1. About this Manual

1.1 Introduction

This manual is designed to help acquaint you with the Oracle Banking Supply Chain Finance.

It provides an overview of the system and guides you, through the various steps involved in granting supply chain finance to the customers of your bank.

1.2 Audience

This manual is intended for the following User/ User Roles:

Role	Function
Back office executive	Input functions for transactions
Back office managers/officers	Authorization functions
Product Managers	Product definition and authorization

1.3 Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at http://www.oracle.com/us/corporate/accessibility/index.html.

1.4 Document Structure

This manual is organized into the following chapters:

Chapter	Description		
Chapter 1	About this Manual: This chapter gives information on the intended audience, Abbreviations, Icons, and summary of chapters covered in this User Manual.		
Chapter 2	Oracle Banking Supply Chain Finance - an overview: This chapter lists the benefits and functionalities provided by OBSCF.		
Chapter 3	3 Setting up reference data for Supply Chain Finance system.		
Chapter 4	4 How to perform finance disbursement.		
Chapter 5 How to perform finance settlement.			
Chapter 6	er 6 How to perform inquiries.		

1.5 Abbreviations

Abbreviation	Detailed Description
OBSCF	Oracle Banking Supply Chain Finance
VAM	Virtual Account Management
FCUBS	FlexCube Universal Banking System
OBDX	Oracle Banking Digital Experience
ELCM	Enterprise Limits and Collateral Management
API	Application Programming Interface (Conversion Open Interface)
FIFO	First In First Out
LIFO	Last In First Out

1.6 Glossary of Icons

This User Manual may refer to all or some of the following icons:

lcon	Function

٦	View

2. Supply Chain Finance

2.1 Overview

Oracle Banking Supply Chain Finance (OBSCF) is a comprehensive digitized end-to-end solution that supports the full lifecycle of supply chain finance across receivables and payables offering supplier centric financing and buyer centric financing. The solution addresses each of the supply chain processes from design through execution thereby enabling banks to optimize the working capital and supply chain operations of their corporate customers. Its unique value lies in its ability to provide the business with predefined processes and a world-class framework that takes care of business risk and compliance needs.

2.2 Benefits of SCF

- Suppliers are paid early
- Buyers can extend their payment terms
- Financial Institutions get their fee income at less risk and less cost.

OBSCF requires the involvement of its platform which enables the interaction between all the parties of the trade. OBSCF also needs an involvement of external finance provider i.e. Bank who settles supplier invoices in advance or on due date of the invoice, for a lower financing cost than the suppliers' own source of funds.

When the external finance provider extends finance, it can be at the request of supplier or at the request of buyer by earmarking the credit limits of the concerned party. Different types of finances come into picture depending upon the party requesting for finance.

2.3 Functionality

A Program is a linkage of a buyer to multiple suppliers or a supplier to multiple buyers.

Two types of Program exists in SCF:

- Supplier Centric Program When Supplier is the large corporate, the buyer whom supplier is dealing with becomes the counter party/ spoke and 'Supplier' becomes the 'Anchor' of the SCF program. Such a program is called as 'Supplier Centric Program'. The anchor links all his counter parties or spokes to the SCF program.
- **Buyer Centric Program** When Buyer is the large corporate, the seller whom buyer is dealing with becomes the counter party/ spoke and 'Buyer' becomes the 'Anchor' of the SCF program. Such program is called as 'Buyer Centric Program'. The anchor links all his counter parties or spokes to the SCF program.

2.4 Home: Dashboard

Successfully signing into the OBSCF application displays the dashboard as your home screen. Dashboard displays summary widgets internal to the bank. It is a collection of various portlets that are displayed based on your role and access rights. Dashboard enables you to perform various analytical functions. You can drag and move different portlets, resize, auto adjust the size, and expand/ collapse the portlet.

On launching the Oracle Banking Supply Chain Finance system, below login screen is displayed:

ORACLE
Sign In
User Name *
Password *
Sign In
Cancel

- 1. Enter your User Name and Password to access the application.
- 2. Click Sign In to log into application and display the Dashboard screen.

\equiv ORACLE [®]	Dashboard	血

- You can perform following actions on the dashboard portlets:
- To add more portlets, click the Add (+) icon located at the top-right corner of the Dashboard.
- \circ To remove a portlet, click the Remove (x) icon located at the portlet's top-right corner.
- To flip the portlet view, click the Flip Forward (<) or Flip Back (>) icon.
- To change the portlet's position, click and hold the "Drag to reorder" (.....) icon at the portlet's bottom-center and then move portlet to the desired position.
- \circ To apply filter on the portlet's data, click the Filter (\mathbb{T}) icon to view the pop-up select filter values.

3. Setup Reference Data

3.1 Introduction

.

Before you set up products for supply chain finance, you need to maintain certain basic reference information that you might need in order to set up products and process a finance request.

In the context of supply chain finance, for instance, you need to set up reference data like relationships, location details, product types, corporate details, product mappings and so on You may also need to identify administrators among the officers of your bank to whom you could assign the administration of supply chain finance system.

This section explains the maintenance of such reference information for the modules used for supply chain finance.

3.1.1 Maintaining Core Reference Data

Your bank needs to set up certain core reference data for the supply chain finance system to work. List of Country, Currency, Customer Category, List of Holidays, List of Banks, Branch, FX rates and so on.

Refer Common Core User Manual for setting up core reference data.

3.1.2 Maintaining System Level Parameters

.

Your bank needs to maintain various system level parameters to drive Supply Chain Finance system's behavior. This set up will be available as part of the application on Day 1.

Sr. No.	Parameter Name	Value to be maintained	Description
1	Hierarchy	DRP	Valid values - DPR,RDP,RDP,DRP
			D: Debtor, R – Program, P – Product
			During processing of the transaction, parameters like min/max finance percentage, auto finance applicable, mi/max tenor, and so on get be picked up in this order. In case DRP is maintained as the day zero value, if debtor parameters are maintained, those are applied else program level parameters are applied else product level parameters are applied
2	Parties	BUY – Buyer SUPP – Supplier	These are the various party codes (participants in the finance transaction) maintained.
3	Auto Finance Applicable	Y	This indicates if auto finance is applicable for the finance transaction. Valid Values – Y,N

The below parameters should be maintained at a system level:

Sr. No.	Parameter Name	Value to be maintained	Description
4	Allowed Mode for Disbursement	EFT, AC	This indicates the various modes of disbursement allowed for a finance. (AC Is Account Credit)
5	Allowed Mode for Settlement	EFT, AD, Cheque	This indicates the various modes of settlemen allowed for a finance
			(AD is Account Debit)
6	Auto Settlement Applicable	Y	This indicates if auto settlement is applicable for the finance repayment transaction. Valid Values – Y,N
7	Preferred Disbursement	AC	This indicates the preferred disbursement mode for the finance.
	Mode		Valid values are the ones mentioned in allowed mode for disbursement
8	Preferred Settlement	AD	This indicates the preferred settlement mode for the finance.
	Mode		Valid values are the ones mentioned in allowed mode for settlement
9	Min Finance Percentage	10	This is the minimum finance percentage allowed for a finance. This can be a value greater than 0 but less than or equal to 100
10	Max Finance Percentage	100	This is the maximum finance percentage allowed for a finance. This can be a value greater than 0 but less than or equal to 100
11	Min Tenor Allowed(Days)	10	This is the minimum tenor allowed for a finance. Any 4 digit numeric value can be allowed.
12	Max Tenor Allowed (Days)	90	This is the maximum tenor allowed for a finance. Any 4 digit numeric value can be allowed.
13	With Recourse	Ν	This is a parameter to categorize the finance - whether this finance is with recourse or without recourse. Valid values – Y,N
14	Stale Period (Days)	10	This is the period after which the invoice becomes stale and cannot be financed any more. This can be any numeric value in days equal to or less than 3 digits.
15	Minimum Waiting Period (Days)	30	This indicates the minimum period up to which the finance cannot be closed. This should be enabled only if pre-closure is allowed.
			This can be any 4 digit numeric value
16	Prepayment Allowed	Y	This indicates if prepayment for the finance is allowed. I.e. Part or full repayment before the finance due date.

Sr. No.	Parameter Name	Value to be maintained	Description Valid Values – Y/N
	_		
17	Part Repayment Allowed	Y	This indicates if part repayment is allowed. Valid Values – Y/N
18	Maturity Date Calculation	INVOICE_DUE_DATE	This indicates how the finance maturity date should be calculated. Valid Values – INVOICE_DATE + MT, INVOICE_DUE_DATE + x, INVOICE_DUE_DATE, PAYMENT_DUE_DATE (MT is maximum tenor) x is configured separately as 90
19	Multiple Disbursement Allowed	Y	This indicates if multiple disbursement is allowed. Valid values – Y,N
20	Holiday Treatment	NBD	Valid Values – NBD(Next Business Date), PBD (Previous Business Date), NCH (No Change)
21	Appropriation Sequence on due date	IP	This indicates how the repayment amount should be appropriated if payment is receive on due date Valid Values – PI,IP I : Interest, P : Principal
22	Appropriation Sequence before due date	IP	This indicates how the repayment amount should be appropriated if payment is receive before due date Valid Values – PI,IP I : Interest, P : Principal
23	Appropriation Sequence after due date	OIP	This indicates how the repayment amount should be appropriated if payment is receive after due date Valid Values – OIP,OPI,PIO,IPO,IOP,POI O: Overdue Interest, I : Interest, P : Principa
24	NPA Appropriation Sequence	OIP	This indicates how the repayment amount should be appropriated if payment is receive after the finance has turned NPA Valid Values – OIP,OPI,PIO,IPO,IOP,POI O: Overdue Interest, I : Interest, P : Principa
25	File Parsing Reject All Records	Y	 Y - If one record in a file fails, all records should be marked as fail and the entire file should be rejected N - If one record in a file fails, system should move on to the other records and mark the fas partial success with relevant records faile /passed

3.2 Managing Product Parameters

Bank may want to create a new product for financing. Screens are available to create a new product along with its attributes.

This screen is divided into four tabs: Basic Information, Finance Parameters, and Repayment Parameters.

3.2.1 Create Product Parameters

Navigation Path: Supply Chain Finance > Maintenance > Product Parameters > Create

3.2.1.1 Basic Information

Basic Det	ails	Finance Paramete	ers	Repayment P	Parameters	Credit Lin	nit Mapping
inch *		Product Code *		Product Description *		Product Type *	
04-LM BRANCH	Ŧ	P998		Product For Invoice Financi	ing	Supplier Centric	Ŧ
oduct Category *		Effective From *		Expires On *		Borrower *	
voice	*	Jan 9, 2020	**	Feb 1, 2030	**	Anchor	Ŧ
ignment Applicable		Acceptance Applicable		Credit Limit Applicable		Accounting Applicable	

1. Refer the following table for specifying details in the above screen:

Field Name	Description
Branch *	Select the branch for which to create the product. Changing the branch requires access rights for the chosen branch.
Product Code *	Enter the unique identification for the product.
Product Description *	Description of the product.
Product Type *	Select the product type to specify whether it is seller centric or buyer centric.
Product Category *	Select the category, whether invoice or purchase order, that will be financed under the product.
Effective From *	Click the Calendar icon to select the date from when product will be effective.
Expires On *	Click the Calendar icon to select the date when product expires.
Borrower *	Select the borrower to be associated with the product, whether Anchor or Spoke.

Field Name	Description
Assignment Applicable	Switch this toggle ON if assignment transactions are applicable.
Auto Assignment	Switch this toggle ON if the assignment is to be performed automatically. This toggle appears if Assignment Applicable is enabled.
Acceptance Applicable	Switch this toggle ON if acceptance is applicable.
Auto Acceptance	Switch this toggle ON if the acceptance is to be performed automatically. This toggle appears if Acceptance Applicable is enabled.
Auto Acceptance (Days) **	Enter the number of days after which the instrument is automatically deemed as accepted.
Credit Limit Applicable	Switch this toggle ON to map credit limits to the product. If you enable this toggle, the Credit Limit Mapping tab appears, where you can map the limit type and related entities.
Accounting Applicable	Switch this toggle ON if accounting is applicable.

2. Click the Finance Parameters tab.

3.2.1.2 Finance Parameters

Create										$\mu^{\mathcal{C}}$	
Basic Details			 Finance Parame	ters		Repayment Parameters		Credit Limit Mappin	g

								Sa	ve	Cance	el

3. Refer the following table for specifying details in the above screen:

Field Name	Description
Auto Finance Applicable	Switch the toggle ON to enable the auto financing.
Preferred Disbursement Mode **	Select the preferred mode of disbursement for this product.
Auto Settlement Applicable	Switch the toggle ON to enable the auto settlement for this product.

Field Name	Description
Preferred Settlement Mode	Select the preferred mode of settlement for this product.
Min. Finance (%)	Enter the minimum finance percentage allowed for financing a transaction of this product.
Max. Finance (%)	Enter the maximum finance percentage allowed for financing a transaction of this product.
Min. Tenor(Days)	Enter the minimum tenor allowed for financing a transaction of this product. Minimum and Maximum value can be Zero and 9999 respectively.
Max. Tenor(Days)	Enter the maximum tenor allowed for financing a transaction of this product. Minimum and Maximum value can be Zero and 9999 respectively.
Grace Days *	Enter the number to specify the grace days. Minimum and Maximum value can be Zero and 9999 respectively.
Stale Period(Days)	This is the period after invoice date, after which the invoice becomes stale and will not be financed automatically any more for this product.
Min Waiting Period (Days)	This indicates the minimum period up to which the finance cannot be closed for this product.
With Recourse	Select the Yes to specify that the finance is allowed with recourse, else select No.
Margin Handling *	Select how the margin should be handled.
Margin Payment Mode **	Select the mode of payment of the margin amount. This field appears if you select the 'Refund to the Supplier' option from the Margin Handling list.
Interest Refund Handling *	Select how the interest refund should be handled.
Interest Refund Payment Mode **	Select the mode of payment of the interest refunds. This field appears if you select the 'Refund to the Interest Bearing Party' option from the Interest Refund Handling list.
Disbursement Auth Required	Switch the toggle ON if authorization is required for disbursement transactions.
Disbursement Auto Processing	Switch the toggle ON for automatic processing of disbursement. This field appears when you enable the Auto Finance Applicable toggle.
Settlement Auth Required	Switch the toggle ON if authorization is required for settlement transactions.
Settlement Auto Processing	Switch the toggle ON for automatic processing of settlement. This field appears when you enable the Auto Settlement Applicable toggle.
Multiple Disbursement Allowed	Switch the toggle ON if multiple disbursement for finance should be allowed.

4. Click the Repayment Parameters tab.

5. Refer the following table for specifying details in the above screen:

Field Name	Description
Pre-Payment Allowed	Switch the toggle on if prepayment should be allowed for finances availed under this product, i.e. part or full repayment before the finance due date.
Part Payment Allowed	Switch the toggle on if part payment should be allowed for finances availed under this product.
Maturity Date Calculation *	 Select the basis for calculating the maturity date of the finance. Available options are: Invoice Due Date Business Date + Maximum Tenor Invoice Due Date + Maximum Tenor Payment Due Date
Holiday Treatment *	This is an option provided to move the date to next/previous/same date if the maturity date falls on a holiday for this product.
Credit Limit Utilization *	This is an option provided to decide whose credit facility is to be utilized. Whether Buyer, Supplier or Both.
Reconciliation Towards *	Specify whether the reconciliation is towards invoice or finance.
Auto Debit Applicable	Switch the toggle ON if the account should be auto debited on the due date for this product.
On Due Date *	 Enter the appropriation sequence on due date for this product. Appropriation Sequence: P – Principal Amount I – Interest Amount

Field Name	Description
	O – Overdue Interest
	For example: IP or OP or IO Maximum 2 characters are allowed.
Before Due Date *	
Delore Due Dale	Enter the appropriation sequence before due date for this product. Appropriation Sequence:
	P – Principal Amount
	• I – Interest Amount
	O – Overdue Interest
	For example: IP or OP or IO
	Maximum 2 characters are allowed.
After Due Date *	Enter the appropriation sequence after due date for this product.
	Appropriation Sequence:
	P – Principal Amount
	I – Interest Amount
	O – Overdue Interest
	For example: IPO or PIO or IOP Maximum 3 characters are allowed.
NPA *	Enter the NPA appropriation sequence for this product. Appropriation Sequence:
	P – Principal Amount
	• I – Interest Amount
	O – Overdue Interest
	For example: IPO or PIO or IOP
	Maximum 3 characters are allowed.
Debit Party On Due Date **	Party from whose account the amount should be debited.
	This field is mandatory if Auto Debit Applicable is enabled.
Debit A/C. Type On Due Date **	This indicates Account Type to be debited, for example – CASA, OD, and so on.
	This field is mandatory if Auto Debit Applicable is enabled.
Debit Party After Due Date	Party from whose account the amount should be debited if the business date is greater than finance maturity date for this product.
	This field is mandatory if Auto Debit Applicable is enabled.
Debit A/C. Type After Due Date **	This indicates Account type to be debited if the business date is greater than finance maturity date for this product, for example – CASA, OD, and so on.
	This field is mandatory if Auto Debit Applicable is enabled.

6. Click the Credit Limit Mapping tab. This tab is present only if you have enabled Credit Limit Applicable in the Basic Details tab.

3.2.1.4 Credit Limit Mapping

В	Basic Details		Finance Parameters		Repa	yment Parameters		Credit Limit Ma	pping

Perform the following steps to take actions on a product parameters record. Click the Options () icon and then click any of the below options:

- Unlock To modify the record details. Refer the Create Product Parameters section for field level details.
- Authorize To authorize the record. Authorizing requires necessary access rights.
 - a. Optional: Click View to view the record details.
 - b. Select the record to authorize and then click Confirm.
- Delete/Close To remove the record.
 - a. Optional: On the confirmation pop-up window, click View to view the record details.
 - b. Click **Proceed** to delete the record.
- Copy To copy the product parameters for creating a new record.
- View To view the product parameter details.
- Reopen To reopen a closed record.

3.3 Managing Program Parameters

A program is a linkage of a buyer to one or more suppliers or linkage of a supplier to one or more buyers. Your bank may want to create a new program for financing along with its attributes.

This screen is divided into three tabs: Basic Information, Finance Parameters, and Link Spokes.

3.3.1 Create Program Parameters

Navigation Path: Supply Chain Finance > Maintenance > Program Parameters > Create

3.3.1.1 Basic Information

reate				2 ¹⁰
Basic Information		Finance Parameters	Link Spokes	
Program Code *	Program Name *	Product *	Anchor *	
P999	Program for Prod Manufacturing	GPPD - GP Product 💌	POSupplier1	۹.
Relationship *	Effective From *	Expires On *	Reconciliation towards	
R998 Q	Jan 9, 2020	Feb 28, 2031	Finance	Ŧ
uto Acceptance Applicable	Auto Acceptance (Days) *	Two Factor Applicable	Insurance Applicable	
	0 ^	\bigcirc	\bigcirc	
				Save Cano

1. Refer the following table for specifying details in the above screen:

Field Name	Description
Program Code *	Unique code to identify Program.
Program Name *	Description of the program.
Product *	To be selected from the list of products maintained in the product master.
Anchor *	Anchor for the program. An anchor can be a customer or a non-customer.
Relationship *	Select the relationship associated with the selected anchor.
Effective From *	Date from which the Program is effective.
Expires On *	Date up to which the program is valid.
Reconciliation towards	When a payment is received, should the payment be reconciled with a finance or an invoice.
Auto Acceptance Applicable	Whether Auto acceptance is applicable for this program.
Auto Acceptance(Days)	Days after which the invoice under this program will get auto accepted. This field is displayed only if Auto acceptance Applicable is enabled.
Two Factor Applicable	Switch the toggle ON if import factor should be applicable for the program.
Insurance Application	Switch the toggle ON if insurance should be applicable for the program.

Note: Fields marked with '*' are mandatory and fields marked with '**' are conditionally mandatory.

2. Click on the Finance Parameters tab.

3.3.1.2 Finance Parameters

Basic Information				Finance Parameters		Link Spo	okes		
Auto Finance Applic	able		Preferred Disbursement N	/lode	Auto Settlement Applic	able	Preferred Settlement Mod	e	
No		Ŧ	Account Credit	*	No	*	Account Debit	Ψ	
vin. Finance (%)			Max. Finance (%)		Min. Tenor(Days)		Max. Tenor(Days)		
10.00	\sim	^	100.00	~ ^	15	~ ^	100	~ ^	
irace Days			With Recourse		Disbursement Currency	/	Auto Debit Applicable		
5	\sim	^	No	-	INR	Ψ	No	Ψ.

Anchor		w.	Refund to the Supplier	*	Cheque	Ŧ	Refund to the Interest Be	aring P 🔻	
nterest Refund Pay	ment Mode								
Cheque		v							

3. Refer the following table for specifying details in the above screen:

Field Name	Description
Auto Finance Applicable	This should be selected if auto financing under this program needs to be enabled.
Preferred Disbursement Mode	Preferred mode of disbursement. Options appear from the allowed mode of disbursement in system parameters.
Auto Settlement Applicable	This should be selected if auto settlement under this program needs to be enabled.
Preferred Settlement Mode	Preferred mode of settlement. Options appear from the allowed mode of settlement in system parameters.
Min. Finance (%)	Minimum Finance percentage allowed for financing a transaction under this program.
Max. Finance (%)	Maximum Finance percentage allowed for financing a transaction under this program.
Min Tenor (Days)	Minimum tenor allowed for financing a transaction under this program.
Max Tenor (Days)	Maximum tenor allowed for financing a transaction under this program.
Grace Days	Enter the number to specify the grace days. Minimum and Maximum value can be Zero and 9999 respectively.
With Recourse	Whether finance under this program should be with recourse or without recourse.
Disbursement Currency	Currency in which the finance should be disbursed.
Auto Debit Applicable	Select whether auto debit is applicable for this program.
Interest Bearing Party	Select the party that will bear the interest.
Margin Handling	Select how the margin should be handled.

Field Name	Description				
Margin Payment Mode	Select the mode of payment of the margin amount. This field appears if you select the 'Refund to the Supplier' option from the Margin Handling list.				
Interest Refund Handling	Select how the interest refunds are to be handled.				
Interest Refund Payment Mode	Select the mode of payment of the interest refund. This field appears when you select the 'Refund to the Interest Bearing Party' option from the Interest Refund Handling list.				

4. Click the Link Spokes tab to link multiple spokes/ counterparties to the anchor.

3.3.1.3 Link Spokes

Basic Information				Finance Parameters		Link	Spokes

3.4 Managing Limits

OBSCF allows banks to configure hierarchical limit structures by mapping various limit types like finance, credit cover, recourse and so on, to appropriate entities such as Buyer, Supplier, Import factor and so on. Sub limits such as product, program and so on, for buyer/supplier parties can also be configured to enable bank control exposure at sublimit level. Each entity like buyer, supplier, product and so on forms a node in the structure.

3.4.1 Create Limits Structure

Navigation Path: Supply Chain Finance > Maintenance > Limits Structure > Create Limits

3.4.1.1 Create Limits Structure

Create Limits						$_{\mu }e^{-}\times$
Structure Description * SDBRW998						
Limit Type *		Entity * Select	Ŧ	Add		ľ

1. Refer the following table for specifying details in the above screen:

Field Name	Description
Structure Description *	Enter a description for the structure being created.
Limit Type *	Select the type of limit being created for the entity.
Entity *	Select the entity to be added to the search pane.
Entity search field *	Click the search icon (\bigcirc) to select the name of the entity to be added. The label of this field and the search options are populated based on the entity you select in the previous field.

Field Name	Description
Add	Click this button to add the selected entity to the search pane. You can add further entities by selecting suitable values in the Limit Type, Entity, and Entity search fields.
Search	Indicates an option to search for a specific entity that has been added to the search list.

- 2. Drag and drop the entities one by one, from the search pane to the structure pane. Once an entity is dropped into the structure pane, a green spot appears beside it in the search pane.
- 3. Create a child node by dragging and dropping an entity on top of the parent node. Create the entire structure in a similar manner.
- 4. To define the limit parameters for a particular node/entity, right click on it and select **Edit**. The **Limit Details** window for that particular entity appears.

3.4.1.2 Define Limits

imit Type *	Entity *		Supplier Id *		Supplier Name *	
inance	Supplier		009002		POSupplier1	
xternal Line Id	Limit Currency *					
	Sector Secto	•				
Add Policy						
anctioned Limit *	Available Limit		Utilized Limit		Blocked Limit	
₹50,000,00	0.00 ₹50,000,000.00		₹0.00		₹0.00	
ffective From *	Expires On *		Adhoc Limit		Available Adhoc Limit	
Feb 15, 2021	iii Feb 28, 2031	**		₹5,000,000.00	₹5,000,000.00	
Itilized Adhoc Limit	Blocked Adhoc Limit		Adhoc Limit Effective Dat	e *	Adhoc Limit Expiry Date *	
0.00	₹0.00		Feb 15, 2021	<u></u>	Feb 28, 2031	
xchange Rate *	Interchangeability Allowed	*	Add Structure			
	\bigcirc		\bigcirc			

5. Refer the following table for specifying details in the above screen:

Field Name	Description
Limit Type *	Displays the type of limit selected.
Entity *	Displays the entity for which the limit is being defined.
Entity Id / Code *	Displays the unique ID or code of the selected entity.
Entity Name *	Displays the name of the selected entity.
External Line Id	Select the limit line ID in case the limits are to be retrieved from an external system, such as ELCM. The sanctioned limit is fetched from the external system and populated in the Sanctioned Limit field, which is then disabled.

Field Name	Description
Limit Currency *	Select the currency in which the limits are to be defined.
Add Policy	Switch this toggle ON to link an insurance policy to the entity. This toggle appears only for entity type Buyer/Supplier and if the main (topmost) node is of type Insurance Company .
Link Policy *	Search and select the required insurance policy to link. This field appears on enabling the Add Policy toggle.
Policy Allocation Amount *	Enter the amount to be allocated from the policy. By default, the amount allocated to the policy is displayed. This field appears on enabling the Add Policy toggle.
Add	Click this button to add the selected policy.
Reset	Click this button to clear the selected values in the fields.
Sanctioned Limit *	Enter the limit amount to be allotted to the entity for the selected limit type. In case an external limits system is linked, then this field displays the value fetched from the system, once the external line ID is entered. This field is not editable, in this case.
Available Limit	Displays the limit amount that is available to the entity.
Utilized Limit	Displays the limit amount that has been utilized.
Blocked Limit	Displays the limit amount that has been blocked or reserved for transactions that are in progress.
Effective From *	Click the Calendar icon to select the date from when the limit is effective.
Expires On *	Click the Calendar icon to select the date on which the limit expires.
Adhoc Limit	Enter the maximum amount that can be allotted, in case the available limit falls short of the required amount for a specific transaction.
Available Adhoc Limit	Displays the adhoc limit that is available to the entity.
Utilized Adhoc Limit	Displays the adhoc limit amount that has been utilized.
Blocked Adhoc Limit	Displays the adhoc limit amount that has been blocked or reserved for transactions that are in progress.
Adhoc Limit Effective Date **	Click the Calendar icon to select the date from when the adhoc limit is effective.
Adhoc Limit Expiry Date **	Click the Calendar icon to select the date when the adhoc limit expires.
Exchange Rate *	Displays the exchange rate between the parent entity's limit currency and the child entity's limit currency.
Interchangeability Allowed *	Switch this toggle ON, to set the sanctioned limit of each child entity upto that of the parent entity. If this toggle is switched off, then the sum total of sanctioned limits of all child entities together cannot exceed (must be less than or equal) that of the parent entity.
% Allocation	Displays the allocated limit percentage for the entity. This field appears on enabling the Add Structure toggle.
	This field displays the following value: (Sanctioned Limit + Adhoc Limit)/Total Sanctioned Limit

Field Name	Description
Add Structure	Switch the toggle ON to link an existing limit structure to the entity. This linking can only be done for Buyer or Supplier entity types. This feature is used for linking the insurance or import factor limits to the buyer/supplier.
Root Entity	Select the root entity to be added. This field appears on enabling the Add Structure toggle.
Link Structure	Search and select the required structure to link.
% Allocation	Displays the allocated limit percentage for the root entity. This field appears on enabling the Add Structure toggle. This field displays the following value: (Sanctioned Limit)/Total Sanctioned Limit
View Details	Click this hyperlink to view the details of the linked structure.
Add	Click this button to add the limit structure.
Reset	Click this button to clear the selected values.
Total Sanctioned Limit	Displays the total sanctioned limit.
Total Available Limit	Displays the total available limit.
Total Utilized Limit	Displays the total utilized limit.
Total Block Limit	Displays the total blocked limit.

6. After defining the limit parameters, click **Add Details** to save the limits for the entity.

3.5 Managing Insurance

Through the Insurance master module banks can maintain details of the insurance company from which it intends to purchase insurance policies for covering the default risk of the debtor/borrower corporate. Details of various insurance policies availed through that insurance agent can also be maintained. Individual policies can be linked to debtor/borrower party to track limit related exposure at policy level.

3.6 Managing Charges

Banks are empowered to configure flexible and preferential pricing as per corporate risk profile and assessment. Various pricing methods like fixed amount/percentage, slab based and tiered based can be configured as per bank's requirement. Calculation and collection frequency like monthly, weekly, yearly, and so on. can also be defined for a charge. Both standard and discount type of charge is supported.

3.6.1 Charge Code

The 'Charge Code' screen helps you to manage charge code for a specific charge group, charge type, and charge category. You can also specify the expiry date of the charge code from this menu.

3.6.1.1 Create Charge Code

eate							»ر م
harge Code *		Charge Description *		Charge Group *			
C99		Charges For Finance		Fee	Ŧ		
harge Category *		Charge Type *		Effective Date *		Expiry Date *

Perform the following steps to take actions on a charge code record. Click the Options (:) icon and then click any of the below options:

- Unlock To modify the record details. Refer the Create Charge Code section for field level details.
- Authorize To authorize the record. Authorizing requires necessary access rights.
 - a. Optional: Click View to view the record details.
 - b. Select the record to authorize and then click **Confirm**.
- **Delete/Close** To remove the record.
 - a. Optional: On the confirmation pop-up window, click View to view the record details.
 - b. Click **Proceed** to delete the record.
- **Copy** To copy the charge code details for creating a new record.
- View To view the charge code details.
- **Reopen** To reopen a closed record.

3.6.2 Charge Rule Maintenance

3.6.2.1 Create Charge Rule Maintenance

Navigation Path: Supply Chain Finance > Maintenance > Charges > Charge Rule Maintenance > Create

Charge Pricing Description *		Annum Basis		Pricing Category *		Pricing Method *
C99Pricing		365	Ŧ	Tier Based Amount	Ŧ	Slab Based Fixed Amount 🔹
Pricing Currency *		Charge In Txn Currency		Min/Max Validation Criteria		
INR	Ŧ			Amount	Ŧ	
Min Charge Amount *		Max Charge Amount *				
₹500.	00		₹5,000.00			
From *		то *		Amount *		
₹100,000,000.00						Add Reset
From	То		Amount			Action
0	1000000		₹1,000.00			2
1000000	5000000		₹1,100.00			2
	1000000		₹2,000.00			2
5000000			₹5,000.00			2

1. Refer the following table for specifying details in the above screen:

Field Name	Description
Charge Pricing Description *	Enter the pricing description of charge.
Annum Basis	Select the number of days to be considered in a year.
Pricing Category *	Select the pricing category. Based on the selected category, pricing methods will be loaded.
Pricing Method *	Select the method to configure the charge pricing.
Pricing Currency *	Select the currency in which pricing is to be done.
Charge in Txn Currency	Switch the toggle ON if charge should be levied in transaction currency.
Min/Max Validation Criteria	Specify whether the charges should be applied based on the range of amount or percentage.
Min. Charge Amount/Percent *	Enter the minimum charge amount/ percentage to be considered. This field is displayed based on the value selected in the Min/Max Validation Criteria field.
Max. Charge Amount/Percent *	Enter the maximum charge amount/ percentage to be considered. This field is displayed based on the value selected in the Min/Max Validation Criteria field.
Fixed Amount **	Enter the charge amount. This field is displayed only when Pricing Category is Fixed Amount.
Flat Charge	Switch the toggle ON if flat charge should be applied.

Field Name	Description
	This field is displayed only when Pricing Category is Fixed Percent or Tier Based Percent.
Fixed Percent **	Enter the charge percentage.
	This field is displayed only when Pricing Category is Fixed Percent.
From **	Displays the start value of the amount/ percent/ duration range.
	This field is displayed only for tier based pricing category.
To **	Enter the end value of the amount/ percent/ duration range.
	This field is displayed only for tier based pricing category.
Amount **	Enter the charge amount.
	This field is displayed only when Pricing Category is selected as 'Tier Based Amount' or 'Tier Based Mixed'.
Units **	Enter the number of charge unit.
	This field is displayed only when Pricing Category is selected as 'Tier Based Amount' and Pricing Method is selected as 'Variable/Slab Amount by Number of Count'.
Percent **	Enter the charge percentage.
	This field is displayed only when pricing category is selected as 'Tier Based Percent' or 'Tier Based Mixed'.

2. Click **Add** to add charge details in the grid. If required, click **Reset** to clear the selected values. OR

Click Edit in the Action column of the grid to modify the charge details from the grid.

- 3. Click Save to save the record and send for authorization (if applicable).
- 3.6.2.2 View Charge Rule Maintenance

1. Refer the following table for specifying details in the above screen:

Field Name	Description
Event *	Select event on occurrence of which charge should be applied.
Filter Criteria *	This is the level for which the charge decisioning is set up. This could be: Program Instrument Type Status Based, Instrument Type Status Based, Product Based, Program Based, or Default.

	Description
	If the Default option is selected as the filter criteria, then the charges added will be applicable for all payments being processed.
	If the Program Based option is selected as the filter criteria, then a program field will appear wherein the program code can be entered. The rules added as part of this maintenance would then be applicable for the selected program, and for all other programs the default ruleset would be applicable.
	If the Product Based option is selected as the filter criteria, then a product field will appear wherein the product code can be entered. The rules added as part of this maintenance would then be applicable for the selected product.
	If the 'Program Instrument Type Status Based' option is selected, then a program field, an instrument type field and an instrument status field appear, wherein the respective values can be entered. The rule added as part of this maintenance would then be applicable for this specific combination.
	If the 'Instrument Type Status Based' option is selected, then an instrument type field and an instrument status field appear, wherein the respective values can be entered. The rule added as part of this maintenance would then be applicable for this specific combination.
Inherit Charges *	Specify if default charges should be inherited or should be overridden as well.
Charge Code *	Select the charge code for which decisioning is to be configured.
Charge Sharing	Switch the toggle ON if charge sharing is applicable.
Sharing Percentage Allocation *	Click the link to open the pop-up window for specifying sharing percentage for each party.
	This field is displayed only if you enable charge sharing.
Party To Charge *	Select the party to be charged. This field is displayed if you disable charge sharing.
Charge Pricing Rule *	Click the search icon to select the charge pricing rule to be applied.
Charge Criteria *	Select the criteria to be considered based on which charge should be calculated.
Parent Charge Code *	Select the parent charge code.
	This field is displayed only when you select parent charge code in Charge Criteria field.
Reference Tenor Start Date *	Specify which date should be considered to calculate the start of tenor duration.
Reference Tenor End Date *	Specify which date should be considered to calculate the end of tenor duration.
Effective Date *	Click the Calendar icon to select the start date of the charge decisioning validity.
Expiry Date *	Click the Calendar icon to select the end date of the charge decisioning validity.
Auto Waive	Switch the toggle ON to enable automatic waiving of the charge.

ORACLE

Field Name	Description
Allow Pricing Modification	Switch the toggle ON to allow the pricing modification.
Allow Override	Switch the toggle ON to enable the overriding of charges.
	Collection Parameters

Free Tasks												

Perform the following steps to process the disbursement record:

 Under 'Action' column, click the Acquire and Edit link to view the transaction and edit/acquire. OR

To acquire multiple transactions simultaneously, select the records and click **Acquire** button at the top.

Note:

- The disbursement process comprises of multiple screens such as Basic Info, Party, Limits, Interest, Accounting, and Summary.
- The reference number, the stage, and the operation name of the processing task is displayed at the top of each screen tab.
- On each screen, click **Remarks** to add comments about the transaction details.
- On each screen, click **Documents** to view uploaded documents relevant to the transaction.

2. Refer the following table to specify details on 'Basic Info' screen:

Field Name	Description
Branch *	Select the branch where the disbursement is being processed. By default, the logged-in user's branch is displayed.
Program *	Displays the name of the program that is linked to the invoices being financed.
Product *	Displays the name of the product associated with the program.
Anchor *	Displays the name of the anchor party in the program.
Linked Invoices	Click the link to view a list of invoices that are being financed.
Spoke *	Displays the name of the counter party in the program.
Start Date *	Displays the start date of the finance. By default, it is the current business date.
Tenor *	Enter the tenor of the finance.
Maturity Date *	Select the maturity date of the finance. By default, this value is the 'Start Date + Tenor'.
Grace Days	Enter the number of days, after the maturity date, within which the finance can be repaid without incurring penalty.
Past Due Date	Enter the due date beyond the finance maturity date. By default, this field displays the date of maturity date + grace days.
Total Invoice Amount *	Displays the total amount of all the invoices being financed.
Finance (%) *	Enter the percentage of the total invoice amount to be financed.
Currency *	Select the currency of the finance amount.
Finance Amount *	Enter the amount to be financed. By default, this field displays the

Finance (%) value of the Total Invoice Amount.

Field Name	Description				
Exchange Rate *	Displays the exchange rate between the invoice amount and the finance amount.				
Processing Date *	Displays the date of processing of the disbursement.				
Preferred Disbursement Mode *	Select the mode of transferring the finance amount to the customer's account. The options are:				
	• EFT				
	Cheque				
	Account Credit				

- 3. Perform any of the below actions:
 - Click **Next** to go the 'Party' screen.
 - o Click Save & Close to complete the processing stage of the disbursement.
 - Click **Cancel** to cancel the transaction and return to the 'Free Tasks' screen.
 - Click Hold to move the transaction to the 'Hold' list.
 - Click **Reject** to purge the disbursement transaction.

4.2 Party

4. Refer the following table to specify details on 'Party' screen:

Field Name	Description
Branch	Displays the branch code of the bank where the disbursement is being processed.
Product	Displays the name of the product associated with the program.

Field Name	Description
Program	Displays the name of the program that is linked to the invoices being financed.
Anchor	Displays the name of the anchor party in the program.
Linked Invoices	Click the link to view a list of invoices that are being financed. For more information on the fields, refer the Invoice Details section above.
Spoke	Displays the name of the counter party in the program.
Start Date	Displays the start date of the finance.
Maturity Date	Displays the maturity date of the finance.
Total Invoice Amount	Displays the total amount of all the invoices being financed.
Finance (%)	Displays the percentage of the total invoice amount being financed.
Finance Amount	Displays the amount being financed.
Exchange Rate	Displays the exchange rate between the invoice amount and the finance amount.
Processing Date	Displays the date of disbursement processing.
	Party Details

Parties with specific roles in the program can be added in this section.

Select Party Role	Select the party role to be added.
Search Party	Click the Search icon ($^{\bigcirc}$) to select the party ID.
Party Name	Displays the name of the selected party.
Search Division Code	Click the Search icon ($^{\bigcirc}$) to select the division code.
Address	Displays the address of the selected party.

5. To add more parties, click **Add New Row**.

OR

To delete a party from the 'Party Details' grid, click the Delete icon ($\widehat{\mathbf{m}}$) under 'Action' column for a respective record of a party.

- 6. Perform any of the below actions:
 - Click **Next** to go the 'Limits' screen
 - Click **Back** to go the 'Basic Info' screen.
 - o Click Save & Close to complete the processing stage of the disbursement.
 - o Click Cancel to cancel the transaction and return to the 'Free Tasks' screen.
 - o Click Hold to move the transaction to the 'Hold' list.
 - Click **Reject** to purge the disbursement transaction.

- 11. Perform any of the below actions:
 - Click **Back** to go the 'Accounting' screen.
 - o Click Save & Close to complete the processing stage of the disbursement.
 - o Click **Cancel** to cancel the transaction and return to the 'Free Tasks' screen.
 - o Click Hold to move the transaction to the 'Hold' list.
 - Click **Reject** to purge the disbursement transaction.

On completing the disbursement processing, an approval task is created in case if the approval is required as per program level settings.

5. Finance Settlement

Finance Settlement functionality enables SCF users to settle finances/loans which are outstanding in the SCF application. Based on your role, you can initiate the settlement of a loan on behalf of the SCF customer. The settlement request can either be initiated from the 'Settlement' screen or through file upload (payment file).

The Finance Settlement process involves two steps:

- o Settlement Registration
- Settlement Task Processing

5.1 Settlement Registration

Using the 'Finance Settlement' screen, you can search and select finances to settle, and initiate the settlement process. Multiple finances can be selected for settlement. For each finance reference number you select, a settlement transaction is created under Free Tasks.

1. Refer the following table for specifying details in the 'Settlement Details' section:

Note: Fields marked with '*' are mandatory and fields marked with '**' are conditionally mandatory.

Field Name	Description				
Settlement Ref No *	Enter the unique reference number for the settlement record.				
Payment Party Role *	Select the role of the party that is making the payment.				
Payment Party *	Select the name of the party that is making the payment.				
Processing Date *	Displays the settlement processing date. By default, it displays the current date.				
Loan Account Credited *	Switch the toggle ON, if loan account is credited with the settlement amount.				

Field Name	Description
Payment Mode *	Select the mode of payment for the settlement. You can modify this field only if the Loan Account Credited field is disabled.
Debit Account	Select the account to be debited for the settlement. This field appears only if the Loan Account Credited toggle is switched off. It is mandatory if you select the Account Debit option from the Payment Mode list.
Credit Account	Select the loan account that is credited with the settlement amount. This field appears only if the Loan Account Credited toggle is switched on.
Currency *	Select the settlement amount currency.
Settlement Amount *	Select the amount being paid by the payment party to settle the finances.
Settlement Date *	Select the date on which the settlement will take place. By default, the current date is displayed.
Manual Allocation *	Switch the toggle ON, if settlement amount can be manually allocated to the selected finances.
Settlement Amount Allocation *	Select how the settlement amount must be allocated amongst the selected finances. The options are:
	By Lowest Outstanding
	By Latest Due date
	By Highest Outstanding

2. Click **Proceed**. If there are any relevant outstanding finances for the details entered, then the 'Filter Parameter' section appears.

2. Refer the following table for field details of 'Basic Info', 'Settlement Details', and 'Outstanding and Appropriation details' sections:

Note: Fields marked with '*' are mandatory and fields marked with '**' are conditionally mandatory.

Field Name	Description					
Basic Info						
Branch *	Displays the branch where the settlement is being processed.					
Program *	Displays the name of the program associated with the invoices that have been financed.					
Product *	Displays the name of the product associated with the program.					
Anchor *	Displays the name of the anchor party in the program.					
Linked Invoices	Click the link to view a list of invoices that have been financed.					
Spoke *	Displays the name of the counter party in the program.					
Start Date *	Displays the start date of the finance.					
Tenor *	Displays the tenor of the finance.					
Maturity Date *	Displays the maturity date of the finance.					

Field Name	Description
Total Invoice Amount *	Displays the total amount of all the invoices that have been financed.
Finance (%) *	Displays the percentage of the total invoice amount that has been financed.
Currency *	Displays the currency of the finance amount.
Finance Amount *	Displays the amount that has been financed.
Exchange Rate *	Displays the exchange rate between the invoice amount and the finance amount.
	Settlement Details
Settlement Ref No	Displays the reference number of the settlement.
Payment Mode *	Displays the mode of payment of the settlement amount.
Payment Amount *	Enter the total amount being paid by the payment party.
Payment Party *	Displays the name of the party making the payment.
Settlement Processing Date *	Displays the date of processing the settlement.
Settlement / Value Date *	Displays the date on which the settlement process was initiated.
Exchange Rate	Displays the exchange rate between the finance currency and the settlement currency.
Appropriated Payment Amount *	Displays the amount that is appropriated for the settlement of the selected finances.
Grace Days	Displays the number of days past the finance due date, within which the finance can be settled without penalty.
Past Due Date	Displays the due date beyond the finance maturity date.
	Outstanding and Appropriation details
	O/S as on Date
Principal O/S	Displays the outstanding principal amount as on the current date.
Interest O/S	Displays the outstanding interest as on the current date.
Overdue Interest O/S	Displays any overdue interest as on the current date.
Penalty on Interest Overdue O/S	Displays any penalty on the overdue interest.
Total O/S	Displays the total outstanding amount as on current date.
	O/S as on Value/Settlement Date
Principal O/S	Displays the outstanding principal as on the settlement date.
Interest O/S	Displays the outstanding interest as on the settlement date.
Overdue Interest O/S	Displays any overdue interest as on the settlement date.
Penalty on Interest Overdue O/S	Displays any penalty on the settlement interest.
Total O/S	Displays the total outstanding amount as on the settlement date.

Field Name	Description
	Appropriation Details
Appropriation Sequence	Enter the sequence of settlement among the Principal (P), the Interest (I), and the Overdue Interest (O), if any.
Payment Towards Principal	Enter the amount to be settled against the principal of the finance. By default, the value entered as the payment amount in the 'Settlement Details' section is auto-populated here.
Payment Towards Interest	Enter the amount to be settled against the interest of the finance.
Payment Towards Overdue Interest	Enter the amount to be settled against any overdue interest.
Payment Towards Penalty on Int. Overdue	Enter the amount to be settled against the penalty on any overdue interest.
Interest Refund	Displays any interest amount to be refunded.
	O/S Post Settlement
Principal O/S	Displays any principal amount that will be outstanding, post settlement.
Interest O/S	Displays any interest amount that will be outstanding, post settlement.
Overdue Interest O/S	Displays any overdue interest that will be outstanding, post settlement.
Penalty on Interest Overdue O/S	Displays any penalty on overdue interest that will be outstanding, post settlement.
Total O/S	Displays the total amount that will be outstanding, post settlement.

- 3. Perform any of the below actions:
 - Click **Next** to go the 'Party' screen.
 - \circ Click Save & Close to complete the processing stage of the settlement.
 - Click **Cancel** to cancel the transaction and return to the 'Free Tasks' screen.
 - o Click Hold to move the transaction to the 'Hold' list.
 - Click **Reject** to purge the settlement transaction.

