: none"> • Move forward • Holiday This field is enabled only if the user select Previous Working Date from the Holiday Treatment.

- Click **Next**.
The **Create Sweep Structure – Build Structure** screen appears.
OR
Click **Cancel** to cancel the operation and navigate back to 'Dashboard'.
OR
Click **Back** to navigate back to the previous screen.

Create Sweep Structure – Build Structure

As a part of following step, the user can build the structure by adding the header and child accounts.

By default, the **Build Structure** screen appears in Tree view.

Create Sweep Structure - Build Structure – Tree View

- Click  to build the structure in the Table view.
The **Create Sweep Structure - Build Structure - Table View** screen appears.

Create Sweep Structure - Build Structure – Table View

Field Description (Common for both Tree View and Table View)

Field Name	Description
Structure Code	Displays the structure ID of the structure.
Structure Type	Displays the type of the structure.
Structure Name	Displays the name of the structure.
Charge Account	Displays the charge account from which the charges can be collected.

Note: Only accessible accounts will be displayed. This field is non-mandatory.

11. Click **Start Building Structure** to build the structure.

The **Create Sweep Structure – Select Header Account** popup screen appears.

Create Sweep Structure - Select Header Account

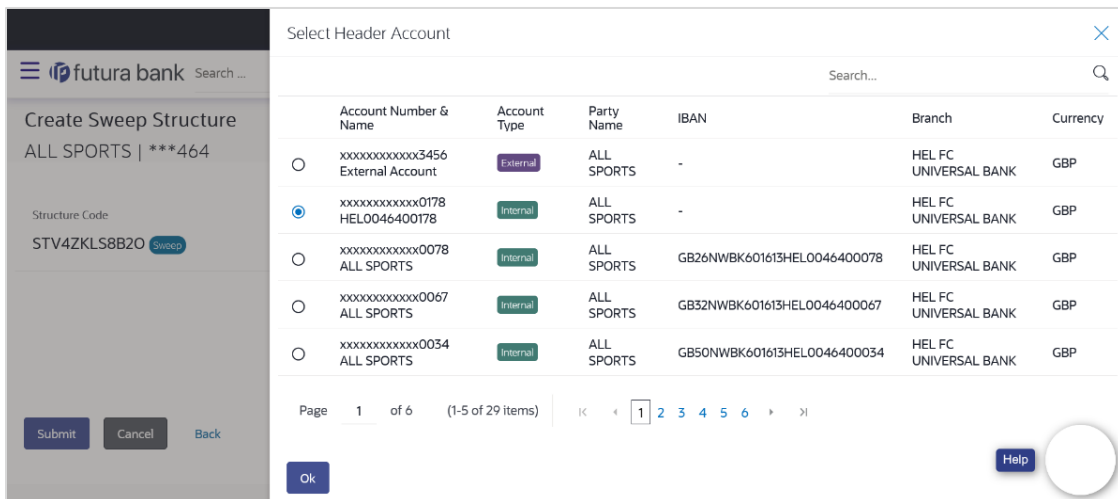

As a part of following step, the user can select the header account in which the funds will be concentrated. The filtered account list for which the user has access will appear on the screen. The user is expected to select one of the Liquidity Management enabled accounts as header account. For GCIF enabled environment, the account list also show the linked party account of the transaction party.

12. In the **Select Header Account** screen, select the account that the user want to add as Header Account in the structure.

OR

In the **Search By Party Name, Account Number** field, specify and search the complete or partial account details to display the list of accounts that matches across the fields in the table and select the account that the user want to add as Header Account in the structure.

Create Sweep Structure - Select Header Account

Field Description

Field Name	Description
Search	Specify and search the complete or partial account details to display the list of accounts that matches across the fields in the table.
Account Number and Name	Displays the account number and name (Internal and External) mapped to the user in masked format.
Account Type	Displays the type of account. The options are: <ul style="list-style-type: none"> • Internal (An account which is internal to the Bank) • External (An account which is external to the Bank and linked for liquidity management)
Party Name	Displays the name of the party linked to the user's account.
IBAN	Displays the IBAN number of the user's account.
Branch	Displays the branch name of the user's account.
Currency	Displays the currency of the user's account.
Pagination	Select the number or navigation button to navigate across the pages.

13. Click **OK**.

The selected account is added to **Create Sweep Structure – Added Header Account** screen.

14. Click  to close the overlay screen.

Create Sweep Structure - Added Header Accounts

Once the header account is selected, the user can further link the child accounts.

This screen is available in both the Tree and Table view.

Create Sweep Structure – Added Header Account – Tree View

The screenshot displays the 'Create Sweep Structure' interface for 'ALL SPORTS | ***464'. It features a header account card with the following details:

- Account ID: HEL0046400178
- Branch: xxxxxxxxxxxx0178 | Sydney
- Currency: GBP
- Balance: 0

The form fields are:

- Structure Code: STQCRB5JL3QO
- Structure Name: Structure1
- Charge Account: xxxxxxxxxxxx0012

Build Help

Field Description

Field Name	Description
Parent Account No & Name	Displays the parent account number & name of the structure in masked format.
Child Account No & Name	Displays the child account number & name of the structure in masked format.
Priority	Specify the sweep priority used to determine the order of execution across pairs at a level in the structure.
2 Way Sweep	Select the toggle to enable the two-way sweep for the account pair.
Instruction	Displays the instruction type for the account pair.

19. Click **Expand** icon to view the instructions for the account pair.

The **Create Sweep Structure - Set Instructions – Instructions & Frequency** screen appears.

Create Sweep Structure - Set Instructions – Instructions & Frequency

The user can create the instructions and frequency for the account pair.

20. In the **Instruction & Frequency** tab, do the following:

- From the **Sweep Method** list, select the appropriate option.
- From the **Frequency** list, select the appropriate frequency.
- In the **Instructions Priority** field, enter the instruction priority.
- On Selection of **Sweep Method**, the related parameters is displayed with defined values in the editable form.
- Click **Add Frequency** and select the frequency to add multiple frequency.

Click  to delete the frequency.

- Click **Save** to save the sweep method.

21. Click  to edit the saved sweep method.
OR

Click  to delete the saved sweep method.

OR

Click **Add Sweep** to add multiple sweep method for the account pair.

Note: In a structure, swapping the priority set in two instructions within an account pair is not allowed.

To do so, the user will have to delete one of the instructions and then re-add it with the desired priority.

Create Sweep Structure - Set Instructions – Instructions & Frequency

The screenshot shows the 'Set Instructions' form in the Futura Bank system. The form is titled 'Set Instructions' and has a close button (X) in the top right corner. Below the title, there is a note: 'The Structure level sweep instructions apply to all pairs by default.' The form contains a table with the following columns: Parent Account No & Name, Child Account No & Name, Priority, 2 Way Sweep, and Instruction. The table has one row with the following data: Parent Account No & Name: 'XXXXXXXXXXXX0178 HELO046400178', Child Account No & Name: 'XXXXXXXXXXXX3456 External Account', Priority: '1', 2 Way Sweep: 'ON', and Instruction: 'Zero Balance Model'. Below the table, there are three tabs: 'Instructions & Frequency', 'Reverse Sweep', and 'Intercompany Loan'. The 'Instructions & Frequency' tab is active. It contains a form with the following fields: Sweep Method (Zero Balance Model), Maximum, Maximum Deficit, Minimum, Minimum Deficit, Multiple, Frequency (after 5 days), and Instruction Priority (1). There are buttons for 'Add Frequency', 'Save', and 'Add Sweep'. At the bottom of the form, there is a 'Build' button.

Field Description

Field Name	Description
Sweep Method	<p>Select the sweep method set between the account pair</p> <p>The options are:</p> <ul style="list-style-type: none"> • Zero Balance Model • Fixed Amount Model • Collar Model • Target Model - Constant • Target Model - Fixed • Threshold Model • Range Based Model • Cover Overdraft Model • Percentage Model <p>Value defined as a part of 1st step will be shown in an editable form.</p>
Frequency	<p>Select the frequency at which the account structure should be executed.</p> <p>The list displays all the frequencies maintained in the product processor.</p>
Instruction Priority	<p>Specify the instruction priority across multiple instructions within an account pair.</p>
Parameters	<p>Applicability of the below fields varies based on the instruction type selected between the accounts.</p>
Collar Amount	<p>Specify the collar amount set for executing sweep is displayed.</p> <p>This field appears for if the user have selected Collar Model from Instruction Type list.</p> <p>Value set at the product processor is displayed in an editable form.</p>
Maximum	<p>Specify the maximum amount for executing sweep.</p> <p>Value set at the product processor is displayed in an editable form.</p>
Maximum Deficit	<p>Specify the maximum deficit amount for executing sweep.</p> <p>Value set at the product processor is displayed in an editable form.</p>
Minimum	<p>Specify the minimum amount for executing sweep.</p> <p>Value set at the product processor is displayed in an editable form.</p>

Field Name	Description
Minimum Deficit	Specify the minimum deficit amount for executing sweep. Value set at the product processor is displayed in an editable form.
Threshold Amount	Specify the threshold amount for which the sweep is to be executed. Value set at the product processor is displayed in an editable form.
Multiple	Specify the amount in multiples of which the sweep is to be executed. Value set at the product processor is displayed in an editable form.
Percentage	Specify the percentage for which the sweep is to be executed. Value set at the product processor is displayed in an editable form.
Fixed Amount	Specify the fixed amount for which the sweep is to be executed. Value set at the product processor is displayed in an editable form.

22. Click **Reverse Sweep** tab to set the reverse sweep instruction for the account pair.
The **Create Sweep Structure - Set Instructions – Reverse Sweep** screen appears.
OR
Click  to close the overlay screen.

Create Sweep Structure - Set Instructions – Reverse Sweep

The user can create the reverse frequency for the account pair.

23. In the **Reverse Sweep** tab, do the following:

- Select the **Reverse Sweep Allowed** toggle to enable the reverse sweep for the account pair.
- From the **Reverse Frequency** list, select the appropriate option if the **Reverse Sweep Allowed** toggle is enabled.

Create Sweep Structure - Set Instructions – Reverse Sweep

The screenshot shows the 'Set Instructions' dialog box. It contains a table with the following data:

Parent Account No & Name	Child Account No & Name	Priority	2 Way Sweep	Instruction
XXXXXXXXXXXX0178 HEL004640078	XXXXXXXXXXXX3456 External Account	1	<input checked="" type="checkbox"/>	Zero Balance Model

Below the table, there are three tabs: 'Instructions & Frequency', 'Reverse Sweep', and 'Intercompany Loan'. The 'Reverse Sweep' tab is selected, showing a 'Reverse Sweep Allowed' toggle (checked) and a 'Reverse Frequency' dropdown menu set to 'Select'. A 'Build' button is located at the bottom left of the dialog.

Field Description

Field Name	Description
Reverse Sweep Allowed	Select the toggle to enable the reverse sweep for the account pair.
Reverse Frequency	Select the frequency at which the reverse sweep for the account structure should be executed. The list displays the frequencies for which the BOD is enabled. Note: This field appears only if the Reverse Sweep Allowed toggle is enabled.

24. Click **Intercompany Loan** tab to set the Intercompany loan instruction for the account pair. The **Create Sweep Structure – Set Instructions – Intercompany Loan** screen appears.

OR

Click to close the overlay screen.

Create Sweep Structure - Set Instructions – Intercompany Loan

Field Description

Field Name	Description
Track Intercompany Loan	<p>Select the option from the drop-down list, To enable the Track Intercompany Loan for the account pair.</p> <p>The available options are:</p> <ul style="list-style-type: none"> • Yes • No <p>Note: By default, this field is selected as No.</p>
Loan Type	<p>Displays the Type of the loan.</p> <p>Note:</p> <ul style="list-style-type: none"> • If Reverse Sweep Allowed toggle is ON, the Loan Type is displayed as Fixed. • If Reverse Sweep Allowed toggle is OFF, the Loan Type is displayed as Open. • This field appears if Track Intercompany Loan is selected as Yes from the drop-down list
Intercompany Loan Reference	<p>Specify the Intercompany Loan Reference details.</p> <p>Note: This field appears and mandatory, if Track Intercompany Loan is selected as Yes from the drop-down list.</p>

25. Click **Build**

The **Create Sweep Structure – Submit** screen appears in tree view

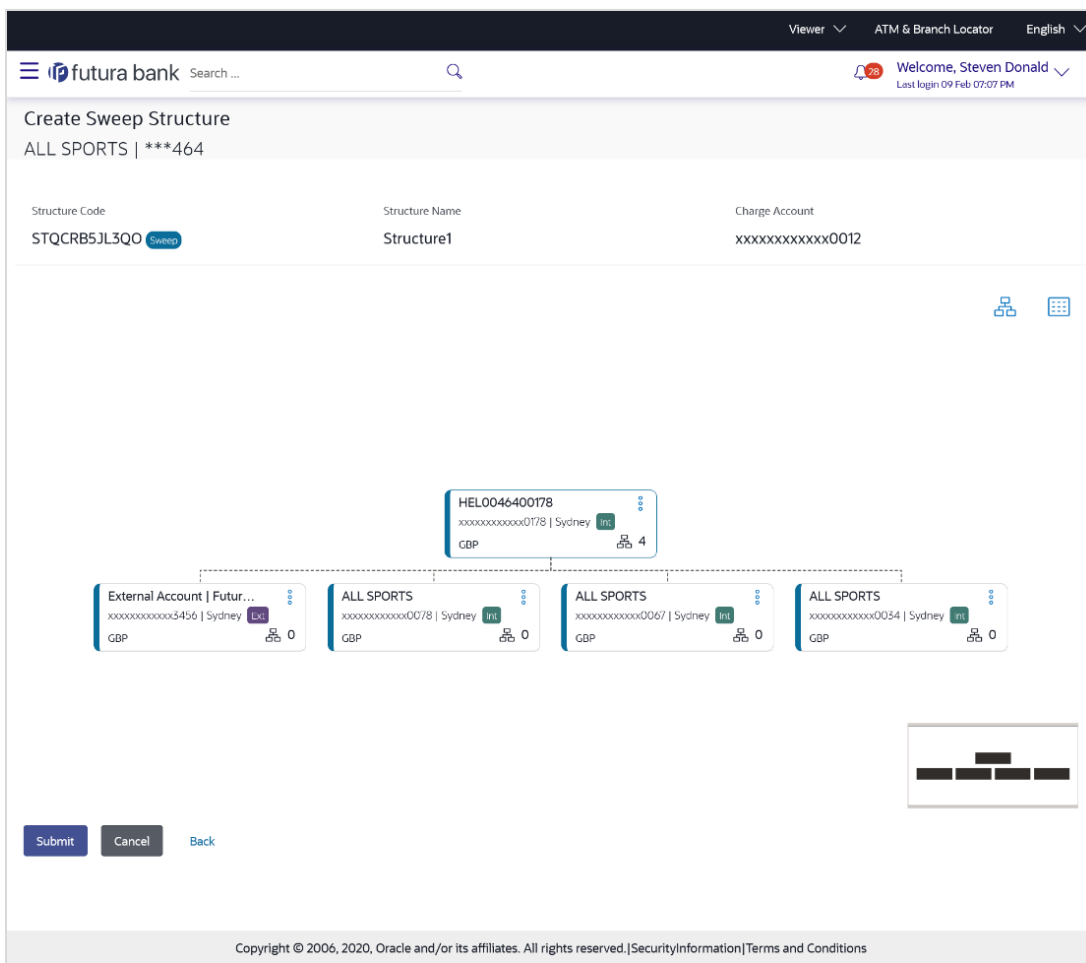

OR

Click  to close the overlay screen.

