# 1. Creating Property File for Oracle FLEXCUBE Installer

# 1.1 Introduction

This chapter explains the steps to create property file for Oracle FLEXCUBE using ORACLE FLEXCUBE Installer Application. While creating this property file, the environment property file also gets generated.

# 1.2 Creating Property File

To create the property file for Oracle FLEXCUBE, follow the steps given below:

 Launch Oracle FLEXCUBE Installer i.e. FCUBSInstaller.bat (for Windows), and FCUBSInstaller.sh(for Linux, bash shell recommended). These files are available in INSTALLER/SOFT/GUI

Flex Cube UBS : Release 12.3.0.0.0 - Production on 17:14:48.78 Fri 01/06/2017
Copyright (c) 2016, Oracle Financial Services Software Ltd. All rights reserved

Current Folder avast this InstallationShipment "EXEC" Inside Checking APPSERUER HOME
appserverhome
@@@@@@APPSERVER HOME NOT DEFINED@@@@@@ Enter APPSERVER HOME Directory:C:\\Oracle\\Middleware\\Oracle_Home\\wlserver_

In the first screen, provide the following details:

# i. JAVA HOME PATH

Provide the JDK home path with the latest version.

ii. ORACLE HOME PATH

Provide the Oracle 12C Client Path.

**III APP SERVER HOME PATH** 

Provide the app server home path

After providing these details, INSTALLER-GUI gets started. And follow the below details. Ensure the Pre-requisites are available.

Oracle FLEXCUBE University	ersal Installer	
Oracle Bank	ing Installer	
Welcome To Oracle Un	iversal Banking Installer	
Prerequisites		
<ul> <li>Oracle Datab</li> <li>JDK should b</li> </ul>	ase should be Installed. be Installed.	
Please specify the JDK	and Oracle Home path.	
JDK Path	C:/Program Files/Java/jdk1.8.0_131	Browse
Oracle Home Path	D:/app/dandredd/product/11.2.0/client_1	Browse
Please select any one of	of the below options:	
	Property File creation	
	Utilities	
Exit	og	Back

Enter the following details

#### JDK Path

Maintain Home folder path of JDK. The JAVA HOME path given in previous screen gets defaulted.

### **Oracle Home**

Maintain home folder path of Oracle Database Client. The ORACLE HOME path given in previous screen gets defaulted.

Select one of the radio buttons

# 1. Property File creation

2. Utilities

Based on the selection, Next screen will be shown .Click Property File creation for the current case.

2. Click 'Next' and the following screen is displayed.

🛓 Oracle FLEXCUBE Universal Installer 🛛 🚽 🗌 🗙

Exit Log Bac	k Next					

- 1. Select the component for which property file is to be created.
  - a. INFRA is for FCUBS property file creation .To create property file for Scheduler or Gateway or Switch Interface Installation, please refer the respective property file creation document.
- 2. Select the required Product Processors to make respective property files.
  - a. Oracle Financial Universal Banking product processor contains Rest of Flexcube other than Payments, ELCM and OFCL etc.
  - b. Oracle FLEXCUBE Enterprise Limits and Collateral Management (ELCM) has three types .They are Embedded, CO-Deploy and Standalone (Elcm Adapter) .Please choose proper option. Oracle FLEXCUBE Enterprise Limits and Collateral Managements can be selected as individual application or along with Oracle Financial Universal Banking. Also ELCM Adapter required checkbox is available.
  - c. Oracle Banking payments can be selected as an individual application or along with Oracle Financial Universal Banking.
  - d. Oracle Banking Corporate Lending can be selected as individual application or along with Oracle Financial Universal Banking.
  - e. Open Development Tool(ODT) can be selected to install ODT, that allows end user to design ODT screens.
- 3. In the screen below, select the Plugins to be included in the application.

4. If you need to modify an existing property file, load it using the respective browse button.

Plugins will be enabled and disabled based on the combination of Product Processors and components selected.

These are the plugins available

- o Branch
- o BPEL
- o Scheduler
- o Reports
- OFTW(Oracle FLEXCUBE Testing Workbench)
- DMS(Document Management System)
- o Insulation

You can load existing property-file to make any modifications .

3. Click 'Next' again and the following screen is displayed:

📓 Oracle FLEXCUBE Universal Installer				
Oracle Banking Insta	iller			
SMS Schema Details				
Name	Value			
Username	FCUBSTEST			
Password	•••••			
Service Name	FCTOOLSNEW			
IP Address	10.184.132.72			
Port	1521			
TNS Connect Descriptor	FCTOOLSNEW	Test Connection		
Entity Schema Details Entity Id ENTITY_ID1 Name	Same as SMS Schema JNDI Name jdbc/fcjdevDS Value	Compile in All Entities		
Username	FCUBSTEST			
Password	•••••			
Service Name	FCTOOLSNEW			
IP Address	10.184.132.72			
Port	1521	Test Connection		
TNS Connect Descriptor	FCTOOLSNEW			
Prev	Next			
Exit Log		Back		

Provide the SMS schema details to capture the credentials which will be used for DB Compilation.

