Oracle Banking Trade Finance Process Management

Welcome to the Oracle Banking Trade Finance Process Management (OBTFPM) User Guide. This guide provides an overview on the OBTFPM application and takes you through the various steps involved in creating and processing trade finance transactions.

This document will take you through following activities in OBTFPM:

- To create and handle Trade Finance transaction.
- Help users to conveniently create and process Trade Finance transaction

Overview

OBTFPM is a Trade Finance middle office platform, which enables bank to streamline the Trade Finance operations. OBTFPM enables the customers to send request for new Trade Finance transaction either by visiting the branch (offline channels) or through SWIFT/Trade Portal/other external systems (online channels).

Benefits

OBTFPM helps banks to manage trade finance operations across the globe in different currencies. OBTFPM allows you to:

- Handle all trade finance transactions in a single platform.
- Provides support for limit verification and limit earmarking.
- Provide amount block support for customer account.
- Provides acknowledgement to customers.
- Enables the user to upload related documents during transaction.
- Enables to Integrate with back end applications for tracking limits, creating limit earmarks, amount blocks, checking KYC, AML and Sanction checks status.
- Create, track and close exceptions for the above checks.
- Enables to use customer specific templates for fast and easy processing of trade transactions that reoccur periodically.

Key Features

- Stand-alone system that can be paired with any back end application.
- Minimum changes required to integrate with bank's existing core systems.
- Faster time to market.
- Capable to interface with corporate ERP and SWIFT to Corporate.
- Highly configurable based on bank specific needs.
- Flexibility in modifying processes.

Export Documentary Collection Liquidation

Export Documentary Collection Liquidation process facilitates the user to handle the payment to an exporter from an importer via an intermediary bank.

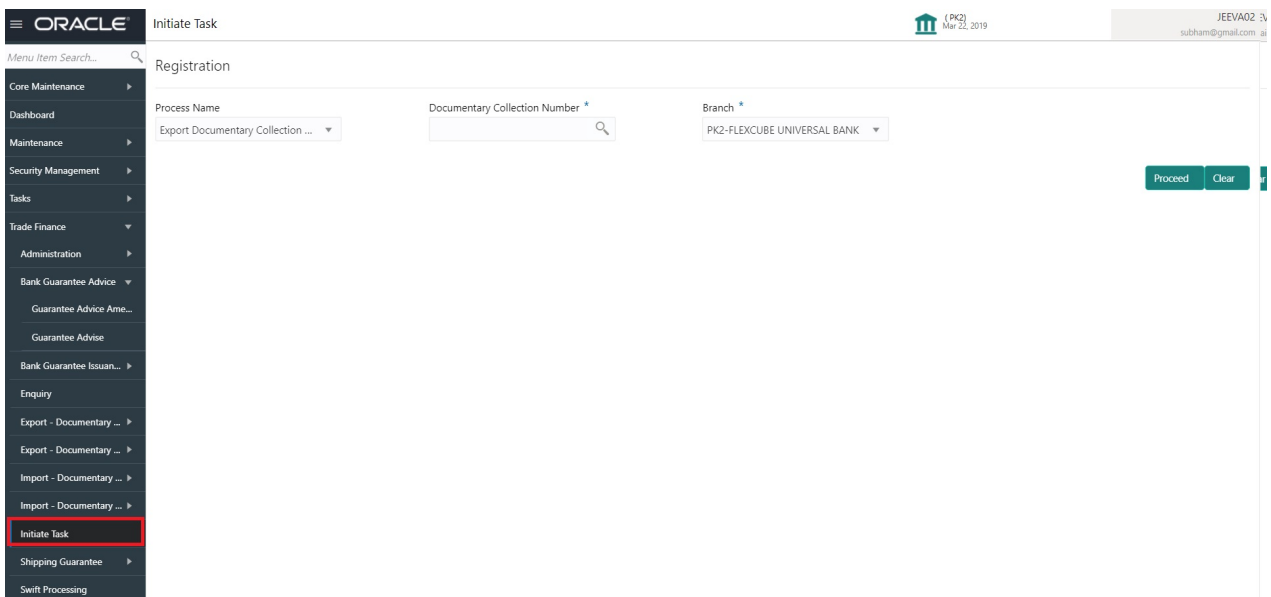

This section contains the following topics:

Common Initiation Stage	Data Enrichment
Exceptions	Multi Level Approval
Reject Approval	

Common Initiation Stage

The user can initiate the new export documentary collection liquidation request from the common Initiate Task screen.

