Oracle® Revenue Management and Billing

Version 3.0.0.0.0

Direct Database Upgrade from 2.3.0.2.0 to 3.0.0.0.0

Revision 1.6

F43336-01

May, 2021

ORACLE®

Oracle Revenue Management and Billing Direct Database Upgrade from 2.3.0.2.0 to 3.0.0.0.0

F43336-01

Hazardous Applications Notice

This software is developed for general use in a variety of information management applications. It is not developed or intended for use in any inherently dangerous applications, including applications that may create a risk of personal injury. If you use this software in dangerous applications, then you shall be responsible to take all appropriate fail-safe, backup, redundancy, and other measures to ensure the safe use of this software. Oracle Corporation and its affiliates disclaim any liability for any damages caused by use of this software in dangerous applications.

Third Party Content, Products, and Services Disclaimer

This software and documentation may provide access to or information on content, products, and services from third parties. Oracle Corporation and its affiliates are not responsible for and expressly disclaim all warranties of any kind with respect to third party content, products, and services unless otherwise set forth in an applicable agreement between you and Oracle. Oracle Corporation and its affiliates will not be responsible for any loss, costs, or damages incurred due to your access to or use of third party content, products, or services.

Preface

About This Document

This document will help you to understand how to directly upgrade the Oracle Revenue Management and Billing database from 2.3.0.2.0 or any later version to 3.0.0.0.0.

This document does not explain how to create a new application environment for ORMB Version 3.0.0.0.0. For more information on how to create the application environment, refer to *Oracle Revenue Management and Billing Quick Installation Guide* and *Oracle Revenue Management and Billing Installation Guide*.

Note: You need to create a new application environment for ORMB Version 3.0.0.0.0 and not upgrade the existing application environment.

Intended Audience

This document is intended for the following audience:

- Database Administrators
- Consulting Team
- Implementation Team

Organization of the Document

The information in this document is organized into the following sections:

Section No.	Section Name	Description
Section 1	Database Upgrade from 2.3.0.2.0 to 3.0.0.0.0	Explains how to directly upgrade Oracle Revenue Management and Billing (ORMB) database from 2.3.0.2.0 or any later version to 3.0.0.0.0.
Section 2	Step 1A – Database Upgrade Process	Lists the packages and patches that you need to install in order to upgrade the database.
Section 3	Step 1B - Data Migration Process	Lists the patches that you need to apply and a set of activities that you to perform in order to migrate the data from 2.3.0.2.0 or any later version to 3.0.0.0.0.
Section 4	Known Issues and Solution	Lists the known issues when you upgrade ORMB database from 2.3.0.2.0 or any later version to 3.0.0.0.0 and how to handle these issues in the database.

Related Documents

You can refer to the following documents for more information:

Document Name	Description
Oracle Revenue Management and Billing Version 3.0.0.0.0 Release Notes	Provides a brief description about the new features, enhancements, UI and database level changes, supported platforms, framework upgrade, supported upgrades, and technology upgrade made in this release. It also highlights the discontinued features, bug fixes, and known issues in this release.
Oracle Revenue Management and Billing Installation Guide	Lists the application server pre-requisites, supported platforms, and software and hardware requirements for installing the Oracle Revenue Management and Billing application. It explains how to install the Oracle Revenue Management and Billing application.
Oracle Revenue Management and Billing Quick Installation Guide	Provides high-level information on how to install the Oracle Revenue Management and Billing (ORMB) application and selected additional software.
Oracle Revenue Management and Billing Database Administrator's Guide	Provides information about the Oracle Database Server and Client required for installing the Oracle Revenue Management and Billing database. It explains how to install database with and without demo data. It provides database configuration guidelines including recommended settings for the Oracle Exadata Database machine.
Oracle Revenue Management and Billing Server Administration Guide	Explains the Oracle Revenue Management and Billing (ORMB) architecture and technical know-how required for configuring and using the ORMB application. It explains how to configure and deploy web and business application servers. In addition, it explains how to monitor client machines, web and/or business application servers, and database connections.
Oracle Revenue Management and Billing Security Guide	Lists the security features available in the Oracle Revenue Management and Billing application. It explains how to configure security for the Oracle Revenue Management and Billing application using the default security features.
Oracle Revenue Management and Billing Upgrade Guide	Explains how to upgrade the Oracle Revenue Management and Billing framework, application, and its database.
Oracle Revenue Management and Billing Upgrade Path Guide	Explains the path and prerequisites for upgrading Oracle Revenue Management and Billing from one version to another.

