Preface

Understanding the PeopleSoft Online Help and PeopleBooks

The PeopleSoft Online Help is a website that enables you to view all help content for PeopleSoft applications and PeopleTools. The help provides standard navigation and full-text searching, as well as context-sensitive online help for PeopleSoft users.

Hosted PeopleSoft Online Help

You can access the hosted PeopleSoft Online Help on the Oracle Help Center. The hosted PeopleSoft Online Help is updated on a regular schedule, ensuring that you have access to the most current documentation. This reduces the need to view separate documentation posts for application maintenance on My Oracle Support. The hosted PeopleSoft Online Help is available in English only.

To configure the context-sensitive help for your PeopleSoft applications to use the Oracle Help Center, see Configuring Context-Sensitive Help Using the Hosted Online Help Website.

Locally Installed Help

If you're setting up an on-premise PeopleSoft environment, and your organization has firewall restrictions that prevent you from using the hosted PeopleSoft Online Help, you can install the online help locally. See Configuring Context-Sensitive Help Using a Locally Installed Online Help Website.

Downloadable PeopleBook PDF Files

You can access downloadable PDF versions of the help content in the traditional PeopleBook format on the Oracle Help Center. The content in the PeopleBook PDFs is the same as the content in the PeopleSoft Online Help, but it has a different structure and it does not include the interactive navigation features that are available in the online help.

Common Help Documentation

Common help documentation contains information that applies to multiple applications. The two main types of common help are:

- Application Fundamentals
- Using PeopleSoft Applications

Most product families provide a set of application fundamentals help topics that discuss essential information about the setup and design of your system. This information applies to many or all applications in the PeopleSoft product family. Whether you are implementing a single application, some combination of applications within the product family, or the entire product family, you should be familiar with the contents of the appropriate application fundamentals help. They provide the starting points for fundamental implementation tasks.
In addition, the *PeopleTools: Applications User's Guide* introduces you to the various elements of the PeopleSoft Pure Internet Architecture. It also explains how to use the navigational hierarchy, components, and pages to perform basic functions as you navigate through the system. While your application or implementation may differ, the topics in this user’s guide provide general information about using PeopleSoft applications.

**Field and Control Definitions**

PeopleSoft documentation includes definitions for most fields and controls that appear on application pages. These definitions describe how to use a field or control, where populated values come from, the effects of selecting certain values, and so on. If a field or control is not defined, then it either requires no additional explanation or is documented in a common elements section earlier in the documentation. For example, the Date field rarely requires additional explanation and may not be defined in the documentation for some pages.

**Typographical Conventions**

The following table describes the typographical conventions that are used in the online help.

<table>
<thead>
<tr>
<th>Typographical Convention</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Key+Key</td>
<td>Indicates a key combination action. For example, a plus sign (+) between keys means that you must hold down the first key while you press the second key. For Alt+W, hold down the Alt key while you press the W key.</td>
</tr>
<tr>
<td>. . . (ellipses)</td>
<td>Indicate that the preceding item or series can be repeated any number of times in PeopleCode syntax.</td>
</tr>
<tr>
<td>{ } (curly braces)</td>
<td>Indicate a choice between two options in PeopleCode syntax. Options are separated by a pipe (</td>
</tr>
<tr>
<td>[ ] (square brackets)</td>
<td>Indicate optional items in PeopleCode syntax.</td>
</tr>
<tr>
<td>&amp; (ampersand)</td>
<td>When placed before a parameter in PeopleCode syntax, an ampersand indicates that the parameter is an already instantiated object. Ampersands also precede all PeopleCode variables.</td>
</tr>
<tr>
<td>⇒</td>
<td>This continuation character has been inserted at the end of a line of code that has been wrapped at the page margin. The code should be viewed or entered as a single, continuous line of code without the continuation character.</td>
</tr>
</tbody>
</table>

**ISO Country and Currency Codes**

PeopleSoft Online Help topics use International Organization for Standardization (ISO) country and currency codes to identify country-specific information and monetary amounts.

ISO country codes may appear as country identifiers, and ISO currency codes may appear as currency identifiers in your PeopleSoft documentation. Reference to an ISO country code in your documentation
does not imply that your application includes every ISO country code. The following example is a country-specific heading: "(FRA) Hiring an Employee."

The PeopleSoft Currency Code table (CURRENCY_CD_TBL) contains sample currency code data. The Currency Code table is based on ISO Standard 4217, "Codes for the representation of currencies," and also relies on ISO country codes in the Country table (COUNTRY_TBL). The navigation to the pages where you maintain currency code and country information depends on which PeopleSoft applications you are using. To access the pages for maintaining the Currency Code and Country tables, consult the online help for your applications for more information.

**Region and Industry Identifiers**

Information that applies only to a specific region or industry is preceded by a standard identifier in parentheses. This identifier typically appears at the beginning of a section heading, but it may also appear at the beginning of a note or other text.

Example of a region-specific heading: "(Latin America) Setting Up Depreciation"

**Region Identifiers**

Regions are identified by the region name. The following region identifiers may appear in the PeopleSoft Online Help:

- Asia Pacific
- Europe
- Latin America
- North America

**Industry Identifiers**

Industries are identified by the industry name or by an abbreviation for that industry. The following industry identifiers may appear in the PeopleSoft Online Help:

- USF (U.S. Federal)
- E&G (Education and Government)

**Translations and Embedded Help**

PeopleSoft 9.2 software applications include translated embedded help. With the 9.2 release, PeopleSoft aligns with the other Oracle applications by focusing our translation efforts on embedded help. We are not planning to translate our traditional online help and PeopleBooks documentation. Instead we offer very direct translated help at crucial spots within our application through our embedded help widgets. Additionally, we have a one-to-one mapping of application and help translations, meaning that the software and embedded help translation footprint is identical—something we were never able to accomplish in the past.
Using and Managing the PeopleSoft Online Help

Select About This Help in the left navigation panel on any page in the PeopleSoft Online Help to see information on the following topics:

- Using the PeopleSoft Online Help
- Managing Hosted online help
- Managing locally installed PeopleSoft Online Help

Chapter 1

Getting Started with eDevelopment

**eDevelopment Business Processes**

eDevelopment is comprised of self-service transactions that interface with the PeopleSoft Human Resources (HR) system.

Employees use eDevelopment to:

- Maintain their personal profiles.
- View job profiles.
- Search and compare job profiles.
- Create an interest list of job profiles in which they are interested.
- Review approval history of profiles.
- Request training.
- Review their training information.

Managers use eDevelopment to:

- Review and update profiles for their direct reports.
- Approve profile changes.
- Search and compare profiles.
- View and maintain job profiles.
- Complete reviews and observations for regulated individual reports.
- Request training for their direct reports.
- Review training information for their direct reports.

Faculty members use eDevelopment to enter the following training and development information:

- Professional training.
- Activities, administrative posts, and teaching responsibilities.
- Presentations and publications.
- Committees.
• Student advising.

**eDevelopment Integrations**

eDevelopment integrates with PeopleSoft HR.

**Image: eDevelopment integration with HR**

This diagram shows information flowing from HR to eDevelopment.

![Diagram showing information flow from Human Resources to eDevelopment](image.png)

**eDevelopment Implementation**

In the planning phase of your implementation, take advantage of all PeopleSoft sources of information, including the installation guides, data models, business process maps. A complete list of these resources appears in the *Application Fundamentals* documentation with information about where to find the most current version of each.

Refer to the *PeopleSoft HCM 9.2 - Reorganization of Component Interface Permissions* (Doc ID 2342162.1) MOS posting for a list of system-delivered CIs and their usage, the mapping of CIs and associated permission lists, and the mapping of CI permission lists and user roles.

See the product documentation for *PeopleSoft HCM: Application Fundamentals*.

Chapter 2

Maintaining Person Profiles

Navigating in eDevelopment

The standard menu-driven navigation path is the standard access method for eDevelopment.

(Classic) If using the classic user interface, users access eDevelopment by selecting the following from the Navigator menu:

- **Employee**: Self Service > Learning and Development.
- **Manager**: Manager Self Service > Learning and Development.

*Image: (Classic) eDevelopment navigation for an employee*

This is an example of an eDevelopment navigation path for an employee using the classic user interface.

(Fluid) If using the fluid user interface, users access eDevelopment by selecting the following navigation:

- **Employee**: From the Employee Self Service fluid home page, select the My Profiles tile.
- **Manager**: From the Manager Self Service fluid home page, select the Team Profiles tile.
Image: (Fluid) eDevelopment — My Profiles dashboard for an employee

This is an example of the eDevelopment dashboard for an employee using the fluid user interface.

Roles

The self-service components can be used by both the employee and the manager; therefore, PeopleSoft delivers definitions for these roles and defines a menu for each role.

(Classic) These delivered roles for employees and managers are configured specifically for Profile Management self service using the classic pages:

- Profile Mgmt Employee
- Profile Mgmt Manager

(Fluid) These delivered roles for employees and managers are configured specifically for Profile Management self service using the fluid pages:

- Profile Mgmt Employee Fluid
- Profile Mgmt Manager Fluid

Note: In this documentation, the term employee refers to all people who work for and report time in the organization. This can include regular employees as well as contractors and other temporary assignment workers.
Security

The user profile that you create for each individual who accesses the self-service components determines the components that the user can access by default. Create user profiles by using the User Profiles component (USERMAINT). Assign a role to each user profile, which is linked to permission lists. Each permission list identifies components that individuals can access. To modify the access for specific components for each role, modify the permission list for the user's role. Define which data the user can access in the user profile.

See the product documentation for PeopleTools: Security Administration.

Understanding Profile Maintenance

eDevelopment provides employees and managers with self-service options that integrate with the Manage Profiles business process in PeopleSoft HR. eDevelopment profiles are divided into two categories:

- Person profiles.
  
  Person profiles describe a person's skills, competencies, accomplishments and performance. Person profiles are linked to a person ID.

- Job profiles.
  
  Job profiles (known as non-person profiles in the Manage Profiles business process) describe the competencies, qualifications, and responsibilities of a job. You can link job profiles to a variety of entities, not just job codes. For example, job profiles can also be linked to positions, job families, and salary grades.

The format of profiles is the same in eDevelopment and the Manage Profiles business process. Profile content is divided into tabs and content sections that are defined by the profile type used to create the profile.

See "Understanding Profiles and Profile Types" (PeopleSoft HCM 9.2: Human Resources Manage Profiles).