1. Using the entitled login credentials, login to the OBTFPM application.
2. Click **Trade Finance > Initiate Task**.

Provide the details based on the description in the following table:

Field	Description
Process Name	Select the process name to initiate the task.
Documentary Collection Number	Select the Documentary Collection Number.
Branch	Select the branch.

Action Buttons

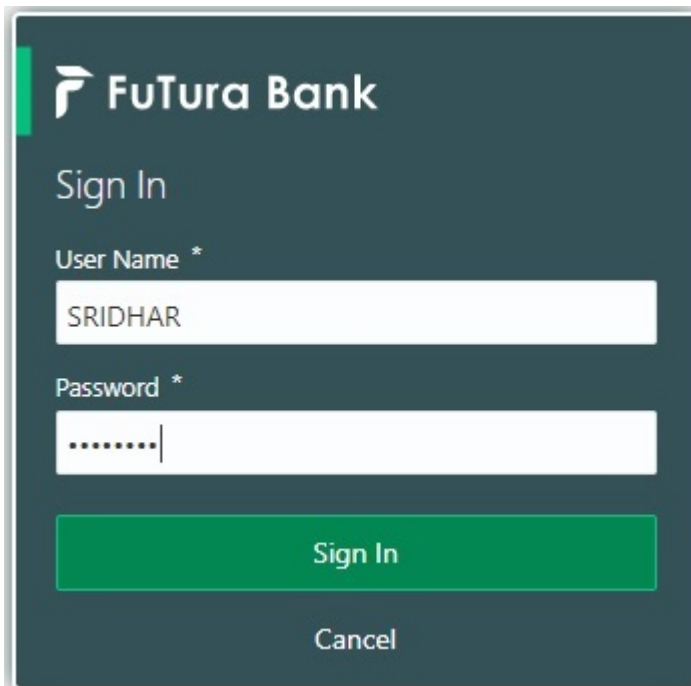

Use action buttons based on the description in the following table:

Field	Description
Proceed	Task will get initiated to next logical stage.
Clear	The user can clear the contents update and can input values again.

Registration

The process starts from Registration stage, during Registration stage, user can capture the basic details of the transaction and upload related documents. On submit, the request will be available for trade finance expert to handle the request in the next stage.

1. Using the entitled login credentials for Registration stage, login to the OBTFPM application.

The screenshot shows a dark-themed login interface for FuTura Bank. At the top left is the FuTura Bank logo. Below it, the text 'Sign In' is displayed. There are two input fields: 'User Name *' containing the text 'SRIDHAR' and 'Password *' containing masked characters. Below the input fields are two buttons: a green 'Sign In' button and a white 'Cancel' button.

2. On login, user must be able to view the dashboard screen with widgets as mapped to the user.

The screenshot shows the Oracle dashboard for a user named SRIDHAR01. The dashboard includes several widgets:

- High Value Transactions:** A bubble chart showing transactions for GBP and EUR over a period of 12 days. The y-axis ranges from 0 to 120K.
- High Priority Tasks:** A table listing tasks such as 'Import Documentary Collections' and 'Export LC Advising' with their respective statuses.
- Priority Summary:** A table summarizing priority tasks, including 'Export Documentary Collections-Update'.
- Pending Exception Approval:** A table with columns for Customer Name, Stage Name, Process Reference Number, Process Name, Branch Name, and Currency. It lists two entries for 'Amount Block Exception Approval' and 'Limit Earmarking Exception Approval'.
- SLA Status Summary:** A summary widget for SLA status.

3. Click Trade Finance> Export - Documentary Collection> Export Documentary Collection Liquidation.

This screenshot is similar to the previous one but shows the navigation menu on the left. The 'Export - Documentary C...' menu item is highlighted with a red box, indicating the user's current path through the system.

