1.3.2	2 Co-deployment Set-up – Combining Payments With FCUBS	
1.3.3	3 Basic Setup using GUI Installer	

1. Installing Oracle Banking Payments Database

1.1 Introduction

Oracle Banking Payments database can be installed in one of the following methods:

• Import full dump – Import the Oracle Banking Payments objects into an empty schema using full dump. This is a manual activity.

• From shipment media – Load the shipment media objects into an empty schema using Installer.

1.2 Creating Schema by Importing Full Dump

Under this method, you need to manually import the Oracle Banking Payments DMP file into the

Oracle Banking Payments schema. This can be done using the following command:

\$impdp user_name/password directory=dir_name dumpfile=dmp_file_name.dmp logfile=dmp_file_name.log remap_schema=from_schema_name:to_schema_name remap_tablespace=from_tablespace_name:to_tablespace_name transform=OID:n

1.3 Creating Schema from Shipment Media

Under this method, you need to create the schema from the shipment media.

1.3.1 Backend Setup using Silent Installer

Backend Setup has to be done using Silent Installer. DDL Compilation, Object Compilation and

Static Data Load will be taken care as part of Backend Setup.

Before loading objects into the schema, fcubs.properties file creation must be performed with the required database details using the GUI installer (Refer Payments_Installer_Property_File_Creation). After the property file is created, env.properties file, present in INSTALLER/SOFT/GUI/logs/ directory, will be automatically updated, with the details provided while creating the property file. The env.properties file present in INSTALLER/SOFT/GUI/logs/ will be automatically copied to INSTALLER/SOFT/logs/ directory as part of property file creation. Details from this env.properties are taken for further steps.

Run the <Product Processor>DBCompileRun.bat from INSTALLER/SOFT directory. DDL Compilation, Object Compilation and Static Data load will be done.

- a. First Run the SMSDBCompileRun.bat in windows (SMSDBCompileRun.sh in linux) for SMS schema (DB) compilation. Note: Before running DB Compilation of any sort, please make sure that System Date Time format and language are provided as English, or otherwise DB Compilation might fail due to improper log names.
- b. After SMS object loading is completed, Go to \INSTALLER\SOFT path and run the PMDBCompileRun.bat.- DDL Compilation, Object Compilation and Static Data load will be done. For Example: -Run PMDBCompileRun.bat in windows (PMDBCompileRun.sh in Linux) Check for the Invalid Count and make sure that the Invalid count is '0'. Please run Invalid Recompilation script (fast.sql), if required. Please provide number of threads and schema name as input while running the script.

1.3.2 Co-deployment Set-up – Combining Payments With FCUBS

- Copy below folders from Payments OSDC.zip to the FCUBS OSDC.zip. INFRA\PM* INFRA\PS*
- b. Copy the **PM** folder from Payments OSDC.zip to the FCUBS OSDC.zip.
- c. Copy all below files from folder **INSTALLER\SOFT\config\Application** from Payments OSDC.zip to the **INSTALLER\SOFT\config\Application** of FCUBS OSDC.zip.
- AntLibrary_PM.xml
- FCJ_applicationPM.xml
- FCJ_applicationPMFasterPay.xml
- FCJ_applicationPMGateway.xml
- FCJ_applicationPMRest.xml
- MANIFEST_PM.properties
- PM.properties
- d. Please add entry for FCPMTS to the file FCHome.ini located in FCUBS OSDC.zip from FCHome.ini located in Payments OSDC.zip with the value of proper patchset no for eg as below

FCPMTS:14.4.0.0.1

e. Goto \INSTALLER\SOFT path and execute the ROFCDBCompileRun.bat bat file in windows (ROFCDBCompileRun.sh in linux) for FCUBS + Payments- DDL Compilation and Object Compilation.

- f. For Cluster : As part of FCUBS_14.0.0.0.1 patch set Mexico Localization changes are released in cluster mode. So from FCUBS_14.0.0.0.1 patch onwards if any site wants to consume these changes, needs to run the ROFCDBCompileClusterRun.bat in windows(ROFCDBCompileClusterRun.sh in linux).
 - i. This is for KERNEL as well as cluster objects in DB schema.
 - ii. Similarly, FCUBS_14.3.0.2.0 patch set onwards, if any Site wants to consume Italy Cluster changes, then they need to run the ROFCDBCompileClusterRun.bat in windows (ROFCDBCompileClusterRun.sh in linux).

1.3.3 Basic Setup using GUI Installer

Oracle FLEXCUBE Universal Installer will list the Utilities based on the Configuration mode selected.

Utilities – Normal Configuration Mode

When the configuration mode is selected as 'Normal', existing list of utilities will be displayed.

