Preface

Understanding the PeopleSoft Online Help and PeopleBooks

The PeopleSoft Online Help is a website that enables you to view all help content for PeopleSoft applications and PeopleTools. The help provides standard navigation and full-text searching, as well as context-sensitive online help for PeopleSoft users.

Hosted PeopleSoft Online Help

You can access the hosted PeopleSoft Online Help on the [Oracle Help Center](#). The hosted PeopleSoft Online Help is updated on a regular schedule, ensuring that you have access to the most current documentation. This reduces the need to view separate documentation posts for application maintenance on My Oracle Support. The hosted PeopleSoft Online Help is available in English only.

To configure the context-sensitive help for your PeopleSoft applications to use the Oracle Help Center, see [Configuring Context-Sensitive Help Using the Hosted Online Help Website](#).

Locally Installed Help

If you're setting up an on-premise PeopleSoft environment, and your organization has firewall restrictions that prevent you from using the hosted PeopleSoft Online Help, you can install the online help locally. See [Configuring Context-Sensitive Help Using a Locally Installed Online Help Website](#).

Downloadable PeopleBook PDF Files

You can access downloadable PDF versions of the help content in the traditional PeopleBook format on the [Oracle Help Center](#). The content in the PeopleBook PDFs is the same as the content in the PeopleSoft Online Help, but it has a different structure and it does not include the interactive navigation features that are available in the online help.

Common Help Documentation

Common help documentation contains information that applies to multiple applications. The two main types of common help are:

- Application Fundamentals
- Using PeopleSoft Applications

Most product families provide a set of application fundamentals help topics that discuss essential information about the setup and design of your system. This information applies to many or all applications in the PeopleSoft product family. Whether you are implementing a single application, some combination of applications within the product family, or the entire product family, you should be familiar with the contents of the appropriate application fundamentals help. They provide the starting points for fundamental implementation tasks.

In addition, the *PeopleTools: Applications User's Guide* introduces you to the various elements of the PeopleSoft Pure Internet Architecture. It also explains how to use the navigational hierarchy, components, and pages to perform basic functions as you navigate through the system. While your application or implementation may differ, the topics in this user's guide provide general information about using PeopleSoft applications.

Field and Control Definitions

PeopleSoft documentation includes definitions for most fields and controls that appear on application pages. These definitions describe how to use a field or control, where populated values come from, the effects of selecting certain values, and so on. If a field or control is not defined, then it either requires no additional explanation or is documented in a common elements section earlier in the documentation. For example, the Date field rarely requires additional explanation and may not be defined in the documentation for some pages.

Typographical Conventions

The following table describes the typographical conventions that are used in the online help.

Typographical Convention	Description
Key+Key	Indicates a key combination action. For example, a plus sign (+) between keys means that you must hold down the first key while you press the second key. For Alt+W, hold down the Alt key while you press the W key.
... (ellipses)	Indicate that the preceding item or series can be repeated any number of times in PeopleCode syntax.
{ } (curly braces)	Indicate a choice between two options in PeopleCode syntax. Options are separated by a pipe ().
[] (square brackets)	Indicate optional items in PeopleCode syntax.
& (ampersand)	When placed before a parameter in PeopleCode syntax, an ampersand indicates that the parameter is an already instantiated object. Ampersands also precede all PeopleCode variables.
=>	This continuation character has been inserted at the end of a line of code that has been wrapped at the page margin. The code should be viewed or entered as a single, continuous line of code without the continuation character.

ISO Country and Currency Codes

PeopleSoft Online Help topics use International Organization for Standardization (ISO) country and currency codes to identify country-specific information and monetary amounts.

ISO country codes may appear as country identifiers, and ISO currency codes may appear as currency identifiers in your PeopleSoft documentation. Reference to an ISO country code in your documentation

does not imply that your application includes every ISO country code. The following example is a country-specific heading: "(FRA) Hiring an Employee."

The PeopleSoft Currency Code table (CURRENCY_CD_TBL) contains sample currency code data. The Currency Code table is based on ISO Standard 4217, "Codes for the representation of currencies," and also relies on ISO country codes in the Country table (COUNTRY_TBL). The navigation to the pages where you maintain currency code and country information depends on which PeopleSoft applications you are using. To access the pages for maintaining the Currency Code and Country tables, consult the online help for your applications for more information.

Region and Industry Identifiers

Information that applies only to a specific region or industry is preceded by a standard identifier in parentheses. This identifier typically appears at the beginning of a section heading, but it may also appear at the beginning of a note or other text.

Example of a region-specific heading: "(Latin America) Setting Up Depreciation"

Region Identifiers

Regions are identified by the region name. The following region identifiers may appear in the PeopleSoft Online Help:

- Asia Pacific
- Europe
- Latin America
- North America

Industry Identifiers

Industries are identified by the industry name or by an abbreviation for that industry. The following industry identifiers may appear in the PeopleSoft Online Help:

- USF (U.S. Federal)
- E&G (Education and Government)

Translations and Embedded Help

PeopleSoft 9.2 software applications include translated embedded help. With the 9.2 release, PeopleSoft aligns with the other Oracle applications by focusing our translation efforts on embedded help. We are not planning to translate our traditional online help and PeopleBooks documentation. Instead we offer very direct translated help at crucial spots within our application through our embedded help widgets. Additionally, we have a one-to-one mapping of application and help translations, meaning that the software and embedded help translation footprint is identical—something we were never able to accomplish in the past.

Using and Managing the PeopleSoft Online Help

Select About This Help in the left navigation panel on any page in the PeopleSoft Online Help to see information on the following topics:

- Using the PeopleSoft Online Help
- Managing Hosted online help
- Managing locally installed PeopleSoft Online Help

Getting Started with Administer Company Cars

Administer Company Cars Overview

Administer Company Cars enables you to set up and administer company cars for an organization. Setup tasks include defining company car benefit plans and fleet data. Administration tasks include allocating and tracking company cars and defining tax percentages and engine types.

Image: Administer Company Cars business process showing the necessary steps from setting up benefit information and the vehicle fleet to calculating car and fuel benefit amounts

This diagram illustrates the Administer Company Cars business process, from setting up benefit information and the vehicle fleet to calculating car and fuel benefit amounts:

Administer Company Cars Business Processes

Administer Company Cars provides these business processes:

- Set up company car benefit plans and car fleet data.
- Allocate and track company cars.
- (GBR) Define tax percentages and engine types.

We cover these business processes in the business process topics in this product documentation.

Administer Company Cars Integrations

Administer Company Cars integrates with these PeopleSoft applications:

- PeopleSoft HCM applications.
- Other PeopleSoft applications.
- Third-party applications.

We cover integration considerations in the implementation topics in this product documentation.

Supplemental information about third-party application integrations is located on the [My Oracle Support](#) website.

Administer Company Cars Implementation

PeopleSoft Setup Manager enables you to generate a list of setup tasks for your organization based on the features that you are implementing. The setup tasks include the components that you must set up, listed in the order in which you must enter data into the component tables, and links to the corresponding product documentation.

Other Sources of Information

In the planning phase of your implementation, take advantage of all PeopleSoft sources of information, including the installation documentation, table-loading sequences, data models, and business process maps.

Refer to the *PeopleSoft HCM 9.2 - Reorganization of Component Interface Permissions* (Doc ID [2342162.1](#)) MOS posting for a list of system-delivered CIs and their usage, the mapping of CIs and associated permission lists, and the mapping of CI permission lists and user roles.

Application Fundamentals

Chapter 2

Setting Up Administer Company Cars

Setting Up the Company Car Benefit Plan

To set up the company car benefit plan, use the Benefit Plan Table (BENEFIT_PLAN_TABLE) and Company Car Plan Table (CAR_PLAN_TABLE) components.

This topic discusses how to set up the company car benefit plan.

Note: This topic is required. To implement Administer Company Cars, you must complete the tasks discussed in this topic.

PeopleSoft considers a company car a benefit; therefore, some of the standard benefit plan codes and tables define the company car benefit.

Use the Benefit Plan Table to set up all types of benefits, not just company cars.

Pages Used to Set Up the Company Car Benefit Plan

<i>Page Name</i>	<i>Definition Name</i>	<i>Usage</i>
<u>Benefit Plan Table Page</u>	BENEFIT_PLAN_TABLE	Create and name company car benefit plans.
<u>Company Car Plan Table Page</u>	CAR_PLAN_TABLE	Enter company car benefit information that is specific to each company car benefit plan.

Benefit Plan Table Page

Use the Benefit Plan Table page (BENEFIT_PLAN_TABLE) to create and name company car benefit plans.

Navigation

Set Up HCM > Product Related > Workforce Administration > Company Cars > Benefit Plan Table > Benefit Plan Table

Image: Benefit Plan Table page

This example illustrates the fields and controls on the Benefit Plan Table page.