The Registration stage has two sections Application Details and Collection Details. Let's look at the details of Registration screens below:

Application Details

Provide the Basic Details based on the description in the following table:

Field	Description	Sample Values
Documentary Collection Number	Provide the Documentary Collection Number. Alternatively, user can search the Documentary Collection Number using LOV. In the LOV, user can search giving any combination details of Documentary Collection Number, Drawer, Currency, Amount, Product Code and Booking Date to fetch the collection details. Based on the search result, select the applicable documentary collection to update the details.	
Drawer	Read only field. Drawer ID and Drawer Name will be auto-populated based on the selected Documentary Collection Number.	
Branch	Read only field. Branch details will be auto-populated based on the selected Documentary Collection Number.	203-Bank Futura -Branch FZ1
Bill Amount	Read only field. Bill currency and amount will be auto-populated based on the selected Documentary Collection Number.	
Amount In Local Currency	System fetches the local currency equivalent value for the LC amount from back office (with decimal places).	
Process Reference Number	Unique OBTFPM task reference number for the transaction. This is auto generated by the system based on process name and branch code.	

Field	Description	Sample Values
Priority	System will populate the priority of the customer based on priority maintenance. If priority is not maintained for the customer, system will populate 'Medium' as the default priority. User can change the priority populated any time before submit.	High
Submission Mode	Select the submission mode of Export Documentary Collection Liquidation request. By default the submission mode will have the value as 'Desk'. Desk- Request received through Desk Courier- Request received through Courier	Desk
Liquidation Date	By default, the application will display branch's current date.	04/13/2018
Version Number	This field displays the latest version of the bill.	

Collection Details

Registration user can provide collection details in this section. Alternately, details can be captured by Data Enrichment user.

The screenshot shows the Oracle application interface for 'Export Documentary Collection Liquidation'. The 'Collection Details' section is highlighted with a red box. It contains the following fields:

- Documents Received: Read only field.
- Operation Type: ACC
- Bill Outstanding Amount: GBP £100,000.00
- Tenor Type: Usance
- Contract Reference Number: PK2EAY2191261003
- Liquidation Amount: GBP
- Product Code: EAY2
- Drawee: 001043 MARKS AND SPI
- Finance Amount: GBP
- Product Description: OUTGOING USANCE DOCUMENTARY BI
- Collecting Bank:
- Unlinked FX Rate:

Provide the Liquidation Details based on the description in the following table:

Field	Description	Sample Values
Documents Received	Read only field. Documents received details will be auto-populated based on the selected Documentary Collection Number.	
Tenor Type	Read only field. Tenor will be auto-populated based on the selected Documentary Collection Number.	

Field	Description	Sample Values
Product Code	Read only field. Product code will be auto-populated based on the selected Documentary Collection Number.	
Product Description	Read only field. This field displays the description of the product as per the product code.	
Operation Type	Operation Code will be auto-populated from the collection booking. User can update the operation code, if required.	
Contract Reference Number	System to populate contract reference number from the back end system once the Documentary Collection Number is selected.	
Drawee	Read only field. Drawee ID and Drawee Name will be auto-populated based on the selected Documentary Collection Number.	
Collecting Bank Name	Read only field. This field displays the Collecting Bank ID and name as per the collecting bank ID.	
Bill Outstanding Amount	Read only field. Bill Outstanding Amount will be auto-populated based on the selected Documentary Collection Number.	
Liquidation Amount	Provide the bill amount to be liquidated.	
Finance Amount	Read only field. Finance Amount will be auto-populated based on the selected Documentary Collection Number.	
Unlinked FX Rate	Provide the unlinked FX rate.

Action Buttons

Field	Description	Sample Values
Submit	On submit, task will move to next logical stage of Export Documentary Collection Liquidation. If mandatory fields have not been captured, system will display an error message until the mandatory fields data are provided.	
Save & Close	Save the information provided and holds the task in 'My Task' queue for working later. This option will not submit the request.	
Cancel	Cancels the Export Documentary Collection Liquidation Task. Details entered will not be saved and the task will be removed.	
Hold	The details provided will be saved and status will be on hold. User must update the remarks on the reason for marking the task as Hold. This option is used, if there are any pending information yet to be received from applicant.	

Data Enrichment

On successful completion of Registration of an Export Documentary Collection Liquidation, the task moves to Data Enrichment stage. At this stage the information captured during registration are validated.