Note: IP Address should be same as mentioned in the TNSnames.ora

Once the connection is successfull env.properties file present in path INSTALLER $\rightarrow$ SOFT $\rightarrow$ GUI $\rightarrow$ logs $\rightarrow$ env.properties will get updated with schema details in encrypted format.

# For Multi-Entity Details →

# Scenario for Single Entity:

- Here Entity Schema is mandatory, atleast minimum one entry should be provided.
- Entity Id value is default i.e. 'ENTITY\_ID1' for first entry.
- Provide the JNDI Name for the ENTITY\_ID1. By default the jndi name is 'jdbc/fcjdevDS'
- Give the Schema Details for the Entity1.
- Here Compile In All Entities Field is 'N'. (As using the Single Entity Concept).

# Scenario for More than One Entity, i.e. Multi Entity :

- After providing the Single Entity details, click on '+' Add the rows.
- Now give the details for Entity\_ID2. Here the field is mandatory.
- Provide the schema details and the JNDI name.
- Next and Prev button is to traverse for entity screens.
- Can also add the entites and delete the entities.
- •
- 4. Click on 'Test Connection' button. After Successful connection click on 'Next' button to proceed and below Screen occurs. This Screen displays database parameters listed in v\$parameter table.

This page is Read only used as reference to know the database parameters.

Schema drop down list is provided to verify parameters of SMS and Entity Schemas.

Parameter Current Value Expect ENTITY_ID1	Α
nizer_connect_by_cost_based FALSE	
v_level_without_connect_by TRUE	
est_subquery FALSE	
n_join_enabled FALSE	
YS_SEMI_JOIN NESTED_LOOPS	
nizer_cost_based_transformation off	
trail DB NONE	
_trimming FALSE TRUE	
r_sharing EXACT FORCE	
r_space_for_time FALSE FALSE	
ate_format DD-MON-RRR	
izer_index_caching 0 90	
izer_index_cost_adj 100 50	
	1
izer_mode ALL_ROWS ALL_ROWS	
FALSE         FALSE           ate_format         DD-MON-RRR           izer_index_caching         0         90	

5. Click on 'Next' Button. This screen displays the grants provided to the schema. If object compilation is required and the privilege is not given, then you can find that out from this screen.

Schema drop down lists SMS and Entity Schemas. Select Schema and proceed further.

6. Click 'Generate Report' button, the installer creates an SQL file 'grantScript.sql' containing the script for granting the privileges in the 'Logs' folder and the following screen is displayed

You can use this file to get the access.

Only the sys user can execute the file 'grantScript.sql' for granting privileges.

7. Click 'Next' again and the following screen is displayed:

Solution Oracle FLEXCUBE Un	🔊 Oracle FLEXCUBE Universal Installer					
Oracle Banking Installer			LE .ER			
Provide Environment	details.					
EAR Name	FCUBS					
Context Name	FCJNeoWeb					
File Seperator Style	Linux	<b>▼</b>				
Application Server	Weblogic	▼				
External JSUIXML R	equired					
External PropertyFile	e Required					
Application Server Pa	th	C:/Oracle/Middleware/Oracle_Home/wlserver	Browse			
Source Path		D:/installer/12.4_RETRO_FROM_12.3/FCUBS_12.4.0.0.0_Core_SUPPORT/Console_EXEC	Browse			
Ear Destination Path		D:/dump/temp	Browse			
External JSUIXML Pat	th		Browse			
External PropertyFile Path			Browse			
Exit	Log	Back Next				

### EAR Name

Specify a name for the Application to be deployed.

You cannot use special characters such as '.' (Dot), ',' (comma), '\$' etc. However, you may use '\_' (underscore). – Applicable for both Windows and Linux.

### **Context Name**

Based on the Application type selected, the Installer displays the application context. However, you may modify the default value.

This information will be updated in 'application.xml'. In case of a WebLogic server, this will be updated in 'weblogic.xml'.

### File Separator Style:

Specify the type of file separator (For example: Linux or Windows). Select the appropriate one from the drop-down list. You also need to specify the version of the selected operating system.

#### Application Server

Specify the application server in which you are creating the property file. Select the appropriate one from the adjoining drop-down list. For WebSphere, External JSUIXML Required option is not supported.

# External JSUIXML Required

Specify whether screen changes will be deployed as External JSUIXML for the application.

EXTERNAL\_JSUIXML\_REQUIRED=Y/N: Depending on requirement

EXTERNAL\_JSUIXML\_REQUIRED=N: JS and UIXML files are included inside the application EAR.

EXTERNAL\_JSUIXML\_REQUIRED=Y: JS and UIXML and HELP files are kept in an external path in the application server.

# External Property File Required

Specify whether screen changes will be deployed as External fcubs.properties for the application.

EXTERNAL\_PROPERTY\_PATH\_REQUIRED =Y/N: Depending on requirement

EXTERNAL\_PROPERTY\_PATH\_REQUIRED =N: fcubs.properties file is included inside the application EAR.

EXTERNAL\_PROPERTY\_PATH\_REQUIRED =Y: fcubs.properties file is kept in an external path in the application server.

External property file path should have the property file name also with it.

For example: C:\App\fcubs.properties

### Application server path

Provide the Application Server Path.