Conventions

The following conventions are used across the document:

Convention	Meaning
boldface	Boldface indicates graphical user interface elements associated with an action, or terms defined in the text.
italic	Italic indicates a document or book title.
monospace	Monospace indicates commands within a paragraph, URLs, code in examples, text that appears on the screen, or information that an end-user needs to enter in the application.

Change Log

Revision	Last Update	Updated Section	Comments
1.1	27-May-2021	Section 1.1: Direct Database Upgrade	Updated Information
		Section 1.3: Downloading the ORMB Packages and Patches	Added Information

1.5	11-Oct-2022	Section 1.2: Prerequisites	Updated Information
1.6	22-Oct-2022	Section 1.2: Prerequisites	Updated Information

Contents

1. Database Upgrade from 2.3.0.2.0 to 3.0.0.0.0

This section explains how to directly upgrade Oracle Revenue Management and Billing (ORMB) database from 2.3.0.2.0 or any later version to 3.0.0.0.0. It also lists the pre-requisites for upgrading ORMB database from 2.3.0.2.0 or any later version to 3.0.0.0.0. In addition, it lists all packages and patches that you need to download in order to upgrade the database.

1.1 Direct Database Upgrade

There are two ways in which you can upgrade Oracle Revenue Management and Billing (ORMB) database from 2.3.0.2.0 or any later version to 3.0.0.0.0:

- Using the Step-by-Step Upgrade Process (as shown in the left side of the below figure)
- Using the Direct Upgrade Process (as shown in the right side of the below figure)

The following figure indicates the number of steps involved in both the Step-by-Step Upgrade and Direct Upgrade processes:

Step-by-Step Upgrade Process				Direct Upgrade Process		
Step No.	**Upgrade Process**	**Data Migration Process**		**Step No.**	**Upgrade Process**	**Data Migration Process**
Step 1	1A From V2.3.0.2.0 to V2.4.0.0.0 (Install FW Rollup, ORMB, ORMB Rollup)	1B Apply Data Migration Patch (i.e. 21055108)		Step 1	1A From V2.3.0.2.0 to V3.0.0.0.0 (Install FW, FW Rollup, 32905246 Patch, ORMB, ORMB Rollup)	1B Apply Data Migration Patch (i.e. 21055108)
Step 2	2A From V2.4.0.0.0 to V2.4.0.1.0 (Install FW, FW Rollup, ORMB, ORMB Rollup)	2B Apply Data Migration Patch (i.e. 21463544)				Apply Data Migration Patch (i.e. 21463544)
Step 3	3A From V2.4.0.1.0 to V2.5.0.1.0 (Install FW, FW Rollup, ORMB, ORMB Rollup)	3B Delete ORMB V2.4.0.1.0 Demo Data with CM Owner Flag				Delete ORMB V2.4.0.1.0 Demo Data with CM Owner Flag
Step 4	4A From V2.5.0.1.0 to V2.5.0.2.0 (Install FW Rollup, ORMB, ORMB Rollup)	4B Apply Data Migration Patch (i.e. 23013891)				Apply Data Migration Patch (i.e. 23013891)
Step 5	5A From V2.5.0.2.0 to V2.5.0.3.0 (Install FW Rollup, ORMB, ORMB Rollup)	5B Apply Data Migration Patch (i.e. 24606002)				Apply Data Migration Patch (i.e. 24606002)
Step 6	6A From V2.5.0.3.0 to V2.5.0.4.0 (Install FW, FW Rollup, ORMB, ORMB Rollup)	6B Create and execute the batch control to migrate the data from ORMB Version 2.5.0.3.0 to 2.5.0.4.0				Create and execute the batch control to migrate the data from ORMB Version 2.5.0.3.0 to 2.5.0.4.0
Step 7	7A From V2.5.0.4.0 to V2.6.0.0.0 (Install FW, FW Rollup, ORMB, ORMB Rollup)	7B Create and execute the batch control to migrate the data from ORMB Version 2.5.0.4.0 to 2.6.0.0.0				Create and execute the batch control to migrate the data from ORMB Version 2.5.0.4.0 to 2.6.0.0.0
Step 8	8A From V2.6.0.0.0 to V2.6.0.1.0 (Install FW Rollup, ORMB, ORMB Rollup)	8B -				Apply Data Migration Patch (i.e. 28118364)
Step 9	9A From V2.6.0.1.0 to V2.7.0.0.0 (Install FW Rollup, ORMB, ORMB Rollup)	9B Apply Data Migration Patch (i.e. 28118364)				Execute the Pricing Rules Upgrade Batch (C1-PRCUP) batch to migrate the data from ORMB Version 2.7.0.0.0 to 2.7.0.1.0
Step 10	10A From V2.7.0.0.0 to V2.7.0.1.0 (Install FW, FW Rollup, ORMB, ORMB Rollup)	10B Execute the Pricing Rules Upgrade Batch (C1-PRCUP) batch to migrate the data from ORMB Version 2.7.0.0.0 to 2.7.0.1.0				Apply Data Migration Patch (i.e. 31437274)
Step 11	11A From V2.7.0.1.0 to V2.8.0.0.0 (Install FW, FW Rollup, ORMB, ORMB Rollup)	11B -				Apply Data Migration Patch (i.e. 32359347)
Step 12	12A From V2.8.0.0.0 to V2.9.0.0.0 (Install FW, FW Rollup, ORMB, ORMB Rollup)	12B Apply Data Migration Patch (i.e. 31437274)				Apply Data Migration Patch (i.e. 32866190)
Step 13	13A From V2.9.0.0.0 to V2.9.0.1.0 (Install FW, FW Rollup, ORMB, ORMB Rollup)	13B Apply Data Migration Patch (i.e. 32359347)				
Step 14	14A From V2.9.0.1.0 to V3.0.0.0.0 (Install FW Rollup, 32905246 Patch, ORMB, ORMB Rollup)	14B Apply Data Migration Patch (i.e. 32866190)				