The following topics discuss the self-service profile management options available to employees and managers that enable them to perform the following transactions:

<table>
<thead>
<tr>
<th>Profile Management Transaction</th>
<th>Classic User Interface Pages</th>
<th>Fluid User Interface Pages</th>
</tr>
</thead>
<tbody>
<tr>
<td>Create and maintain your own person profile.</td>
<td>Employees use the My Current Profile transaction to view and edit their existing person profiles and create new profiles. Employees also use the My Historical Profile option to view historical rows of their profile. See (Classic) Maintaining Person Profiles as an Employee or Manager.</td>
<td>Employees use the Talent Profile Tile and page to view and edit their existing person profiles and create new profiles. When historical profile data exists for an item, these pages will display the View History button for the row, which opens the View Profile Item History page to access historical rows of their profile.</td>
</tr>
<tr>
<td><strong>Profile Management Transaction</strong></td>
<td><strong>Classic User Interface Pages</strong></td>
<td><strong>Fluid User Interface Pages</strong></td>
</tr>
<tr>
<td>-----------------------------------</td>
<td>---------------------------------</td>
<td>-------------------------------</td>
</tr>
<tr>
<td>Create and maintain your team members’ profiles.</td>
<td>Managers can create, view, and update the person profiles for their team using the Current Team Profiles Page. The manager Team Historical Profile transaction displays historical profile items in effect for direct reports as of the as of date.</td>
<td>Managers can create, view, and update the person profiles for their team using the Team Talent Profile Tile and pages. When historical profile data exists for a profile item, theses pages display the View History button for that row, where you can access historical data.</td>
</tr>
<tr>
<td>Approve changes to person or non-person profiles.</td>
<td>Managers use the Approve Profiles page to review changes to their employees' person profiles that require approval, and approve or deny the changes.</td>
<td>Managers use the Pending Approvals - Person Profile Page or Pending Approvals - Non-Person Profile Page to review changes to their employees' person profiles or non-person profile changes that require approval, and approve or deny the changes.</td>
</tr>
<tr>
<td>View approval history.</td>
<td>Employees use the Profile Approval History page in classic to view the approval status of profile changes that they have submitted for approval and view the history of profile approvals.</td>
<td>Employees use the &quot;Approvals History Page&quot; (PeopleSoft HCM 9.2: Application Fundamentals) Approval History option in fluid to view the approval status of profile changes that they have submitted for approval and view the history of profile approvals.</td>
</tr>
<tr>
<td>Manage interest lists.</td>
<td>Employees can add to and remove job profiles from their interest list using the My Interest List Page. Managers can view and update their employees' interest lists using the Team Interest Lists Page.</td>
<td>Employees can add to and remove job profiles from their interest list using the My Interest List Tile and pages. Managers can view and update their employees' interest lists using the Team Interest List Tile and pages.</td>
</tr>
<tr>
<td>View job profiles.</td>
<td>Employees have two options for viewing job (non-person) profiles: • My Job Profiles lists job profiles related to their current jobs. • View Job Profiles is a general option for viewing any job profile.</td>
<td>Employees have two options for viewing job (non-person) profiles: • My Job Profiles Tile and pages give access to a list of job profiles related to their current jobs. • View Job Profiles Tile (for Employees) and pages provide a general option for viewing any job profile.</td>
</tr>
</tbody>
</table>

**Note:** An interest list is a collection of job profiles that is associated with an employee. Typically interest lists are used to identify jobs that an employee is interested in applying for, or jobs that match an employee’s profile, or jobs that an employee wants to include in a career planning discussion with their manager.
Chapter 2 Maintaining Person Profiles

<table>
<thead>
<tr>
<th><strong>Profile Management Transaction</strong></th>
<th><strong>Classic User Interface Pages</strong></th>
<th><strong>Fluid User Interface Pages</strong></th>
</tr>
</thead>
<tbody>
<tr>
<td>Create and maintain job profiles (manager only).</td>
<td>Managers can create and update job profiles using the Maintain Job Profiles page.</td>
<td>Managers can create and update job profiles using the Maintain Job Profiles Tile (for Managers) and pages.</td>
</tr>
<tr>
<td><strong>Note:</strong> Depending on the configuration of your profile types, approvals workflow is triggered when managers update job profiles. The typical approver for job profiles is the profile administrator, although this can be configured according to your business needs.</td>
<td>See (Classic) Viewing and Updating Job Profiles.</td>
<td></td>
</tr>
<tr>
<td>Search and compare profiles.</td>
<td>Employees and managers use Search and Compare Profiles to run any of the search types that have been configured for them.</td>
<td>Employees and managers use &quot;Search and Compare Profiles Tile&quot; (PeopleSoft HCM 9.2: Human Resources Manage Profiles) and pages to run any of the search types that have been configured for them.</td>
</tr>
</tbody>
</table>

### Understanding Profiles

Employees can have one or more profiles, but only one profile per profile type. The PeopleSoft application delivers the profile type PERSON to create person profiles, but you can create other profile types according to your organizational requirements. For further information about creating profile types see "Creating Profile Group Types and Profile Groups" (PeopleSoft HCM 9.2: Human Resources Manage Profiles).

Employees and managers use the Profile Details page to view and update person profiles.

**Image: (Classic) Example of the person profile and its structure**

This is an example of a person profile using the classic user interface.
Image: (Fluid) Example of the person profile and its structure

This is an example of a person profile using the fluid user interface.

Profile content is divided into tabs which appear as tabs on the page. Under the navigation tabs, the page lists the content sections of the tab. When the employee or manager selects a different tab, the system updates the page to show the content sections for that tab. The content sections that employees and managers can view and update is determined by the security settings for the content sections in the profile type definition. This means that the profile content can vary according to the role accessing the profile.

Employees and managers add items to the person profile from the content catalog that you set up in Manage Profiles.

Note: (Classic) When using the classic pages, they can also copy items from job profiles that are related to the employee's job, by selecting Copy From Job Profile in the Profile Actions field and clicking the Go icon. The system searches for job profiles that match the employee's job data. There could be more than one profile related to the employee's job data. For example, if you have set up profiles for job codes and positions and the person has a position selected in job data, the system lists these profiles and the employee or manager selects the profile that they want to use.

The profile pages list items within the content sections of the page. If changes have been made to the profile but not yet approved, the pages indicates that there are items that are either new and awaiting submission for approval, pending approval, or denied. In classic mode, the employee or manager click a link to view a list of the items with that approval status. In fluid mode, the Status field appears, indicating which items have that approval status.

Content requiring approval whose items are added, updated, or deleted from a profile are assigned a saved status when the employee or manager saves and submits the information for approval.

For changes that don't require approval, the items are automatically set to approved when the employee or manager saves and the profile page is updated with the changes.
**Warning!** (Classic) After those items requiring approval are submitted using the classic page, the content section on the profile page is refreshed to show approved items only. This means that the changes that were saved are no longer visible because these items do not have an approved status. However, a link appears to indicate that there are items pending approval.

(Fluid) After those items requiring approval are submitted using the fluid pages, the content section on the profile page is refreshed to show the *Pending Approval* status for the item.

"Understanding the Content Catalog" (PeopleSoft HCM 9.2: Human Resources Manage Profiles)

"Understanding Profile Management" (PeopleSoft HCM 9.2: Human Resources Manage Profiles)

**Prerequisites**

Before employees and managers can use the profile management self-service transactions, you must set up the following:

- Define the content catalog.
- Define your profile types.
- (Optional). Define profile groups.
- (Optional). Define and configure approvals for profiles.
  
  The use of approval processing for profiles is optional. You associate approvals workflow to profile types.

- Define search types and run the Build Manager List and Build Profile Search Indexes processes required by the profile search and compare feature.
- Set up the text on the self-service pages.

  The profile management self-services pages use the Text Catalog. You can modify the delivered text to meet your organization's business needs. See "Configuring the Text Catalog" (PeopleSoft HCM 9.2: Application Fundamentals).

- Configure the Direct Reports functionality for your organization.

  The manager self-service options for profile management use the direct reports functionality to determine managers' direct reports. See "Configuring Direct Reports Functionality" (PeopleSoft HCM 9.2: Application Fundamentals).

</tbody>
</table>
### Understanding Profile Approvals

The use of approvals processing with profiles is optional. If your organization uses approvals processing, it is configured at the profile type level. An approval definition is selected for a profile type on the Profile Types - Attributes page and you then specify whether a role for a content section requires approval on the Content Section page. For further information about defining profile types see "Creating Profile Group Types and Profile Groups" (PeopleSoft HCM 9.2: Human Resources Manage Profiles).

If approval is required for a content section role, any additions, updates or deletions trigger approvals workflow. The PeopleSoft application delivers approval definitions for person profiles that are configured so that when employees update or create a profile, their manager approves changes. However, you can create approval definitions to configure approvals according to your requirements.

Managers use the Approval Profiles page to view approvals and they approve or deny changes at the profile level. Employees can track their own approvals using the Profile Approval History component - Approve Profiles page.

### (Classic) Viewing and Updating Job Profiles

Employees can view how the their profile compares to their job profile using the My Job Profiles component. Employees and manager can also view other job profiles within the organization using the View Job Profiles and Maintain Job Profiles components.

**Note:** To access these self service tiles and components, the user must be assigned these roles:

—Employee: Profile Mgmt Employee

—Manager: Profile Mgmt Manager

This topic discusses viewing and updating job profiles using the classic user interface.
### Pages Used to View Job Profiles Using the Classic User Interface

<table>
<thead>
<tr>
<th>Page Name</th>
<th>Definition Name</th>
<th>Usage</th>
</tr>
</thead>
<tbody>
<tr>
<td>Select Profile Page</td>
<td>JPM_JP_REL_PRF_EMP</td>
<td>Lists the profiles that are associated with the employee's job. Employees select the job profile that they want to view or use in the search and compare. This page is only displayed if there are two or more active job profiles related to the employee. If there is only one active job profile, this page is not displayed. The system determines which job profiles are related to an employee by searching the employee's job data record. If the employee has multiple jobs, the system checks all the person's active jobs for matching profiles.</td>
</tr>
<tr>
<td>Select a Profile Page</td>
<td>JPM_Com_PROF_SRCH</td>
<td>Employees and managers search for a job profile by either selecting a profile type or entering a profile name. They can view job profiles that are defined as end profiles. This is defined in the profile type definition on the Profile Type - Attributes page. From the list of profiles, employees and managers click the profile name to view the profile details. Managers can create a new profile by clicking the Add a Profile link on this page through the Maintain Job Profiles component. This link is not available to employees.</td>
</tr>
<tr>
<td>Add Profiles Page</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Add Profiles for a team member Page</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Maintain Job Profiles Page</td>
<td>JPM_MGRSS_PROFL1C</td>
<td>Managers select the profile type for the new profile. The system then displays the content sections that are set up for the selected profile type. The system displays only those content sections that are authorized for the manager role in the profile type definition. Managers can also use this page to create and edit job profiles. If the manager clicks the Edit icon for the item, the system opens up the Update &lt;content type&gt; page and makes the fields available for edit. Managers can only update content sections to which they have update access, as defined on the Content Section page in the profile type definition.</td>
</tr>

</tr>
<tr>
<td>View Job Profiles Page</td>
<td>JPM_MGRSS_PROFLIC</td>
<td>Displays the job profile that the employee selected. The system displays only those content sections that are authorized for the employee role in the profile type definition.</td>
</tr>
<tr>
<td>View &lt;content type&gt; Page</td>
<td>JPM_ITM_EMPDTL_SEC</td>
<td>Displays the details of a profile item. The fields on this page vary according to the content type of the item. Managers can update this information. Changes that require approval are submitted for approval processing when the manager clicks the Submit button on the Job Profiles - Summary of Changes page.</td>
</tr>
<tr>
<td>Add New &lt;content type&gt; Page</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Update &lt;content type&gt; Page</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Content Item Details Page</td>
<td>JPM_CAT_ITEMS_DSP</td>
<td>View details about a specific content item.</td>
</tr>
<tr>
<td>Rating Model Page</td>
<td>HCR_RATEMDL_POPUP</td>
<td>Displays the rating model details of the selected profile item. When accessing the page from the update or add new pages, the you can modify the rating as well.</td>
</tr>
<tr>
<td>Related Items Page</td>
<td>JPM_PROF_SSRELITMS</td>
<td>Displays details of the selected profile item that is related to the profile item.</td>
</tr>
<tr>
<td>Add New Profile Identity Page</td>
<td>JPM_MGRPID_SEC</td>
<td>Add or edit profile identities associated with the profile.</td>
</tr>
<tr>
<td>Update Profile Identity Page</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Summary of Changes Page</td>
<td>JPM_JP_NPSUMM_SEC</td>
<td>Lists the changes that the manager has made to the job profile that require approval. The manager clicks the Submit button next to the Items awaiting submission link to submit the changes for approval or click Cancel to return to the Maintain Job Profiles page. The Cancel button will retain the changed items with a Saved status.</td>
</tr>
</tbody>
</table>
(Classic) Maintaining Interest Lists

Interest lists enable employees and managers to identify jobs that are of interest to the employee. Each employee has one interest list that is accessed by the employee, the employee's manager, and the profile administrator.

Employees can add profiles to their interest list using the My Interest List component, when viewing job profiles, or from the Search Results page. Similarly, managers can view and update their employees' interest lists using the Team Interest Lists component or they can add a profile to an employee's interest list while viewing job profiles.

Employees and managers can only delete a job profile from the interest list if they added the profile to the list (shown in the Assigned By field).

Note: To access these self service tiles and components, the user must be assigned these roles:
—Employee: Profile Mgmt Employee
—Manager: Profile Mgmt Manager

This topic lists the pages used to maintain interest lists using the classic user interface.

