Oracle Banking Trade Finance Process Management

Welcome to the Oracle Banking Trade Finance Process Management (OBTFPM) User Guide. This guide provides an overview on the OBTFPM application and takes you through the various steps involved in creating and processing trade finance transactions.

This document will take you through following activities in OBTFPM:
- To create and handle trade finance transaction.
- Help users to conveniently create and process trade finance transaction

Overview

OBTFPM is a trade finance middle office platform, which enables bank to streamline the trade finance operations. OBTFPM enables the customers to send request for new trade finance transaction either by visiting the branch (offline channels) or through SWIFT/Trade Portal/other external systems (online channels).

Benefits

OBTFPM helps banks to manage trade finance operations across the globe in different currencies. OBTFPM allows you to:
- Handle all trade finance transactions in a single platform.
- Provides support for limit verification and limit earmarking.
- Provide amount block support for customer account.
- Provides acknowledgement to customers.
- Enables the user to upload related documents during transaction.
- Enables to Integrate with back end applications for tracking limits, creating limit earmarks, amount blocks, checking KYC, AML and Sanction checks status.
- Create, track and close exceptions for the above checks.
- Enables to use customer specific templates for fast and easy processing of trade transactions that reoccur periodically.

Key Features

- Stand-alone system that can be paired with any back end application.
- Minimum changes required to integrate with bank's existing core systems.
- Faster time to market.
- Capable to interface with corporate ERP and SWIFT to Corporate.
- Highly configurable based on bank specific needs.
- Flexibility in modifying processes.

ORACLE®

Export LC Transfer Amendment

Transfer LC Amendment takes place usually when there is an amendment in the Export LC.

Following are some of the scenarios where transfer LC amendmentmay be required:

- Amendment of the Expiry Date
- Amendment of the Amount
- Amendment of the Latest Shipment date
- Amendment of the Goods Description
- Amendment of the Shipment Details
- Amendment of the Documents Required
- Amendment of the Additional Conditions

This section contains the following topics:

Common Initiation Stage	Registration
Scrutiny	Data Enrichment
Customer Response - Draft Confirmation	Multi Level Approval
Customer - Acknowledgement Format	Customer - Reject Format

Common Initiation Stage

The user can initiate the new export LC transfer amendment request from the common Initiate Task screen.

1. Using the entitled login credentials, login to the OBTFPM application.

2. Click **Trade Finance > Initiate Task.**
Provide the details based on the description in the following table:

Field	Description
Process Name	Select the process name to initiate the task.

ORACLE®

Field	Description
LC Reference Number	Select the LC Reference Number.
Branch	Select the branch.

Action Buttons

Use action buttons based on the description in the following table:

Field	Description
Proceed	Task will get initiated to next logical stage.
Clear	The user can clear the contents update and can input values again.

Registration

During the Registration stage, the user can register a request for an Export LC Transfer Amendment received at the front desk (as an application received physically/received by mail/fax).

User can capture the basic details of the response, check the signature of the signatory from the advising bank and upload the related documents. On submit of the request, the customer should be notified with acknowledgment and the request should be available for an LC expert to handle in the next stage.

1. Using the entitled login credentials for Registration stage, login to the OBTFPM application.

ORACLE®

2. On login, user must be able to view the dashboard screen with widgets as mapped to the user.
3. Click **Trade Finance> Export - Documentary Credit> Export LC Transfer Amendment.**
The Registration stage has two sections Application Details and Transfer LC Details. Let's look at the details of Registration screens below:

ORACLE®

Cancel	Cancel the Data Enrichment stage inputs.	
Hold	The details provided will be on hold. This option is used, if there are any pending information yet to be received from applicant and appropriate remarks must be provided.	
Reject	On click of Reject, user must select a Reject Reason from a list displayed by the system. Reject Codes: • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others. Select a Reject code and give a Reject Description. This reject reason will be available in the remarks window throughout the process.	
Next	On click of Next, system should validate if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment.	
Back	Click of Back to move the task to the previous segment.	

Customer Response - Draft Confirmation

The user can review and handle the customer's response received for the draft confirmation for Transfer LC Amendment transactions, which is sent to the customer for their verification and confirmation.

The Transaction Reference Number is masked before sending the Draft for Customer approval.

ORACLE®

The customer response can be received both by online and offline mode.In non-online mode, user receives the response in the branch.

Non Online mode - User will have a physical response of the customer.

In online mode the customer will share their response online that will be automatically updated in the customer response field in the task, which is available in the customer response pending stage.

Log in into OBTFPM application, and open the task to see customer response screen.

Multi Level Approval

This stage allows the approver user to review and approve the Export LC Transfer Amendment transaction.

Log in into OBTFPM application and open the task to see the summary tiles. The tiles should display a list of important fields with values. User must be able to drill down from summary Tiles into respective data segments to verify the details of all fields under the data segment.

Re-Key Authorization

For non-online channel, application will request approver for few critical field values as an authorization step. If the values captured match with the values available in the screen, system will allow user to open the transaction screens for further verification. If the re-key values are different from the values captured, then application will display an error message.

Open the task and re-key some of the critical field values from the request in the Re-key screen. Some of the fields below will dynamically be available for re-key.:

• Currency
• Contract Amount
• Expiry Date

ORACLE®

Re-key is applicable to the first approver in case of multiple approvers. All approvers will however be able see the summary tiles and the details in the screen by drill down from tiles.

Summary
