## Deal Approval Workflow

The **Deal Approval Workflow** screen enables you to view the price item approval hierarchy and the product approval hierarchy details. It also enables you to view the approval history of the deal. It contains the following sections:

- **Main** - Displays basic information about the deal. It contains the following fields:

Field Name	Field Description
Deal Information	Displays the concatenated string of information about the deal separated by a comma (,).
Deal Version Information	Displays the concatenated string of information about the deal version separated by a comma (,).
Deal Type	Indicates the deal type using which the deal is created in the system.
Status	Indicates the current status of the deal.
Division	Indicates the division of the entity for which the deal is created in the system.

- **Approval Workflow Tracker** - Displays the price item approval hierarchy and the product level approval hierarchy of the deal. It also enables you to track the current approval status of the deal. It contains the following legends:

Legend	Legend Description
 Awaiting Action	Indicates the approver in the approval hierarchy has received the deal for approval and is yet to perform his/her actions.
 Acted On	Indicates the approver in the approval hierarchy has already performed his/her actions on the deal.
 Unassigned	Indicates the deal is not assigned to the approver in the approval hierarchy to perform his/her actions on the deal.
	<b>Note:</b> This indicates that the deal is already approved by the previous approver in the approval hierarchy.

Legend	Legend Description
 Returned	Indicates the approver has returned the deal to the submitter for approval.
 Awaiting Product Manager Approval	Indicates the approver needs the product manager's approval to perform his/her actions on the deal.
 Owner Action	Indicates the deal is not yet assigned to the approver in the approval hierarchy to perform his/her actions on the deal.
 Division Approval	Indicates the division level approval hierarchy.
 Product Approval	Indicates the product level approval hierarchy.

- **Approval History** - Displays the complete trail of actions performed on the deal. It contains the following columns:

Column Name	Column Description
Sequence	Displays the sequence in which the action is performed on the deal.
Process	Indicates the action that is performed on the deal.
Approval Type	Indicates the approval type using which the action is performed on the deal.
Division	Indicates the division for which the action is performed on the deal.
Product	Displays the product for which the action is performed on the deal.
Approval Level	Indicates the level in the approval hierarchy where the action is performed on the deal.
To Do Role	Indicates the To Do Role using which the To Do task is assigned for performing the action on the deal.
User Name	Displays the user who has performed the action on the deal.
Action Taken	Displays the action performed by the user on the deal with respect to the process.
Create Date Time	Displays the date and time when the action is performed by the user.
Update Date Time	Displays the date and time when the status of the deal is updated in the system due to the action performed.

**Note:** The deal approval workflow does not appear for deals which are in the **Draft, Pending Simulation, Simulation Deferred, Simulated, Hierarchy Creation Deferred, and Discarded** status.

For more information on how the approval workflow appears, refer [Deal Approval Scenarios](#) on page 2676

## Deal Information

The **Deal Information** screen enables you to define a deal for the existing customers, accounts, or prospect persons. It also allows you to define a prospect person. It contains the following pages:

- [Deal Information - Deal](#) on page 2862

- [Deal Information - Questionnaire](#) on page 2879
- [Deal Information - Reference](#) on page 2881
- [Deal Information - Pricing and Commitments](#) on page 2891
- [Deal Information - Simulation](#) on page 2923
- [Deal Information - Approvals](#) on page 2935
- [Deal Information - Acceptance/Rejection](#) on page 2947
- [Deal Information - Orchestration](#) on page 2959
- [Deal Information - Discarded](#) on page 2971

## Deal Information - Deal

The **Deal Information - Deal** page enables you to define a deal for the entities (i.e. customers, accounts, and prospect persons) which are already available in the system. It also enables you create a new prospect for which you want to define a deal. It contains the following zones:

- [Search Entity](#) on page 2862
- [Deal](#) on page 2868

**Note:** By default, the **Deal** zone does not appear in the **Deal Information - Deal** page. It appears when you click the **Broadcast** (  ) icon corresponding to an entity (i.e. customer, account, or prospect person) in the **Search Results** section of the **Search Entity** zone.

### Search Entity

The **Search Entity** zone allows you to search for an existing customer, account, or prospect person for whom you want to define a deal. It contains the following two sections:

- **Search Criteria** - The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Search By	Used to indicate whether you want to search for an existing customer, account, or prospect person for whom you want to define a deal. The valid values are: <ul style="list-style-type: none"> <li>• Customer Details</li> <li>• Account Details</li> <li>• Prospect Details</li> </ul>	Yes
	<b>Note:</b> By default, the <b>Customer Details</b> option is selected.	

Field Name	Field Description	Mandatory (Yes or No)
Division	Used to search for customers, accounts, or prospect persons associated with a particular division.	No
	<b>Note:</b> You can only view those divisions to which you have access in the <b>Division</b> list.	
Person Name	Used to search for customers or accounts which belong to persons with a particular name.	Yes (Conditional)
	<b>Note:</b> This field appears when the <b>Customer Details</b> , and <b>Account Details</b> option is selected from the <b>Search By</b> list.	
Customer Segment	Used to search for customers or prospect persons which belong to a particular segment.	Yes (Conditional)
	<b>Note:</b> The list includes only those values which are present in the <b>CUST_SEG_FLG</b> lookup field. This field appears when the <b>Customer Details</b> or <b>Prospect Details</b> option is selected from the <b>Search By</b> list and the <b>Advanced Search</b> link is clicked in the top right corner of the <b>Search Criteria</b> section.	
City	Used to search for customers from a particular city.	Yes (Conditional)
	<b>Note:</b> This field appears when the <b>Customer Details</b> option is selected from the <b>Search By</b> list and the <b>Advanced Search</b> link is clicked in the top right corner of the <b>Search Criteria</b> section.	
Address	Used to search for a customer residing at a particular address.	Yes (Conditional)
	<b>Note:</b> This field appears when the <b>Customer Details</b> option is selected from the <b>Search By</b> list and the <b>Advanced Search</b> link is clicked in the top right corner of the <b>Search Criteria</b> section.	
Phone Number	Used to search for a customer having a specific phone number.	Yes (Conditional)
	<b>Note:</b> This field appears when the <b>Customer Details</b> option is selected from the <b>Search By</b> list and the <b>Advanced Search</b> link is clicked in the top right corner of the <b>Search Criteria</b> section.	

Field Name	Field Description	Mandatory (Yes or No)
Person ID	Used to search for a particular customer.	Yes (Conditional)
	<b>Note:</b> This field appears when the <b>Customer Details</b> option is selected from the <b>Search By</b> list.	<b>Note:</b> This field is required while searching for an existing customer for whom you want to define a deal.
Person Identifier Type	Used to indicate the person identifier type based on which you want to search for a customer or account.	Yes (Conditional)
	<b>Note:</b> This field appears when the <b>Customer Details</b> option is selected from the <b>Search By</b> list.  This field also appears when the <b>Account Details</b> option is selected from the <b>Search By</b> list and the <b>Advanced Search</b> link is clicked in the top right corner of the <b>Search Criteria</b> section.	<b>Note:</b> This field is required while searching for an existing customer or account for which you want to define a deal.
Person Identifier	Used to specify the value for the person identifier type based on which you want to search for a customer or account.	Yes (Conditional)
	<b>Note:</b> This field appears when you select a person identifier type from the <b>Person Identifier Type</b> list.	<b>Note:</b> This field is required while searching for an existing customer or account for which you want to define a deal.  If you specify the person identifier type as a search criteria, you have to specify the person identifier.
Customer Class	Used to search for accounts which belong to a particular customer class.	Yes (Conditional)
	<b>Note:</b> This field appears when the <b>Account Details</b> option is selected from the <b>Search By</b> list and the <b>Advanced Search</b> link is clicked in the top right corner of the <b>Search Criteria</b> section.	<b>Note:</b> This field is required while searching for an existing account for which you want to define a deal.
Account ID	Used to search for a particular account.	Yes (Conditional)
	<b>Note:</b> This field appears when the <b>Account Details</b> option is selected from the <b>Search By</b> list.	<b>Note:</b> This field is required while searching for an existing account for which you want to define a deal.

Field Name	Field Description	Mandatory (Yes or No)
Account Identifier Type	Used to indicate the identifier type based on which you want to search for the accounts.	Yes (Conditional)
	<b>Note:</b> This field appears when the <b>Account Details</b> option is selected from the <b>Search By</b> list.	<b>Note:</b> This field is required while searching for an existing account for which you want to define a deal.
Account Identifier	Used to specify the value for the account identifier type based on which you want to search for the accounts.	Yes (Conditional)
	<b>Note:</b> This field appears when you select an account identifier type from the <b>Account Identifier Type</b> list.	<b>Note:</b> This field is required while searching for an existing account for which you want to define a deal.  If you specify the account identifier type as a search criteria, you have to specify the account identifier.
Account Category	Used to search accounts which are associated with a particular category. The valid values are: <ul style="list-style-type: none"> <li>• Invoice Account</li> <li>• Settlement Account</li> <li>• Usage Account</li> </ul>	Yes (Conditional)
	<b>Note:</b> The list includes only those values which are present in the <b>ACCT_USAGE_FLG</b> lookup field. This field appears when the <b>Account Details</b> option is selected from the <b>Search By</b> list and the <b>Advanced Search</b> link is clicked in the top right corner of the <b>Search Criteria</b> section.	<b>Note:</b> This field is required while searching for an existing account for which you want to define a deal.
Prospect Person Name	Used to search prospect persons with a particular name.	Yes (Conditional)
	<b>Note:</b> This field appears when the <b>Prospect Details</b> option is selected from the <b>Search By</b> list.	<b>Note:</b> This field is required while searching for an existing prospect person for whom you want to define a deal.

Field Name	Field Description	Mandatory (Yes or No)
Prospect Person ID	Used to search for a particular prospect person.	Yes (Conditional)
	<b>Note:</b> This field appears when the <b>Prospect Details</b> option is selected from the <b>Search By</b> list.	<b>Note:</b> This field is required while searching for an existing prospect person for whom you want to define a deal.
Prospect Person Identifier Type	Used to indicate the identifier type based on which you want to search for the prospect persons.	Yes (Conditional)
	<b>Note:</b> This field appears when the <b>Prospect Details</b> option is selected from the <b>Search By</b> list.	<b>Note:</b> This field is required while searching for an existing prospect person for whom you want to define a deal.
Prospect Person Identifier	Used to specify the value for the prospect identifier type based on which you want to search for the prospect persons.	Yes (Conditional)
	<b>Note:</b> This field appears when you select a prospect identifier type from the <b>Prospect Identifier Type</b> list.	<b>Note:</b> This field is required while searching for an existing prospect person for whom you want to define a deal.  If you specify the prospect person identifier type as a search criteria, you have to specify the prospect person identifier.

- **Search Results** - On clicking the **Search** button, a list of entities appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Person Information	Displays the concatenated string of customer information separated by a comma (.). In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.
	<b>Note:</b> It has a link. On clicking the link, the <b>Person</b> screen appears where you can view the details of the respective customer.  This column appears when the <b>Customer Details</b> option is selected from the <b>Search By</b> list in the <b>Search Criteria</b> section.
Person Name	Displays the name of the customer.
	<b>Note:</b> This column appears when the <b>Customer Details</b> option is selected from the <b>Search By</b> list in the <b>Search Criteria</b> section.

Column Name	Column Description
Primary Person Identifier Type	Indicates the identifier type using which the customer is defined in the system.
	<b>Note:</b> This column appears when the <b>Customer Details</b> option is selected from the <b>Search By</b> list in the <b>Search Criteria</b> section.
Primary Person Identifier	Displays the value for the primary person identifier type using which the customer is defined in the system.
	<b>Note:</b> This column appears when the <b>Customer Details</b> option is selected from the <b>Search By</b> list in the <b>Search Criteria</b> section.
Division	Indicates the division to which the customer, account, or prospect person belongs.
Account Information	Displays the concatenated string of account information separated by a comma (.). In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.
	<b>Note:</b> It has a link. On clicking the link, the <b>Account</b> screen appears where you can view the details of the respective account. This column appears when the <b>Account Details</b> option is selected from the <b>Search By</b> list in the <b>Search Criteria</b> section.
Main Customer	Displays the name of the main customer to whom the account belongs.
	<b>Note:</b> This column appears when the <b>Account Details</b> option is selected from the <b>Search By</b> list in the <b>Search Criteria</b> section.
Primary Account Identifier Type	Indicates the identifier type using which the account is defined in the system.
	<b>Note:</b> This column appears when the <b>Account Details</b> option is selected from the <b>Search By</b> list in the <b>Search Criteria</b> section.
Primary Account Identifier	Displays the value for the primary account identifier type using which the account is defined in the system.
	<b>Note:</b> This column appears when the <b>Account Details</b> option is selected from the <b>Search By</b> list in the <b>Search Criteria</b> section.
Customer Class	Indicates the customer class to which the account belongs.
	<b>Note:</b> This column appears when the <b>Account Details</b> option is selected from the <b>Search By</b> list in the <b>Search Criteria</b> section.

Column Name	Column Description
Prospect Person Information	Displays the concatenated string of prospect person information separated by a comma (.). In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.
	<p><b>Note:</b></p> <p>It has a link. On clicking the link, the <b>Prospect Person</b> screen appears where you can view the details of the respective prospect person.</p> <p>This column appears when the <b>Prospect Details</b> option is selected from the <b>Search By</b> list in the <b>Search Criteria</b> section.</p>
Prospect Person Identifier Type	Indicates the identifier type using which the prospect person is defined in the system.
	<p><b>Note:</b> This column appears when the <b>Prospect Details</b> option is selected from the <b>Search By</b> list in the <b>Search Criteria</b> section.</p>
Prospect Person Identifier	Displays the value for the prospect person identifier type using which the prospect person is defined in the system.
	<p><b>Note:</b> This column appears when the <b>Prospect Details</b> option is selected from the <b>Search By</b> list in the <b>Search Criteria</b> section.</p>

**Note:** Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

By default, the **Filter** area is visible. You can hide the **Filter** area by clicking the **Filters** () icon in the upper right corner of this zone.

On clicking the **Broadcast** () icon corresponding to an entity, the **Deal** zone appears where you can define a deal for the respective entity.

### Deal

The **Deal** zone allows you to define a deal for the entity (i.e. the customer, account, or prospect person) which is already available in the system. It contains the following sections:

- **Main** - Used to specify basic details about the deal. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Deal Entity Information	Displays information about the entity (i.e. the customer, account, or prospect person) for which you want to define a deal.	Not applicable

Field Name	Field Description	Mandatory (Yes or No)
Deal ID	Displays the deal ID.	Not applicable
	<b>Note:</b> The value of this field is automatically populated when you enter all the details for creating a deal and press the <b>Save</b> button.	
Contracted Deal	Used to indicate that the change in the price item pricing from the price list does not affect the price item pricing offered in the deal created for an existing customer, account, or prospect.	No
Copy Template	Used to indicate the deal template which you want to use for creating the deal.	No
	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to the <b>Copy Template</b> field. On clicking the <b>Search</b> icon, the <b>Copy From</b> window appears where you can select the respective details from the template.	
Deal Entity	Indicates the entity (i.e. the customer, account, or prospect person) for which you want to create a deal. The valid values are: <ul style="list-style-type: none"> <li>• Account</li> <li>• Customer</li> <li>• Prospect</li> </ul>	Not applicable
	<b>Note:</b> This field cannot be edited. The list includes only those values which are present in the <b>DEAL_ENTITY_TYPE_FLG</b> lookup field.	
Status	Indicates the current status of the deal.	Not applicable
	<b>Note:</b> This field cannot be edited. The value of this field is automatically populated when you enter all the details for creating a deal and press the <b>Save</b> button. The list includes only those values which are present in the <b>DEAL_STATUS</b> lookup field.	

Field Name	Field Description	Mandatory (Yes or No)
Customer Segment	<p data-bbox="646 218 1146 302">Indicates the business component to which the entity (i.e. the customer, account, or prospect person) belongs.</p> <p data-bbox="646 333 1146 569"><b>Note:</b> This field cannot be edited. The value of this field is set to the value that is specified in the <b>Person</b> screen. The list includes only those values which are present in the <b>CUST_SEG_FLG</b> lookup field.</p>	Not applicable
Customer Tier	<p data-bbox="646 632 1146 716">Indicates the customer tier of the customer segment to which the entity (i.e. the customer, account, or prospect person) belongs.</p> <p data-bbox="646 747 1146 982"><b>Note:</b> This field cannot be edited. The value of this field is set to the value that is specified in the <b>Person</b> screen. The list includes only those values which are present in the <b>CUST_TIER_FLG</b> lookup field.</p>	Not applicable
Access Group	<p data-bbox="646 1045 1146 1129">Indicates the user group who can view and edit the details of the entity (i.e. the customer, account, or prospect person).</p> <p data-bbox="646 1161 1146 1224"><b>Note:</b> The value of this field is set to the value that is specified in the <b>Person</b> screen.</p>	Not applicable
Division	<p data-bbox="646 1268 1146 1352">Indicates the division with which the entity (i.e. the customer, account, or prospect person) is associated.</p> <p data-bbox="646 1383 1146 1541"><b>Note:</b> This field cannot be edited. The value of this field is set to the value that is specified in the <b>Person</b> screen.</p>	Not applicable

Field Name	Field Description	Mandatory (Yes or No)
Deal Identifier	Used to specify the primary identifier using which you want to create a deal for the entity in the system.	Yes
	<p><b>Note:</b></p> <p>You should ensure that every deal has a unique deal identifier.</p> <p>An error message appears when you save a deal with a deal identifier which is already used for creating a deal.</p>	
Deal Type	Used to indicate the deal type using which you want to create a deal in the system.	Yes
	<p><b>Note:</b></p> <p>The <b>Search</b> (🔍) icon appears corresponding to the <b>Deal Type</b> field. On clicking the <b>Search</b> icon, the <b>Deal Type Search</b> window appears.</p> <p>On specifying the deal type, the description of the deal type appears corresponding to the <b>Deal Type</b> field.</p> <p>The <b>Deal Type Search</b> window lists only those deal types having the <b>Division</b>, <b>Customer Segment</b>, and <b>Customer Tier</b> combination which best fits with the <b>Division</b>, <b>Customer Segment</b>, and <b>Customer Tier</b> combination as specified in the <b>Person</b> screen of the entity (i.e. the customer, account, or prospect person).</p>	
Deal Currency	Used to specify the currency in which you want to calculate the deal level, division level, and the product level financial summary and profitability of the deal.	Yes
	<p><b>Note:</b> The list includes only those currencies which are already defined in the system.</p>	
Simulation Type	<p>Used to indicate the simulation type using which you want to analyze the cost, revenue, and profitability of the deal. The valid values are:</p> <ul style="list-style-type: none"> <li>• Account</li> <li>• Customer</li> <li>• Deal</li> </ul>	Yes

Field Name	Field Description	Mandatory (Yes or No)
Include Hierarchy	Used to indicate whether you want to include the child persons, grandchild persons, and their accounts in the customer hierarchy while creating a deal.	No
	<p><b>Note:</b></p> <p>This option appears only when the <b>Deal Entity</b> is set to <b>Customer</b> and the <b>Simulation Type</b> is set to <b>Customer</b>.</p> <p>By default, the <b>Include Hierarchy</b> check box is selected when you are defining a deal.</p>	
Start Date	Used to specify the date from when the deal is effective for the entity (i.e. the customer, account, or prospect person).	Yes
	<p><b>Note:</b> This date is also used as the <b>Effective Start Date</b> for the proposed price list assignment, price assignment and <b>Start Date</b> for proposed product enrollment.</p>	
Price Selection Date	Used to specify the date from when the price lists, pricing assignments, and product enrollments are effective for simulation.	Yes
End Date	Used to specify the date till when the deal is effective for the entity (i.e. the customer, account, or prospect person).	No
Review Frequency	Used to indicate the timely monitoring of the deal usage as per the commitments made by the customer.	No
	<p><b>Note:</b> The list includes only those values which are present in the <b>REVIEW_FREQUENCY_FLG</b> lookup field.</p>	
Deal Frequency	Used to indicate the duration for which you want to simulate the deal for calculating the financial summary and profitability of the deal.	Yes
	<p><b>Note:</b> The list includes only those values which are present in the <b>FREQUENCY_FLG</b> lookup field.</p>	
Usage Period	Used to indicate the period for which you want to aggregate the deal data to determine the scope of the deal.	Yes
	<p><b>Note:</b> The list includes only those values which are present in the <b>USAGE_PERIOD_FLG</b> lookup field.</p>	

Field Name	Field Description	Mandatory (Yes or No)
Deal Description	Used to specify the description for the deal.	Yes
Deal Version Description	Used to specify the description for the deal version.	Yes (conditional)
		<b>Note:</b> This field is required while creating a deal version.
Skip Reference	Used to indicate whether you want to use a deal which is already created in the system as a reference for copying the pricing and commitments while creating a deal for the existing customer, account, or prospect person..	No
	<p><b>Note:</b></p> <p>If you select the check box corresponding to the <b>Skip Reference</b> field and click <b>Save</b>, the system will direct you to the <b>Deal Information - Pricing/Commitments</b> page in the <b>Pending Simulation</b> status to define the price list assignments, price assignments, and product enrollments for the deal.</p> <p>If you do not select the check box corresponding to the <b>Skip Reference</b> field and click <b>Save</b>, the system will direct you to the <b>Deal Information - Reference</b> page in the <b>Draft</b> status to select reference whose price item pricing, price list assignments, and product enrollments you want to use for the deal</p>	
Template Deal	Use to indicate whether you want the deal to be used as a template while using references for other deals.	No
	<b>Note:</b> You can view the deal templates by clicking the <b>Templates</b> button on the <b>Deal Information - References</b> page.	
Skip Questionnaire	Used to indicate whether you want to derive reference customers and deals during a deal creation using a questionnaire.	No
	<b>Note:</b> If a questionnaire template is not specified in the respective deal type or if the questionnaire template is not effective on the deal start date or if the <b>Skip Questionnaire</b> option is selected during the deal creation, the system derives the reference customers for the deal using the division, customer segment, and customer tier combination.	

- **Terms and Conditions** - Used to associate terms and conditions with the deal. It contains the following field in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Terms and Conditions	Used to indicate the terms and conditions which you want to associate with the deal.	Yes (conditional)
	<p><b>Note:</b></p> <p>The <b>Search</b> (🔍) icon appears corresponding to the <b>Terms and Conditions</b> field. On clicking the <b>Search</b> icon, the <b>Terms and Conditions Search</b> window appears.</p> <p>On specifying the term and condition, the description of the term and condition appears corresponding to the <b>Terms and Conditions</b> field.</p>	<p><b>Note:</b> This field is required while associating terms and conditions with a deal.</p>

- **Product** - Used to recommend a list of products to which the accounts in the customer hierarchy can be enrolled. It contains the following field in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Product	Used to indicate the product that you want to recommend for the deal.	Yes (Conditional)
	<p><b>Note:</b></p> <p>The <b>Search</b> (🔍) icon appears corresponding to the <b>Product</b> field. On clicking the <b>Search</b> icon, the <b>Product Search</b> window appears.</p> <p>On specifying the product, the description of the product appears corresponding to the <b>Product</b> field. The <b>Product Search</b> window lists only those products which are effective on the deal start date.</p>	<p><b>Note:</b> This field is required while recommending a product for a deal.</p>

**Note:**

The system automatically derives recommended products for the deal when the questionnaire contains questions where the question applicability is set to **Package and Product Reference**.

The system derives the recommended products from the reference deals. It only considers automatically recommended products of the reference deals and not manually recommended products of the reference deals.

- **Characteristics** - Used to define a list of characteristics for the deal. It contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Effective Date	Used to specify the date from when the characteristic is effective for the deal.	Yes (Conditional)
		<p><b>Note:</b> This field is required while defining a characteristic for the deal.</p>

Field Name	Field Description	Mandatory (Yes or No)
Characteristic Type	Used to indicate the characteristic type.	Yes (Conditional)
	<b>Note:</b> The list includes only those characteristic types where the characteristic entity is set to <b>Deal</b> .	<b>Note:</b> This field is required while defining a characteristic for the deal.
Characteristic Value	Used to specify the value for the characteristic type.	Yes (Conditional)
	<b>Note:</b> If you select a predefined characteristic type, the <b>Search</b> (🔍) icon appears corresponding to the <b>Characteristic Value</b> field. On clicking the <b>Search</b> icon, the <b>Predefined Characteristic Search</b> window appears.  On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the <b>Characteristic Value</b> field.	<b>Note:</b> This field is required while defining a characteristic for the deal.

### **Searching for an Entity**

#### **Prerequisites**

To search for an entity, you should have:

- Entities (i.e. customers, accounts, and prospect persons) defined in the application

#### **Procedure**

To search for an entity:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Main** menu, select **Deal Management** and then click **Deal Dashboard**.  
The **Deal Dashboard** screen appears.
3. Click the **Create New Deal** button in the page title area of the **Deal Dashboard** screen.  
The **Deal Information - Deal** page appears.
4. Enter the search criteria in the **Search Entity** zone.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

#### 5. Click **Search**.

A list of entities (i.e. customers, accounts, or prospect persons) that meet the search criteria appears in the **Search Results** section.

**Note:** Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

### **Associating the Terms and Conditions with a Deal**

#### Prerequisites

To associate terms and conditions with a deal you should have:

- Terms and conditions defined in the application

#### Procedure

To associate terms and conditions with a deal:

1. Ensure that the **Terms and Conditions** section is expanded in the **Deal** zone when you are defining a *deal*.

The **Terms and Conditions** section contains the following field in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Terms and Conditions	Used to indicate the terms and conditions which you want to associate with the deal.	Yes (Conditional)
	<p><b>Note:</b></p> <p>The <b>Search</b> (🔍) icon appears corresponding to the <b>Terms and Conditions</b> field. On clicking the <b>Search</b> icon, the <b>Terms and Conditions Search</b> window appears.</p> <p>On indicating the term and condition, the description of the term and condition appears corresponding to the <b>Terms and Conditions</b> field.</p>	<p><b>Note:</b> This field is required for associating terms and conditions with a deal.</p>

2. Enter the required details in the **Terms and Conditions** section.
3. If you want to associate more than one term and condition with the deal, click the **Add** (+) icon and then repeat step 3.

**Note:** However, if you want to remove a term and condition from the deal, click the **Delete** (🗑️) icon corresponding to the term and condition.

#### 4. Click **Save**.

The terms and conditions are associated with the deal.

### Recommending a Product for a Deal

#### Prerequisites

To recommend a product for a deal, you should have:

- Products defined in the application

#### Procedure

To recommend a product for a deal:

1. Ensure that the **Product** section is expanded in the **Deal** zone when you are defining a *deal*.

The **Product** section contains the following field in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Product	Used to indicate the product that you want to recommend for the deal.	No
	<p><b>Note:</b></p> <p>The <b>Search</b> (🔍) icon appears corresponding to the <b>Product</b> field. On clicking the <b>Search</b> icon, the <b>Product Search</b> window appears.</p> <p>On specifying the product, the description of the product appears corresponding to the <b>Product</b> field.</p>	

#### **Note:**

The system automatically derives recommended products for the deal when the questionnaire contains questions where the question applicability is set to **Package and Product Reference**.

The system derives the recommended products from the reference deals. It only considers automatically recommended products of the reference deals and not manually recommended products of the reference deals.

2. Enter the required details in the **Product** section.
3. If you want to recommend more than one product for the deal, click the **Add** (+) icon and then repeat step 2.

**Note:** However, if you want to remove a recommended product from the deal, click the **Delete** (🗑️) icon corresponding to the product.

#### 4. Click **Save**.

The products is recommended for the deal.

### Defining a Characteristic for a Deal

#### Prerequisites

To define a characteristic for a deal, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to **Deal**)

#### Procedure

To define a characteristic for a deal:

1. Ensure that the **Characteristics** section is expanded in the **Deal** zone when you are defining a deal.

The **Characteristics** section contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Effective Date	Used to specify the date from when the characteristic is effective for the deal.	Yes (Conditional)
		<b>Note:</b> This field is required while defining a characteristic for the deal.
Characteristic Type	Used to indicate the characteristic type.  <b>Note:</b> The list includes only those characteristic types where the characteristic entity is set to <b>Deal</b> .	Yes (Conditional)
		<b>Note:</b> This field is required while defining a characteristic for the deal.
Characteristic Value	Used to specify the value for the characteristic type.  <b>Note:</b> If you select a predefined characteristic type, the <b>Search</b> (🔍) icon appears corresponding to the <b>Characteristic Value</b> field. On clicking the <b>Search</b> icon, the <b>Predefined Characteristic Search</b> window appears.  On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the <b>Characteristic Value</b> field.	Yes (Conditional)
		<b>Note:</b> This field is required while defining a characteristic for the deal.

2. Enter the required details in the **Characteristics** section.
3. If you want to define more than one characteristic for the deal, click the **Add** (+) icon and then repeat step 3.

**Note:** However, if you want to remove a characteristic from the deal, click the **Delete** (🗑️) icon corresponding to the characteristic.

#### 4. Click **Save**.

The characteristic is defined for the deal.

## Deal Information - Questionnaire

The **Deal Information - Questionnaire** page enables you to derive reference customers and deals during deal creation using a questionnaire.

#### **Note:**

The reference deals are those deals which belong to the reference customers which are derived using the questionnaire. The system displays the questions from the questionnaire template which is specified in the respective deal type. The system considers the questionnaire template specified in the deal type when it is effective on the deal start date.

**Deal Information - Questionnaire** page contains the following zone:

- [Questionnaire](#) on page 2879

**Note:** By default, the **Deal Information - Questionnaire** page does not appear while creating a deal. It appears when the **Skip Questionnaire** check box is unchecked in the **Deal** zone of **Deal Information - Deal** page and the **Questionnaire Template** is associated with the **Deal Type** using which the deal is created.

## Questionnaire

The **Questionnaire** zone allows you to answer the questions of the questionnaire template associated with the deal type using which the deal is created in the system.

The system enables you to derive reference customers and deals based on the answer provided in the **Questionnaire** zone.

The display order of the questions in the **Questionnaire** zone depends on the value set for the **Question Display Order** field in the **Questionnaire Template** screen associated with the deal type.

If the question display order is rule based, then the questions appear in the **Questionnaire** zone based on the answer provided for the previous question.

**Note:** Click the **Previous** (←) or **Next** (→) icons to navigate through the questions of a rule based questionnaire.

If the question display order is sequence based, then a list of questions appear in the **Questionnaire** zone.

**Note:** Click the **Previous** (←) or **Next** (→) icons to navigate through the questions set of a sequence based questionnaire.

The mandatory questions in both rule based and sequence based question display orders are indicated by an asterisk (\*) sign.

On clicking the **Skip Questionnaire** button on the top right corner of this zone, you can skip the questionnaire for deriving reference customers or deals based on the answers provided in the questionnaire.

## Answering a Questionnaire for a Deal

### Procedure

To answer a questionnaire for a deal:

1. Ensure that the **Questionnaire** zone is expanded in the **Deal Information - Questionnaire** page.

A list of questions appear in the **Questionnaire** zone if the **Question Display Order** is set to **Sequence Based** in the **Questionnaire Template** associated with the deal type. Whereas, if the **Question Display Order** is set to **Rule Based** in the **Questionnaire Template** associated with the deal type, the questions appear based on the answer provided for the previous question.

2. Click the **Previous** (←) or

**Next** (→) icons to navigate through the questions or question sets of a rule based or sequence based questionnaire respectively.

3. Answer the questions as per the **Answer Type** set for the questions in the **Questionnaire Template**.
4. Click the **Next** button.

A list of reference customers appear based on the answers provided in the questionnaire.

## Skipping Questionnaire for a Deal

### Procedure

To skip questionnaire for a deal:

1. Ensure that the **Questionnaire** zone is expanded in the **Deal Information - Questionnaire** page.

- Click the **Skip Questionnaire** button in the top right corner of the **Questionnaire** zone.