# (Classic) Searching and Comparing Profiles

## Pages Used to Search and Compare Profiles Using the Classic Pages

<table>
<thead>
<tr>
<th>Page Name</th>
<th>Definition Name</th>
<th>Usage</th>
</tr>
</thead>
<tbody>
<tr>
<td>Search for Profiles Page</td>
<td>JPM_SRCH_TRANSFER</td>
<td>Lists the search types that are available to the employee or manager. Searches are defined on the Search Configuration page. Employees or managers select the search that they want to run by clicking the search name link.</td>
</tr>
<tr>
<td>Search and Compare Profiles - Select a Profile Page</td>
<td>JPM_COM_PROF_SRCH</td>
<td>This page is displayed if an employee or manager selects a search that has a source profile type with profile usage of <em>End/Final/Job</em> (non-person profile). The page displays the default source profile type that is defined for the search. Employees and managers use this page to search for, and select, the profile that they want to use as the source profile.</td>
</tr>
<tr>
<td>My Job Profiles - Select Profile Page</td>
<td>JPM_IP_REL_PRF_EMP</td>
<td>Lists the profiles that are associated with the employee's job. Employees select the job profile that they want to use in the search and compare. This page is only displayed if there are two or more active job profiles related to the employee. If there is only one active job profile, this page is not displayed. The system determines which job profiles are related to an employee by searching the employee's job data record. If the employee has multiple jobs, the system checks all the person's active jobs for matching profiles.</td>
</tr>
<tr>
<td>Search and Compare Profiles Page</td>
<td>HR_DR_ADDL_INFO</td>
<td>This page is available when a manager selects a search that populates criteria from a team member's profile. Displays the instructions for the transaction and the effective date field. Managers can change the default effective date.</td>
</tr>
<tr>
<td>Search and Compare Profiles - Select Employees to Process Page</td>
<td>HR_DR_SELECT_EMPS</td>
<td>Displays a list of the people who report to the manager. Managers select the person to use in the search and click Continue.</td>
</tr>
<tr>

<td>Definition Name</td>
<td>Usage</td>
</tr>
<tr>
<td>---------------------------------</td>
<td>-----------------------------</td>
<td>-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------</td>
</tr>
<tr>
<td>Search Criteria Page</td>
<td>JPM_SRCH_CRITERIA</td>
<td>Displays the search criteria for the search that the employee or manager selected on the Search for Profiles page. If the search selected has a criteria rule of Default, No Display the system runs the search without displaying this page; for this type of search employees and managers can view the search criteria after running the search by selecting the Modify Search Criteria link on the Search Results page. Employees and managers use this page to view and modify the search criteria before running the search. They also use this page after running a search to modify the search criteria and rerun a search. When the employee or manager clicks the Search button, the system runs the search using the criteria defined on the page.</td>
</tr>
<tr>
<td>Search Results Page</td>
<td>JPM_SRCH_RESULT</td>
<td>Displays the results of the search. The page lists the profiles that best match the search criteria. The value in the score column indicates how well the profile matches the criteria. The system lists the matching profiles according to their score, the highest score listed first and then in descending order of score.</td>
</tr>
<tr>
<td>Match Result Page</td>
<td>JPMCOMPARE_RESULT</td>
<td>Displays a comparison of the search criteria and the selected profiles. The left hand column lists each search criterion. The remaining columns list the percentage scores for each profile that indicate how well the profile matches that criterion.</td>
</tr>
<tr>
<td>Add to Interest List - Confirmation Page</td>
<td>JPM_INT_CONFIRM</td>
<td>Displays the profiles that have been added to the employee's interest list.</td>
</tr>
</tbody>
</table>

**Understanding Search and Compare Profiles**

Employees and managers use the Search and Compare Profiles component to search for profiles that match certain search criteria. When employees and managers select this option, the system lists the search types that are defined for their role. Search types are configured on the Define Search Configuration page for the profile types that you have defined. (In the classic pages navigate to Set Up HCM > Product Related > Profile Management > Define Search Configuration.) For further information about setting up Search and Compare Profiles, see "Understanding Setting Up Search and Compare Profiles" (PeopleSoft HCM 9.2: Human Resources Manage Profiles).

Depending on how the search is configured, employees and managers can set up or modify the search criteria before running the search. The system assigns matching profiles a score that indicates how well the profile matches the search criteria. For further information about how the system calculates the scores,
see "Understanding Search and Compare Profile Scores Using the Classic Pages" (PeopleSoft HCM 9.2: Human Resources Manage Profiles).

The Search Results page lists the matching profiles in descending score order, with the highest scoring profile listed first. Employees and managers can compare profiles listed on the Search Results page with the search criteria either by clicking the score link for a profile or using the Compare Profiles button to compare more than one profile. The comparison provides a list of each item in the search criteria with the score for the matching profile.

### Using the PeopleSoft Fluid User Interface to Manage Profile Data as an Employee and Manager

This topic lists the pages that employees and managers can access from a single location in the PeopleSoft Fluid User Interface to access profile tasks for themselves or their team members.

For general information about fluid pages in PeopleSoft HCM, see "Understanding PeopleSoft Fluid User Interface Home Pages" (PeopleSoft HCM 9.2: Application Fundamentals).

This video provides an overview of the talent profile self-service tiles and dashboards for employees and managers:

![Image Highlights, PeopleSoft HCM Update Image 37: Talent Profile Self Service Enhancements](image)

### Pages Used to Manage Profile Data as an Employee and Manager Using Fluid

<table>
<thead>
<tr>

</tr>
</tbody>
</table>

### My Profiles Tile

Employees use the My Profiles tile to access the My Profiles dashboard, where they can view and maintain various profile transactions for themselves.
Note: To access these self service tiles and components, the employee must be assigned the Profile Mgmt Employee Fluid role.

Navigation

The My Profiles tile is delivered as part of the Employee Self Service home page, but the location can change if you change the delivered home pages or if employees personalize their home pages.

Image: My Profiles Tile

This example illustrates the My Profiles tile.

Employees click the My Profiles tile to access the My Profiles Dashboard and select from tiles to view and maintain profile data related to themselves.

My Profiles Dashboard

Use the My Profiles dashboard (HC_JPM_EE_DASHBOARD) to select from tiles to view and maintain profile data related to the logged in user.

Navigation

Click the My Profiles Tile, which is delivered as part of the Employee Self Service home page, but the location can change if you change or personalize the home pages.
Image: My Profiles Dashboard

This example illustrates the My Profiles dashboard.

<table>
<thead>
<tr>
<th><strong>Tile Name</strong></th>
<th><strong>Usage</strong></th>
</tr>
</thead>
<tbody>
<tr>
<td>&quot;Search and Compare Profiles Tile&quot; (PeopleSoft HCM 9.2: Human Resources Manage Profiles)</td>
<td>Access and search for profiles that match selected search criteria and compare those profiles.</td>
</tr>
<tr>
<td>Talent Profile Tile</td>
<td>Access the fluid pages where you can view and update your person talent profile.</td>
</tr>
<tr>
<td>My Job Profiles Tile</td>
<td>View your job profile using fluid.</td>
</tr>
<tr>
<td>My Interest List Tile</td>
<td>View and manage a list of job profiles in your interest list. You can also compare profiles within your list to determine the degree of a fit.</td>
</tr>
<tr>
<td>View Job Profiles Tile (for Employees)</td>
<td>View job (non-person) profiles using fluid.</td>
</tr>
</tbody>
</table>

Team Profiles Tile

Managers use the Team Profiles tile to access the Team Profiles dashboard, where they can view and maintain various profile transactions related to their team.
Note: To access these self service tiles and components, the manager must be assigned the Profile Mgmt Manager Fluid role.

Navigation

The Team Profiles tile is delivered as part of the Manager Self Service home page, but the location can change if you change the delivered home pages or if managers personalize their home pages.

Image: Team Profiles Tile

This example illustrates the Team Profiles tile.

Managers click the Team Profiles tile to access the Team Profiles Dashboard and select from tiles to view and maintain profile data related to their team.

Team Profiles Dashboard

Use the Team Profiles dashboard (HC_JPM_MGR_DASHBOARD) to select from tiles to view and maintain profile data related to your team.

Navigation

Click the Team Profiles Tile, which is delivered as part of the Manager Self Service home page, but the location can change if you change or personalize the home pages.
**Image: Team Profiles Dashboard**

This example illustrates the Team Profiles dashboard.

This Team Profiles dashboard enables managers to access frequently-used Profile Management components from one location.

The dashboard lists the components collected under these tiles:

<table>
<thead>
<tr>
<th><strong>Tile Name</strong></th>
<th><strong>Usage</strong></th>
</tr>
</thead>
<tbody>
<tr>
<td>&quot;Search and Compare Profiles Tile&quot; (PeopleSoft HCM 9.2: Human Resources Manage Profiles)</td>
<td>Access and search for profiles that match selected search criteria and compare those profiles.</td>
</tr>
<tr>
<td>Team Talent Profile Tile</td>
<td>Access the fluid pages where you can view and update your team member’s talent profiles.</td>
</tr>
<tr>
<td>Maintain Job Profiles Tile (for Managers)</td>
<td>View and manage job (non-person) profiles using fluid.</td>
</tr>
<tr>
<td>Team Interest List Tile</td>
<td>View and manage a list of job profiles in an employee's interest list. You can also compare profiles within the list to determine the degree of a fit.</td>
</tr>
</tbody>
</table>

**(Fluid) Maintaining Person Profiles**

This topic provides an overview of using fluid pages for viewing profiles, lists additional profile actions, and discusses how employees and managers use the PeopleSoft Fluid User Interface to view and maintain profile data.
Chapter 2 Maintaining Person Profiles

Note: The fluid pages discussed in this topic do not have an exact classic equivalent, but they function much like the My Current Profile and View Current Team Profiles pages that are discussed in the topic (Classic) Maintaining Person Profiles as an Employee or Manager.

For general information about fluid pages in PeopleSoft HCM, see "Understanding PeopleSoft Fluid User Interface Home Pages" (PeopleSoft HCM 9.2: Application Fundamentals)

These videos demonstrate the Manage Profile enhancements:

- Image Highlights, PeopleSoft HCM Update Image 25: Manage Profile Enhancements
- Image Highlights, PeopleSoft HCM Update Image 27: Attachment Capability Added to Profile Management
- Image Highlights, PeopleSoft HCM Update Image 28: Manage Profiles-Viewing Historical Profile Items in Fluid

</tr>
</tbody>
</table>

**Understanding Fluid Pages for Viewing Profiles**

Users can have many profiles. The Talent Profile and Team Talent Profile pages display by default information from the profile that is defined as the system’s primary person profile default type. The primary person default profile type is specified on the "Assign Profile Type Defaults Page" (PeopleSoft HCM 9.2: Human Resources Manage Profiles). After an employee or manager accesses the talent profile pages for the employee, they can select the View Another Profile link in the header (sub-banner) of the page so select from other valid profile types.

The fluid pages for viewing profiles are simplified for usability. In particular:

- Users do not have "Save as Draft" functionality for content items, nor can users access content items that were saved as draft in classic pages.
• Fluid pages show only the fields (properties) where the Detail attribute is selected on the "Content Section Page" (PeopleSoft HCM 9.2: Human Resources Manage Profiles), regardless of whether the Summary attribute is selected.

Roles to Access Talent Profile Pages in Fluid

The PeopleSoft application delivers the following roles to access the profile tiles and pages:

• Employees need to be assigned the Profile Mgmt Employee Fluid to access the Talent Profile tile and pages.

• Managers need to be assigned the Profile Mgmt Manager Fluid to access the Team Talent Profile tile and pages.

Accessing Additional Profile Actions

From the Talent Profile and Team Talent Profile pages in fluid, additional actions are available from these menu options:

• Actions menu (three dot icon on the right side of the page banner)

• Related Actions menu, Development menu item (dropdown icon next to the employee’s name)

(Actions) menu icon

(Available for the manager and employee) The main fluid Actions menu includes this one page-specific action. Print Profile: Perform this action to generate the Person Profile report (JPM_JPPP_RPT). This is a PDF that shows all current items in a person’s profile. It is the same report that administrators run from the Person Profile Report page (Workforce Development >Profile Management >Reports >Person Profile Report).

(Related Actions) icon button

The Related Actions > Development menu item gives the user access to several actions to manage profile data. These actions take the user to pages for performing profile comparisons and manage profile data. These actions may include:

• View My Historical Profile (Employee) or View Team Historical Profiles (Manager): View your own or a team member’s profile data as of a given date.