- Day Zero Setup
- User Creation
- Reports DSN Entries
- Entity Details
- SMS DSN Entries
- Switch Monitor Installation
- Env Property file operations
- Block Chain

Day zero setup of normal configuration mode will be explained in detail in this document.

Day Zero Setup – Normal Configuration Mode

The steps to load objects from the shipment media are given below:

1. Double-click 'FCUBSInstaller.bat' batch file to launch Oracle Banking Payments Installer. The following screen is displayed. Select Configuration mode as 'Normal' and select Utilities option and click 'Next' button.

Solution of the second	sal Installer	-		
Oracle Banki	ng Installer			RACLE STALLER
Welcome To Oracle Univ	ersal Banking Installer			
Prerequisites				
Oracle Databa JDK should be	se should be Installed. 9 Installed.			
Please specify the JDK a	nd Oracle Home path.			
JDK Path	d:/jdk8		Browse	
Oracle Home Path	D:/app/sdath/product/11.2.0/client_2		Browse	
Configuration Mode	Normal			
Please select any one of	the below options:			
Property File creation

O DSN Entries		
O Entity Details		
SMS DSN Entries		
Switch Monitor Installation		
ENV Property file operations		
Exit	(Back Next

3. Click 'Next' and in the below screen. Payments Schema details to be entered.

Value	-	
	-	
	-	
	-	
	_	
	T 10 1	
- Calibo	-	
	Same as SMS Schema	
	-	
	-	
	_	
	-	
	Test Connection	
	_ID1 Value	Value

Specify the following schema details:

User Name

Specify the user name to access the schema.

Password

Enter the schema password.

Service Name

Provide service name of database.

IP Address

Specify the IP address of the system where the database schema is installed. Note: IP Address should be same as mentioned in the TNSnames.ora

Port

Specify the port number.

TNS Connect Descriptor

Specify the TNS Connect Descriptor.

- Here Entity Schema is mandatory, at least minimum one entry should be provided. Entity Id value is default i.e. 'ENTITY_ID1' for first entry. •
- •
- Provide the JNDI Name for the ENTITY_ID1. By default the jndi name is 'jdbc/fcjdevDS'

- Give the Schema Details for the Entity1.
- Here Compile In All Entities Field is 'N'. (As using the Single Entity Concept).

Basic Set	up Details			INSTALLER
aramete	rs of CSTB_PARAM table in the Datab	ase.		
S.No.	Param Name	Param value		
1	PW_OUR_STD_CCY_DEFAULT	Y

4. Click 'Next' and the following screen is displayed:

Screen displays basic setup details for table 'CSTB_PARAM'.

Here Oracle directory name (present in all_directories table in the schema) must be added for WORK_AREA and TRACE_AREA. Oracle directory name must be added for other required parameters also.

Oracle directory creation in the schema can be done as below : Create or replace directory dir_name as 'directory_path';

5. Click on 'Next' button to display Limits integration Parameters Screen as shown below:

G Oracle FLEXCUBE Universal Installer	
Oracle Banking Installer	DRACLE INSTALLER
LIMITS INTEGRATION PARAMETERS Parameters of CSTB_PARAM table in the Database. FCUBS PROPERTY FILE LIMITS SETUP MODE LIMITS COMMUNICATION MODE ASYNCHRONOUS OBCL LIMITS COMMUNICATION MODE ASYNCHRONOUS	Browse
Exit Log Back	Next

Limits Integration Parameters will be set based on values read from fcubs.properties file browsed.

In case of ELCM Embedded, Limit Communication mode will be Asynchronous by default. These parameters will be updated in CSTB_PARAM table.

6. Click on 'Next' button .Screen displays parameters for table SMTB_MODULES_GROUP

If any change is required in the JNDI name, edit the same and click on Update.

Note: SMTB_MODULES_GROUP for FCELCM (Oracle ELCM) with the JNDI name '<ENTITY_ID JNDI name>_EL'. For example, if the ENTITY_ID JNDI name is 'jdbc/fcjdevDS', then you need to update JNDI name 'jdbc/fcjdevDS_EL'.

ISO Currency Code

Enter ISO Currency Code.

Screen also displays basic setup details for the creating a user in FLEXCUBE.

Creation of 'SYSTEM' user is mandatory for payments processing, it needs to be created as part of static data setup.

External Password

Check this box to specify the external password.

User Name

Displays the user name. Change the user name if required.

Password or LDAP User Name

Specify the password and it is mandatory. You can use the following characters in the password:

- Alphabets in uppercase
- Alphabets in lowercase
- Numerals

You cannot use '_' (underscore) in the password.