A message appears confirming whether you want to skip the questionnaire.

- Click **OK**.

The questionnaire is skipped.

**Tip:** Alternatively, you can skip a questionnaire by clicking the check box corresponding to the **Skip Questionnaire** field in the **Deal** zone of the **Deal Information - Deal** page while defining a deal.

## Select Reference

The **Select Reference** zone allows you to search for a customer or a deal whose price item pricing, price list assignments, and product enrollments you want to use as a reference for creating a deal.

### Note:

By default, the **Select Reference** zone lists the reference customers for the deal based on the division, customer segment, and customer tier combination.

If a questionnaire template is specified in the respective deal type and if the questionnaire template is effective on the deal start date and if the **Skip Questionnaire** option is not selected during the deal creation, the **Select Reference** zone lists the reference customers based on the answers provided in the **Questionnaire** zone of the **Deal Information - Questionnaire** page.

The **Select Reference** zone contains the following sections:

- Search Criteria** - The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Search By	<p>Used to search for reference customer or deals whose price item pricing, price list assignments, and product enrollments you want to use as a reference to create a deal. The valid values are:</p> <ul style="list-style-type: none"> <li>• <b>Reference Customers</b> <ul style="list-style-type: none"> <li>- Lists the reference customers based on the division, customer segment, and customer tier combination or the answers provided in the <b>Questionnaire</b> zone of the <b>Deal Information - Questionnaire</b> page.</li> </ul> </li> <li>• <b>Customer</b> <ul style="list-style-type: none"> <li>- Used to specify whether you want to search for a reference customer whose price item pricing, price list assignments, and product enrollments you want to use as a reference to create a deal.</li> </ul> </li> <li>• <b>Deal</b> <ul style="list-style-type: none"> <li>- Used to specify whether you want to search for a reference deal whose price item pricing, price list assignments, and product enrollments you want to use as a reference to create a deal.</li> </ul> </li> <li>• <b>Reference Deals</b> - Lists the reference deals based on the answers provided in the <b>Questionnaire</b> zone of the <b>Deal Information - Questionnaire</b> page.</li> </ul> <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><b>Note:</b> The reference deals are not derived when the <b>Skip Questionnaire</b> option is selected during the deal creation or a questionnaire template is not specified in the respective deal type or if the questionnaire template is not effective on the deal start date.</p> </div>	Yes
Division	<p>Used to search for reference customers or deals which belongs to a particular division.</p> <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><b>Note:</b> This field appears when you select the <b>Customer</b> or <b>Deal</b> option from the <b>Search By</b> list. You can view only those divisions to which you have access in the <b>Division</b> list.</p> </div>	No

Field Name	Field Description	Mandatory (Yes or No)
Person Name	Used to search for reference customers or deals whose primary person has a particular name.	No
	<b>Note:</b> This field appears when you select the <b>Customer</b> or <b>Deal</b> option from the <b>Search By</b> list.	
Customer Segment	Used to search for reference customers or deals which belong to a particular business component.	No
	<p><b>Note:</b></p> <p>This field appears when the <b>Customer</b> option is selected from the <b>Search By</b> list and the <b>Advanced Search</b> link is clicked in the top right corner of this zone.</p> <p>This field also appears when the <b>Deal</b> option is selected from the <b>Search By</b> list .</p> <p>The list includes only those values which are specified in the <b>CUST_SEG_FLG</b> lookup field.</p>	
City	Used to search for reference customers from a particular city.	No
	<b>Note:</b> This field appears when the <b>Customer</b> option is selected from the <b>Search By</b> list and the <b>Advanced Search</b> link is clicked in the top right corner of this zone.	
Address	Used to search for reference customer residing at a particular address.	No
	<b>Note:</b> This field appears when the <b>Customer</b> option is selected from the <b>Search By</b> list and the <b>Advanced Search</b> link is clicked in the top right corner of this zone.	
Phone Number	Used to search for reference customer having a particular phone number.	No
	<b>Note:</b> This field appears when the <b>Customer</b> option is selected from the <b>Search By</b> list and the <b>Advanced Search</b> link is clicked in the top right corner of this zone.	

Field Name	Field Description	Mandatory (Yes or No)
Person ID	Used to search for a particular person whose price item pricing, price list assignments, and product enrollments you want to use as a reference.	No
	<b>Note:</b> This field appears when you select the <b>Customer</b> option from the <b>Search By</b> list.	
Person Identifier Type	Used to indicate the person identifier type based on which you want to search for reference customers or deals.	No
	<b>Note:</b> This field appears when the <b>Customer</b> or <b>Deal</b> option is selected from the <b>Search By</b> list.	
Person Identifier	Used to specify the value for the person identifier type based on which you want to search for search for reference customers or deals.	Yes (Conditional)
	<b>Note:</b> This field appears when you select a person identifier type from the <b>Person Identifier Type</b> list.	<b>Note:</b> If you specify the person identifier type as a search criteria, you have to specify the person identifier.
Prospect Person	Used to indicate whether you want to search for reference deals created for a prospect person. The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>	No
	<b>Note:</b> This field appears when the <b>Deal</b> option is selected from the <b>Search By</b> list.	
Deal ID	Used to search for a particular deal whose price item pricing, price list assignments, and product enrollments you want to use as a reference.	No
	<b>Note:</b> This field appears when the <b>Deal</b> option is selected from the <b>Search By</b> list.	
Template Deal	Used to indicate whether you want to search for template deals whose price item pricing, price list assignments, and product enrollments you want to use as a reference. The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>	No
	<b>Note:</b> This field appears when the <b>Deal</b> option is selected from the <b>Search By</b> list.	

Field Name	Field Description	Mandatory (Yes or No)
Deal Status	Used to search for reference deals with a particular status.	No
	<p><b>Note:</b></p> <p>This field appears when the <b>Deal</b> option is selected from the <b>Search By</b> list.</p> <p>The list includes only those values which are specified in the <b>DEAL_STATUS</b> lookup field.</p>	
Deal Type	Used to search for reference deals to which a particular deal type is associated.	No
	<p><b>Note:</b> This field appears when the <b>Deal</b> option is selected from the <b>Search By</b> list.</p>	

**Note:** You must specify at least one search criterion while searching for reference customer or deal. One more search criterion is required when you are searching for reference customers using the division.

- **Search Results** - On clicking the **Search** button, a list of reference customers or deals appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Person Information	Displays the concatenated string of person information separated by a comma (.). In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.
	<p><b>Note:</b></p> <p>It has a link. On clicking the link, the <b>Person</b> screen appears where you can view the details of the respective person.</p> <p>This column appears when you select the <b>Reference Customers</b> or <b>Customer</b> option from the <b>Search By</b> list.</p>
Person Name	Displays the name of the primary customer.
	<p><b>Note:</b> This column appears when you select the <b>Customer</b> option from the <b>Search By</b> list in the <b>Search Criteria</b> section.</p>
Primary Person Identifier Type	Indicates the primary identifier type using which the customer or deal is defined in the system.
Primary Person Identifier	Indicates the value for the primary identifier type using which the customer or deal is defined in the system.
Division	Indicates the division to which the customer or deal is associated.
Customer Segment	Indicates the business component using which the customer or deal is defined in the system.
Customer Tier	Indicates the customer tier of the customer segment to which the customer or the deal belongs.

Column Name	Column Description
Deal Information	Displays the concatenated string of deal information separated by a comma (,).
	<p><b>Note:</b></p> <p>It has a link. On clicking the link, the <b>Deal Information</b> screen appears where you can view the details of the respective deal.</p> <p>This column appears when you select the <b>Deal</b> or <b>Reference Deals</b> option from the <b>Search By</b> list in the <b>Search Criteria</b> section.</p>
Deal Status	Indicates the current status of the deal.
	<p><b>Note:</b> This column appears when you select the <b>Deal</b> or <b>Reference Deals</b> option from the <b>Search By</b> list in the <b>Search Criteria</b> section.</p>
Deal Version Information	Displays the concatenated string of deal version information separated by a comma (,).
	<p><b>Note:</b></p> <p>It has a link. On clicking the link, the <b>Deal Information</b> screen appears where you can view the details of the respective deal version.</p> <p>This column appears when you select the <b>Deal</b> or <b>Reference Deals</b> option from the <b>Search By</b> list in the <b>Search Criteria</b> section.</p>
Deal Version Status	Indicates the current status of the deal version.
	<p><b>Note:</b> This column appears when you select the <b>Deal</b> or <b>Reference Deals</b> option from the <b>Search By</b> list in the <b>Search Criteria</b> section.</p>
Prospect Person Information	Displays the concatenated string of prospect person information for whom the deal is created in the system separated by a comma (,).
	<p><b>Note:</b></p> <p>It has a link. On clicking the link, the <b>Prospect Person</b> screen appears where you can view the details of the respective prospect person.</p> <p>This column appears when you select the <b>Deal</b> or <b>Reference Deals</b> option from the <b>Search By</b> list in the <b>Search Criteria</b> section.</p>
Deal ID	Indicates the identification value of the deal.
	<p><b>Note:</b> This column appears when you select the <b>Deal</b> or <b>Reference Deals</b> option from the <b>Search By</b> list in the <b>Search Criteria</b> section.</p>

**Note:** Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

By default, the **Filter** area is visible. You can hide the **Filter** area by clicking the **Filters** () icon in the upper right corner of this zone.

On clicking the **Broadcast** () icon corresponding to a customer or deal the **Reference Details** zone appears where you can select the references for the deal.

**Reference Details**

The **Reference Details** zone allows you to indicate whether you want to copy the pricing or commitments from the reference customer or deal for defining the deal. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Person Name	Displays the name of the primary person for whom the customer or deal is defined in the system whose pricing or commitments you want to use as a reference for defining the deal.	Not applicable
Reference Deal	Displays the concatenated string of deal information separated by a comma (,) whose pricing or commitments you want to use as a reference for defining the deal.  <b>Note:</b> This field appears when you select a deal as a reference.	Not applicable
Reference Deal Version	Displays the concatenated string of deal version information separated by a comma (,) whose pricing or commitments you want to use as a reference for defining the deal.  <b>Note:</b> This field appears when you are copying reference from a deal which is created for a prospect person.	Not applicable
Division	Indicates the division to which the reference customer or deal belongs.	Not applicable
Customer Segment	Indicates the business component using which the reference customer or deal is defined in the system.	Not applicable
Customer Tier	Indicates the customer tier of the customer segment using which the reference customer or deal is defined in the system.	Not applicable
Refer Usage	Used to indicate whether you want to copy commitments from the SQI-based billable charges of the reference customer or deal.	Yes

Field Name	Field Description	Mandatory (Yes or No)
Usage Period	Indicates the period for which you want to aggregate the deal data to determine the scope of the deal. The valid values are: <ul style="list-style-type: none"> <li>• Biannually</li> <li>• Monthly</li> <li>• Quarterly</li> <li>• Yearly</li> </ul>	Not applicable
Refer Pricing	Used to indicate whether you want to copy the price list assignments and price assignments of the reference customer or deal.	Yes
Price Selection Date	Displays the date from when the price lists, pricing assignments, and product enrollments are effective for simulation.	Not applicable

**Note:** By default, the **Reference Details** zone does not appear in the **Deal Information - Reference** page. It appears when you click the **Broadcast** (  ) icon corresponding to a reference customer or deal in the **Search Results** section of the **Select Reference** zone.

## **Searching for a Reference**

### **Prerequisites**

To search for a reference, you should have:

- Reference customers and reference deals defined in the application
- Pricing and commitments defined for the references

### **Procedure**

To search for a reference:

1. Ensure that the **Deal Information - Reference** page is open when you are searching a reference for a deal.

**Note:** The **Deal Information - Reference** page appears when you do not select the check box corresponding to the **Skip Reference** option in the **Deal** zone of the **Deal Information - Deal** page while creating a deal.

2. Enter the search criteria in the **Select Reference** zone.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the '%' wildcard character in all input fields except the date and ID fields. The '%' wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

3. Click **Search**.

A list of reference customers or reference deals that meet the search criteria appears in the **Search Results** section.

**Note:** Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

### Selecting a Reference for a Deal

#### Prerequisites

To select a reference for a deal, you should have:

- Reference customers and reference deals defined in the application
- Pricing and commitments defined for the references

#### Procedure

To select a reference for a deal:

1. Search for the reference in the **Select Reference** zone of the **Deal Information - Reference** page.
2. Click the **Broadcast** (📡) icon corresponding to the deal in the **Search Results** section of the **Select Reference** zone whose pricing and commitments you want to use as a reference for defining the deal.

The **Reference Details** zone appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Person Name	Displays the name of the primary person for whom the customer or deal is defined in the system whose pricing or commitments you want to use as a reference for defining the deal.	Not applicable
Reference Deal	Displays the concatenated string of deal information separated by a comma (,) whose pricing or commitments you want to use as a reference for defining the deal.  <b>Note:</b> This field appears when you select a deal as a reference.	Not applicable
Reference Deal Version	Displays the concatenated string of deal version information separated by a comma (,) whose pricing or commitments you want to use as a reference for defining the deal.  <b>Note:</b> This field appears when you are copying reference from a deal which is created for a prospect person.	Not applicable
Division	Indicates the division to which the reference customer or deal belongs.	Not applicable

Field Name	Field Description	Mandatory (Yes or No)
Customer Segment	Indicates the business component using which the reference customer or deal is defined in the system.	Not applicable
Customer Tier	Indicates the customer tier of the customer segment using which the reference customer or deal is defined in the system.	Not applicable
Refer Usage	Used to indicate whether you want to copy commitments from the SQI-based billable charges of the reference customer or deal.	Yes
Usage Period	Indicates the period for which you want to aggregate the deal data to determine the scope of the deal. The valid values are: <ul style="list-style-type: none"> <li>• Biannually</li> <li>• Monthly</li> <li>• Quarterly</li> <li>• Yearly</li> </ul>	Not applicable
Refer Pricing	Used to indicate whether you want to copy the price list assignments and price assignments of the reference customer or deal.	Yes
Price Selection Date	Displays the date from when the price lists, pricing assignments, and product enrollments are effective for simulation.	Not applicable

3. Enter the required details in the **Reference Details** zone.
4. Click **Save**.

The reference is selected for the deal.

### **Skipping Reference for a Deal**

#### **Procedure**

To skip reference for a deal:

1. Ensure that the **Select Reference** zone is expanded in the **Deal Information - Reference** page.
2. Click the **Skip Reference** button in the top right corner of the **Select Reference** zone.  
A message appears confirming whether you want to skip the reference.
3. Click **OK**.

The reference is skipped.

**Tip:** Alternatively, you can skip reference by clicking the check box corresponding to the **Skip Reference** field in the **Deal** zone of the **Deal Information - Deal** page while defining a deal.

## Deal Information - Pricing and Commitments

The **Deal Information - Pricing and Commitments** page allows you to do the following:

- Assign a proposed price list to the prospect person or account
- Enroll the prospect account for a new product
- Edit the proposed commitments of the prospect account
- Simulate a deal
- Submit a deal for an approval
- Define multiple deal versions
- Discard deal
- Extract deal information in the pdf or excel format

It contains the following zones:

- [Deal Information](#) on page 2892
- [Simulation Details](#) on page 2895

## Deal Information

The **Deal Information** zone allows you to do the following:

- View the details of the deal
- Associate, disassociate, view, or edit the terms and conditions of the deal
- View and add log entries for the deal or deal version
- View and add adhoc revenue charges for the deal or deal version

Field Name	Field Description
Deal Information	Displays the concatenated string of information about the deal separated by a comma (,).
Division	Indicates the division with which the deal is associated.
Deal Type	Indicates the deal type using which the deal is created in the system.
Review Date	Displays the date which is scheduled for calculating the deal usage as per the commitments made by the customer.  <b>Note:</b> This field is populated when the deal has reached the <b>Full Orchestrated</b> status.
Deal Version Information	Displays the concatenated string of information about the deal version separated by a comma (,).
Access Group	Indicates the group of users who can view and edit the details of the entity (i.e. the customer, account, or prospect person) for which the deal is created.
Review Frequency	Indicates the duration for which the deal is monitored to calculate the usage of the deal as per the commitments made by the customer.
Effective Start Date	Displays the date from when the deal is effective for the entity (i.e. the customer, account, or prospect person).  <b>Note:</b> This field is populated when the deal has reached the <b>Customer Accepted</b> status.
Deal Description	Displays the description of the deal.
Customer Segment	Displays the business component to which the entity (i.e. the customer, account, or prospect person) belongs.
Creation Date	Displays the date when the deal is created in the system.
Effective End Date	Displays the date till when the deal is effective for the entity (i.e. the customer, account, or prospect person).  <b>Note:</b> This field is populated when the deal has reached the <b>Customer Accepted</b> status.

Field Name	Field Description
Deal Status	<p>Indicates the current status of the deal. The valid values are:</p> <ul style="list-style-type: none"> <li>• Applied/Processed</li> <li>• Approved</li> <li>• Closed</li> <li>• Customer Accepted</li> <li>• Discarded</li> <li>• Draft</li> <li>• Error</li> <li>• Finalized</li> <li>• Fully Orchestrated</li> <li>• Hierarchy Creation Deferred</li> <li>• Inactive</li> <li>• Partially Orchestrated</li> <li>• Pending for Approval</li> <li>• Pending for Review</li> <li>• Pending Simulation</li> <li>• Pending for Orchestration</li> <li>• Ready for Approval</li> <li>• Rejected</li> <li>• Simulated</li> <li>• Simulation Deferred</li> </ul>
Customer Tier	Indicates the customer tier of the customer segment to which the entity (i.e. the customer, account, or prospect person) belongs.
Start Date	Displays the date from when the price list, price assignment, and price item pricing is available for the deal.
Acceptance Date	<p>Displays the date when the customer has reviewed and accepted the deal.</p> <p><b>Note:</b> This field is populated when the deal has reached the <b>Customer Accepted</b> status.</p> <p>If the <b>Deal Status</b> is <b>Rejected</b> then the <b>Acceptance Date</b> specifies the date when the deal is rejected by the customer.</p>
Deal Version Status	Indicates the status of the deal version.
Deal Currency	Indicates the currency in which the financial summary and profitability is calculated for the deal.
End Date	Displays the date till when the price list and price assignment is available for the deal.

Field Name	Field Description
Finalized Date	Displays the date when the deal is finalized in the system.
	<b>Note:</b> This field is populated when the deal has reached the <b>Customer Accepted</b> status.
Simulation Type	Indicates the simulation type using which the financial summary and profitability is calculated for the deal. The valid values are: <ul style="list-style-type: none"> <li>• Account</li> <li>• Customer</li> <li>• Deal</li> </ul>
Usage Period	Indicates the period for which you want to aggregate the deal data to determine the scope of the deal. The valid values are: <ul style="list-style-type: none"> <li>• Biannually</li> <li>• Monthly</li> <li>• Quarterly</li> <li>• Yearly</li> </ul>
Deal Frequency	Indicates the duration in which you want to simulate the deal for calculating the financial summary and deal profitability. The valid values are: <ul style="list-style-type: none"> <li>• Biannually</li> <li>• Monthly</li> <li>• Quarterly</li> <li>• Yearly</li> </ul>

In addition, the **Deal Information** zone contains the following links:

Link Name	Link Description
Deal Terms and Conditions	Used to associate, disassociate, or view the deal terms and conditions. It is also used to add adhoc terms and conditions for the deal.
Deal Log	Used to view the complete trail of actions performed on the deal. It also allows you to manually add a log entry for the deal.
Deal Version Log	Used to view the complete trail of actions performed on the deal version. It also allows you to manually add a log entry for the deal version.
Adhoc Revenue and Cost	Used to add, edit, or view additional charges that are applicable for the deal while deal creation.

## Simulation Details

The **Simulation Details** zone allows you to do the following:

- View the deal financial summary
- View the division financial summary
- View the product financial summary
- View the customer hierarchy
- View the assigned price lists of a person or account
- View the proposed price list assignments of a person or account
- View the enrolled products for an account
- View the proposed product enrollments for an account
- View the pricing and commitment details of a person or account
- View the division financial summary in the division currency
- View the product financial summary in the division currency
- View the revenue and cost in the division or account currency

The **Simulation Details** zone contains the following sections:

- **Symbol Legends** - Indicates the symbols used to identify the current status of the deal level, division level, and product level financial summary. It also differentiates the existing, proposed and recommended pricing statistics. It contains the following symbols:

Symbol Name	Symbol Description
 IN APPROVER RANGE	Indicates that the deal level, division level, or product level financial summary is within the limits defined for the user for approval.
 NOT IN APPROVER RANGE	Indicates that the deal level, division level, or product level financial summary is not within the limits defined for the user for approval.
 PROJECTED	Indicates the revenue, cost, and profit generated from the proposed price item pricing and price assignments.
 RECOMMENDED	Indicates the revenue, cost, and profit generated from the recommended price item pricing and price assignments.
 ORIGINAL	Indicates the revenue, cost, and profit generated from the existing price item pricing and price assignments.
 APPROVED	Indicates whether the deal level, division level, or product level financial summary is approved or not.
 PENDING FOR APPROVAL	Indicates that the approval for deal level, division level, or product level financial summary is pending.

- **Deal Financial Summary** - Displays the financial summary at the deal level. It contains the following columns:

Column Name	Column Description
Approval Status	Indicates the current approval status of the financial summary at the deal level.
Revenue	Displays the proposed, recommended, and original revenue generated from the price item pricing and price assignments at the deal level.  <b>Note:</b> If division level approval is required, then the revenue includes the sum of revenues calculated at each division level.
Cost	Displays the proposed, recommended, and original cost calculated at the deal level.  <b>Note:</b> The cost includes the total price item cost and the adhoc cost. If division level approval is required, then the cost includes the sum of costs calculated at each division level.
Profit	Displays the proposed, recommended, and original profit in deal currency generated from the price item pricing and price assignments at the deal level. It is calculated using the following formula:  Profit = Revenue – Cost  <b>Note:</b> If division level approval is required, then the profit includes the sum of profits calculated at each division level.
Profitability (%)	Displays the proposed, recommended, and original profit created in percentage at the deal level from the price item pricing and price assignments. It is calculated using the following formula:  Profitability % = ( Revenue – Cost)*100/ Revenue
Profit Variation (%)	Displays the difference of profit in percentage generated from the original and the proposed price item pricing and commitments at the deal level. It is calculated using the following formula:  Profit Variation (%) = (Proposed Profit – Original Profit)*100/ Original Profit

**Note:** The data in the **Deal Financial Summary** sections appears when the deal has reached the **Simulated** status.

- **Division Financial Summary** - Displays the financial summary at the division level. It contains the following columns:

Column Name	Column Description
Division	Indicates the division for which the financial summary is displayed.
Approval Status	Indicates the current approval status of the financial summary at the division level.
Revenue	Displays the proposed, recommended, and original revenue generated from the price item pricing and price assignments at the division level.

Column Name	Column Description
Cost	Displays the proposed, recommended, and original cost calculated at the division level.
	<b>Note:</b> The cost includes the total price item cost and the adhoc cost.
Profit	Displays the proposed, recommended, and original profit in deal currency generated from the price item pricing and price assignments at the division level. It is calculated using the following formula:  Profit = Revenue – Cost
Profitability (%)	Displays the proposed, recommended, and original profit generated in percentage at the division level from the price item pricing and price assignments. It is calculated using the following formula:  Profitability % = ( Revenue – Cost)*100/ Revenue
Profit Variation (%)	Displays the difference of profit in percentage generated from the original and the proposed price item pricing and commitments at the division level. It is calculated using the following formula:  Profit Variation (%) = (Proposed Profit – Original Profit)*100/ Original Profit

**Note:**

The **Division Financial Summary** sections appears in the **Simulation Details** zone when the **Division Level Approval Required** field is set to **Yes** in the **Deal Type** used for defining the deal.

The data in the **Division Financial Summary** sections appears when the deal has reached the **Simulated** status.

By default, the division financial summary is displayed in the deal currency. You can view the division financial summary in the division currency by clicking the toggle switch towards **Division Currency** available above the financial summary table.

- **Product Financial Summary** - Displays the financial summary at the product level. It contains the following columns:

Column Name	Column Description
Product	Indicates the product whose financial summary is displayed.
Division	Indicates the division to which the product belongs.
Approval Status	Indicates the current approval status of the financial summary at the product level.
Revenue	Displays the proposed, recommended, and original revenue generated from the product.
Cost	Displays the proposed, recommended, and original cost calculated for the product.
	<b>Note:</b> The cost includes the total price item cost and the adhoc cost.
Profit	Displays the proposed, recommended, and original profit in deal currency generated from the price item pricing and price assignments at the product level. It is calculated using the following formula:  Profit = Revenue – Cost

Column Name	Column Description
Profitability (%)	Displays the proposed, recommended, and original profit generated in percentage from the price item pricing and price assignments at the product level . It is calculated using the following formula:  Profitability % = ( Revenue – Cost)*100/ Revenue
Profit Variation (%)	Displays the difference of profit in percentage generated from the original and the proposed price item pricing and commitments at the product level. It is calculated using the following formula:  Profit Variation (%) = (Proposed Profit – Original Profit)*100/ Original Profit

**Note:**

The **Product Financial Summary** sections appears in the **Simulation Details** zone when the **Product Level Approval Required** field is set to **Yes** in the **Deal Type** used for defining the deal.

The data in the **Product Financial Summary** sections appears when the deal has reached the **Simulated** status.

By default, the product financial summary is displayed in the deal currency. You can view the product financial summary in the division currency by clicking the toggle switch towards **Division Currency** available above the financial summary table.

- **Customer Hierarchy** - Indicates the main customer and its associated accounts as well as the child persons and its accounts that are associated with the main customer. It also enables you to do the following:
  - View and edit the pricing and commitments at the person and account level
  - View the revenue variation from the proposed and original pricing and commitments
  - View the proposed price lists of a person or account
  - Assign proposed price list to a person or account
  - View the enrolled products of an account
  - Enroll accounts for a product
  - View the original price list of a person or account
  - View the original enrolled products for an account
  - View the proposed or the original revenue and cost generated at the person an account level.

The **Customer Hierarchy** section contains the following columns:

Column Name	Column Description
Person Name	Indicates the main customer and its related persons and accounts.
Division	Indicates the division to which the main customer and it related persons and accounts are associated.
Pricing and Commitments	On clicking the <b>Edit</b> (✎) icon in the <b>Pricing and Commitments</b> column corresponding to a person or account in the hierarchy, the <b>Pricing and Commitments</b> screen appears where you can view and edit the pricing and commitments of the price items for the respective person or account.
	<b>Note:</b> You cannot edit the pricing or commitments of the price items if the deal has reached the <b>Finalized</b> status.

Column Name	Column Description
Status	Indicates the approval status of the price item pricing and price assignments for the respective person or account.
Revenue Variation (%)	Displays the average revenue generated from a customer or account in percentage. It is calculated using the following formula:  Revenue Variation (%) = (Proposed Revenue – Original Revenue)*100/Original Revenue.
Price List Assignment	On clicking the <b>Edit</b> (✎) icon in the <b>Price List Assignment</b> column corresponding to a person or account in the hierarchy, the <b>Price List Assignment</b> screen appears where you can view and assign proposed price list to the respective person or account.  <b>Note:</b> You cannot assign proposed price list to the person or account if the deal has reached the <b>Finalized</b> status.
Product Enrollment	On clicking the <b>Edit</b> (✎) icon in the <b>Product Enrollment</b> column corresponding to the person or account in the hierarchy, the <b>Product Enrollment</b> screen appears where you can view or enroll the respective account or accounts of the customer for a product. You can also view a list of recommended products for which you want to enroll the account or accounts of the customer. The recommended products appear in the <b>Product Enrollment</b> screen when you add products in the <b>Recommended Products</b> section while defining a deal.  <b>Note:</b> You cannot enroll an account for a product if the deal has reached the <b>Finalized</b> status.
Price Item Group Selection	On clicking the <b>Edit</b> (✎) icon in the <b>Price Item Group Selection</b> column corresponding to the main person in the hierarchy, the <b>Select Price Item Group</b> screen appears where you can select and/or deselect the price items and/or hierarchy entities based on which you want to simulate the deal.
Revenue	Indicates the revenue generated by the corresponding person or account in the hierarchy through the proposed price item pricing and commitments.
Cost	Indicates the sum of the proposed costs from all accounts under the customer.  <b>Note:</b> If the person is a parent customer, then the sum of the proposed costs of all the child customers is considered.
Pricelist	On clicking the <b>View</b> (📄) icon in the <b>Price List</b> column corresponding to the person or account in the hierarchy, the <b>Price List Assignment</b> screen appears where you can view the original price list assigned to the respective person or account.
Product	On clicking the <b>Edit</b> (✎) icon in the <b>Product</b> column corresponding to the person or account in the hierarchy, the <b>Product Enrollment</b> screen appears where you can view the products to which the account is already enrolled.
Revenue	Indicates the revenue generated by the corresponding person or account in the hierarchy through the original price item pricing and commitments.

Column Name	Column Description
Cost	Indicates the sum of the original costs from all accounts under the customer.  <b>Note:</b> If the person is a parent customer, then the sum of the original costs of all the child customers is considered.

In addition, the **Simulation Details** zone contains the following buttons:

Button Name	Button Description
Deal Pricing and Commitments	Used to define the consolidated pricing and commitments for the customers or accounts in a deal.
Simulate Deal	Used to perform different types of simulation based on the pricing and commitments of the price item to determine the best price that can be offered to the clients as per their requirements.
Check Limits	Used to execute the price item ceil and floor validation for an approver as per the limits set on the price item screen.  <b>Note:</b> The <b>Check Limits</b> is run only for the price items which are in the <b>Pending for Approval</b> or <b>Error</b> status after the <b>Pricing Simulation</b> is executed. The <b>Check Limits</b> button is activated when the <b>Price Item Approval Required</b> option is set to <b>Yes</b> in the <b>Deal Type</b> using which the deal is created.
Send Deal for Approval	Used to move the deal from the current role to the next role of the next level in the approval hierarchy for approval.  <b>Note:</b> On clicking the <b>Send Deal for Approval</b> button, a To Do notification is created for the users of the next level to indicate that approval of the deal is required. A To Do is also created for the creator (i.e. the Relationship Manager) of the deal to indicate that the ownership of the deal has changed. This button is activated after <b>Pricing Simulation</b> is completed for the deal and if the <b>Approve Deal</b> option is set to <b>Yes</b> for the approver in the <b>Approval Hierarchy</b> of the <b>Deal Approval Profile</b> .