Create Sweep Structure – Submit

This screen enables the user to view the added parent and child accounts in both the Tree and Table view.

Currency	Displays the currency of the account.
Linked Accounts	Displays the number of the child account(s) linked to the parent account.

20. Click  and then click **Link** to add the additional child accounts for the selected parent account.
The **Create Pool Structure – Select Reallocation Method & Link Accounts** popup screen appears.
OR
Click **Reallocation** to view the reallocation details for the account pairs. This option will appear only for the parent accounts with the child accounts.
The **Create Pool Structure – Reallocation** screen appears.
OR
Click **Account Details** to view the account details.
The **Account Details** overlay screen appears. (Refer to **Section 4.3.2** for the detailed explanation)
OR
Click **Delink**. A Delink Account popup appears confirming the removal of accounts. (Refer to **Section 4.2.1** for the detailed explanation)
- a. Click **OK**, if the user want to remove the added header account.
OR
Click **Cancel** to cancel the removing process.
21. Click **Submit**.
The **Create Pool Structure – Review** screen appears.
OR
Click **Cancel** to cancel the operation and navigate back to 'Dashboard'.
OR
Click **Back** to navigate back to the previous screen.

Create Pool Structure – Review

This screen enables the user to review the updated structure details in the new structure.

Create Pool Structure – Review

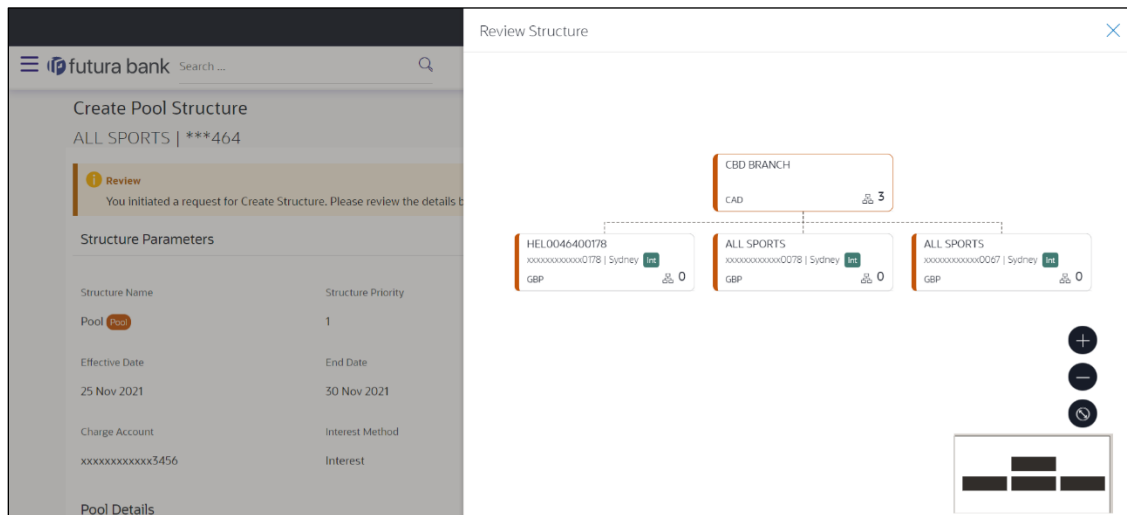

The screenshot displays the 'Create Pool Structure' review screen. At the top, there is a navigation bar with the Futura Bank logo and user information: 'Welcome, Sweta Thakur' and 'Last login 25 Nov 01:39 PM'. Below the navigation bar, the page title is 'Create Pool Structure' with the identifier 'ALL SPORTS | ***464'. A yellow notification banner states: 'Review: You initiated a request for Create Structure. Please review the details before you confirm!'. The main content area is divided into two sections: 'Structure Parameters' and 'Pool Details'. The 'Structure Parameters' section contains a table with the following data:

Structure Name	Structure Priority
Pool 	1
Effective Date	End Date
25 Nov 2021	30 Nov 2021
Charge Account	Interest Method
xxxxxxxxxxxx3456	Interest

The 'Pool Details' section shows the 'Reallocation Method' as 'Percentage Allocation'. At the bottom of the review area, there are three buttons: 'Review Structure' (text), 'Confirm' (blue), 'Cancel' (grey), and 'Back' (blue). The footer of the page contains the copyright notice: 'Copyright © 2006, 2020, Oracle and/or its affiliates. All rights reserved.[SecurityInformation]Terms and Conditions'.

22. Click **Review Structure** to review the structure.
 The **Create Pool Structure – Review Structure** overlay screen appears.
 OR
 Click **Confirm** to create the pool structure.
 OR
 Click **Cancel** to cancel the operation and navigate back to 'Dashboard'.
 OR
 Click **Back** to navigate back to the previous screen.

Create Pool Structure – Review Structure

- Click **+** icon to zoom in the structure.
 - Click **-** icon to zoom out the structure.
 - Click  icon to fit the structure to screen.
 - Click **X** icon to close the review structure overlay screen.
23. The success message appears along with the transaction reference number, status and structure details.
 Click **Home** to go to **Dashboard** screen.
 OR
 Click **Go To Overview** to go to the liquidity management dashboard.
 OR
 Click **List Structure** to view the complete list of account structures.

4.2.3 Create Hybrid Structure

The **Create Hybrid Structure** screen enables the user to build the hybrid structure to move funds and then notionally consolidate them.

1. On the **Liquidity Management Structure Creation** screen, click **Get Started** button under the **Hybrid Structure** section.

The **Create Hybrid Structure – Structure Parameters** appears.

Create Hybrid Structure - Structure Parameters

The first step of hybrid structure creation involves defining the basic details of the hybrid structure like structure name, effective date, end date, etc.

2. In the **Structure Name** field, enter the name of the account structure.
3. From the **Structure Priority** list, select the priority of the account structure.
4. From the **Effective Date** and **End Date** list, select the appropriate date to set up the instruction.
5. From the **Reallocation Method** list, select the appropriate reallocation method.
 - b. If the user have selected Central Distribution option:
From the **Central Account Number** list, select the appropriate account.
6. In the **Default Sweep Instructions** section, select the Sweep Method for the structure.
7. In the **Frequency** section, select the Frequency and Reverse Frequency for the structure.
8. In the **Other Instructions** section, select the appropriate instructions for Hybrid Structure.

Field Description (Common for both Tree and Table view)

Field Name	Description
Structure Code	Displays the structure ID of the structure.
Structure Type	Displays the type of the structure.
Structure Name	Displays the name of the structure.
Charge Account	Displays the charge account from which the charges can be collected.
	Note: Only accessible accounts will be displayed. This field will appear only if the user selects the charge account number.

11. Click **Start Building Structure** to build the structure.

The **Create Hybrid Structure – Create Header Account** screen appears.

Create Hybrid Structure – Create Header Account

As a part of following step, the user can create the header account in which the funds will be concentrated.

12. In the **Branch** field, select the branch name for the header account.

13. In the **Currency** field, select the currency for the header account.

Create Hybrid Structure – Create Header Account

The screenshot shows the 'Create Header Account' interface. On the left, a sidebar displays the 'futura bank' logo and search bar. The main content area shows the title 'Create Hybrid Structure' and the account identifier 'ALL SPORTS | ***464'. Below this, there are two input fields: 'Structure Code' with the value 'ST2MFDR1CZUO' and a 'Hybrid' tag, and 'Structure Name' with the value 'Hybrid'. At the bottom of this section is a dashed box containing the 'Start Building Structure' button. On the right, a modal window titled 'Create Header Account' is open, featuring two dropdown menus for 'Branch' and 'Currency', both currently showing 'Please Select'. An 'Add' button is located below these dropdowns.

Field Description

Field Name	Description
Branch	Select the branch name for the header account.

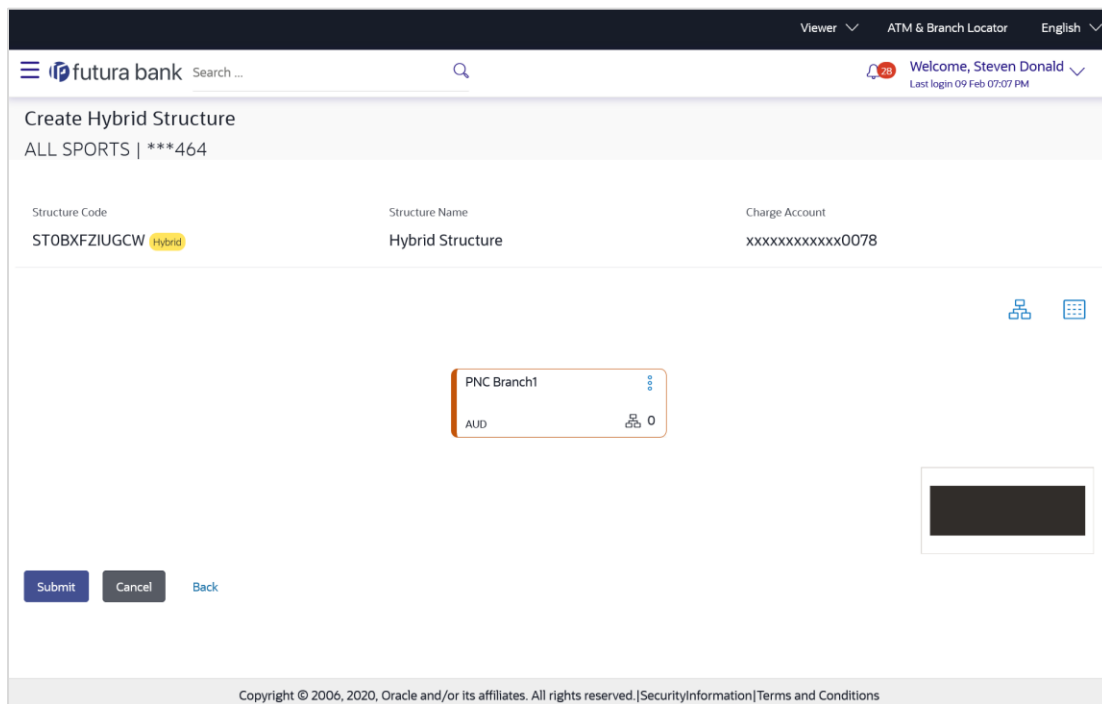

Field Name	Description
Currency	Select the currency for the header account.

- Click **Add**.
The header account is created and added to the **Create Hybrid Structure – Added Header Account** screen.
- OR
- Click  to close the overlay screen.

Create Hybrid Structure – Added Header Account

Once the header account is added, the user can further link the child accounts. This screen is available in both Tree and Table view.

Structure Code	Displays the structure ID of the structure.
Structure Type	Displays the type of the structure.

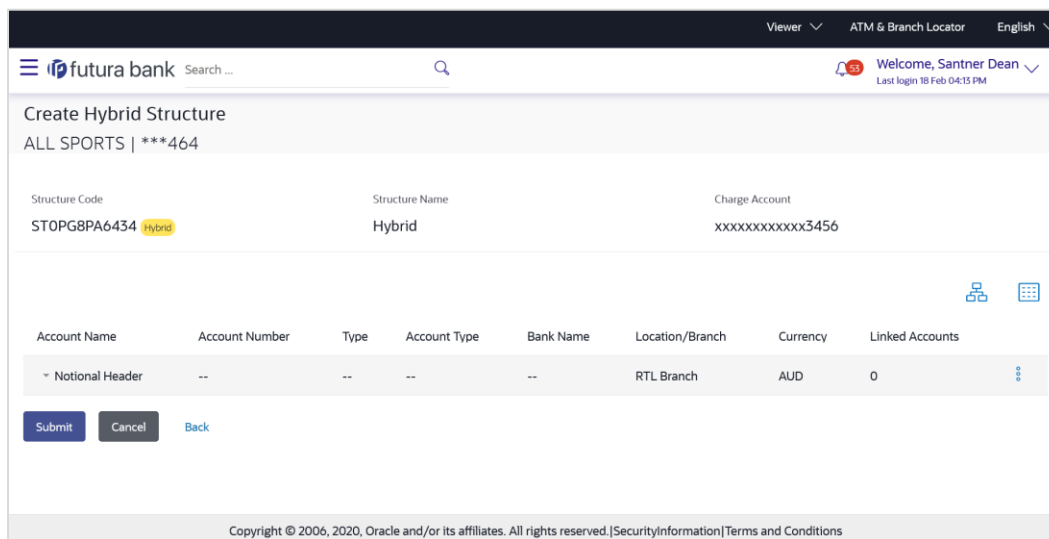

Field Name	Description
Structure Name	Displays the name of the structure.
Charge Account	Displays the charge account from which the charges can be collected. Note: Only accessible accounts will be displayed. This field will appear only if the user selects the charge account number.