• View My Job Profiles (Employee) or View Employee Job Profiles (Manager): View all the job profiles that the system identifies as related to your or a team member’s Job data.

• My Interest List (Employee) or Team Interest List (Manager): View and add job profiles to your or your team member’s interest list.

• Search and Compare Profiles (both): Search for or compare a variety of profiles.
• *Compare My Profile* (Employee) or *Compare Employee Profiles* (Manager): Compare your or a team member’s person profile with their own job profile.

• *Copy Job Items* (both): Copy content items that are part of your or a team member’s job profile.

For additional information on copying job items into a person’s profile, see the following topic.

**Copying Job Items into a Person’s Profile**

The Talent Profile and Team Talent Profile pages allow you to view or manage talent profile data for yourself or your direct reports, based on your role and privileges. This includes being granted the ability to add or update content items to a person’s profile. To streamline the process of creating and maintaining a person’s profile data in fluid, the system also allows you to automatically copy job items that have been defined for a non-person profile (job profile related to the person’s job) into the person’s profile.

To copy items from a related job profile into a person’s profile, do the following:

1. From a person’s profile page, select the *Related Actions* drop-down menu icon next to the person’s name, select the *Development* menu item, then select the *Copy Job Items* option.

**Image: Example of Copy Job Items**

This example illustrates how to select the Copy Job Items option from the Related Actions, Development menu.

2. The system searches for profile content related to the person's job. When the person’s job is related to more than one job profile, the system will display the *My Job Profiles Page*.
Chapter 2 Maintaining Person Profiles

**Note:** If only one job profile is related to this person’s job, the system skips this step and goes immediately to the Copy Job Items Page.

Select the job profile from which you want to copy items.

3. The Copy Job Items Page displays those items that are part of the job profile, but are not yet part of the employee’s profile.

Select those items you want to add to the person’s profile.

**Note:** Some content items may require that you enter additional information before you can add them to a profile. For example, maybe competencies require that you identify the person’s proficiency level for each item before saving. When updates are required, the Copy Status field displays *Update <Content Type>* to indicate that additional data must be entered.

4. Update items and related-items, as needed.

**Note:** While some items require that you update information, you can update other item details as well. For example, you may want to enter the person’s major under their Bachelor of Arts profile item.

a. Click the Update Details (pencil or three dotted menu) icon. This will allow you to update item details.

b. Update all required and pertinent fields for the item and click Done.

c. Repeat these steps for each item showing a status to update or for those items where you want to include additional information.

5. When all selected items show a Copy Status of *Ready to Copy*, click the Copy Items button on the Copy Job Items page.

6. Review the items you identified to copy on the Copy Profile Items Page and do one of the following:

   • Click Cancel to return to the Copy Job Items page and make edits.

   • Click Submit to add the items to the person’s profile.

7. The system returns you to the Copy Job Items Page in display only mode where you can view the status of the copy.

   • When an item requires approval to be added to a profile, the status indicates that it has been submitted for approval.

   • For those items that do not need approval, the system automatically adds the profile items to the person’s profile with a status of *Saved*.

**Talent Profile Tile**

As an employee, use the Talent Profile tile to access the fluid pages where you can view and update your person talent profile.
Note: You must be assigned the Profile Mgmt Employee Fluid role to access this tile and pages.

Navigation

The Talent Profile tile is delivered as part of the My Profiles Dashboard, but you can add the tile to any home page through personalizations.

Image: Talent Profile tile

This example illustrates the Talent Profile tile.

Select the Talent Profile tile to access the employee self-service profile data transactions easily without using traditional menu navigations.

Team Talent Profile Tile

As a manager, use the Team Talent Profile tile to access the fluid pages where you can view and update your team member’s talent profiles.

Note: You must be assigned the Profile Mgmt Manager Fluid role to access this tile and pages.

Navigation

The Team Talent Profile tile is delivered as part of the Team Profiles Dashboard, but you can add the tile to any home page through personalizations.
Image: Team Talent Profile tile

This example illustrates the Team Talent Profile tile.

Click the Team Talent Profile tile to access the manager self-service profile data transactions easily without using traditional menu navigations.

Team Talent Profile - Find Team Member Page (for Managers)

Use the Team Talent Profile- Find Team Member page (HR_PSEL_FLU) to select one of your direct report team members to view summary information about his or her profile data.

Navigation

- Click the tile Team Talent Profile Tile.
- Click the Select Different Employee link in the sub-banner of the Team Talent Profile pages.
Image: (Tablet) Team Talent Profile - Find Team Member Page

This example illustrates the Team Talent Profile - Find Team Member for the tablet.

The Team Talent Profile - Find Team Member page displays all direct reports of the logged-in manager based on that manager’s job.

For descriptions of fields and controls on this page, see the "(Fluid) <Transaction Name> - Find Team Member Page" (PeopleSoft HCM 9.2: Application Fundamentals) documentation.

Talent Profile Page (for Employees) or Team Talent Profile Page (for Managers)

Use the Talent Profile or Team Talent Profile page (JPM_PERS_PROFL_FLU) to view summary information about your own profile data or one of your direct report’s profile data.

Note: Although employees and managers access the talent profile pages differently and the header page name varies, the pages are the same. However, the security configuration settings for the role of employee and manager may vary. For information on role security for profiles, see the “Setting Up Profile Types,” "Content Section Page" (PeopleSoft HCM 9.2: Human Resources Manage Profiles) documentation.

This video demonstrates the Profile Management role security for content sections:

Image Highlights, PeopleSoft HCM Update Image 31: Enhanced Security for Profile Management
Navigation

As an employee:

• Click the Talent Profile Tile.
• Self Service >Learning and Development >Talent Profile
• Select the Related Actions button next to your name and select Development >Talent Profile.
• Select the Talent Profile tab from within the OnBoarding pages.

Note: This option is available only when the employee has an OnBoarding instance open.

As a manager:

• Click the Team Talent Profile tile, select an employee from the Team Talent Profile - Find Team Member Page (for Managers).
• Manager Self Service >Learning and Development >Team Talent Profile
• Select the Related Actions button next to your employee’s name and select Development >Team Talent Profile.
• Select the Related Actions button next to your employee’s name and select the OnBoarding Status item link. Select the Talent Profile tab pages.

Note: The OnBoarding Status item displays in the Related Actions menu only when the employee has an OnBoarding instance open.
Image: (Tablet) Talent Profile page: Competencies tab for an Employee

This example illustrates the Talent Profile page for Competencies for the tablet when approvals are required and an employee makes changes to competencies. Hence, this example shows the Submit for Approval button and a New status for an item. It also shows the Sub-Competencies column, which is a Related Item field.
This example illustrates the Team Talent Profile page for Competencies for the tablet when approvals are required and the manager makes changes to competencies. Hence, this example shows the Submit for Approval button and a New status for an item. Those items that have a Pending Approval status have already been submitted for approval.
Image: (Smartphone) Team Talent Profile page: Competencies tab

This example illustrates the Team Talent Profile page for Competencies for the smartphone when approvals are required and a manager makes changes to competencies. Hence, this example shows approval–related fields. The employee Talent Profile page works the same.
Image: (Smartphone) Talent Profile page: Qualifications category tab heading

This example illustrates the Talent Profile page for the Qualifications tab and categories for the smartphone when an employee is viewing his or her own profile. The Qualifications tab includes multiple content types, so this example shows the content type panel with the Qualifications tab expanded to show the list of included content types on the left, and the page with the panel collapsed. The manager Team Talent Profile page works the same.
Maintaining Person Profiles Chapter 2

Image: (Tablet) Team Talent Profile page: Qualifications - Licenses and Certifications tab

This example illustrates the Team Talent Profile page for the Qualifications - Licenses and Certifications tab for the tablet when a manager is viewing the profile. The Qualifications tab includes multiple content types (or sub-tabs), so this example shows the page when the Qualifications tab has been expanded to show the list of included content types. The employee Talent Profile page works the same.

Header (Sub-Banner)

The Talent Profile and Team Talent Profile pages include the common employee self-service header. This header includes the employee’s name, job title, and photo (if available),

See "Common Header for Employee Self-Service Pages" (PeopleSoft HCM 9.2: Application Fundamentals).

The header will also contain the following, depending on whether you are accessing the profile data as an employee or manager:

(Related Action) icon button

Click the related actions icon next to the employee’s name to access additional self-service transactions.

Select Related Actions > Development to view and manage profile related actions, including copying job profile items into this person’s profile.

See the Accessing Additional Profile Actions for more information on Related Action options specific to managing profiles.

Select Different Employee

(Manager view only) Click the Select Different Employee link in the sub-banner of the Team Talent Profile pages to return to the Team Talent Profile - Find Team Member Page (for Managers) and choose another person for viewing profile data.
Chapter 2 Maintaining Person Profiles

Profile Type and View Another Profile

The header displays by default the primary person profile type as defined on the "Assign Profile Type Defaults Page" (PeopleSoft HCM 9.2: Human Resources Manage Profiles). To view or update information for a different profile type for this person, select the View Another Profile link to open the Select Profile Type Page.

This video demonstrates the support for multiple profiles:

![Image Highlights, PeopleSoft HCM Update Image 28: Manage Profiles-Support for Multiple Profiles]

Select this icon to view information about this page and the different methods to add and maintain profile data.

In short, you can add or update profile items using the following methods:

- Related Actions icon >Development >Copy Job Items: Enables you to add items that are related to this person’s job.
- Add button: Manually add items to the person’s profile.
- Edit/View button: View, update, or delete an existing item.

Tabs and Content Types

The administrator who sets up a profile type chooses which content types to include and organizes those content types into category tabs.

Important! The application delivers the fields that appear as the column headers within the content summary grid and cannot be configured to display through the "Content Section Page" (PeopleSoft HCM 9.2: Human Resources Manage Profiles), Summary option selection on the Property Attributes tab.

On the Talent Profile (for the employee) and Team Talent Profile (for the manager) pages, the tabs for the specified person profile type are listed in the left panel. If a tab represents one content type, selecting the tab name displays summary information about the content items in the profile. Tabs with multiple content types expand when you select them, and the included content types are listed underneath the main tab heading, and the first one is selected (that is, its content appears to the right). For these second-level content types, the number of content items appears as part of the tab label. Tabs and content sections appear in the order that is defined for the profile type and will vary based on the configuration of the profile type you have selected.

See the "Profile Types - Content Page" (PeopleSoft HCM 9.2: Human Resources Manage Profiles) for more information on adding tabs and content sections.

When you select a tab, the page displays the content section to which you have been granted role security access under the Employee (Talent Profile page) or Manager (Team Talent Profile page) profile roles (see the Role Security configuration on the "Content Section Page" (PeopleSoft HCM 9.2: Human Resources Manage Profiles)).
**Content Items**

Selecting a content type on the left panel displays the associated content items in the main panel. For example, selecting the Competencies content type on the left panel causes the main panel to list the specific competencies in the profile. These content items then appear in alphabetical order.

The configuration option to allow self-service updates can apply to an entire content type. Alternatively, it can be applied on an instance qualifier such as the evaluation type field for Competencies. For example, with the delivered configuration for Competencies, employees can update content times where the evaluation type is *Self* but they cannot update content items where the evaluation type is *Supervisor/Manager* or *Approved/Official*. Likewise, managers can update content types where the evaluation type is *Supervisor/Manager* but they cannot update content items where the evaluation type is *Self* or *Approved/Official*. Under this configuration, selecting self-evaluated competencies opens an editable detail page (*<Content Type> Page*), but selecting an official competency evaluation opens it as a read-only detail page.

If self-service updates are not allowed, the list of content items does not include an Add button or icon, and selecting an existing content item displays a read-only detail page that does not have a Delete button.

Click this button to access the *<Content Type> Page* and add item details.

**Proficiency**

This column or graph displays for certain content types, such as competencies, where you rate an employee ability.

Displays a graphical representation of the user’s proficiency. In this graph, green indicates that the user’s proficiency exceeds the job requirement, gray indicates that the proficiency meets the job requirement, and red indicates that the proficiency is below the job requirement.

A row displays this button when multiple effective dated rows exist for the content item.