Do the following steps to acquire a task at Free Task DE stage:

1. Using the entitled login credentials for Data Enrichment stage, login to the OBTFPM application.

2. On login, user must be able to view the dashboard screen with widgets as mapped to the user profile.

The screenshot shows the Oracle dashboard interface. The left sidebar contains navigation options: Core Maintenance, Dashboard, Maintenance, Security Management, Tasks, and Trade Finance. The main content area displays several widgets:

- High Value Transactions:** A bubble chart showing transaction values for GBP and EUR across a range of 0 to 12.
- High Priority Tasks:** A table listing tasks such as 'Import Documentary Collections', 'Export LC Advising', and 'Export LC Advising' with columns for Branch and Process Name.
- Priority Summary:** A table showing task details with columns for Branch, Process Name, and Customer Number.
- Pending Exception Approval:** A table with a search filter and columns for Customer Name, Stage Name, Process Reference Number, Process Name, Branch Name, and Currency. It lists entries like 'Amount Block Exception Approval' and 'Limit Earmarking Exception Approval'.
- SLA Status Summary:** A summary widget with a dropdown menu.

3. Click Trade Finance> Tasks> Free Tasks.

The screenshot shows the 'Free Tasks' page in the Oracle system. The left sidebar highlights 'Free Tasks' under the 'Tasks' category. The main content area features a table of tasks with the following columns: Action, Priority, Process Name, Process Reference, Stage, Application Date, Branch, and Customer Number. The table contains multiple rows of task data, including 'Export Documentary Li...', 'Import Documentary- B...', 'Import LC Issuance', and 'Export LC Drawing'. Above the table are buttons for 'Refresh', 'Acquire', 'Delegate', 'Reassign', and 'Flow Diagram'. At the bottom, there is a pagination control showing 'Page 1 of 40 (1 - 20 of 782 items)'.

4. Select the appropriate task and click **Acquire & Edit** to edit the task or click **Acquire** to edit the task from **My Tasks**.

The Data Enrichment stage has the following hops for data capture:

- Main Details
- Liquidation
- Additional Fields
- Advices
- Additional Details
- Settlement Details
- Summary

Let's look at the details for Data Enrichment stage. User can enter/update the following fields. Some of the fields that are already having value from registration channels may not be editable.

Main Details

Main details section has two sub section as follows:

- Application Details
- Collection Details

Application Details

All fields displayed under Basic details section, would be read only except for the **Priority**. Refer to [Application Details](#) for more information of the fields.

The screenshot shows the Oracle application interface for 'Export Documentary Collection Liquidation - DataEnrichment - Application No: PK2EDCL000057015'. The 'Main Details' section is expanded to show 'Application Details', which is highlighted with a red border. The fields in this section are: Documentary Collection Number (PK2EAY2191261003), Drawer (001044 GOODCARE PLC), Branch (PK2-FLEXCUBE UNIVERSAL BANK), Bill Amount (GBP £100,000.00), Amount In Local Currency (GBP £100,000.00), Process Reference Number (PK2EDCL000057015), Priority (Medium), Submission Mode (Desk), and Liquidation Date (May 6, 2019). Other sections visible include 'Collection Details' with fields like Documents Received, Tenor Type (Usance), Product Code (EAY2), Product Description (OUTGOING USANCE DOCUMENTRY BI), Operation Type (ACC), Contract Reference Number (PK2EAY2191261003), Drawee (001043 MARKS AND SP), Collecting Bank, and Bill Outstanding Amount (GBP £100,000.00). The interface includes a navigation menu on the left, a top header with user and session information, and a bottom toolbar with buttons like 'Audit', 'Reject', 'Refer', 'Hold', 'Cancel', 'Save & Close', 'Back', and 'Next'.

Collection Details

The fields listed under this section are same as the fields listed under the [Collection Details](#) section in [Registration](#). Refer to [Collection Details](#) for more information of the fields. During Registration, if user has not captured, then user can capture the details in this section. If details were captured in Registration stage, the DE user can edit/update them.

This screenshot is identical to the one above, showing the Oracle application interface for the same application. In this view, the 'Collection Details' section is highlighted with a red border. The fields in this section are: Documents Received, Tenor Type (Usance), Product Code (EAY2), Product Description (OUTGOING USANCE DOCUMENTRY BI), Operation Type (ACC), Contract Reference Number (PK2EAY2191261003), Drawee (001043 MARKS AND SP), Collecting Bank, and Bill Outstanding Amount (GBP £100,000.00). The 'Application Details' section is also visible but not highlighted. The interface elements, including the navigation menu, top header, and bottom toolbar, are consistent with the previous screenshot.

Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Documents	<p>Click the Documents icon to View/Upload the required documents.</p> <p>Application will display the mandatory and optional documents.</p> <p>The user can view and input/view application details simultaneously.</p> <p>When a user clicks on the uploaded document, Document window get opened and on clicking the view icon of the uploaded document, Application screen should get split into two. The one side of the document allows to view and on the other side allows to input/view the details in the application.</p>	
Remarks	<p>Click the Remarks icon to provide any additional information. This information can be viewed by other users processing the request.</p> <p>Content from Remarks field should be handed off to Remarks field in Backend application.</p>	
Overrides	Click to view the overrides accepted by the user.	
View Collection	Enables the user to view the latest collection values displayed in the respective fields.	
Save & Close	<p>Save the details provided and holds the task in 'My Task' queue for further update.</p> <p>This option will not submit the request.</p>	
Cancel	Cancel the Data Enrichment stage inputs. The details updated in this stage are not saved. The task will be available in 'My Task' queue.	
Hold	<p>The details provided will be saved and status will be on hold. User must update the remarks on the reason for holding the task.</p> <p>This option is used, if there are any pending information yet to be received from applicant.</p>	

Field	Description	Sample Values
Reject	<p>On click of Reject, user must select a Reject Reason from a list displayed by the system.</p> <p>Reject Codes:</p> <ul style="list-style-type: none"> • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others. <p>Select a Reject code and give a Reject Description.</p> <p>This reject reason will be available in the remarks window throughout the process.</p>	
Refer	<p>User must select a Refer Reason from the values displayed by the system.</p> <p>Refer Codes:</p> <ul style="list-style-type: none"> • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others. 	
Next	<p>On click of Next, system should validate if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment.</p>	

Liquidation

Liquidation hop enables the user to provide details to process the liquidation.

Draft Details

Update the draft details based on the description in the following table:

Field	Description	Sample Values
Draft Code	Read only field. This field displays the draft code.	
Draft Amount	Read only field. This field displays the draft amount based on the documents submitted under Export Collection Booking.	

Field	Description	Sample Values
Action	Click Edit icon to edit the draft code. Click Delete icon to delete the draft code.	

Maturity and Multi Tenor Liquidation Details

Provide the maturity details based on the description in the following table:

Field	Description	Sample Values
SNo.	Serial number of the tenor record.	
Tenor Basis	Read only field. This field displays the tenor basis, if the tenor is not sight.	
Tenor Start Date	Read only field. This field displays the tenor start date.	
Tenor Days	Read only field. This field displays the number of tenor days.	
Transit Days	Read only field. This field displays the transit days, if the tenor is sight.	
Maturity Date	Read only field. This field displays the due date for the drawing based on tenor and tenor basis. If tenor is sight, system will calculate the maturity date as 5 working days from document Received date. User can change this value to any date earlier than the maturity date up to system date. User cannot change the value to later than maturity date. If tenor is Usance, system will calculate the maturity date based on the tenor basis and populate the maturity date.	
Bill Amount	Read only field. This field displays the the bill amount.	
Liquidated Amount	Provide the liquidation amount.	
Exchange Rate	Provide the Exchange Rate.	
Liquidation Date	Provide the liquidation date.	
Liquidation Amount	Provide the bill amount.	
Action	Click Edit icon to edit the tenor record. Click Delete icon to delete the tenor record.	

In case of multi tenor, user can provide multiple maturity details by clicking the plus icon.

Field	Description	Sample Values
Interest from Date	Read only field. This field displays the interest from date. The interest from date cannot be earlier than branch date and later than maturity date.	
Interest to Date	Read only field. This field displays maturity date in this field, if Interest from Date is provided.	
Acceptance Commission From Date	Read only field. This field displays the acceptance commission from date.	
Acceptance Commission To Date	Read only field. This field displays the acceptance commission to date.	

Additional Fields

Banks can configure user defined fields as per their requirement in the Additional Fields Screen.