Figure 1: Database Upgrade Process

To follow the Step-by-Step Upgrade process, you need to refer *Oracle Revenue Management and Billing Upgrade Path Guide* and *Oracle Revenue Management and Billing Upgrade Guide* of the respective version.

To follow the Direct Upgrade process, you need to execute the following steps:

Step	For more information, refer to…
1A	[Step 1A - Database Upgrade Process](#)
1B	[Step 1B - Data Migration Process](#)

We recommend you to follow the direct upgrade process while upgrading the ORMB database from 2.3.0.2.0 or any later version to 3.0.0.0.0 because it involves less number of steps and saves time.

1.2 Prerequisites

If you are already using the Transaction Feed Management feature and want to upgrade to Oracle Revenue Management and Billing Version 3.0.0.0.0, then you need to ensure the following (before upgrading):

- All bills generated in the system are in the **Complete** status. In other words, there should not be any bills in the **Pending** status. If there are any bills in the **Pending** status or if any billable charge (generated through TFM) is not yet billed, disaggregation and cancellation of transactions which are uploaded using 2.3.0.2.0 or any later version will not happen successfully.

- Transactions which are uploaded using 2.3.0.2.0 or any later version must not be in the **Initial Product Determined (INPD)** status. They can be in the **Uploaded (UPLD)**, **Invalid (INVL)**, **Error (EROR)**, **Completed (COMP)**, or **Cancelled (CNCL)** status.

- Equal to (=) or tilde (~) symbol is not used in any existing price item parameter code or value. Otherwise, erroneous results might occur.

If you are already using the On Demand Billing feature and want to upgrade to Oracle Revenue Management and Billing Version 3.0.0.0.0, then you need to ensure the following (before upgrading):

- The billable charges and adhoc bills are generated and completed for the usage data files where billing method is set to **Adhoc Billing**.

- The file types created in 2.3.0.2.0 or any later version must no longer be used in 3.0.0.0.0. You should create new file types in 3.0.0.0.0.

Also, ensure that no data exists in the CI_BCHG_TEMP table before you start the upgrade process. If there is data in the CI_BCHG_TEMP table, it means all billing batches are not yet executed for a set of bills. We recommend you to either complete the billing process for such bills by executing all the billing batches or delete the data from the CI_BCHG_TEMP table. Otherwise, erroneous results might occur when you execute the billing batches after the upgrade.

In addition, you need to ensure the following before upgrading ORMB database from 2.3.0.2.0 or any later version to 3.0.0.0.0:

- ORMB data is imported on Oracle Database Server 18c (12.2.0.2) SP1+ or 19c and the `MAX_STRING_SIZE` parameter is set to `EXTENDED`.

Note: For more information on how to set the `MAX_STRING_SIZE` parameter to `EXTENDED`, refer to the pre-requisites information available in the **Upgrading the ORMB Database** section of *Oracle Revenue Management and Billing Version 3.0.0.0.0 Upgrade Guide*.

- Allocate minimum SGA and PGA memory per node (i.e. approximately 150 to 200 GB for SGA and 60 to 90 GB for PGA) so that you can execute the upgrade process with parallel threads 32/64/128 depending on the number of available CPUs.

- Remove the `ALTER_CI_PRCE_CALC_LN.sql` script from the `CDIIni.Drv` file which is located at `<DESTINATION_FOLDER_1>/RMB/Upgrade/Oracle/Install-Upgrade` and add it in the beginning of the `CDIPost.Drv` file which is located at `<DESTINATION_FOLDER_1>/RMB/Upgrade/Oracle/Install-Upgrade`.

> **Note:** The `<DESTINATION_FOLDER_1>` folder is the location where you have extracted the contents of the **Oracle Revenue Management and Billing V3.0.0.0.0 Oracle Database** package.

- Take a backup of the **CI_BATCH_RUN_CNTRL** table and then truncate this table.

- Execute the `Pre_BlueprintScript.sql` query which is available in the **Apply the PACKAGE FOR DATA UPGRADE FROM 2.3.0.2.0 to 2.4.0.0.0** patch (Patch Number: 21055108) before you upgrade the database from 2.3.0.2.0 to 3.0.0.0.0. For more information, refer to the **Executing the Pre_BlueprintScript.sql Query** section in *Oracle Revenue Management and Billing Version 2.4.0.0.0 Upgrade Guide.* Note that this prerequisite is applicable only when you are upgrading from 2.3.0.2.0 to 3.0.0.0.0 and not applicable when you are upgrading from any version later than 2.3.0.2.0 to 3.0.0.0.0.

We have articulated some known issues that you may come across while upgrading ORMB database from 2.3.0.2.0 or any later version to 3.0.0.0.0. Please read the [Known Issues and Solution](#) section before you start upgrading the database.

1.3 Downloading the ORMB Packages and Patches

For upgrading from Oracle Revenue Management and Billing Version 2.3.0.2.0 or any later version to 3.0.0.0.0, you must download the following packages from the Oracle Revenue Management and Billing V3.0.0.0.0 media pack which is available on [Oracle Software Delivery Cloud](#):

- Oracle Utilities Application Framework V4.4.0.2.0 Single Fix Prerequisite Rollup for RMB V3.0.0.0.0
- Oracle Revenue Management and Billing V3.0.0.0.0 Oracle Database

In addition, you must download the following patches from [My Oracle Support](#):

- PACKAGE FOR DATA UPGRADE FROM 2.3.0.2.0 to 2.4.0.0.0 (Patch Number: 21055108)
- PACKAGE FOR DATA UPGRADE FROM 2.4.0.0.0 TO 2.4.0.1.0 (Patch Number: 21463544)
- UPGRADE FROM 2.5.0.1.0 to 2.5.0.2.0 (Patch Number: 23013891)
- UPGRADE FROM 2.5.0.2.0 to 2.5.0.3.0 (Patch Number: 24606002)
- UPGRADE FROM 2.6.0.1.0 TO 2.7.0.0.0 (Patch Number: 28118364)
- V2.9 UPGRADE - DEFERRED REVENUE RECOGNITION FUNCTIONALITY ISSUES (Patch Number: 31437274)
- UPGRADE FROM 2.9.0.0.0 TO 2.9.0.1.0 (Patch Number: 32359347)
- PRE BLUEPRINT SCRIPT TO BE APPLIED BEFORE UPGRADING TO 3.0.0.0.0 (Patch Number: 32905246)
- UPGRADE FROM 2.9.0.1.0 TO 3.0.0.0.0 (Patch Number: 32866190)

The downloaded files will be in the ZIP format.

2.   Step 1A – Database Upgrade Process

While upgrading from Oracle Revenue Management and Billing Version 2.3.0.2.0 or any later version to 3.0.0.0.0, you need to install the following on the database (in the specified order):

1. Oracle Utilities Application Framework (OUAF) Version 4.4.0.2.0
2. Rollup Pack for Oracle Utilities Application Framework (OUAF) Version 4.4.0.2.0
3. PRE BLUEPRINT SCRIPT TO BE APPLIED BEFORE UPGRADING TO 3.0.0.0.0 (Patch Number: 32905246)

> **Note:**
>
> If you are upgrading the ORMB database from 2.3.0.2.0, 2.4.0.0.0, 2.4.0.1.0, 2.5.0.1.0, 2.5.0.2.0, 2.5.0.3.0, 2.5.0.4.0, 2.6.0.0.0, 2.6.0.1.0, 2.7.0.0.0, 2.7.0.1.0, or 2.8.0.0.0 to 3.0.0.0.0, you do not need to apply the 32905246 patch. It is required only when you are upgrading the ORMB database from 2.9.0.0.0 or 2.9.0.1.0 to 3.0.0.0.0.
>
> For more information on how to apply the patch, refer to the **Applying the 32905246 Patch** section of *Oracle Revenue Management and Billing Version 3.0.0.0.0 Upgrade Guide*.

4. Oracle Revenue Management and Billing (ORMB) Version 3.0.0.0.0

Once you install ORMB Version 3.0.0.0.0, you need to apply the release-specific patches on the database. To view the list of patches that you need to apply on the database, refer to *ORMB V3.0.0.0.0 Patch Guide (Doc ID: 2782229.1)* on [My Oracle Support](#).

> **Note:** There might be situations when you do not want to recreate one or more table indexes. You can skip the recreation process of one or more table indexes by adding the following line in the `<DESTINATION_FOLDER_1>/RMB/Upgrade/Oracle/Install-Upgrade/CDXSchUpg.inp` file:
>
> `-INDEX: 'INDEX1', 'INDEX2', 'INDEX3'`
>
> For example, `-INDEX: 'XXT033P0', 'XXT034P0', 'XXT035P0'`

For more information on how to install the packages and patches on the database, refer to the respective section in *Oracle Revenue Management and Billing Version 3.0.0.0.0 Upgrade Guide*.

Alternatively, instead of individually applying the patches, you can download and install the rollup packs, if available, to apply a set of patches at once. For more information about the rollup packs, refer to **Appendix J: ORMB V3.0.0.0.0 Rollup Packs** in Oracle *Revenue Management and Billing Version 3.0.0.0.0 Upgrade Guide*.

Once you install the packages and patches on the database, you need to drop few columns and tables from the database using the following SQL commands:

```
ALTER TABLE CI_BSEG_CALC_LN DROP COLUMN PRICEITEM_PARM_GRP_ID;

ALTER TABLE CI_TXN_REC_TYPE DROP COLUMN RULE_VAL_ALG_CD;

ALTER TABLE CI_CC DROP COLUMN DESCR254;

ALTER TABLE CI_TXN_DTL_PRITM_SUMMARY DROP COLUMN AGG_FREQ;
```

```
ALTER TABLE CI_TXN_DTL_PRITM_SUMMARY DROP COLUMN CIS_DIVISION;

ALTER TABLE CI_TXN_DTL_PRITM_SUMMARY DROP COLUMN FINAL_PRICE_ITEM_CD;

ALTER TABLE CI_TXN_DTL_PRITM_SUMMARY DROP COLUMN FINAL_TOU_CD;

ALTER TABLE CI_TXN_DTL_PRITM_SUMMARY DROP COLUMN INITIAL_PRICE_ITEM_CD;

ALTER TABLE CI_TXN_DTL_PRITM_SUMMARY DROP COLUMN INTIAL_TOU_CD;

ALTER TABLE CI_TXN_DTL_PRITM_SUMMARY DROP COLUMN TXN_END_DT;

ALTER TABLE CI_TXN_DTL_PRITM_SUMMARY DROP COLUMN TXN_MMYYYY;

DROP TABLE CI_ACCT_EXTN;

DROP TABLE CI_ACCT_EXTN_K;

DROP TABLE CI_CIS_DIV_EXT;

DROP TABLE CI_PER_EXTN;

DROP TABLE CI_PER_EXTN_K;

DROP TABLE CI_TXN_DTL_PRITM_SUMMARY_GTT;

DROP TABLE CI_TXN_DTL_PRITM_VP_CHUNK_GTT;

DROP TABLE CI_TXN_DTL_PRITM_VP_GTT;

DROP TABLE SNP_CHECK_TAB;
```

Note: If any of the above table or column does not exist in the database, ignore the error message and proceed further.

3.   Step 1B - Data Migration Process

Once you upgrade the ORMB database, you need to do the following to migrate the data from 2.3.0.2.0 to 3.0.0.0.0:

1. **Apply the PACKAGE FOR DATA UPGRADE FROM 2.3.0.2.0 to 2.4.0.0.0 Patch (Patch Number: 21055108)** – For more information on how to apply this patch, refer to the **Data Migration** section in *Oracle Revenue Management and Billing Version 2.4.0.0.0 Upgrade Guide.*

2. **Apply the PACKAGE FOR DATA UPGRADE FROM 2.4.0.0.0 TO 2.4.0.1.0 Patch (Patch Number: 21463544)** – For more information on how to apply this patch, refer to the **Data Migration** section in *Oracle Revenue Management and Billing Version 2.4.0.1.0 Upgrade Guide.*

3. **Delete ORMB V2.4.0.1.0 Demo Data with CM Owner Flag** - Execute the following SQL commands to delete the ORMB V2.4.0.1.0 demo data with the CM owner flag:

   - `DELETE FROM SC_ACCESS_CNTL WHERE USR_GRP_ID = 'ALL_SERVICES' AND APP_SVC_ID = 'CIPRICEPARM' AND ACCESS_MODE='A' AND OWNER_FLG='CM';`
   - `DELETE FROM SC_ACCESS_CNTL WHERE USR_GRP_ID = 'ALL_SERVICES' AND APP_SVC_ID = 'CIPRICEPARM' AND ACCESS_MODE='C' AND OWNER_FLG='CM';`
   - `DELETE FROM SC_ACCESS_CNTL WHERE USR_GRP_ID = 'ALL_SERVICES' AND APP_SVC_ID = 'CIPRICEPARM' AND ACCESS_MODE='D' AND OWNER_FLG='CM';`
   - `DELETE FROM SC_ACCESS_CNTL WHERE USR_GRP_ID = 'ALL_SERVICES' AND APP_SVC_ID = 'CIPRICEPARM' AND ACCESS_MODE='F1EX' AND OWNER_FLG='CM';`
   - `DELETE FROM SC_ACCESS_CNTL WHERE USR_GRP_ID = 'ALL_SERVICES' AND APP_SVC_ID = 'CIPRICEPARM' AND ACCESS_MODE='R' AND OWNER_FLG='CM';`
   - `DELETE FROM SC_USR_GRP_PROF WHERE USR_GRP_ID = 'ALL_SERVICES' AND APP_SVC_ID = 'CIPRICEPARM' AND OWNER_FLG='CM';`

4. **Apply the UPGRADE FROM 2.5.0.1.0 to 2.5.0.2.0 Patch (Patch Number: 23013891)** – For more information on how to apply this patch, refer to the **Data Migration** section in *Oracle Revenue Management and Billing Version 2.5.0.2.0 Upgrade Guide.*

5. **Apply the UPGRADE FROM 2.5.0.2.0 to 2.5.0.3.0 Patch (Patch Number: 24606002)** - For more information on how to apply this patch, refer to the **Data Migration** section in *Oracle Revenue Management and Billing Version 2.5.0.3.0 Upgrade Guide.*

6. **Create and Execute the Batch Control to Migrate the Data from ORMB Version 2.5.0.3.0 to 2.5.0.4.0** - For more information on how to create the batch, refer to the **Data Migration** section in *Oracle Revenue Management and Billing Version 2.5.0.4.0 Upgrade Guide.*

7. **Create and Execute the Batch Control to Migrate the Data from ORMB Version 2.5.0.4.0 to 2.6.0.0.0** - For more information on how to create the batch, refer to the **Data Migration** section in *Oracle Revenue Management and Billing Version 2.6.0.0.0 Upgrade Guide.*