Information displayed on notional header account card.

Branch	Displays the branch name for the header account.
Currency	Displays the currency for the header account.
 1	Displays the number of the child account(s) linked to the parent account.

15. Click  to view the added accounts in the Table view.
The **Create Hybrid Structure - Added Header Account – Table View** screen appears.

Create Hybrid Structure – Added Header Account – Table View

The screenshot shows the 'Create Hybrid Structure' interface. At the top, there's a navigation bar with 'Viewer', 'ATM & Branch Locator', and 'English'. Below that is the 'futura bank' logo and a search bar. The main header says 'Create Hybrid Structure' and 'ALL SPORTS | ***464'. The form fields are: Structure Code (STOPG8PA6434 with a 'Hybrid' tag), Structure Name (Hybrid), and Charge Account (xxxxxxxxxxx3456). Below the form is a table with the following data:

Account Name	Account Number	Type	Account Type	Bank Name	Location/Branch	Currency	Linked Accounts
Notional Header	--	--	--	--	RTL Branch	AUD	0

At the bottom of the table, there are buttons for 'Submit', 'Cancel', and 'Back'. The footer contains copyright information: 'Copyright © 2006, 2020, Oracle and/or its affiliates. All rights reserved. | Security Information | Terms and Conditions'.

Field Description

Field Name	Description
Structure Code	Displays the structure ID of the structure.
Structure Type	Displays the type of the structure.

Field Name	Description
Structure Name	Displays the name of the structure.
Charge Account	Displays the charge account from which the charges can be collected. Note: Only accessible accounts will be displayed. This field will appear only if the user selects the charge account number.

Information displayed for header account and each child account.

Account Name	Displays the name of the customer linked to the user's account.
Account Number	Displays the account number of the user in masked format.
Type	Displays the type of structure.
Account Type	Displays the type of account. The options are: <ul style="list-style-type: none"> • Internal (An account which is internal to the Bank) • External (An account which is external to the Bank and linked for liquidity management)
Bank Name	Displays the name of the bank.
Location/Branch	Displays the location/branch of the bank.
Currency	Displays the currency of the account.
Linked Accounts	Displays the number of the child account(s) linked to the parent account.

16. Click  and then click **Link** to add the child accounts.
The **Create Hybrid Structure – Select Reallocation Methods & Link Accounts** popup screen appears.
OR
Click **Delink**. A Delink Account popup appears confirming the removal of accounts.
- a. Click **OK**, if the user want to remove the added header account.
OR
Click **Cancel** to cancel the removing process.

Create Hybrid Structure – Select Reallocation Method & Link Accounts

The user can search and select the accounts to be linked to the selected header/parent account. The filtered account list for which the user has access to will appear for linking the accounts. For GCIF enabled environment, the account list also show the linked party account of the transaction party.

17. From the **Cash Concentration Method** list, select the cash concentration method.

18. From the **Reallocation Method** list, select the reallocation method.

19. Select the accounts that the user want to link to the header account.

OR

In the **Search By Party Name, Account Number** field, specify and search the complete or partial account details to display the list of accounts that matches across the fields in the table and select the accounts that the user want to link to the header account.

Create Hybrid Structure – Select Reallocation Methods & Link Accounts

The screenshot shows a dialog box titled "Select Reallocation Method & Link Accounts". On the left, a sidebar shows the "Create Hybrid Structure" page for "ALL SPORTS | ***464" with a structure code of "STOBXFZUIGCW" and a "Hybrid" tag. The main dialog area has two sections: "Cash Concentration Method" with radio buttons for "Pool" (selected) and "Sweep", and "Reallocation Method" with a dropdown set to "No Reallocation". Below these are search fields for "Party Name" and "Account Number". A table lists accounts for selection:

<input type="checkbox"/>	Account Number & Name	Account Type	Party Name	IBAN	Branch	Currency
<input type="checkbox"/>	XXXXXXXXXXXX3456 External Account	External	ALL SPORTS	-	HEL FC UNIVERSAL BANK	GBP

Field Description

Field Name	Description
Parent Account No & Name	Displays the parent account number & name of the structure in masked format.

Field Name	Description
Child Account No & Name	Displays the child account number & name of the structure in masked format.
Priority	Specify the sweep priority used to determine the order of execution across pairs at a level in the structure.
2 Way Sweep	Select the toggle to enable the two-way sweep for the account pair.
Instruction	Displays the instruction type for the account pair.

23. Click **Expand** icon to view the instructions for the account pair.

The **Create Hybrid Structure – Set Instructions – Instructions & Frequency** screen appears.

OR

Click  to close the overlay screen.

Create Hybrid Structure – Set Instructions – Instructions & Frequency

The user can create the Instructions & Frequency for the account pair.

24. In the **Instruction & Frequency** tab, do the following:

- a. From the **Sweep Method** list, select the appropriate option.
- b. From the **Frequency** list, select the appropriate frequency.
- c. In the **Instructions Priority** field, enter the instruction priority.
- d. On Selection of **Sweep Method**, the related parameters is displayed with defined values in the editable form.
- e. Click **Add Frequency** and select the frequency to add multiple frequency.

Click  to delete the frequency.

- f. Click **Save** to save the sweep method.

Create Hybrid Structure – Set Instructions – Instructions & Frequency

The screenshot shows the 'Set Instructions' interface. On the left, a sidebar displays 'Create Hybrid Structure' with 'ALL SPORTS | ***464' and 'Structure Code STSLQMPHOCOW Hybrid'. The main area is titled 'Set Instructions' and contains a table with columns: Parent Account No & Name, Child Account No & Name, Priority, 2 Way Sweep, and Instruction. Below the table is a form with tabs for 'Instructions & Frequency', 'Reverse Sweep', and 'Intercompany Loan'. The 'Instructions & Frequency' tab is active, showing fields for Sweep Method (Percentage Model), Minimum, Minimum Deficit, Maximum, Maximum Deficit, Frequency (after 3 days), and Instruction Priority (1). There are buttons for '+ Add Frequency', '+ Add Sweep', and 'Save'.

Field Description

Field Name	Description
Sweep Method	<p>Select the sweep method set between the account pair</p> <p>The options are:</p> <ul style="list-style-type: none"> • Zero Balance Model • Fixed Amount Model • Collar Model • Target Model – Constant • Target Model – Fixed • Threshold Model • Range Based Model • Cover Overdraft Model • Percentage Model <p>Value defined as a part of 1st step will be shown in an editable form.</p>
Frequency	<p>Select the frequency at which the account structure should be executed.</p> <p>The list displays all the frequencies maintained in the product processor.</p>
Instruction Priority	<p>Specify the instruction priority across multiple instructions within an account pair.</p>

Field Name	Description
Parameters	
Applicability of the below fields varies based on the instruction type selected between the accounts.	
Collar Amount	Specify the collar amount set for executing sweep is displayed. This field appears for if the user have selected Collar Model from Instruction Type list. Value set at the product processor is displayed in an editable form.
Maximum	Specify the maximum amount for executing sweep. Value set at the product processor is displayed in an editable form.
Maximum Deficit	Specify the maximum deficit amount for executing sweep. Value set at the product processor is displayed in an editable form.
Minimum	Specify the minimum amount for executing sweep. Value set at the product processor is displayed in an editable form.
Minimum Deficit	Specify the minimum deficit amount for executing sweep. Value set at the product processor is displayed in an editable form.
Threshold Amount	Specify the threshold amount for which the sweep is to be executed. Value set at the product processor is displayed in an editable form.
Multiple	Specify the amount in multiples of which the sweep is to be executed. Value set at the product processor is displayed in an editable form.
Percentage	Specify the percentage for which the sweep is to be executed. Value set at the product processor is displayed in an editable form.
Fixed Amount	Specify the fixed amount for which the sweep is to be executed. Value set at the product processor is displayed in an editable form.

25. Click  to edit the saved sweep method.
OR
Click  to delete the saved sweep method.
OR
Click **Add Sweep** to add multiple sweep method for the account pair.
OR
Click  to close the overlay screen.

Note: In a structure, swapping the priority set in two instructions within an account pair is not allowed. To do so, the user will have to delete one of the instructions and then re-add it with the desired priority.

26. Click **Reverse Sweep** tab to set the reverse sweep instruction for the account pair.

The **Create Hybrid Structure – Set Instructions – Reverse Sweep** screen appears.

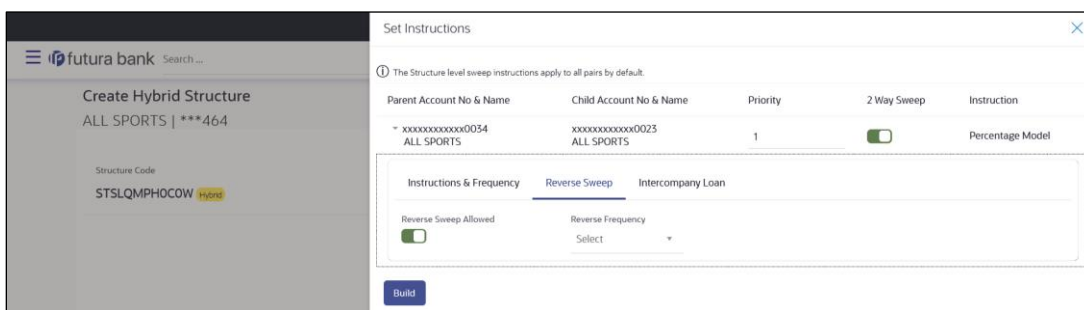

Create Hybrid Structure – Set Instructions – Reverse Sweep

The user can create the reverse frequency for the account pair.

27. In the **Reverse Sweep** tab, do the following:

- a. Select the **Reverse Sweep Allowed** toggle to enable the reverse sweep for the account pair.
- b. From the **Reverse Frequency** list, select the appropriate option if the **Reverse Sweep Allowed** toggle is enabled.

Create Hybrid Structure – Set Instructions – Reverse Sweep

Field Description

Field Name	Description
Reverse Sweep Allowed	Select the toggle to enable the reverse sweep for the account pair.
Reverse Frequency	Select the frequency at which the reverse sweep for the account structure should be executed. The list displays the frequencies for which the BOD is enabled.
	Note: This field appears only if the Reverse Sweep Allowed toggle is enabled.

28. Click **Intercompany Loan** tab to set the reverse sweep instruction for the account pair.

The **Create Hybrid Structure – Intercompany Loan** screen appears.

OR

Click **X** to close the overlay screen.

Create Hybrid Structure – Set Instructions – Intercompany Loan

Field Description

Field Name	Description
Track Intercompany Loan	<p>Select the option from the drop-down list, To enable the Track Intercompany Loan for the account pair.</p> <p>The available options are:</p> <ul style="list-style-type: none"> • Yes • No <p>Note: By default, this field is selected as No.</p>
Loan Type	<p>Displays the Type of the loan.</p> <p>Note:</p> <ul style="list-style-type: none"> • If Reverse Sweep Allowed toggle is ON, the Loan Type is displayed as Fixed. • If Reverse Sweep Allowed toggle is OFF, the Loan Type is displayed as Open. • This field appears if Track Intercompany Loan is selected as Yes from the drop-down list.
Intercompany Loan Reference	<p>Specify the Intercompany Loan Reference details.</p> <p>Note: This field appears and mandatory, if Track Intercompany Loan is selected as Yes from the drop-down list.</p>

29. Click **Submit**.

The **Create Hybrid Structure – Submit** screen appears

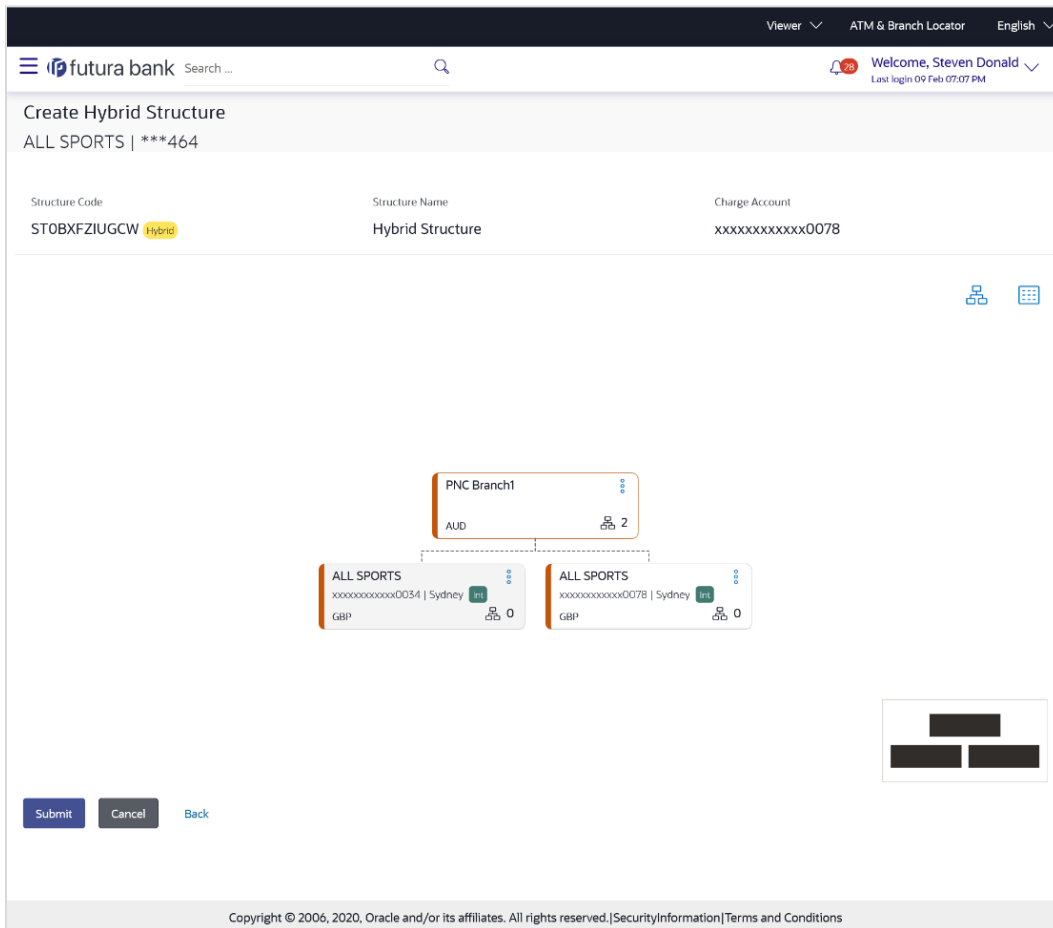

OR

Click  to close the overlay screen.