Button Name	Button Description
Approve Deal	<p>Used to approve the deal. To approve a deal the following conditions should be met:</p> <ul style="list-style-type: none"> <li>• All the price items should be in the <b>Approved</b> status if the <b>Price Item Approval Required</b> option is set to <b>Yes</b> in the <b>Deal Type</b> used for creating the deal.</li> <li>• All the division level approvals must be completed if the <b>Division Level Approval Required</b> field is set to <b>Yes</b> in the <b>Deal Type</b> used for creating the deal.</li> <li>• All the product level approvals must be completed if the <b>Product Level Approval Required</b> field is set to <b>Yes</b> in the <b>Deal Type</b> used for creating the deal.</li> <li>• The deal should be in the <b>Ready for Approval</b> status for the approver to initiate the deal approval process.</li> </ul> <p><b>Note:</b></p> <p>The <b>Approve Deal</b> button is activated only when the deal is in the <b>Ready for Approval</b> status and the <b>Approve Deal</b> option is set to <b>Yes</b> for the approver in the <b>Approval Hierarchy</b> of the <b>Deal Approval Profile</b>.</p>
Return to Submitter	<p>Used to move the deal from the current role to the previous role of the previous level in the approval hierarchy for approval. It is also used to send the deal to the relationship manager for approval if you have recommended a new pricing for the price item.</p> <p><b>Note:</b></p> <p>On clicking the <b>Return to Submitter</b> button, a To Do notification is created for the users of the previous level to indicate that the deal is returned for approval.</p> <p>A To Do is also created for the creator (i.e. the Relationship Manager) of the deal to indicate that the ownership of the deal has changed.</p>
Finalize Deal	<p>Used to finalize the deal so that it is ready to be presented to the customer for approval.</p> <p><b>Note:</b> This button is activated when the deal is in the <b>Approved</b> status.</p> <p><b>Tip:</b> You can also finalize a deal by clicking the <b>Finalize</b> (  ) icon in the <b>Finalize Deal</b> column corresponding to the deal in the <b>Search Deal</b> zone of the <b>Deal Dashboard</b> screen.</p>
Accept Deal	<p>Used to accept the deal in the system after receiving confirmation of acceptance from the customer.</p> <p><b>Note:</b> This button is activated only when the deal is in the <b>Finalized</b> status.</p> <p><b>Tip:</b> You can also accept a deal by clicking the <b>Accept</b> (  ) icon in the <b>Accept Deal</b> column corresponding to the deal in the <b>Search Deal</b> zone of the <b>Deal Dashboard</b> screen.</p>

Button Name	Button Description
Reject Deal	Used to reject the deal in the system after receiving confirmation of rejection from the customer.
	<b>Note:</b> This button is activated only when the deal is in the <b>Finalized</b> status.
	<b>Tip:</b> You can also reject a deal by clicking the <b>Reject</b> (✖) icon in the <b>Reject Deal</b> column corresponding to the deal in the <b>Search Deal</b> zone of the <b>Deal Dashboard</b> screen.
Create Deal Version	Used to create a deal version for the existing deal to optimize the deal pricing process and to make better pricing decisions.
	<b>Note:</b> This button is deactivated once the deal has reached the <b>Approved</b> status.
Discard Deal	Used to discard the deal.
	<b>Note:</b> You cannot discard a deal if it has reached the <b>Finalized</b> status.
Print Deal	Used to extract relevant information about the deal in the pdf or excel format which is published either to the customer for receiving approvals or for internal reviews and validations.
Apply Back	Used to activate the proposed pricelist assignments, overridden pricing, and product enrollments for the existing customer or account in the system.
Previous	Used to view information about the previous status of the deal.

If you want to...	Then...
Extract a deal in the PDF or Excel format from the Deal Dashboard screen	<ol style="list-style-type: none"> <li>Search for the deal in the <b>Search Deal</b> zone of the <b>Deal Dashboard</b> screen.</li> <li>In the <b>Search Results</b> section, click the <b>Print</b> (  ) icon in the <b>Print Deal</b> column corresponding to the deal which you want to extract in the pdf or excel format.</li> </ol>

If you want to...	Then...
	<p><b>Note:</b> If the deal has multiple versions, click the <b>Print</b> (  ) icon in the <b>Print Deal</b> column corresponding to the deal version in the <b>Deal Versions</b> zone.</p>
Extract a deal in the PDF or Excel format from the Deal Information screen	<ol style="list-style-type: none"> <li>1. Search for the deal in the <b>Search Deal</b> zone of the <b>Deal Dashboard</b> screen.</li> <li>2. In the <b>Search Results</b> section, click the link in the <b>Deal Information</b> column corresponding to the deal which you want to extract in the pdf or excel format. <div data-bbox="873 611 1401 751" style="border: 1px solid black; padding: 5px; margin: 10px 0;"> <p><b>Note:</b> If you want to extract the deal version in the pdf of excel format, click the link in the <b>Deal Version Information</b> column corresponding to the deal version from the <b>Deal Versions</b> zone.</p> </div> <p>The <b>Deal Information</b> screen appears.</p> </li> <li>3. In the <b>Simulation Details</b> zone, click the <b>Print Deal</b> button.</li> </ol>
Extract a deal in the PDF or Excel format from the Deal Approver Dashboard screen	<ol style="list-style-type: none"> <li>1. Search for the deal in the <b>Search Deal</b> zone of the <b>Deal Approver Dashboard</b> screen.</li> <li>2. In the <b>Search Results</b> section, click the <b>Print</b> (  ) icon in the <b>Print Deal</b> column corresponding to the deal which you want to extract in the pdf or excel format.</li> </ol>

The **Deal Extraction** screen appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Extract Format	<p>Used to specify the format in which you want to extract the deal information. The valid values are:</p> <ul style="list-style-type: none"> <li>• Excel</li> <li>• PDF</li> </ul>	<p>Yes (Conditional)</p> <div data-bbox="1190 1398 1474 1535" style="border: 1px solid black; padding: 5px; margin-top: 5px;"> <p><b>Note:</b> This field is required while extracting a deal in the pdf or excel format.</p> </div>

Field Name	Field Description	Mandatory (Yes or No)
Extract Type	<p>Used to indicate the type of deal information that you want to extract for publishing. The valid values are:</p> <ul style="list-style-type: none"> <li>• <b>External</b> - Used to extract deal information which is published to the customer for approval. It contains the following details: <ol style="list-style-type: none"> <li>1. Extraction information i.e. the extraction date-time and the user who has done the extraction.</li> <li>2. Details of the filters selected for extraction.</li> <li>3. Deal details such as the deal creator user ID, deal creation date and time, deal ID, deal type, prospect/customer, currency, deal status etc.</li> <li>4. Customer hierarchy, accounts and price item details as per the filter option selected in the <b>Deal Extraction</b> screen.</li> <li>5. Price item details such as the original price with assignment level, commitments, negotiated price with assignment level, approval status, etc.</li> <li>6. Terms and conditions.</li> </ol> </li> </ul> <div data-bbox="743 1272 1183 1661" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b></p> <p>The <b>External</b> extract type controls the extraction of certain data which may or may not be published to the customer.</p> <p>You can select the <b>External</b> option from the <b>Extract Type</b> list when the deal is in the <b>Finalized, Customer Accepted, Rejected, Fully Orchestrated, Pending for Review, or Closed</b> status.</p> </div>	<p>Yes (Conditional)</p> <div data-bbox="1192 264 1468 405" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> This field is required while extracting a deal in the pdf or excel format.</p> </div>

Field Name	Field Description	Mandatory (Yes or No)
	<ul style="list-style-type: none"> <li>• <b>Internal</b> - Used to extract deal information which is published for internal reviews and validations. It contains the following details:               <ol style="list-style-type: none"> <li>1. Deal summary details and Division summary details with the applicable cost, profitability, revenue and other calculations.</li> <li>2. Price item details such as the cost and revenue details etc.</li> <li>3. Adhoc revenue and cost entries.</li> </ol> </li> </ul> <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><b>Note:</b></p> <p>By default, the <b>Internal</b> option is selected from the <b>Extract Type</b> list for deals which are not in the <b>Finalized, Customer Accepted, Rejected, Fully Orchestrated, Pending for Review, or Closed</b> status.</p> <p>The list includes only those values which are present in the <b>DEAL_EXTRACT_TYPE_FLG</b> lookup field.</p> </div>	
Extract Filter	<p>Used to indicate the price item information that you want to extract in the pdf or excel format. The valid values are:</p> <ul style="list-style-type: none"> <li>• Account</li> <li>• Additional Filter Criteria</li> <li>• All</li> <li>• Customer</li> <li>• Division</li> <li>• Only Hierarchy</li> <li>• Price Assignment Level</li> <li>• Price Item</li> <li>• Price Item Group</li> </ul> <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><b>Note:</b> The list includes only those values which are present in the <b>DEAL_EXTRACT_FILTER_FLG</b> lookup field.</p> </div>	<p>Yes (Conditional)</p> <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><b>Note:</b> This field is required while extracting a deal in the pdf or excel format.</p> </div>

In addition, the **Deal Extraction** screen contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Account ID	<p>Used to specify the persons or prospects account for which you want to extract the price item pricing details.</p> <p><b>Note:</b></p> <p>The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Prospect Account Search</b> window appears where you can search for the respective account.</p> <p>This field appears when you select the <b>Account</b> option from the <b>Extract Filter</b> list.</p>	<p>Yes (Conditional)</p> <p><b>Note:</b> This field is required while extracting the proposed price item pricing details of an account.</p>
Price Item	<p>Used to specify the price item for which you want to extract the pricing details.</p> <p><b>Note:</b></p> <p>The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Price Item Search</b> window appears where you can search for the respective price item.</p> <p>This field appears when you select the <b>Account</b>, <b>Customer</b>, and <b>Price Item</b> options from the <b>Extract Filter</b> list.</p>	No
Price Item Group Code	<p>Used to specify the root level hierarchy entity for which you want to extract the price item pricing details.</p> <p><b>Note:</b></p> <p>The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Hierarchy Entity Search</b> window appears where you can search for the respective root level hierarchy entity.</p> <p>This field appears when you select the <b>Account</b>, <b>Customer</b>, and <b>Price Item Group</b> options from the <b>Extract Filter</b> list.</p>	No

Field Name	Field Description	Mandatory (Yes or No)
Proposed Price Assignment Level	Used to extract the proposed price item pricing details for a particular assignment level.	No
	<p><b>Note:</b></p> <p>The list includes only those values which are present in the <b>PA_LVL_FLG</b> lookup field.</p> <p>This field appears when you select the <b>Account, Customer, Price Assignment Level, Price Item, and Price Item Group</b> options from the <b>Extract Filter</b> list.</p> <p>This field is disabled when you select the <b>Show Price Assignment for Child Entities</b> field check box.</p>	
Show Price Assignment for Child Entities	Used to indicate whether you want to extract the proposed price item price assignment details of the non-root level hierarchy entity.	No
	<p><b>Note:</b> This field appears when you select the <b>Account, Customer, Price Assignment Level, Price Item, and Price Item Group</b> options from the <b>Extract Filter</b> list.</p>	
Current Approval User ID	Used to extract the details of the proposed price item pricing which is approved by a particular user.	Yes (Conditional)
	<p><b>Note:</b></p> <p>The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>User Search</b> window appears where you can search for the respective root user.</p> <p>This field appears when you select the <b>Additional Filter Criteria</b> option from the <b>Extract Filter</b> list.</p> <p>This field is disabled when you specify the <b>Price Item Manager To Do Role</b> or <b>Price Approval Status</b>.</p>	

Field Name	Field Description	Mandatory (Yes or No)
Price Item Manager To Do Role	Used to extract the details of the proposed price item pricing which is assigned using a particular price item manager To Do role.	Yes (Conditional)
	<p><b>Note:</b></p> <p>This field appears when you select the <b>Additional Filter Criteria</b> option from the <b>Extract Filter</b> list.</p> <p>This field is disabled when you specify the <b>Current Approval User ID</b> or <b>Price Approval Status</b>.</p>	
Price Approval Status	<p>Used to extract the details of the proposed price item pricing which are in a particular status. The valid values are:</p> <ul style="list-style-type: none"> <li>• Approved</li> <li>• Approved-Existing</li> <li>• Approved-Recommended</li> <li>• Error</li> <li>• Initial</li> <li>• Unapproved</li> </ul>	Yes (Conditional)
	<p><b>Note:</b></p> <p>This field appears when you select the <b>Additional Filter Criteria</b> option from the <b>Extract Filter</b> list.</p> <p>This field is disabled when you specify the <b>Current Approval User ID</b> or <b>Price Item Manager To Do Role</b>.</p>	
Person ID	Used to extract the details of the proposed price items pricing of a particular person.	Yes (Conditional)
	<p><b>Note:</b></p> <p>The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Prospect Person Search</b> window appears where you can search for the respective person.</p> <p>This field appears when you select the <b>Additional Filter Criteria</b> option from the <b>Extract Filter</b> list.</p>	

Field Name	Field Description	Mandatory (Yes or No)
Division	Used to extract the details of the proposed price items pricing from a particular division.	Yes (Conditional)
	<b>Note:</b> This field appears when you select the <b>Customer</b> option from the <b>Extract Filter</b> list.	<b>Note:</b> This field is required while extracting the details of the proposed price item pricing from a particular division.

- Enter the required details in the **Deal Extraction** screen.
- Click **Extract**.

The deal is extracted in the pdf or excel format.

**Note:** You cannot extract a deal which is in the **Discarded** status.

## Defining a Deal Version

### Prerequisites

To define a deal version, you should have:

- Deal for which you want to define a deal version defined in the application

### Procedure

To define a deal version:

- Search for the deal for which you want to define a deal version in the **Deal Dashboard** screen.
- In the **Search Results** section, click the link in the **Deal Information** column corresponding to the deal for which you want to define a deal version.

The **Deal Information** screen appears.

- In the **Simulation Details** zone, click the **Create Deal Version** button.

The **Deal Version** screen appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Deal Information	Displays a concatenated string of information about the deal separated by a comma (,) for which you want to define a deal version.	Not applicable

Field Name	Field Description	Mandatory (Yes or No)
Deal Version Description	Used to specify the description for the deal version	Yes.

4. Enter the required details in the **Deal Version** screen.
5. Click **Save**.

The deal version is created and the **Deal Information** screen appears with the details of the deal version updated in the **Deal Information** zone.

**Note:** You cannot create a deal version for a deal if it has reached the **Approved** status.

## Deal Information - Simulation

The **Deal Information - Simulation** page enables you to execute the pricing analysis against different price points and generate the deal level, division level, and product level financial summary with the optimum profitability. It also allows you to do the following:

- Submit a deal for an approval
- Define multiple deal versions
- Discard deal
- Extract deal information in the pdf or excel format

It contains the following zones:

- [Deal Information](#) on page 2892
- [Simulation Details](#) on page 2895

**Note:** You can access the **Deal Information - Simulation** page when the deal is in the **Simulated** status.

## Deal Information

The **Deal Information** zone allows you to do the following:

- View the details of the deal
- Associate, disassociate, view, or edit the terms and conditions of the deal
- View and add log entries for the deal or deal version
- View and add adhoc revenue charges for the deal or deal version

Field Name	Field Description
Deal Information	Displays the concatenated string of information about the deal separated by a comma (,).
Division	Indicates the division with which the deal is associated.
Deal Type	Indicates the deal type using which the deal is created in the system.
Review Date	Displays the date which is scheduled for calculating the deal usage as per the commitments made by the customer.  <b>Note:</b> This field is populated when the deal has reached the <b>Full Orchestrated</b> status.
Deal Version Information	Displays the concatenated string of information about the deal version separated by a comma (,).
Access Group	Indicates the group of users who can view and edit the details of the entity (i.e. the customer, account, or prospect person) for which the deal is created.
Review Frequency	Indicates the duration for which the deal is monitored to calculate the usage of the deal as per the commitments made by the customer.
Effective Start Date	Displays the date from when the deal is effective for the entity (i.e. the customer, account, or prospect person).  <b>Note:</b> This field is populated when the deal has reached the <b>Customer Accepted</b> status.
Deal Description	Displays the description of the deal.
Customer Segment	Displays the business component to which the entity (i.e. the customer, account, or prospect person) belongs.
Creation Date	Displays the date when the deal is created in the system.
Effective End Date	Displays the date till when the deal is effective for the entity (i.e. the customer, account, or prospect person).  <b>Note:</b> This field is populated when the deal has reached the <b>Customer Accepted</b> status.

Field Name	Field Description
Deal Status	<p>Indicates the current status of the deal. The valid values are:</p> <ul style="list-style-type: none"> <li>• Applied/Processed</li> <li>• Approved</li> <li>• Closed</li> <li>• Customer Accepted</li> <li>• Discarded</li> <li>• Draft</li> <li>• Error</li> <li>• Finalized</li> <li>• Fully Orchestrated</li> <li>• Hierarchy Creation Deferred</li> <li>• Inactive</li> <li>• Partially Orchestrated</li> <li>• Pending for Approval</li> <li>• Pending for Review</li> <li>• Pending Simulation</li> <li>• Pending for Orchestration</li> <li>• Ready for Approval</li> <li>• Rejected</li> <li>• Simulated</li> <li>• Simulation Deferred</li> </ul>
Customer Tier	Indicates the customer tier of the customer segment to which the entity (i.e. the customer, account, or prospect person) belongs.
Start Date	Displays the date from when the price list, price assignment, and price item pricing is available for the deal.
Acceptance Date	<p>Displays the date when the customer has reviewed and accepted the deal.</p> <p><b>Note:</b> This field is populated when the deal has reached the <b>Customer Accepted</b> status.</p> <p>If the <b>Deal Status</b> is <b>Rejected</b> then the <b>Acceptance Date</b> specifies the date when the deal is rejected by the customer.</p>
Deal Version Status	Indicates the status of the deal version.
Deal Currency	Indicates the currency in which the financial summary and profitability is calculated for the deal.
End Date	Displays the date till when the price list and price assignment is available for the deal.

Field Name	Field Description
Finalized Date	Displays the date when the deal is finalized in the system.
	<b>Note:</b> This field is populated when the deal has reached the <b>Customer Accepted</b> status.
Simulation Type	Indicates the simulation type using which the financial summary and profitability is calculated for the deal. The valid values are: <ul style="list-style-type: none"> <li>• Account</li> <li>• Customer</li> <li>• Deal</li> </ul>
Usage Period	Indicates the period for which you want to aggregate the deal data to determine the scope of the deal. The valid values are: <ul style="list-style-type: none"> <li>• Biannually</li> <li>• Monthly</li> <li>• Quarterly</li> <li>• Yearly</li> </ul>
Deal Frequency	Indicates the duration in which you want to simulate the deal for calculating the financial summary and deal profitability. The valid values are: <ul style="list-style-type: none"> <li>• Biannually</li> <li>• Monthly</li> <li>• Quarterly</li> <li>• Yearly</li> </ul>

In addition, the **Deal Information** zone contains the following links:

Link Name	Link Description
Deal Terms and Conditions	Used to associate, disassociate, or view the deal terms and conditions. It is also used to add adhoc terms and conditions for the deal.
Deal Log	Used to view the complete trail of actions performed on the deal. It also allows you to manually add a log entry for the deal.
Deal Version Log	Used to view the complete trail of actions performed on the deal version. It also allows you to manually add a log entry for the deal version.
Adhoc Revenue and Cost	Used to add, edit, or view additional charges that are applicable for the deal while deal creation.

## Simulation Details

The **Simulation Details** zone allows you to do the following:

- View the deal financial summary
- View the division financial summary
- View the product financial summary
- View the customer hierarchy
- View the assigned price lists of a person or account
- View the proposed price list assignments of a person or account
- View the enrolled products for an account
- View the proposed product enrollments for an account
- View the pricing and commitment details of a person or account
- View the division financial summary in the division currency
- View the product financial summary in the division currency
- View the revenue and cost in the division or account currency

The **Simulation Details** zone contains the following sections:

- **Symbol Legends** - Indicates the symbols used to identify the current status of the deal level, division level, and product level financial summary. It also differentiates the existing, proposed and recommended pricing statistics. It contains the following symbols:

Symbol Name	Symbol Description
 IN APPROVER RANGE	Indicates that the deal level, division level, or product level financial summary is within the limits defined for the user for approval.
 NOT IN APPROVER RANGE	Indicates that the deal level, division level, or product level financial summary is not within the limits defined for the user for approval.
 PROJECTED	Indicates the revenue, cost, and profit generated from the proposed price item pricing and price assignments.
 RECOMMENDED	Indicates the revenue, cost, and profit generated from the recommended price item pricing and price assignments.
 ORIGINAL	Indicates the revenue, cost, and profit generated from the existing price item pricing and price assignments.
 APPROVED	Indicates whether the deal level, division level, or product level financial summary is approved or not.
 PENDING FOR APPROVAL	Indicates that the approval for deal level, division level, or product level financial summary is pending.

- **Deal Financial Summary** - Displays the financial summary at the deal level. It contains the following columns:

Column Name	Column Description
Approval Status	Indicates the current approval status of the financial summary at the deal level.
Revenue	Displays the proposed, recommended, and original revenue generated from the price item pricing and price assignments at the deal level.  <b>Note:</b> If division level approval is required, then the revenue includes the sum of revenues calculated at each division level.
Cost	Displays the proposed, recommended, and original cost calculated at the deal level.  <b>Note:</b> The cost includes the total price item cost and the adhoc cost. If division level approval is required, then the cost includes the sum of costs calculated at each division level.
Profit	Displays the proposed, recommended, and original profit in deal currency generated from the price item pricing and price assignments at the deal level. It is calculated using the following formula:  Profit = Revenue – Cost  <b>Note:</b> If division level approval is required, then the profit includes the sum of profits calculated at each division level.
Profitability (%)	Displays the proposed, recommended, and original profit created in percentage at the deal level from the price item pricing and price assignments. It is calculated using the following formula:  Profitability % = ( Revenue – Cost)*100/ Revenue
Profit Variation (%)	Displays the difference of profit in percentage generated from the original and the proposed price item pricing and commitments at the deal level. It is calculated using the following formula:  Profit Variation (%) = (Proposed Profit – Original Profit)*100/ Original Profit

**Note:** The data in the **Deal Financial Summary** sections appears when the deal has reached the **Simulated** status.

- **Division Financial Summary** - Displays the financial summary at the division level. It contains the following columns:

Column Name	Column Description
Division	Indicates the division for which the financial summary is displayed.
Approval Status	Indicates the current approval status of the financial summary at the division level.
Revenue	Displays the proposed, recommended, and original revenue generated from the price item pricing and price assignments at the division level.

Column Name	Column Description
Cost	Displays the proposed, recommended, and original cost calculated at the division level.
	<b>Note:</b> The cost includes the total price item cost and the adhoc cost.
Profit	Displays the proposed, recommended, and original profit in deal currency generated from the price item pricing and price assignments at the division level. It is calculated using the following formula:  Profit = Revenue – Cost
Profitability (%)	Displays the proposed, recommended, and original profit generated in percentage at the division level from the price item pricing and price assignments. It is calculated using the following formula:  Profitability % = ( Revenue – Cost)*100/ Revenue
Profit Variation (%)	Displays the difference of profit in percentage generated from the original and the proposed price item pricing and commitments at the division level. It is calculated using the following formula:  Profit Variation (%) = (Proposed Profit – Original Profit)*100/ Original Profit

**Note:**

The **Division Financial Summary** sections appears in the **Simulation Details** zone when the **Division Level Approval Required** field is set to **Yes** in the **Deal Type** used for defining the deal.

The data in the **Division Financial Summary** sections appears when the deal has reached the **Simulated** status.

By default, the division financial summary is displayed in the deal currency. You can view the division financial summary in the division currency by clicking the toggle switch towards **Division Currency** available above the financial summary table.

- **Product Financial Summary** - Displays the financial summary at the product level. It contains the following columns:

Column Name	Column Description
Product	Indicates the product whose financial summary is displayed.
Division	Indicates the division to which the product belongs.
Approval Status	Indicates the current approval status of the financial summary at the product level.
Revenue	Displays the proposed, recommended, and original revenue generated from the product.
Cost	Displays the proposed, recommended, and original cost calculated for the product.
	<b>Note:</b> The cost includes the total price item cost and the adhoc cost.
Profit	Displays the proposed, recommended, and original profit in deal currency generated from the price item pricing and price assignments at the product level. It is calculated using the following formula:  Profit = Revenue – Cost

Column Name	Column Description
Profitability (%)	Displays the proposed, recommended, and original profit generated in percentage from the price item pricing and price assignments at the product level . It is calculated using the following formula:  Profitability % = ( Revenue – Cost)*100/ Revenue
Profit Variation (%)	Displays the difference of profit in percentage generated from the original and the proposed price item pricing and commitments at the product level. It is calculated using the following formula:  Profit Variation (%) = (Proposed Profit – Original Profit)*100/ Original Profit

**Note:**

The **Product Financial Summary** sections appears in the **Simulation Details** zone when the **Product Level Approval Required** field is set to **Yes** in the **Deal Type** used for defining the deal.

The data in the **Product Financial Summary** sections appears when the deal has reached the **Simulated** status.

By default, the product financial summary is displayed in the deal currency. You can view the product financial summary in the division currency by clicking the toggle switch towards **Division Currency** available above the financial summary table.

- **Customer Hierarchy** - Indicates the main customer and its associated accounts as well as the child persons and its accounts that are associated with the main customer. It also enables you to do the following:
  - View and edit the pricing and commitments at the person and account level
  - View the revenue variation from the proposed and original pricing and commitments
  - View the proposed price lists of a person or account
  - Assign proposed price list to a person or account
  - View the enrolled products of an account
  - Enroll accounts for a product
  - View the original price list of a person or account
  - View the original enrolled products for an account
  - View the proposed or the original revenue and cost generated at the person an account level.

The **Customer Hierarchy** section contains the following columns:

Column Name	Column Description
Person Name	Indicates the main customer and its related persons and accounts.
Division	Indicates the division to which the main customer and it related persons and accounts are associated.
Pricing and Commitments	On clicking the <b>Edit</b> (✎) icon in the <b>Pricing and Commitments</b> column corresponding to a person or account in the hierarchy, the <b>Pricing and Commitments</b> screen appears where you can view and edit the pricing and commitments of the price items for the respective person or account.  <b>Note:</b> You cannot edit the pricing or commitments of the price items if the deal has reached the <b>Finalized</b> status.

Column Name	Column Description
Status	Indicates the approval status of the price item pricing and price assignments for the respective person or account.
Revenue Variation (%)	Displays the average revenue generated from a customer or account in percentage. It is calculated using the following formula:  Revenue Variation (%) = (Proposed Revenue – Original Revenue)*100/Original Revenue.
Price List Assignment	On clicking the <b>Edit</b> (✎) icon in the <b>Price List Assignment</b> column corresponding to a person or account in the hierarchy, the <b>Price List Assignment</b> screen appears where you can view and assign proposed price list to the respective person or account.  <b>Note:</b> You cannot assign proposed price list to the person or account if the deal has reached the <b>Finalized</b> status.
Product Enrollment	On clicking the <b>Edit</b> (✎) icon in the <b>Product Enrollment</b> column corresponding to the person or account in the hierarchy, the <b>Product Enrollment</b> screen appears where you can view or enroll the respective account or accounts of the customer for a product. You can also view a list of recommended products for which you want to enroll the account or accounts of the customer. The recommended products appear in the <b>Product Enrollment</b> screen when you add products in the <b>Recommended Products</b> section while defining a deal.  <b>Note:</b> You cannot enroll an account for a product if the deal has reached the <b>Finalized</b> status.
Price Item Group Selection	On clicking the <b>Edit</b> (✎) icon in the <b>Price Item Group Selection</b> column corresponding to the main person in the hierarchy, the <b>Select Price Item Group</b> screen appears where you can select and/or deselect the price items and/or hierarchy entities based on which you want to simulate the deal.
Revenue	Indicates the revenue generated by the corresponding person or account in the hierarchy through the proposed price item pricing and commitments.
Cost	Indicates the sum of the proposed costs from all accounts under the customer.  <b>Note:</b> If the person is a parent customer, then the sum of the proposed costs of all the child customers is considered.
Pricelist	On clicking the <b>View</b> (📄) icon in the <b>Price List</b> column corresponding to the person or account in the hierarchy, the <b>Price List Assignment</b> screen appears where you can view the original price list assigned to the respective person or account.
Product	On clicking the <b>Edit</b> (✎) icon in the <b>Product</b> column corresponding to the person or account in the hierarchy, the <b>Product Enrollment</b> screen appears where you can view the products to which the account is already enrolled.
Revenue	Indicates the revenue generated by the corresponding person or account in the hierarchy through the original price item pricing and commitments.

Column Name	Column Description
Cost	Indicates the sum of the original costs from all accounts under the customer.  <b>Note:</b> If the person is a parent customer, then the sum of the original costs of all the child customers is considered.

In addition, the **Simulation Details** zone contains the following buttons:

Button Name	Button Description
Deal Pricing and Commitments	Used to define the consolidated pricing and commitments for the customers or accounts in a deal.
Simulate Deal	Used to perform different types of simulation based on the pricing and commitments of the price item to determine the best price that can be offered to the clients as per their requirements.
Check Limits	Used to execute the price item ceil and floor validation for an approver as per the limits set on the price item screen.  <b>Note:</b> The <b>Check Limits</b> is run only for the price items which are in the <b>Pending for Approval</b> or <b>Error</b> status after the <b>Pricing Simulation</b> is executed. The <b>Check Limits</b> button is activated when the <b>Price Item Approval Required</b> option is set to <b>Yes</b> in the <b>Deal Type</b> using which the deal is created.
Send Deal for Approval	Used to move the deal from the current role to the next role of the next level in the approval hierarchy for approval.  <b>Note:</b> On clicking the <b>Send Deal for Approval</b> button, a To Do notification is created for the users of the next level to indicate that approval of the deal is required. A To Do is also created for the creator (i.e. the Relationship Manager) of the deal to indicate that the ownership of the deal has changed. This button is activated after <b>Pricing Simulation</b> is completed for the deal and if the <b>Approve Deal</b> option is set to <b>Yes</b> for the approver in the <b>Approval Hierarchy</b> of the <b>Deal Approval Profile</b> .

Button Name	Button Description
Approve Deal	<p>Used to approve the deal. To approve a deal the following conditions should be met:</p> <ul style="list-style-type: none"> <li>• All the price items should be in the <b>Approved</b> status if the <b>Price Item Approval Required</b> option is set to <b>Yes</b> in the <b>Deal Type</b> used for creating the deal.</li> <li>• All the division level approvals must be completed if the <b>Division Level Approval Required</b> field is set to <b>Yes</b> in the <b>Deal Type</b> used for creating the deal.</li> <li>• All the product level approvals must be completed if the <b>Product Level Approval Required</b> field is set to <b>Yes</b> in the <b>Deal Type</b> used for creating the deal.</li> <li>• The deal should be in the <b>Ready for Approval</b> status for the approver to initiate the deal approval process.</li> </ul> <p><b>Note:</b></p> <p>The <b>Approve Deal</b> button is activated only when the deal is in the <b>Ready for Approval</b> status and the <b>Approve Deal</b> option is set to <b>Yes</b> for the approver in the <b>Approval Hierarchy</b> of the <b>Deal Approval Profile</b>.</p>
Return to Submitter	<p>Used to move the deal from the current role to the previous role of the previous level in the approval hierarchy for approval. It is also used to send the deal to the relationship manager for approval if you have recommended a new pricing for the price item.</p> <p><b>Note:</b></p> <p>On clicking the <b>Return to Submitter</b> button, a To Do notification is created for the users of the previous level to indicate that the deal is returned for approval.</p> <p>A To Do is also created for the creator (i.e. the Relationship Manager) of the deal to indicate that the ownership of the deal has changed.</p>
Finalize Deal	<p>Used to finalize the deal so that it is ready to be presented to the customer for approval.</p> <p><b>Note:</b> This button is activated when the deal is in the <b>Approved</b> status.</p> <p><b>Tip:</b> You can also finalize a deal by clicking the <b>Finalize</b> (  ) icon in the <b>Finalize Deal</b> column corresponding to the deal in the <b>Search Deal</b> zone of the <b>Deal Dashboard</b> screen.</p>
Accept Deal	<p>Used to accept the deal in the system after receiving confirmation of acceptance from the customer.</p> <p><b>Note:</b> This button is activated only when the deal is in the <b>Finalized</b> status.</p> <p><b>Tip:</b> You can also accept a deal by clicking the <b>Accept</b> (  ) icon in the <b>Accept Deal</b> column corresponding to the deal in the <b>Search Deal</b> zone of the <b>Deal Dashboard</b> screen.</p>

Button Name	Button Description
Reject Deal	Used to reject the deal in the system after receiving confirmation of rejection from the customer.
	<b>Note:</b> This button is activated only when the deal is in the <b>Finalized</b> status.
	<b>Tip:</b> You can also reject a deal by clicking the <b>Reject</b> (✖) icon in the <b>Reject Deal</b> column corresponding to the deal in the <b>Search Deal</b> zone of the <b>Deal Dashboard</b> screen.
Create Deal Version	Used to create a deal version for the existing deal to optimize the deal pricing process and to make better pricing decisions.
	<b>Note:</b> This button is deactivated once the deal has reached the <b>Approved</b> status.
Discard Deal	Used to discard the deal.
	<b>Note:</b> You cannot discard a deal if it has reached the <b>Finalized</b> status.
Print Deal	Used to extract relevant information about the deal in the pdf or excel format which is published either to the customer for receiving approvals or for internal reviews and validations.
Apply Back	Used to activate the proposed pricelist assignments, overridden pricing, and product enrollments for the existing customer or account in the system.
Previous	Used to view information about the previous status of the deal.

## Deal Information

The **Deal Information** zone allows you to do the following:

- View the details of the deal
- Associate, disassociate, view, or edit the terms and conditions of the deal
- View and add log entries for the deal or deal version
- View and add adhoc revenue charges for the deal or deal version

Field Name	Field Description
Deal Information	Displays the concatenated string of information about the deal separated by a comma (,).
Division	Indicates the division with which the deal is associated.
Deal Type	Indicates the deal type using which the deal is created in the system.
Review Date	Displays the date which is scheduled for calculating the deal usage as per the commitments made by the customer.  <b>Note:</b> This field is populated when the deal has reached the <b>Full Orchestrated</b> status.
Deal Version Information	Displays the concatenated string of information about the deal version separated by a comma (,).
Access Group	Indicates the group of users who can view and edit the details of the entity (i.e. the customer, account, or prospect person) for which the deal is created.
Review Frequency	Indicates the duration for which the deal is monitored to calculate the usage of the deal as per the commitments made by the customer.
Effective Start Date	Displays the date from when the deal is effective for the entity (i.e. the customer, account, or prospect person).  <b>Note:</b> This field is populated when the deal has reached the <b>Customer Accepted</b> status.
Deal Description	Displays the description of the deal.
Customer Segment	Displays the business component to which the entity (i.e. the customer, account, or prospect person) belongs.
Creation Date	Displays the date when the deal is created in the system.

Field Name	Field Description
Effective End Date	Displays the date till when the deal is effective for the entity (i.e. the customer, account, or prospect person).
	<b>Note:</b> This field is populated when the deal has reached the <b>Customer Accepted</b> status.
Deal Status	<p>Indicates the current status of the deal. The valid values are:</p> <ul style="list-style-type: none"> <li>• Applied/Processed</li> <li>• Approved</li> <li>• Closed</li> <li>• Customer Accepted</li> <li>• Discarded</li> <li>• Draft</li> <li>• Error</li> <li>• Finalized</li> <li>• Fully Orchestrated</li> <li>• Hierarchy Creation Deferred</li> <li>• Inactive</li> <li>• Partially Orchestrated</li> <li>• Pending for Approval</li> <li>• Pending for Review</li> <li>• Pending Simulation</li> <li>• Pending for Orchestration</li> <li>• Ready for Approval</li> <li>• Rejected</li> <li>• Simulated</li> <li>• Simulation Deferred</li> </ul>
Customer Tier	Indicates the customer tier of the customer segment to which the entity (i.e. the customer, account, or prospect person) belongs.
Start Date	Displays the date from when the price list, price assignment, and price item pricing is available for the deal.
Acceptance Date	Displays the date when the customer has reviewed and accepted the deal.
	<p><b>Note:</b> This field is populated when the deal has reached the <b>Customer Accepted</b> status.</p> <p>If the <b>Deal Status</b> is <b>Rejected</b> then the <b>Acceptance Date</b> specifies the date when the deal is rejected by the customer.</p>
Deal Version Status	Indicates the status of the deal version.

Field Name	Field Description
Deal Currency	Indicates the currency in which the financial summary and profitability is calculated for the deal.
End Date	Displays the date till when the price list and price assignment is available for the deal.
Finalized Date	Displays the date when the deal is finalized in the system.
	<b>Note:</b> This field is populated when the deal has reached the <b>Customer Accepted</b> status.
Simulation Type	Indicates the simulation type using which the financial summary and profitability is calculated for the deal. The valid values are: <ul style="list-style-type: none"> <li>• Account</li> <li>• Customer</li> <li>• Deal</li> </ul>
Usage Period	Indicates the period for which you want to aggregate the deal data to determine the scope of the deal. The valid values are: <ul style="list-style-type: none"> <li>• Biannually</li> <li>• Monthly</li> <li>• Quarterly</li> <li>• Yearly</li> </ul>
Deal Frequency	Indicates the duration in which you want to simulate the deal for calculating the financial summary and deal profitability. The valid values are: <ul style="list-style-type: none"> <li>• Biannually</li> <li>• Monthly</li> <li>• Quarterly</li> <li>• Yearly</li> </ul>

In addition, the **Deal Information** zone contains the following links:

Link Name	Link Description
Deal Terms and Conditions	Used to associate, disassociate, or view the deal terms and conditions. It is also used to add adhoc terms and conditions for the deal.
Deal Log	Used to view the complete trail of actions performed on the deal. It also allows you to manually add a log entry for the deal.
Deal Version Log	Used to view the complete trail of actions performed on the deal version. It also allows you to manually add a log entry for the deal version.
Adhoc Revenue and Cost	Used to add, edit, or view additional charges that are applicable for the deal while deal creation.

## Simulation Details

The **Simulation Details** zone allows you to do the following:

- View the deal financial summary
- View the division financial summary
- View the product financial summary
- View the customer hierarchy
- View the assigned price lists of a person or account
- View the proposed price list assignments of a person or account
- View the enrolled products for an account
- View the proposed product enrollments for an account
- View the pricing and commitment details of a person or account
- View the division financial summary in the division currency
- View the product financial summary in the division currency
- View the revenue and cost in the division or account currency

The **Simulation Details** zone contains the following sections:

- **Symbol Legends** - Indicates the symbols used to identify the current status of the deal level, division level, and product level financial summary. It also differentiates the existing, proposed and recommended pricing statistics. It contains the following symbols:

Symbol Name	Symbol Description
 IN APPROVER RANGE	Indicates that the deal level, division level, or product level financial summary is within the limits defined for the user for approval.
 NOT IN APPROVER RANGE	Indicates that the deal level, division level, or product level financial summary is not within the limits defined for the user for approval.
 PROJECTED	Indicates the revenue, cost, and profit generated from the proposed price item pricing and price assignments.
 RECOMMENDED	Indicates the revenue, cost, and profit generated from the recommended price item pricing and price assignments.
 ORIGINAL	Indicates the revenue, cost, and profit generated from the existing price item pricing and price assignments.
 APPROVED	Indicates whether the deal level, division level, or product level financial summary is approved or not.

Symbol Name	Symbol Description
 PENDING FOR APPROVAL	Indicates that the approval for deal level, division level, or product level financial summary is pending.

- **Deal Financial Summary** - Displays the financial summary at the deal level. It contains the following columns:

Column Name	Column Description
Approval Status	Indicates the current approval status of the financial summary at the deal level.
Revenue	Displays the proposed, recommended, and original revenue generated from the price item pricing and price assignments at the deal level.  <b>Note:</b> If division level approval is required, then the revenue includes the sum of revenues calculated at each division level.
Cost	Displays the proposed, recommended, and original cost calculated at the deal level.  <b>Note:</b> The cost includes the total price item cost and the adhoc cost. If division level approval is required, then the cost includes the sum of costs calculated at each division level.
Profit	Displays the proposed, recommended, and original profit in deal currency generated from the price item pricing and price assignments at the deal level. It is calculated using the following formula:  Profit = Revenue – Cost  <b>Note:</b> If division level approval is required, then the profit includes the sum of profits calculated at each division level.
Profitability (%)	Displays the proposed, recommended, and original profit created in percentage at the deal level from the price item pricing and price assignments. It is calculated using the following formula:  Profitability % = ( Revenue – Cost)*100/ Revenue
Profit Variation (%)	Displays the difference of profit in percentage generated from the original and the proposed price item pricing and commitments at the deal level. It is calculated using the following formula:  Profit Variation (%) = (Proposed Profit – Original Profit)*100/ Original Profit

**Note:** The data in the **Deal Financial Summary** sections appears when the deal has reached the **Simulated** status.

- **Division Financial Summary** - Displays the financial summary at the division level. It contains the following columns:

Column Name	Column Description
Division	Indicates the division for which the financial summary is displayed.

Column Name	Column Description
Approval Status	Indicates the current approval status of the financial summary at the division level.
Revenue	Displays the proposed, recommended, and original revenue generated from the price item pricing and price assignments at the division level.
Cost	Displays the proposed, recommended, and original cost calculated at the division level.
	<b>Note:</b> The cost includes the total price item cost and the adhoc cost.
Profit	Displays the proposed, recommended, and original profit in deal currency generated from the price item pricing and price assignments at the division level. It is calculated using the following formula:  Profit = Revenue – Cost
Profitability (%)	Displays the proposed, recommended, and original profit generated in percentage at the division level from the price item pricing and price assignments. It is calculated using the following formula:  Profitability % = ( Revenue – Cost)*100/ Revenue
Profit Variation (%)	Displays the difference of profit in percentage generated from the original and the proposed price item pricing and commitments at the division level. It is calculated using the following formula:  Profit Variation (%) = (Proposed Profit – Original Profit)*100/ Original Profit

**Note:**

The **Division Financial Summary** sections appears in the **Simulation Details** zone when the **Division Level Approval Required** field is set to **Yes** in the **Deal Type** used for defining the deal.

The data in the **Division Financial Summary** sections appears when the deal has reached the **Simulated** status.

By default, the division financial summary is displayed in the deal currency. You can view the division financial summary in the division currency by clicking the toggle switch towards **Division Currency** available above the financial summary table.

- **Product Financial Summary** - Displays the financial summary at the product level. It contains the following columns:

Column Name	Column Description
Product	Indicates the product whose financial summary is displayed.
Division	Indicates the division to which the product belongs.
Approval Status	Indicates the current approval status of the financial summary at the product level.
Revenue	Displays the proposed, recommended, and original revenue generated from the product.
Cost	Displays the proposed, recommended, and original cost calculated for the product.
	<b>Note:</b> The cost includes the total price item cost and the adhoc cost.

Column Name	Column Description
Profit	Displays the proposed, recommended, and original profit in deal currency generated from the price item pricing and price assignments at the product level. It is calculated using the following formula:  Profit = Revenue – Cost
Profitability (%)	Displays the proposed, recommended, and original profit generated in percentage from the price item pricing and price assignments at the product level . It is calculated using the following formula:  Profitability % = ( Revenue – Cost)*100/ Revenue
Profit Variation (%)	Displays the difference of profit in percentage generated from the original and the proposed price item pricing and commitments at the product level. It is calculated using the following formula:  Profit Variation (%) = (Proposed Profit – Original Profit)*100/ Original Profit

**Note:**

The **Product Financial Summary** sections appears in the **Simulation Details** zone when the **Product Level Approval Required** field is set to **Yes** in the **Deal Type** used for defining the deal.

The data in the **Product Financial Summary** sections appears when the deal has reached the **Simulated** status.

By default, the product financial summary is displayed in the deal currency. You can view the product financial summary in the division currency by clicking the toggle switch towards **Division Currency** available above the financial summary table.

- **Customer Hierarchy** - Indicates the main customer and its associated accounts as well as the child persons and its accounts that are associated with the main customer. It also enables you to do the following:
  - View and edit the pricing and commitments at the person and account level
  - View the revenue variation from the proposed and original pricing and commitments
  - View the proposed price lists of a person or account
  - Assign proposed price list to a person or account
  - View the enrolled products of an account
  - Enroll accounts for a product
  - View the original price list of a person or account
  - View the original enrolled products for an account
  - View the proposed or the original revenue and cost generated at the person an account level.

The **Customer Hierarchy** section contains the following columns:

Column Name	Column Description
Person Name	Indicates the main customer and its related persons and accounts.
Division	Indicates the division to which the main customer and it related persons and accounts are associated.

Column Name	Column Description
Pricing and Commitments	<p>On clicking the <b>Edit</b> (✎) icon in the <b>Pricing and Commitments</b> column corresponding to a person or account in the hierarchy, the <b>Pricing and Commitments</b> screen appears where you can view and edit the pricing and commitments of the price items for the respective person or account.</p> <p><b>Note:</b> You cannot edit the pricing or commitments of the price items if the deal has reached the <b>Finalized</b> status.</p>
Status	Indicates the approval status of the price item pricing and price assignments for the respective person or account.
Revenue Variation (%)	<p>Displays the average revenue generated from a customer or account in percentage. It is calculated using the following formula:</p> $\text{Revenue Variation (\%)} = (\text{Proposed Revenue} - \text{Original Revenue}) * 100 / \text{Original Revenue}.$
Price List Assignment	<p>On clicking the <b>Edit</b> (✎) icon in the <b>Price List Assignment</b> column corresponding to a person or account in the hierarchy, the <b>Price List Assignment</b> screen appears where you can view and assign proposed price list to the respective person or account.</p> <p><b>Note:</b> You cannot assign proposed price list to the person or account if the deal has reached the <b>Finalized</b> status.</p>
Product Enrollment	<p>On clicking the <b>Edit</b> (✎) icon in the <b>Product Enrollment</b> column corresponding to the person or account in the hierarchy, the <b>Product Enrollment</b> screen appears where you can view or enroll the respective account or accounts of the customer for a product. You can also view a list of recommended products for which you want to enroll the account or accounts of the customer. The recommended products appear in the <b>Product Enrollment</b> screen when you add products in the <b>Recommended Products</b> section while defining a deal.</p> <p><b>Note:</b> You cannot enroll an account for a product if the deal has reached the <b>Finalized</b> status.</p>
Price Item Group Selection	On clicking the <b>Edit</b> (✎) icon in the <b>Price Item Group Selection</b> column corresponding to the main person in the hierarchy, the <b>Select Price Item Group</b> screen appears where you can select and/or deselect the price items and/or hierarchy entities based on which you want to simulate the deal.
Revenue	Indicates the revenue generated by the corresponding person or account in the hierarchy through the proposed price item pricing and commitments.
Cost	<p>Indicates the sum of the proposed costs from all accounts under the customer.</p> <p><b>Note:</b> If the person is a parent customer, then the sum of the proposed costs of all the child customers is considered.</p>
Pricelist	On clicking the <b>View</b> (📄) icon in the <b>Price List</b> column corresponding to the person or account in the hierarchy, the <b>Price List Assignment</b> screen appears where you can view the original price list assigned to the respective person or account.

Column Name	Column Description
Product	On clicking the <b>Edit</b> (✎) icon in the <b>Product</b> column corresponding to the person or account in the hierarchy, the <b>Product Enrollment</b> screen appears where you can view the products to which the account is already enrolled.
Revenue	Indicates the revenue generated by the corresponding person or account in the hierarchy through the original price item pricing and commitments.
Cost	Indicates the sum of the original costs from all accounts under the customer.  <b>Note:</b> If the person is a parent customer, then the sum of the original costs of all the child customers is considered.

In addition, the **Simulation Details** zone contains the following buttons:

Button Name	Button Description
Deal Pricing and Commitments	Used to define the consolidated pricing and commitments for the customers or accounts in a deal.
Simulate Deal	Used to perform different types of simulation based on the pricing and commitments of the price item to determine the best price that can be offered to the clients as per their requirements.
Check Limits	Used to execute the price item ceil and floor validation for an approver as per the limits set on the price item screen.  <b>Note:</b> The <b>Check Limits</b> is run only for the price items which are in the <b>Pending for Approval</b> or <b>Error</b> status after the <b>Pricing Simulation</b> is executed. The <b>Check Limits</b> button is activated when the <b>Price Item Approval Required</b> option is set to <b>Yes</b> in the <b>Deal Type</b> using which the deal is created.
Send Deal for Approval	Used to move the deal from the current role to the next role of the next level in the approval hierarchy for approval.  <b>Note:</b> On clicking the <b>Send Deal for Approval</b> button, a To Do notification is created for the users of the next level to indicate that approval of the deal is required. A To Do is also created for the creator (i.e. the Relationship Manager) of the deal to indicate that the ownership of the deal has changed. This button is activated after <b>Pricing Simulation</b> is completed for the deal and if the <b>Approve Deal</b> option is set to <b>Yes</b> for the approver in the <b>Approval Hierarchy</b> of the <b>Deal Approval Profile</b> .

Button Name	Button Description
Approve Deal	<p>Used to approve the deal. To approve a deal the following conditions should be met:</p> <ul style="list-style-type: none"> <li>• All the price items should be in the <b>Approved</b> status if the <b>Price Item Approval Required</b> option is set to <b>Yes</b> in the <b>Deal Type</b> used for creating the deal.</li> <li>• All the division level approvals must be completed if the <b>Division Level Approval Required</b> field is set to <b>Yes</b> in the <b>Deal Type</b> used for creating the deal.</li> <li>• All the product level approvals must be completed if the <b>Product Level Approval Required</b> field is set to <b>Yes</b> in the <b>Deal Type</b> used for creating the deal.</li> <li>• The deal should be in the <b>Ready for Approval</b> status for the approver to initiate the deal approval process.</li> </ul> <p><b>Note:</b></p> <p>The <b>Approve Deal</b> button is activated only when the deal is in the <b>Ready for Approval</b> status and the <b>Approve Deal</b> option is set to <b>Yes</b> for the approver in the <b>Approval Hierarchy</b> of the <b>Deal Approval Profile</b>.</p>
Return to Submitter	<p>Used to move the deal from the current role to the previous role of the previous level in the approval hierarchy for approval. It is also used to send the deal to the relationship manager for approval if you have recommended a new pricing for the price item.</p> <p><b>Note:</b></p> <p>On clicking the <b>Return to Submitter</b> button, a To Do notification is created for the users of the previous level to indicate that the deal is returned for approval.</p> <p>A To Do is also created for the creator (i.e. the Relationship Manager) of the deal to indicate that the ownership of the deal has changed.</p>
Finalize Deal	<p>Used to finalize the deal so that it is ready to be presented to the customer for approval.</p> <p><b>Note:</b> This button is activated when the deal is in the <b>Approved</b> status.</p> <p><b>Tip:</b> You can also finalize a deal by clicking the <b>Finalize</b> (  ) icon in the <b>Finalize Deal</b> column corresponding to the deal in the <b>Search Deal</b> zone of the <b>Deal Dashboard</b> screen.</p>
Accept Deal	<p>Used to accept the deal in the system after receiving confirmation of acceptance from the customer.</p> <p><b>Note:</b> This button is activated only when the deal is in the <b>Finalized</b> status.</p> <p><b>Tip:</b> You can also accept a deal by clicking the <b>Accept</b> (  ) icon in the <b>Accept Deal</b> column corresponding to the deal in the <b>Search Deal</b> zone of the <b>Deal Dashboard</b> screen.</p>

Button Name	Button Description
Reject Deal	Used to reject the deal in the system after receiving confirmation of rejection from the customer.
	<b>Note:</b> This button is activated only when the deal is in the <b>Finalized</b> status.
	<b>Tip:</b> You can also reject a deal by clicking the <b>Reject</b> (✖) icon in the <b>Reject Deal</b> column corresponding to the deal in the <b>Search Deal</b> zone of the <b>Deal Dashboard</b> screen.
Create Deal Version	Used to create a deal version for the existing deal to optimize the deal pricing process and to make better pricing decisions.
	<b>Note:</b> This button is deactivated once the deal has reached the <b>Approved</b> status.
Discard Deal	Used to discard the deal.
	<b>Note:</b> You cannot discard a deal if it has reached the <b>Finalized</b> status.
Print Deal	Used to extract relevant information about the deal in the pdf or excel format which is published either to the customer for receiving approvals or for internal reviews and validations.
Apply Back	Used to activate the proposed pricelist assignments, overridden pricing, and product enrollments for the existing customer or account in the system.
Previous	Used to view information about the previous status of the deal.

## Deal Information - Acceptance/Rejection

The **Deal Information - Acceptance/Rejection** page enables you to either accept or reject a finalized deal based on the customer feedback. It also enables you to fully orchestrate the customer accepted deal. You can also extract the deal information in the pdf of excel format. It contains the following zones:

- [Deal Information](#) on page 2892

The following fields in the **Deal Information** zone are updated when the deal or deal version has been accepted or rejected by the customer:

Field Name	Field Description
Effective Start Date	<p>Displays the date from when the deal is effective for the customer or prospect.</p> <p><b>Note:</b></p> <p>The effective date specified for the proposed price list pricing and price assignment is considered as the <b>Effective Start Date</b> for the deal.</p> <p>Also, the end date for the existing price list pricing and price assignment is calculated by the below formula:</p> <p><b>End Date = Effective Start Date</b> of the deal - 1 day.</p>
Effective End Date	Displays the date till when the deal is effective for the customer or prospect.

Field Name	Field Description
Acceptance Date	Displays the date when the customer or prospect has accepted the deal.
	<b>Note:</b> If the <b>Deal Status</b> is <b>Rejected</b> then the <b>Acceptance Date</b> specifies the date when the deal is rejected by the customer.
Finalized Date	Displays the date when the deal has been finalized in the system.

- [Simulation Details](#) on page 2895

**Note:** You can access the **Deal Information - Acceptance/Rejection** page when the deal is in the **Finalized** or **Customer Accepted** status.

### Deal Information

The **Deal Information** zone allows you to do the following:

- View the details of the deal
- Associate, disassociate, view, or edit the terms and conditions of the deal
- View and add log entries for the deal or deal version
- View and add adhoc revenue charges for the deal or deal version

Field Name	Field Description
Deal Information	Displays the concatenated string of information about the deal separated by a comma (,).
Division	Indicates the division with which the deal is associated.
Deal Type	Indicates the deal type using which the deal is created in the system.
Review Date	Displays the date which is scheduled for calculating the deal usage as per the commitments made by the customer.
	<b>Note:</b> This field is populated when the deal has reached the <b>Full Orchestrated</b> status.
Deal Version Information	Displays the concatenated string of information about the deal version separated by a comma (,).
Access Group	Indicates the group of users who can view and edit the details of the entity (i.e. the customer, account, or prospect person) for which the deal is created.

Field Name	Field Description
Review Frequency	Indicates the duration for which the deal is monitored to calculate the usage of the deal as per the commitments made by the customer.
Effective Start Date	Displays the date from when the deal is effective for the entity (i.e. the customer, account, or prospect person).
	<b>Note:</b> This field is populated when the deal has reached the <b>Customer Accepted</b> status.
Deal Description	Displays the description of the deal.
Customer Segment	Displays the business component to which the entity (i.e. the customer, account, or prospect person) belongs.
Creation Date	Displays the date when the deal is created in the system.
Effective End Date	Displays the date till when the deal is effective for the entity (i.e. the customer, account, or prospect person).
	<b>Note:</b> This field is populated when the deal has reached the <b>Customer Accepted</b> status.
Deal Status	<p>Indicates the current status of the deal. The valid values are:</p> <ul style="list-style-type: none"> <li>• Applied/Processed</li> <li>• Approved</li> <li>• Closed</li> <li>• Customer Accepted</li> <li>• Discarded</li> <li>• Draft</li> <li>• Error</li> <li>• Finalized</li> <li>• Fully Orchestrated</li> <li>• Hierarchy Creation Deferred</li> <li>• Inactive</li> <li>• Partially Orchestrated</li> <li>• Pending for Approval</li> <li>• Pending for Review</li> <li>• Pending Simulation</li> <li>• Pending for Orchestration</li> <li>• Ready for Approval</li> <li>• Rejected</li> <li>• Simulated</li> <li>• Simulation Deferred</li> </ul>
Customer Tier	Indicates the customer tier of the customer segment to which the entity (i.e. the customer, account, or prospect person) belongs.

Field Name	Field Description
Start Date	Displays the date from when the price list, price assignment, and price item pricing is available for the deal.
Acceptance Date	<p>Displays the date when the customer has reviewed and accepted the deal.</p> <p><b>Note:</b> This field is populated when the deal has reached the <b>Customer Accepted</b> status.</p> <p>If the <b>Deal Status</b> is <b>Rejected</b> then the <b>Acceptance Date</b> specifies the date when the deal is rejected by the customer.</p>
Deal Version Status	Indicates the status of the deal version.
Deal Currency	Indicates the currency in which the financial summary and profitability is calculated for the deal.
End Date	Displays the date till when the price list and price assignment is available for the deal.
Finalized Date	<p>Displays the date when the deal is finalized in the system.</p> <p><b>Note:</b> This field is populated when the deal has reached the <b>Customer Accepted</b> status.</p>
Simulation Type	<p>Indicates the simulation type using which the financial summary and profitability is calculated for the deal. The valid values are:</p> <ul style="list-style-type: none"> <li>• Account</li> <li>• Customer</li> <li>• Deal</li> </ul>
Usage Period	<p>Indicates the period for which you want to aggregate the deal data to determine the scope of the deal. The valid values are:</p> <ul style="list-style-type: none"> <li>• Biannually</li> <li>• Monthly</li> <li>• Quarterly</li> <li>• Yearly</li> </ul>
Deal Frequency	<p>Indicates the duration in which you want to simulate the deal for calculating the financial summary and deal profitability. The valid values are:</p> <ul style="list-style-type: none"> <li>• Biannually</li> <li>• Monthly</li> <li>• Quarterly</li> <li>• Yearly</li> </ul>

In addition, the **Deal Information** zone contains the following links:

Link Name	Link Description
Deal Terms and Conditions	Used to associate, disassociate, or view the deal terms and conditions. It is also used to add adhoc terms and conditions for the deal.

Link Name	Link Description
Deal Log	Used to view the complete trail of actions performed on the deal. It also allows you to manually add a log entry for the deal.
Deal Version Log	Used to view the complete trail of actions performed on the deal version. It also allows you to manually add a log entry for the deal version.
Adhoc Revenue and Cost	Used to add, edit, or view additional charges that are applicable for the deal while deal creation.

### Simulation Details

The **Simulation Details** zone allows you to do the following:

- View the deal financial summary
- View the division financial summary
- View the product financial summary
- View the customer hierarchy
- View the assigned price lists of a person or account
- View the proposed price list assignments of a person or account
- View the enrolled products for an account
- View the proposed product enrollments for an account
- View the pricing and commitment details of a person or account
- View the division financial summary in the division currency
- View the product financial summary in the division currency
- View the revenue and cost in the division or account currency

The **Simulation Details** zone contains the following sections:

- **Symbol Legends** - Indicates the symbols used to identify the current status of the deal level, division level, and product level financial summary. It also differentiates the existing, proposed and recommended pricing statistics. It contains the following symbols:

Symbol Name	Symbol Description
 IN APPROVER RANGE	Indicates that the deal level, division level, or product level financial summary is within the limits defined for the user for approval.

Symbol Name	Symbol Description
 NOT IN APPROVER RANGE	Indicates that the deal level, division level, or product level financial summary is not within the limits defined for the user for approval.
 PROJECTED	Indicates the revenue, cost, and profit generated from the proposed price item pricing and price assignments.
 RECOMMENDED	Indicates the revenue, cost, and profit generated from the recommended price item pricing and price assignments.
 ORIGINAL	Indicates the revenue, cost, and profit generated from the existing price item pricing and price assignments.
 APPROVED	Indicates whether the deal level, division level, or product level financial summary is approved or not.
 PENDING FOR APPROVAL	Indicates that the approval for deal level, division level, or product level financial summary is pending.

- **Deal Financial Summary** - Displays the financial summary at the deal level. It contains the following columns:

Column Name	Column Description
Approval Status	Indicates the current approval status of the financial summary at the deal level.
Revenue	<p>Displays the proposed, recommended, and original revenue generated from the price item pricing and price assignments at the deal level.</p> <p><b>Note:</b> If division level approval is required, then the revenue includes the sum of revenues calculated at each division level.</p>
Cost	<p>Displays the proposed, recommended, and original cost calculated at the deal level.</p> <p><b>Note:</b> The cost includes the total price item cost and the adhoc cost. If division level approval is required, then the cost includes the sum of costs calculated at each division level.</p>
Profit	<p>Displays the proposed, recommended, and original profit in deal currency generated from the price item pricing and price assignments at the deal level. It is calculated using the following formula:</p> <p>Profit = Revenue – Cost</p> <p><b>Note:</b> If division level approval is required, then the profit includes the sum of profits calculated at each division level.</p>
Profitability (%)	<p>Displays the proposed, recommended, and original profit created in percentage at the deal level from the price item pricing and price assignments. It is calculated using the following formula:</p> <p>Profitability % = ( Revenue – Cost)*100/ Revenue</p>

Column Name	Column Description
Profit Variation (%)	Displays the difference of profit in percentage generated from the original and the proposed price item pricing and commitments at the deal level. It is calculated using the following formula:  Profit Variation (%) = (Proposed Profit – Original Profit)*100/ Original Profit

**Note:** The data in the **Deal Financial Summary** sections appears when the deal has reached the **Simulated** status.

- **Division Financial Summary** - Displays the financial summary at the division level. It contains the following columns:

Column Name	Column Description
Division	Indicates the division for which the financial summary is displayed.
Approval Status	Indicates the current approval status of the financial summary at the division level.
Revenue	Displays the proposed, recommended, and original revenue generated from the price item pricing and price assignments at the division level.
Cost	Displays the proposed, recommended, and original cost calculated at the division level.  <b>Note:</b> The cost includes the total price item cost and the adhoc cost.
Profit	Displays the proposed, recommended, and original profit in deal currency generated from the price item pricing and price assignments at the division level. It is calculated using the following formula:  Profit = Revenue – Cost
Profitability (%)	Displays the proposed, recommended, and original profit generated in percentage at the division level from the price item pricing and price assignments. It is calculated using the following formula:  Profitability % = ( Revenue – Cost)*100/ Revenue
Profit Variation (%)	Displays the difference of profit in percentage generated from the original and the proposed price item pricing and commitments at the division level. It is calculated using the following formula:  Profit Variation (%) = (Proposed Profit – Original Profit)*100/ Original Profit

**Note:**

The **Division Financial Summary** sections appears in the **Simulation Details** zone when the **Division Level Approval Required** field is set to **Yes** in the **Deal Type** used for defining the deal.

The data in the **Division Financial Summary** sections appears when the deal has reached the **Simulated** status.

By default, the division financial summary is displayed in the deal currency. You can view the division financial summary in the division currency by clicking the toggle switch towards **Division Currency** available above the financial summary table.

- **Product Financial Summary** - Displays the financial summary at the product level. It contains the following columns:

Column Name	Column Description
Product	Indicates the product whose financial summary is displayed.
Division	Indicates the division to which the product belongs.
Approval Status	Indicates the current approval status of the financial summary at the product level.
Revenue	Displays the proposed, recommended, and original revenue generated from the product.
Cost	Displays the proposed, recommended, and original cost calculated for the product.
	<b>Note:</b> The cost includes the total price item cost and the adhoc cost.
Profit	Displays the proposed, recommended, and original profit in deal currency generated from the price item pricing and price assignments at the product level. It is calculated using the following formula:  Profit = Revenue – Cost
Profitability (%)	Displays the proposed, recommended, and original profit generated in percentage from the price item pricing and price assignments at the product level . It is calculated using the following formula:  Profitability % = ( Revenue – Cost)*100/ Revenue
Profit Variation (%)	Displays the difference of profit in percentage generated from the original and the proposed price item pricing and commitments at the product level. It is calculated using the following formula:  Profit Variation (%) = (Proposed Profit – Original Profit)*100/ Original Profit

**Note:**

The **Product Financial Summary** sections appears in the **Simulation Details** zone when the **Product Level Approval Required** field is set to **Yes** in the **Deal Type** used for defining the deal.

The data in the **Product Financial Summary** sections appears when the deal has reached the **Simulated** status.

By default, the product financial summary is displayed in the deal currency. You can view the product financial summary in the division currency by clicking the toggle switch towards **Division Currency** available above the financial summary table.

- **Customer Hierarchy** - Indicates the main customer and its associated accounts as well as the child persons and its accounts that are associated with the main customer. It also enables you to do the following:
  - View and edit the pricing and commitments at the person and account level
  - View the revenue variation from the proposed and original pricing and commitments
  - View the proposed price lists of a person or account
  - Assign proposed price list to a person or account
  - View the enrolled products of an account
  - Enroll accounts for a product
  - View the original price list of a person or account
  - View the original enrolled products for an account

- View the proposed or the original revenue and cost generated at the person an account level.

The **Customer Hierarchy** section contains the following columns:

Column Name	Column Description
Person Name	Indicates the main customer and its related persons and accounts.
Division	Indicates the division to which the main customer and it related persons and accounts are associated.
Pricing and Commitments	<p>On clicking the <b>Edit</b> (✎) icon in the <b>Pricing and Commitments</b> column corresponding to a person or account in the hierarchy, the <b>Pricing and Commitments</b> screen appears where you can view and edit the pricing and commitments of the price items for the respective person or account.</p> <p><b>Note:</b> You cannot edit the pricing or commitments of the price items if the deal has reached the <b>Finalized</b> status.</p>
Status	Indicates the approval status of the price item pricing and price assignments for the respective person or account.
Revenue Variation (%)	<p>Displays the average revenue generated from a customer or account in percentage. It is calculated using the following formula:</p> $\text{Revenue Variation (\%)} = (\text{Proposed Revenue} - \text{Original Revenue}) * 100 / \text{Original Revenue}.$
Price List Assignment	<p>On clicking the <b>Edit</b> (✎) icon in the <b>Price List Assignment</b> column corresponding to a person or account in the hierarchy, the <b>Price List Assignment</b> screen appears where you can view and assign proposed price list to the respective person or account.</p> <p><b>Note:</b> You cannot assign proposed price list to the person or account if the deal has reached the <b>Finalized</b> status.</p>
Product Enrollment	<p>On clicking the <b>Edit</b> (✎) icon in the <b>Product Enrollment</b> column corresponding to the person or account in the hierarchy, the <b>Product Enrollment</b> screen appears where you can view or enroll the respective account or accounts of the customer for a product. You can also view a list of recommended products for which you want to enroll the account or accounts of the customer. The recommended products appear in the <b>Product Enrollment</b> screen when you add products in the <b>Recommended Products</b> section while defining a deal.</p> <p><b>Note:</b> You cannot enroll an account for a product if the deal has reached the <b>Finalized</b> status.</p>
Price Item Group Selection	On clicking the <b>Edit</b> (✎) icon in the <b>Price Item Group Selection</b> column corresponding to the main person in the hierarchy, the <b>Select Price Item Group</b> screen appears where you can select and/or deselect the price items and/or hierarchy entities based on which you want to simulate the deal.
Revenue	Indicates the revenue generated by the corresponding person or account in the hierarchy through the proposed price item pricing and commitments.

Column Name	Column Description
Cost	Indicates the sum of the proposed costs from all accounts under the customer.  <b>Note:</b> If the person is a parent customer, then the sum of the proposed costs of all the child customers is considered.
Pricelist	On clicking the <b>View</b> (  ) icon in the <b>Price List</b> column corresponding to the person or account in the hierarchy, the <b>Price List Assignment</b> screen appears where you can view the original price list assigned to the respective person or account.
Product	On clicking the <b>Edit</b> (  ) icon in the <b>Product</b> column corresponding to the person or account in the hierarchy, the <b>Product Enrollment</b> screen appears where you can view the products to which the account is already enrolled.
Revenue	Indicates the revenue generated by the corresponding person or account in the hierarchy through the original price item pricing and commitments.
Cost	Indicates the sum of the original costs from all accounts under the customer.  <b>Note:</b> If the person is a parent customer, then the sum of the original costs of all the child customers is considered.

In addition, the **Simulation Details** zone contains the following buttons:

Button Name	Button Description
Deal Pricing and Commitments	Used to define the consolidated pricing and commitments for the customers or accounts in a deal.
Simulate Deal	Used to perform different types of simulation based on the pricing and commitments of the price item to determine the best price that can be offered to the clients as per their requirements.
Check Limits	Used to execute the price item ceil and floor validation for an approver as per the limits set on the price item screen.  <b>Note:</b> The <b>Check Limits</b> is run only for the price items which are in the <b>Pending for Approval</b> or <b>Error</b> status after the <b>Pricing Simulation</b> is executed. The <b>Check Limits</b> button is activated when the <b>Price Item Approval Required</b> option is set to <b>Yes</b> in the <b>Deal Type</b> using which the deal is created.

Button Name	Button Description
Send Deal for Approval	<p>Used to move the deal from the current role to the next role of the next level in the approval hierarchy for approval.</p> <p><b>Note:</b></p> <p>On clicking the <b>Send Deal for Approval</b> button, a To Do notification is created for the users of the next level to indicate that approval of the deal is required.</p> <p>A To Do is also created for the creator (i.e. the Relationship Manager) of the deal to indicate that the ownership of the deal has changed.</p> <p>This button is activated after <b>Pricing Simulation</b> is completed for the deal and if the <b>Approve Deal</b> option is set to <b>Yes</b> for the approver in the <b>Approval Hierarchy</b> of the <b>Deal Approval Profile</b>.</p>
Approve Deal	<p>Used to approve the deal. To approve a deal the following conditions should be met:</p> <ul style="list-style-type: none"> <li>• All the price items should be in the <b>Approved</b> status if the <b>Price Item Approval Required</b> option is set to <b>Yes</b> in the <b>Deal Type</b> used for creating the deal.</li> <li>• All the division level approvals must be completed if the <b>Division Level Approval Required</b> field is set to <b>Yes</b> in the <b>Deal Type</b> used for creating the deal.</li> <li>• All the product level approvals must be completed if the <b>Product Level Approval Required</b> field is set to <b>Yes</b> in the <b>Deal Type</b> used for creating the deal.</li> <li>• The deal should be in the <b>Ready for Approval</b> status for the approver to initiate the deal approval process.</li> </ul> <p><b>Note:</b></p> <p>The <b>Approve Deal</b> button is activated only when the deal is in the <b>Ready for Approval</b> status and the <b>Approve Deal</b> option is set to <b>Yes</b> for the approver in the <b>Approval Hierarchy</b> of the <b>Deal Approval Profile</b>.</p>
Return to Submitter	<p>Used to move the deal from the current role to the previous role of the previous level in the approval hierarchy for approval. It is also used to send the deal to the relationship manager for approval if you have recommended a new pricing for the price item.</p> <p><b>Note:</b></p> <p>On clicking the <b>Return to Submitter</b> button, a To Do notification is created for the users of the previous level to indicate that the deal is returned for approval.</p> <p>A To Do is also created for the creator (i.e. the Relationship Manager) of the deal to indicate that the ownership of the deal has changed.</p>

Button Name	Button Description
Finalize Deal	Used to finalize the deal so that it is ready to be presented to the customer for approval.
	<b>Note:</b> This button is activated when the deal is in the <b>Approved</b> status.
	<b>Tip:</b> You can also finalize a deal by clicking the <b>Finalize</b> (  ) icon in the <b>Finalize Deal</b> column corresponding to the deal in the <b>Search Deal</b> zone of the <b>Deal Dashboard</b> screen.
Accept Deal	Used to accept the deal in the system after receiving confirmation of acceptance from the customer.
	<b>Note:</b> This button is activated only when the deal is in the <b>Finalized</b> status.
	<b>Tip:</b> You can also accept a deal by clicking the <b>Accept</b> (  ) icon in the <b>Accept Deal</b> column corresponding to the deal in the <b>Search Deal</b> zone of the <b>Deal Dashboard</b> screen.
Reject Deal	Used to reject the deal in the system after receiving confirmation of rejection from the customer.
	<b>Note:</b> This button is activated only when the deal is in the <b>Finalized</b> status.
	<b>Tip:</b> You can also reject a deal by clicking the <b>Reject</b> (  ) icon in the <b>Reject Deal</b> column corresponding to the deal in the <b>Search Deal</b> zone of the <b>Deal Dashboard</b> screen.
Create Deal Version	Used to create a deal version for the existing deal to optimize the deal pricing process and to make better pricing decisions.
	<b>Note:</b> This button is deactivated once the deal has reached the <b>Approved</b> status.
Discard Deal	Used to discard the deal.
	<b>Note:</b> You cannot discard a deal if it has reached the <b>Finalized</b> status.
Print Deal	Used to extract relevant information about the deal in the pdf or excel format which is published either to the customer for receiving approvals or for internal reviews and validations.
Apply Back	Used to activate the proposed pricelist assignments, overridden pricing, and product enrollments for the existing customer or account in the system.
Previous	Used to view information about the previous status of the deal.

- Associate, disassociate, view, or edit the terms and conditions of the deal
- View and add log entries for the deal or deal version
- View and add adhoc revenue charges for the deal or deal version

Field Name	Field Description
Deal Information	Displays the concatenated string of information about the deal separated by a comma (,).
Division	Indicates the division with which the deal is associated.
Deal Type	Indicates the deal type using which the deal is created in the system.
Review Date	Displays the date which is scheduled for calculating the deal usage as per the commitments made by the customer.  <b>Note:</b> This field is populated when the deal has reached the <b>Full Orchestrated</b> status.
Deal Version Information	Displays the concatenated string of information about the deal version separated by a comma (,).
Access Group	Indicates the group of users who can view and edit the details of the entity (i.e. the customer, account, or prospect person) for which the deal is created.
Review Frequency	Indicates the duration for which the deal is monitored to calculate the usage of the deal as per the commitments made by the customer.
Effective Start Date	Displays the date from when the deal is effective for the entity (i.e. the customer, account, or prospect person).  <b>Note:</b> This field is populated when the deal has reached the <b>Customer Accepted</b> status.
Deal Description	Displays the description of the deal.
Customer Segment	Displays the business component to which the entity (i.e. the customer, account, or prospect person) belongs.
Creation Date	Displays the date when the deal is created in the system.
Effective End Date	Displays the date till when the deal is effective for the entity (i.e. the customer, account, or prospect person).  <b>Note:</b> This field is populated when the deal has reached the <b>Customer Accepted</b> status.

Field Name	Field Description
Deal Status	<p>Indicates the current status of the deal. The valid values are:</p> <ul style="list-style-type: none"> <li>• Applied/Processed</li> <li>• Approved</li> <li>• Closed</li> <li>• Customer Accepted</li> <li>• Discarded</li> <li>• Draft</li> <li>• Error</li> <li>• Finalized</li> <li>• Fully Orchestrated</li> <li>• Hierarchy Creation Deferred</li> <li>• Inactive</li> <li>• Partially Orchestrated</li> <li>• Pending for Approval</li> <li>• Pending for Review</li> <li>• Pending Simulation</li> <li>• Pending for Orchestration</li> <li>• Ready for Approval</li> <li>• Rejected</li> <li>• Simulated</li> <li>• Simulation Deferred</li> </ul>
Customer Tier	Indicates the customer tier of the customer segment to which the entity (i.e. the customer, account, or prospect person) belongs.
Start Date	Displays the date from when the price list, price assignment, and price item pricing is available for the deal.
Acceptance Date	<p>Displays the date when the customer has reviewed and accepted the deal.</p> <p><b>Note:</b> This field is populated when the deal has reached the <b>Customer Accepted</b> status.</p> <p>If the <b>Deal Status</b> is <b>Rejected</b> then the <b>Acceptance Date</b> specifies the date when the deal is rejected by the customer.</p>
Deal Version Status	Indicates the status of the deal version.
Deal Currency	Indicates the currency in which the financial summary and profitability is calculated for the deal.
End Date	Displays the date till when the price list and price assignment is available for the deal.

Field Name	Field Description
Finalized Date	Displays the date when the deal is finalized in the system.
	<b>Note:</b> This field is populated when the deal has reached the <b>Customer Accepted</b> status.
Simulation Type	Indicates the simulation type using which the financial summary and profitability is calculated for the deal. The valid values are: <ul style="list-style-type: none"> <li>• Account</li> <li>• Customer</li> <li>• Deal</li> </ul>
Usage Period	Indicates the period for which you want to aggregate the deal data to determine the scope of the deal. The valid values are: <ul style="list-style-type: none"> <li>• Biannually</li> <li>• Monthly</li> <li>• Quarterly</li> <li>• Yearly</li> </ul>
Deal Frequency	Indicates the duration in which you want to simulate the deal for calculating the financial summary and deal profitability. The valid values are: <ul style="list-style-type: none"> <li>• Biannually</li> <li>• Monthly</li> <li>• Quarterly</li> <li>• Yearly</li> </ul>

In addition, the **Deal Information** zone contains the following links:

Link Name	Link Description
Deal Terms and Conditions	Used to associate, disassociate, or view the deal terms and conditions. It is also used to add adhoc terms and conditions for the deal.
Deal Log	Used to view the complete trail of actions performed on the deal. It also allows you to manually add a log entry for the deal.
Deal Version Log	Used to view the complete trail of actions performed on the deal version. It also allows you to manually add a log entry for the deal version.
Adhoc Revenue and Cost	Used to add, edit, or view additional charges that are applicable for the deal while deal creation.

## Simulation Details

The **Simulation Details** zone allows you to do the following:

- View the deal financial summary
- View the division financial summary
- View the product financial summary
- View the customer hierarchy
- View the assigned price lists of a person or account
- View the proposed price list assignments of a person or account
- View the enrolled products for an account
- View the proposed product enrollments for an account
- View the pricing and commitment details of a person or account
- View the division financial summary in the division currency
- View the product financial summary in the division currency
- View the revenue and cost in the division or account currency

The **Simulation Details** zone contains the following sections:

- **Symbol Legends** - Indicates the symbols used to identify the current status of the deal level, division level, and product level financial summary. It also differentiates the existing, proposed and recommended pricing statistics. It contains the following symbols:

Symbol Name	Symbol Description
 IN APPROVER RANGE	Indicates that the deal level, division level, or product level financial summary is within the limits defined for the user for approval.
 NOT IN APPROVER RANGE	Indicates that the deal level, division level, or product level financial summary is not within the limits defined for the user for approval.
 PROJECTED	Indicates the revenue, cost, and profit generated from the proposed price item pricing and price assignments.
 RECOMMENDED	Indicates the revenue, cost, and profit generated from the recommended price item pricing and price assignments.
 ORIGINAL	Indicates the revenue, cost, and profit generated from the existing price item pricing and price assignments.
 APPROVED	Indicates whether the deal level, division level, or product level financial summary is approved or not.
 PENDING FOR APPROVAL	Indicates that the approval for deal level, division level, or product level financial summary is pending.

- **Deal Financial Summary** - Displays the financial summary at the deal level. It contains the following columns:

Column Name	Column Description
Approval Status	Indicates the current approval status of the financial summary at the deal level.
Revenue	Displays the proposed, recommended, and original revenue generated from the price item pricing and price assignments at the deal level.  <b>Note:</b> If division level approval is required, then the revenue includes the sum of revenues calculated at each division level.
Cost	Displays the proposed, recommended, and original cost calculated at the deal level.  <b>Note:</b> The cost includes the total price item cost and the adhoc cost. If division level approval is required, then the cost includes the sum of costs calculated at each division level.
Profit	Displays the proposed, recommended, and original profit in deal currency generated from the price item pricing and price assignments at the deal level. It is calculated using the following formula:  Profit = Revenue – Cost  <b>Note:</b> If division level approval is required, then the profit includes the sum of profits calculated at each division level.
Profitability (%)	Displays the proposed, recommended, and original profit created in percentage at the deal level from the price item pricing and price assignments. It is calculated using the following formula:  Profitability % = ( Revenue – Cost)*100/ Revenue
Profit Variation (%)	Displays the difference of profit in percentage generated from the original and the proposed price item pricing and commitments at the deal level. It is calculated using the following formula:  Profit Variation (%) = (Proposed Profit – Original Profit)*100/ Original Profit

**Note:** The data in the **Deal Financial Summary** sections appears when the deal has reached the **Simulated** status.

- **Division Financial Summary** - Displays the financial summary at the division level. It contains the following columns:

Column Name	Column Description
Division	Indicates the division for which the financial summary is displayed.
Approval Status	Indicates the current approval status of the financial summary at the division level.
Revenue	Displays the proposed, recommended, and original revenue generated from the price item pricing and price assignments at the division level.

Column Name	Column Description
Cost	Displays the proposed, recommended, and original cost calculated at the division level.
	<b>Note:</b> The cost includes the total price item cost and the adhoc cost.
Profit	Displays the proposed, recommended, and original profit in deal currency generated from the price item pricing and price assignments at the division level. It is calculated using the following formula:  Profit = Revenue – Cost
Profitability (%)	Displays the proposed, recommended, and original profit generated in percentage at the division level from the price item pricing and price assignments. It is calculated using the following formula:  Profitability % = ( Revenue – Cost)*100/ Revenue
Profit Variation (%)	Displays the difference of profit in percentage generated from the original and the proposed price item pricing and commitments at the division level. It is calculated using the following formula:  Profit Variation (%) = (Proposed Profit – Original Profit)*100/ Original Profit

**Note:**

The **Division Financial Summary** sections appears in the **Simulation Details** zone when the **Division Level Approval Required** field is set to **Yes** in the **Deal Type** used for defining the deal.

The data in the **Division Financial Summary** sections appears when the deal has reached the **Simulated** status.

By default, the division financial summary is displayed in the deal currency. You can view the division financial summary in the division currency by clicking the toggle switch towards **Division Currency** available above the financial summary table.

- **Product Financial Summary** - Displays the financial summary at the product level. It contains the following columns:

Column Name	Column Description
Product	Indicates the product whose financial summary is displayed.
Division	Indicates the division to which the product belongs.
Approval Status	Indicates the current approval status of the financial summary at the product level.
Revenue	Displays the proposed, recommended, and original revenue generated from the product.
Cost	Displays the proposed, recommended, and original cost calculated for the product.
	<b>Note:</b> The cost includes the total price item cost and the adhoc cost.
Profit	Displays the proposed, recommended, and original profit in deal currency generated from the price item pricing and price assignments at the product level. It is calculated using the following formula:  Profit = Revenue – Cost

Column Name	Column Description
Profitability (%)	Displays the proposed, recommended, and original profit generated in percentage from the price item pricing and price assignments at the product level . It is calculated using the following formula:  Profitability % = ( Revenue – Cost)*100/ Revenue
Profit Variation (%)	Displays the difference of profit in percentage generated from the original and the proposed price item pricing and commitments at the product level. It is calculated using the following formula:  Profit Variation (%) = (Proposed Profit – Original Profit)*100/ Original Profit

**Note:**

The **Product Financial Summary** sections appears in the **Simulation Details** zone when the **Product Level Approval Required** field is set to **Yes** in the **Deal Type** used for defining the deal.

The data in the **Product Financial Summary** sections appears when the deal has reached the **Simulated** status.

By default, the product financial summary is displayed in the deal currency. You can view the product financial summary in the division currency by clicking the toggle switch towards **Division Currency** available above the financial summary table.

- **Customer Hierarchy** - Indicates the main customer and its associated accounts as well as the child persons and its accounts that are associated with the main customer. It also enables you to do the following:
  - View and edit the pricing and commitments at the person and account level
  - View the revenue variation from the proposed and original pricing and commitments
  - View the proposed price lists of a person or account
  - Assign proposed price list to a person or account
  - View the enrolled products of an account
  - Enroll accounts for a product
  - View the original price list of a person or account
  - View the original enrolled products for an account
  - View the proposed or the original revenue and cost generated at the person an account level.

The **Customer Hierarchy** section contains the following columns:

Column Name	Column Description
Person Name	Indicates the main customer and its related persons and accounts.
Division	Indicates the division to which the main customer and it related persons and accounts are associated.
Pricing and Commitments	On clicking the <b>Edit</b> (✎) icon in the <b>Pricing and Commitments</b> column corresponding to a person or account in the hierarchy, the <b>Pricing and Commitments</b> screen appears where you can view and edit the pricing and commitments of the price items for the respective person or account.  <b>Note:</b> You cannot edit the pricing or commitments of the price items if the deal has reached the <b>Finalized</b> status.

Column Name	Column Description
Status	Indicates the approval status of the price item pricing and price assignments for the respective person or account.
Revenue Variation (%)	Displays the average revenue generated from a customer or account in percentage. It is calculated using the following formula:  Revenue Variation (%) = (Proposed Revenue – Original Revenue)*100/Original Revenue.
Price List Assignment	On clicking the <b>Edit</b> (✎) icon in the <b>Price List Assignment</b> column corresponding to a person or account in the hierarchy, the <b>Price List Assignment</b> screen appears where you can view and assign proposed price list to the respective person or account.  <b>Note:</b> You cannot assign proposed price list to the person or account if the deal has reached the <b>Finalized</b> status.
Product Enrollment	On clicking the <b>Edit</b> (✎) icon in the <b>Product Enrollment</b> column corresponding to the person or account in the hierarchy, the <b>Product Enrollment</b> screen appears where you can view or enroll the respective account or accounts of the customer for a product. You can also view a list of recommended products for which you want to enroll the account or accounts of the customer. The recommended products appear in the <b>Product Enrollment</b> screen when you add products in the <b>Recommended Products</b> section while defining a deal.  <b>Note:</b> You cannot enroll an account for a product if the deal has reached the <b>Finalized</b> status.
Price Item Group Selection	On clicking the <b>Edit</b> (✎) icon in the <b>Price Item Group Selection</b> column corresponding to the main person in the hierarchy, the <b>Select Price Item Group</b> screen appears where you can select and/or deselect the price items and/or hierarchy entities based on which you want to simulate the deal.
Revenue	Indicates the revenue generated by the corresponding person or account in the hierarchy through the proposed price item pricing and commitments.
Cost	Indicates the sum of the proposed costs from all accounts under the customer.  <b>Note:</b> If the person is a parent customer, then the sum of the proposed costs of all the child customers is considered.
Pricelist	On clicking the <b>View</b> (📄) icon in the <b>Price List</b> column corresponding to the person or account in the hierarchy, the <b>Price List Assignment</b> screen appears where you can view the original price list assigned to the respective person or account.
Product	On clicking the <b>Edit</b> (✎) icon in the <b>Product</b> column corresponding to the person or account in the hierarchy, the <b>Product Enrollment</b> screen appears where you can view the products to which the account is already enrolled.
Revenue	Indicates the revenue generated by the corresponding person or account in the hierarchy through the original price item pricing and commitments.

Column Name	Column Description
Cost	Indicates the sum of the original costs from all accounts under the customer.  <b>Note:</b> If the person is a parent customer, then the sum of the original costs of all the child customers is considered.

In addition, the **Simulation Details** zone contains the following buttons:

Button Name	Button Description
Deal Pricing and Commitments	Used to define the consolidated pricing and commitments for the customers or accounts in a deal.
Simulate Deal	Used to perform different types of simulation based on the pricing and commitments of the price item to determine the best price that can be offered to the clients as per their requirements.
Check Limits	Used to execute the price item ceil and floor validation for an approver as per the limits set on the price item screen.  <b>Note:</b> The <b>Check Limits</b> is run only for the price items which are in the <b>Pending for Approval</b> or <b>Error</b> status after the <b>Pricing Simulation</b> is executed. The <b>Check Limits</b> button is activated when the <b>Price Item Approval Required</b> option is set to <b>Yes</b> in the <b>Deal Type</b> using which the deal is created.
Send Deal for Approval	Used to move the deal from the current role to the next role of the next level in the approval hierarchy for approval.  <b>Note:</b> On clicking the <b>Send Deal for Approval</b> button, a To Do notification is created for the users of the next level to indicate that approval of the deal is required. A To Do is also created for the creator (i.e. the Relationship Manager) of the deal to indicate that the ownership of the deal has changed. This button is activated after <b>Pricing Simulation</b> is completed for the deal and if the <b>Approve Deal</b> option is set to <b>Yes</b> for the approver in the <b>Approval Hierarchy</b> of the <b>Deal Approval Profile</b> .

Button Name	Button Description
Approve Deal	<p>Used to approve the deal. To approve a deal the following conditions should be met:</p> <ul style="list-style-type: none"> <li>• All the price items should be in the <b>Approved</b> status if the <b>Price Item Approval Required</b> option is set to <b>Yes</b> in the <b>Deal Type</b> used for creating the deal.</li> <li>• All the division level approvals must be completed if the <b>Division Level Approval Required</b> field is set to <b>Yes</b> in the <b>Deal Type</b> used for creating the deal.</li> <li>• All the product level approvals must be completed if the <b>Product Level Approval Required</b> field is set to <b>Yes</b> in the <b>Deal Type</b> used for creating the deal.</li> <li>• The deal should be in the <b>Ready for Approval</b> status for the approver to initiate the deal approval process.</li> </ul> <p><b>Note:</b></p> <p>The <b>Approve Deal</b> button is activated only when the deal is in the <b>Ready for Approval</b> status and the <b>Approve Deal</b> option is set to <b>Yes</b> for the approver in the <b>Approval Hierarchy</b> of the <b>Deal Approval Profile</b>.</p>
Return to Submitter	<p>Used to move the deal from the current role to the previous role of the previous level in the approval hierarchy for approval. It is also used to send the deal to the relationship manager for approval if you have recommended a new pricing for the price item.</p> <p><b>Note:</b></p> <p>On clicking the <b>Return to Submitter</b> button, a To Do notification is created for the users of the previous level to indicate that the deal is returned for approval.</p> <p>A To Do is also created for the creator (i.e. the Relationship Manager) of the deal to indicate that the ownership of the deal has changed.</p>
Finalize Deal	<p>Used to finalize the deal so that it is ready to be presented to the customer for approval.</p> <p><b>Note:</b> This button is activated when the deal is in the <b>Approved</b> status.</p> <p><b>Tip:</b> You can also finalize a deal by clicking the <b>Finalize</b> (  ) icon in the <b>Finalize Deal</b> column corresponding to the deal in the <b>Search Deal</b> zone of the <b>Deal Dashboard</b> screen.</p>
Accept Deal	<p>Used to accept the deal in the system after receiving confirmation of acceptance from the customer.</p> <p><b>Note:</b> This button is activated only when the deal is in the <b>Finalized</b> status.</p> <p><b>Tip:</b> You can also accept a deal by clicking the <b>Accept</b> (  ) icon in the <b>Accept Deal</b> column corresponding to the deal in the <b>Search Deal</b> zone of the <b>Deal Dashboard</b> screen.</p>

Button Name	Button Description
Reject Deal	Used to reject the deal in the system after receiving confirmation of rejection from the customer.
	<b>Note:</b> This button is activated only when the deal is in the <b>Finalized</b> status.
	<b>Tip:</b> You can also reject a deal by clicking the <b>Reject</b> (✖) icon in the <b>Reject Deal</b> column corresponding to the deal in the <b>Search Deal</b> zone of the <b>Deal Dashboard</b> screen.
Create Deal Version	Used to create a deal version for the existing deal to optimize the deal pricing process and to make better pricing decisions.
	<b>Note:</b> This button is deactivated once the deal has reached the <b>Approved</b> status.
Discard Deal	Used to discard the deal.
	<b>Note:</b> You cannot discard a deal if it has reached the <b>Finalized</b> status.
Print Deal	Used to extract relevant information about the deal in the pdf or excel format which is published either to the customer for receiving approvals or for internal reviews and validations.
Apply Back	Used to activate the proposed pricelist assignments, overridden pricing, and product enrollments for the existing customer or account in the system.
Previous	Used to view information about the previous status of the deal.

## Deal Information - Discarded

You can view the **Deal Information - Discarded** page of a deal when the deal is in the **Discarded** status. It contains the following zones:

- [Deal Information](#) on page 2892
- [Simulation Details](#) on page 2895

### Note:

You cannot discard a deal if it has reached the **Finalized** status.

If you discard a deal version, the status of the deal for which the deal version is created is changed to **Discarded**.

## Deal Information

The **Deal Information** zone allows you to do the following:

- View the details of the deal
- Associate, disassociate, view, or edit the terms and conditions of the deal

- View and add log entries for the deal or deal version
- View and add adhoc revenue charges for the deal or deal version

Field Name	Field Description
Deal Information	Displays the concatenated string of information about the deal separated by a comma (,).
Division	Indicates the division with which the deal is associated.
Deal Type	Indicates the deal type using which the deal is created in the system.
Review Date	Displays the date which is scheduled for calculating the deal usage as per the commitments made by the customer.
	<b>Note:</b> This field is populated when the deal has reached the <b>Full Orchestrated</b> status.
Deal Version Information	Displays the concatenated string of information about the deal version separated by a comma (,).
Access Group	Indicates the group of users who can view and edit the details of the entity (i.e. the customer, account, or prospect person) for which the deal is created.
Review Frequency	Indicates the duration for which the deal is monitored to calculate the usage of the deal as per the commitments made by the customer.
Effective Start Date	Displays the date from when the deal is effective for the entity (i.e. the customer, account, or prospect person).
	<b>Note:</b> This field is populated when the deal has reached the <b>Customer Accepted</b> status.
Deal Description	Displays the description of the deal.
Customer Segment	Displays the business component to which the entity (i.e. the customer, account, or prospect person) belongs.
Creation Date	Displays the date when the deal is created in the system.
Effective End Date	Displays the date till when the deal is effective for the entity (i.e. the customer, account, or prospect person).
	<b>Note:</b> This field is populated when the deal has reached the <b>Customer Accepted</b> status.

Field Name	Field Description
Deal Status	<p>Indicates the current status of the deal. The valid values are:</p> <ul style="list-style-type: none"> <li>• Applied/Processed</li> <li>• Approved</li> <li>• Closed</li> <li>• Customer Accepted</li> <li>• Discarded</li> <li>• Draft</li> <li>• Error</li> <li>• Finalized</li> <li>• Fully Orchestrated</li> <li>• Hierarchy Creation Deferred</li> <li>• Inactive</li> <li>• Partially Orchestrated</li> <li>• Pending for Approval</li> <li>• Pending for Review</li> <li>• Pending Simulation</li> <li>• Pending for Orchestration</li> <li>• Ready for Approval</li> <li>• Rejected</li> <li>• Simulated</li> <li>• Simulation Deferred</li> </ul>
Customer Tier	Indicates the customer tier of the customer segment to which the entity (i.e. the customer, account, or prospect person) belongs.
Start Date	Displays the date from when the price list, price assignment, and price item pricing is available for the deal.
Acceptance Date	<p>Displays the date when the customer has reviewed and accepted the deal.</p> <p><b>Note:</b> This field is populated when the deal has reached the <b>Customer Accepted</b> status.</p> <p>If the <b>Deal Status</b> is <b>Rejected</b> then the <b>Acceptance Date</b> specifies the date when the deal is rejected by the customer.</p>
Deal Version Status	Indicates the status of the deal version.
Deal Currency	Indicates the currency in which the financial summary and profitability is calculated for the deal.
End Date	Displays the date till when the price list and price assignment is available for the deal.