### Source Path

Provide the source path of the console exec directory. (Mention exact folder name after unzip the source)

### Ear Destination path

Specify the path where Ear needs to be copied after building it using SOFT Installer.

#### External JSUIXML Path

In case External JSUIXML Required option is checked, External JSUIXML path on the application server machine has to be specified here. External JSUIXML required option is supported only for Weblogic Application Server. EXTERNAL\_JSUIXML\_PATH: ex:-/scratch/work\_area/DEV/FC124\_UBS/JS\_UIXML\_HELP -this can be any path in the Application server.

### **External Property File Path**

In case External Property File required option is checked, External Property File path on the application server machine has to be specified here. ss

8. Click 'Next' to continue and following screen is displayed:

Oracle FLEXCUBE Universal Installer		
Oracle Banking Installer		
Property File Creation		
Release	KERNEL	
	10000	
Hashing Algorithm Iteration Count	10000	
Security Key for Encryption Logic	oraclefinancials	
Exit Log		Back Next
Exit		Back

# Release

Specify the release in which you are creating the property file. Default Option would be 'KERNEL'. The options are:

- KERNEL
- MX Cluster

Specify the Hashing algorithm iteration count. By default it is 1000.

'Security Key for Encryption Logic' is the key (exact 16 characters) for all encryption logic. By default is 'oraclefinancials'.

# 1.2.1 Custom Installation

Solution of the second	taller			
Oracle Banking I	nstaller			NSTALLER

Exit Log			Back	Next

- 1. Please enter Data sources required which will be asked as per the product, Plug-in and Component combinations chosen in the first screen.
- 2. Sms Datasource will be always enabled as it is required for most of the cases.
- 3. Branch datasource will be enabled if FCUBS product processor is selected.
- 4. Elcm Datasource will be enabled if ELCM product processor is selected.
- 5. PM related datasources will be enabled for PM product processor.
- 6. Host Server is the server where FCUBS application is deployed/to be deployed.
- 7. Standalone scheduler URL will be enabled is Standalone option is selected.

Click next to proceed to the next screen.

# 1.2.2 Setting General Properties

This section describes the process of setting common properties of Oracle FLEXCUBE Payments.

The installer displays the 'General Property' screen.

실 Oracle FLEXCUBE Univer	rsal Installer		
Oracle Banki	ng Installer		
Property File Creation	- General Property

Exit Log Back Next					

Specify the following details:

### Debug Logs Required

If debug option is required, select 'Yes' from the drop-down list. If not required, select 'No'. By default the value is 'No'.

Note:

Parameter APPLICATION\_WORK\_AREA in fcubs.properties will be updated to "Work Area" path provided during installation.

Parameter DEBUG will be updated based on "Debug Logs Required" selection.

To log debug for the user, following should be available.

- In Day 0 Setup CSTB\_PARAM table will be appended with parameter name WORK\_AREA and path provided for debug logs
- CSTB\_DEBUG table should have entries for required modules.
- Corresponding user entries should be input in CSTB\_DEBUG\_USERS.

Example: If SM module log is enabled for the user, then there should be an entry in cstb\_debug\_users.

Table: CSTB\_DEBUG\_USERS (User Level)

Module	Debug	User ID	
SM	Y	XYZ	

Table: CSTB\_DEBUG (Bank Level)

Module	Debug
SM	Y

All the configuration will be done using back-end scripts, which can be executed by Data Controller.

Snapshot of 'fcubs.properties' is displayed below:

```
##### COMMON PROPERTIES #####
APPLICATION_NAME=FCJ
APPLICATION_EXT=FCROFC
APPLICATION_SERVER=WL
APPLICATION_WORK_AREA=/scratch/work_area/DEV/FC125R2/APPLOGS
DEBUG=Y
SSL_ENABLED=Y
OFSS_AVAILABLE=N
BRANCH_CENTRALIZED=Y
REQUEST_TIME_OUT=1800000
```

### Change Logs can be visited to view audit information.LOV Fetch Required

If you check this box, the option lists in Oracle FLEXCUBE displays the matching values based on the first characters that you enter in a field. If you specify the first three characters of a value to be entered in an option list and tab out, the system displays the complete list of values that are matching the first three characters.

If you do not check this, option lists does not show the matching values based on the first few characters. You need to specify the complete value against the field.

### **External LOV Required**

If you check this box, External Lov option for external Limits in FLEXCUBE will be enabled.

# Work Area

Specify the work area.

For example: D:\BrnDbgs\

### Signature Path

Specify the location at which the signature images should be placed.

# Excel Path

Specify the location at which the excel files should be generated.

# **Request Time Out**

Specify the database request timeout value in milli seconds. This is the maximum number of seconds the database waits for a query to return the result.By default it is 1800000 milli seconds.

### Connection Time Out

Specify the database connection timeout value in seconds. This is the maximum number of seconds the application waits for a connection to the database to open.

### Session Time Out

Enter the session time out value in seconds. This is the maximum number of seconds during which the application gets active without any user intervention. If there is no user intervention continuously for the duration specified here, the user session gets expire.

#### Max Image Size

Specifies the maximum image size that can be uploaded. The default size is 1048576 bytes.