The screenshot displays the Oracle Flexcube Universal Banking interface for the 'Additional Fields' screen. The top navigation bar shows 'ORACLE My Tasks' and 'FLEXCUBE UNIVERSAL BAN...' with the date 'Jan 1, 2014' and user 'SRIDHAR01'. Below this, the breadcrumb path is 'Export Documentary Liquidation - DataEnrichment :: Application No: 000EDCL000029877'. The main content area is titled 'Additional Fields' and contains the message 'No Additional fields configured!'. The left sidebar lists navigation options: 'Main Details', 'Liquidation', 'Additional Fields' (selected), 'Advices', 'Additional Details', 'Settlement Details', and 'Summary'. At the bottom, there is an 'Audit' button on the left and a row of action buttons: 'Reject', 'Refer', 'Hold', 'Cancel', 'Save & Close', 'Back', and 'Next'.

Advices

Advices maintained in the back office will be defaulted in this tile format. User can suppress the advices that are not required for the task. The user can suppress the advice, if required.

Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Documents	Click the Documents icon to View/Upload the required documents.	
Remarks	Click the Remarks icon to provide any additional information. This information can be viewed by other users processing the request. Content from Remarks field should be handed off to Remarks field in Backend application.	
Overrides	Click to view the overrides accepted by the user.	
View Collection	Enables the user to view the latest collection values displayed in the respective fields.	
Submit	Task will move to next logical stage of Export Documentary Collection Liquidation. If mandatory fields have not been captured, system will display an error message highlighting that the mandatory fields have to be updated. In case of duplicate documents' system will terminate the process after handing off the details to back office.	
Save & Close	Save the details provided and holds the task in 'My Task' queue for further update. This option will not submit the request.	
Cancel	Cancel the Data Enrichment stage inputs. The details updated in this stage are not saved. The task will be available in 'My Task' queue.	
Hold	The details provided will be saved and status will be on hold. User must update the remarks on the reason for holding the task. This option is used, if there are any pending information yet to be received from applicant.	
Reject	On click of Reject, user must select a Reject Reason from a list displayed by the system. Reject Codes: <ul style="list-style-type: none"> ● R1- Documents missing ● R2- Signature Missing ● R3- Input Error ● R4- Insufficient Balance/Limits ● R5 - Others. Select a Reject code and give a Reject Description. This reject reason will be available in the remarks window throughout the process.	

Field	Description	Sample Values
Refer	<p>User must select a Refer Reason from the values displayed by the system.</p> <p>Refer Codes:</p> <ul style="list-style-type: none"> • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others. 	

Exceptions

The Export Collection Liquidation request, before the task moves to the approval stage, the application will validate the Amount Block, KYC and AML. A failure in validation of any of them, the task will reach exception stage for further approval for the exceptions.

Exception - Amount Block

As part of amount block validation, application will check if sufficient balance is available in the account to create an amount block. On hand-off, system will debit the blocked account to the extent earmark and credit charges/ commission account in case of charges block or credit the amount in suspense account for earmarks created for collateral.

The transactions that have failed amount block due to non-availability of amount in respective account will reach the amount block exception stage.

Log in into OBTFPM application, amount block exception queue. Amount block exception tasks for Trade transactions will be listed in the queue. Open the task to view summary of updated available fields with values.

Exception is created when sufficient balance is not available for blocking the settlement account and the same can be addressed by the approver in the following ways:

Approve:

- Settlement amount will be funded (outside of this process)
- Allow account to be overdrawn during hand-off

Refer:

- Refer back to DE providing alternate settlement account to be used for block.
- Different collateral to be mapped or utilize lines in place of collateral.

Reject:

Reject the transaction due to non-availability of sufficient balance in settlement account

Amount Bock Exception

This section will display the amount block exception details.

Summary

Tiles Displayed in Summary:

Hold	<p>The details provided will be registered and status will be on hold.</p> <p>This option is used, if there are any pending information yet to be received from applicant.</p>	
Refer	<p>User will be able to refer the task back to the Data Enrichment user. User must select a Refer Reason from the values displayed by the system.</p> <p>Refer Codes:</p> <ul style="list-style-type: none"> • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance- Limits • R5 - Others 	
Cancel	<p>Cancel the Export Collection Booking Amount Block Exception check.</p>	
Approve	<p>On approve, application must validate for all mandatory field values, and task must move to the next logical stage.</p>	
Back	<p>Task moves to previous logical step.</p>	

Exception - Know Your Customer (KYC)

As part of KYC validation, application will check if necessary KYC documents are available and valid for the applicant. The transactions that have failed KYC due to non-availability / expired KYC verification will reach KYC exception stage.