Click this button to access the *View Profile Item History Page* and select from a list of historical rows to view.

**Note:** You cannot make changes to an item when you access it from the View History button. Select the Edit/View button to make changes to a non-historical row.

This video demonstrates viewing historical data:

*Image Highlights, PeopleSoft HCM Update Image 28: Manage Profiles-Viewing Historical Profile Items in Fluid*

**Sub-Competencies or Elements**

(Related Content Type) column

Select this link to manage the related content items (see *<Related Content Type> (Summary) Page*).
Note: When set up to use related items, the page will display an additional column. Related items (parent/child relationships) must be set up for a content item on the "Content Items - Relationships Page" (PeopleSoft HCM 9.2: Human Resources Manage Profiles) and added as a sub-section on a person profile type "Profile Types - Content Page" (PeopleSoft HCM 9.2: Human Resources Manage Profiles) for the content type in order for this column and related item link to appear. The name of the link varies based on the child relationship of the content type. For example, if a profile type is set up to use the Sub-Competencies sub-section under the Competencies content type, then the column heading will display Sub-Competencies when viewing the Competencies items, as shown in the previous example.

This video demonstrates the Manage Profile enhancements for related items:

![Image Highlights, PeopleSoft HCM Update Image 25: Manage Profile Enhancements](image)

Click this button to view the current row of information for this item.

If a content type is configured to allow employees or managers to make updates in self-service, the employee or manager can add, update, and delete content items for their corresponding evaluation type. Selecting an individual item opens an editable detail page (<Content Type> Page). However, updates cannot be made to evaluation types that do not match the user’s authorized evaluation type or to historical rows.

To delete an item, use the Delete button on the detail page. Content items are effective-dated, so deleting a content item that has historical data causes the most recent historical row to become current.

When employees or managers have attachments enabled, they can also view attachments. To add, update, or delete attachments for a content item, the manager or employee must be assigned the Update Attachments value for their role within the profile for this content section.

For information on setting up role access to update or add attachments to a content item, see the "Content Section Page" (PeopleSoft HCM 9.2: Human Resources Manage Profiles).

Approvals

Submit for Approval

If approvals are required for content item changes, the detail page where the user makes changes has a Continue button instead of a Save button. When the user clicks the Continue...
button to return to the main Talent Profile or Team Talent Profile page, the list of content items displays a Submit for Approval button. The user can continue to update additional content items (for a single content type) without submitting changes. When the user clicks the Submit for Approval button, the Request Approval Page appears. The user can add comments on this page and then submit the consolidated approval request.

After a user modifies a content item that requires approval, the detail page for that content item is read-only, even if the changes have not yet been submitted. The user cannot make further modifications until the original changes are submitted and approved.

To cancel changes without submitting, the user can navigate to another tab and then click No in the message asking whether to save changes first.

Note: Approving managers review approval requests for Person Profile and Non-Person Profile fluid transactions using the Pending Approvals - Person Profile Page or Pending Approvals - Non-Person Profile Page.

**Status**

This column is visible only if the user has made changes that have not yet been approved.

Before the changes are submitted for approval, the status indicates the type of change that the user made: New, Update, or Delete.

After the changes are submitted, the status is Pending Approval. After the changes are approved, the Status field is blank. If the Status field is blank for all content items, the Status column is not visible.

Understanding Profile Maintenance

"Managing Interest Lists" (PeopleSoft HCM 9.2: Human Resources Manage Profiles)

**Select Profile Type Page**

Use the Select Profile Type page (JPM_PROFTYP_SEL_FL) to choose from a list of valid Person profile types for which you want to view or update other profile information for yourself (from the Talent Profile pages) or for one of your direct reports (from the Team Talent Profile pages).

**Navigation**

Select the View Another Profile link from the sub-banner header of the Talent Profile Page (for Employees) or Team Talent Profile Page (for Managers).
Chapter 2 Maintaining Person Profiles

Image: Select Profile Type page

This example illustrates the Select Profile Type page.

![Select Profile Type page](image)

The page displays valid person profile usage types. The profile usage type of Person is assigned to profile types on the "Profile Types - Attributes Page" (PeopleSoft HCM 9.2: Human Resources Manage Profiles).

Select a profile type row to open the Talent Profile Page (for Employees) or Team Talent Profile Page (for Managers) and view or update the items associated with this profile for this person.

<Related Content Type> (Summary) Page

Use the <Related Content Type> (Summary) page (JPM_RLITMSUM_SCF) to view a list of related items assigned to this person for this content type.

**Note:** Where <Related Content Type> represents the name of the content type.

Navigation

Select the <related content type (#)> link for the content type on the Talent Profile Page (for Employees) or Team Talent Profile Page (for Managers).

**Note:** Related items (parent/child relationships) must be set up for a content item on the "Content Items - Relationships Page" (PeopleSoft HCM 9.2: Human Resources Manage Profiles) and added as a sub-section on the Person profile type "Profile Types - Content Page" (PeopleSoft HCM 9.2: Human Resources Manage Profiles) for the content type in order for a related item link to appear. The name of the link varies based on the child relationship of the content type.

Image: <Related Content Type> (Summary) page when no approval is required

This example illustrates the <Related Content Type> (Summary) page, where the related content type Sub-Competencies is shown as the page name, and when changes do not require approval.
Image: <Related Content Type> (Summary) page when approval is required

This example illustrates the <Related Content Type> (Summary) page when changes require approval.

The top of the page displays the content type and content item. The bottom of the page displays a list of this person’s related items for this content item, if any.

Click the Add (+) button or click a related item row to access the <Related Content Type> (Details) Page and add, view details, or delete an existing related item.

**Cancel**
Click to return to the Talent Profile or Team Talent Profile page without making any changes.

**Save**
This button appears when changes do not require approval.
Click to save changes and return to the Talent Profile or Team Talent Profile page.

**Continue**
This button appears when changes require approval.
When you click this button, the system will return you to the Talent Profile or Team Talent Profile page without submitting changes. You can continue making changes to other content items (within the same content type). To submit the changes, click the Submit for Approval button on the Talent Profile or Team Talent Profile page.

**Note:** You must click the Submit for Approval button to save the changes to the profile with a Pending Approval status. If you do not select the Submit for Approval button prior to navigating away from the content type, you will lose your changes.

**<Related Content Type> (Details) Page**

Use the <Related Content Type> (Details) page (JPM_ITMDTL_SCF) to add, view details, or delete related items for a profile content type.

Where <Related Content Type> represents the name of the content type.

**Navigation**
Select the Add button or click a related item row on the <Related Content Type> (Summary) Page.
Image: <Related Content Type> (Details) page

This example illustrates the <Related Content Type> (Details) page when you select an existing related item.

When adding a new related item, the fields will be available for entry. Only those content items that have been set up on the "Content Items - Relationships Page" (PeopleSoft HCM 9.2: Human Resources Manage Profiles) will be available for selection.

**Cancel**
Click to return to the <Related Content Type> (Summary) Page without making any changes.

**Continue**
Click this button to keep the changes you have entered. The system will return you to the <Related Content Type> (Summary) Page where:

- If the change does not require approval, you will click the Save button to make the change in the system.

- If the change requires approval, you should click the Continue button. You can continue making changes to other content items (within the same content type). To submit the changes, click the Submit for Approval button on the Talent Profile Page (for Employees) or Team Talent Profile Page (for Managers).

**Note:** You must click the Save button from the <Related Content Type> (Summary Page) or the Submit for Approval button from the Talent Profile or Team Talent Profile page in order to save your changes. Those changes not requiring approval will be automatically updated in the system upon save, while those requiring approval will be saved with a Pending Approval status upon submitting for approval.

**Delete**
When viewing an existing related item, the Delete button is available.

Click this button to remove this related item from the person’s profile.

**View Profile Item History Page**

Use the View Profile Item History page (JPM_ITM_HIST_SCF) to select from a list of effective dated rows to view historical data for a profile content item.
Navigation

Select the View History button for a content item on the Talent Profile Page (for Employees) or Team Talent Profile Page (for Managers).

Image: (Tablet) View Profile Item History page

This example illustrates the View Profile Item History page for a tablet.

<table>
<thead>
<tr>
<th>Effective Date</th>
<th>Competency</th>
</tr>
</thead>
<tbody>
<tr>
<td>02/07/2000</td>
<td>Develop &amp; implement solutions</td>
</tr>
<tr>
<td>06/07/1999</td>
<td>Develop &amp; implement solutions</td>
</tr>
<tr>
<td>10/05/1998</td>
<td>Develop &amp; implement solutions</td>
</tr>
</tbody>
</table>

Image: (Smartphone) View Profile Item History page

This example illustrates the View Profile Item History page for a smartphone.

<table>
<thead>
<tr>
<th>Effective Date</th>
<th>Competency</th>
</tr>
</thead>
<tbody>
<tr>
<td>02/07/2000</td>
<td>Develop &amp; implement solutions</td>
</tr>
<tr>
<td>06/07/1999</td>
<td>Develop &amp; implement solutions</td>
</tr>
<tr>
<td>10/05/1998</td>
<td>Develop &amp; implement solutions</td>
</tr>
</tbody>
</table>
Click the arrow button at the end of the row to access the <Content Type> Page and view details for an effective dated row. Historical rows are display only with a message at the top of the page stating that they cannot be updated.

**Note:** You cannot make changes to an item when you access it from the View Profile Item History page. Select the Edit/View button from the Talent Profile Page (for Employees) or Team Talent Profile Page (for Managers) to make changes to a non-historical row.

### <Content Type> Page

Use the <Content Type> page (JPM_ITMDTL_SCF) to add, update, or delete information for a profile content item. You can also add attachments to support the content item information.

**Note:** The page title changes based on the content type.

### Navigation

- Click the Add button or click the Edit/View button for a content item on the Talent Profile Page (for Employees) or Team Talent Profile Page (for Managers).
- Select a row from the View Profile Item History Page.

**Note:** Add, update and view options will vary based on how you access the item and on your Role Security access (see the Role Security subtopic under the "Content Section Page" (PeopleSoft HCM 9.2: Human Resources Manage Profiles) topic).

**Note:** This page is display only when you access it through the View History button navigation. To make updates to an item, you must use the Edit/View button navigation for a non-historical item to which you have been granted update access.

### Image: <Content Type> page when no approval is required

This example illustrates the <Content Type> page when changes do not require approval.
Image: <Content Type> page when approval is required

This example illustrates the <Content Type> page when changes require approval. The Delete button at the bottom of the page is not shown here.
Image: <Content Type> page for a historical row

This example illustrates the <Content Type> page for a profile item accessed through the historical view. These items are view only.

```
<table>
<thead>
<tr>
<th>Competencies</th>
</tr>
</thead>
<tbody>
<tr>
<td>This is a historical profile item and cannot be updated.</td>
</tr>
</tbody>
</table>
```

### Buttons

The page displays these buttons when the role of the user has been granted permission to update the profile content type for the evaluation type and is a non-historical row. For information on setting up role access to update a content item, see the "Content Section Page" (PeopleSoft HCM 9.2: Human Resources Manage Profiles).

- **Cancel**
  - Click to return to the Talent Profile or Team Talent Profile page without making any changes.

- **Save**
  - This button appears when changes do not require approvals.
  - Click to save changes and return to the Talent Profile or Team Talent Profile page.

- **Continue**
  - This button appears when changes require approval.
  - Click to tentatively save your changes and return to the Talent Profile or Team Talent Profile page. This will not submit the proposed changes. You can continue making changes to other content items (within the same content type category). However, to finalize and submit the changes within a content type category, you will need to click the Submit for Approval button on the Talent Profile or Team Talent Profile page. Changes you do not submit for approval will be discarded if you move to
another content type category or when you leave the profile pages.

**Effective Date** and **Add New Version** button

Enter updates directly on the current effective dated row without entering a new date to make changes to the existing row.

Click the Add New Version button to enter a new effective dated row. The Talent Profile or Team Talent Profile page will show this newer row instead of the older row. Note that when updating profile data, you cannot change the effective date to a date earlier than the date of the current record.

When a new effective-dated row is added and the previous effective-dated row has related content items associated with it, these related content items are automatically copied forward. The Effective Date field for the related content item detail cannot be updated since it must match the effective date of the parent item.

**[?] (Rating Detail) icon**

This icon appears when proficiency descriptions have been entered on the "Item Rating Descriptions Page" (PeopleSoft HCM 9.2: Human Resources Manage Profiles) for this content item.

Click this icon to open the Proficiency Descriptions Page and view the rating descriptions.

**Delete**

This button appears for existing rows when accessed through the View/Edit option.

Click this button to delete the content item from the profile.

**Profile Data**

The fields on the page vary depending on the content type. If a content item has country-specific fields, those fields appear within a collapsible country-specific section at the bottom of the page.

**Attachments**

The Attachments section appears when attachments have been enabled for the Employee role (for Talent Profile page) or the Manager role (for the Team Talent Profile page), and you have the role security access as define on the "Content Section Page" (PeopleSoft HCM 9.2: Human Resources Manage Profiles), Role Security section.
Image: <Content Type> page when attachments are enabled for viewing only

This example illustrates the <Content Type> page when attachments are enabled for viewing only for the role of the user.
Image: <Content Type> page when attachments are enabled for updating

This example illustrates the <Content Type> page when attachments are enabled for updating for the role of the user.

Use this section to manage attachments by uploading, deleting, or updating attachments.

Add Attachment or Click this button to access the File Attachment page and upload files.

Attachments Displays the file name. Select the file link to download and view the attachment.

Description (Optional) Enter a description when you first add the file. This field is not available for edit after you have saved the page.

Delete Attachment button Click this button to remove an attachment from this content type item.

Delete button This button is available when you select and existing item.

Click to remove this item from the profile.

Managers use fluid Approvals to view content item attachments for a Person Profile transaction request using the Profile Item Details Page.
The following video provides an overview and demonstration of the Fluid Attachment framework:

Image Highlights, PeopleSoft HCM Update Image 27: Attachment Capability Added to Profile Management

Proficiency Descriptions Page

Use the Proficiency Descriptions page (JPM_RTMDL_POPUP_FL) to view and select from a list of detailed descriptions for this content item.

Navigation

Select the Rating Details (?) icon after the Proficiency field for the content type on the <Content Type> Page.

Note: Proficiency descriptions must be set up for a content item on the "Item Rating Descriptions Page" (PeopleSoft HCM 9.2: Human Resources Manage Profiles) in order for the Related Details (?) icon to appear.

Image: Proficiency Descriptions page when no approval is required

This example illustrates the <Related Content Item> (Summary) page when changes do not require approval.

<table>
<thead>
<tr>
<th>Proficiencies</th>

Submit

Click to submit a consolidated approval request for all the changes listed on the page.

Comments

Optionally enter comments about the changes you made.

Managers can review approval requests for Person Profile and Non-Person Profile fluid transactions using the Pending Approvals - Person Profile Page or Pending Approvals - Non-Person Profile Page.

My Job Profiles Page

Use the My Job Profiles page (JPM_EMP_RELPROF_FL) to select a job profile from which you want to copy items.

Note: This page will not appear if the person’s job is related to only one profile.

Navigation

From the Talent Profile Page (for Employees) or Team Talent Profile Page (for Managers), select the Related Actions icon next to the employee’s name, select the Development menu item, then select Copy Job Item.
Image: My Job Profiles page

This example illustrates the My Job Profiles page.

Select this button to access the Copy Job Items Page and view and select from a list of profile items associated with this job that are not part of the employee’s profile.

Related Links
Accessing Additional Profile Actions

Copy Job Items Page

Use the Copy Job Items page (JPM_COPY_JOB_FL) to view and select items that are part of the person’s job profile but are not yet part of the employee’s profile.

Navigation

- Talent Profile Page (for Employees) or Team Talent Profile Page (for Managers), select the Related Actions icon next to the employee’s name, select the Development menu item, then select Copy Job Item..

Note: The Copy Job Items page immediately appears when the person’s job is related to only one profile.

- Select a job profile from the My Job Profiles Page.
Maintaining Person Profiles

Chapter 2

Image: Copy Job Items page

This example illustrates the Copy Job Items page.

Select All link

Select this link to select all the content items on this page.

☐ (Select) check box

Select this check box to individually select an item to add to the profile.

When you select an item that has related items, the system will automatically select the related items associated with this item.

To review or make changes to the related items, select the Update Details menu and select the Update <Related Content Type> link.

Sub-Competencies or Elements

This column and icon displays if related items are associated with a content item.

When related items are associated with a content item, the icon will first display how many related items have been selected to add to the person’s profile, and second, how many related items are associated with the job profile.

Note: The name of the column varies based on the child relationship of the content type. For example, if a profile type is set up to use Sub-Competencies, then the column heading will display the same.

Copy Status column

This value is populated when you select an item to copy and displays if an item is ready to be copied to the person’s profile.

Statuses include:

• Update <Content Type>: Indicates that there are required fields that need to be completed for this item before it can be copied to the person’s profile. For example, if competencies require that you specify a person’s proficiency rating when adding the item to their profile, this value will appear.
Chapter 2 Maintaining Person Profiles

- **Ready to Copy**: Indicates that the item can be copied to the person’s profile without needing to update the item.

**Note**: Although it may not be required to update an item, you can still use the Update Details (pencil) icon to make changes. For example, you may want to enter the person’s major for their Bachelor of Arts degree.

This icon displays if a related item is associated with a content item.

Select this menu icon to access the Update Details popup menu page and select the type of item you want to update. Options include:

- **Update <Content Type> link**
  
  Select this link to access the Profile Item Detail Page and make updates to the item as it pertains to the person.

- **Update <Related Content Type> link**
  
  Select this link to access the Copy Job Items - <Related Content Type> (Summary) Page to view and select from a list of related items assigned to the job item.

**Image: Update Details popup menu**

This example illustrates the Update Details icon and popup menu when related content is associated with an item.

Select this icon to access the Profile Item Detail Page and make updates to the item as it pertains to the person.

This button becomes available after all selected items have a Copy Status of *Ready to Copy*.

Select this button to be taken to the Copy Profile Items Page to view a summary of the items you are copying to the person’s profile.
Copy Job Items - <Related Content Type> (Summary) Page

Use the Copy Job Items - <Related Content Type> (Summary) page (JPM_CPY_RLITM_SCF) to view and select from a list of related items associated with this job content item and add them to the person’s profile.

Note: Where <Related Content Type> represents the name of the related content type.

Navigation

Click the Updated Details (three dots) menu icon on the Copy Job Items Page and select the Update <Related Content Type> link.

Image: Copy Job Items - <Related Content Type> (Summary) page

This example illustrates the Copy Job Items - <Related Content Type> (Summary) page, where the related content type Sub-Competencies is shown as the page header.

This page work similar to the Copy Job Items Page. See this topic for field and page element definitions.

Profile Item Detail Page

Use the Profile Item Detail page (JPM_COPYJOBITM_SCF) to make updates to an item to indicate the person’s qualifications and capabilities.

Navigation

• Click the Update Details (pencil) icon on the Copy Job Items Page.
• Click the Updated Details (three dots) menu icon on the Copy Job Items Page and select the Update <Content Type> link.
Image: Profile Item Detail page

This example illustrates the Profile Item Detail page.

Use this page to enter all required fields and pertinent information for the person.

Select this button to accept your changes to the item. These property values will be copied to the person’s profile.

This page works similar to the <Content Type> Page. See this topic for additional field definitions.

Profile Item Detail (Related Content Type) Page

Use the Profile Item Detail (Related Content Type) page (JPM_CPYJOBRTM_SCF) to make updates to a related item to indicate the person’s qualifications and capabilities.

Navigation

Click the Update Details (pencil) icon on the Copy Job Items - <Related Content Type> (Summary) Page.
**Image: Profile Item Detail (Related Content Type) page**

This example illustrates the Profile Item Detail (Related Content Type) page.

![Profile Item Detail](image)

Use this page to enter all required fields and pertinent information for the person.

Select this button to accept your changes to the item. These property values will be copied to the person’s profile.

This page works similar to the `<Content Type> Page`. See this topic for additional field definitions.

**Copy Profile Items Page**

Use the Copy Profile Items page (JPM_CPYJOBSAVE_SCF) to view a summary of and submit the items you are copying to the person’s profile.

**Navigation**

Select the Copy Items button from the Copy Job Items Page.
Image: Copy Profile Items page

This example illustrates the Copy Profile Items page.

<table>

</tr>
</tbody>
</table>

Select this button to return to the Copy Items page where you can make changes to the items you want to copy to the person’s profile.

Select this button to submit the items to be added to the person’s profile.

**Confirmation of the Copy Job Items Submission**

After you submit your items to copy, the system will return you to the Copy Job Items Page in display only mode where you can view the status of the copy.
Image: Copy Profile Items page after submitting items

This example illustrates the Copy Profile Items page after submitting items to be added to the person’s profile.

Copy Status

This page will display the following statuses:

- *Submitted for Approval*: These items require approval to be added to a profile. Once approved, they will be added to the person’s profile.

- *Saved*: For those items that do not need approval, the system automatically adds the profile items to the person’s profile.

- *Not Selected for Copy*: Those items were not selected to copy to the person’s profile.

**Note:** Items added to the person’s profile will no longer appear in this job’s profile item list for this person, since this page only displays those items that are not already part of the person’s profile. Items not copied to the profile will remain on the list and are available for later selection.

Understanding Approvals for Person and Non-Person Profiles

Fluid Approvals supports the following Profile approval transaction requests that are generated from the following self service pages:

Employee Self Service:

- My Current Profile
- Talent Profile

Manager Self Service:

- Current Team Profiles
- Maintain Job Profiles

Fluid Approvals supports the following Manage Profile approval transaction types for a manager:

- Person Profile: When a new content item that requires an approval is added to a person’s profile.
- Non-Person Profile: When a new content item that requires an approval is added to a non-person profile, such as a profile for a job.

These videos discuss the PeopleSoft Fluid User Interface enhancements for the person and non-person transaction types:

- Image Highlights, PeopleSoft HCM Update Image 25: Manage Profile Enhancements
- Image Highlights, PeopleSoft HCM Update Image 27: Attachment Capability Added to Profile Management
Maintaining Person Profiles Chapter 2

For a list of delivered AWE transactions for HCM, see "Understanding the Approval Transaction Registry" (PeopleSoft HCM 9.2: Application Fundamentals).

**Approvals Process**

The approval processes, which determines who approves the transaction, is defined using the common Approval Framework. For more information, see "Understanding Approvals" (PeopleSoft HCM 9.2: Application Fundamentals).

The following navigation options provide direct access to the fluid Pending Approvals page:

- Click the Approvals tile on the Manager Self Service home page.
- Click the Notifications icon in the banner that appears across the top of PeopleSoft pages, then click an approval notification.

**Pending Approvals - Person Profile Page or Pending Approvals - Non-Person Profile Page**

Use the Pending Approvals - Person Profile page or Pending Approvals - Non-Person Profile page (EOAWMA_TXNHDTL_FL) to review and take action on person or non-person profile requests using Fluid Approvals. The page title and content varies depending upon the profile type.

**Navigation**

Click the Approvals tile on the Manager Self-Service home page or the Notifications button in the Oracle banner to access the Pending Approvals page. Then click a Person Profile or Non-Person Profile transaction row on the Pending Approvals page.

**Note:** Person Profile transaction rows display the Employee name, Profile Type description, and a list of updated profile item counts within content type while the Non-Person Profile displays the job.
Image: Pending Approvals - Person Profile Page

This example illustrates the Pending Approvals - Person Profile page.

Image: Pending Approvals - Non-Person Profile Page

This example illustrates the Pending Approvals - Non-Person Profile page.
**Approval Options**

The approval options on this page are common to all fluid approval transactions, as described in the documentation for the "Pending Approvals - <Transaction Details> Page" (PeopleSoft HCM 9.2: Application Fundamentals).

Approve and Deny

Use these buttons to take action on the requested approval.

**Person Profile Information or Non-Person Profile Information**

The section header will vary depending on the type of profile approval request: Person Profile or Non-Person Profile.

Use this section to view a summary of the profile impacted by the transaction request.

**Employee ID**

This field appears for a Person Profile type request, and displays the ID of the employee being affected by this transaction request.