### CSS Style

Specify the CSS style to be used from the adjoining drop down list. You can select one of the following CSS styles:

- Default select this to apply the default style provided along with Oracle FLEXCUBE
- Custom select this to apply a custom style

#### Name

Specify the name of the CSS style.

Once you have specified the above details, click 'Next'

#### Language

Specify the language in which you wish to see Oracle FLEXCUBE UBS. ENGLISH is the default language. However, based on the requirement, you can set a different language. Select the appropriate one from the drop-down list.

Based on the language selected, the installer displays the ISO code.

#### Application Title

Specify the application title.

For example: FLEXCUBE UBS

#### Version

Specify the application version.

For example: 14.0.0.0.0

### CopyRights

Specify the copyright details.

For example: Copyright © 2017, Oracle and/or its affiliates. All rights reserved.

### Integration With ODA ChatBot

Check this box to enable ODA ChatBot. ODA ChatBot setup details are available in ChatBot guide document.

# 1.2.3 Setting Single Sign on

📓 Oracle FLEXCUBE Universal Installer							
Oracle	Banking Installer						
Prop	Property File Creation - Single Sign on						
SSO	Required	SSO Type DEFAULT					
SSO I	KEY DN						
Authe	entication details maintained external to F	LEXCUBE					
Exter	nal Password Required	Authentication Type MSAD					
Exter	nal User Login Required 📃						
		3S Available					
Optic	on to provide LDAP server details						
No.	Name	Value					
1	LDAP SERVER URL	LDAP://10.10.10.10:111					
2	LDAP SSL ENABLED						
3	SECURITY AUTHENTICATION TYPE	Simple					
4	DOMAIN NAME	I-FLEX.COM					
5	LDAP SERVER TIMEOUT	0					
Optic	on to provide SAML details						
No.	Name	Value					
1	SAML CERTIFICATE PATH	D:\Security\SAML_Implementation\TestFiles\cert\certstore\b					
2	SAML CERTIFICATE PASSWORD	•••••					
3	SAML CERTIFICATE ALIAS	barc					
4	4 SAML VALID AUDIENCE bPAID_BWSIT						
Exit	Exit Log Back Next						

Specify the following details:

### SSO Required

Check this box to enable single sign-on (SSO). If you check this box, you need to enter the SSO Key.

# SSO Type

This is disabled. This is enabled on selecting SSO Required Flag. Specify the SSO Type from the list of following:

- (i) DEFAULT
- (ii) TOKEN
- (iii) SAML

By default, 'DEFAULT' optionis selected; however, you can change it.

IF SAML is selected, SAML details table below will be enabled .Please enter SAML details such as Certificate Path, password, alias and valid audience.

# SSO KEY

Specify the SSO key. If you have checked the box 'SSO Required', it is mandatory to specify the SSO key.By default the value is 'DN'

If you have checked the box 'SSO required', the Installer skips the following two screens and directly navigate to the SSL screen shown below in this manual.

If you have not checked the box 'SSO required', then on clicking the 'Next' button, the screen for enabling SSL options is displayed:

### **External Password Required**

Check this box to allow the user-login using MSAD/LDAP password irrespective of the user ID. If you check this box, the user ID can be either the MSAD/LDAP/ user ID or the FCUBS user ID. And the password can be MSAD/LDAP/ server password only.

If LDAP is selected, table related to LDAP will be enabled .Please enter LDAP server URL,SSL enabled,Security authentication type,Domain Name and LDAP Server timeout details.

By default, this check box is unchecked. However, you can change this.

### External User Login Required

Check this box to enable user login using MSAD/LDAP/ user ID. If you check this box, the user can login using MSAD/LDAP/ server user ID as well as using FCUBS user ID.

If you do not check this box, the user can login using FCUBS user ID only.

By default, this check box is unchecked. However, you can change this.

Authentication Type' is enabled if one of the above check boxes is checked.

### Authentication Type

Select the authentication type from the adjoining drop-down list. This is the type of external server that is used for authentication. This option is enabled only when External Password Required checkbox is checked. You can select one of the following options:

- MSAD (Microsoft Active Directory)
- LDAP (Lightweight Directory Access Protocol)

By default, 'MSAD' is selected; however, you can change it.

Specify the following details.

OPSS is available only for weblogic and is not supported for Websphere.

IF OPSS available is checked for weblogic, the symmetric key is not stored in the property file for security reasons. If OPSS available is unchecked, the symmetric key is available in the property file and a warning message is displayed to the user.

# SSL Enabled

SSL Enabled is checked by default.

Click 'Next' and the next screen gets displayed.

# 1.2.4 Setting SMTPS(Email)/Branch/DMS details

This section describes the method to configure email details, Branch details and DMS/IPM properties whichever is required.