Create Hybrid Structure – Submit

This screen enables the user to view the added accounts in both the Tree and Table view.

Create Hybrid Structure – Submit - Tree View

Field Description

Field Name	Description

33. Click **Review Structure** to review the structure.
 The **Create Hybrid Structure – Review Structure** overlay screen appears.
 OR
 Click **Confirm** to create the sweep structure.
 OR
 Click **Cancel** to cancel the operation and navigate back to 'Dashboard'.
 OR
 Click **Back** to navigate back to the previous screen.

Create Hybrid Structure – Review Structure

- Click **+** icon to zoom in the structure.
 - Click **-** icon to zoom out the structure.
 - Click  icon to fit the structure to screen.
 - Click **X** icon to close the review structure overlay screen.
34. The success message appears along with the transaction reference number, status and structure details.
 Click **Home** to go to **Dashboard** screen.
 OR
 Click **Overview** to go to the liquidity management dashboard.
 OR
 Click **List Structure** to view the complete list of account structures.
 OR
 Click **Download Structure Details** to download the created structure.

4.3 View Account Structure

User can view the structure details by clicking on a specific Account Structure. By default, the structure details are displayed in a tree format with the details of header/parent and child accounts linked with each other. Only structures having accessible account will be shown in the list. For GCIF enabled environment, the accessible account list also contain the linked party account of the transaction party.

How to reach here:

Toggle menu > Liquidity Management > Overview > Quick Links > Structure List > Click on Specific Structure Code

OR

Toggle menu > Liquidity Management > Structure List > Click on Specific Structure Code

To search the specific account structure:

1. In the **Account Structures** screen, click on the specific account structure code. The **View Structure** screen appears.

Note: For the structures in **Modification – Pending Approval** status – On clicking on the link, the user will get the option to view both **Active Structure** and **Pending Approval Structure**.

Note: For the structures in **Creation - Rejected** status – On clicking on the link, the user will get the option to view details and copy the structure to initiate new structure creation request.

4.3.1 View Structure - Sweep

The hierarchical relationship between the accounts is displayed in Tree view on clicking on the Sweep Structure in the structure list.

View Sweep Structure – Tree View

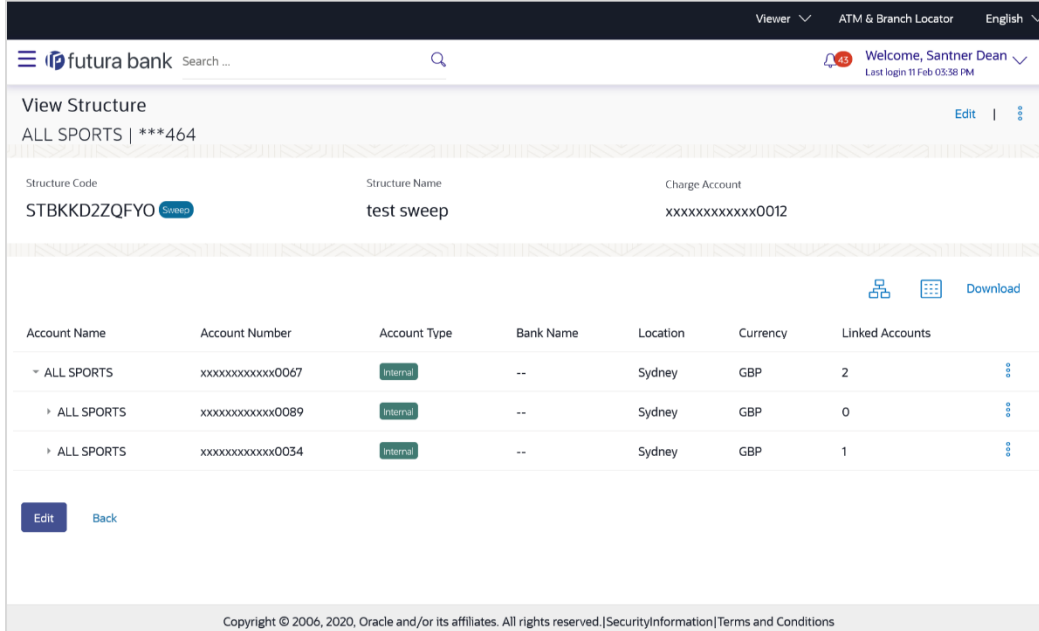

The screenshot shows the 'View Structure' interface for 'ALL SPORTS | ***464'. The page header includes the Futura Bank logo, a search bar, and user information for Santner Dean. The main content area displays a tree view of the account structure:

- Root Node:** ALL SPORTS | ***464 (Balance: GBP496.00)
- Child Node 1:** ALL SPORTS | ***089 (Balance: -GBP998,637.00)
- Child Node 2:** ALL SPORTS | ***034 (Balance: -GBP287,305.00)
- Child Node 3:** ALL SPORTS | ***023 (Balance: GBP1,498,408.84)

Each node in the tree view includes a small icon representing the account type and a '2', '1', or '0' indicating the number of sub-accounts. The interface also features an 'Edit' button and a 'Back' link at the bottom left, and a 'Download' button at the top right of the tree view area.

1. Click  to view the account structure in the Table view. The **View Sweep Structure - Table View** screen appears.

View Sweep Structure - Table View

The screenshot shows the 'View Structure' page for 'ALL SPORTS | ***464'. It displays the following information:

- Structure Code: STBKGDZZQFY0
- Structure Name: test sweep
- Charge Account: xxxxxxxxxxxx0012

Below this, there is a table of linked accounts:

Account Name	Account Number	Account Type	Bank Name	Location	Currency	Linked Accounts

1. Click  to close the overlay displayed with Structure Parameters.
- 2.

4.4 Edit Account Structure

Oracle Banking Digital Experience enables the corporate user to edit the account structure details. A user can add or remove the linked accounts and also can change the instructions set between an account pair. The account structure details are displayed in an editable mode. In case any new accounts are added in the structure, the user is expected to provide the linkage and provide the instructions between child and parent account.

How to reach here:

Toggle menu > Liquidity Management > Overview > Structure List > Click on Specific Structure Code > Edit

OR

Toggle menu > Liquidity Management > Structure List > Click on Specific Structure Code > Edit

To edit an account structure:

1. In the **Account Structure** page, click on the specific account structure code. The **View Structure** screen appears.
2. Click **Edit** to edit the details of the account structure. The **Structure Parameters** screen appears in the editable form.

4.4.1 Edit Sweep Structure

The **Edit Sweep Structure** screen enables the user to edit the sweep structure to move funds as per the business requirements.

1. On the **View Sweep Structure** screen, click **Edit** button.

The **Edit Sweep Structure - Structure Parameters** appears.

Edit Sweep Structure - Structure Parameters

The first step of edit sweep structure involves updating the basic details of the sweep structure like structure name, structure type, end date, etc.

2. In the **Structure Name** field, enter the name of the account structure.
3. From the **Structure Priority** list, select the priority of the account structure.
4. From the **End Date** list, select the appropriate date to set up the instruction.
5. From the **Charge Account** list, select the charge account.
6. In the **Default Sweep Instructions** section, select the Sweep Method for the structure.
7. In the **Frequency** section, select the Frequency and Reverse Frequency for the structure.
8. In the **Other Instructions** section, select the appropriate instructions for Sweep Structure.

Build

Field Description

Field Name	Description
Parent Account No & Name	Displays the parent account number & name of the structure in masked format.
Child Account No & Name	Displays the child account number & name of the structure in masked format.
Priority	Specify the sweep priority used to determine the order of execution across pairs at a level in the structure.
2 Way Sweep	Select the toggle to enable the two way sweep for the account pair.
Instruction	Displays the instruction type for the account pair.

14. Click **Expand** icon to view the instructions for the account pair.

The **Edit Sweep Structure - Set Instructions – Instructions & Frequency** screen appears.
OR

Click  to close the overlay screen.

Edit Sweep Structure - Set Instructions – Instructions & Frequency

The user can update the instructions and frequency for the account pair.

15. In the **Instruction & Frequency** tab, do the following:

- a. From the **Sweep Method** list, select the appropriate option.
- b. From the **Frequency** list, select the appropriate frequency.
- c. In the **Instructions Priority** field, enter the instruction priority.
- d. On Selection of **Sweep Method**, the related parameters is displayed with defined values in the editable form.
- e. Click **Add Frequency** and select the frequency to add multiple frequency.

Click  to delete the frequency.

- f. Click **Save** to save the sweep method.

16. Click  to edit the saved sweep method.
OR

Click  to delete the saved sweep method.

OR

Click **Add Sweep** to add multiple sweep method for the account pair.

Note: In a structure, swapping the priority set in two instructions within an account pair is not allowed.

To do so, the user will have to delete one of the instructions and then re-add it with the desired priority.

Edit Sweep Structure - Set Instructions – Instructions & Frequency

The screenshot shows the 'Set Instructions' dialog box. At the top, it says 'Set Instructions' with a close button. Below that, a note states: 'The Structure level sweep instructions apply to all pairs by default.' There is a table with the following columns: 'Parent Account No & Name', 'Child Account No & Name', 'Priority', '2 Way Sweep', and 'Instruction'. The first row contains: 'XXXXXXXXXXXX0178 HEL0046400178', 'XXXXXXXXXXXX0114 ALL SPORTS', '1', a checked '2 Way Sweep' toggle, and '-'. Below the table are three tabs: 'Instructions & Frequency' (selected), 'Reverse Sweep', and 'Intercompany Loan'. Under 'Instructions & Frequency', there is a 'Sweep Method' dropdown menu with 'Select' chosen, a 'Frequency' dropdown menu with 'Repetitive frequency ...' chosen, and an 'Instruction Priority' field with '1' entered. There are buttons for '+ Add Frequency', 'Save', and '+ Add Sweep'.

Field Description

Field Name	Description
Sweep Method	<p>Select the sweep method set between the account pair</p> <p>The options are:</p> <ul style="list-style-type: none"> • Zero Balance Model • Fixed Amount Model • Collar Model • Target Model - Constant • Target Model - Fixed • Threshold Model • Range Based Model • Cover Overdraft Model • Percentage Model <p>Value defined as a part of 1st step will be shown in an editable form.</p>
Frequency	<p>Select the frequency at which the account structure should be executed.</p> <p>The list displays all the frequencies maintained in the product processor.</p>
Instruction Priority	<p>Specify the instruction priority across multiple instructions within an account pair.</p>

Field Name	Description
Parameters	
Applicability of the below fields varies based on the instruction type selected between the accounts.	
Collar Amount	Specify the collar amount set for executing sweep is displayed. This field appears for if the user have selected Collar Model from Instruction Type list. Value set at the product processor is displayed in an editable form.
Maximum	Specify the maximum amount for executing sweep. Value set at the product processor is displayed in an editable form.
Maximum Deficit	Specify the maximum deficit amount for executing sweep. Value set at the product processor is displayed in an editable form.
Minimum	Specify the minimum amount for executing sweep. Value set at the product processor is displayed in an editable form.
Minimum Deficit	Specify the minimum deficit amount for executing sweep. Value set at the product processor is displayed in an editable form.
Threshold Amount	Specify the threshold amount for which the sweep is to be executed. Value set at the product processor is displayed in an editable form.
Multiple	Specify the amount in multiples of which the sweep is to be executed. Value set at the product processor is displayed in an editable form.
Percentage	Specify the percentage for which the sweep is to be executed. Value set at the product processor is displayed in an editable form.
Fixed Amount	Specify the fixed amount for which the sweep is to be executed. Value set at the product processor is displayed in an editable form.

17. Click **Reverse Sweep** tab to set the reverse sweep instruction for the account pair.

The **Edit Sweep Structure - Set Instructions – Reverse Sweep** screen appears.

OR

Click  to close the overlay screen.

Edit Sweep Structure - Set Instructions – Reverse Sweep

The user can update the reverse frequency for the account pair.

18. In the **Reverse Sweep** tab, do the following:
 - a. Select the **Reverse Sweep Allowed** toggle to enable the reverse sweep for the account pair.
 - b. From the **Reverse Frequency** list, select the appropriate option if the **Reverse Sweep Allowed** toggle is enabled.

Edit Sweep Structure - Set Instructions – Reverse Sweep

The screenshot shows the 'Set Instructions' overlay in the Futura Bank system. The overlay is titled 'Set Instructions' and has a close button (X) in the top right corner. Below the title, there is a note: 'The Structure level sweep instructions apply to all pairs by default.' The main content area is a table with columns: 'Parent Account No & Name', 'Child Account No & Name', 'Priority', '2 Way Sweep', and 'Instruction'. The first row shows a parent account 'XXXXXXXXXXXX0178 HEL0046400178' and a child account 'XXXXXXXXXXXX0114 ALL SPORTS' with a priority of '1' and a '2 Way Sweep' toggle that is currently turned off. Below the table, there are three tabs: 'Instructions & Frequency', 'Reverse Sweep', and 'Intercompany Loan'. The 'Reverse Sweep' tab is active, showing a 'Reverse Sweep Allowed' toggle (turned on) and a 'Reverse Frequency' dropdown menu with 'Select' as the current option. A 'Build' button is located at the bottom left of the overlay.