Log in into OBTFPM application, KYC exception queue. KYC exception failed tasks for Trade Finance transactions will be listed in your queue. Open the task, to see summary tiles that display a summary of available updated fields with values.

User can pick up a transaction and do the following actions:

Approve

- After changing the KYC status in the back end application (outside this process).
- Without changing the KYC status in the back end application.
- Reject (with appropriate reject reason).

Summary

Tiles Displayed in Summary:

- Main Details - User can view details about application details and LC details.
- Party Details - User can view party details like applicant, advising bank etc.
- Document Details - User can view document details.
- Draft Details - User can view the draft details.
- Shipment Details - User can view shipment details.
- Charges - User can view charge details.
- Maturity Details - User can view the maturity details.
- Advices - User can view the advices.
- Payment Details - User can view the payment details.
- FX Linkage - User can view the FX Linkage details.
- Settlement Details - User can view the settlement details.
- Message Preview - User can view the preview of the simulating message to the remitting bank.
- Compliance - User can view compliance details. The status must be verified for KYC and to be initiated for AML and Sanction Checks.

Field	Description	Sample Values
Cancel	Cancel the Export Collection Booking Limit exception check.	
Approve	On approve, application must validate for all mandatory field values, and task must move to the next logical stage.	
Back	Task moves to previous logical step.	

Multi Level Approval

Log in into OBTFPM application and acquire the task available in the approval stage in free task queue. Authorization User can acquire the task for approving.

Authorization Re-Key (Non-Online Channel)

For non online channel, application will request approver for few critical field values as an authorization step. If the values captured match with the values available in the screen, system will allow user to open the transaction screens for further verification. If the re-key values are different from the values captured, then application will display an error message.

Open the task and re-key some of the critical field values from the request in the Re-key screen. Some of the fields below will dynamically be available for re-key.:

- Drawee Name
- Drawer Name
- Bill Currency
- Bill Amount

Re-key is applicable to the first approver in case of multiple approvers. All approvers will however be able see the summary tiles and the details in the screen by drill down from tiles.

The screenshot displays the FuTura Bank application interface. On the left is a navigation menu with categories like Core Maintenance, Dashboard, Maintenance, Security Management, Tasks, and Trade Finance. The main area shows a 'Free Tasks' table with columns for Action, Priority, Application Number, Process Name, Stage, and Back Office Ref No. A modal dialog titled 'Approval Rekey' is open, containing fields for 'Applicant Party' (000262) and 'Application Date' (Feb 1, 2019), both with green checkmarks indicating successful validation. The dialog also has buttons for 'Incoming Message', 'Documents', 'Remarks', 'Proceed', 'Refer', and 'Cancel'. The background table shows several task entries, including 'Import LC Liquidation' and 'Export LC Advising'.

Cancel	Cancel the approval.	
Approve	<p>On approve, application must validate for all mandatory field values, and task must move to the next logical stage. If there are more approvers, task will move to the next approver for approval. If there are no more approvers, the transaction is handed off to the back end system for posting.</p>	

Reject Approval

As a Reject approver, user can review a transaction rejected and waiting for reject confirmation.

Log in into OBTFPM application to view the reject approval tasks for Import Documentary Collection Booking available in queue. On opening the task, you will see summary tiles. The tiles will display a list of important fields with values.

The screen from which the reject was initiated can be seen highlighted in the tile view.

User can drill down from reject summary tiles into respective data segments to verify the details of all fields under the data segment.

Summary

The screen up to which data was captured before reject will be available for the user to view in the summary tile. Other fields will be blank when verified from summary tile.

The data segment in which the task was rejected will have the tiles highlighted in a different colour (red).

- Main Details - User can view details about application details and document under collection.
- Party Details - User can view party details like applicant, Remitting Bank etc.
- Document Details - User can view document details.
- Shipment Details - User can view shipment details.
- Charges - User can view charge details.
- Maturity Details - User can view the maturity details.
- Message Preview - User can view the preview of the simulating message to the remitting bank.

Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Reject Approve	On click of Reject Approve, the transaction is rejected.	
Reject Decline	On click of Reject Decline, the task moves back to the stage where it was rejected. User can update the reason for reject decline in remarks.	
Hold	User can put the transaction on 'Hold'. Task will remain in Pending state.	
Cancel	Cancel the Reject Approval.