The following screen is displayed:

🛓 Orac	🔊 Oracle FLEXCUBE Universal Installer – 🗆 🗙						
Or	Oracle Banking Installer						
Prope	Property File Creation - SMTPS/Branch/DMS						
Option	for Mail configuring using SMTPS Pr	otocol					
No.	Name	Value					
NO.							
1	Host	samplename.mail.com	_				
2	Userld	infra					
3	User Password	••••••					
4	JNDI Name	mail/FCUBSMail					
Option	for modifying the Branch properties						
No.	Name	Value					
1	Date Seperator	-	<b>^</b>				
2	WorkFLow Frequency	6000					
3	Compress Request	<b>V</b>	•				
Option	for modifying the DMS/IPM property v	alues					
No.	Name	Value					
1	Login Service Address	http://10.10.10.10:1010/imaging/ws/LoginService	<b>▲</b>				
2	Document Service Address	http://10.10.10.10:1010/imaging/ws/DocumentService	_				
3	Document Content Service Address	http://10.10.10.10:1010/imaging/ws/DocumentContentService					
4	IPM User Name	testuser					
5	IPM Password	•••••	•				
	Exit Log Back Next						

For SMPTS protocol, specify the following details.

### Host

Specify the SMTP host name.

User ID

Specify the user ID.

### **User Password**

Specify the user password.

# JNDI Name

Specify the JNDI name.

In the next table specify the branch properties like Date Seperator,WorkFLow frequency,Compress Request as required.

# DMS/IPM Properties $\rightarrow$

This table will be enabled only if DMS plug-in is enabled.

Specify the following details:

### Login Service Address

This is the endpoint address of the web service (OracleIPM.WebService.EndpointAddress).

### **Document Service Address**

This is the URL to which the Oracle IPM adapter uploads the documents (OracleIPM11G.DocumentService.EndpointAddress).

### Document Content Service Address

This is the URL to which the Oracle IPM adapter uploads the documents (OracleIPM11G.DocumentConetntService.EndpointAddress).

■For WebSphere application server, the above three service address must end with "?wsdl"

# Example for Login Service Address:

WebSphere: http://10.10.10.10.1010/imaging/ws/LoginService?wsdl

Weblogic: <a href="http://10.10.10.10.1010/imaging/ws/LoginService">http://10.10.10.1010/imaging/ws/LoginService</a>

In the ablove url replace LoginService with DocumentService and DocumentContentService respectively for Document Service Address and Document Content Service Address as well.

### IPM User Name

This is the user name accessing Oracle IPM (OracleIPM11G.Authentication.UserName).

### IPM Password

This is the password for the above IPM user name (OracleIPM11G.Authentication.Password).

### **IPM Application Name**

This indicates the license that provides login rights to Oracle IPM (OracleIPM11G.Application).

# HTTP Session Maintain

This checkbox indicates whether HTTP session to be maintained or not (OracleIPM11G.MaintainSession).

Once you have specified the above details, click 'Next' and system displays the next screen.

# 1.2.5 Setting OFTW details

🔊 Oracle FLEXCUBE Universal Installer							
Ora	Oracle Banking Installer						
	erty File Creation - OFTW n for OFTW Details configuration	for Gateway	replay				
No.	Name			Value			
1	OFTW Recording Type		LOCAL				
2	OFTW User		infra				
3	OFTW Password		•••••				
4	OFTW Provider URL		mail/FCUBSMail				
Option	n for specfying Call Out Adapter F	Properties.	Name	Value			
1		FCUBSAccSe	ervice Url	http://10.10.10.10:1111			
	Exit				Back	Next	

Specify OFTW details like OFTW Recording Type,User,Password and Provider URL, if OFTW plug-in is enabled in the plug-in selection screen.

Specify Call Out Adapter Properties. By default, Name is given as 'FCUBSAccService Url' and Value as 'http://10.10.10.10:1111'. Value can be modified as required.

# 1.2.6 Configuring Scheduler

If **"Scheduler Standalone**" is chosen during plug-in selection time, all the below screens mentioned under scheduler configuration will **"not be applicable**".

This section describes the method to configure scheduler data source.

1. System displays the following screen:

Soracle FLEXCUBE Universal Installer	
Oracle Banking Installer	
Property File Creation - Scheduler Queues	
Option for configuring Scheduler Destination Queue	Option for configuring Scheduler Deferred Queue

Exit Log	Back Next

Specify the following details:

### Scheduler Log Rotation Interval

Select the interval between each rotation of scheduler log. Given options are – DAILY, WEEKLY and MONTHLY.

### Notify Destination

Specify the notify destination. Select one of the following options:

- QUEUE
- TOPIC

### **Queue Name**

Set 'NOTIFY\_DEST\_QUEUE' as the destination queue name.

### **Queue Connection Factory**

Set 'NotifyDestTCF' as the queue connection factory.

### Secure

Check this box to indicate that it is a secured queue connection factory. If you check this box, you will be prompted to specify the Caller ID and Caller Password as shown in the following screen.

Specify the following details:

# Notify Deffered Queue Name

Set 'DEFFERED\_DEST\_QUEUE' as the notify differed queue name.

### **Deffered Queue Connection Factory**

Set 'DefferedDestQcf' as the deffered queue connection factory.

### Secure

Check this box to indicate that it is a secured deffered queue connection factory. If you check this box, you will be prompted to enter the caller ID and caller password

Specify the following details:

### Notify Queue Name

Set 'NOTIFY\_QUEUE' as the notify queue name.