Field Description

Field Name	Description
Reverse Sweep Allowed	Select the toggle to enable the reverse sweep for the account pair.
Reverse Frequency	Select the frequency at which the reverse sweep for the account structure should be executed. The list displays the frequencies for which the BOD is enabled. Note: This field appears only if the Reverse Sweep Allowed toggle is enabled.

19. Click **Intercompany Loan** tab to set the Intercompany Loan instruction for the account pair. The **Edit Sweep Structure - Intercompany Loan** screen appears in tree view.
OR
Click to close the overlay screen.

Edit Sweep Structure - Set Instructions – Intercompany Loan

The screenshot shows the 'Set Instructions' overlay in the Futura Bank system. The overlay is titled 'Set Instructions' and contains a table with the following data:

Parent Account No & Name	Child Account No & Name	Priority	2 Way Sweep	Instruction
XXXXXXXXXXXX0178 HEL004640078	XXXXXXXXXXXX0114 ALL SPORTS	1	<input checked="" type="checkbox"/>	-

Below the table, there are three tabs: 'Instructions & Frequency', 'Reverse Sweep', and 'Intercompany Loan'. The 'Intercompany Loan' tab is selected. Under this tab, there are two sections:

- Track Intercompany Loan:** A dropdown menu currently set to 'Yes'.
- Intercompany Loan Reference:** An empty text input field.
- Loan Type:** A dropdown menu currently set to 'Fixed'.

A 'Build' button is located at the bottom left of the overlay.

Intercompany Loan Reference	<p>Specify the Intercompany Loan Reference details for the account pair.</p> <p>Note: This field appears and mandatory, if Track Intercompany Loan is selected as Yes from the drop-down list.</p>

20. Click **Submit**.
 The **Edit Sweep Structure - Submit** screen appears in tree view.
 OR
 Click to close the overlay screen.

Edit Sweep Structure – Submit

This screen enables the user to view the modified accounts in the existing structure. This screen is available in both Tree and Table view.

Edit Sweep Structure – Submit – Tree View

The screenshot shows the 'Edit Sweep Structure' page in Tree View. The page header includes the 'futura bank' logo, a search bar, and user information: 'Welcome, Santner Dean' with a last login time of '11 Feb 03:38 PM'. The main content area displays the structure details: Structure Code 'STBKKD2ZQFYO', Structure Name 'test sweep', and Charge Account 'xxxxxxxxxxx0178'. Below this, a tree diagram shows a root node 'ALL SPORTS' with a balance of GBP744.00 and a type of 2. This root node branches into four child nodes, each with its own balance and type: 1) 'ALL SPORTS' with balance -GBP998,637.00 and type 1; 2) 'ALL SPORTS' with balance -GBP287,305.00 and type 1; 3) 'ALL SPORTS' with balance GBP1,347,354.53 and type 0; 4) 'ALL SPORTS' with balance GBP1,498,408.84 and type 0. At the bottom of the page, there are 'Submit', 'Cancel', and 'Back' buttons. The footer contains copyright information: 'Copyright © 2006, 2020, Oracle and/or its affiliates. All rights reserved. [SecurityInformation] Terms and Conditions'.

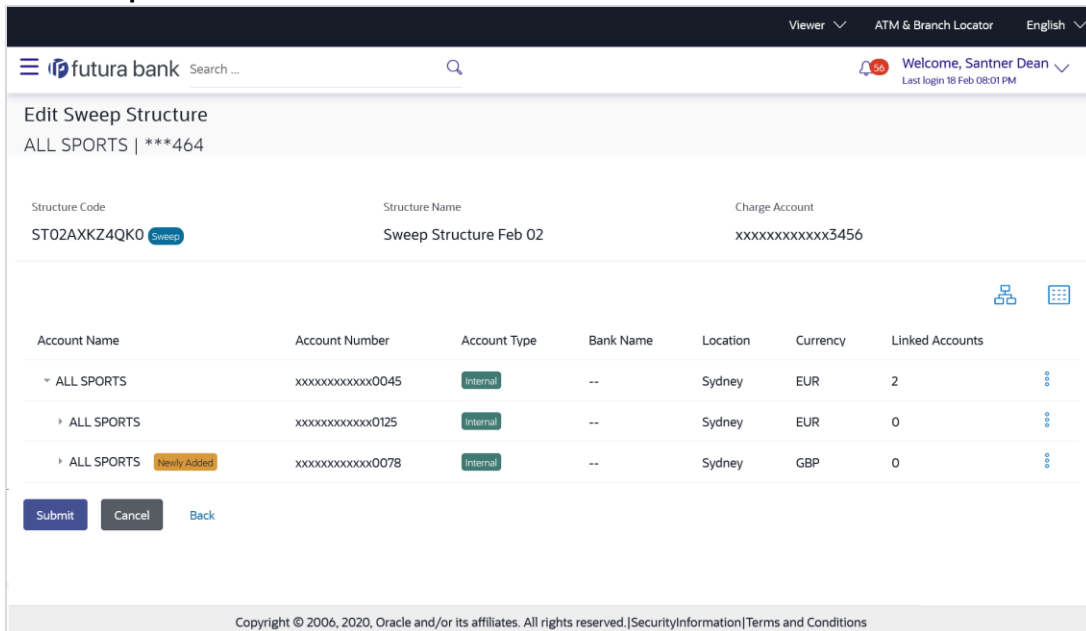

Field Description

Field Name	Description
Structure Code	Displays the structure ID of the structure.
Structure Type	Displays the type of the structure.
Structure Name	Displays the name of the structure.
Charge Account	Displays the charge account from which the charges can be collected. Note: Only accessible accounts will be displayed. This field will appear only if the user selects the charge account number.

Field Name	Description
	Information displayed on header account and each child account card.
Account Name	Displays the name of the account.
Account Number	Displays the account number of the user in masked format.
Location	Displays the location of the account.
Account Type	Displays the type of account. The options are: <ul style="list-style-type: none"> • Int (An account which is internal to the Bank) • Ext (An account which is external to the Bank and linked for liquidity management)
Account Balance	Displays the currency and the available balance in the account.
 1	Displays the number of the child account(s) linked to the parent account.

21. Click  to view the modified account structure in the Table view. The **Edit Sweep Structure – Submit - Table View** screen appears.

Edit Sweep Structure – Submit - Table View

The screenshot displays the 'Edit Sweep Structure' interface for account 'ALL SPORTS | ***464'. At the top, it shows the structure code 'ST02AXKZ4QK0' with a 'Sweep' tag, the name 'Sweep Structure Feb 02', and the charge account 'xxxxxxxxxxxx3456'. Below this is a table of linked accounts:

Account Name	Account Number	Account Type	Bank Name	Location	Currency	Linked Accounts
ALL SPORTS	xxxxxxxxxxxx0045	Internal	--	Sydney	EUR	2
ALL SPORTS	xxxxxxxxxxxx0125	Internal	--	Sydney	EUR	0
ALL SPORTS Newly Added	xxxxxxxxxxxx0078	Internal	--	Sydney	GBP	0

At the bottom of the table, there are 'Submit', 'Cancel', and 'Back' buttons. The footer contains the copyright notice: 'Copyright © 2006, 2020, Oracle and/or its affiliates. All rights reserved. [Security|Information|Terms and Conditions]'.

Field Description

Field Name	Description
Structure Code	Displays the structure ID of the structure.
Structure Type	Displays the type of the structure.
Structure Name	Displays the name of the structure.
Charge Account	Displays the charge account from which the charges can be collected.
	Note: Only accessible accounts will be displayed. This field will appear only if the user selects the charge account number.

Information displayed for header account and each child accounts.

Account Name	Displays the name of the customer linked to the user's account.
Account Number	Displays the account number of the user in masked format.

 OR
 Click **Cancel** to cancel the operation and navigate back to 'Dashboard'.
 OR
 Click **Back** to navigate back to the previous screen.

Edit Sweep Structure – Review Structure

Edit Sweep Structure – Previous Structure

- Click **+** icon to zoom in the structure.
- Click **-** icon to zoom out the structure.
- Click  icon to fit the structure to screen.
- Click **X** icon to close the review structure overlay screen.

25. The success message appears along with the transaction reference number, status and structure details.
Click **Home** to go to **Dashboard** screen.
OR
Click **Go To Overview** to go to the liquidity management dashboard.
OR
Click **List Structure** to view the complete list of account structures.

4.4.2 Edit Pool Structure

The **Edit Pool Structure** screen enables the user to edit the pool structure to perform the notional movement of funds, the account balances are notionally consolidated and 'interest computations' carried out on such notional balances.

1. On the **View Pool Structure** screen, click **Edit** button.

The **Edit Pool Structure - Structure Parameters** appears.

Edit Pool Structure - Structure Parameters

The first step of edit pool structure involves updating the basic details of the pool structure like structure name, structure type, end date, etc.

2. In the **Structure Name** field, specify the name of the account structure.
3. In the **Structure Priority** field, specify the priority of account structure.
4. From the **End Date** list, select the appropriate date to set up the instruction.
5. From the **Charge Account** list, select the charge account.
6. From the **Interest Method** list, select the appropriate method for interest calculation.
7. From the **Reallocation Method** list, select the appropriate reallocation method.
 - a. If the user have selected Central Distribution option:
From the **Central Account Number** list, select the appropriate account.

Edit Pool Structure - Structure Parameters

The screenshot displays the 'Edit Pool Structure' interface for 'ALL SPORTS | ***464'. The 'Structure Parameters' section includes the following fields:

- Structure Name:** CreatePool1
- Structure Priority:** 2
- Effective Date:** 30 Nov 2018
- End Date:** 29 Oct 2021
- Charge Account:** xxxxxxxxxxxx3456
- Interest Method:** Interest

The 'Pool Details' section shows the **Reallocation Method** set to 'Percentage Allocation'. A note at the bottom indicates: 'Please capture the percentage distribution details in the next step during account pair definition'. Navigation buttons 'Next', 'Cancel', and 'Back' are located at the bottom left.

Field Description

Field Name	Description
Structure Parameters	
Structure Name	Specify the name of the pool structure that is to be edited.

 1	Displays the number of the child account(s) linked to the parent account.

- Click  to edit the account structure in the table view. The **Edit Pool Structure – Table View** screen appears.

Edit Pool Structure - Table View

Field Description

Field Name	Description
Structure Code	Displays the structure ID of the structure.
Structure Type	Displays the type of the structure.
Structure Name	Displays the name of the structure.
Charge Account	Displays the charge account from which the charges can be collected.
Note: Only accessible accounts will be displayed. This field will appear only if the user selects the charge account number.	

Information displayed for header account and each child accounts.

Account Name Displays the name of the customer linked to the user’s account.

Account Number Displays the account number of the user in masked format.

Field Name	Description
Account Type	Displays the type of account. The options are: <ul style="list-style-type: none"> • Internal (An account which is internal to the Bank)
Location/Branch	Displays the location/branch name of the bank.
Currency	Displays the currency of the account.
Linked Accounts	Displays the number of the child account(s) linked to the parent account.

10. Click  and then click **Link** to add the accounts to the selected parent account. The **Edit Pool Structure - Select Reallocation Method & Link Accounts** popup screen appears.
 - OR
 - Click **Reallocation**. This option appears only for the parent accounts with the child accounts. The **Edit Pool Structure - Reallocation** popup screen appears.
 - OR
 - Click **Account Details** to view the account details. The **Account Details** overlay screen appears. (Refer to **Section 4.3.2** for the detailed explanation).
 - OR
 - Click **Delink**. A Delink Account popup appears confirming the removal of accounts. This option will not appear for the notional header account. (Refer to **Section 4.2.1** for the detailed explanation)
 - a. Click **OK**, if the user want to remove the added header account.
 - OR
 - Click **Cancel** to cancel the removing process.

Edit Pool Structure – Select Reallocation Method & Link Accounts

The user can search and select the accounts to be linked to the selected header/parent account. The filtered account list for which the user has access to will appear for linking the accounts.

11. From the **Reallocation Method** list, select the reallocation method.
12. Select the accounts that the user want to link to the header account.
 - OR
 - In the **Search By Party Name, Account Number** field, specify and search the complete or partial account details to display the list of accounts that matches across the fields in the table and select the accounts that the user want to link to the header account.

Edit Pool Structure – Select Reallocation Method & Link Accounts

The screenshot displays two overlapping windows from the Oracle Account Structure Maintenance application. The background window is titled 'Edit Pool Structure' and shows details for a pool named 'ALL SPORTS | ***464'. It lists several accounts under a 'Notional Header' with columns for Account Name, Account Number, and Account Type. The foreground window is titled 'Select Reallocation Method & Link Accounts'. It shows a 'Reallocation Method' dropdown set to 'Percentage Allocation'. Below this is a table of accounts to be linked to the pool. The table has columns for Account Number & Name, Account Type, Party Name, IBAN, Branch, and Currency. The accounts listed are all 'INTERNAL' type and belong to 'HEL FC UNIVERSAL BANK'. A legend at the bottom of the foreground window explains the warning icons: a yellow triangle for 'Account participating in multiple structures' and a yellow circle with an exclamation mark for 'Account marked for regulated debit'.

Field Description

Field Name	Description
Reallocation Method	<p>Select the method in which the interest is shared with the participating accounts within the account structure.</p> <p>The options are:</p> <ul style="list-style-type: none"> • Absolute Pro-Data Distribution • Central Distribution • Even Direct Distribution • Even Distribution • Fair Share Distribution • No Reallocation • Percentage Reallocation • Reverse Fair Share Distribution <p>This field will be in read-only mode for the notional header account.</p>
Search	Specify and search the complete or partial account details to display the list of accounts that matches across the fields in the table.
Select All	Select the checkbox to select all the accounts.
Account Number & Name	Displays the account numbers and name of the user in masked format.

