## 2 Oracle Financial Services Regulatory Reporting Data Sets and Governance for Asia Pacific and Middle East Jurisdictions

Oracle Financial Services Regulatory Reporting Data Sets and Governance for Asia Pacific and Middle East Jurisdictions (OFS REG REP APME) enables banks to automate risk reporting to central banks and regulators in a single integrated environment. It automates end-to-end processes from data capture through submission with industry-leading solutions, eliminating the need for further manual intervention. It is a standalone product that has pre-built integration with Lombard's Solution for Regulatory Reporting - AgileREPORTER and has the capability to integrate with any other third-party tools for the end mile reporting forms. The solution ensures data integrity allowing banks to focus more time on analyzing and gaining new business insight from their growing stores of data instead of preparing data and reports with the sole objective of meeting submission deadlines. This is made possible by the following:

- Providing Centralized Data Storage for Risk Data through relevant subject areas of the Financial Services Data Foundation (FSDF).
- Providing extracts to interface with any Regulatory Reporting Tool – prebuilt with Lombard AgileREPORTER to build necessary Template Reports to meet the regulatory expectations.
- Accurate Governance capabilities through integrated Data Governance Studio (DGS).

OFS Regulatory Reporting Datasets and Governance for Asia Pacific and Middle East Jurisdictions (OFS REG REP APME) offers regulatory reporting solutions for the Financial Institutions (FIs) in India, Australia, Singapore and Hong Kong. The present scope of the release in v81200 includes the reports for APRA, MAS, HKMA and RBI as mentioned in the following table, for India which have undergone Regulatory Updates in the recent past and mandatory to be submitted by all FIs in the region.

Additionally, multi-jurisdiction institutions, using these integrated tools, are now able to establish a global regulatory report production platform integrated with a single source of truth and full data lineage no matter where they are situated or how many jurisdictions, they operate in. The OFSAA Data Foundation has all the detailed granular data which are used to aggregate and populate the report cells. This enables seamless drill-down and lineage from cell-level information to the source where the granular data was made available. The standardized classification rules used to derive the aggregated and calculated data are clearly visible.

## 2.4 Known Issues or Limitations in this Release

The Known Issues or Limitations in this release are:

- Exclude FCT\_PLACED\_COLLATERAL from FSDF Risk Mitigation Data Load Process while executing FSDF\_SOURCE\_RUN.
- Exclude FCT\_PRODUCT\_RATE\_MATRIX from FSDF\_EXE\_DATA\_LOAD\_PROCESS while executing APRA\_RUN.
- The following tables are expected to be populated in the absence of a corresponding OFSAA application:
  - FCT\_IFRS\_ACCOUNT\_SUMMARY
  - FCT\_FTP\_ACCOUNT\_SUMMARY
  - FCT\_REG\_CAP\_ACCOUNT\_SUMMARY
  - FCT\_REG\_FTP\_ACCOUNT\_SUMMARY
  - FCT\_REG\_ACCT\_MITIGANT\_MAPPING
  - FCT\_MITIGANT\_REG\_CAPITAL
  - FCT\_REG\_CAP\_ASSET\_SOLD\_SUMMARY
- Reporting of averages number of facilities and sanctioned limit in Reports ARF743, ARF742\_OA and ARF742\_OB- The Reporting of averages number of facilities and the sanctioned limit will more aptly reflect the actual average if we exclude accounts that have zero values for these measures. This is different from the calculation of a simple average mathematically, where 0 values are not excluded. Though the instructions sheet does not specifically mention about excluding such accounts from the average calculation, we are excluding these to give these reporting numbers the correct functional meaning. This enhancement is not part of the current release, and it will be accommodated in the future release. It will affect the few average reporting cells from reports ARF743, ARF742\_OA & ARF742\_OB.
- Bug ID **33453349** - N\_INT\_COST IN STG\_BORROWINGS IS NOT FLOWING TO FCAS-STG\_SWAPS\_CONTRACTS.N\_MTM\_VALUE NOT FLOWING TO FCAS.N\_MTM\_VALUE

- Bug ID **33674175** - CELL MAPPING NOT AUTOMATED IN 8.1.2.0.0 RELEASE
- Bug ID **33985080** - Only one SCD can be used from the Two SCDs with the map reference numbers 53 and 54 that are available for the DIM\_INSTRUMENT\_CONTRACT table. Therefore,

the map reference number 54 must be included in the SCD batch execution, and the map reference number 53 must be excluded from the execution.

- Bug ID **34122749** - APME 812 | BUILD INSTALLATION WARNINGS
- Bug ID **33848601** - NO MAPPING OF STG\_BILLS\_CONTRACTS.F\_SECURED\_IND TO FCT\_COMMON\_ACCOUNT\_SUMMARY.F\_SECURED\_FLAG IN T2T\_STG\_BILLS\_CAS