5.2.2 **Party**

4. Refer the following table to specify details on 'Party' screen:

Description
Displays the branch code of the bank where the settlement is being processed.
Displays the name of the product associated with the program.
Displays the name of the program that is linked to the invoices that have been financed.
Displays the name of the anchor party in the program.
Click the link to view a list of invoices that have been financed.
Displays the name of the counter party in the program.
Displays the date of processing of the settlement.
Displays the actual date of settlement.
Displays the amount being settled.

Party Details

Parties with specific roles in the program can be added in this section.

Select Party Role	Select the role of the party to be added.
Search Party	Click the Search icon ($^{\bigcirc}$) and select the required party.
Party Name	Displays the name of the selected party.
Search Division Code	Click the Search icon ($^{\bigcirc}$) and select the division code.
Address	Displays the address of the selected party.

5. To add more parties, click **Add New Row**. OR

To delete a party from the 'Party Details' grid, click the Delete icon (⁽ⁱⁿ⁾) under 'Action' column for a respective record of a party.

- 6. Perform any of the below actions:
 - Click **Next** to go the 'Limits' screen
 - Click **Back** to go the 'Basic Info' screen.
 - o Click Save & Close to complete the processing stage of the settlement.
 - o Click Cancel to cancel the transaction and return to the 'Free Tasks' screen.
 - o Click Hold to move the transaction to the 'Hold' list.
 - Click **Reject** to purge the settlement transaction.

Following table lists the details covered in above 'Interest' screen:

Field Name	Description
Branch	Displays the branch code of the bank where the settlement is being processed.
Product	Displays the name of the product associated with the program.
Program	Displays the name of the program that is linked to the invoices that have been financed.
Anchor	Displays the name of the anchor party in the program.
Linked Invoices	Click the link to view a list of invoices that have been financed. For more information on the fields, refer the Invoice Details section above.
Spoke	Displays the name of the counter party in the program.
Settlement Processing Date	Displays the date of processing of the settlement.
Settlement Date	Displays the actual date of settlement.
Settlement Amount	Displays the amount being settled.
	Interest Details
Rate Code	Displays the unique code associated with the interest rate.
Interest Collection Type	Displays the type of interest collection, whether rear-ended, or front- ended.
Rate Type	Displays whether the rate is floating, fixed, or special.

Field Name	Description
Schedule Type	Displays whether the interest collection schedule is amortized, capitalized, or normal.
Reset Tenor	Displays the tenor for applying the new interest rate, in case of floating rate type.
Calculated Interest	Displays the interest amount that has been calculated.
Rate (%)	Displays the base rate of interest.
Spread	Displays the spread or margin rate of interest.
Net Interest Rate (%)	Displays the total rate of interest. This is the sum of Rate (%) and Spread.
Additional Details	Click this link to view additional interest details. For more information, refer the Interest Additional Details section below.
	Overdue Interest Details
Rate Code	Displays the code of the overdue interest.
Rate Type	Displays whether the rate is floating, fixed, or special.
Schedule Type	Displays whether the interest collection schedule is amortized, capitalized, or normal.
Reset Tenor	Displays the tenor for applying the new interest rate, in case of floating rate type.
Calculated Overdue Interest	Displays any overdue interest that has been calculated.
Rate (%)	Displays the base rate of interest.
Spread	Displays the spread or margin rate of interest.
Net Overdue Interest Rate (%)	Displays the total rate of interest. This is the sum of Rate (%) and Spread.
Additional Details	Click this link to view additional details related to overdue interest. The Overdue Interest Additional Details pop-up window appears. For more information, refer the Interest Additional Details section below. The fields displayed are similar.
	Penalty on Interest Overdue details
Rate Code	Displays the code of the penalty on the overdue interest.
Rate Type	Displays whether the rate is floating, fixed, or special.
Schedule Type	Displays whether the interest collection schedule is amortized, capitalized, or normal.
Reset Tenor	Displays the tenor for applying the new interest rate, in case of floating rate type.
Calculated Penalty on Overdue Interest	Displays any overdue interest that has been calculated.
Rate (%)	Displays the base rate of interest.
Spread	Displays the spread or margin rate of interest.

Field Name	Description
Net Penalty on Overdue Interest Rate (%)	Displays the total rate of interest. This is the sum of Rate (%) and Spread.
Additional Details	Click this link to view additional details related to penalty on overdue interest.

- 8. Perform any of the below actions:
 - Click **Next** to go the 'Charges' screen.
 - Click **Back** to go the 'Limits' screen.
 - o Click Save & Close to complete the processing stage of the settlement.
 - Click **Cancel** to cancel the transaction and return to the 'Free Tasks' screen.
 - Click Hold to move the transaction to the 'Hold' list.
 - Click **Reject** to purge the settlement transaction.

Following table lists the details covered in above	e 'Accounting' screen:
--	------------------------

Field Name	Description
Branch	Displays the branch code of the bank where the settlement is being processed.
Product	Displays the name of the product associated with the program.
Program	Displays the name of the program that is linked to the invoices that have been financed.
Anchor	Displays the name of the anchor party in the program.
Linked Invoices	Click the link to view a list of invoices that have been financed. For more information on the fields, refer the Invoice Details section above.
Spoke	Displays the name of the counter party in the program.
Settlement Processing Date	Displays the date of processing of the settlement.
Settlement Date	Displays the actual date of settlement.
Settlement Amount	Displays the amount being settled.
	Accounting Details
Accounting Entry Description	Displays a description for the accounting entry.
Accounting Role	Displays the accounting role code associated with the accounting entry.
Party	Displays the name of the party associated with the accounting entry.
Settlement Method	Displays the mode to be employed for the transaction.
Dr/Cr	Displays whether the amount will be debited or credited for the accounting entry.
Account	Displays the account number involved in the transaction.
Amount	Displays the amount of the transaction.

- 10. Perform any of the below actions:
 - Click **Next** to go the 'Summary' screen.
 - Click **Back** to go the 'Charges' screen.
 - o Click Save & Close to complete the processing stage of the settlement.
 - o Click **Cancel** to cancel the transaction and return to the 'Free Tasks' screen.
 - o Click Hold to move the transaction to the 'Hold' list.
 - Click **Reject** to purge the settlement transaction.

5.2.7 Summary

You must complete the settlement process under 'My Tasks', and the approver has to approve the same. Upon approval, the finance will be settled in the core lending system, which in-turn will return the settlement status to OBSCF. Currently OBSCF is pre-integrated with Oracle Banking Corporate Lending system. The Settlement Summary screen shows a snapshot of the complete settlement transaction along with finance amount, interest applicable, terms, and so on. A tile is displayed for each tab. You can flip the tile to view further details, or click on it to view the entire tab.