The screenshot shows the 'Benefit Plan Table' interface. At the top, it displays 'Plan Type 5A' and 'Benefit Plan KNCAR'. Below this, there are two main sections: 'Benefit Plans' and 'Internal Administrative Contacts'. The 'Benefit Plans' section contains several input fields: '*Effective Date' (01/01/1980), '*Description' (Standard Car Scheme), 'Short Description' (Car), 'Set ID' (NLD01), 'Vendor ID', 'SPD URL ID', 'Group Number', 'Default Deduction Code' (KN5A01), and 'Self-Service Plan Description'. The 'Internal Administrative Contacts' section is a table with columns for '*Contact Type', '*Contact ID', and 'Contact Description'. There are also navigation controls like 'Find | View All' and 'First 1 of 1 Last'.

Plan Type andBenefit Plan

Displays the plan type and benefit plan that you entered. Leave the remaining fields blank.

Related Links

"Defining Benefit Plans" (PeopleSoft HCM 9.2: Human Resources Manage Base Benefits)

Company Car Plan Table Page

Use the Company Car Plan Table page (CAR_PLAN_TABLE) to enter company car benefit information that is specific to each company car benefit plan.

Navigation

Set Up HCM > Product Related > Workforce Administration > Company Cars > Company Car Plan Table > Company Car Plan Table

Image: Company Car Plan Table page

This example illustrates the fields and controls on the Company Car Plan Table page.

Price Range		
	Minimum	Maximum
Purchase	7,000.00	55,000.00
Lease	500.00	1,000.00
Contract Hire	500.00	1,000.00

Qualifying Period

Enter the waiting or qualifying period for participating in this plan, if applicable. Select a unit by which to measure time and enter the number of those units.

Allowance Amount

If you offer an allowance amount instead of a car, enter the amount and the currency code for that amount. The currency code appears by default from the base currency code defined in the Installation table. If you change the currency code here, the new code applies to the other currency-related fields on this page.

Price Range

Use the fields in this group box to define the price range of a car. For example, a worker enrolled in the HGCAR benefit plan might have a car with a minimum list price of 7,000 and a maximum price of 55,000.

Purchase

List the minimum and maximum amount of purchase. Specify the currency of these amounts by entering a currency code next to Allowance Amount. This code controls all amount fields on this page.

Lease and Contract Hire

List minimum and maximum amount of lease or contract hire. Specify the currency of these amounts by entering a currency code to the right of the Allowance Amount field. This code controls all amount fields on this page.

Adding the Company Car Benefit Plan to Benefit Programs

To enable workers to use the car benefit plan, assign the plan to benefit programs and then assign benefit programs to workers.

To add the company car benefit plan to one of the organization's benefit and deduction programs, use the Benefit/Deduction Program Table pages. Select Set Up HCM > Product Related > Workforce Administration > Company Cars > Ben/Ded Program Tbl. Use these same pages to define Benefit/Deduction Programs in the Benefit Program table.

Related Links

"Building Benefit Programs" (PeopleSoft HCM 9.2: Human Resources Manage Base Benefits)

Setting Up Company Car Fleet Information

To set up company car fleet information, use the Car Model Table (CAR_MODEL_TABLE), Car Management Location (CAR_MG_LOC_TBL) , and Car Data (CAR_DATA) components.

This topic discusses how to set up company car fleet information.

Setting up car fleet information involves entering information about the cars, car models, car pool information, and vehicle maintenance. This information enables you to administer the allocation and tracking of company cars.

Note: This topic is required. To implement Administer Company Cars, you must complete the tasks discussed in this topic.

Pages Used to Set Up Company Car Fleet Information

<i>Page Name</i>	<i>Definition Name</i>	<i>Usage</i>
<u>Car Model Table Page</u>	CAR_MODEL_DATA	Track company cars.
<u>Car Management Location Page</u>	CAR_MG_LOC_TBL	Enter location information detailing where car maintenance, leasing, and management occurs.
<u>Car Data Page</u>	CAR_DATA1	Enter details such as a profile of the car and accessories information.
<u>Allocation Page</u>	CAR_DATA2	View allocation information, track car pool information, and enter comments about the car.
<u>Maintenance Page</u>	CAR_MAINT	Record a company car's car pool and maintenance history.

Common Element Used to Set Up Company Car Fleet Information

Car ID

Displays an identification code for a specific vehicle.

Note: To prevent numbering errors, always assign a number or let the system assign one automatically.

Car Model Table Page

Use the Car Model Table page (CAR_MODEL_DATA) to track company cars.

Navigation

Set Up HCM > Product Related > Workforce Administration > Company Cars > Car Model Table > Car Model Table

Image: Car Model Table page

This example illustrates the fields and controls on the Car Model Table page.

