2. Mudarabah Corporate Islamic Financing

Oracle FLEXCUBE facilitates Corporate Islamic Financing through a process flow. Trustee partnership based on Mudarabah is a mode of financing through which the bank provides capital finance for a specific venture indicated by the customer. The bank is the owner of the capital and the customer-entrepreneur, is responsible for the management of the business and provides professional, managerial and technical expertise for initiating and operating the business enterprise or project. Profit is shared according to a pre-agreed ratio. Losses if any will have to be absorbed by the capital provider – the bank.

This chapter contains the following topics:

- Section 2.1, "Process Flow Diagram"
- Section 2.2, "Process Matrix"
- Section 2.3, "Stages in Corporate Islamic Financing Process Flow"
- Section 2.4, "Corporate Islamic Financing Application Details"
2.1 Process Flow Diagram

The process flow diagram given below illustrates the activities carried out during various stages of Corporate Islamic Financing.
## 2.2 Process Matrix

The process matrix given below lists out the different stages, condition to move to next stage, target stage and remarks for each condition.

Acquiring a Stage

To acquire a stage, you need to go to the ‘Task’ menu and select ‘Assigned’ under ‘Standard’ option.

You can acquire a task by performing the following tasks:

1. Search for the application from the Quick search / Standard search options (or) look for the application in the assigned Queue.
2. Select the task and click on Acquire button.

All tasks that have been successfully completed are listed in the right side of the screen. Select the check box against your ‘Workflow Ref No’ and click ‘Acquire’ button at the top of the screen to acquire the next stage of the task.

The system displays the message as ‘Acquire Successful’ on successful acquisition of the task.

Click ‘Ok’ to proceed to the next stage. To select the acquired task for the next stage, select ‘Acquired’ under ‘Standard’ option in the ‘Task’ menu. All the tasks that have been successfully acquired are displayed in the right side of the screen. Search for your workflow reference number and click the ‘Workflow Ref No’ to open the required screen.

2.3 Stages in Corporate Islamic Financing Process Flow

Mudarabah process flow uses Oracle BPMN framework with multiple human tasks for workflow stages. The capture and enrichment of information in multiple steps can be dynamically assigned to different user roles, so that multiple users can take part in the transaction. Oracle Business rules are used for dynamic creation of multiple approval stages.

Following are the stages involved in Mudarabah Corporate Islamic Financing:
Step 1. Financing Transaction Initiation

In the application entry stage, you can initiate the Mudarabah contract and capture the requested details. The system populates the applicants details maintained. You can capture the purchase details of the asset in the Purchase Details tab. The system defaults the Asset type from the product. Click ‘Multiple Asset’ button to enter the details about the asset. You can pull Lead data and simulate application details. You can attach interactions to the application and upload the documents maintained for this stage.

Step 2. Application Follow-up

At this stage, you can upload the documents collected from the applicant and follow up if necessary documents are not submitted by the applicant. The Document Support team verifies and uploads the documents which are provided by the customer. The system does not allow modification of any other data in this stage. The collected documents are scanned and uploaded along with application.

Step 3. Application Enrichment

At this stage, the application is enriched with the details like Director Details, Financial Details, Linkages, and so on. The user can modify the customer details, if required. In this stage, the user can enter the asset details and multiple asset details. The system validates duplication of applications and applicants for CIF, CASA, Collaterals, Facilities, Cheque Book validation during SAVE operation.

Step 4. Risk Evaluation

At this stage, the user can evaluate the risk associated with the applicant and the application. The user can capture the risk based on credit scores and credit ratios. The user can perform horizontal and vertical analysis. The system does not allow modification of customer data and other data provided in the previous stages.

Step 5. Legal Opinion

At this stage, any legal constraints associated with the applicant and the finance application are evaluated. The system does not allow modification of customer data and other data provided in the previous stages.

Step 6. Credit Analysis

In this stage, the Underwriter evaluates the financial documents and project details provided by the customer. The underwriter prepares the initial credit write up in this stage that includes standard set of terms and conditions. This credit write up is submitted to the credit admin for review and support. The system does not allow modification of customer data and other data provided in the previous stages.

