Hook Description	Hook is placed in icpks_charge.Fn_Charge(), for MIS entries.
Description	Hook is placed in icpks_charge.Fn_Charge(), for MIS entries. All parameters received by kernel function are passed to the cluster hook. Additional parameters passed to cluster hook are mentioned in field "Additional Parameters". The variables mentioned in "Sent to Extensible Layer" field are passed to cluster hook. The variables mentioned in "Received from Extensible Layer" field are reassigned to kernel.

Description	Hook is placed in icpks_charge.Pr_Entries_Liq(), related to the MIS item. All parameters received by kernel function are passed to the cluster hook. Additional parameters passed to cluster hook are mentioned in field "Additional Parameters". The variables mentioned in "Sent to Extensible Layer" field are passed to cluster hook. The variables mentioned in "Received from Extensible Layer" field are reassigned to kernel.