The screenshot shows the 'Car Model Table' page with the following details:

- Manufacturer:** BMW
- Model:** 323i SE
- Engine Type:** PET
- Data Section:**
 - *Effective Date: 01/01/1980
 - *Status: Active
 - *Engine Capacity: 2500
 - Unit: Cubic Centimeters
 - High Insurance Risk
 - C02 Emissions: [Empty]
- Costs Section:**
 - List Cost: 24,895.00 GBP
 - Lease Cost: [Empty]
 - Contract Hire Cost: [Empty]
 - Frequency: Monthly
- Description:** [Empty]

Model

Displays the manufacturer and model of the car.

Engine Type

Displays the engine type.

Engine Capacity

Enter the engine capacity for the model.

High Insurance Risk

Select this check box if this is a high-insurance car.

CO2 Emissions g/km (carbon dioxide emissions in grams per kilometer)	In the U.K., vehicle tax is based on carbon dioxide emissions. Enter the grams per kilometer emissions provided by the manufacturer in accordance with government guidelines.
List Cost	Enter the list cost. This is a required field that the system uses for tax purposes when performing P11D calculations. The currency code field next to the List Cost field applies to all amount fields on the page.
Lease Cost	For lease costs, select <i>Daily</i> , <i>Weekly</i> , <i>Monthly</i> , or <i>Yearly</i> .
Contract Hire Cost	For contract hire costs, enter the amount in the field.

Car Management Location Page

Use the Car Management Location page (CAR_MG_LOC_TBL) to enter location information detailing where car maintenance, leasing, and management occurs.

Navigation

Set Up HCM > Product Related > Workforce Administration > Company Cars > Car Management Location > Car Management Location

Image: Car Management Location page

This example illustrates the fields and controls on the Car Management Location page.

The screenshot shows the 'Car Management Location' page. At the top, it displays 'Location ABC Motor Group'. Below this is a horizontal line. The 'Location Type' is a dropdown menu set to 'Garage'. The 'Country' is 'GBR' with a magnifying glass icon and 'United Kingdom'. The 'Address' is '55 Tumpike Road, Shipham, Somerset BS251TX', with an 'Edit Address' button to its right. Below the address is a 'Telephone' field and a 'Description' field with a small icon in the bottom right corner.

Location Type

Values include:

Garage: Select for a car maintenance facility.

Internal Management Center: Select for a location within the company that manages a car.

Lease Company: Select for a company from which you lease cars for use in the program.

Car Data Page

Use the Car Data page (CAR_DATA1) to enter details such as a profile of the car and accessories information.

Navigation

Set Up HCM > Product Related > Workforce Administration > Company Cars > Car Data > Car Data

Image: Car Data page

This example illustrates the fields and controls on the Car Data page.

The screenshot shows the 'Car Data' page for Car ID 0000010. It is divided into three main sections:

- Car Profile:** Includes navigation links (Find, View All, First, 1 of 1, Last).
- Car Details:** Contains various input fields:
 - *Effective Date: 01/01/1990
 - *Status: Active
 - Registration Nbr: T451 RBI
 - VIN: 1997745 AX 8821
 - *Make: Ford
 - Model: Mondeo 1.8 GLX
 - Registration Date: 03/01/1999
 - Color: Silver
 - Provision Method: Purchase
 - Cost: 17,000.00
 - Currency Code: GBP
 - Management Location: (empty)
 - Country: GBR (United Kingdom)
 - County: BERKS (Berkshire)
- United Kingdom:**
 - Tax Renewal Date: (empty)
 - Age of Car: 15
 - Classic Car: (checkbox)
- Netherlands:**
 - Contract Begin Date: 10/14/2014
 - Contract End Date: (empty)
 - Fiscal Value: 0.00
- Accessories:** A table with columns for Description, Cost, Currency, Installed, and Removed. One entry is visible: Kenwood Stereo with a cost of 210.00 GBP, installed on 06/16/1999.

Registration Nbr (registration number) and **VIN** (vehicle identification number) Enter the vehicle's registration number and VIN.

Make and Model Provide information in these required fields. Define values for make in the Translate table, and define values for model in the Car Model table.

Registration Date and Color Enter the car's registration date and select a color.

Provision Method and Cost Select a provision method using the purchase, lease, and contract hire costs that you defined in the Car Model table. The system displays the car's cost in the appropriate currency based

on the provision method that you select. You can override these amounts.

Management Location

Select a management location for this vehicle. This field is optional. Car management locations are stored on the Car Management Locations page.