8. **Apply the UPGRADE FROM 2.6.0.1.0 TO 2.7.0.0.0 Patch (Patch Number: 28118364)** - For more information on how to apply this patch, refer to the **Data Migration** section in *Oracle Revenue Management and Billing Version 2.7.0.0.0 Upgrade Guide.*

> **Note:** If you are directly upgrading the ORMB database from 2.3.0.2.0 or any later version earlier than 2.6.0.1.0 to 3.0.0.0.0, you should not execute the **Upgrade Batch for Deferred Revenue Recognition (C1-RRUPG)** and **Revenue Recognition Division Upgrade Batch (C1-RRDIV)** batches mentioned in the **Data Migration** section of *Oracle Revenue Management and Billing Version 2.7.0.0.0 Upgrade Guide.* Otherwise, erroneous results might occur.

9. **Execute the Pricing Rules Upgrade Batch (C1-PRCUP) Batch to Migrate the Data from ORMB Version 2.7.0.0.0 to 2.7.0.1.0** - For more information about this batch, refer to the **Data Migration** section in *Oracle Revenue Management and Billing Version 2.7.0.1.0 Upgrade Guide.*

10. **Apply the V2.9 UPGRADE - DEFERRED REVENUE RECOGNITION FUNCTIONALITY ISSUES Patch (Patch Number: 31437274)** - For more information on how to apply this patch, refer to the **Migrating Data from ORMB Version Below 2.6.0.1.0 to 2.9.0.0.0** section in *Oracle Revenue Management and Billing Version 2.9.0.0.0 Upgrade Guide.*

> **Note:** You must execute the above step (10) only when you are upgrading the ORMB database from any version below 2.6.0.1.0 to 3.0.0.0.0.

11. **Apply the UPGRADE FROM 2.9.0.0.0 TO 2.9.0.1.0 Patch (Patch Number: 32359347)** - For more information on how to apply this patch, refer to the **Data Migration** section in *Oracle Revenue Management and Billing Version 2.9.0.1.0 Upgrade Guide.*

12. **Apply the UPGRADE FROM 2.9.0.1.0 TO 3.0.0.0.0 Patch (Patch Number: 32866190)** - For more information on how to apply this patch, refer to the **Data Migration** section in *Oracle Revenue Management and Billing Version 3.0.0.0.0 Upgrade Guide.*

If you upgrade the ORMB database from a version later than 2.3.0.2.0 to 3.0.0.0.0, you need to accordingly perform the steps listed above to migrate the data. For example, if you want to directly upgrade the ORMB database from 2.6.0.0.0 to 3.0.0.0.0, you just need to follow the steps from 8 to 12 to migrate the data.

4.   Known Issues and Solution

This section lists the known issues that may occur when you upgrade ORMB database from 2.3.0.2.0 or any later version to 3.0.0.0.0 and how to handle these issues in the database.

Issue	ORA-38824: A CREATE OR REPLACE command may not change the EDITIONABLE property of an existing object
Solution	Drop all views and functions before you upgrade ORMB database from 2.3.0.2.0 or any later version to 3.0.0.0.0. The **Oracle Revenue Management and Billing V3.0.0.0.0 Oracle Database** package will recreate the required views and functions in the ORMB database.

Issue	ORA-01451: Column to be modified to NULL cannot be modified to NULL
Solution	Drop the primary key from the table using the following command: ALTER TABLE <TABLE_NAME> DROP PRIMARY KEY Example 1 **Error:** ALTER TABLE CI_CONSTRUCT_LOG MODIFY SEQ_NUM NULL; **Solution:** ALTER TABLE CI_CONSTRUCT_LOG DROP PRIMARY KEY Example 2 **Error:** ALTER TABLE CI_ACCUM_GRP_SL_PRICEITEM MODIFY HCC_CD NULL; **Solution:** ALTER TABLE CI_ACCUM_GRP_SL_PRICEITEM DROP PRIMARY KEY **Note:** The primary key will be automatically created for such tables while installing Oracle Revenue Management and Billing (ORMB) Version 3.0.0.0.0.

Issue	ORA-01439: column to be modified must be empty to change datatype
Solution	Backup data from the tables where the issue occurs and then truncate the table. Once the ORMB database is upgraded, you need to insert the backup data in the respective tables before you proceed with the data migration process.