Step 7. Collateral Evaluation

At this stage, the collaterals submitted for the finance application are evaluated. After evaluation the details are passed on to the underwriter. In case, if the collateral is new, then Collateral Creation process flow is initiated. The system does not allow modification of customer data and requested details in this stage.
Step 8. Underwriting Pre-Qualification

In this stage, the Credit Admin retrieves the documents and reviews it. Financial statements are put in a standard template and basic analysis is done including bank policy Islamic financing norms compliance checks. Details such as Terms and Conditions, Deviations, Summary, Comments, Documents can be captured in this stage.

You can view the details of the property such as, ‘End Of Construction Date’, ‘Bank share%’ and ‘Customer share%’ values along with other financing details.

Step 9. Underwriting Pre-Qualification Approval

At this stage, underwriter reviews the basic analysis done by the credit along with the application and supporting documents. Underwriter will decide whether to proceed with the deal or not based on the given information. The system allows modification of initial credit analysis done.

The underwriter evaluates the financial documents and project details provided by the customer and prepares the initial credit write up in this stage that includes standard set of terms and conditions. This credit write up is submitted to the credit admin for review and support. The system does not allow modification of customer data and other data provided in the previous stages.

Step 10. Underwriting Proposal Preparation

At this stage, the credit admin evaluates the application based on the inputs from the previous stages. The credit admin will review the initial credit write up and decides to support or reject the application. The credit admin will also have the option to send the application to underwriter for revision. The underwriter arrives at the interest rate, tenor and the charges, based on the evaluation of the application with details and analysis performed so far. The Underwriter prepares the final credit recommendation summary that will include all aspects of the deal like borrower details, finance details, underwriting details, pricing, justification for recommendation and final term sheet.

Step 11. Underwriting Proposal Review

At this stage, the Credit Admin reviews the credit recommendation summary. If there is any error, then the credit admin routes the application back to underwriter for rectification. The system does not allow any modification of details in this stage by the credit admin.

Step 12. Sanction Approval

At this stage, the Credit Admin approves or rejects the application based on the credit recommendation summary. The Credit Admin can add comments justifying the sanction. The system does not allow modification of data provided in earlier stages. The system generates the sanction letter for approval or regret letter for rejection as the case may be and send it to the account manager.

Step 13. Sanction Letter Review

At this stage, the account manager reviews the sanction letter or regret letter and sends it to the borrower.
Step 14. Customer Sign-off

At this stage, the customer signs off the sanction letter acknowledging the terms mentioned therein. The document support team receives the signed copy of the sanction letter and uploads the same on to the system. If the borrower rejects the sanction, the application is terminated in this stage. The system does not allow modification of data provided in earlier stages.

Step 15. Documentation and TC Verification

At this stage, the finance documentation team prepares the finance documents for execution by the borrower. Once the documents are ready, it is sent to the borrower for sign off. The details entered in earlier stages cannot be modified.

Step 16. Documentation Follow Up

At this stage, a follow up is done on the mandatory documents, which are yet to be collected from the customer or the borrower. Once the documents are received, it is sent to the borrower for sign off. The details entered in earlier stages cannot be modified.

Step 17. Down Payment

At this stage, the user can do Down Payment for the contract. This is an optional stage. The task will come to this stage only when Down Payment amount is given. Down Payment can be done before or after finance account creation. The user can give the details about the payment amount and settlement account and proceed.

If the user has not given the payment details and preceded, then down payment will not happen for the account and will move to the next stage, but system will throw an override.

If the down payment is done before account creation, then once the account is created system will automatically link the down payment reference number to the finance account on creation.

If the down payment amount is not null and if down payment is not done, then account will be created in 'Uninitiated' status. Once the user does down payment for the entire down payment amount, the account status will be changed to 'Initiated'.

Step 18. Manual Retry

For any exception during the hand off/ unavailability of CI service, the instance is moved to Manual retry stage where the user is allowed to manually re-initiate the core hand off after core validation.

Step 19. Final Documentation

This stage is visited only if the 'Final Documentation Required' flag is checked in the 'Documents & TC Verification' stage. At this stage, documentation team will prepare the finance documents for execution.

Step 20. User Acceptance

At this stage, withdrawal from the lease contract due to some reasons after finance account creation is possible.