Field Name	Description
Account Type	Displays the type of account. The options are: <ul style="list-style-type: none"> • Internal (An account which is internal to the Bank) • External (An account which is external to the Bank and linked for liquidity management)
Party Name	Displays the name of the party linked to the user's account.
IBAN	Displays the IBAN number of the account.
Branch	Displays the branch name of the user's account.
Currency	Displays the currency of the account.
Pagination	Select the page number or navigation button to navigate across the pages.
	Accounts marked with this symbol, are participating in multiple structures.
	Accounts marked with this symbol are marked for regulated debit.

13. Click **Set Instructions**. This button is enabled only if the **Reallocation Method** is selected as **Percentage Allocation**.
The **Edit Pool Structure - Reallocation** popup screen appears.
OR
Click **Build** to add the child accounts to the Header account.
The **Edit Pool Structure – Submit** screen appears.
OR
Click  to close the overlay screen.

Edit Pool Structure - Reallocation

Once the child accounts are selected, the user can further set the allocation percentage for each child accounts. This screen is applicable only if the **Reallocation Method** is selected as **Percentage Allocation**.

14. In the **Allocation Percentage** field, specify the allocation percentage for the child account.

Edit Pool Structure - Reallocation

Field Description

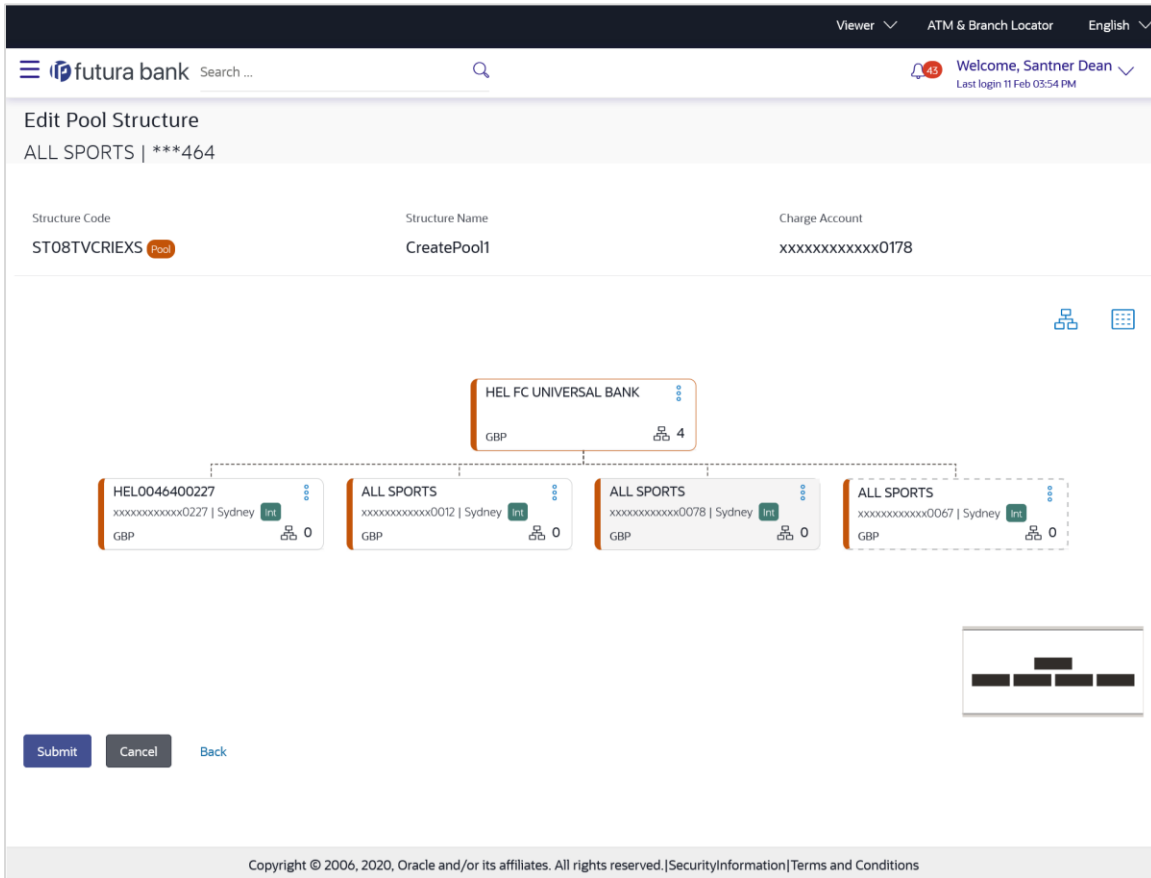

Field Name	Description
Reallocation Method	Displays the method in which the interest is shared with the participating accounts within the account structure. By default, the value appears as Percentage Allocation .
Account Number & Name	Displays the account numbers and name of the user in masked format.
Allocation Percentage	Specify the allocation percentage for the child accounts. Note: The sum of the allocation percentage for all the child accounts must be 100. This condition is applicable only for first level (accounts directly linked with Notional Header). If the user wants to delink one of the child nodes from the first level of structure, then the user needs to first zero the percentage of that node and distribute the percentage allocation among the remaining nodes such that the total percentage allocation of the remaining nodes is 100.

15. Click **Build** to add the child accounts to the Header account.
The **Edit Pool Structure – Submit** screen appears.
OR
Click to close the overlay screen.

Edit Pool Structure - Submit

This screen enables the user to view the modified account structure in both Tree and Table view.

Edit Pool Structure – Submit – Tree View

Default Sweep Instructions	
(Information specified here is defaulted at each parent-child account pair whereas user can override and define a specific frequency for a specific pair of account as a part for instruction set up)	
Sweep Method	<p>Select the sweep method that is to be applied to the structure.</p> <p>The options are:</p> <ul style="list-style-type: none"> • Zero Balance Model • Fixed Amount Model • Collar Model • Target Model - Constant • Target Model - Fixed • Threshold Model • Range Based Model • Cover Overdraft Model • Percentage Model
Frequency	
Frequency	<p>Select the frequency at which the account structure should be executed.</p> <p>The list displays all the frequencies maintained in the product processor.</p>
Reverse Frequency	<p>Select the reverse frequency at which the reverse sweep for account structure should be executed.</p> <p>The list displays the frequencies for which the BOD is enabled.</p> <hr/>

Field Name	Description
Other Instructions	
Sweep on Currency Holiday	Move the slider to enable the sweep on currency holiday.
Consider Post Sweep Balance	Move the slider to consider the post sweep balance.
Currency Holiday Rate	Select the interest rate on Currency Holiday. The options are <ul style="list-style-type: none"> • Previous Day Rate This field is enabled only if the user toggle on the Sweep on Currency Holidays .
Holiday Treatment	Select the holiday treatment. The options are <ul style="list-style-type: none"> • Holiday • Next Working Date • Previous Working Date
Maximum Backward days	Specify the maximum backward days. This field is enabled only if the user select Previous Working Date from the Holiday Treatment.
Backward Treatment	Select the backward treatment. The options are <ul style="list-style-type: none"> • Move forward • Holiday This field is enabled only if the user select Previous Working Date from the Holiday Treatment.

- Click **Next**.
The **Edit Hybrid Structure - Added Accounts** screen appears.
OR
Click **Cancel** to cancel the operation and navigate back to 'Dashboard'.
OR
Click **Back** to navigate back to the previous screen.

Edit Hybrid Structure – Tree View

The user can link the new accounts, delink the existing accounts, and update the instructions for the accounts in the existing structure. By default, this screen appears in Tree view.

Edit Hybrid Structure – Tree View

The screenshot displays the 'Edit Hybrid Structure' page in Tree View. The page header includes the Futura Bank logo, a search bar, and user information: 'Welcome, Santner Dean' with a last login of '11 Feb 03:54 PM'. The main content area shows the structure details: Structure Code 'STUY82QJW4SH' (marked as Hybrid), Structure Name 'Hybrid 19721', and Charge Account 'xxxxxxxxxxxx3456'. Below this, a tree view shows three levels of accounts: 'HEL FC UNIVERSAL BANK' (GBP, 1), 'ALL SPORTS' (xxxxxxxxxxxx0067 | Sydney, GBP, 1), and 'HELO046400178' (xxxxxxxxxxxx0178 | Sydney, GBP, 0). At the bottom left, there are 'Submit', 'Cancel', and 'Back' buttons. The footer contains the text: 'Copyright © 2006, 2020, Oracle and/or its affiliates. All rights reserved. | Security information | Terms and Conditions'.

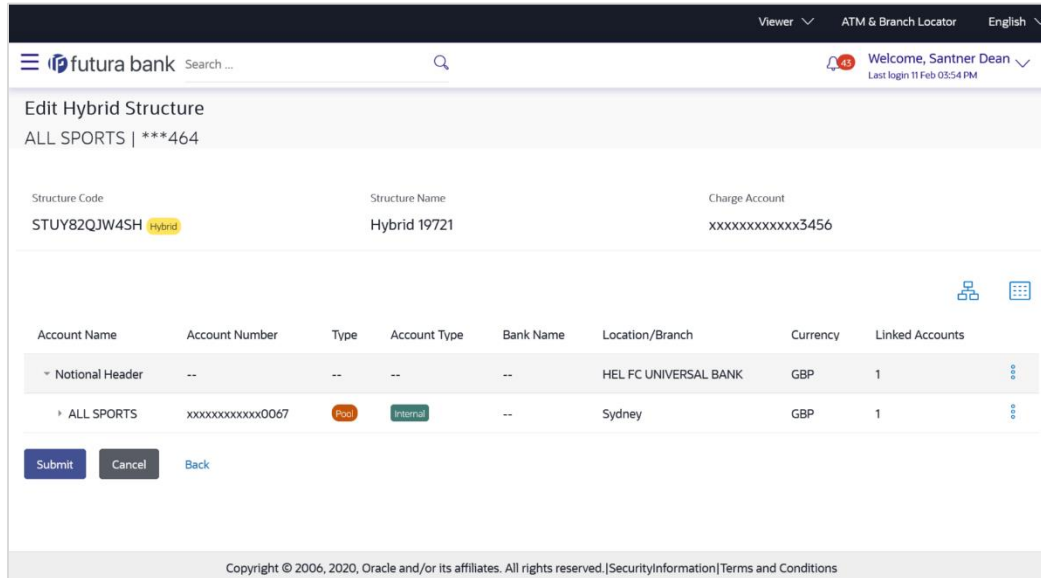

Field Description

Field Name	Description
Structure Code	Displays the structure ID of the structure.
Structure Type	Displays the type of the structure.
Structure Name	Displays the name of the structure.
Charge Account	Displays the charge account from which the charges can be collected.
	Note: Only accessible accounts will be displayed. This field will appear only if the user selects the charge account number.

Field Name	Description
	Information displayed on notional account card.
Branch	Displays the branch name for the notional account.
Currency	Displays the currency for the notional account.
	Information displayed on real account card.
Account Name	Displays the name of the account.
Account Number	Displays the account number of the user in masked format.
Location	Displays the location of the account.
Account Type	Displays the type of account. The options are: <ul style="list-style-type: none"> • Int (An account which is internal to the Bank) • Ext (An account which is external to the Bank and linked for liquidity management)
Account Balance	Displays the currency and the available balance in the account. Note: The notional Header accounts will not have any balance.
 1	Displays the number of the child account(s) linked to the parent account.

10. Click  to edit the account structure in the table view. The **Edit Hybrid Structure – Table View** screen appears.

Edit Hybrid Structure - Table View

Field Name	Description
	Accounts marked with this symbol, are participating in multiple structures.
	Accounts marked with this symbol are marked for regulated debit.

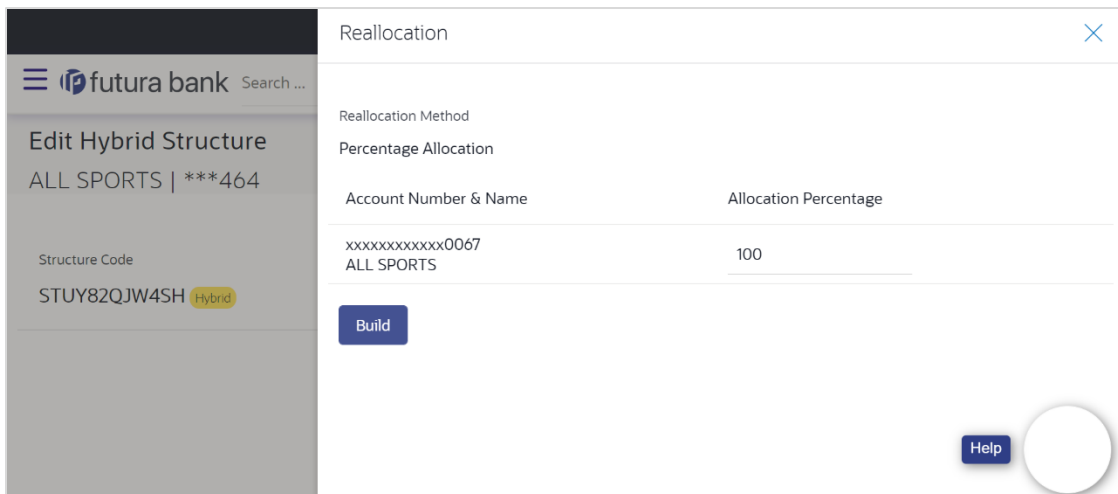

- Click **Child Instructions**. This option will appear only for the parent accounts with the child accounts.
 The **Edit Hybrid Structure - Reallocation** popup screen appears if the Cash Concentration Method is selected as **Pool**.
 The **Edit Hybrid Structure - Set Instructions** popup screen appears if the Cash Concentration Method is selected as **Sweep**.
 OR
 Click **Build** to use the default instructions and add the child accounts to the Header account.
 The **Edit Hybrid Structure - Submit** screen appears.
 OR
 Click  to close the overlay screen.