### **Dead Letter Queue Name**

Set 'NOTIFY\_QUEUE DLQ' as the dead letter queue name.

### **Notify Queue Connection Factory**

Set 'NOTIFY\_MDB\_QCF' as the notify queue connection factory.

#### Secure

Check this box to indicate that it is a secured queue connection factory. If you check this box, you will be prompted to enter the caller ID and caller password as shown in the following screen.

### Notify Queue Location

Specify the notify queue location. Select one of the following options:

- Internal
- External

For Oracle WebLogic application server, the notify queue location should be selected as 'Internal'.

If you choose 'External' following details for the external queue will be enabled

### Provider URL

Specify the provide URL (iiop://localhost:1010).

1010 is the default IIOP port.

Application Server	EMS Out Initial Context Factory	
Oracle WebLogic	t3:// <ip_adress>:port</ip_adress>	
	For example: t3://10.10.10.10:1010	

Application Server	EMS Out Initial Context Factory	
	Here, 10.10.10.10 represents the local host and 1010 to the target server default port (AdminServer/ManagedServer).	
IBM WebSphere	iiop:// <ip_adress>:port</ip_adress>	
	For example: iiop://10.10.10.10:1010	
	Here, 1010 represents the default iiop port	

# Security Principal

Specify the login ID to access the application server.

# **Security Credentials**

Specify the password to access the application server.

Click 'Next' to proceed with scheduler configuration.

If you choose 'Internal' as the 'Notify Queue Location', this screen is not displayed.

9. Click 'Next' and the following screen is displayed:

# 1.2.7 Setting Scheduler EMS Properties

Property File (	Creation - Scheduler EMS Queue		INSTALLER
No.	Name	Value	
1	Incoming Dead Letter Queue Name	EMS_QUEUE_DLQ	
2	Incoming backup Queue Name	EMS_QUEUE_BACK	
3	Incoming Queue Connection Factory	EmsQcf	
4	Secure Incoming Queue Connection		
5	Incoming Queue Caller Id		
6	Incoming Queue Caller Password		
7	Outgoing Dead Letter Queue Name	EMS_QUEUE_DLQ	
8	Outgoing Queue Connection Factory	EmsQcf	
9	Secure Outgoing Queue Connection		
10	Outgoing Queue Caller Id		
11	Outgoing Queue Caller Password		
12	Outgoing Queue Provider URL	t3://10.10.10.10:1010	
13	Queue Principal	•••••	
14	Queue Credential	•••••	
15	Incoming Queue Name	EMS_INQUEUE	
16	Outgoing Queue Name	EMS_OUTQUEUE	
17	SFMS Incoming Queue	SFMS_INQUEUE	
18	RTGS Incoming Queue	RTGS_INQUEUE	
19	EMS Bulker Queue	BULKER_QUEUE	

### Specify the following details:

### **Incoming Dead Letter Queue Name**

By default 'EMS\_QUEUE\_DLQ' is set as the incoming dead letter queue name, retain the same.

### Incoming backup Queue Name

By default 'EMS\_QUEUE\_BACK' is set as incoming backup queue name, retain the same

### **Incoming Queue Connection Factory**

Specify the name of the incoming connection factory to which EMS listens. You need to create this connection factory in the application server.

For details on connection factory creation, follow the steps described for creation of notify connection factories.

'EmsQcf' is given as default value for the incoming queue connection factory.

### Secure Incoming Queue Connection

Check this box to indicate that it is a secured queue connection.

### Incoming Queue Caller ID

Specify the caller ID for the secured queue connection.

### Incoming Queue Caller Password

Specify the caller password for the secured queue connection.

### **Outgoing Dead Letter Queue Name**

By default 'EMS\_QUEUE\_DLQ' is set as outgoing dead letter queue name, retain the same

### **Outgoing Queue Connection Factory**

Specify the name of the outgoing connection factory to which EMS listens. You need to create this connection factory in the application server.

For details on connection factory creation, follow the steps described for creation of notify connection factories.

'EmsQcf' is given as default value for the outgoing queue connection factory.

### Secure Outgoing Queue Connection

Check this box to indicate that it is a secured outgoing queue connection.

### **Outgoing Queue Caller ID**

Specify the caller ID for the secured queue connection.

### **Outgoing Queue Caller Password**

Specify the caller Password for the secured queue connection.

# **Outgoing Queue Provider URL**

Specify the URL of the outgoing queue.

In case EMS OUT MDB is to be configured to queue, you need to specify the URL for outgoing provider based on the application server. By default, the Installer displays the outgoing queue provider URL for Oracle WebLogic. This value is application server dependent.

The details of Outgoing Queue Provider URL to be used for different application servers are given below:

Application Server	EMS Out Initial Context Factory	
Oracle WebLogic	t3:// <ip_adress>:port For example: t3://10.10.10.10:1010 Here, 10.10.10.10 represents the local host and 1010 to the target server default port (AdminServer/ManagedServer).</ip_adress>	
IBM WebSphere	iiop:// <ip_adress>:port For example: iiop://10.10.10.10:1010 Here, 1010 represents the default iiop port</ip_adress>	

# Queue Principal

Specify the queue principal.