**Profile ID and Description**

These fields appears for a Non-Person Profile type request, and displays the ID and description of the profile that was updated by this transaction request.

**Profile Type**

Displays the profile type of the profile updated by this transaction request, such as Person or Job.

**Profile Item Changes**

Use this section to view summary information identifying each profile item that was updated in the transaction that you are being asked to approve. The section will show either content type changes requested for the person or for the non-person profile. For example, the preceding Non-Person Profile screen shot displays an example of a transaction that shows three profile items that have been added.

The fields correspond to the fields that were entered or updated for the profile and vary by content type and item. Not all fields apply to all content items.

**Content Type**

Displays the content type description of the profile item with updates.

**Content Item**

Displays the profile item description.

**Instance Qualifier and Instance Qualifier (2)**

Displays the configured JPM_CAT_ITEM_QUAL and JPM_CAT_ITEM_QUAL2 label for that content type with its value for that profile item.

For more information see on instance qualifiers, see "Defining Instance Qualifiers" (PeopleSoft HCM 9.2: Human Resources Manage Profiles) and the "Content Section Page" (PeopleSoft HCM 9.2: Human Resources Manage Profiles).

**Rating 1, Rating 2, and Rating 3**

Displays the configured JPM_RATING1, JPM_RATING2, and JPM_RATING3 labels and profile item values for that item when the content type uses a rating model.
Chapter 2 Maintaining Person Profiles

Disposition
Display the type of modification being requested for the profile. Values include Add, Change, or Delete.

Click a row within this grid to access the Profile Item Details Page, where you can review item details.

Approver Comments
Enter any comments related to the approval action you take.

Approval Chain
Click this item to open the Approval Chain page, where you can review information about all approvers for the transaction.

My Job Profiles Tile

Use the My Job Profiles tile to view your job profile using fluid.

Navigation

The My Job Profiles tile is delivered as part of the My Profiles Dashboard, but you can add the tile to any home page through personalizations.
Image: My Job Profiles Tile

This example illustrates the My Job Profiles tile.

Click the My Job Profiles tile to access the My Job Profiles Page to select from job profiles associated with your job without using traditional menu navigation. If only one profile is associated with your job, you will be taken directly to the Job Profile Page.

My Job Profiles Page

Use the My Job Profiles page (JPM_EMP_RELPROF_FL) to select your job profile.

Note: This page is available when your job is assigned to more than one profile.

Navigation

- Click the View My Job Profiles tile on the My Profiles Dashboard (or any other home page with the tile).
- Self Service > Learning and Development > View My Job Profiles
- Select the Related Actions icon button next to your name and select Development > View My Job Profiles
Image: My Job Profiles Page

This example illustrates the My Job Profiles page.

This page displays those non-person profiles associated with your job. In the previous example, this person’s position is associated with two profiles and the job code is associated with one profile.

Select a row to access the Job Profile Page and view the details about the profile.

View Job Profiles Tile (for Employees)

Use the View Job Profiles tile to view job (non-person) profiles using fluid as an employee.

Navigation

The View Job Profiles tile is delivered as part of the My Profiles Dashboard, but you can add the tile to any home page through personalizations.

Image: View Job Profiles Tile

This example illustrates the View Job Profiles tile.

Click the View Job Profiles tile to access the View Job Profiles page and select a job profile without using traditional menu navigation.
Maintaining Person Profiles

Chapter 2

Related Links
View Job Profiles Page (for Employee) or Maintain Job Profiles Page (for Manager)

Maintain Job Profiles Tile (for Managers)

Use the Maintain Job Profiles tile to view and manage job (non-person) profiles using fluid as a manager.

Navigation

The Maintain Job Profiles tile is delivered as part of the Team Profiles Dashboard, but you can add the tile to any home page through personalizations.

Image: Maintain Job Profiles Tile

This example illustrates the Maintain Job Profiles tile.

Click the Maintain Job Profiles tile to access the Maintain Job Profiles page and select a job profile without using traditional menu navigation.

Related Links
View Job Profiles Page (for Employee) or Maintain Job Profiles Page (for Manager)

View Job Profiles Page (for Employee) or Maintain Job Profiles Page (for Manager)

Use the View Job Profiles or Maintain Job Profiles pages (JPM_COMPRF_SRCH_FL) to select a job profile you want to review.

Note: Although employees and managers access the profile pages differently and the header page name varies, the pages are the same.
Navigation

As an employee:

- Click the View Job Profiles tile on the My Profiles Dashboard (or any other home page with the tile).
- Self Service >Learning and Development >View Job Profiles

As a manager:

- Click the Maintain Job Profiles tile from the Team Profiles Dashboard (or any other home page with the tile).
- Manager Self Service >Learning and Development >Maintain Job Profiles

Image: View Job Profiles Page

This example illustrates the fields and controls on the View Job Profiles page, but the Manage Job Profiles page looks the same with the exception of the page header.

Type

Select the profile type from which you want to search. Valid values are defined on the "Profile Types - Attributes Page" (PeopleSoft HCM 9.2: Human Resources Manage Profiles) and display according to the manager or employee security.

Profile Name

Enter the full or partial name of non-person profiles that you want to have returned in your search.

Search button

Click this button to have the system retrieve profiles that meet your criteria and display them in the Profile Search Results section of the page.

(Select Profile) arrow button

Select this button to access the Job Profile Page for this profile.
Job Profile Page

Use the Job Profile page (JPM_NPERS_PROFL_FL) to create and update non-person profiles.

Navigation

Select the arrow button for a profile row from one of these pages:

- **My Job Profiles Page**
- **View Job Profiles Page (for Employee) or Maintain Job Profiles Page (for Manager)**
- **My Interest List Page (for Employees) or Team Interest List Page (for Managers)**

Image: (Tablet) Job Profile Page

This example illustrates the fields and controls on the Job Profile page using a medium or large form factor device.
Image: (Smartphone) Job Profile Page

This example illustrates the Job Profile page for the smartphone. This example shows the page when the content type panel is expanded to show the list of included content types on the left, and the Competencies page with the panel collapsed.

The Job Profile page works the same as the Person Profile page, using content tabs, content section pages, and a list of content item that are associated with the profile for the various content section pages. For information on how to use the pages, see the [Fluid] Maintaining Person Profiles topic.

The profile pages list the approved items only within the content sections of the page. If changes have been made to the profile but not yet approved, the pages indicates that there are items that are either new and awaiting submission for approval, pending approval, or denied. In classic mode, the employee or manager click a link to view a list of the items with that approval status. In fluid mode, the Status field appears, indicating which items have that approval status.

Profile Identifiers Page

Select the Profile Identifiers section tab to view profile identities associated with the profile.

Note: This page tab is available when a manager accesses the Job Profile page through the Maintain Job Profiles page.
Profile Identifiers allow you to select one or more objects to which the profile type can be linked. For example, administrators can set up a profile type that is linked to job code. Identifiers include job codes, job functions, job families, people, and salary grades. Identifiers for a profile type are defined on the "Profile Types - Identities Page" (PeopleSoft HCM 9.2: Human Resources Manage Profiles), which is the component that defines the structure of a non-person profile.

**Image: Job Profile - Profile Identifiers Page**

This example illustrates the Job Profile - Profile Identifiers page.

Understanding Profile Maintenance

**(Fluid) Maintaining Interest Lists**

Interest lists enable employees and managers to identify jobs that are of interest to the employee. Each employee has one interest list that is accessed by the employee, the employee's manager, and the profile administrator.

Employees can add profiles to their interest list using the My Interest List tile and pages or from the "(Fluid) Search Results Page" (PeopleSoft HCM 9.2: Human Resources Manage Profiles). Similarly, managers can view and update their employees' interest lists using the Team Interest Lists tile and page or the Search Results page as well.

**Note:** To access these self service tiles and components, the user must be assigned these roles:
—Employee: Profile Mgmt Employee Fluid
—Manager: Profile Mgmt Manager Fluid

This topic discusses how to maintain interest lists using the fluid user interface.

### My Interest List Tile

Use the My Interest List tile to access the pages to view and maintain a list of job profiles in which you are interested.

### Navigation

The My Interest List tile is delivered as part of the My Profiles Dashboard, but you can add the tile to any home page through personalizations.
Image: My Interest List Tile

This example illustrates the My Interest List tile.

Select the My Interest List tile to access your job interest list easily without using traditional menu navigation.

Team Interest List Tile

Use the Team Interest List tile to access the pages to view and maintain a list of job profiles in which your employees have interest.

Navigation

The Team Interest List tile is delivered as part of the Team Profiles Dashboard, but you can add the tile to any home page through personalizations.

Image: Team Interest List Tile

This example illustrates the Team Interest List tile.

Click the Team Interest List tile to access the job interest list for an employee easily without using traditional menu navigation.
My Interest List Page (for Employees) or Team Interest List Page (for Managers)

Use the My Interest List or Team Interest List pages (JPM_INTEREST_FL) to view and manage a list of job profiles in your or your employees’ interest list. You can also compare profiles within the list to determine the degree of a fit.

Note: Although employees and managers access the profile pages differently and the header page name varies, the pages are the same.

Navigation

As an employee:

- Click the My Interest List tile on the My Profiles Dashboard (or any other home page with the tile).
- Self Service >Learning and Development >My Interest List
- Select the Related Actions icon button next to your name and select Development >My Interest List

As a manager:

- Click the Team Interest List tile from the Team Profiles Dashboard (or any other home page with the tile).
- Manager Self Service >Learning and Development >Team Interest List
- Select the Related Actions icon button next to your employee’s name and select Development >My Interest List or Team Interest List.

Image: My Interest List Page

This example illustrates the fields and controls on the My Interest List page.
**Image: Team Interest List Page**

This example illustrates the fields and controls on the Team Interest List page.

Click this button to access the and add item details.

Select the check box in the header of the grid to select all rows, or select individual check boxes to select specific job profiles. Select profiles you want to compare and click the Compare Profiles button above the grid. Or, select the job profiles you want to delete and click the Delete Selected Profiles icon above the grid.

**Profile Type**

This column appears when the interest list contains profiles of different types and identifies the .

**Assigned By**

Displays the name of the person that added this job profile to the interest list. Employees and managers can only delete a job profile from the interest list if they added the profile to the list.

Select this button to access a display only view of the <Content Type> Page for this profile item.

Click this button to run the comparison for the profiles you selected. The system displays the "(Fluid) Compare Results Page" (PeopleSoft HCM 9.2: Human Resources Manage Profiles), which lists the profiles you selected and the match percentages for each of the search criteria items.

Click this icon to delete the job profiles you selected.
Profile Selection Page

Use the Profile Selection page (JPM_COMPRF_SRCH_FL) to select a job profile you want to add to the interest list.

Navigation

Click the Add button at the top of the grid on the My Interest List Page (for Employees) or Team Interest List Page (for Managers).

Image: Profile Selection Page

This example illustrates the fields and controls on the Profile Selection page.

</tr>
</tbody>
</table>
(Fluid) Searching and Comparing Profiles

Fluid Search and Compare provides a robust way of analyzing your profile data. It provides person and non-person pre-delivered sections but allows you the flexibility to configure criteria items as needed. Criteria groups help you find and compare people or jobs using different combinations of criteria in a single search. Search criteria uses boolean logic that creates focused and productive results.

These topics provide an overview of search and compare profiles ranking and discuss how to search for and compare profiles using the fluid user interface.

For an overview of performing a profile search and compare, see "Understanding the Search and Compare Profiles Process" (PeopleSoft HCM 9.2: Human Resources Manage Profiles).

These videos provide an overview of the Profile Manage Search and Compare modernization feature using the Fluid User Interface:

![PeopleSoft Profile Search Match Compare](Image Highlights, PeopleSoft HCM Update Image 36: Profile Management Search, Match Compare Modernization)

</tr>
</tbody>
</table>

**Note:** This pages are the same as the administrator documentation however, managers and employees may want to add the "Search and Compare Profiles Tile" (PeopleSoft HCM 9.2: Human Resources Manage Profiles) to a home page of their choice through personalizations.