Edit Hybrid Structure - Reallocation

Once the child accounts are selected, the user can further set the allocation percentage for each child accounts. This screen is applicable only if the **Reallocation Method** is selected as **Percentage Allocation**.

- In the **Allocation Percentage** field, specify the allocation percentage for the child account.

Edit Hybrid Structure - Reallocation

The screenshot shows a 'Reallocation' popup window. On the left is a sidebar with the Futura Bank logo and search bar. The main content area is titled 'Edit Hybrid Structure' and shows 'ALL SPORTS | ***464'. Below this, it displays 'Structure Code' as 'STUY82QJW4SH' with a 'Hybrid' tag. The main table has the following data:

Account Number & Name	Allocation Percentage
xxxxxxxxxxxx0067 ALL SPORTS	100

At the bottom of the main content area, there is a blue 'Build' button and a 'Help' button next to a circular icon.

Field Description

Field Name	Description
Reallocation Method	Displays the method in which the interest is shared with the participating accounts within the account structure. By default, the value appears as Percentage Allocation .
Account Number & Name	Displays the account numbers and name of the user in masked format.
Allocation Percentage	Specify the allocation percentage for the child account. <hr/> Note: The sum of the allocation percentage for all the child accounts must be 100. This condition is applicable only for first level (accounts directly linked with Notional Header). <hr/> If the user wants to delink one of the child nodes from the first level of structure, then the user needs to first zero the percentage of that node and distribute the percentage allocation among the remaining nodes such that the total percentage allocation of the remaining nodes is 100. <hr/>

- 17. Click **Build** to add the child accounts to the Header account. The **Edit Hybrid Structure – Submit** screen appears.
OR
Click  to close the overlay screen.

Edit Hybrid Structure - Set Instructions

Once the child accounts are linked, the user can further set the instruction between an account pair along with the parent and child account information.

Edit Hybrid Structure - Set Instructions

Field Description

Field Name	Description
Parent Account No & Name	Displays the parent account number & name of the structure in masked format.
Child Account No & Name	Displays the child account number & name of the structure in masked format.
Priority	Specify the sweep priority used to determine the order of execution across pairs at a level in the structure.
2 Way Sweep	Select the toggle to enable the two way sweep for the account pair.
Instruction	Displays the instruction type for the account pair.

18. Click **Expand** icon to view the instructions for the account pair.

The **Edit Hybrid Structure - Set Instructions – Instructions & Frequency** screen appears.
OR

Click  to close the overlay screen.

Edit Hybrid Structure - Set Instructions – Instructions & Frequency

The user can update the instructions and frequency for the account pair.

19. In the **Instruction & Frequency** tab, do the following:

- a. From the **Sweep Method** list, select the appropriate option.
- b. From the **Frequency** list, select the appropriate frequency.
- c. In the **Instructions Priority** field, enter the instruction priority.
- d. On Selection of **Sweep Method**, the related parameters is displayed with defined values in the editable form.
- e. Click **Add Frequency** and select the frequency to add multiple frequency.

Click  to delete the frequency.

- f. Click **Save** to save the sweep method.

20. Click  to edit the saved sweep method.
OR

Click  to delete the saved sweep method.

OR

Click **Add Sweep** to add multiple sweep method for the account pair.

Note: In a structure, swapping the priority set in two instructions within an account pair is not allowed.

To do so, the user will have to delete one of the instructions and then re-add it with the desired priority.

Edit Hybrid Structure - Set Instructions – Instructions & Frequency

The screenshot shows the 'Set Instructions' dialog box. At the top, it states: 'The Structure level sweep instructions apply to all pairs by default.' Below this is a table with the following data:

Parent Account No & Name	Child Account No & Name	Priority	2 Way Sweep	Instruction
XXXXXXXXXX0067 ALL SPORTS	XXXXXXXXXX0023 ALL SPORTS	2	<input checked="" type="checkbox"/>	Zero Balance Model
XXXXXXXXXX0067 ALL SPORTS	XXXXXXXXXX0089 ALL SPORTS	2	<input checked="" type="checkbox"/>	Zero Balance Model

Below the table are three sections: 'Instructions & Frequency', 'Reverse Sweep', and 'Intercompany Loan'. The 'Instructions & Frequency' section has the following fields:

- Sweep Method: Zero Balance Model
- Frequency: after 3 days
- Instruction Priority: 1

Buttons include '+ Add Frequency', '+ Add Sweep', 'Save', and 'Build'.

Field Description

Field Name	Description
Sweep Method	<p>Select the sweep method set between the account pair</p> <p>The options are:</p> <ul style="list-style-type: none"> • Zero Balance Model • Fixed Amount Model • Collar Model • Target Model - Constant • Target Model - Fixed • Threshold Model • Range Based Model • Cover Overdraft Model • Percentage Model <p>Value defined as a part of 1st step will be shown in an editable form.</p>
Frequency	<p>Select the frequency at which the account structure should be executed.</p> <p>The list displays all the frequencies maintained in the product processor.</p>
Instruction Priority	<p>Specify the instruction priority across multiple instructions within an account pair.</p>

Field Name	Description
Parameters	
Applicability of the below fields varies based on the instruction type selected between the accounts.	
Collar Amount	Specify the collar amount set for executing sweep is displayed. This field appears for if the user have selected Collar Model from Instruction Type list. Value set at the product processor is displayed in an editable form.
Maximum	Specify the maximum amount for executing sweep. Value set at the product processor is displayed in an editable form.
Maximum Deficit	Specify the maximum deficit amount for executing sweep. Value set at the product processor is displayed in an editable form.
Minimum	Specify the minimum amount for executing sweep. Value set at the product processor is displayed in an editable form.
Minimum Deficit	Specify the minimum deficit amount for executing sweep. Value set at the product processor is displayed in an editable form.
Threshold Amount	Specify the threshold amount for which the sweep is to be executed. Value set at the product processor is displayed in an editable form.
Multiple	Specify the amount in multiples of which the sweep is to be executed. Value set at the product processor is displayed in an editable form.
Percentage	Specify the percentage for which the sweep is to be executed. Value set at the product processor is displayed in an editable form.
Fixed Amount	Specify the fixed amount for which the sweep is to be executed. Value set at the product processor is displayed in an editable form.

21. Click **Reverse Sweep** tab to set the reverse sweep instruction for the account pair.

The **Edit Hybrid Structure - Set Instructions – Reverse Sweep** screen appears.

OR

Click  to close the overlay screen.

Edit Hybrid Structure - Set Instructions – Reverse Sweep

The user can update the reverse frequency instruction for the account pair.

22. In the **Reverse Sweep** tab, do the following:

- a. Select the **Reverse Sweep Allowed** toggle to enable the reverse sweep for the account pair.
- b. From the **Reverse Frequency** list, select the appropriate option if the **Reverse Sweep Allowed** toggle is enabled.

Edit Hybrid Structure - Set Instructions – Reverse Sweep

Field Description

Field Name	Description
Reverse Sweep Allowed	Select the toggle to enable the reverse sweep for the account pair.
Reverse Frequency	Select the frequency at which the reverse sweep for the account structure should be executed. The list displays the frequencies for which the BOD is enabled. Note: This field appears only if the Reverse Sweep Allowed toggle is enabled.

23. Click **Intercompany Loan** tab to set the Intercompany loan instruction for the account pair. The **Edit Hybrid Structure - Intercompany Loan** screen appears in tree view.

OR

Click to close the overlay screen.

Edit Hybrid Structure - Set Instructions – Intercompany Loan

The screenshot displays the 'Set Instructions' configuration page. On the left, a sidebar shows the account details: 'Edit Hybrid Structure', 'ALL SPORTS | ***464', and 'Structure Code ST3GVEK153Y8 Hybrid'. The main area contains a table of account pairs:

Parent Account No & Name	Child Account No & Name	Priority	2 Way Sweep	Instruction
XXXXXXXXXXXX0067 ALL SPORTS	XXXXXXXXXXXX0023 ALL SPORTS	2	<input type="checkbox"/>	Zero Balance Model
XXXXXXXXXXXX0067 ALL SPORTS	XXXXXXXXXXXX0089 ALL SPORTS	2	<input checked="" type="checkbox"/>	Zero Balance Model

Below the table, the 'Intercompany Loan' tab is selected, showing:

- Track Intercompany Loan: Yes
- Intercompany Loan Reference: (empty field)
- Loan Type: Fixed

A 'Build' button is located at the bottom left of the main area.

Field Description

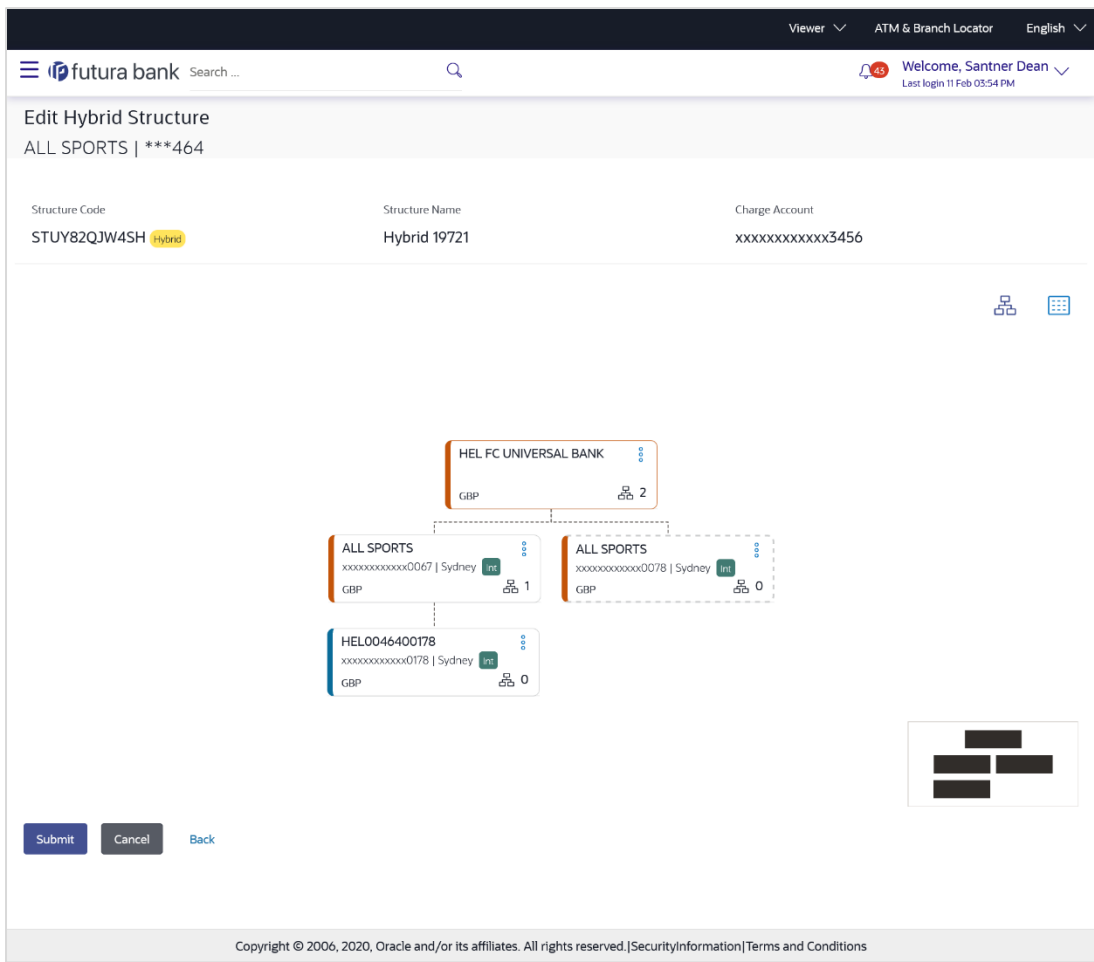

Field Name	Description
Track Intercompany Loan	<p>Select the option from the drop-down list, To enable the Track Intercompany Loan for the account pair.</p> <p>The available options are:</p> <ul style="list-style-type: none"> • Yes • No <p>Note: By default, this field is selected as No.</p>
Loan Type	<p>Displays the Type of the loan for an account pair.</p> <p>Note:</p> <ul style="list-style-type: none"> • If Reverse Sweep Allowed toggle is ON, the Loan Type is displayed as Fixed. • If Reverse Sweep Allowed toggle is OFF, the Loan Type is displayed as Open. • This field appears if Track Intercompany Loan is selected as Yes from the drop-down list.
Intercompany Loan Reference	<p>Specify the Intercompany Loan Reference details for the account pair.</p> <p>Note: This field appears and mandatory, if Track Intercompany Loan is selected as Yes from the drop-down list.</p>

- 24. Click **Submit**.
The **Edit Hybrid Structure - Submit** screen appears in tree view.
- OR
Click  to close the overlay screen.

Edit Hybrid Structure - Submit

The user can view the modified account structure in both Tree and Table view.

Edit Hybrid Structure – Submit – Tree View

Edit Hybrid Structure – Review Structure

The screenshot displays the 'Review Structure' overlay. On the left, the sidebar shows the 'Edit Hybrid Structure' page for 'ALL SPORTS | ***464'. A 'Review' banner indicates that a request for edit structure has been initiated. Below this, 'Structure Parameters' are listed: Structure Name 'Mystic Corp' (Hybrid), Effective Date '01 Jan 2017', and Charge Account 'xxxxxxxxxxx3456'. The main area shows a hierarchical tree of accounts. At the top is 'HEL FC UNIVERSAL BANK' (GBP, 2). It branches into 'ALL SPORTS' (GBP, 2) and 'HEL0046400178' (GBP, 0). 'ALL SPORTS' further branches into 'ALL SPORTS' (GBP, 0) and 'HEL0046400227' (GBP, 0). On the right side of the overlay, there are control icons: a plus sign (+) for zoom in, a minus sign (-) for zoom out, a circular arrow for fit to screen, and an 'X' for close.