If EMS OUT MDB has to be configured to queue, you need to specify the EMS out queue principal. This is the user name for the application server in which the queue is configured.

### Queue Credential

Specify the queue credential.

If EMS OUT MDB has to be configured to queue, you need to specify the EMS out queue credential. This is the password for the above user name created for application server in which the queue configured.

### Incoming Queue Name

Specify the incoming queue name for which EMS is configured.By default EMS\_INQUEUE is specified.

### Outgoing Queue Name

Specify the outgoing queue name for which EMS is configured. By default EMS\_OUTQUEUE is specified.

### SFMS Incoming Queue

Specify the SFMS Incoming Queue for which EMS is configured. . By default SFMS\_INQUEUE is specified.

# **RTGS Incoming Queue**

Specify the RTGS incoming Queue for which EMS is configured. By default RTGS\_INQUEUE is specified.

### **EMS Bulker Queue**

Specify the Bulker Queue name. By default**BULKER\_QUEUE** is specified, retain the same. So that in fcubs.properties file, EMS\_BULKER\_QUEUE field gets updated to '**BULKER\_QUEUE**' value.

Once you have specified the above details, click 'Next' and system displays the next screen.

# 1.2.8 Setting EMS FTP/FTPS Properties

Oracle Banking Installer							
	Property file Creation - EMS FTP/FTPS Option for Scheduler EMS FTP/FTPS configuration						
No.	Name	Value					
1	File TranferMode FTPS	SFTP	<b>_</b>				
2	Server	10.10.10					
3	Userid	OFSS					
4	Password	•••••					
5	KnownHost file local folder path	/mnt/ems/SFTP/					
6	KnownHost file server folder pat	h /mnt/ems/SFTP/	=				
7	File Type	.txt					
8	SWIFT Format	1					
9	SWIFT Message Delimiter	×					
10	SWIFT Message Terminator	×					
11	MEDIA	SWIFT	-				
Option	n for EMS -Structured Financial Me	essaging System configuration Value					
1	Signature Block	<b>v</b>	<b>A</b>				
2	Keystore File Name	/keystore					
3	Keystore Alias name	•••••					
A	Kovetore Receword		-				
Exit Log Back Next							

Specify the following details:

# File Transfer Mode FTPS

Specify the mode of transferring files to EMS. Enter one of the following:

- FTPS (FTP over SSL)
- SFTP(Secure FTP)
- HTTP(Hyper Text Transfer Protocol)

Note – FTP is File Transfer Protocol

# Server

Specify the server IP address for the selected file transfer mode.

# User ID

Specify the user ID to access the server of the file transfer mode.

### Password

Specify the password to for the above user ID.

# Known Hosts Local Folder path

Specify the local path for knownhosts file generation. This is required only when File transfer mode is SFTP.

# Known Hosts server folder path

Specify the server path for knownhosts file pick-up. This is required only when File transfer mode is SFTP. Please copy the generated knownhosts file to the given server path.

# File Type

Specify the type of file that is transferred. By default, the Installer sets it as '.txt'.

### SWIFT FORMAT

Specify the SWIFT format.

### SWIFT Message Delimiter

Specify the character which is used as the message delimiter.

# SWIFT Message Terminator

Specify the character which is used as the message terminator.

Once you have specified the above details,

Specify the EMS- Structured Financial Messaging System configuration details:

### Signature Block

Check this box to enable signature block.

### Keystore File Name

Specify the keystore file name.

### Keystore Alias Name

Specify the keystore alias name.

# Keystore Password

Specify the keystore password.

Once you have specified the above details, click 'Next' and system displays the next screen

# 1.2.9 Setting Scheduler BIP/GI Upload Queue Properties

Gracle FLEXCUBE Universal Installer			
Oracle Banking Inst	taller		NSTALLER
Property File Creation - Scheduler BIP	/GI Upload Queue		
Option for configuring Scheduler BIF	and BIP Advice report.		
Bip Queue Name	INTERNAL_BIPREPORT_QUEUE		
Bip DeadLetter Queue Name	INTERNAL_BIP_QUEUE_DLQ		
BipAdvice Queue Name	ERNAL_BIPADVREPORT_QUEUE		
BipAdvice DeadLetter Queue Name	RNAL_BIP_ADVICE_QUEUE_DLQ		
Queue connection factory	BIPQCF		
Secure Caller ID			
Caller password			
Option for configuring details for Sch	eduler GI Upload Queue		
Queue Name	INTERNAL_GI_UPLOAD_QUEUE		
Dead Letter Queue Name	INTERNAL_GI_UPLOAD_DLQ		
Queue connection factory	GI_UPLOAD_QCF

Caller Password			
Exit Log		Back	Next

Once you have specified the above details, click 'Next' and system displays the next screen.

If scheduler is not selected, you will be skipped to the next screen directly from the OFTW details screen.