(GBR) United Kingdom

Tax Renewal Date

Enter a date. The date that you enter is for informational purposes only.

Age of Car

Displays the car's age calculated from the registration date that you entered on the Car Data page.

Classic Car

Select for cars that are 15 years or older.

(NLD) Netherlands

Contract Begin Date and Contract End Date

Enter the contracted dates for the use of the vehicle.

Fiscal Value

Identify the worth of value incurred for this vehicle, such as the catalog price of a newly purchased car and the value of additional accessories.

Accessories

For each accessory, complete the fields in this group box.

Allocation Page

Use the Allocation page (CAR_DATA2) to view allocation information, track car pool information, and enter comments about the car.

Navigation

Set Up HCM > Product Related > Workforce Administration > Company Cars > Car Pool & Maint > Allocation

Image: Allocation page

This example illustrates the fields and controls on the Allocation page.

The screenshot shows a web interface for car allocation. At the top, there are two tabs: "Allocation" (selected) and "Maintenance". Below the tabs, the following information is displayed:

- Car ID: 0000010
- Registration Nbr: T451 RBI
- VIN: 1997745 AX 8821
- Currently Allocated to: KG0002, Dewi Hopkins

Below this information is a "Car Pool" table with the following controls and data:

- Table header: Car Pool
- Actions: Personalize | Find | View All | [Print] | [Calendar]
- Page navigation: First 1 of 1 Last
- Table columns: Start Date, End Date, Empl ID, Name
- Table row 1: 1, [Start Date], [End Date], [Empl ID], [Name]
- Table controls: [Add] [Minus]

Registration No. and VIN

Displays the registration number and VIN that you entered on the Car Data page.

Currently Allocated To

Displays the ID and name of an individual if the car is assigned to a worker on the Company Car Allocation table.

Car Pool

Enter the start date and the end date of the car pool, and then enter the EmplID of the person who is responsible for the company car.

Maintenance Page

Use the Maintenance page (CAR_MAINT) to record a company car's car pool and maintenance history.

Navigation

Set Up HCM > Product Related > Workforce Administration > Company Cars > Car Pool & Maint > Maintenance

Image: Maintenance page

This example illustrates the fields and controls on the Maintenance page.

- Maintenance Date** Enter the date when the car was serviced.
- Location** Select a location from the list of locations that you defined on the Car Management Location table. *Garage* is the only location type that appears here.
- Action Code** Select a value from the available options.
- Present Distance** Enter the car's odometer reading as of the service date. Select *Miles* or *Kms* (kilometers).
- Next Service** If you selected *Full Service* as the action code, enter the distance and date for the car's next service. To enter additional car maintenance and service events, insert a new data row and enter a new maintenance date, if appropriate.

(MEX) Mexico

Because of high pollution levels in Mexico, there are legal requirements for car inspections.

- Inspection Type** Values include:
Multiple Stop Day (2), *New Cars (00)*, *No Stop Day (0)*, and *One Stop Day (1)*.

For example, if a car has an inspection type of *One Stop*, the car must not be used one day of the week.

Stop Day

Depending on the result of the inspection, you may need to specify a stop day when the car cannot be in use.

Values include:

Monday, Tuesday, Wednesday, Thursday, and Friday.

Chapter 3

Administering Company Cars for a Workforce

Allocating Company Cars

To allocate company cars, use the Select Type of Benefits (CAR_PLAN) and Assign Type of Car/Dates (CAR_ALLOCATION) components.

This topic discusses how to allocate company cars.

Before allocating cars to employees, enroll them in the benefit plan.

Pages Used to Allocate Company Cars

<i>Page Name</i>	<i>Definition Name</i>	<i>Usage</i>
<u>Select Type of Benefits Page</u>	CAR_PLAN	Enroll workers in the car benefit plan.
<u>Assign Type of Car/Dates Page</u>	CAR_ALLOCATION	Allocate company cars to workers.

Select Type of Benefits Page

Use the Select Type of Benefits page (CAR_PLAN) to enroll workers in the car benefit plan.

Navigation

Benefits > Provide Company Cars > Select Type of Benefits > Select Type of Benefits

Image: Select Type of Benefits page

This example illustrates the fields and controls on the Select Type of Benefits page.