Field Name	Field Description
Finalized Date	Displays the date when the deal is finalized in the system.
	<b>Note:</b> This field is populated when the deal has reached the <b>Customer Accepted</b> status.
Simulation Type	Indicates the simulation type using which the financial summary and profitability is calculated for the deal. The valid values are: <ul style="list-style-type: none"> <li>• Account</li> <li>• Customer</li> <li>• Deal</li> </ul>
Usage Period	Indicates the period for which you want to aggregate the deal data to determine the scope of the deal. The valid values are: <ul style="list-style-type: none"> <li>• Biannually</li> <li>• Monthly</li> <li>• Quarterly</li> <li>• Yearly</li> </ul>
Deal Frequency	Indicates the duration in which you want to simulate the deal for calculating the financial summary and deal profitability. The valid values are: <ul style="list-style-type: none"> <li>• Biannually</li> <li>• Monthly</li> <li>• Quarterly</li> <li>• Yearly</li> </ul>

In addition, the **Deal Information** zone contains the following links:

Link Name	Link Description
Deal Terms and Conditions	Used to associate, disassociate, or view the deal terms and conditions. It is also used to add adhoc terms and conditions for the deal.
Deal Log	Used to view the complete trail of actions performed on the deal. It also allows you to manually add a log entry for the deal.
Deal Version Log	Used to view the complete trail of actions performed on the deal version. It also allows you to manually add a log entry for the deal version.
Adhoc Revenue and Cost	Used to add, edit, or view additional charges that are applicable for the deal while deal creation.

## Simulation Details

The **Simulation Details** zone allows you to do the following:

- View the deal financial summary
- View the division financial summary
- View the product financial summary
- View the customer hierarchy
- View the assigned price lists of a person or account
- View the proposed price list assignments of a person or account
- View the enrolled products for an account
- View the proposed product enrollments for an account
- View the pricing and commitment details of a person or account
- View the division financial summary in the division currency
- View the product financial summary in the division currency
- View the revenue and cost in the division or account currency

The **Simulation Details** zone contains the following sections:

- **Symbol Legends** - Indicates the symbols used to identify the current status of the deal level, division level, and product level financial summary. It also differentiates the existing, proposed and recommended pricing statistics. It contains the following symbols:

Symbol Name	Symbol Description
 IN APPROVER RANGE	Indicates that the deal level, division level, or product level financial summary is within the limits defined for the user for approval.
 NOT IN APPROVER RANGE	Indicates that the deal level, division level, or product level financial summary is not within the limits defined for the user for approval.
 PROJECTED	Indicates the revenue, cost, and profit generated from the proposed price item pricing and price assignments.
 RECOMMENDED	Indicates the revenue, cost, and profit generated from the recommended price item pricing and price assignments.
 ORIGINAL	Indicates the revenue, cost, and profit generated from the existing price item pricing and price assignments.
 APPROVED	Indicates whether the deal level, division level, or product level financial summary is approved or not.
 PENDING FOR APPROVAL	Indicates that the approval for deal level, division level, or product level financial summary is pending.

- **Deal Financial Summary** - Displays the financial summary at the deal level. It contains the following columns:

Column Name	Column Description
Approval Status	Indicates the current approval status of the financial summary at the deal level.
Revenue	Displays the proposed, recommended, and original revenue generated from the price item pricing and price assignments at the deal level.  <b>Note:</b> If division level approval is required, then the revenue includes the sum of revenues calculated at each division level.
Cost	Displays the proposed, recommended, and original cost calculated at the deal level.  <b>Note:</b> The cost includes the total price item cost and the adhoc cost. If division level approval is required, then the cost includes the sum of costs calculated at each division level.
Profit	Displays the proposed, recommended, and original profit in deal currency generated from the price item pricing and price assignments at the deal level. It is calculated using the following formula:  Profit = Revenue – Cost  <b>Note:</b> If division level approval is required, then the profit includes the sum of profits calculated at each division level.
Profitability (%)	Displays the proposed, recommended, and original profit created in percentage at the deal level from the price item pricing and price assignments. It is calculated using the following formula:  Profitability % = ( Revenue – Cost)*100/ Revenue
Profit Variation (%)	Displays the difference of profit in percentage generated from the original and the proposed price item pricing and commitments at the deal level. It is calculated using the following formula:  Profit Variation (%) = (Proposed Profit – Original Profit)*100/ Original Profit

**Note:** The data in the **Deal Financial Summary** sections appears when the deal has reached the **Simulated** status.

- **Division Financial Summary** - Displays the financial summary at the division level. It contains the following columns:

Column Name	Column Description
Division	Indicates the division for which the financial summary is displayed.
Approval Status	Indicates the current approval status of the financial summary at the division level.
Revenue	Displays the proposed, recommended, and original revenue generated from the price item pricing and price assignments at the division level.

Column Name	Column Description
Cost	Displays the proposed, recommended, and original cost calculated at the division level.
	<b>Note:</b> The cost includes the total price item cost and the adhoc cost.
Profit	Displays the proposed, recommended, and original profit in deal currency generated from the price item pricing and price assignments at the division level. It is calculated using the following formula:  Profit = Revenue – Cost
Profitability (%)	Displays the proposed, recommended, and original profit generated in percentage at the division level from the price item pricing and price assignments. It is calculated using the following formula:  Profitability % = ( Revenue – Cost)*100/ Revenue
Profit Variation (%)	Displays the difference of profit in percentage generated from the original and the proposed price item pricing and commitments at the division level. It is calculated using the following formula:  Profit Variation (%) = (Proposed Profit – Original Profit)*100/ Original Profit

**Note:**

The **Division Financial Summary** sections appears in the **Simulation Details** zone when the **Division Level Approval Required** field is set to **Yes** in the **Deal Type** used for defining the deal.

The data in the **Division Financial Summary** sections appears when the deal has reached the **Simulated** status.

By default, the division financial summary is displayed in the deal currency. You can view the division financial summary in the division currency by clicking the toggle switch towards **Division Currency** available above the financial summary table.

- **Product Financial Summary** - Displays the financial summary at the product level. It contains the following columns:

Column Name	Column Description
Product	Indicates the product whose financial summary is displayed.
Division	Indicates the division to which the product belongs.
Approval Status	Indicates the current approval status of the financial summary at the product level.
Revenue	Displays the proposed, recommended, and original revenue generated from the product.
Cost	Displays the proposed, recommended, and original cost calculated for the product.
	<b>Note:</b> The cost includes the total price item cost and the adhoc cost.
Profit	Displays the proposed, recommended, and original profit in deal currency generated from the price item pricing and price assignments at the product level. It is calculated using the following formula:  Profit = Revenue – Cost

Column Name	Column Description
Profitability (%)	Displays the proposed, recommended, and original profit generated in percentage from the price item pricing and price assignments at the product level . It is calculated using the following formula:  Profitability % = ( Revenue – Cost)*100/ Revenue
Profit Variation (%)	Displays the difference of profit in percentage generated from the original and the proposed price item pricing and commitments at the product level. It is calculated using the following formula:  Profit Variation (%) = (Proposed Profit – Original Profit)*100/ Original Profit

**Note:**

The **Product Financial Summary** sections appears in the **Simulation Details** zone when the **Product Level Approval Required** field is set to **Yes** in the **Deal Type** used for defining the deal.

The data in the **Product Financial Summary** sections appears when the deal has reached the **Simulated** status.

By default, the product financial summary is displayed in the deal currency. You can view the product financial summary in the division currency by clicking the toggle switch towards **Division Currency** available above the financial summary table.

- **Customer Hierarchy** - Indicates the main customer and its associated accounts as well as the child persons and its accounts that are associated with the main customer. It also enables you to do the following:
  - View and edit the pricing and commitments at the person and account level
  - View the revenue variation from the proposed and original pricing and commitments
  - View the proposed price lists of a person or account
  - Assign proposed price list to a person or account
  - View the enrolled products of an account
  - Enroll accounts for a product
  - View the original price list of a person or account
  - View the original enrolled products for an account
  - View the proposed or the original revenue and cost generated at the person an account level.

The **Customer Hierarchy** section contains the following columns:

Column Name	Column Description
Person Name	Indicates the main customer and its related persons and accounts.
Division	Indicates the division to which the main customer and it related persons and accounts are associated.
Pricing and Commitments	On clicking the <b>Edit</b> (✎) icon in the <b>Pricing and Commitments</b> column corresponding to a person or account in the hierarchy, the <b>Pricing and Commitments</b> screen appears where you can view and edit the pricing and commitments of the price items for the respective person or account.  <b>Note:</b> You cannot edit the pricing or commitments of the price items if the deal has reached the <b>Finalized</b> status.

Column Name	Column Description
Status	Indicates the approval status of the price item pricing and price assignments for the respective person or account.
Revenue Variation (%)	Displays the average revenue generated from a customer or account in percentage. It is calculated using the following formula:  Revenue Variation (%) = (Proposed Revenue – Original Revenue)*100/Original Revenue.
Price List Assignment	On clicking the <b>Edit</b> (✎) icon in the <b>Price List Assignment</b> column corresponding to a person or account in the hierarchy, the <b>Price List Assignment</b> screen appears where you can view and assign proposed price list to the respective person or account.  <b>Note:</b> You cannot assign proposed price list to the person or account if the deal has reached the <b>Finalized</b> status.
Product Enrollment	On clicking the <b>Edit</b> (✎) icon in the <b>Product Enrollment</b> column corresponding to the person or account in the hierarchy, the <b>Product Enrollment</b> screen appears where you can view or enroll the respective account or accounts of the customer for a product. You can also view a list of recommended products for which you want to enroll the account or accounts of the customer. The recommended products appear in the <b>Product Enrollment</b> screen when you add products in the <b>Recommended Products</b> section while defining a deal.  <b>Note:</b> You cannot enroll an account for a product if the deal has reached the <b>Finalized</b> status.
Price Item Group Selection	On clicking the <b>Edit</b> (✎) icon in the <b>Price Item Group Selection</b> column corresponding to the main person in the hierarchy, the <b>Select Price Item Group</b> screen appears where you can select and/or deselect the price items and/or hierarchy entities based on which you want to simulate the deal.
Revenue	Indicates the revenue generated by the corresponding person or account in the hierarchy through the proposed price item pricing and commitments.
Cost	Indicates the sum of the proposed costs from all accounts under the customer.  <b>Note:</b> If the person is a parent customer, then the sum of the proposed costs of all the child customers is considered.
Pricelist	On clicking the <b>View</b> (📄) icon in the <b>Price List</b> column corresponding to the person or account in the hierarchy, the <b>Price List Assignment</b> screen appears where you can view the original price list assigned to the respective person or account.
Product	On clicking the <b>Edit</b> (✎) icon in the <b>Product</b> column corresponding to the person or account in the hierarchy, the <b>Product Enrollment</b> screen appears where you can view the products to which the account is already enrolled.
Revenue	Indicates the revenue generated by the corresponding person or account in the hierarchy through the original price item pricing and commitments.

Column Name	Column Description
Cost	Indicates the sum of the original costs from all accounts under the customer.  <b>Note:</b> If the person is a parent customer, then the sum of the original costs of all the child customers is considered.

In addition, the **Simulation Details** zone contains the following buttons:

Button Name	Button Description
Deal Pricing and Commitments	Used to define the consolidated pricing and commitments for the customers or accounts in a deal.
Simulate Deal	Used to perform different types of simulation based on the pricing and commitments of the price item to determine the best price that can be offered to the clients as per their requirements.
Check Limits	Used to execute the price item ceil and floor validation for an approver as per the limits set on the price item screen.  <b>Note:</b> The <b>Check Limits</b> is run only for the price items which are in the <b>Pending for Approval</b> or <b>Error</b> status after the <b>Pricing Simulation</b> is executed. The <b>Check Limits</b> button is activated when the <b>Price Item Approval Required</b> option is set to <b>Yes</b> in the <b>Deal Type</b> using which the deal is created.
Send Deal for Approval	Used to move the deal from the current role to the next role of the next level in the approval hierarchy for approval.  <b>Note:</b> On clicking the <b>Send Deal for Approval</b> button, a To Do notification is created for the users of the next level to indicate that approval of the deal is required. A To Do is also created for the creator (i.e. the Relationship Manager) of the deal to indicate that the ownership of the deal has changed. This button is activated after <b>Pricing Simulation</b> is completed for the deal and if the <b>Approve Deal</b> option is set to <b>Yes</b> for the approver in the <b>Approval Hierarchy</b> of the <b>Deal Approval Profile</b> .

Button Name	Button Description
Approve Deal	<p>Used to approve the deal. To approve a deal the following conditions should be met:</p> <ul style="list-style-type: none"> <li>• All the price items should be in the <b>Approved</b> status if the <b>Price Item Approval Required</b> option is set to <b>Yes</b> in the <b>Deal Type</b> used for creating the deal.</li> <li>• All the division level approvals must be completed if the <b>Division Level Approval Required</b> field is set to <b>Yes</b> in the <b>Deal Type</b> used for creating the deal.</li> <li>• All the product level approvals must be completed if the <b>Product Level Approval Required</b> field is set to <b>Yes</b> in the <b>Deal Type</b> used for creating the deal.</li> <li>• The deal should be in the <b>Ready for Approval</b> status for the approver to initiate the deal approval process.</li> </ul> <p><b>Note:</b></p> <p>The <b>Approve Deal</b> button is activated only when the deal is in the <b>Ready for Approval</b> status and the <b>Approve Deal</b> option is set to <b>Yes</b> for the approver in the <b>Approval Hierarchy</b> of the <b>Deal Approval Profile</b>.</p>
Return to Submitter	<p>Used to move the deal from the current role to the previous role of the previous level in the approval hierarchy for approval. It is also used to send the deal to the relationship manager for approval if you have recommended a new pricing for the price item.</p> <p><b>Note:</b></p> <p>On clicking the <b>Return to Submitter</b> button, a To Do notification is created for the users of the previous level to indicate that the deal is returned for approval.</p> <p>A To Do is also created for the creator (i.e. the Relationship Manager) of the deal to indicate that the ownership of the deal has changed.</p>
Finalize Deal	<p>Used to finalize the deal so that it is ready to be presented to the customer for approval.</p> <p><b>Note:</b> This button is activated when the deal is in the <b>Approved</b> status.</p> <p><b>Tip:</b> You can also finalize a deal by clicking the <b>Finalize</b> (  ) icon in the <b>Finalize Deal</b> column corresponding to the deal in the <b>Search Deal</b> zone of the <b>Deal Dashboard</b> screen.</p>
Accept Deal	<p>Used to accept the deal in the system after receiving confirmation of acceptance from the customer.</p> <p><b>Note:</b> This button is activated only when the deal is in the <b>Finalized</b> status.</p> <p><b>Tip:</b> You can also accept a deal by clicking the <b>Accept</b> (  ) icon in the <b>Accept Deal</b> column corresponding to the deal in the <b>Search Deal</b> zone of the <b>Deal Dashboard</b> screen.</p>

Button Name	Button Description
Reject Deal	Used to reject the deal in the system after receiving confirmation of rejection from the customer.
	<b>Note:</b> This button is activated only when the deal is in the <b>Finalized</b> status.
	<b>Tip:</b> You can also reject a deal by clicking the <b>Reject</b> (✖) icon in the <b>Reject Deal</b> column corresponding to the deal in the <b>Search Deal</b> zone of the <b>Deal Dashboard</b> screen.
Create Deal Version	Used to create a deal version for the existing deal to optimize the deal pricing process and to make better pricing decisions.
	<b>Note:</b> This button is deactivated once the deal has reached the <b>Approved</b> status.
Discard Deal	Used to discard the deal.
	<b>Note:</b> You cannot discard a deal if it has reached the <b>Finalized</b> status.
Print Deal	Used to extract relevant information about the deal in the pdf or excel format which is published either to the customer for receiving approvals or for internal reviews and validations.
Apply Back	Used to activate the proposed pricelist assignments, overridden pricing, and product enrollments for the existing customer or account in the system.
Previous	Used to view information about the previous status of the deal.

## Pricing and Commitments

The **Pricing and Commitments** section allows you to do the following:

- View the original and proposed commitments of a price item
- View the original and proposed pricing of a price item
- Viewing the original pricing and commitments of a person or an account
- View the pricing and commitments of a person in the division currency
- View the pricing and commitments of an account in the account's invoice currency
- Approve pricing of a price item
- Submit a price item for approval
- Recommend a new pricing for a price item
- View the deal-specific terms and conditions of a price item or a hierarchy entity
- Edit the deal-specific terms and conditions of a price item or a hierarchy entity
- 

The **Pricing and Commitments** section contains the following sub-sections:

- **Symbol Legends** - Used to differentiate between the original, proposed, recommended, and changed pricing and commitments of the price item. It contains the following color codes:

Symbol Name	Symbol Description
 PROJECTED	Indicates the proposed price item pricing and commitments.
 RECOMMENDED	Indicates the recommended price item pricing and commitments.
 ORIGINAL	Indicates the original price item pricing and commitments.
 CHANGED	Indicates the changed price item pricing and commitments.

- **Price Item Hierarchy** - Lists the price items and its pricing and commitments information along with the price item hierarchy associated with the person or account. It contains the following columns:

Column Name	Column Description
Price Item Hierarchy	<p>Displays the price item, non-root level hierarchy entity, and root level hierarchy entity associated with the person or account.</p> <p><b>Note:</b></p> <p>The hierarchy entities and price items are sorted in the price item hierarchy based on their respective sort sequence.</p> <p>If two or more hierarchy entities and price items have the same sort sequence, then the system sorts them in the ascending alphabetical order of the information string.</p> <p>Also, if the sort sequence is not defined for the hierarchy entities and price items, then the system sorts them in the ascending alphabetical order of the information string.</p>

Column Name	Column Description
Parameters	Indicates the parameters using which the pricing for the price item is defined.
Start Date	<p data-bbox="691 291 1365 321">Displays the date from when the price item pricing is effective.</p> <p data-bbox="691 350 756 380"><b>Note:</b></p> <p data-bbox="691 401 1463 459">This column appears only when you define a seasonal pricing for the price item.</p> <p data-bbox="691 489 1463 548">The <b>Expand or Collapse</b> (  ) icon appears in the <b>Start Date</b> column corresponding to the proposed pricing of the price item.</p> <p data-bbox="691 577 1463 636">On clicking the <b>Expand or Collapse</b> icon, you can view the row for seasonal pricing of the price item.</p>
End Date	<p data-bbox="691 686 1341 716">Displays the date till when the price item pricing is effective.</p> <p data-bbox="691 745 1463 804"><b>Note:</b> This column appears only when you define a seasonal pricing for the price item.</p>
Pricing Information	<p data-bbox="691 846 1463 938">Displays the concatenated string of information about the proposed, original, recommended, and changed price item pricing separated by a comma (,).</p> <p data-bbox="691 968 756 997"><b>Note:</b></p> <p data-bbox="691 1018 1463 1110">It has a link. On clicking the link, the <b>Pricing and Commitments</b> screen appears where you can view the details of the original and proposed price item pricing.</p> <p data-bbox="691 1140 1463 1262">The <b>Delete</b> (  ) icon appears in the <b>Pricing Information</b> column corresponding to the proposed, seasonal, and recommended pricing of the price item. On clicking the <b>Delete</b> icon, you can delete the proposed, seasonal, and recommended pricing of the price item.</p> <p data-bbox="691 1291 1463 1383">The <b>Delete</b> icon appears corresponding to the proposed pricing only when its price assignment level is different from the price assignment level of the original pricing.</p> <p data-bbox="691 1413 1463 1472">The recommended pricing of the price item can only be deleted by the approver who has recommended the new price for the price item.</p> <p data-bbox="691 1501 1463 1560">The <b>Expand or Collapse</b> (  ) icon appears in the <b>Pricing Information</b> column corresponding to the proposed pricing of the price item.</p> <p data-bbox="691 1589 1463 1648">On clicking the <b>Expand or Collapse</b> icon, you can view the row for original pricing of the price item.</p> <p data-bbox="691 1677 1463 1736">You can also edit or override the proposed pricing of the price item through this screen.</p> <p data-bbox="691 1766 1463 1845">You can directly change the rate of a price item from this screen when there is only one price component in the pricing and the pricing is negotiable for the price item.</p>

Column Name	Column Description
Average Price	<p>Displays the average proposed, original, and recommended cost of the price item as per the proposed, original, and recommended commitments respectively. It is calculated using the following formula:</p> <p>Avg. Price = Proposed Revenue/Proposed Usage</p> <p>Avg. Price = Original Revenue/Original Usage</p> <p>Avg. Price = Recommended Revenue/Recommended Usage</p>
Volume	<p>On clicking the <b>Edit</b>  icon corresponding to a price item, the <b>Pricing and Commitments</b> screen appears where you can view the original and proposed commitments of the price item. Whereas, on clicking the <b>View</b> icon  corresponding to a hierarchy entity, the <b>Pricing and Commitments</b> screen appears where you can view the original and proposed commitments of the price item at the hierarchy entity level.</p> <p><b>Note:</b> You can directly change the proposed commitment of a price item when there is only one SQI used in the SQI-based billable charges.</p>
Revenue	<p>Displays the proposed, original, and recommended revenue generated from the proposed, original, and recommended price item pricing and commitments respectively.</p>
Revenue Variation (%)	<p>Displays the variation between the original, proposed, and recommended revenue in percentage generated from the original, proposed, and recommended pricing of the price item. It is calculated using the following formula:</p> <p>Revenue Variation (%) = (Proposed Revenue – Original Revenue)*100/Original Revenue.</p>
Cost	<p>Displays the proposed, original, and recommended cost of the price item based on the proposed, original, and recommended usage.</p>
Price List Information	<p>Indicates the price list from where the proposed and original pricing of the price item is derived for the person or account in the customer hierarchy.</p>

Column Name	Column Description
Assignment Level	<p>Indicates the level at which the proposed and original pricing of the price item is defined in the customer hierarchy. The valid values are:</p> <ul style="list-style-type: none"> <li>• <b>Account Agreed</b> - Indicates whether the price item pricing is agreed for the account.</li> <li>• <b>Account Inherited Price List</b> - Indicates whether the price item pricing is inherited from the parent price list hierarchy defined for the price list which is assigned to the account.</li> <li>• <b>Account Price List</b> - Indicates whether the price item pricing is defined in the price list which is assigned to the account.</li> <li>• <b>Bundle Pricing</b> - Indicates whether the price item pricing is defined for the bundle which is available for the retail banking.</li> <li>• <b>Customer Agreed</b> - Indicates whether the price item pricing is agreed for the customer in the customer hierarchy.</li> <li>• <b>Customer Inherited Price List</b> - Indicates whether the price item pricing is inherited from the parent price list hierarchy defined for the price list which is assigned to the customer.</li> <li>• <b>Customer Price List</b> - Indicates whether the price item pricing is defined in the price list which is assigned to the customer.</li> <li>• <b>Default Price List</b> - Indicates whether the price item pricing defined in the price list is available in the default price list.</li> <li>• <b>Global Price List</b> - Indicates whether the price item pricing defined in the price list is available in the global price list.</li> <li>• <b>Market Product Pricing</b> - Indicates whether the price item pricing is defined for the market product which is available for the retail banking.</li> <li>• <b>Offer Pricing</b> - Indicates whether the price item pricing is defined for the offer which is available for the retail banking.</li> <li>• <b>Parent Customer Agreed</b> - Indicates whether the price item pricing is agreed for the parent customer in the customer hierarchy.</li> <li>• <b>Parent Customer Inherited Price List</b> - Indicates whether the price item pricing is inherited from the parent price list hierarchy defined for the price list which is assigned to the parent customer.</li> <li>• <b>Parent Customer Price List</b> - Indicates whether the price item pricing is defined in the price list which is assigned to the parent customer.</li> <li>• <b>Price List</b> - Indicates whether the price item pricing is defined in the price list.</li> <li>• <b>Product Pricing</b> - Indicates whether the price item pricing defined in the price list is available for the product pricing.</li> </ul>
Status	Indicates the current approval status of the price item pricing and commitments.
Approver	Indicates the user who has approved the price item pricing and commitments.

Column Name	Column Description
Terms and Conditions	On clicking the <b>Edit</b> (✎) icon, the <b>Mapping Terms and Conditions</b> screen appears where you can view or delete the deal-specific terms and conditions associated with the price item.

**Note:**

In addition, a check box appears corresponding to the price item which is assigned to the user for approval.

By default, you can view the proposed and recommended pricing details of the price item in the price item hierarchy table. To view or hide the original pricing details of the price item, click the **Original Data** toggle switch available in the **Pricing and Commitments** section.

By default, the price item pricing details are displayed in the deal currency. You can view the price item pricing details in the division currency by clicking the **Currency** toggle switch available in the **Pricing and Commitments** section.

In addition, the **Pricing and Commitments** section contains the following buttons:

Button Name	Button Description
Send Price Items for Approval	<p>On clicking the <b>Send Price Items for Approval</b> button, the status of the price item is changed to <b>Assigned to Price Item Manager</b>.</p> <p><b>Note:</b> An approver can send a price item for approval when the following conditions are met:</p> <ul style="list-style-type: none"> <li>• The price item is assigned to the approver for approval</li> <li>• The <b>Propose Pricing</b> option is set to <b>Yes</b> in the <b>Deal Approval Profile</b> for the approver</li> <li>• The <b>Submit Price Item for Approval</b> option is set to <b>Yes</b> in the <b>Deal Approval Profile</b> for the approver</li> </ul>
Check Limits	<p>On clicking the <b>Check Limits</b> button the system verifies whether the average price of the price item falls within the floor and ceil values defined for the approver in the price item screen.</p> <p><b>Note:</b></p> <p>If the average price falls within the floor and ceil values defined for the approver, then the status of the price item is changed to <b>Approved</b>.</p> <p>If the average price does not fall within the floor and ceil values defined for the approver, then the status of the price item is changed to <b>Pending For Approval</b>.</p>

## Filtering the Pricing of a Person or an Account

### Procedure

To filter the pricing of a person or an account:

1. Search for the deal in the **Search Deal** zone of the **Deal Dashboard** screen.
2. In the **Search Results** section, click the link in the **Deal Information** column corresponding to the deal whose persons or accounts pricing you want to filter.  
The **Deal Information** screen appears.
3. Ensure that the **Customer Hierarchy** section is expanded in the **Simulation Details** zone.
4. Click the **Edit** (✎) icon in the **Pricing and Commitments** column corresponding to the person or account whose pricing you want to filter.  
The **Pricing and Commitments** screen appears.
5. Ensure that the **Filters** section is expanded in the **Pricing and Commitments** screen.  
The **Filters** section contains the following fields:

Field Name	Field Description
Search	Used to search for the pricing and commitments of a price item associated with a person or account using a specific search criteria.
Effective Date	Used to search for price items pricing whose effective date is later than the deal start date.

In addition, the **Filters** section contains the following buttons:

Button Name	Button Description
Search	Used to search for price item pricing as per the criteria specified in the <b>Search</b> or <b>Effective Date</b> fields.
Show All Pricing	Used to show all the pricing and commitments of the price items associated with the person or account in the customer hierarchy.
Show Customer or Account Level Pricing	Used to filter customer agreed or account agreed price item pricing for the person or account in the customer hierarchy.
Show Changed Data	Used to display the following for the existing customer, account, or prospect: <ul style="list-style-type: none"> <li>• Agreed pricing of a price item assigned to the customer, account, or prospect in the deal</li> <li>• Seasonal pricing of a price item assigned to the customer, account, or prospect in the deal</li> <li>• Proposed pricing of a price item from the price list with higher priority when the pricing is inherited from two or more price lists assigned to the customer, account, or prospect</li> <li>• Proposed pricing of a price item which is edited in the deal</li> <li>• Price item pricing whose default or reference commitments are edited in the deal</li> <li>• Price item pricing for which commitments are added in the deal from the Pricing and Commitments screen</li> <li>• Price item pricing where there is difference between original and proposed cost</li> <li>• Price item pricing where there is difference between original and proposed average price</li> <li>• Price item pricing where there is difference between original and proposed revenue</li> </ul>

6. Enter the required details in the **Filters** section.

7. Click **Search**.

The pricing of the person or the account is filtered in the **Pricing and Commitments** section.

## Approving Pricing of a Price Item

### Procedure

To approve a price item in a deal:

1. In the **Simulation Details** zone, click the **Edit** (✎) icon in the **Pricing and Commitments** column corresponding to the person or account whose price item pricing you want to approve.  
The **Pricing and Commitments** screen appears.
2. In the **Pricing and Commitments** section, ensure that the **Price Item Hierarchy** sub-section is expanded when you are approving the pricing of a price item.
3. Click the check box corresponding to the price item that you want to approve for the deal.

**Note:**

The check box appears when the price item is assigned to the user for approval.

You can select multiple price items at a time for approving.

The **Check Limits** button is activated.

4. Click the **Check Limits** button.  
A message appears confirming the approval status of the price item.
5. Click **OK**  
The price item is approved for the deal.

**Note:**

The price item can be approved by the approver when the average price of the price item falls within the floor and ceil values defined for the approver in the price item screen.

If the average price of the price item falls within the floor and ceil values defined for the approver, then the status of the price item is changed to **Approved**.

If the average price of the price item does not fall within the floor and ceil values defined for the approver, then the status of the price item is changed to **Pending For Approval**.

## Selecting a Price Item or Hierarchy Entity

### Procedure

To select a price item or hierarchy entity:

- Do either of the following:

If you want to...	Then...
Select a price item or hierarchy entity from the Deal Information screen	<ol style="list-style-type: none"> <li>Search for the deal in the <b>Search Deal</b> zone of the <b>Deal Dashboard</b> screen.</li> <li>In the <b>Search Results</b> section, click the <b>Broadcast</b> (📡) icon corresponding to the deal for which you want to select the price item or hierarchy entity.  The <b>Deal Versions</b> zone appears.</li> <li>In the <b>Deal Versions</b> zone, click the deal version in the <b>Deal Version Information</b> column for which you want to select the price item or hierarchy entity.</li> </ol>

If you want to...	Then...
	<p>The <b>Deal Information</b> screen appears.</p> <ol style="list-style-type: none"> <li>4. Ensure that the customer hierarchy is expanded in the <b>Simulation Details</b> zone.</li> <li>5. Click the <b>Edit</b> (✎) icon in the <b>Price Item Group Selection</b> column corresponding to the main person of the customer hierarchy.</li> </ol>
<p>Select a price item or hierarchy entity from the Pricing and Commitments screen</p>	<ol style="list-style-type: none"> <li>1. Ensure that the customer hierarchy is expanded in the <b>Simulation Details</b> zone.</li> <li>2. Click the <b>Edit</b> (✎) icon in the <b>Pricing and Commitments</b> column corresponding to the person or account for which you want to select the price item or hierarchy entity.</li> </ol> <p>The <b>Pricing and Commitments</b> screen appears.</p> <ol style="list-style-type: none"> <li>3. Click the <b>Select Price Item Group</b> button available in the header area of the <b>Pricing and Commitments</b> screen.</li> </ol>
<p>Select a price item or hierarchy entity from the Price List Assignment screen</p>	<ol style="list-style-type: none"> <li>1. Ensure that the customer hierarchy is expanded in the <b>Simulation Details</b> zone.</li> <li>2. Click the <b>Edit</b> (✎) icon in the <b>Price List Assignment</b> column corresponding to the person or account for whose price list you want to select the price item or hierarchy entity.</li> </ol> <p>The <b>Price List Assignment</b> screen appears.</p> <ol style="list-style-type: none"> <li>3. In the <b>Proposed Price Lists</b> zone, click the link in the <b>Price List Information</b> column corresponding to price list whose price item or hierarchy entity you want to select.</li> </ol> <div data-bbox="875 1423 1399 1598" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> You can also search for a price list that you want to assign to the person or account in the <b>Assign Price List</b> zone of the <b>Price List Assignment</b> screen and then select the required price item or hierarchy entity.</p> </div> <ol style="list-style-type: none"> <li>4. Click the <b>Save and Select Price Item Group</b> button.</li> </ol>

The **Select Price Item Group** screen appears. It contains the following sections:

- **Filters** - Used to filter the price assignment in the price item hierarchy which you want to consider while simulating the deal. It contains the following fields:

Field Name	Field Description
Search	Used to search for a particular price item, root level hierarchy entity, or non-root level hierarchy entity in the customer hierarchy.

Field Name	Field Description
Assignment Level	<p>Used to search for price items in the price item hierarchy whose price assignment is defined at a particular level. The valid values are:</p> <ul style="list-style-type: none"> <li>• <b>Account Agreed</b> - Used to indicate whether the price item pricing is agreed for the account.</li> <li>• <b>Account Inherited Price List</b> - Used to indicate whether the price item pricing is inherited from the parent price list hierarchy defined for the price list which is assigned to the account.</li> <li>• <b>Account Price List</b> - Used to indicate whether the price item pricing is defined in the price list which is assigned to the account.</li> <li>• <b>Bundle Pricing</b> - Used to indicate whether the price item pricing is defined for the bundle which is available for the retail banking.</li> <li>• <b>Customer Agreed</b> - Used to indicate whether the price item pricing is agreed for the customer in the customer hierarchy.</li> <li>• <b>Customer Inherited Price List</b> - Used to indicate whether the price item pricing is inherited from the parent price list hierarchy defined for the price list which is assigned to the customer.</li> <li>• <b>Customer Price List</b> - Used to indicate whether the price item pricing is defined in the price list which is assigned to the customer.</li> <li>• <b>Default Price List</b> - Used to indicate whether the price item pricing defined in the price list is available in the default price list.</li> <li>• <b>Global Price List</b> - Used to indicate whether the price item pricing defined in the price list is available in the global price list.</li> <li>• <b>Market Product Pricing</b> - Used to indicate whether the price item pricing is defined for the market product which is available for the retail banking.</li> <li>• <b>Offer Pricing</b> - Used to indicate whether the price item pricing is defined for the offer which is available for the retail banking.</li> <li>• <b>Parent Customer Agreed</b> - Used to indicate whether the price item pricing is agreed for the parent customer in the customer hierarchy.</li> <li>• <b>Parent Customer Inherited Price List</b> - Used to indicate whether the price item pricing is inherited from the parent price list hierarchy defined for the price list which is assigned to the parent customer.</li> <li>• <b>Parent Customer Price List</b> - Used to indicate whether the price item pricing is defined in the price list which is assigned to the parent customer.</li> <li>• <b>Price List</b> - Used to indicate whether the price item pricing is defined in the price list.</li> <li>• <b>Product Pricing</b> - Used to indicate whether the price item pricing defined in the price list is available for the product pricing.</li> </ul>

- **Price Item Group** - Displays the price item hierarchy. It contains the following columns:

Column Name	Column Description
Price Item Hierarchy	<p data-bbox="738 266 1468 359">Displays the price items, root level hierarchy entities, and non-root level hierarchy entities in the price item hierarchy which you can select for simulating the deal.</p> <p data-bbox="738 386 1468 877"><b>Note:</b> A check box appears corresponding to the price items and the hierarchy entities which you can select to include the respective price assignments for deal simulation.  The hierarchy entities and price items are sorted in the price item hierarchy based on their respective sort sequence. If two or more hierarchy entities and price items have the same sort sequence, then the system sorts them in the ascending alphabetical order of the information string. Also, if the sort sequence is not defined for the hierarchy entities and price items, then the system sorts them in the ascending alphabetical order of the information string.  Similarly, the system sorts the hierarchy entities and price items in the price item hierarchy when the deal information is extracted in the Excel or PDF format for internal or external use.</p>
Parameter	<p data-bbox="738 932 1468 993">Displays the comma separated parameters using which the pricing of the price item is determined.</p> <p data-bbox="738 1020 1468 1113"><b>Note:</b> All price assignments of a price item are sorted in the alphabetical order of the pricing information in the <b>Parameter</b> column.</p>

Column Name	Column Description
Assignment Level	<p>Displays the level at which the price assignment is defined for the price item. The valid values are:</p> <ul style="list-style-type: none"> <li>• <b>Account Agreed</b> - Indicates whether the price item pricing is agreed for the account.</li> <li>• <b>Account Inherited Price List</b> - Indicates whether the price item pricing is inherited from the parent price list hierarchy defined for the price list which is assigned to the account.</li> <li>• <b>Account Price List</b> - Indicates whether the price item pricing is defined in the price list which is assigned to the account.</li> <li>• <b>Bundle Pricing</b> - Indicates whether the price item pricing is defined for the bundle which is available for the retail banking.</li> <li>• <b>Customer Agreed</b> - Indicates whether the price item pricing is agreed for the customer in the customer hierarchy.</li> <li>• <b>Customer Inherited Price List</b> - Indicates whether the price item pricing is inherited from the parent price list hierarchy defined for the price list which is assigned to the customer.</li> <li>• <b>Customer Price List</b> - Indicates whether the price item pricing is defined in the price list which is assigned to the customer.</li> <li>• <b>Default Price List</b> - Indicates whether the price item pricing defined in the price list is available in the default price list.</li> <li>• <b>Global Price List</b> - Indicates whether the price item pricing defined in the price list is available in the global price list.</li> <li>• <b>Market Product Pricing</b> - Indicates whether the price item pricing is defined for the market product which is available for the retail banking.</li> <li>• <b>Offer Pricing</b> - Indicates whether the price item pricing is defined for the offer which is available for the retail banking.</li> <li>• <b>Parent Customer Agreed</b> - Indicates whether the price item pricing is agreed for the parent customer in the customer hierarchy.</li> <li>• <b>Parent Customer Inherited Price List</b> - Indicates whether the price item pricing is inherited from the parent price list hierarchy defined for the price list which is assigned to the parent customer.</li> <li>• <b>Parent Customer Price List</b> - Indicates whether the price item pricing is defined in the price list which is assigned to the parent customer.</li> <li>• <b>Price List</b> - Indicates whether the price item pricing is defined in the price list.</li> <li>• <b>Product Pricing</b> - Indicates whether the price item pricing defined in the price list is available for the product pricing.</li> </ul>

In addition, the **Price Item Group** section contains the following buttons:

Button Name	Button Description
Expand All	On clicking the <b>Expand All</b> button, all nodes in the price item hierarchy are expanded at once.
Collapse All	On clicking the <b>Collapse All</b> button, all nodes in the price item hierarchy are collapsed at once.
Select All	On clicking the <b>Select All</b> button, all the price items and the hierarchy entities in the price item hierarchy are selected i.e. the check box corresponding to each price item and hierarchy entity in the price item hierarchy is selected.
De-Select All	On clicking the <b>De-Select All</b> button, all the price items and the hierarchy entities in the price item hierarchy are de-selected i.e. the check box corresponding to each price item and hierarchy entity in the price item hierarchy is unchecked.
Save	On clicking the <b>Save</b> button, the price item selection made in the price item hierarchy is saved.
Save & View Pricing & Commitment	On clicking the <b>Save &amp; View Pricing &amp; Commitment</b> button, the price item selection made in the price item hierarchy is saved and the <b>Pricing and Commitments</b> screen appears.
Back	Used to access the previous screen.

2. Ensure that the price item hierarchy is expanded in the **Price Item Group** section.

**Note:**

The system, by default, selects the price items and hierarchy entities in the **Select Price Item Group** screen when the following conditions are met:

- Deal is created for an existing customer or account
- Default commitments are not defined in the respective deal type

However, if the deal is created for a proposed customer or if the default commitments are defined in the respective deal type, the system does not select the price items and hierarchy entities, by default, in the **Select Price Item Group** screen. You have to manually select the required price items and hierarchy entities in the **Select Price Item Group** screen. Only then, the system considers the pricing and commitments of the selected price items in the deal.

3. Select the check box corresponding to the price item or the hierarchy entity that you want to consider while simulating the deal.

**Note:** If you select a hierarchy entity, then all its corresponding non-root level hierarchy entities and price items are selected for the deal simulation.

4. Click **Save**.

The price item or hierarchy entity is selected.

## Recommending a New Pricing for a Price Item

### Procedure

To recommend a new pricing for a price item:

1. Ensure that the price item hierarchy is expanded in the **Pricing and Commitments** section of the **Pricing and Commitments** screen when you are recommending a new pricing for a price item of a person or account in a deal.
2. Click the **Recommend** link in the **Pricing Information** column corresponding to the price item for which you want to recommend a new pricing.

The **Pricing and Commitments** screen appears.

**Note:** The **Recommend** link appears in the **Pricing Information** column only when the **Propose Pricing** option is set to **Yes** for the user in the **Deal Approval Profile** associated with the **Deal Type** using which the deal is created in the system.

3. Ensure that the **Recommend Pricing** zone is expanded in the **Pricing and Commitments** screen.

The **Recommend Pricing** zone contains the following sections:

- **Main** - Used to specify basic details about the recommended price item pricing. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Price Assignment ID	Displays the price assignment ID.  <b>Note:</b> It is a read-only field and cannot be edited. A new price assignment ID is created automatically by the system when you recommend a new pricing for a price item.	Not Applicable
Price Item	Displays the price item whose pricing you want to edit.  <b>Note:</b> It is a read-only field and cannot be edited.	Not Applicable
Start Date	Displays the date from when the pricing of the price item is effective for the deal.	Not Applicable

Field Name	Field Description	Mandatory (Yes or No)
Price Assignment Type	<p>Used to indicate the type of price assignment. The valid values are:</p> <ul style="list-style-type: none"> <li>• <b>Regular</b> - Used to indicate that the pricing is used to generate regular bill segment.</li> <li>• <b>Post Processing</b> - Used to indicate that the pricing is used to generate post processing bill segment. This type of price assignment can be done on usage accounts. The post processing bill segment is generated when you generate the bill for the usage account and not when you bill the usage account through an invoice account.</li> </ul> <div data-bbox="740 737 1192 978" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> The post processing bill segment is generated when the <b>Post Processing Sequence (PPSEQ)</b> characteristic is defined for the price item and when the price item is associated with another price item using the <b>Price Item Relationship Type</b>.</p> </div> <ul style="list-style-type: none"> <li>• <b>Post Processing – Invoice Based</b> - Used to indicate that the pricing is used to generate post processing bill segment. This type of price assignment can be done on an invoice account, and, as a result, the post processing bill segment is generated on the invoice account.</li> </ul> <div data-bbox="740 1234 1192 1350" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> This is not applicable for price items whose <b>Price Item Usage</b> field is set to <b>Pricing</b>.</p> </div> <ul style="list-style-type: none"> <li>• <b>Post Processing – Price Item Based</b> - Used to indicate that the pricing is used to generate post processing bill segment. This type of price assignment can be done on both invoice and usage accounts, but the post processing bill segment is generated only on the invoice account.</li> </ul> <div data-bbox="740 1606 1192 1722" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> This field is not applicable for price items whose <b>Price Item Usage</b> field is set to <b>Pricing</b>.</p> </div>	No
End Date	Displays the date till when the pricing of the price item is effective for the deal.	Not Applicable
Pricing Currency	Used to indicate the currency in which you want to define the pricing of the price item.	No

Field Name	Field Description	Mandatory (Yes or No)
Pricing Eligibility	Used to define the pricing eligibility criteria for the price item pricing.	No
	<b>Note:</b> If you select the check box you can define the pricing eligibility of the price item in the <b>Price Component</b> section of this zone.	
Print Zero	Used to indicate whether zero pricing should be displayed in the bill. The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>	No
Rate Schedule	Used to specify the rate schedule that you want to use while defining price item pricing.	No
	<b>Note:</b> Rate schedules control how the bills for the price item will be calculated.  The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Rate Schedule Search</b> window appears where you can search for the respective rate schedule.	

- **TFM Information** - Used to map the transaction details with the price item. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Transaction Rating Criteria	Used to indicate how and when the transaction legs mapped to the price item are rated. The valid values are: <ul style="list-style-type: none"> <li>• Aggregate Transactions and Then Rate Aggregated SQs</li> <li>• Do Not Rate Transactions</li> <li>• Rate Transaction and Aggregate Calc Lines Across Transaction</li> <li>• Rate Transactions</li> </ul>	No
Aggregation Schedule	Used to indicate the transaction aggregation cycle. The valid values are: <ul style="list-style-type: none"> <li>• Daily</li> <li>• Weekly</li> <li>• Monthly</li> <li>• Quarterly</li> <li>• Yearly</li> </ul>	No

Field Name	Field Description	Mandatory (Yes or No)
Do Not Aggregate Switch	Used to Indicate whether aggregation is required while rating the transactions before billing. The valid values are: <ul style="list-style-type: none"> <li>• Yes - Used to Indicate aggregation is not required while rating the transactions before billing.</li> <li>• No - Used to Indicate aggregation is required while rating the transactions before billing.</li> </ul>	No
Ignore Transaction	Used to indicate whether the transactions mapped to the price item is considered for billing. The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>	No

- **Parameters** - Used to associate the parameters based on which you want to recommend the pricing of the price item. It contains the following columns:

Column Name	Column Description	Mandatory (Yes or No)
Parameter	Used to indicate the parameter that you want to associate with the price item pricing.  <div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b></p> <p>The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Price Item Parameter Search</b> window appears.</p> <p>The parameter search results displays only those parameters where the <b>Price Item</b> check box is selected.</p> </div>	No
Parameter Value	Used to specify the value of the parameter.	No

- **Characteristics** - Used to define a list of characteristics for the recommended price item pricing. It contains the following columns:

Column Name	Column Description	Mandatory (Yes or No)
Effective Date	Used to specify the date from when the characteristic is effective for price item pricing.	No

Column Name	Column Description	Mandatory (Yes or No)
Characteristic Type	Used to indicate the characteristic type.	No
	<b>Note:</b> The list includes only those characteristic types where the characteristic entity is set to <b>Projected Pricing</b> .	
Characteristic Value	Used to specify the value for the characteristic type.	No
	<b>Note:</b> If you select a predefined characteristic type, the <b>Search</b> (🔍) icon appears corresponding to the <b>Characteristic Value</b> field. On clicking the <b>Search</b> icon, the <b>Predefined Characteristic Search</b> window appears.  On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the <b>Characteristic Value</b> field.	

- **Price Component** - Used to define a list of price components of the rate component that you want to map with the recommended price item pricing. It contains the following columns:

Column Name	Column Description	Mandatory (Yes or No)
Rate Component	Displays the concatenated string of information about the rate component separated by comma (,).	Not applicable
	<b>Note:</b> It is a read-only field and cannot be edited.  This ID is generated automatically when you define the tiering setup of the rate component.	
Display Sequence	Used to specify the sequence of price component whose rate is used for calculating the pricing of the price item.	No
Description	Used to specify the description of the price component.	No
Show Price Component	Used to indicate whether you want to display the price component in the bill.	No
Rate	Used to specify the rate defined for the price component.	Yes
Eligibility and Tier Details	Used to specify the tiering criteria and eligibility criteria of the price component for the price item pricing.	No

Column Name	Column Description	Mandatory (Yes or No)										
Tier Details	<p>On clicking the <b>Add</b>  icon, you can view and edit the <b>Tiering Criteria</b> of the price component for the price item pricing. It contains the following columns:</p> <table border="1" data-bbox="688 405 1185 877"> <thead> <tr> <th data-bbox="688 405 906 453">Column Name</th> <th data-bbox="906 405 1185 453">Column Description</th> </tr> </thead> <tbody> <tr> <td data-bbox="688 453 906 569">Display Sequence</td> <td data-bbox="906 453 1185 569">Used to specify the sequence of the tiering criteria.</td> </tr> <tr> <td data-bbox="688 569 906 653">Tiering Criterion</td> <td data-bbox="906 569 1185 653">Used to indicate the tiering criteria.</td> </tr> <tr> <td data-bbox="688 653 906 768">Lower Limit</td> <td data-bbox="906 653 1185 768">Used to specify the lower limit of the tiering range.</td> </tr> <tr> <td data-bbox="688 768 906 877">Upper Limit</td> <td data-bbox="906 768 1185 877">Used to specify the upper limit of the tiering range.</td> </tr> </tbody> </table> <p><b>Note:</b> You can edit the tiering criteria of a price component only when the <b>Tiering Type</b> of its rate component is <b>STEP</b> or <b>THRESHOLD</b>.</p>	Column Name	Column Description	Display Sequence	Used to specify the sequence of the tiering criteria.	Tiering Criterion	Used to indicate the tiering criteria.	Lower Limit	Used to specify the lower limit of the tiering range.	Upper Limit	Used to specify the upper limit of the tiering range.	No
Column Name	Column Description											
Display Sequence	Used to specify the sequence of the tiering criteria.											
Tiering Criterion	Used to indicate the tiering criteria.											
Lower Limit	Used to specify the lower limit of the tiering range.											
Upper Limit	Used to specify the upper limit of the tiering range.											

Column Name	Column Description	Mandatory (Yes or No)												
Eligibility Details	<p>On clicking the <b>Add</b>  icon, you can view and edit the eligibility criteria of the price component for the price item pricing. It contains the following columns:</p> <table border="1" data-bbox="688 401 1182 2039"> <thead> <tr> <th data-bbox="688 401 906 453">Column Name</th> <th data-bbox="906 401 1182 453">Column Description</th> </tr> </thead> <tbody> <tr> <td data-bbox="688 453 906 632">Display Sequence</td> <td data-bbox="906 453 1182 632">Used to specify the order in which the eligibility criteria should be executed in the rule.</td> </tr> <tr> <td data-bbox="688 632 906 1146">Parameter</td> <td data-bbox="906 632 1182 1146">           Used to indicate the left hand side parameter which you want to use along with the price item for price determination.           <div data-bbox="911 848 1177 1129" style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><b>Note:</b> The <b>Search</b>  icon appears corresponding to the <b>Parameter</b> field. On clicking the <b>Search</b> icon, the <b>Parameter Search</b> window appears.</p> </div> </td> </tr> <tr> <td data-bbox="688 1146 906 1356">Operator</td> <td data-bbox="906 1146 1182 1356">Used to specify the relational operator to define the relation between the left hand side and right hand side parameters.</td> </tr> <tr> <td data-bbox="688 1356 906 1766">Parameter Value Type</td> <td data-bbox="906 1356 1182 1766">           Used to indicate the type of pricing eligibility. On clicking the <b>Search</b> icon, the <b>Parameter Search</b> window appears.</p> </div>	Operator	Used to specify the relational operator to define the relation between the left hand side and right hand side parameters.	Parameter Value Type	Used to indicate the type of pricing eligibility. The valid values are: <ul style="list-style-type: none"> <li>• <b>Parameter</b> - Used to indicate the type of parameter.</li> <li>• <b>Value</b> - Used to indicate the type of value.</li> </ul>	Parameter	Used to specify the value for the <b>Parameter Value Type</b> as the right hand side parameter which you want to use along with the price item for price determination. <div data-bbox="911 2049 1177 2095" style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><b>Note:</b></p> </div>	No
Column Name	Column Description													
Display Sequence	Used to specify the order in which the eligibility criteria should be executed in the rule.													
Parameter	Used to indicate the left hand side parameter which you want to use along with the price item for price determination. <div data-bbox="911 848 1177 1129" style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><b>Note:</b> The <b>Search</b>  icon appears corresponding to the <b>Parameter</b> field. On clicking the <b>Search</b> icon, the <b>Parameter Search</b> window appears.</p> </div>													
Operator	Used to specify the relational operator to define the relation between the left hand side and right hand side parameters.													
Parameter Value Type	Used to indicate the type of pricing eligibility. The valid values are: <ul style="list-style-type: none"> <li>• <b>Parameter</b> - Used to indicate the type of parameter.</li> <li>• <b>Value</b> - Used to indicate the type of value.</li> </ul>													
Parameter	Used to specify the value for the <b>Parameter Value Type</b> as the right hand side parameter which you want to use along with the price item for price determination. <div data-bbox="911 2049 1177 2095" style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><b>Note:</b></p> </div>													

4. Enter the required details in the **Main** section.
5. Map the transaction details in the **TFM Information** section, if required.
6. Associate or disassociate parameters with the price item pricing in the **Pricing Parameter Information** section, if required.
7. Add, edit, or delete characteristics from the price item pricing in the **Characteristics** section, if required.
8. Define price component for the rate component associated with the price item pricing in the **Price Component** section, if required.
9. Click **Recommend**.

A new pricing is recommended for the price item.

**Note:** On recommending a new pricing for a price item, the **Delete** (🗑️) icon appears corresponding to the recommended pricing of the respective price item in the **Pricing and Commitments** zone of the **Pricing and Commitments** screen.

## Associating Deal-Specific Terms and Conditions with a Price Item

### Prerequisites

To associate deal-specific terms and conditions with a price item you should have:

- Terms and conditions defined in the application
- Terms and conditions mapped to the price item

### Procedure

To associate deal-specific terms and conditions with a price item:

1. Ensure that the **Pricing and Commitments** zone is expanded when you are associating deal-specific terms and conditions with a price item of **Pricing and Commitments** screen.
2. In the **Pricing and Commitments** zone, click the **Edit** (✎) icon in the **Terms and Conditions** column corresponding to the price item to which you want to associate deal-specific terms and conditions.

The **Mapping Terms and Conditions** screen appears. It contains the following sections:

- **Main** - The **Main** section contains the following field:

Field Name	Field Description	Mandatory (Yes or No)
Price Item	Indicates the price item to which you want to associate deal-specific terms and conditions	Not applicable

- **Deal-Specific Terms and Conditions** - The **Deal-Specific Terms and Conditions** section contains the following columns:

Column Name	Column Description	Mandatory (Yes or No)
Terms and Conditions	Used to indicate the deal-specific term and condition which you want to associate with the price item.	Yes (Conditional)
	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to the <b>Terms and Conditions</b> field. On clicking the <b>Search</b> icon, the <b>Terms and Conditions Search</b> window appears where you can select the respective terms and conditions.	<b>Note:</b> This field is required when you are associating deal-specific terms and conditions with a price item.
Default	Indicates whether the term and condition is default or not.	No
View	On clicking the <b>Edit</b> (✎) icon in the <b>View</b> column, you can view and edit the deal-specific terms and conditions of the price item.	No

- **Adhoc Terms and Conditions** - Used to add deal-specific adhoc terms and conditions for the price item.

On clicking the **Edit** (✎) in the **Adhoc Terms and Conditions** section, you can add or edit the deal-specific adhoc terms and conditions of the price item.

3. Enter the required details in the **Deal-Specific Terms and Conditions** section.
4. If you want to associate more than one deal-specific term and condition with the price item, click the **Add** (+) icon and then repeat step 3.

**Note:** However, if you want to disassociate a deal-specific term and condition from the price item, click the **Delete** (🗑) icon corresponding to the respective term and condition.

5. Click **Save**.

The deal-specific terms and conditions are associated with the price item.

## **Associating Deal-Specific Terms and Conditions with a Hierarchy Entity**

### **Prerequisites**

To associate deal-specific terms and conditions with a hierarchy entity you should have:

- Terms and conditions defined in the application
- Terms and conditions mapped to the hierarchy entity

## Procedure

To associate deal-specific terms and conditions with a hierarchy entity:

1. Ensure that the **Pricing and Commitments** zone is expanded when you are associating deal-specific terms and conditions with a hierarchy entity in the **Pricing and Commitments** screen.
2. In the **Pricing and Commitments** zone, click the **Edit** (✎) icon in the **Terms and Conditions** column corresponding to the hierarchy entity with which you want to associate deal-specific terms and conditions.

The **Mapping Terms and Conditions** screen appears. It contains the following sections:

- **Main** - The **Main** section contains the following field:

Field Name	Field Description	Mandatory (Yes or No)
Hierarchy Entity	Indicates the hierarchy entity with which you want to associate deal-specific terms and conditions	Not applicable

- **Deal-Specific Terms and Conditions** - The **Deal-Specific Terms and Conditions** section contains the following columns:

Column Name	Column Description	Mandatory (Yes or No)
Terms and Conditions	Used to indicate the deal-specific term and condition which you want to associate with the hierarchy entity.	Yes (Conditional)
	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to the <b>Terms and Conditions</b> field. On clicking the <b>Search</b> icon, the <b>Terms and Conditions Search</b> window appears where you can select the respective terms and conditions.	
Default	Used to indicate whether the term and condition is default or not.	No
View	On clicking the <b>Edit</b> (✎) icon in the <b>View</b> column, you can view and edit the deal-specific terms and conditions of the hierarchy entity.	No

- **Adhoc Terms and Conditions** - Used to add deal-specific adhoc terms and conditions for the hierarchy entity.

On clicking the **Edit** (✎) in the **Adhoc Terms and Conditions** section, you can add or edit the deal-specific adhoc terms and conditions of the hierarchy entity.

3. Enter the required details in the **Deal-Specific Terms and Conditions** section.
4. If you want to associate more than one deal-specific term and condition with the hierarchy entity, click the **Add** (+) icon and then repeat step 3.

**Note:** However, if you want to disassociate a deal-specific term and condition from the hierarchy entity, click the **Delete** (🗑️) icon corresponding to the respective term and condition.

5. Click **Save**.

The deal-specific terms and conditions are associated with the hierarchy entity.

## Editing the Deal-Specific Terms and Conditions of a Price Item or a Hierarchy Entity

### Prerequisites

To edit the deal-specific terms and conditions of a price item or a hierarchy entity, you should have:

- Terms and conditions associated with the price item
- Terms and conditions associated with the hierarchy entity.

### Procedure

To edit the deal-specific terms and conditions of a price item or a hierarchy entity:

1. Ensure that the **Pricing and Commitments** section is expanded in the **Pricing and Commitments** screen.
2. In the **Pricing and Commitments** section, click the **Edit** (✎) icon in the **Terms and Conditions** column corresponding to the price item or the hierarchy entity whose deal-specific terms and conditions you want to edit.

The **Mapping Terms and Conditions** screen appears.

3. In the **Deal-Specific Terms and Conditions** section, click the **Edit** (✎) icon in the **View** column corresponding to the terms and conditions whose details you want to edit.

The **Terms and Conditions** window appears.

4. Click the **Edit** button.

The **Terms and Conditions Text** field is enabled.

5. Make the require changes in the **Terms and Conditions Text** field.

6. Click the **Save** button.

The changes made to the terms and conditions are saved.

## Viewing the Deal-Specific Terms and Conditions of a Price Item or a Hierarchy Entity

### Prerequisites

To view the deal-specific terms and conditions of a price item or a hierarchy entity, you should have:

- Terms and conditions associated with the price item
- Terms and conditions associated with the hierarchy entity.

### Procedure

To view the deal-specific terms and conditions of a price item or a hierarchy entity:

1. Ensure that the **Pricing and Commitments** section is expanded in the **Pricing and Commitments** screen.
2. In the **Pricing and Commitments** section, click the **Edit** (✎) icon in the **Terms and Conditions** column corresponding to the price item or the hierarchy entity whose deal-specific terms and conditions you want to view.  
The **Mapping Terms and Conditions** screen appears.
3. In the **Deal-Specific Terms and Conditions** section, click the **Edit** (✎) icon in the **View** column corresponding to the terms and conditions whose details you want to view.  
The **Terms and Conditions** window appears.
4. View the deal-specific terms and conditions of the price item or the hierarchy entity in the **Terms and Conditions** window.

## Deal Pricing and Commitments

The **Deal Pricing and Commitments** screen allows you to view the original and proposed price item pricing and commitments along with the price item hierarchy and the hierarchy entity. It also allows you to edit the proposed pricing and commitments of the price items. It contains the following sections:

- **Deal Information** - Displays information about the deal version. It contains the following field:

Field Name	Field Description
Deal Version Information	Displays the concatenated string consisting of deal ID, deal version ID and deal description separated by a comma (,).

- **Search Pricing and Commitments** - Used to search pricing and commitments of a price item using various criteria. It contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Search By	<p>Used to indicate the criteria using which you want to search for the pricing and commitments of a price item. The valid values are:</p> <ul style="list-style-type: none"> <li>• <b>Account</b> - Used to indicate whether you want to search for the pricing and commitments of price items which belong to a particular account.</li> <li>• <b>All</b> - Used to indicate whether you want to view the pricing and commitments of all the price items in the deal.</li> <li>• <b>Customer</b> - Used to indicate whether you want to search for the pricing and commitments of price items which belong to a particular person.</li> <li>• <b>Price Item</b> - Used to indicate whether you want to search for the pricing and commitments of a particular price item.</li> <li>• <b>Root Level Hierarchy Entity</b> - Used to indicate whether you want to search for the pricing and commitments of price items which belong to a particular hierarchy entity.</li> </ul>	Yes
Account ID	<p>Used to search for the pricing and commitments of a price item which belongs to a particular account in the customer hierarchy.</p> <p><b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to the <b>Account ID</b> field. On clicking the <b>Search</b> icon, the <b>Prospect Account Search</b> window appears where you can search for the respective account.</p>	<p>Yes (Conditional)</p> <p><b>Note:</b> This field is required for searching the price item pricing and commitments of a particular account.</p>
Price Item	<p>Used to search for the price item pricing and commitments of a particular person, account, or hierarchy entity.</p> <p><b>Note:</b></p> <p>The <b>Search</b> (🔍) icon appears corresponding to the <b>Price Item</b> field. On clicking the <b>Search</b> icon, the <b>Price Item Search</b> window appears where you can search for the respective price item.</p> <p>You can specify a list of price items whose pricing and commitments you want to view when you select the <b>Price Item</b> option from the <b>Search By</b> list.</p>	<p>Yes (Conditional)</p> <p><b>Note:</b> This field is required for searching the pricing and commitments of a particular price item.</p>

Field Name	Field Description	Mandatory (Yes or No)
Price Item Approval Status	Used to search for the pricing and commitments of price items which are in a particular approval status. The valid values are: <ul style="list-style-type: none"><li>• Approved</li><li>• Approved-Existing</li><li>• Approver-Recommended</li><li>• Error</li><li>• Unapproved</li></ul>	No

Field Name	Field Description	Mandatory (Yes or No)
Assignment Level	<p>Used to search for the pricing and commitments of price items which are defined at a particular level in the customer hierarchy. The valid values are:</p> <ul style="list-style-type: none"> <li>• <b>Account Agreed</b> - Indicates whether the price item pricing is agreed for the account.</li> <li>• <b>Account Inherited Price List</b> - Indicates whether the price item pricing is inherited from the parent price list hierarchy defined for the price list which is assigned to the account.</li> <li>• <b>Account Price List</b> - Indicates whether the price item pricing is defined in the price list which is assigned to the account.</li> <li>• <b>Bundle Pricing</b> - Indicates whether the price item pricing is defined for the bundle which is available for the retail banking.</li> <li>• <b>Customer Agreed</b> - Indicates whether the price item pricing is agreed for the customer in the customer hierarchy.</li> <li>• <b>Customer Inherited Price List</b> - Indicates whether the price item pricing is inherited from the parent price list hierarchy defined for the price list which is assigned to the customer.</li> <li>• <b>Customer Price List</b> - Indicates whether the price item pricing is defined in the price list which is assigned to the customer.</li> <li>• <b>Default Price List</b> - Indicates whether the price item pricing defined in the price list is available in the default price list.</li> <li>• <b>Global Price List</b> - Indicates whether the price item pricing defined in the price list is available in the global price list.</li> <li>• <b>Market Product Pricing</b> - Indicates whether the price item pricing is defined for the market product which is available for the retail banking.</li> <li>• <b>Offer Pricing</b> - Indicates whether the price item pricing is defined for the offer which is available for the retail banking.</li> <li>• <b>Parent Customer Agreed</b> - Indicates whether the price item pricing is agreed for the parent customer in the customer hierarchy.</li> <li>• <b>Parent Customer Inherited Price List</b> - Indicates whether the price item</li> </ul>	No

Field Name	Field Description	Mandatory (Yes or No)
Person ID	Used to search for the pricing and commitments of a price item which belongs to a particular person in the customer hierarchy.	Yes (Conditional)
	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to the <b>Account ID</b> field. On clicking the <b>Search</b> icon, the <b>Prospect Account Search</b> window appears where you can search for the respective account.	<b>Note:</b> This field is required for searching the price item pricing and commitments of a particular person.
Root Level Hierarchy Entity	Used to search for the pricing and commitments of price items which belongs to a particular hierarchy entity.	Yes (Conditional)
	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to the <b>Root Level Hierarchy Entity</b> field. On clicking the <b>Search</b> icon, the <b>Root Level Hierarchy Entity Search</b> window appears where you can search for the respective hierarchy entity.	<b>Note:</b> This field is required for searching the price item pricing and commitments of a particular hierarchy entity.