Edit Hybrid Structure – Previous Structure

The screenshot displays the 'Previous Structure' overlay. The left sidebar is identical to the previous screenshot. The main area shows a different hierarchical tree. At the top is 'HEL FC UNIVERSAL BANK' (GBP, 2). It branches into 'HEL0046400178' (GBP, 2) and 'ALL SPORTS' (GBP, 0). 'HEL0046400178' branches into 'ALL SPORTS' (GBP, 0) and 'ALL SPORTS' (GBP, 3). 'ALL SPORTS' (GBP, 3) branches into 'External Account | Futur...' (GBP, 0) and 'ALL SPORTS' (GBP, 0). 'ALL SPORTS' (GBP, 0) branches into 'ALL SPORTS' (GBP, 0). The control icons on the right are the same as in the previous screenshot.

- a. Click + icon to zoom in the structure.
 - b. Click – icon to zoom out the structure.
 - c. Click  icon to fit the structure to screen.
 - d. Click X icon to close the review structure overlay screen.
29. The success message appears along with the transaction reference number, status and structure details.
 Click **Home** to go to **Dashboard** screen.
 OR
 Click **Go To Overview** to go to the liquidity management dashboard.
 OR
 Click **List Structure** to view the complete list of account structures.

4.5 Execute Account Structure

These options allow the corporate user to execute account structure and applicable only for Sweep structures.

To execute account structure ad hoc:

1. In the **View Sweep Structure** screen, click  and then **Execute Structure**.
The **Execute Structure - Review** screen appears. Verify the details and click **Confirm**.
OR
Click the **View Structure** link to view the structure details. The **Structure Details** overlay appears.
OR
Click **Cancel** to navigate to **Dashboard** Screen.
OR
Click **Back** to navigate back to the previous screen.
2. The success message appears along with the transaction reference number, status and structure details.
Click **Home** to go to **Dashboard** screen.
OR
Click **Go To Overview** to go to the liquidity management dashboard.
OR
Click **List Structure** to view the complete list of account structures.

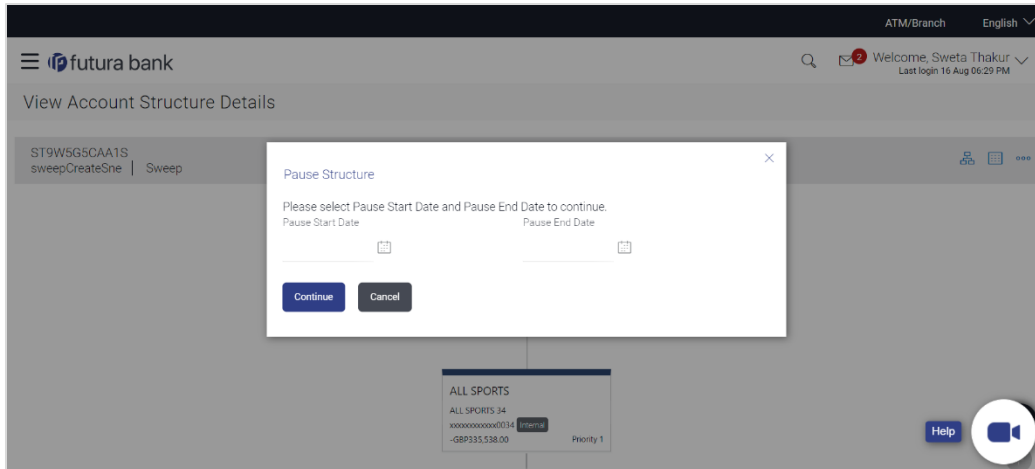

4.6 Pause Account Structure

These options allow the corporate user to pause/ resume the execution of the account structure temporarily.

To pause the account structure temporarily:

1. In the **View Structure** screen, click  and then **Pause Structure**.
The **Pause Structure** popup screen appears.

Pause Structure

Field Description

Field Name	Description
------------	-------------

Pause Start Date	Select the date from when the structure has to be paused.
-------------------------	---

Pause End Date	Select the date from when the structure has to be resumed.
-----------------------	--

2. Click **Continue** to navigate to the review screen.
The **Pause Structure – Success message** appears.
OR
Click **Cancel** to cancel the operation.
3. The success message appears along with the transaction reference number, status and structure details.
Click **Home** to go to **Dashboard** screen.
OR
Click **Overview** to go to the liquidity management dashboard.
OR
Click **List Structure** to view the complete list of account structures.

4.7 Copy Account Structure

These options allow the corporate user to view the details and copy the structure to initiate new structure creation request. This screen is available in both Tree and Table view. By default, this screen appears in Tree view.

To copy the account structure:

1. In the **Account Structures** screen, click on the specific account structure code which is in **Creation - Rejected** status.
The **View Structure – Copy** screen appears.

View Structure – Copy – Tree View

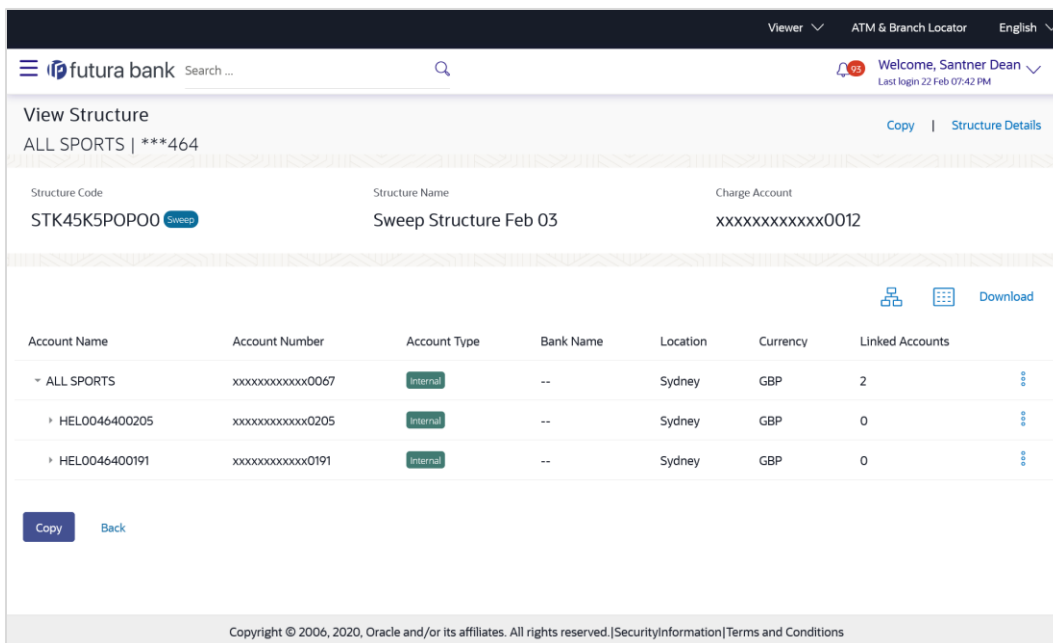

The screenshot displays the 'View Structure - Copy' interface for Futura Bank. At the top, there is a navigation bar with 'Viewer', 'ATM & Branch Locator', and 'English'. Below this is a header with the Futura Bank logo, a search bar, and a user greeting: 'Welcome, Santner Dean' with a last login time of '22 Feb 07:42 PM'. The main content area is titled 'View Structure' and shows the account name 'ALL SPORTS | ***464'. There are 'Copy' and 'Structure Details' links. Below the header, a table lists account details:

Structure Code	Structure Name	Charge Account
STK45K5POPO0 Sweep	Sweep Structure Feb 03	xxxxxxxxxxxx0012

Below the table, there are icons for 'Download' and a tree view diagram. The tree view shows a parent node 'ALL SPORTS' with a balance of 'GBP744.00' and a status of '2'. It branches into two child nodes: 'HELO046400205' with a balance of 'GBP88,900.00' and status '0', and 'HELO046400191' with a balance of 'GBP100,900.00' and status '0'. At the bottom left, there are 'Copy' and 'Back' buttons. The footer contains the copyright notice: 'Copyright © 2006, 2020, Oracle and/or its affiliates. All rights reserved. | Security Information | Terms and Conditions'.

- Click  to view the account structure in the Table view. The **View Structure - Copy - Table View** screen appears.

View Structure – Copy - Table View

The screenshot shows the 'View Structure' page for account 'ALL SPORTS | ***464'. It displays the following details:

- Structure Code: STK45K5POP00 (Sweep)
- Structure Name: Sweep Structure Feb 03
- Charge Account: xxxxxxxxxxxx0012

Below these details is a table of linked accounts:

Account Name	Account Number	Account Type	Bank Name	Location	Currency	Linked Accounts
ALL SPORTS	xxxxxxxxxxxx0067	internal	--	Sydney	GBP	2
HELO046400205	xxxxxxxxxxxx0205	internal	--	Sydney	GBP	0
HELO046400191	xxxxxxxxxxxx0191	internal	--	Sydney	GBP	0

At the bottom of the table, there are 'Copy' and 'Back' buttons. The footer contains copyright information: 'Copyright © 2006, 2020, Oracle and/or its affiliates. All rights reserved. | Security | Information | Terms and Conditions'.

Field Description

5. Log Monitors

Through this feature, the corporate user can search and view the Logs (Sweep/Pool/Hybrid) of specific account structure that are to be executed on the same day or at the future date or already executed sweeps or the sweep instructions that went into an exception while execution.

All the Logs (Sweep/Pool/Hybrid) are listed on the screen as records with details such as the date and time on which the logs is due for execution/ executed/ went for exception, structure type, instruction, source account and destination account of logs. The user can download the log details whenever required.

Pre-requisites:

- Transaction access and account access is provided to corporate user
- Account structures with sweep instructions are maintained

Features supported in application

Following transactions are allowed under Log Monitors

- View and download Pending / Executed / Exception Sweeps logs for Sweep Structures.
- View Executed / Exception / All Pool logs for Pool Structures
- View Pending / Executed / Exception Hybrid logs for Hybrid Structures

How to reach here:

Toggle menu > Liquidity Management > Log Monitors

To search and view the instruction details:

1. Navigate to **Log Monitors** screen.
2. From the **Structure** list, select the account structure type – Sweep, Pool or Hybrid.
3. From the **Status** list, select the status.
4. From the **From Date** and **To Date** list, select the dates to view the details of specific account structure.
5. Click **Submit**. The search result displaying the details of specific account structure based on the search parameters appear.
OR
Click **Clear** to clear the search criteria.
OR
Click **Cancel** to cancel the transaction.

Log Monitors

Field Description

Field Name	Description
Structure Type	Select the type of structure. The options are: <ul style="list-style-type: none"> • Sweep • Pool • Hybrid
From Date	Specify the start date and time from which the user want to view the details.
To Date	Specify the end date and time till which the user want to view the details.
Structure	Select the account structure to search and view the logs of the selected/underlying structure. Based on the structure type selected, the list of Account structures will appear in the drop down. The drop-down will list only those account structures of which the user has access to. The Account Structures are accessible only if the user has access of all the accounts participating in the structure. User can select the following type of Structure – Sweep, Pool or Hybrid
Status	Select the status of the instruction for which logs are required. The options are: <ul style="list-style-type: none"> • Pending • Executed • Exception

5.1 Sweep Monitor

How to reach here:

Toggle menu > Liquidity Management > Overview > Sweep Monitor > View All

FAQ

1. Will the 'Assets and Liabilities with Net Position' widget display the complete information of my holdings?

'Assets and Liabilities with Net Position' widget will show position based on only your internal and external current and savings accounts which are enabled for liquidity management and are mapped to the user.

2. Will I be able to see the details of my accounts that are enabled for liquidity management?

Yes, you can see the accounts enabled for liquidity management and which are mapped to you on Digital Banking platform as a part of position by region widget and position by currency widget. This drill down provided on specific region and amounts will display the account break up.

3. Top five sweeps in local currency and in cross currency will display the data of which period?

Out of box, the top 5 sweeps will be shown of last 30 days. Whereas the number of days are configurable.

4. The account information displayed are the accounts which are mapped to me?

All the accounts which are enabled for liquidity management in product processor and which are mapped to you on Digital Banking Platform using Party and User Resource access maintenance will be shown.

5. In case at one level the number of accounts are more, then how will be the information will be shown in tree format?

If the number of accounts at specific level are more than the specified limits, then the total count of accounts will be shown which are not displayed at that level. Clicking on the link, user will be directed to a table format, in which all the accounts will be listed.

6. What is the meaning of different colors given for the account boxes in tree format?

Different types of structures (Sweep, Pool and Hybrid) and statuses (Active, Inactive and Paused) are depicted in different colors for easy identification in the account structures shown in the tree form.

7. While building a structure, if I realize that I have missed to filter few accounts, can I go back and add more accounts?

Yes, you can go to the Add Account step and add or remove the accounts filtered for building a structure.

8. In case of adhoc execution, will my scheduled execution also be initiated?

Adhoc execution will be a onetime execution and will be initiated once the request is fully authorized. Also, your scheduled execution will be initiated on the date and time set by you at the structure level.

9. Can I search the sweep logs of all account structures irrespective of the status of the structure?

Yes, you can search the sweep logs for the structures which are in active, inactive and paused state.

10. In which formats can I download the log?

You can download the sweep log in PDF or in CSV formats.

11. In case the sweeps are already executed, can I also find the amount exchanged between the accounts?

Yes, you can find the sweep in and sweep out amount along with the currency exchange rate for the executed sweeps.

12. What is F2B Banker Approval flow?

The front-to-back Banker approval flow that applies to the creation and modification of structures. Whenever a structure is created or modified through channel, it is sent to the Banker's approval who approves it using Liquidity Management product processor. The structure can become active only after Banker's approval.

13. Can I use Liquidity Management application from mobile?

Yes, it is supported on following devices -

- Tablet - Landscape view (All Liquidity Management transactions)
- Tablet - Portrait view (Refer [Section 7 Mobile Touch Point](#) for list of enabled transactions)
- On Mobile view - (Refer [Section 7 Mobile Touch Point](#) for list of enabled transactions)