Select Type of Benefits

Jeroen van de Berg Employee ID KN0001 Benefit Record Number 0

Coverage Details *Date 01/01/2012

Coverage Election

Elect
 Waive
 Terminate *Elect Date 01/01/2012

Benefit Plan KNCAR Standard Car Scheme

Allowance Taken

Amount Currency

Status Active

Description Netherlands Base Benefits

Currency EUR

Netherlands

Lease Amount	1100.00	Frequency	Monthly
Employee Contribution	110.00	Excessive Contribution	0.00
Fiscal Value	43542.04	Fiscal Percentage	25.00
Taxable Amount	907.13	No Tax on Car	

Plan Type

Displays the default value of *Company Car*.

Coverage Begin Date

Enter the start date for the worker's coverage under this plan.

Coverage Election

Indicate whether the worker chooses to Elect, Waive, or Terminate their coverage.

Elect Date

Enter the date on which the worker elected this coverage.

Benefit Plan

Enter a benefit plan from the plans that you set up in the Benefit Plan Table page. Only benefit plans that are in this worker's benefit program are available here.

Allowance Taken

Select if this worker chooses an allowance instead of a car.

Amount

Displays the allowance amount from the Company Car Plan page. You can override the amount, the currency, or both.
 Workers who choose the allowance can't have company cars allocated in the Assign Type of Car/Dates page.

(NLD) Netherlands

Lease Amount	Enter the lease amount paid each period to the lease company.
Frequency	Displays the compensation frequency from the worker's job data and applies to the lease amount.
Employee Contribution	Enter the contribution amount made by the employee. This can be a fixed amount or a percentage of the lease amount.
Excessive Contribution	Identify any excess above the employee's lease budget. This amount will be considered an additional monthly contribution toward the employee's private use. The budget is typically determine by the job family or position level.
Fiscal Value	Record the catalog price of a newly purchased car, including additional accessories.
Fiscal Percentage	Indicate the tax rate, which depends on the CO2 emission and the date of the registration of the vehicle.
Taxable Amount	<p>Displays the taxable amount, which is derived from the amounts entered for Fiscal Value, the Fiscal Percentage, and the factor related to the Frequency (e.g. Monthly = 1/12).</p> <p>For example, if the fiscal value is equal to 20,000, the fiscal percentage is 25, and the frequency is monthly, then system would calculate the taxable amount accordingly:</p> $20,000 * 25/100 * 1/12 = 416.67$ <p>When you change either the Fiscal Value or Fiscal Percentage values, the system re-calculates the Taxable Amount value. You can override the calculated amount, however, if you set the value to zero (0) include the reason for not having a tax on the company car in the No Tax on Car field..</p>
No Tax on Car	<p>Select the reason for being exempt of paying tax for the use of a company car. For example, you might select <i>No CO2 Emission</i> for an electric car. Valid values include:</p> <ul style="list-style-type: none"> • <i>Alternately use Company Van</i> • <i>Employer Arrangement</i> • <i>No CO2 Emission</i> • <i>Other Evidence</i> • <i>Personal Arrangement</i>

[Setting Up the Company Car Benefit Plan](#)

Assign Type of Car/Dates Page

Use the Assign Type of Car/Dates page (CAR_ALLOCATION) to allocate company cars to workers.

Navigation

Benefits > Provide Company Cars > Assign Type of Car/Dates > Assign Type of Car/Dates

Image: Assign Type of Car/Dates page

This example illustrates the fields and controls on the Assign Type of Car/Dates page.

The screenshot displays the 'Assign Type of Car/Dates' page for employee Martin Pipe. Key sections include:

- Data:** Benefit Plan (KGCAR - Company Car Plan - UK), Effective Date (01/01/2001).
- Allocation:** Car Identification (0000014), Start Date (04/08/2017), End Date (04/08/2018), Car Type (Other).
- United Kingdom:** Capital Contribution (10000.000), Fuel Provided (checked), Fuel Cost Reimbursed (checked), P46 Submitted (unchecked), Date Free Fuel Provided (10/01/2016), Date Free Fuel Withdrawn (10/01/2017), Cash Equivalent of Car, Cash Equivalent of Fuel.
- Payments Towards Private Use:** Frequency Type (Monthly selected).
- Unavailability:** Start Date, End Date, Reason.
- Annualized Business Mileage:** Tax Year End, Mileage, Type.

Car Identification

Enter the code of the car that you want to allocate to the worker. Define values for this field in the Car Data table. Only cars that aren't already allocated or assigned to carpools as of the effective date are available.

Start Date

Enter the start date of the allocation.

Car Type

Select from these values:

Primary Car, Replacement Car, Secondary Car, or Other.

The car type is used in the P46 (Car) report that is provided with Global Payroll for the U.K.

End Date Enter a date when the worker is scheduled to (or does) return the car.