**Understanding Search and Compare Profiles**

Employees and managers use the Search and Compare Profiles component in fluid to search for profiles that match certain search criteria. When employees and managers select this option, the system lists the search criteria types that are defined for their role. Search types are configured on the Define Search Configuration page for the profile types that you have defined. (When using the fluid pages, navigate to the Administer Workforce home page select the Profile Administration tile >Profile Configuration tile >Configure Search and Compare tab >Define Search Configuration.) For further information about setting up Search and Compare Profiles, see "Understanding Setting Up Search and Compare Profiles" (PeopleSoft HCM 9.2: Human Resources Manage Profiles).

Depending on how the search is configured, employees and managers can set up or modify the search criteria before running the search. The system lists matching profiles and indicates how well the profile matches the search criteria. For further information about how the system calculates the ratings, see "Understanding Search and Compare Profile Results Using the Fluid Pages" (PeopleSoft HCM 9.2: Human Resources Manage Profiles).
The Search Results page lists the matching profiles in descending score order, with the highest scoring profile listed first. Employees and managers can compare profiles listed on the Search Results page with the search criteria by selecting profiles and clicking the Compare Profiles button to compare the profiles.

</tbody>
</table>

Understanding the Committee Self-Service Transaction

Faculty members use the Committee self-service transaction to review their committee membership information. The Committee Detail page displays the committee name, the dates of membership, and role in the committee.
For faculty members to view their committee memberships, you need to set up these tables:

- Use the Committee Type Table page to maintain different committee types and committee roles within each type.

  The committee types that you set up on this page are used in the Committee page.

- Use the Committee page to establish a committee and attach a committee type to it.

  For example, you can establish the research Committee Type and attach it to the research and development committee.

- Use the Committee Members page to assign faculty members to a committee type within the committee.

Understanding the Teaching Responsibilities Self-Service Transaction

Faculty members use the Teaching Responsibilities self-service transaction to review, add, update, or delete Teaching Responsibilities records. The Teaching Responsibility Detail page enables faculty members to record information about their teaching responsibilities, including course type and description, units, term, percent taught (if they are sharing teaching with another faculty member) and the type of enrollment.
Chapter 4

Requesting Employee Training

Understanding the Self-Service Training Development Process

Prerequisites

Before employees and managers can submit training requests, complete the following:

1. Activate workflow.

2. Set up group build if you plan to use group ID as the access type for a manager to request training for his or her direct reports.

3. Set up the access type for HR_DR_TRN_SUMMARY and TRN_REQUEST_LNK on the Direct Reports Setup page.

"Configuring Self-Service Transactions" (PeopleSoft HCM 9.2: Application Fundamentals)
"Understanding Group Build" (PeopleSoft HCM 9.2: Application Fundamentals)

The Self-Service Training Development Process

eDevelopment provides four self-service transactions that improve the efficiency of employee development:

- Request Training Enrollment.

  An employee, person of interest (POI) with a Job record, or manager accesses the Request Training Enrollment transaction. Employees or POIs request training on their own behalf and managers request training for their direct reports. Whether you are an employee, POI, or manager submitting the request, the system considers you the originator.

  The originator selects a method for searching for course sessions that are set up in PeopleSoft HR: Administer Training. The system displays a list of available courses and the originator can pick the course and session that meets their needs.

  The system checks to see if there are any prerequisites that must be met. For managers, the system displays either a list of their direct reports who meet the prerequisites and or a list of those who don’t. If an employee is scheduled to take a course that meets the prerequisite for the selected course, the system considers this employee as meeting the requirement.
Managers select the employees they want to enroll in the course. The system displays a summary of the course. Employees or managers can enter any relevant comment and request to be placed on a waiting list if the course is full.

- **Approve Training Request.**

Managers use the Approve Training Request transaction to either approve or deny a request. Information about the request cannot be changed; however, the approver can enter a comment.

- **Training Request Status.**

Employees and managers can check the status of a request using the View Training Request Status transaction.

- **Training Summary.**

Employees and managers can access the Training Summary transaction. Employees can view a summary of the training courses that they have completed, and courses for which they are enrolled or on the waiting list. Managers view the same information for their direct reports.

---

**Note:** If a manager requests training for a group of direct reports and the class exceeds the number allotted during the enrollment process, the system enrolls the entire group into the class and updates their statuses to enrolled. The system then notifies an administrator to handle this situation.

---

### Submitting Training Requests

<tr>
<td>Administer Training Request Page</td>
<td>TRN_REQUEST_ADM</td>
<td>Training administrators use this page to approve or deny training requests. In the Administrator Actions group box, the administrator has three options: To approve the training request and allow the system to automatically enroll or add the employee to the waiting list for the selected course session. To approve the training request, without the automatic update. If the training administrator selects this option, the system does not enroll the employee. The training administrator must do this manually. To deny the training request.</td>
</tr>
</tbody>
</table>

**Understanding Training Request Approval Processing**

When employees and managers submit training requests, the requests may require one or both of the following before the employee is enrolled in, or added to the waiting list for, a course session:

- Manager approval.
  
  Managers approve training requests for their employees using the Approve Training Request self-service transaction.

- Processing by the training administrator.
  
  Training administrators use the Administer Request page (Enterprise Learning > Approve Training Request) to approve the training request. Depending on the option selected on the Administer Request page, the training administrator may also need to manually enroll the employee in the session.

You configure training request processing on the Self Service Workflow Configurations page (Set Up HCM > Common Definitions > Self Service > Workflow Configuration > Self Service Workflow Configurations).

The training request self-service transactions are:

- Training Enrollment.
  
- Training Enrollment by Manager.

The check boxes Approval Process? and Allow DB Update on the Self Service Workflow Configurations page affect the way that the training requests are processed. This table describes the training request processing for the different configurations:

<table>
<thead>
<tr>
<th>Approval Process?</th>

For training requests, if you click the Go to Enrollment link the Course Session Enrollment page is displayed with the request information.</td>
</tr>
</tbody>
</table>
Understanding Professional Compliance

Manage Professional Compliance is a PeopleSoft HR business process that enables you to manage the professional certification of both employees and non-employees.

With Manage Professional Compliance, you can:

1. Define the certification requirements established by a regulatory authority.
2. Set up classifications used to define the status of regulated individuals.
   For example, an individual can be classified as compliant or noncompliant with the requirements for certification.
3. Assign regulated individuals to compliance managers/supervisors.
4. Enroll regulated individuals in development plans designed to help individuals obtain a level of competence to attain a specified classification.
5. Monitor individuals in their progress by completing reviews, observations, KPIs, and checks.

Using Self-Service Transactions with Manage Professional Compliance

The Manage Professional Compliance business process provides self-service transactions for both compliance supervisors/managers and regulated individuals (RI):

- Supervisors/managers can view the status of their regulated individuals and perform actions such as completing development reviews, entering observations, and completing KPI reviews.
- Regulated individuals can view key data related to their compliance status and development plans.

**Note:** All RI direct reports display on the RI pages regardless of their assignment statuses. The assignment status also displays in the Direct Reports grids on the RI pages.

For Manage Professional Compliance transactions, individuals that a manager/supervisor can view in the Direct Reports grid are their regulated individuals. It is possible for a manager/supervisor to have direct reports who are not RIs in which case the direct report would not display in the grid.

It is also possible for a manager/supervisor to be responsible for an RI, who is not one of their direct reports. In this case, the RI would still display in the grid since it is an RI transaction. Regulated individuals who are not also a direct report of a manager/supervisor will not display in the Direct Reports grid for any self-service transactions other than those for Manage Professional Compliance.

Completing Regulated Individual Development Reviews

Pages Used to Complete Regulated Individual Development Reviews

<table>
<thead>
<tr>
<th>Page Name</th>
<th>Definition Name</th>
<th>Usage</th>
</tr>
</thead>
</table>
| Complete RI Development Review - Select Regulated Individual Page | PCMP_OPRROWS  
PCMP_OPRROWS2 | Displays a list of the compliance manager/supervisor's regulated individuals. Managers/supervisors select the regulated individual for whom they want to complete a development review. |
| RI Development Review Page | HR_PCMP_T_DEVREV  
HR_PCMP_T_DEVREV2  
HR_PCMP_T_DEVREV3 | Managers complete development reviews. Using the pages, managers select statuses for development plan areas, and add optional comments about a particular area. They can also update review dates and the review status. |

Understanding RI Development Reviews

Compliance managers and supervisors use the Complete RI Development Review transaction to select regulated individuals from a list and then review their development plans. The list of regulated individuals is limited to those under the control of the compliance manager/supervisor, and the development plans available for review include only those for which the expected completion date (defined on the Development Record page) has not yet passed.

Before you can complete this transaction, you must define your development plans and enroll individuals in these plans as part of Manage Professional Compliance setup in HR.

PCMP_OPRROWS2 | Displays a list of the compliance manager/supervisor's regulated individuals. Managers/supervisors select a regulated individual for whom they want to complete an observation. |
Understanding RI Observations

Compliance managers and supervisors use the Complete RI Observation transaction to select a regulated individual from a list and complete an observation. The list of regulated individuals is limited to those under the control of the compliance manager/supervisor.

Before you can complete an observation, you must define observation elements and construct observation models as part of the setup of Manage Professional Compliance in HR.

Related Links
"Observing Regulated Individuals" (PeopleSoft HCM 9.2: Human Resources Manage Professional Compliance)

Completing RI Key Performance Indicator Reviews

Pages Used to Complete RI Key Performance Indicator Reviews

Understanding RI Key Performance Indicator Reviews

Compliance managers and supervisors use the Complete RI KPI Review transaction to select a regulated individual from a list and then enter KPI review details. The list of regulated individuals is limited to those under the control of the compliance manager/supervisor.

Before you can complete a review of an individual's progress against KPIs, you must define the specific indicators that you want to use as part of the setup of Manage Professional Compliance in HR. PeopleSoft includes the following broad categories of performance indicators as part of the delivered application;
within these categories, however, you must choose (and in some cases set up) the exact indicators that you want to use:

- Complaints – Number of complaints against the individual versus those against the company.
- Persistency (of business sold) – Percentage of business sold that is still in force.
- Spread of Business – Measure the range of applications being sold by the individual.
- Not Taken Up (NTU) – Number of proposals submitted, but not put into force.
- Fact find Completion – Check on accuracy, completeness and quality of service.

**Note:** The KPIs listed here are directly targeted at the U.K. financial services arena. However, the key structure of the KPI records, and the way that the functionality is incorporated within Professional Compliance, can be used as a guide for creating additional, modified KPIs.

</tr>
</tbody>
</table>

**Understanding the View RI KPI Review Transaction**

Compliance managers and supervisors use this transaction to view the KPI reviews of regulated individuals, and regulated individuals use this transaction to view details of their own KPI reviews.

To view a KPI review, you must have already created the review using the RI KPI Review page in eDevelopment, or the KPI Review and KPI Statistics pages in HR.

Delivered Workflow for eDevelopment

This topic discusses eDevelopment workflow.

Understanding Delivered Profile Approval Workflow

Profile approvals processing uses the Approval Framework. The delivered approval definitions provide the following approval processing:

- When employees make changes to their personal profiles, the changes that require approval (as defined by the profile type definition) are routed to their manager for approval.
- When managers create or update non-person profiles, the changes are routed to the profile administrator for approval.

The delivered definitions enable you to set up a one-step or two-step profile approval process. You can use the delivered definitions or set up new approval definitions according to your business requirements. Approval definitions are linked to profile types on the Profile Types — Attributes page.

</tbody>
</table>

**Note:** The pushback email template JPMPushbackPersonProfile is not enabled in eDevelopment as delivered.
Professional Training

This topic discusses the Professional Training workflow that is based on PeopleTools workflow; it does not use the approvals workflow engine.

See the product documentation for PeopleTools: Workflow Technology.

**Description**

<table>
<thead>
<tr>
<th>Information Type</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Event Description</td>
<td>An employee uses self-service to update their personal development information for professional training. This generates either a worklist entry or email to the manager.</td>
</tr>
<tr>
<td>Action Description</td>
<td>When the worklist entry is selected (or the link in the email is selected), the system links the manager to the page where she can view changed personal development information for professional training.</td>
</tr>
<tr>
<td>Notification Method</td>
<td>Email, worklist, or both.</td>
</tr>
</tbody>
</table>