# 1.2.10 Setting Reports details

Oracle Banking Installer						
Option for modifying the Oracle BI Publisher properties.           No.         Name         Value						
2 Name Space http://xmlns.oracle.com/oxp/service/PublicReportService     3 User Name Administrator						
4 Password						
5 Reports Advice Spool Path /Reports Spool						
6 Advice Type NATIVE						
7 BIP Server Version 12c						
8 BIP Time Zone IST						
Option for modifying the OBIEE and other property values						
OBIEE URL http://10.10.10.10.1234/analytics/saw.dll?Portal&syndicate=Siebel						
OBIEE FOLDER D:\BmDbgs\						
OBIEE SIGNOUT URL http://10.10.10.10.1234/analytics/saw.dll?Logoff	OBIEE SIGNOUT URL http://10.10.10.10.10.1234/analytics/saw.dll?Logoff					
Exit Log Back Next						

For BI Publisher properties,

This table will be enabled only if REPORTS\_ENABLED plug-in is selected.

Specify the following details:

### Server End Point

Specify the BIP end point.

<u>http://whf00blq:9502/xmlpserver/services/v2/ReportService?wsdl</u>. However, you need to change the IP and port where BIP Application is installed. WSDL URL gets modified based on "BIP Server Version" on selecting the required version from the dropdown.

### Name Space

Specify the BIP name space.

By default, the installer displays 'http://xmlns.oracle.com/oxp/service/PublicReportService'.

### **User Name**

Specify the BIP user name. By default, the Installer displays 'Administrator'.

# Password

Specify the password for the above user name. By default, the Installer sets it as 'Administrator'.

# **Reports Spool Path**

Specify the reports spool path. By default, the Installer displays /ReportsSpool

# Advice Type

Specify the advice type. You can choose one of the following:

- NATIVE This advice type is used for generating advices in text format
- BIP This advice type is used for generating advices in PDF format.

# **BIP Server Version**

Specify the qualified BIP server version. You can select the appropriate one from the adjoining drop-down list.

# **BIP Time Zone**

Specify the time zone of the BIP server.

OBIEE properties will be always shown.

# **OBIEE Enabled**

Chose Yes/No from the drop down box.

### **OBIEE URL**

Provide OBIEE URL path.

### **OBIEE Folder**

Provide a folder path at the application server level.

# **OBIEE Signout URL**

Provide OBIEE signout URL.

# 1.2.11 Setting BPEL Properties

	erty File Creation - BPEL ent screen provides an option for modifying th	e BPEL property values	
No.		Value	
1	Factory Initial	weblogic.jndi.WLInitialContextFactory	-
2	Provide Url	t3://10.10.10.10:0101?partitionName=DOMAIN	
3	Security Principal	oc4jadmin	
4	Security Credentials	•••••	
5	SOA Partition Name	default	=
6	Domain Password	•••••	
7	Dedicated Connection		
В	BPEL Relam Name	jazn.com

11	BPM INSTALLED		_
40	Education of Allo day Described	luo	
No.	Name	Value	
1 BI User 1		*****	
2 BI Password		*****	

# Specify the following details:

### **Factory Initial**

Specify the factory initial. By default 'weblogic.jndi.WLInitialContextFactory' is specified, retain the same.

### **Provider URL**

Specify the URL of the server. Enter the IP address, target server port (AdminServer/ManagedServer) and the context root.

Sample URL with domain name appended along with the URL: t3://localhost:7001?partitionName=DOMAIN

### **Security Principal**

Specify the user name to access the application server where BPEL is installed.

# **Security Credential**

Specify the password for the above user name.

# Soa Partition Name

Specify the Soa Server Name. By default it's 'default'.

# **Domain Password**

Specify the domain password for which SOA server is extended

### **Dedicated Connection**

Check this box to indicate that this connection is not used for other purposes.

# **BPEL Realm Name**

Specify the BPEL realm name.

By default it's jazn.com

# Workflow Client Type

Specify whether Workflow Client Type is REMOTE or LOCAL. By default, it is selected as REMOTE.

# **BAM URI**

Specify the BAM URI.

### **BPM Installed**

Check this box if the BPM is installed.

# **External Alerts Required**

Specifiy 'YES' external alerts are required , else 'NO'.

### **Enabling Load Balance**

This is a checkbox, check it if Load Balance is required. By default it is checked.

# Frequency, Task Counts and CutOff time - Enter these details

**BPEL – BI Properties** 

BI User: Specify the BI User

BI Password: Specify the BI Passwor

Once you have specified the above details, click 'Next' and system displays the next screen.

# 1.2.12 Saving Property File

After completing all the required settings explained above, you need to save the property file.

1. Save the property file.

Oracle FLEXCUBE Universal Installer	<b>— — X</b>
Oracle Banking Installer

	lome

You can view the status of property file creation in the above screen. Once the file is saved, the installer displays the following message:

Messag	e 🛛 🔀
i	Property File saved successfully
	ОК

This completes the properties file creation. Along with the property file creation, env.properties file is also generated in \INSTALLER\SOFT\GUI\logs path and will be automatically copied to \INSTALLER\SOFT\logs folder.

Note: Env.properties file parameters gets updated during every property file creation (like FCUBS, Gateway, Scheduler etc). After Property file creation, proceed with respective EAR build and then proceed with other components property file creations and build.

Also OracleIPMAdapter.properties is generated in same path as fcubs.properties when IPM plugin has been enabled.