(GBR) United Kingdom

This information is required for the P46 (Car) report that is provided in PeopleSoft Global Payroll for the U.K.

Capital Contribution Enter the amount and the currency code if the worker makes any capital contributions toward the car.

Fuel Provided Select if you supply fuel to the worker for private use.

Fuel Cost Reimbursed Select if the worker reimburses the total cost.

P46 Submitted Select if you've submitted the P46 (Car) report to the Inland Revenue. If you have Global Payroll for the U.K., you can generate this report automatically.

Date Free Fuel Provided Select the date from which free fuel was provided to the worker for private use.

Date Free Fuel Withdrawn Select the date one which free fuel is withdrawn.

Cash Equivalent of Car Enter the amount equivalent to the car. Click the Display In Other Currency button to access the Display In Other Currency page, where you change the currency.

Cash Equivalent of Fuel Enter the amount equivalent to the fuel. Click the Display In Other Currency button to access the Display In Other Currency page, where you change the currency.

Payments Towards Private Use

Complete this group box if the worker makes any payments for private use of the car.

Payment Date and Amount Enter the date on which the worker started making payments and enter the amount of each payment.

Frequency Type Select the frequency of the worker's payments.

Unavailability

Indicate any period when the car is unavailable.

Annualized Business Mileage

Track the distance that the car is driven on business. Only mileage ranges are required for tax purposes.

Tax Year End and Mileage To identify the mileage for a particular tax year, select the Tax Year End value and the range of business mileage

Type

Values are:

Actual: Select at the end of the tax year when a more accurate value is available.

Expected: Select to enter an estimate for the current tax year.

(GBR) Tracking Company Cars and Vehicle Incidents

This topic discusses how to track company cars and vehicle incidents.

Note: To track company cars and vehicle incidents, use the Calculate P11D Information (CALC_P11D_SEC_A) and Verify P11D Information (VIEW_P11D_SEC_A) components.

Pages Used to Track Company Cars and Vehicle Incidents

<i>Page Name</i>	<i>Definition Name</i>	<i>Usage</i>
Calculate P11D Information Page	RUNCTL_COMPCAR001	To calculate the P11D Information amounts, run the CAR001 process. You can run the report for one worker at a time or for all eligible workers.
Verify P11D Information Page	P11D_SEC_A_UK	Verify P11D Information calculation results online.
Process Notes Page	P11D_NOTES_UK	View benefit calculation details.

Understanding Tracking Functionality

To use the PeopleSoft HR Monitor Health and Safety application to track vehicle incidents related to company cars, you must define each car as an item of company property. Do this on the Company Property Table Setup page. Once you define a car as company property, use the Incident Data and Vehicle/Equipment Detail pages to record details of any incidents involving the employee and the car, or use the Monitor Health and Safety menus.

You can allocate a company car, without transfer of property, to a director or worker earning more than the statutory threshold. This car is then also available to the worker or director for private use.

There are various tax implications when you allocate a company car to a worker. Companies pay tax in the form of Class 1A National Insurance Contributions (NICs). Workers pay income tax based on their tax codes, which is adjusted to take into account the taxable benefit of the car. In both cases, the taxable benefit is based on the list price, business mileage, age, and periods of unavailability of the car. To find out more about legal requirements, contact the Inland Revenue.

[Setting Up the Company Car Benefit Plan](#)

Calculate P11D Information Page

Use the Calculate P11D Information page (RUNCTL_COMPCAR001) to calculate the P11D Information amounts, run the CAR001 process.

You can run the report for one worker at a time or for all eligible workers.

Navigation

Benefits > Provide Company Cars > Calculate P11D Information > Calculate P11D Information

Image: Calculate P11D Information page

This example illustrates the fields and controls on the Calculate P11D Information page.

Run Control ID	Displays the run control ID that you entered.
Tax Year End	Define values on the Translate table
Empl ID (employee identification)	Leave this field blank to run the report for all eligible workers, or enter an ID to run the report for only one worker.
Employment Record Number	Leave this field blank to run the report for all worker records, or enter an employment record number to run the report for only one worker record.
Run	Click this button to calculate P11D Information.

Verify P11D Information Page

Use the Verify P11D Information page (P11D_SEC_A_UK) to verify P11D Information calculation results online.

Navigation

Benefits > Provide Company Cars > Verify P11D Information > Verify P11D Information

Image: Verify P11D Information page

This example illustrates the fields and controls on the Verify P11D Information page.

Each data row relates to a car for the worker per tax year. If a worker had two cars during the tax year, there are two data rows for that worker. If a worker had the same car for two tax years, there are also two rows of data. Use the scroll arrows to move between rows.

If you find errors in the display-only fields on the page, update the core data and rerun CAR001.

Tax Year End, Car available from and Payment received - private use Display values that you defined on the Assign Type of Car/ Dates page.

Make and Model and Registration Date Display values that you defined on the Car Data page.

CO2 Emissions g/km (carbon dioxide emissions in grams per kilometer) and **Tax Percentage** Displays value that you defined on the Emissions Data UK page.

Business Mileage Select from: *2,499 or less, 2,500 – 17,999, or 18,000 or more.*

List Price Displays the value that you defined on the Car Model page.

Accessories-before car avail., Total = car + accessories, and Accessories-after car avail. Displays values that you defined on the Car Data page.

Capital Contribution Display values that you defined on the Assign Type of Car/ Dates page.

Car Benefit Charge Adjust benefit charge amounts that require complex manual calculations.

Fuel

Fuel provided for private use and Full cost of fuel reimbursed Display values that you defined on the Assign Type of Car/Dates page.

Engine Type and Engine Size Displays values that you defined on the Car Model page.

Values are: *1400cc or less*, *1401cc – 2000cc*, and *over 2000cc*

Fuel Benefit Charge Adjust benefit charge amounts that require complex manual calculations.

Running Company Car Reports

This topic discusses how to run company car reports.

Pages Used to Run Company Car Reports

Page Name	Definition Name	Usage
Car List Page	PRCSRUNCNTL	Run the Car List report (CAR003) that produces a list of cars in the company's fleet and list basic information.
Print P11D Information Page	RUNCTL_COMPCAR001	Run the Print P11D Information report (CAR002) to print the results from the CAR001 process in a format similar to the UK government form P11D. You can run the report for a selected employee or all eligible employees in a given tax year. Before using this page, you must have run the CAR001 report process.

Chapter 4

(GBR) Defining Tax Percentages and Engine Types

Understanding Emissions Taxes

In the United Kingdom, the government bases the automobile tax charge on a percentage of the car price graduated according to the level of the car's carbon dioxide (CO₂) emissions. See the CO₂ Emissions Tax Table on the Inland Revenue site for appropriate charges.

Use the emissions data table to add new rates or adjust the values of rates that are already defined in the system.

The system also contains predetermined data for engine types and the associated discounts. Use the Define Engine Type table to add new engine types and discounts or adjust the values already defined in the system.

These discounts apply only to cars that were first registered on January 1, 1998 or later.

Defining Tax Percentages and Engine Types

To define tax percentages and engine types, use the Define Emissions Data (EMISSIONS_DATA) and Define Engine Type (ENGINE_TYPE) components.

This topic discusses how to define tax percentages and engine types.

Pages Used to Define Tax Percentages and Engine Types

<i>Page Name</i>	<i>Definition Name</i>	<i>Usage</i>
<u>Define Emissions Data Page</u>	EMISSIONS_DATA_UK	Define tax percentages by year and gram per kilometer emissions per regulations.
<u>Define Engine Type Page</u>	ENGINE_TYPE_UK	Define engine types and determine the associated tax discounts per regulations.

Define Emissions Data Page

Use the Define Emissions Data page (EMISSIONS_DATA_UK) to define tax percentages by year and gram per kilometer emissions per regulations.

Navigation

Benefits > Provide Company Cars > Define Emissions Data > Define Emissions Data

Image: Define Emissions Data page

This example illustrates the fields and controls on the Define Emissions Data page.

- Tax Percentage** Displays the tax percentage that you entered to access the page.
- Tax Year End** Enter the tax year that defines the taxation rate.
- CO2 Emissions g/km** Enter the associated carbon dioxide emissions as grams per kilometer.

Define Engine Type Page

Use the Define Engine Type page (ENGINE_TYPE_UK) to define engine types and determine the associated tax discounts per regulations.

Navigation

Benefits > Provide Company Cars > Define Engine Type > Define Engine Type

Image: Define Engine Type page

This example illustrates the fields and controls on the Define Engine Type page.

Engine Type	Displays the engine type that you entered to access the page.
Base Discount % (base discount percentage)	Enter the base discount that is associated with this engine type.
Emissions Discount % (emissions discount percentage)	Enter an additional emissions discount if one is applicable.
Emissions Discount gms (emissions discount grams)	For hybrid-electric vehicles, enter an additional discount. The discount calculates as 1 percent of the price for each full 20g/km by which the CO ₂ emissions figure is below the qualifying level for the minimum charge for the year.
