# Oracle Banking Trade Finance Process Management

Welcome to the Oracle Banking Trade Finance Process Management (OBTFPM) User Guide. This guide provides an overview on the OBTFPM application and takes you through the various steps involved in creating and processing trade finance transactions.

This document will take you through following activities in OBTFPM:

- To create and handle trade finance transaction.
- Help users to conveniently create and process trade finance transaction

## Overview

OBTFPM is a trade finance middle office platform, which enables bank to streamline the trade finance operations. OBTFPM enables the customers to send request for new trade finance transaction either by visiting the branch (offline channels) or through SWIFT/Trade Portal/other external systems (online channels).

## Benefits

OBTFPM helps banks to manage trade finance operations across the globe in different currencies. OBTFPM allows you to:

- Handle all trade finance transactions in a single platform.
- Provides support for limit verification and limit earmarking.
- Provide amount block support for customer account.
- Provides acknowledgement to customers.
- Enables the user to upload related documents during transaction.
- Enables to Integrate with back end applications for tracking limits, creating limit earmarks, amount blocks, checking KYC, AML and Sanction checks status.
- Create, track and close exceptions for the above checks.
- Enables to use customer specific templates for fast and easy processing of trade transactions that reoccur periodically.

## Key Features

- Stand-alone system that can be paired with any back end application.
- Minimum changes required to integrate with bank's existing core systems.
- Faster time to market.
- Capable to interface with corporate ERP and SWIFT to Corporate.
- Highly configurable based on bank specific needs.
- Flexibility in modifying processes.

## Data Enrichment

On successful completion of Registration of an Internal LC Amendment request, the request moves to Data Enrichment stage. At this stage the user enter/update the basic details of the amendment request and can verify if the request can be progressed further.

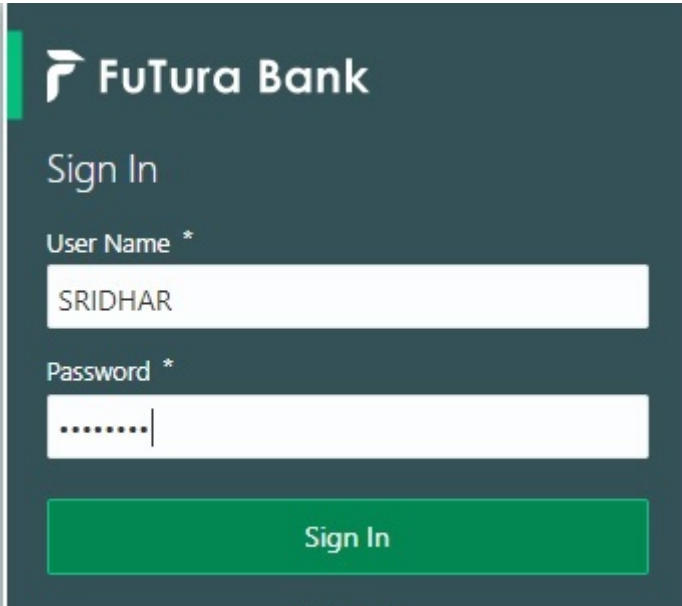

**Non-Online Channel** - Internal LC Amendment request that were received at the desk will move to Data Enrichment stage post successful Registration. The transaction will have the details entered during the Registration stage.

**Online Channel** - Requests that are received via SWIFT (MT730) are available directly for further processing in OBTFPM from Data Enrichment stage and relevant data should be auto populated.

For MT 730, system should validate the incoming MT 730 based on Related Reference field to identify whether it is Acknowledgment for Import LC or Export LC. If the MT 730 is for Import LC, system should process the MT 730 under Internal Amendment to Import LC.

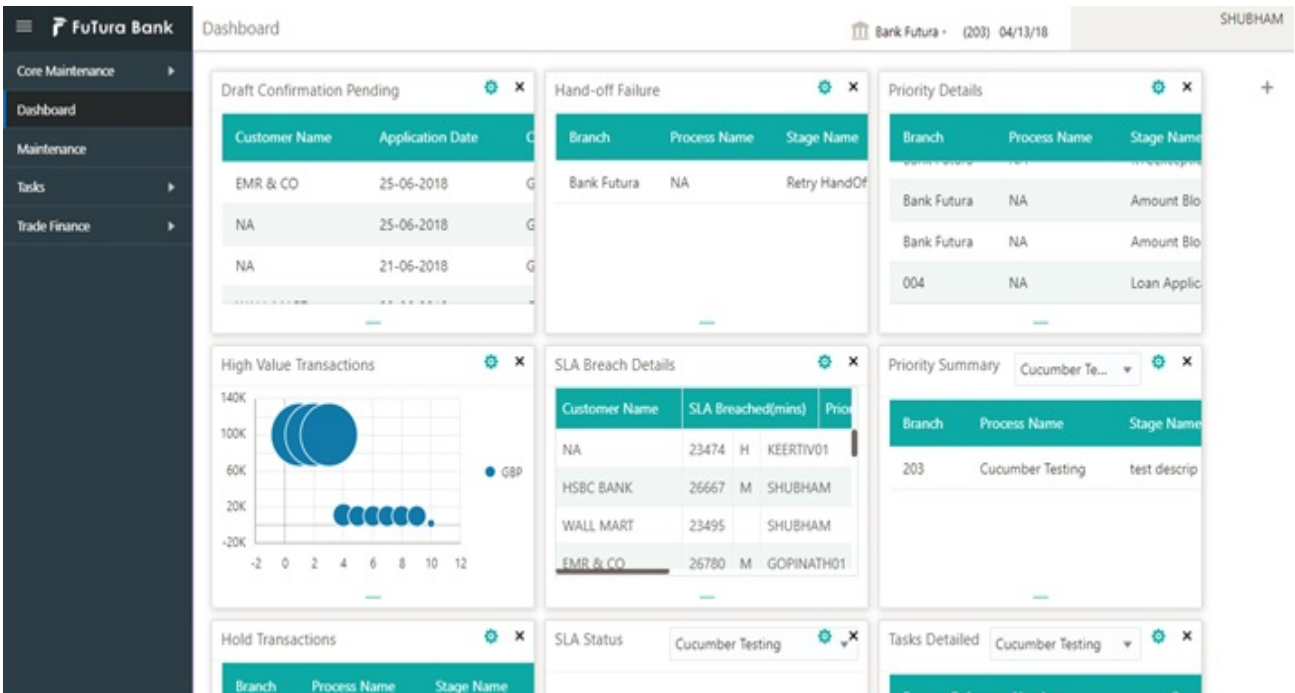

Do the following steps to acquire a task currently at Data Enrichment stage:

1. Using the entitled login credentials for Scrutiny stage, login to the OBTFPM application.

The image shows the login interface for FuTura Bank. It features a dark blue header with the bank's logo and name. Below the header, the text "Sign In" is displayed. There are two input fields: "User Name \*" with the value "SRIDHAR" and "Password \*" with masked characters. A green "Sign In" button is located at the bottom of the form.

2. On login, user must be able to view the dashboard screen with widgets as mapped to the user.

The image displays the FuTura Bank dashboard. The left sidebar contains navigation options: Core Maintenance, Dashboard, Maintenance, Tasks, and Trade Finance. The main dashboard area is titled "Dashboard" and shows the user's name "SHUBHAM" and the date "04/13/18". The dashboard is populated with several widgets:
