# **1. About this Manual**

## **1.1 Introduction**

This manual is designed to help acquaint you with the Oracle Banking Cash Management (OBCM).

It provides an overview of the system and guides you, through the various steps involved in setting up and providing the cash management services for the customers of your bank.

### **1.2 Audience**

This manual is intended for the following User/User Roles:

Role	Function
Back office executive	Input functions for transactions
Back office managers/officers	Authorization functions
Product Managers	Product definition and authorization

## **1.3 Documentation Accessibility**

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at http://www.oracle.com/us/corporate/accessibility/index.html.

## **1.4 Document Structure**

This manual is organized into the following chapters:

Chapter	Description				
Chapter 1	About this manual: This chapter gives information on the intended audience, abbreviations, icons, and summary of chapters covered in this user manual.				
Chapter 2	The Collections module - an overview: This chapter lists the benefits and functionalities provided by Collections module.				
Chapter 3	Setting up or maintaining reference data for system.				
Chapter 4	ter 4 Instrument Collection				
Chapter 5	Cash Transaction Management				
Chapter 6	Instrument Management				
Chapter 7	7 Performing inquiries.				

### **1.5 Abbreviations**

_	Abbreviation	Detailed Description
OBCM		Oracle Banking Cash Management
_	FIFO	First In First Out

Abbreviation	Detailed Description
LIFO	Last In First Out
CIF	Customer Information File
CMS	Cash Management System
PDC	Post Dated Cheque
CDC	Current Dated Cheque

# 1.6 Glossary of Icons

This User Manual may refer to all or some of the following icons:

lcon	Function
×	Close
+	Add a row
-	Remove a row
Ŵ	Delete a row
0	Search (Fetch)
C	Refresh
, and the second	Collapse
ж 1	Expand
\$	Flip
	Options

G	View

# 2. Collections

### 2.1 Overview

Oracle Banking Cash Management (OBCM) services enables a financial institution to manage the account receivables and account payables of their corporate customers. OBCM provides a technology platform capable of capturing account receivables and account payables of corporates across disparate accounts and locations. It also has a comprehensive collection features such as local, up-country, and correspondent bank cheque collection by minimizing the float time. This in turn enables better management of working capital for the corporate.

## 2.2 Benefits

- Cost Reduction Increased visibility of transactions and provides easy reconciliation thus helping corporates manage and control their cash flow and reduce costs.
- Integrated Payables & Receivables Facilitate efficient working capital management whilst enhancing straight-through processing speed.
- Early Credit Arrangement credit feature enables user to provide cheque collection credit to corporate before realization of the cheque.
- Accurate Forecasting Manage accurate forecasting by consolidating forecast collection inputs through seamless integration with internal systems.
- Regulatory Environment Leverage flexible configuration to launch quickly, respond to regulatory changes and expand into new geographies.

## 2.3 Functionality

- Dashboard
- Collections
  - Paper Based Collections
  - Pricing

## 2.4 Home: Dashboard

Successfully signing into the OBCM application displays the Dashboard as your home screen. Dashboard displays a gist/summary that is internal to the bank. It is a collection of various portlets that are displayed based on your role and access rights. Dashboard enables you to perform various analytical functions. You can drag and move different portlets, resize, auto adjust the size, and expand/collapse the portlet.

On starting the Oracle Banking Cash Management system, below login screen is displayed:

ORACL	.e°	
- Sign In		
User Name *		
Password *		
	Sign In	
	Cancel	

- 1. Enter your User Name and Password to access the application.
- 2. Click Sign In to log into application and display the Dashboard screen.

Dashboard				LM BRANCH ( 004) Nov 27, 2019	
Unrealized Instrument Aging		Instrument Status		Ţ	+
	5-30 Days •30 Days	From Date : Nov 26, 2019	To Date : Nov 27, 2019	۹ Returned £0.00	
		200			

OBCM Dashboard currently consist of the below mentioned portlet for physical cheque collection.

Instrument Status Portlet: The Instrument Status portlet displays the status wise total count and total value of the instruments for the period selected between From Date and To Date (Deposit from and To Date). By default, the date period is from 'current date-1' to 'current date'. The statuses displayed in the portlet are Lodged, Hold, Return, and Realized.

- Unrealized Instrument Aging Portlet: Unrealized Instrument Aging graph displays the doughnut chart with number of cheques/instruments, which are unrealized for aging bucket (number of day). You can click on bar graph icon at the top-right of the portlet to change the view from doughnut (default) to bar graph. Landing page displays the number of unrealized cheques/instruments split as per aging buckets which are configurable. Maximum of 7 ranges can be defined.
- 3. You can perform following actions on the dashboard screen:
  - To add more portlets, click the Add (+) icon located at the top-right corner of the Dashboard.
  - To remove a portlet, click the Remove (x) icon located at the portlet's top-right corner.
  - To configure the portlet, click the Configure Tile ( ?) located at the portlet's top-left corner.
  - To flip the portlet view, click the Flip Forward (<) or Flip Back (>) icon.
  - To change the portlet's position, click and hold the 'Drag to reorder' (.....) icon at the portlet's bottom-center and then move portlet to the desired position.
  - To apply filter on the portlet's data, click the Filter ( ) icon to view the pop-up select filter values.

# 3. Data Maintenance

### 3.1 Introduction

To enable the collections related functionalities, there is certain amount of reference data that needs to be set up on day zero.

In the context of collections, for instance, you need to set up reference data like locations, product types, product mappings etc. This is the first step for initiating any transaction of collections.

You may also need to identify administrators among the officers of your bank to whom you could assign the administration of cash management system.

This section explains the maintenance of such reference information for the modules used for cash management.

#### 3.1.1 Maintaining Core Reference Data

Your bank needs to set up certain core reference data for the cash management system to work such as list of country, currency, customer category, list of holidays, list of banks, branch, FX rates etc.

Refer to the 'Oracle Banking Common Core User Guide' for setting up core reference data.

### 3.2 Maintaining Accounting

One of the important part of setting reference data for Cash Management system is maintaining parameters for accounting such as account mapping, entry codes, roles, and accounting entries.

#### 3.2.1 Accounting Roles

3.2.1.1 Create Accounting Role

This screen is used to create Account Roles.

*Navigation Path:* Collections > Maintenance > Accounting > Role > Create

Create		,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,
Accounting Role Code *	Accounting Role Description *	
		Save Cancel

1. Refer the following table for specifying details in the above screen:

Note: Fields marked with '*' are mandatory.				
Field Name	Description			
Accounting Role Code *	Enter the unique code for role to create.			
Accounting Role Description *	Enter the description to associate with the role.			

- 2. Click **Save** to save the data and send for authorization (if applicable).
- 3.2.1.2 View Accounting Role

By using this screen, you can view, modify, delete, or authorize the accounting role.

Navigation Path: Collections > Maintenance > Accounting > Role > View

Accounting Role Code: UPCOUNTRY_CHQ_P.		Accounting Role Code: :	Accounting Role Code: : CHGINC_ACC	Accounting Role Code: : DR-Asset Ac :

Perform the following steps to take actions on the internal account mappings. Click the Options (

- Unlock To modify the record details. Refer the Create Internal Account Mapping section for field level details.
- Authorize To authorize the record. Authorizing requires necessary access rights.
  - a. Optional: Click **View** to view the record details.
  - b. Select the record to authorize and then click **Approve**.
- Delete/Close To remove the record.
  - a. Optional: On the confirmation pop-up window, enter the remark for deletion.
  - b. Click **Confirm** to delete the record.
- Copy To create a new internal account mapping by using similar details.
- View To view the internal account mapping details.

## **3.3 Maintaining Arrangement Definitions**

Arrangement Definition screen help the user to define various arrangement templates which is a group different arrangement parameter based on arrangement reference i.e.; on deposit or liquidation and further link the same to an arrangement party i.e.; Corporate or Correspondent bank in Arrangement Decisioning screen.

An arrangement defines the types of arrangement based on various parameter, which is linked to a corporate and accordingly the arrangement credit is passed to the account for the cheque deposition. Given below are some examples of arrangements in Collections module.

The arrangements reference for the Collection module in OBCM is based on below two parameters:

#### **On Deposit Date:**

For the arrangement based on deposit date, the bank provides the corporate an option of different arrangement days on which the corporate desires the payment of funds against instruments deposited by the corporate. The arrangement days depends on the charge, the corporate is willing to pay, and the desired liquidity. Thus, the bank pays amount to the corporate on the arrangement day or value date on presenting a cheque.

For example, if a corporate has opted for a 'Day + 1' arrangement with the bank, then the corporate will receive the funds 1 day after the instrument has been deposited regardless of the actual number of days required to clear the instrument.

#### On Realization Date:

For the arrangement based on realization date, the corporate receives credit only after the instrument has been marked as cleared in the system. If the instrument has been returned (for reasons such as insufficient funds in the drawer's account, discrepancy in the signature, etc.), then the corporate do not receive the funds. In such a case, the corporate account is debited and credited simultaneously.

### 3.3.1 Create Arrangement Definition

This screen is used to create an arrangement codes. Newly created arrangement codes takes effect once authorized and cannot be modified thereafter.

**Navigation Path:** Collections > Maintenance > Arrangement Definition > Create Arrangement Definition

Create Arrangement Definition			$_{\mu}^{\mu'}$ $\times$
Arrangement Code * AR424DP346 Corporate Release Days 2	Arrangement Description * Arrangement defined for deposit date 1 Extension Days - Instrument Lost 3	Arrangement Reference Basis * Deposit Date  Extension Days - Certificate 3	Arrangement Days 10 Extension Days - Instrument Return 2
Credit Reversal Days 5 Return Recovery From * Account Debit	Credit Reversal From * Collections Partial Return Recovery	Partial Credit Reversal	Bank Float Arrangement
			Save Cancel

1. Refer to the following table for specifying details on the above screen:

Note: Fields marked with '\*' are mandatory.

Field Name	Description
Arrangement Code *	Enter unique alphanumeric code to be created for arrangement. This code cannot be modified once authorized.
Arrangement Description *	Enter the description of the arrangement code. Enter a description of the arrangement to be defined. For example, for a corporate having arrangement day on deposit date, enter a description such as 'On Deposit Arrangement' and for corporate having an arrangement day on realization date then you can enter a description such as 'On Realization Arrangement'.
Arrangement Reference Basis *	Select the value to specify whether the arrangement is based on liquidation date or deposit date.
Arrangement Days	Enter the number of days on which the fund should be credited to the corporate on the basis of selected arrangement reference. For example; In case for a corporate, the user has selected 'Deposit date' in 'Arrangement Reference Basis' field and entered the arrangement day as 1, the amount will be credited to the corporate on the next day of the deposition. Maximum value can be 99. Default value is zero. Leaving this field blank considers default value.

Field Name	Description
Corporate Release Days	Enter the number of days post which the corporate can withdraw/utilize the funds, post the funds are released. Based on the arrangement, the corporate account will be credited. However, the amount will be blocked for the number of days entered in 'Corporate Release Days'. Maximum value can be 99. Default value is zero. Leaving this field blank
	considers default value.
Extension Days - Instrument Lost	In case the cheque is lost in transit, enter the number of days to be given as an extension to notify the corporate that the account will get debited.
Extension Days - Certificate	Enter the number of days to extend the line of credit (tenor) given to the corporate.
	For example, when the instrument does not get cleared within the scheduled time, the corporate can get a certificate from the drawer's bank. This is the form of a letter stating that the drawer's account balance is sufficient to make the payment to the corporate, or that the drawer's account has already been debited, thus indicating that the instrument has been cleared. However the correspondent bank/drawer bank might not have conveyed the same information to the system bank. In such case, giving an extension will extend the line of credit (tenor) given to the corporate as defined in the 'Certificate Extension Days' field. Maximum value can be 99. Default value is zero. Leaving this field blank considers default value.
Extension Days - Instrument Return	Enter the number of days to be given as an extension window for the corporate in case if the cheque is returned.
Credit Reversal Days	Enter the number of days post which the pooling job should initiate reversal of credit from the corporate's account.
Credit Reversal From *	Select the value to specify from where the recovery can be done in case if clearing fate is unknown for the instrument.
Partial Credit Reversal	Switch the toggle ON if recovery can be done in tranches i.e. even if the collections or CASA account balance is less than the total amount that needs to be reversed and until such time that multiple collections or multiple debits to CASA will nullify the credit amount. Else, credit reversal should only be done if and when the next collection's batch amount or CASA account balance is equal to or greater than the amount that needs to be recovered.
Bank Float Arrangement	Switch the toggle ON to utilize the processed instruments that are realized before arrangement credit to the corporate.
Return Recovery From *	Select the value to specify from where the recovery can be done in case of returned instrument.
Partial Return Recovery	Switch the toggle ON if recovery can be done in tranches i.e. even if the collections or account balance less than the total amount that needs to be recovered and until such time that multiple collections or account debits to CASA will then nullify the recovery amount.

Field Name	Description
	Else, credit reversal should only be done if and when the next collection's batch amount or CASA account balance is equal to or greater than the amount that needs to be recovered.
Forced Debit for Recovery	Switch the toggle ON to allow an entry with negative amount passed by core banking in case of reversal or recovery that needs to be done from a customer's bank account that has insufficient balance.

2. Click **Save** to save the record and send for authorization.

#### 3.3.2 View Arrangement Definition

By using this screen, you can view, modify, delete, or authorize arrangement code details.

## 3.4 Maintaining Arrangement Decisioning

Once the arrangement code is defined, Arrangement Decisioning screen helps to map such templates at the corporate level. The user can map the existing arrangement codes or define new arrangement settings for the Corporate/Drawee bank/Correspondent bank.

By using Arrangement Decisioning screen, you can maintain the mappings between arrangement codes and the corporates.

#### 3.4.1 Create Arrangement Decisioning

This screen is used to link the existing arrangement codes with the arrangement party (Corporate /Correspondent bank) or define a new arrangement. The arrangement decisioning is driven by combination of following fields.

- Product
- Effective Date
- Arrangement Party
- Corporate/Drawee bank/Correspondent bank
- Location (if available)

Newly created mapping takes effect once authorized and cannot be modified thereafter.

**Navigation Path:** Collections > Maintenance > Arrangement Decisioning > Create Arrangement Decisioning

1. Refer to the following table for specifying details on the above screen:

### Note: Fields marked with '\*' are mandatory.

Field Name	Description
Apply for All Products	Switch the toggle ON to apply the arrangement decisioning to all products.
Product *	Click the Search $({}^{\bigcirc}$ ) icon and select the product to apply the arrangement decisioning onto.
Arrangement Party *	Select the arrangement party (Corporate/Correspondent bank) to specify for whom the existing arrangement is being linked or new arrangement is created. This field cannot be modified once authorized.
Filter Criteria *	<ul> <li>Select the value which indicate that either the setup is done for the Corporate/Correspondent bank at broad level or it is done with a combination of different field parameter along with the arrangement party.</li> <li>For example:</li> <li>If the arrangement party is 'Corporate' then the LoV shows following options:</li> <li>Corporate</li> </ul>
	Corporate and Payable At Location
	Drawee Bank and Payable At Location
	<ul> <li>Corporate and Drawee Bank and Payable At Location</li> <li>Default</li> </ul>
	<ul> <li>Default</li> <li>If the arrangement party is 'Correspondent bank' then the LoV shows following options:-</li> </ul>
	Correspondent Bank
	Correspondent Bank and Payable At Location
	<ul> <li>Correspondent Bank and Drawee Bank and Payable At Location</li> </ul>
	Default
	Basis on the above selected value in filter criteria, relevant additional fields get displayed on the screen.
	For example:
	In case of a 'Corporate and Payable at Location' value in filter criteria field, an additional field is displayed as 'Corporate and Payable Location'.
	The filter criteria cannot be modified once authorized.
Corporate */ Correspondent Bank *	Click the Search icon to select name of the corporate or correspondent bank.
	This field cannot be modified once authorized.
Payable at Location *	Click the Search icon to select the location from where an amount can be paid.
	This field is displayed only if filter criteria contains 'Payable At Location'.

Field Name	Description
Drawee Bank *	Click the Search icon to select the bank on which the cheque is drawn.
	This field is enabled only for the below filter criteria:
	Corporate & Drawee Bank
	Corporate & Drawee Bank & Payable at Location
	Drawee Bank
	Drawee Bank & Payable at Location
	Correspondent Bank & Drawee Bank & Payable at Location
Effective Date *	Click the Calendar icon and select date from which the arrangemen will be effective.
	This field cannot be modified once authorized.
Expiry Date *	Click the Calendar icon and select date on which the arrangement expires.
	In case the expiry date is same as branch date then on that days EOD; the arrangement decisioning status is marked as 'Close'.
Agreement Reference Number	Enter the alphanumeric agreement reference number. This is an agreement reference number and is stored as a placeholder only.
Inclusion of Holidays	Switch the toggle ON to include holidays in calculation of expected clearing date during transaction entry for Corporates/Corresponden bank/Drawee bank.
	This field cannot be modified once authorized.
Centralized Forwarding Schedule	Switch the toggle ON or Off to enable or disable the centralized forwarding schedule. If the switch is enabled for a correspondent bank as an arrangement party, the workflow process of centralized forwarding schedule is followed by the system for all the cheques payable at selected correspondent bank in OBCM.
	This field is enabled only if the 'Arrangement Party' is 'Corresponden Bank'.
Amount Based Arrangement	The 'Amount Based' switch is activated in case where the arrangement party (Corporate/Correspondent bank) need to have arrangement on the basis of 'From Amount' and 'To Amount' of the cheque. Enabling this field displays the grid to specify value for amount range, arrangement code etc.
	This field cannot be modified once authorized.
Currency	Select the currency of the amount. This field is displayed only if 'Amount Based Arrangement' field is enabled.
From Amount	Enter the value to specify the start of the amount range. The amoun can contain up to two decimal values.
	For example: \$34,234,235,252,532,430,000,000,000.00. Defaul value is zero.
	This field is displayed only if 'Amount Based Arrangement' field is enabled.

Field Name	Description
To Amount	Enter the value to specify the end of the amount range. The amoun can contain up to two decimal values.
	For example: \$34,234,235,252,532,430,000,000,000.00. Blank value in the last row indicates the end of amount range as infinite Default value is zero.
	This field is displayed only if 'Amount Based Arrangement' field is enabled.
Link Arrangement	Switch the toggle ON to select and link the existing arrangemen code. On selecting the arrangement code, all its relevant fields are auto-populated and read only. This field cannot be modified once authorized.
American series and Ocide *	
Arrangement Code *	Click the Search icon to select the arrangement code. This field is displayed only if 'Link Arrangement' toggle is enabled.
Arrangement Reference	This field cannot be modified if the 'Link Arrangement' toggle is enabled.
Basis	Otherwise, select the value to specify whether the arrangement is based on 'Liquidation' or 'Deposit'.
Arrangement Days	This field cannot be modified if the 'Link Arrangement' toggle is enabled.
	Otherwise, enter the number of days when the funds are channelized between banks, corporate, etc.
	Maximum value can be 99. Default value is zero. Leaving this field blank considers default value.
Corporate Release Days	Enter the number of days post which the corporate car withdraw/utilize the funds, post the funds are released.
	Based on the arrangement, the corporate account will be credited However, the amount will be blocked for the number of days entered in 'Corporate Release Days'.
	Maximum value can be 99. Default value is zero. Leaving this field blank considers default value.
	This field cannot be modified if the 'Link Arrangement' toggle is enabled.
Extension Days - Instrument Lost	This field cannot be modified if the 'Link Arrangement' toggle is enabled.
	Otherwise, enter the number of days to be given as an extension to notify the corporate that the account will get debited, in case if cheque is lost in transit.
Extension Days - Instrument Return	This field cannot be modified if the 'Link Arrangement' toggle is enabled.
	Otherwise, enter the number of days to be given as an extensior window for the corporate in case if the cheque is returned.
Extension Days - Certificate	Enter the number of days to extend the line of credit (tenor) given to the corporate.
	For example, when the instrument does not get cleared within the scheduled time, the corporate can get a certificate from the drawer's bank. This is the form of a letter stating that the drawer's account

Field Name	Description
	balance is sufficient to make the payment to the corporate, or that the drawer's account has already been debited, thus indicating that the instrument has been cleared. However the Correspondent bank/Drawer bank might not have conveyed the same information to the system bank. In such case, giving an extension will extend the line of credit (tenor) given to the corporate as defined in the 'Certificate Extension Days' field.
	Maximum value can be 99. Default value is zero. Leaving this field blank considers default value.
Credit Reversal Days	Enter the number of days post which the pooling job should initiate reversal of credit from the corporate's account.
Credit Reversal From *	Select the value to specify from where the recovery can be done in case if clearing fate is unknown for the instrument.
Partial Credit Reversal	Switch the toggle ON if recovery can be done in tranches i.e. even if the collections or CASA account balance is less than the total amount that needs to be reversed and until such time that multiple collections or multiple debits to CASA will nullify the credit amount. Else, credit reversal should only be done if and when the next collection's batch amount or CASA account balance is equal to or greater than the amount that needs to be recovered.
Bank Float Arrangement	Switch the toggle ON to utilize the processed instruments that are realized before arrangement credit to the corporate.
Return Recovery From *	Select the value to specify from where the recovery can be done in case of returned instrument.
Partial Return Recovery	Switch the toggle ON if recovery can be done in tranches i.e. even if the collections or account balance less than the total amount that needs to be recovered and until such time that multiple collections or account debits to CASA will then nullify the recovery amount. Else, credit reversal should only be done if and when the next collection's batch amount or CASA account balance is equal to or greater than the amount that needs to be recovered.
Forced Debit for Recovery	Switch the toggle ON to allow an entry with negative amount passed by core banking in case of reversal or recovery that needs to be done from a customer's bank account that has insufficient balance.
Location Name *	Click the Search icon to select the location applicable to corporate. This field cannot be modified once authorized.

2. Click **Save** to save the record and send for authorization.

### 3.4.2 View Arrangement Decisioning

By using this screen, you can view, modify, delete, or authorize arrangement decisioning details.

- **Copy** To copy the arrangement decisioning details for creating a new record.
- View To view the arrangement decisioning details.
- Close To close the record.

### 3.5 Maintaining Corporate Enrichment

In Collections, there are various parameters that cannot be set up at system level; instead these need to be maintained at the corporate level. Out of many such parameters, few are captured and maintained in 'Corporate Enrichment' screen wherein you can maintain corporate/customer specific data.

This screen allows you to map products that are available for the specific corporate. Once the product(s) are mapped, product level enrichment can be created at a deposit level or an instrument level. In case of maintaining enrichment at an instrument level, you can choose a specific product or 'All' products. There are additional fields that can be mapped for the product and applied at the time of transaction processing.

Pooling level information allows you to map the level at which the funds should be pooled i.e. 'Account', 'Division', or 'Location'.

Pick up point creation allows you to set up multiple pick-up points for the corporate.

The 'Corporate Enrichment' screen captures data in four tabs namely – 'Basic Information', 'Product Information', 'Corporate Pooling Setup', 'Pick Up Point Creation', and 'Delivery Point Creation'.

#### 3.5.1 Create Corporate Enrichment

This screen is used to setup a new corporate enrichment details for collections.

**Navigation Path:** Collections > Maintenance > Corporate Enrichment > Create Corporate Enrichment

#### 3.5.1.1 Corporate Information

You can map the products available for the corporate and other parameters which will be applied at the time of transaction capturing or processing. Multiple records can be added for product(s) by clicking on **Add/Edit** button. These products will then be available in the next tab for enrichment.

Create Corporate Enrichm	ent						$_{\mu^{k'}} \times$

# 3.6 Maintaining Cash Denomination

Denomination is a proper description of a currency amount, usually for coins or banknotes; it is a unit of value given to physical currencies like coins and notes. Denomination detail differ currency to currency. The bank user can maintain the denomination value for each currency that bank deals with for cash collection/withdrawal.

By using 'Cash Denomination' screen, you can maintain the denominations for cash transactions of various currencies.

### 3.6.1 Create Cash Denomination

This screen is used to create master maintenance of cash denominations that the bank's branch is using. User can maintain denominations per currency / per unit. Newly created currency denominations take effect once authorized.

Navigation Path: Collections > Maintenance > Cash Denomination > Create Cash Denomination

#### OBCM 14.5.0.0.0 | Collections User Guide

Data Maintenance

	Currency *		Main Unit *		Sub Unit			
04-LM BRANCH	▼ USD	Ŧ	Dollar		CENT			
								- 6
Denomination Type		Denomination Value		Description		Action		
Coin	v	1		1 Cent = 0.01 USD				
Coin	Ψ	5		Nikel = 5 Cents				
Coin	v	10		Dime = 10 Cents				
Coin	v	50		Half Dollar = 50 Cents			1	
Note	v	1		1 USD			1	
age 1 (1-4 of 5 items) K	< 1 > >							

1. Refer to the following table for specifying details on the above screen:

Field Name	Description
Branch *	Select the branch to create the cash denomination for. Changing the branch requires access rights for the selected branch.
Currency *	Select the currency code to maintain denominations for.
Main Unit *	Enter name of the main unit in which the currency denominations are measured. For example: Dollar, Rupee, Pound etc.
Sub Unit	Enter name of the sub unit of the currency. For example: Cent, Paisa, Penny etc.

Note: Fields marked with '\*' are mandatory.

To delete a row of denomination, click the Remove icon (<sup>\*</sup>) under the 'Action' column.
 OR

To add row for a denomination, click the Add icon (1) and perform following steps:

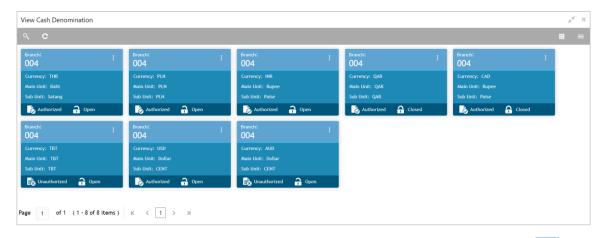

- a. Under the 'Action' column, click the Edit icon ( $\square$ ).
- b. In the Denomination Type list, specify whether the denomination is a coin or a note.
- c. In the **Denomination Value** field, enter the market value of a coin or a note.
- d. In the **Description** field, enter more details about the denomination.
- 3. Click **Save** to save the record and send for authorization.

### 3.6.2 View Cash Denomination

By using this screen, you can view, modify, delete, or authorize cash denomination details.

#### Navigation Path: Collections > Maintenance > Cash Denomination > View Cash Denomination

Perform the following steps to take actions on the cash denomination. Click the Options (:) icon and then click any of the below option:

- Unlock To modify the record details. Refer to the Create Cash Denomination section for field level details.
- Authorize To authorize the record. Authorizing requires necessary access rights.
  - a. Optional: Click View to view the record details.
  - b. Select the record to authorize and then click Confirm.
- Delete/Close To remove the record.
  - a. Optional: On the confirmation pop-up window, click View to view the record details.
  - b. Click **Proceed** to delete the record.
- Copy To copy the cash denomination details for creating a new record.
- **View** To view the cash denomination details.

# 3.7 Maintaining Courier Setup

The 'Courier Setup' is used to register the courier companies with whom the bank has a tie up for cheque pickup services. These courier companies are used for mapping in various other screens including transaction capturing and corporate enrichment.

By using 'Courier Setup' screen, you can maintain the courier company's details.

#### 3.7.1 Create Courier Setup

This screen is used to create a courier code and capture the complete detail of the courier company. Newly created courier codes take effect once authorized and cannot be modified thereafter.

*Navigation Path:* Collections > Maintenance > Courier Setup > Create Courier Setup

## 3.8 Maintaining Location

As a bank user, you can define various clearing parameters for a specific location, based on all locations where banks intends to offer CMS services. You can also link Correspondent bank to those locations where bank has a correspondent-banking tie up, or can link an outside network

banks to locations where bank does not have a branch as well as no correspondent banking arrangement.

For a specific location code, you can define clearing parameters like location cluster, high value cut-off amount as well as supported clearing networks like HOME, MICR (Magnetic Ink Character Recognition), NON-MICR (Non-Magnetic Ink Character Recognition), ICCS (Image Cheque Clearing System).

3.8.1 Create Location

This screen is used to map the locations with the location cluster, clearing network, and link Correspondent bank and outside network bank for clearing tie-up. Newly created location code takes effect once authorized and cannot be modified thereafter.

*Navigation Path:* Collections > Maintenance > Location > Create Location

#### 3.8.1.1 Location Details

eate Location						,	×°.
Location Details			Correspondent Banks	Outside Net	work Banks		
ocation Code *		Location Description *	Location Cluster		High Value Cutoff A	mount	
к	0	United Kingdom	Non MICR	୍	Ψ	\$99,999.00	
aring Network *							
NON-MICR ×							
						Save Ca	Canco

1. Refer to the following table for specifying details on the above screen:

Note: Fields marked with '	<i>"" are mandatory.</i>
----------------------------	--------------------------

Field Name	Description
Location Code *	Click the Search icon to select the location code.
Location Description *	Description of the selected location is displayed.
Location Cluster	Click the Search icon to select the location cluster to be mapped with location.
High Value Cutoff Amount	Select the currency and then enter an amount to specify the maximum limit of instrument that can be processed from the selected location.

Field Name	Description
Clearing Network *	Select any of the following clearing network in which the location participate for cheque clearing:
	MICR – Magnetic Ink Character Recognition
	NON MICR – NON Magnetic Ink Character Recognition
	ICCS – Image Cheque Clearing System
	HOME – Home Network

2. Click **Save** to save the data to be sent for authorization.

#### 3.8.1.2 Correspondent Banks

Location where bank does not have any branch, however intend to offer CMS services by having an arrangement with other bank are maintained under 'Correspondent Banks' tab.

In the location maintenance, user can map the Correspondent bank and its controlling branch with priority.

Location Details         Correspondent Banks         Outside Network Banks           k*         Priority         Controlling Branch*         Add/tdit         Reset           Morgan Chase         Q         1         V         ILM BRANCH         Add/tdit         Reset           Morgan Chase         Priority         Controlling Branch         Add/tdit         Reset           Morgan Chase         I         LIM BRANCH         Add/tdit         Reset           ge 1 of 1 (1 of 1 items)         K < (1 > X)         X         X         X	Priority*     Controlling Branch *       Q     1     V     N     Controlling Branch *     Add/tdil     Reset       Priority     V     N     Controlling Branch *     Add/tdil     Reset       I     U     N     Example     Image: Non-top of the set     Image: Non-top of the set

Perform the following steps to take actions on the location cluster code. Click the Options (:) icon and then click any of the below option:

- Unlock To modify the record details. Refer to the Create Location Cluster section for field level details.
- Authorize To authorize the record. Authorizing requires necessary access rights.
  - a. Optional: Click View to view the record details.
  - b. Select the record to authorize and then click Confirm.
- **Delete/Close** To remove the record.
  - a. Optional: On the confirmation pop-up window, click View to view the record details.
  - b. Click **Proceed** to delete the record.
- Copy To copy the location cluster details for creating a new record.
- **View** To view the location cluster details.

# **3.10 Maintaining PDC Vault Box**

As part of the collection services; when the corporates sometimes handover the postdated instruments to the bank. It is bank's need to safely keep the instruments in a secured vault box till the instrument is due for presentation, clearing, withdrawal etc. This screen allows you to create/maintain vault boxes that can be used for storing the PDC instruments. User can also parameterize options, maximum number of instruments to be allocated to a vault box, etc.

### 3.10.1 Create Vault Maintenance

This screen is used to create vault box for warehousing the PDC instrument on the basis of the Presentation Month, Presentation From and To days.

**Navigation Path:** Collections > Maintenance > PDC Vault Maintenance > Create Vault Maintenance

## OBCM 14.5.0.0.0 | Collections User Guide

#### Data Maintenance

Create Vault Maintenance						${}_{\mu}{}^{\mu'} ~\times~$
Vault Box Number * VB78356	For Cust		/ault Branch * 005-Sana Antonio Branch	¥	Vault Location Houston

Presentation From Day * 4	Presental 6	tion To Day *				
						Save Cancel

1. Refer to the following table for specifying details on the above screen:

Note: Theids marked with	are mandatory:
Field Name	Description
Vault Box Number *	Enter the unique vault box number.
	This field represents a unique number allocated to each vault box that will be used for warehousing the PDC Instruments.
Vault Box Description *	Enter the description for the vault box.
Vault Branch *	Select the branch where the vault box is located. By default, branch of the logged-in user is selected.
Vault Location	The location of the vault box is auto-populated based on selected branch.
Vault Activation Date *	Click the Calendar icon to select the date from which the vault will be operational.
Vault Expiry Date *	Click the Calendar icon to select the date after which the vault will not be operational. Leaving this field blank keeps the vault operational till the time it is manually deactivated.
	The expiry date should be equal to or greater than the activation date
Number Of Instrument *	Enter the maximum number of instruments that can be stored in the vault.
Presentation Month	Select the month for which the PDC instrument is due for presentation.
Presentation From Day *	Instruments are store in order of their presentation date.
	Enter the number to specify the first presentation date for the vault.
	The specified number should be between first and last date of the respective month.

Note: Fields marked with '\*' are mandatory.

Field Name	Description
	Presentation on From Days cannot be greater than Presentation on To Date
Presentation To Day *	Instruments are store in order of their presentation date. Enter the number to specify the last presentation date for the vault. Formula: First Presentation Date =< Presentation To Day <= last date of the respective month. Presentation on To Days cannot be less than Presentation on From Date

2. Click **Save** to save the record and send for authorization.

#### 3.10.2 View Vault Maintenance

By using this screen, you can view, modify, delete, or authorize vault box details.

# 4. Collecting and Processing Instrument Data

The **Instrument Collections** screen helps you to enter the details about the batch of instruments (Cheque) collected for clearing. The batch of these instruments may have been physically collected or received by courier. This screen allows you to enter details of such batch and details of various instruments therein such as total batch amount and deposit slip numbers, which will be validated at the time of saving the record to avoid any calculation error. You can also view the deposit slip details in the summary screen before confirming and sending the record for authorization.

*Navigation Path:* Collections > Instrument Collections

# 4.1 Basic Info

This screen helps you to input batch related information. The branch is defaulted as per login Id and can be changed to another branch based on access right. The batch amount currency selected here is defaulted at the time of deposit slip details and instrument details in next tab.

Instrument Collections							$_{\mu }^{a^{a^{a}}}\times$

1. Refer to the following table for specifying details on the above screen:

Field Name	Description
Reference Number *	Click 'Create' to auto-generate the reference number or click 'Existing' to select the existing reference number.
Reference Number **	Click the Search icon to select an existing reference number. This field is enabled only when 'Existing' toggle is selected.
Branch *	Select the bank branch where the instrument is deposited. This field displays values based on your access rights. This field cannot be modified once authorized.

Field Name	Description	
Deposit Channel *	Select the deposit channel i.e.; 'Courier' or 'Branch', this indicated whether the instrument is picked up by a courier agency or the corporate has deposited the instrument in branch.	
	This field cannot be modified once authorized.	
Courier **	Click the Search icon to select the courier company. This field will be mandatory and appears only in case if 'Deposit Channel' is selected as 'Courier'.	
Consignment Number	Enter the consignment number allocated by the courier company. This field appears only in case if 'Deposit Channel' is selected as 'Courier'.	
	This field cannot be modified once authorized.	
Consignment Date	Click the Calendar icon to select the date on which consignment is received. This field appears only in case if 'Deposit Channel' is selected as 'Courier'.	
	This field cannot be modified once authorized.	
Consignment Receipt Time	Enter the time in HH:MM:SS format when consignment is received. This field appears only in case if 'Deposit Channel' is selected as 'Courier'.	
	This field cannot be modified once authorized.	
Financial Posting *	Switch the toggle ON, if GL entries should be posted. The 'Processing Date' field will be disabled.	
	This field cannot be modified once authorized.	
Processing Date *	Click the Calendar icon to select the date on which the deposit slips are entered. This date cannot be beyond current branch date.	
	This field cannot be modified once authorized.	
Deposit Location *	Click the Search icon to select the location from where the instrument is deposited.	
	This field cannot be modified once authorized.	
Acknowledgment Receipt Number	Enter the acknowledgment number, if any.	
Bag Weight (in kg)	Enter weight of the package in kilograms when it was received.	
Initiator Reference Number Enter the reference number assigned for receiving the pair if any.		
Total Batch Amount	Select the currency and enter total amount of the deposit slips to be processed in a single batch.	
	This field cannot be modified once authorized.	
Deposit Slips	Enter the total number of deposit slips to be processed. This field cannot be modified once authorized.	

2. Click **Save & Close** to save the data and close the window.

Click Next to save the data and move to the Deposit Slip Details screen.

OR

Click Cancel to discard the deposit slip creation and close the window.

# 4.2 Deposit Slip Details

This screen helps you to input the information related to the deposit slip. When the record is sent for authorization, data in field such as 'Deposit Slip Amount' will be validated with 'Batch Amount' (if captured). 'No. of Instruments' and 'Deposit Slip Amount' is also checked before submission for authorization.

You can input default details such as 'Corporate', 'Credit Account Number', 'and 'Division' which can be applied to all instruments for the said deposit slip.

  - a. In the **No. of Miscellaneous Fields** box, enter the number to specify how many fields are required.
  - b. In the each Miscellaneous Field box, enter name of the field.
- 5. Click **Save** to save the record and send for authorization.

# 6. Managing Instruments

Instrument Management allows you to manage cheques received for collection basis the action to be performed on the instruments. You can search for the cheques by using several search criteria. Processing date is defaulted to the current business date. You can also take an action on multiple records at once.

Navigation Path: Collections > Instrument Management

Instrument Management							,, <sup>12</sup> ×
Instrument Details							
Branch *		Cheque Date		Action *		Processing Date *	
004-LM BRANCH	Ŧ	Current	Post Dated	Select	~	Dec 19, 2019	Proceed

You can manage both current as well as post-dated cheques in order to take various actions on them.

## 6.1 Manage Current Dated Cheques

On the 'Instrument Management' screen, perform the following actions:

- 1. In the **Branch** list, select the branch for which the cheque is to be managed. By default, branch of the logged-in user is selected.
- 2. In the Cheque Date toggle, select the 'Current'.
- 3. In the **Action** list, select any one of the following:
  - o Credit advancement/postponement
  - o Generate schedule
  - o Mark schedule receipt
  - o Mark return receipt
  - o Mark instrument status
- 4. Click **Proceed** to view the search parameters.

### 6.1.1 Credit Advancement/Postponement

This action of instrument management can be used in case the customer requests for an early credit or to postpone the credit of the instrument. The advancement can be used to prepone the instrument credit date and postponement can be used to postpone the instrument credit date. Only those instrument which are due for arrangement credit for Guaranteed Arrangement Corporate will be displayed in search result.

Perform the following steps to apply credit advancement/postponement on instruments:

- 1. On clicking the **Proceed**, relevant cheque records are fetched under 'List of Instruments' section.
- 2. Optional: Click the Filter icon  $(\mathbf{T})$  to filter the list of instruments.

Search Parameters Ţ							
Arrangement Credit Date *		Currency *		Product Type		Product

- 3. Select the instruments for which schedule receipts needs to be marked.
- 4. Click **Confirm** to mark the schedule receipt and send for authorization.

## 6.1.4 Mark Return Receipt

Return Receipt is marked for upcountry instruments returned by the collecting bank. It is marked by the branch, which dispatches the original schedule with upcountry instruments to a different bank when an upcountry instrument is returned by the destination bank's branch. This constitutes to marking receipt of courier return and not actually marking the instrument as returned. The instrument can and must be marked as returned only after return receipt marking.

Perform the following steps to mark return receipt for instruments:

1. On clicking the **Proceed**, the 'Filter Parameters' section is displayed.

Filter Parameters							
Dispatch Branch		Returning Bank		Returning Branch		Schedule Reference Number	
004-LM BRANCH			9		9		0
Courier		Instrument Number		Schedule Dispatch Date From		Schedule Dispatch Date To	
	0		9		<u></u>	Dec 19, 2019	ttt
Currency							
GBP	*						
Search Reset							

Refer to the following table for specifying filter parameters to search the list of instruments:

Field Name	Description
Dispatch Branch *	Select the branch from where the instrument is dispatched. By default, the branch of the logged-in user is selected.
Returning Bank	Click the Search icon and select the bank that returned the instrument.
Returning Branch	Click the Search icon and select the bank branch that returned the instrument.
Schedule Reference Number	Click the Search icon and select the schedule reference number to search the instrument by.
Courier	Click the Search icon and select the courier by which the instrument is returned.
Instrument Number	Click the Search icon and select the instrument to search for.
Schedule Dispatch Date From	Click the Calendar icon and select starting-range of the schedule dispatch date.
Schedule Dispatch Date To	Click the Calendar icon and select range-ending of the schedule dispatch date.
Currency	Select the instrument currency.

Note: Fields marked with '\*' are mandatory.

## 2. Click **Search** to view the list of instruments.

#### Managing Instruments

	Instrument Number	Instrument Amount	Corporate Name	Instrument Date	Vault Box Number	Remarks	Instrument Recovered Summary
	30112023	£1,000.00	Future Group	2020-01-03	VAULT1		
Page	1 of 1 (1 of 1 items) K <	К < []					Total Instrument Amount £1,000.00 Total Instrument Count 1
Total Se 1	lected		Remarks Recover the Instru	ment		Аррђу	Submit

- 3. In the **Remarks** field, enter the remarks for new presentation date.
- 4. Click **Apply** to update the grid with new details.
- 5. If required, click **Undo** to revert back the applied changes.
- 6. Select the updated records from the grid and then click **Submit** to send for authorization.
- 6.2.6 Mark Replacement & Withdrawal

This action can be used in below two scenarios:

- **Replacement:** When the buyer wants to provide fresh instruments in order to avoid the deteriorating physical condition of the provided cheques, which might have gone through wear and tear.
- Withdrawal: In case the buyer has provided PDCs for periodic payment of a loan and repays the entire loan amount before tenure ends. Hence, the PDCs of remaining tenure are required to be withdrawn from the system.

Only PDC instruments that are due for activation and not activated for presentation will reflect in the Mark Replacement screen

Perform the following steps to mark the instrument for replacement & withdrawal:

- 1. In the search result, select the instruments to be marked. On selecting the records the 'Total Instrument Amount' and 'Total Instrument Count' will be displayed in the summary box.
- 2. Optional: In the Instrument Number column, click the number to view more details about it.

Total Selected 1		New It	strument Number	R	emarks		Apply Submit