In addition, the **Search Pricing and Commitments** section contains the following buttons:

Button Name	Button Description
Show All Pricing	Used to display all the price item pricing and commitments available for the specified search criteria.
Show Customer or Account Level Pricing	Used to show only the customer agreed and account agreed price item pricing and commitments available for the specified search criteria.

- **Symbol Legends** - Used to indicate the current status of the price item pricing and commitments. It also differentiates between the proposed and the original price item pricing statistics. It contains the following symbols:

Symbol Name	Symbol Description
 PROJECTED	Indicates the proposed price item pricing statistics.
 ORIGINAL	Indicates the existing price item pricing statistics.
 APPROVED	Indicates whether the pricing of the price item is approved.
 PENDING FOR APPROVAL	Indicates whether the pricing of the price item is pending for approval.
 Pre-Approved	Indicates whether the original pricing of the price item is approved for the deal.
 APPROVER-RECOMMENDED	Indicates whether a new pricing for the price item is recommended by the approver.

Symbol Name	Symbol Description
 Error	<p>Indicates whether an error occurred while validating the price item pricing during pricing simulation.</p> <p><b>Note:</b></p> <p>If the approver clicks the <b>Check Limits</b> button in the <b>Pricing And Commitment Details</b> screen and if the price item floor and ceil value falls within the approvers limit, then the status of the price item is changed to <b>Approved</b>.</p> <p>If the approver clicks the <b>Check Limits</b> button in the <b>Pricing And Commitment Details</b> screen and if the price item floor and ceil value does not fall within the approvers limit, then the status of the price item is changed to <b>Pending For Approval</b>.</p> <p>If the approver clicks the <b>Send Price Items for Approval</b> button in the <b>Pricing And Commitment Details</b> screen, the status of the price item is changed to <b>Assigned to Price Item Manager</b>.</p>
 Assigned to Price Item Manager	Indicates whether the price item pricing is sent to the price item manager for approval.

- **Pricing and Commitments** - Lists the price items as specified in the search criteria whose proposed and original pricing and commitment details you want to view. It contains the following columns:

Column Name	Column Description
Entity Information	<p>Displays the concatenated string of information about the person or account in the customer hierarchy whose price item pricing and commitment details you want to view separated by a comma (,).</p> <p><b>Note:</b></p> <p>The hierarchy entity is sorted in the price item hierarchy based on its respective sort sequence.</p> <p>If two or more hierarchy entities have the same sort sequence, then the system sorts them in the ascending alphabetical order of the information string.</p> <p>Also, if the sort sequence is not defined for the hierarchy entities, then the system sorts them in the ascending alphabetical order of the information string.</p>

Column Name	Column Description
Price Item	<p data-bbox="703 212 1468 275">Displays the price item whose pricing and commitment details you want to view.</p> <p data-bbox="703 302 1468 333"><b>Note:</b></p> <p data-bbox="703 348 1468 411">The price item is sorted in the price item hierarchy based on its respective sort sequence.</p> <p data-bbox="703 426 1468 489">If two or more price items have the same sort sequence, then the system sorts them in the ascending alphabetical order of the information string.</p> <p data-bbox="703 504 1468 598">Also, if the sort sequence is not defined for the price items, then the system sorts them in the ascending alphabetical order of the information string.</p>
Price Item Hierarchy	Displays the concatenated string consisting of the root level and non-root level hierarchy entity of the price item separated by a comma (,).
Pricing Parameters	Indicates the parameters using which the pricing of the price item is defined.
Revenue Variation (%)	<p data-bbox="703 825 1468 951">Displays the variation between the original, proposed, and recommended revenue in percentage generated from the original, proposed, and recommended pricing of the price item. It is calculated using the following formula:</p> <p data-bbox="703 966 1468 1029">Revenue Variation (%) = (Proposed Revenue – Original Revenue)*100/Original Revenue.</p>
Status	Indicates the current approval status of the price item pricing and commitments.
Approver	Indicates the user who has approved the price item pricing and commitments.
Pricing Information	<p data-bbox="703 1224 1468 1287">Displays the concatenated string of information about the proposed and original price item pricing separated by a comma (,).</p> <p data-bbox="703 1314 1468 1440"><b>Note:</b> It has a link. On clicking the link, the <b>Deal Pricing</b> screen appears where you can view the details of the original and proposed price item pricing. You can also edit or override the proposed pricing of the price item through this screen.</p>
Price List Information	Indicates the price list from where the proposed and original pricing of the price item is derived for the person or account in the customer hierarchy.

Column Name	Column Description
Assignment Level	<p>Indicates the level at which the proposed and original pricing of the price item is defined in the customer hierarchy. The valid values are:</p> <ul style="list-style-type: none"> <li>• <b>Account Agreed</b> - Indicates whether the price item pricing is agreed for the account.</li> <li>• <b>Account Inherited Price List</b> - Indicates whether the price item pricing is inherited from the parent price list hierarchy defined for the price list which is assigned to the account.</li> <li>• <b>Account Price List</b> - Indicates whether the price item pricing is defined in the price list which is assigned to the account.</li> <li>• <b>Bundle Pricing</b> - Indicates whether the price item pricing is defined for the bundle which is available for the retail banking.</li> <li>• <b>Customer Agreed</b> - Indicates whether the price item pricing is agreed for the customer in the customer hierarchy.</li> <li>• <b>Customer Inherited Price List</b> - Indicates whether the price item pricing is inherited from the parent price list hierarchy defined for the price list which is assigned to the customer.</li> <li>• <b>Customer Price List</b> - Indicates whether the price item pricing is defined in the price list which is assigned to the customer.</li> <li>• <b>Default Price List</b> - Indicates whether the price item pricing defined in the price list is available in the default price list.</li> <li>• <b>Global Price List</b> - Indicates whether the price item pricing defined in the price list is available in the global price list.</li> <li>• <b>Market Product Pricing</b> - Indicates whether the price item pricing is defined for the market product which is available for the retail banking.</li> <li>• <b>Offer Pricing</b> - Indicates whether the price item pricing is defined for the offer which is available for the retail banking.</li> <li>• <b>Parent Customer Agreed</b> - Indicates whether the price item pricing is agreed for the parent customer in the customer hierarchy.</li> <li>• <b>Parent Customer Inherited Price List</b> - Indicates whether the price item pricing is inherited from the parent price list hierarchy defined for the price list which is assigned to the parent customer.</li> <li>• <b>Parent Customer Price List</b> - Indicates whether the price item pricing is defined in the price list which is assigned to the parent customer.</li> <li>• <b>Price List</b> - Indicates whether the price item pricing is defined in the price list.</li> <li>• <b>Product Pricing</b> - Indicates whether the price item pricing defined in the price list is available for the product pricing.</li> </ul>
Average Price	<p>Displays the average proposed and original cost of the price item as per the proposed and original commitments. It is calculated using the following formula:</p> $\text{Avg. Price} = \text{Proposed Revenue} / \text{Proposed Usage}$

Column Name	Column Description
Volume and Commitments	On clicking the <b>Edit</b> (✎) icon, the <b>Pricing and Commitments</b> screen appears where you can view the original and proposed commitments of the price item.
Revenue	Displays the proposed and original revenue generated from the proposed and original price item pricing and commitments.
Cost	Displays the proposed and original cost of the price item based on the proposed and original usage.
Terms and Conditions	On clicking the <b>Edit</b> (✎) icon, the <b>Mapping Terms and Conditions</b> screen appears where you can view or delete the deal-specific terms and conditions associated with the price item.

In addition, the **Pricing and Commitments** section contains the following buttons:

Button Name	Button Description
Send Price Items for Approval	<p>On clicking the <b>Send Price Items for Approval</b> button, the status of the price item is changed to <b>Assigned to Price Item Manager</b>.</p> <p><b>Note:</b> An approver can send a price item for approval when the following conditions are met:</p> <ul style="list-style-type: none"> <li>• The price item is assigned to the approver for approval</li> <li>• The <b>Propose Pricing</b> option is set to <b>Yes</b> in the <b>Deal Approval Profile</b> for the approver</li> <li>• The <b>Submit Price Item for Approval</b> option is set to <b>Yes</b> in the <b>Deal Approval Profile</b> for the approver</li> </ul>
Check Limits	<p>On clicking the <b>Check Limits</b> button the system verifies whether the average price of the price item falls within the floor and ceil values defined for the approver in the price item screen.</p> <p><b>Note:</b></p> <p>If the average price falls within the floor and ceil values defined for the approver, then the status of the price item is changed to <b>Approved</b>.</p> <p>If the average price does not fall within the floor and ceil values defined for the approver, then the status of the price item is changed to <b>Pending For Approval</b>.</p>

**Note:** A check box appears corresponding to the price item if the price item is assigned to the approver for approval.

## Price List Assignment

The **Price List Assignment** screen enables you to view the existing and proposed price lists of the person or account in a deal. It also enables you to edit or assign proposed price list to the person or account in a deal. It contains the following sections:

- **Deal** - Displays basic information about the deal. It contains the following fields:

Field Name	Field Description
Deal Version Information	Displays the deal version to which the person or account belongs.

Field Name	Field Description
Person ID	<p>Displays the person whose price list assignment details you want to view or edit.</p> <p><b>Note:</b></p> <p>This field appears in the following scenarios:</p> <ul style="list-style-type: none"> <li>• If you are viewing the existing price lists of a person.</li> <li>• If you are editing the proposed price list of a person.</li> <li>• If you are assigning a proposed price list to a person.</li> </ul> <p>This field appears when you are viewing, editing, or assigning a price list to a person in the customer hierarchy.</p>
Person Information	<p>Displays the concatenated string of information about the person separated by a comma (,).</p> <p><b>Note:</b> This field appears when you are viewing, editing, or assigning a price list to a person in the customer hierarchy.</p>
Account ID	<p>Displays the account whose price list assignment details you want to view or edit.</p> <p><b>Note:</b></p> <p>This field appears in the following scenarios:</p> <ul style="list-style-type: none"> <li>• If you are viewing the existing price lists of an account.</li> <li>• If you are editing the proposed price list of an account.</li> <li>• If you are assigning a proposed price list to an account</li> </ul> <p>This field appears when you are viewing, editing, or assigning a price list to an account in the customer hierarchy.</p>
Account Information	<p>Displays the concatenated string of information about the account separated by a comma (,).</p> <p><b>Note:</b> This field appears when you are viewing, editing, or assigning a price list to an account in the customer hierarchy.</p>

- **Existing Price Lists** - Lists the price lists that are already assigned to the person or account of the customer hierarchy in a deal. It contains the following columns:

Column Name	Column Description
Price List ID	Displays the existing price list of the person or account of the customer hierarchy.
Price List Information	<p>Displays the description of the price list.</p> <p><b>Note:</b> It has a link. On clicking the link, the <b>Price List</b> screen appears where you can view the details of the respective price list.</p>

Column Name	Column Description
Effective Start Date	Displays the date from when the price list is effective for the deal.
	<b>Note:</b> By default, this date is set to the deal start date and cannot be edited.
Effective End Date	Displays the date till when the price list is effective for the deal.
	<b>Note:</b> The <b>Effective End Date</b> cannot be earlier than the <b>Effective Start Date</b> .
Price List Inheritance	Indicates whether the person or account can avail the price item pricing listed on the parent or grandparent price list if it is not available on the assigned price list. In other words, it indicates whether the person or account can inherit the price item pricing from the price list hierarchy.
Assignment Status	Indicates the current status of the price list. The valid values are: <ul style="list-style-type: none"> <li>• Active</li> <li>• Inactive</li> </ul>
Priority	Indicates the order in which the price list must be considered while determining the price item pricing for the person or account.

**Note:** The **Existing Price Lists** section appears in the **Price List Assignment** screen when you are viewing the original pricelist assignment of the person or account from the customer hierarchy.

**Proposed Price Lists** - Lists the price lists that are proposed for the person or account in the customer hierarchy of a deal. It contains the following columns:

Column Name	Column Description
Price List ID	Displays the price list that is proposed for the person or account of the customer hierarchy.
Price List Information	Displays the description of the price list.
	<b>Note:</b> It has a link. On clicking the link, the details of the respective price list appears in the <b>Assign Price List</b> section for editing. You can activate or deactivate a proposed price list by editing its <b>Effective End Date</b> in the <b>Assign Price List</b> section.
Effective Start Date	Displays the date from when the proposed price list is effective for the deal.
	<b>Note:</b> By default, this date is set to the deal start date and cannot be edited.
Effective End Date	Displays the date till when the proposed price list is effective for the deal.
	<b>Note:</b> The <b>Effective End Date</b> cannot be earlier than the <b>Effective Start Date</b> .

Column Name	Column Description
Price List Inheritance	Indicates whether the person or account can avail the price item pricing listed on the parent or grandparent price list if it is not available on the assigned price list. In other words, it indicates whether the person or account can inherit the price item pricing from the price list hierarchy.
Assignment Status	Indicates the current status of the proposed price list. The valid value is: <ul style="list-style-type: none"> <li>Proposed</li> </ul>
Priority	Indicates the order in which the price list must be considered while determining the price item pricing for the person or account.

**Note:**

The **Proposed Price List** section appears in the **Price List Assignment** screen when you are viewing, editing, or assigning a proposed price list to a person or an account of the customer hierarchy.

You can delete a proposed price list by clicking the **Delete** () icon corresponding to the respective proposed price list.

The **Delete** icon appears corresponding to only those price lists which are newly assigned to the customer or account in the deal.

You cannot delete a proposed price list assignment which is created using the original price list assignments.

If you delete a proposed price list, the price item pricing inherited from the price list is also deleted from the **Pricing and Commitments** screen. But, if you have created the customer or account agreed pricing using the price list pricing, then such customer or account agreed pricing is not deleted from the **Pricing and Commitments** screen.

**Assign Price List** - Enables you to assign a proposed price list to a person or an account of the customer hierarchy in a deal. It contains the following fields:

Field Name	Field Description
Price List ID	Used to indicate a particular price list that you want to assign to the proposed price list of a person or account. <p><b>Note:</b></p> <p>The <b>Search</b> () icon appears corresponding to the <b>Price List ID</b> field. On clicking the <b>Search</b> icon, the <b>Fetch Eligible Price Lists</b> window appears.</p> <p>On indicating the price list, the price list information appears corresponding to the <b>Price List ID</b> field separated by a comma (,).</p>
Effective Start Date	Displays the date from when the price list assignment is effective for the person or account. <p><b>Note:</b> By default this field is set to the deal start date and cannot be changed.</p>
Effective End Date	Used to specify the date till when the price list assignment is effective for the person or account.
Priority	Used to specify the order in which the assigned price list must be considered while determining the price item pricing for the person or account.

Field Name	Field Description
Price list Inheritance	<p>Indicates whether the person or account can avail the price item pricing listed on the parent or grandparent price list if it is not available on the assigned price list. In other words, it indicates whether the person or account can inherit the price item pricing from the price list hierarchy. The valid values are:</p> <ul style="list-style-type: none"> <li>• <b>Yes</b> - Used to indicate that the person can inherit the price item pricing from the price list hierarchy.</li> <li>• <b>No</b> -Used to indicate that the person cannot inherit the price item pricing from the price list hierarchy.</li> </ul>

**Note:** You cannot assign a proposed price list to a person or account if a deal has reached the **Finalized** status.

In addition, the **Price List Assignment** screen contains the following button:

Button Name	Button Description
Save and Select Price Item Group	On clicking the <b>Save and Select Price Item Group</b> button, the assigned price list is saved as the proposed price list and the <b>Select Price Item Group</b> screen appears where you can select and/or deselect the price items and/or hierarchy entities from the respective price list.

## Product Enrollment

The **Product Enrollment** screen enables you to view the existing and proposed products to which the account is enrolled. It also enables you to edit or enroll an account or accounts of a person for a product. It contains the following sections:

- **Deal** - Displays basic information about the deal. It contains the following fields:

Field Name	Field Description
Deal Version Information	Displays the deal version to which the person or account belongs.

Field Name	Field Description
Person ID	Displays the person whose accounts you want to enroll for a product..
	<b>Note:</b> This field appears when you want to enroll all the accounts of the person for a product.
Person Information	Displays the concatenated string of information about the person separated by a comma (,).
	<b>Note:</b> This field appears when you want to enroll all the accounts of the person for a product.
Account ID	Displays the account whose product enrollment details you want to view.
	<b>Note:</b> This field appears in the following scenarios: <ul style="list-style-type: none"> <li>• If you are viewing the existing products enrolled for an account.</li> <li>• If you are editing the existing products enrolled for an account.</li> <li>• If you are enrolling an account for a product.</li> </ul>
Account Information	Displays the concatenated string of information about the account separated by a comma (,).
	<b>Note:</b> This field appears when you are viewing, editing, or enrolling an account for a product.

- **Enrolled Products** - Lists the products to which the account is enrolled. It contains the following columns:

Column Name	Column Description
Enrollment ID	Displays the enrollment ID of the enrolled product.
Product Code	Displays the code of the enrolled product.
	<b>Note:</b> This column appears only when you are viewing the proposed product enrollment details of an account.
Product Description	Displays the description of the enrolled product.
	<b>Note:</b> It has a link. On clicking the link while viewing the existing product to which the account is enrolled, the <b>Product</b> screen appears where you can view the details of the respective product.
Version Description	Displays the version of the enrolled product.
	<b>Note:</b> This column appears only when you are viewing the proposed product enrollment details of an account.

Column Name	Column Description
Product Type	Displays the type of product which is enrolled for the account.
	<p><b>Note:</b></p> <p>Whereas, if you click the link while editing the proposed products to which the account is enrolled, the details of the product and its services appears in the <b>Products and Services</b> section of the <b>Product Enrollment</b> screen where you can edit the respective product.</p> <p>You cannot edit an enrolled product if the deal version has reached the <b>Finalized</b> status.</p>
Product Category	Indicates the category to which the product belongs.
	<p><b>Note:</b> This column appears only when you are viewing the proposed product enrollment details of an account.</p>
Priority	Displays the priority in which the enrolled product is considered for the account.
	<p><b>Note:</b> This column appears only when you are viewing the proposed product enrollment details of an account.</p>
Start Date	Displays the date from when the enrolled product is effective for the account.
	<p><b>Note:</b> By default, this date is set to the deal start date and cannot be edited.</p>
End Date	Displays the date till when the enrolled product is effective for the account.
	<p><b>Note:</b> The <b>End Date</b> cannot be earlier than the <b>Start Date</b>.</p>

- **Proposed Products** - Lists the products that are proposed for the account for enrollment. It contains the following columns:

Column Name	Column Description
Product Code	Displays the code of the enrolled product.
Product Description	Displays the description of the enrolled product.
Version Description	Displays the version of the enrolled product.
Product Type	Displays the type of product which is enrolled for the account.
Product Category	Indicates the category to which the product belongs.
Priority	Displays the priority in which the enrolled product is considered for the account.
Start Date	Displays the date from when the enrolled product is effective for the account.
	<p><b>Note:</b> By default, this date is set to the deal start date and cannot be edited.</p>

Column Name	Column Description
End Date	Displays the date till when the enrolled product is effective for the account.
	<b>Note:</b> The <b>End Date</b> cannot be earlier than the <b>Start Date</b> .

<b>Note:</b> On clicking the <b>Broadcast</b> (  ) icon corresponding to a proposed enrolled product, the details of the product appears in the <b>Enroll Product</b> and <b>Product and Services</b> sections for editing.
<b>Note:</b> You cannot edit an enrolled product if the deal or deal version has reached the <b>Finalized</b> status.
You can delete the proposed product to which the account is enrolled by clicking the <b>Delete</b> (  ) icon corresponding to a proposed enrolled product.

- **System Recommended Products & Packages** - Lists the products that you have recommended for enrollment while creating the deal. It contains the following columns:

Column Name	Column Description
Product Code	Displays the code of the recommended product.
Product Description	Displays the description of the recommended product.
Version Description	Displays the version of the recommended product.
Product Type	Displays the type of product which is recommended for the account.
Product Category	Indicates the category to which the recommended product belongs.
Start Date	Displays the date from when the recommended product is effective for the account.
	<b>Note:</b> By default, this date is set to the deal start date and cannot be edited.
End Date	Displays the date till when the recommended product is effective for the account.
	<b>Note:</b> The <b>End Date</b> cannot be earlier than the <b>Start Date</b> .

- **Enroll Product** - The **Enroll Product** section contains the following fields:

Field Name	Field Description
Enrollment ID	Used to specify the enrollment ID once the product is defined for an enrollment.
	<b>Note:</b> Enrollment ID is displayed when the product is added for enrollment.
Start Date	Displays the date from when the product enrollment is effective.
	<b>Note:</b> By default, this date is set to the deal start date and cannot be changed.

Field Name	Field Description
End Date	Displays the date till when the product enrollment is effective.

**Note:**

The **Enroll Product** section appears in the **Product Enrollment** screen only when you are enrolling an account or accounts of a person for a product.

- **Products and Services** - Used to define products and services for a product. It contains the following fields in a grid:

Field Name	Field Description
Product	Used to indicate the product to which you want to enroll an account or accounts of a person.  <b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to the <b>Product</b> field. On clicking the <b>Search</b> icon, the <b>Fetch Eligible Products</b> window appears. On indicating the product, the description of the product appears in the <b>Product</b> field. Also, when you select a product, the <b>Standard Product</b> , <b>Product Services</b> , and the <b>Add-On Product Services</b> that are eligible for the product appears corresponding to the product.
Start Date	Used to specify the date from when the product is effective for the account or accounts of a person.  <b>Note:</b> By default this field is set to the deal start date and cannot be changed.
End Date	Used to specify the date till when the product is effective for the account or accounts of a person.  <b>Note:</b> The <b>End Date</b> cannot be earlier than the <b>Start Date</b> .
Priority	Used to specify the priority in which you want the product to be considered while calculating the financial summary of the deal.
Inclusion	Used to indicate whether you want to include the services of the product for the account.  <b>Note:</b> By default, all the check boxes of the services provided by the product are selected. You can exclude a service by deselecting the check box corresponding to the respective service.
Standard Product	Displays the standard product which is included within the main product.
Start Date	Used to specify the date from when the standard product is effective.  <b>Note:</b> By default this field is set to the deal start date and cannot be changed.

Field Name	Field Description
End Date	Used to specify the date till when the standard product is effective.
	<b>Note:</b> The <b>End Date</b> cannot be earlier than the <b>Start Date</b> .
Inclusion	Used to indicate whether the standard product is used for enrollment.
Product Services	Displays the service that is a part of the standard product.
Start Date	Used to specify the date from when the service is effective.
	<b>Note:</b> By default this field is set to the deal start date and cannot be changed.
End Date	Used to specify the date till when the service is effective.
	<b>Note:</b> The <b>End Date</b> cannot be earlier than the <b>Start Date</b> .
Inclusion	Used to indicate whether the service is used for enrollment.
Add on Services	Displays the add-on service which is a part of the packaged product.
Start Date	Used to specify the date from when the add-on service is effective.
	<b>Note:</b> By default this field is set to the deal start date and cannot be changed.
End Date	Used to specify the date till when the add-on service is effective.
	<b>Note:</b> The <b>End Date</b> cannot be earlier than the <b>Start Date</b> .
Inclusion	Used to indicate whether the add-on service is used for enrollment.

The **Product Enrollment** screen appears. It contains the following sections:

- **Deal** - Displays basic information about the deal. It contains the following fields:

Field Name	Field Description
Deal Version Information	Displays the deal version to which the person or account belongs.
Person ID	Displays the person whose accounts you want to enroll for a product..  <b>Note:</b> This field appears when you want to enroll all the accounts of the person for a product.
Person Information	Displays the concatenated string of information about the person separated by a comma (,).  <b>Note:</b> This field appears when you want to enroll all the accounts of the person for a product.

- **Enrolled Products** - Lists the products to which the accounts of the person are enrolled. It contains the following columns:

Column Name	Column Description
Enrollment ID	Displays the enrollment ID of the enrolled product.
Product Code	Displays the code of the enrolled product.  <b>Note:</b> This column appears only when you are viewing the proposed product enrollment details of an account.
Product Description	Displays the description of the enrolled product.  <b>Note:</b> It has a link. On clicking the link while viewing the existing product to which the account is enrolled, the <b>Product</b> screen appears where you can view the details of the respective product.
Version Description	Displays the version of the enrolled product.  <b>Note:</b> This column appears only when you are viewing the proposed product enrollment details of an account.

Column Name	Column Description
Product Type	Displays the type of product which is enrolled for the account.
	<p><b>Note:</b></p> <p>Whereas, if you click the link while editing the proposed products to which the account is enrolled, the details of the product and its services appears in the <b>Products and Services</b> section of the <b>Product Enrollment</b> screen where you can edit the respective product.</p> <p>You cannot edit an enrolled product if the deal version has reached the <b>Finalized</b> status.</p>
Product Category	Indicates the category to which the product belongs.
	<p><b>Note:</b> This column appears only when you are viewing the proposed product enrollment details of an account.</p>
Priority	Displays the priority in which the enrolled product is considered for the account.
	<p><b>Note:</b> This column appears only when you are viewing the proposed product enrollment details of an account.</p>
Start Date	Displays the date from when the enrolled product is effective for the account.
	<p><b>Note:</b> By default, this date is set to the deal start date and cannot be edited.</p>
End Date	Displays the date till when the enrolled product is effective for the account.
	<p><b>Note:</b> The <b>End Date</b> cannot be earlier than the <b>Start Date</b>.</p>

- **Proposed Products** - Lists the products that are proposed for the accounts of the person for enrollment. It contains the following columns:

Column Name	Column Description
Product Code	Displays the code of the enrolled product.
Product Description	Displays the description of the enrolled product.
Version Description	Displays the version of the enrolled product.
Product Type	Displays the type of product which is enrolled for the account.
Product Category	Indicates the category to which the product belongs.
Priority	Displays the priority in which the enrolled product is considered for the account.

Column Name	Column Description
Start Date	Displays the date from when the enrolled product is effective for the account.
	<b>Note:</b> By default, this date is set to the deal start date and cannot be edited.
End Date	Displays the date till when the enrolled product is effective for the account.
	<b>Note:</b> The <b>End Date</b> cannot be earlier than the <b>Start Date</b> .

<b>Note:</b> On clicking the <b>Broadcast</b> (  ) icon corresponding to a proposed enrolled product, the details of the product appears in the <b>Enroll Product</b> and <b>Product and Services</b> sections for editing.
<b>Note:</b> You cannot edit an enrolled product if the deal or deal version has reached the <b>Finalized</b> status.
You can delete the proposed product to which the account is enrolled by clicking the <b>Delete</b> (  ) icon corresponding to a proposed enrolled product.

- **System Recommended Products & Packages** - Lists the products that you have recommended for enrollment while creating the deal. It contains the following columns:

Column Name	Column Description
Product Code	Displays the code of the recommended product.
Product Description	Displays the description of the recommended product.
Version Description	Displays the version of the recommended product.
Product Type	Displays the type of product which is recommended for the account.
Product Category	Indicates the category to which the recommended product belongs.
Start Date	Displays the date from when the recommended product is effective for the account.
	<b>Note:</b> By default, this date is set to the deal start date and cannot be edited.
End Date	Displays the date till when the recommended product is effective for the account.
	<b>Note:</b> The <b>End Date</b> cannot be earlier than the <b>Start Date</b> .

- **Enroll Product** - The **Enroll Product** section contains the following fields:

Field Name	Field Description
Enrollment ID	Displays the enrollment ID once the product is defined for an enrollment.
	<b>Note:</b> This field is auto-populated when a product is added for enrollment.
Start Date	Displays the date from when the product enrollment is effective.
	<b>Note:</b> By default, this date is set to the deal start date and cannot be changed.
End Date	Used to specify the date till when the product enrollment is effective for the accounts of the person.

**Note:**

The **Enroll Product** section appears in the **Product Enrollment** screen only when you are enrolling an account or accounts of a person for a product.

- **Products and Services** - Used to define the product and its services for enrollment. It contains the following fields in a grid:

Field Name	Field Description
Product	Used to indicate the product to which you want to enroll the accounts of a person.
	<p><b>Note:</b></p> <p>The <b>Search</b> (🔍) icon appears corresponding to the <b>Product</b> field. On clicking the <b>Search</b> icon, the <b>Fetch Eligible Products</b> window appears.</p> <p>On indicating the product, the description of the product appears in the <b>Product</b> field.</p> <p>Also, when you select a product, the <b>Standard Product</b>, <b>Product Services</b>, and the <b>Add-On Product Services</b> that are eligible for the product appears corresponding to the product.</p>
Start Date	Used to specify the date from when the product is effective for the accounts of the person.
	<b>Note:</b> By default this field is set to the deal start date and cannot be changed.
End Date	Used to specify the date till when the product is effective for the accounts of the person.
	<b>Note:</b> The <b>End Date</b> cannot be earlier than the <b>Start Date</b> .

## Enrolling an Account for a Product

### Procedure

To enroll an account for a product:

1. Search for the deal in the **Search Deal** zone of the **Deal Dashboard** screen.
2. In the **Search Results** section, click the link in the **Deal Information** column corresponding to the deal whose account you want to enroll for a product.

The **Deal Information** screen appears.

3. In the **Simulation Details** zone, ensure that the customer hierarchy section is expanded when you are enrolling an account for a product.
4. Click the **Edit** (✎) icon in the **Product Enrollment** column corresponding to the account which you want to enroll for a product.

The **Product Enrollment** screen appears. It contains the following sections:

- **Deal** - Displays basic information about the deal. It contains the following fields:

Field Name	Field Description
Deal Version Information	Displays the deal version to which the person or account belongs.
Account ID	Displays the account whose product enrollment details you want to view.  <b>Note:</b> This field appears in the following scenarios: <ul style="list-style-type: none"> <li>• If you are viewing the existing products enrolled for an account.</li> <li>• If you are editing the existing products enrolled for an account.</li> <li>• If you are enrolling an account for a product.</li> </ul>
Account Information	Displays the concatenated string of information about the account separated by a comma (,).  <b>Note:</b> This field appears when you are viewing, editing, or enrolling an account for a product.

- **Enrolled Products** - Lists the products to which the account is enrolled. It contains the following columns:

Column Name	Column Description
Enrollment ID	Displays the enrollment ID of the enrolled product.

Column Name	Column Description
Product Code	Displays the code of the enrolled product.
	<b>Note:</b> This column appears only when you are viewing the proposed product enrollment details of an account.
Product Description	Displays the description of the enrolled product.
	<b>Note:</b> It has a link. On clicking the link while viewing the existing product to which the account is enrolled, the <b>Product</b> screen appears where you can view the details of the respective product.
Version Description	Displays the version of the enrolled product.
	<b>Note:</b> This column appears only when you are viewing the proposed product enrollment details of an account.
Product Type	Displays the type of product which is enrolled for the account.
	<b>Note:</b> Whereas, if you click the link while editing the proposed products to which the account is enrolled, the details of the product and its services appears in the <b>Products and Services</b> section of the <b>Product Enrollment</b> screen where you can edit the respective product.  You cannot edit an enrolled product if the deal version has reached the <b>Finalized</b> status.
Product Category	Indicates the category to which the product belongs.
	<b>Note:</b> This column appears only when you are viewing the proposed product enrollment details of an account.
Priority	Displays the priority in which the enrolled product is considered for the account.
	<b>Note:</b> This column appears only when you are viewing the proposed product enrollment details of an account.
Start Date	Displays the date from when the enrolled product is effective for the account.
	<b>Note:</b> By default, this date is set to the deal start date and cannot be edited.
End Date	Displays the date till when the enrolled product is effective for the account.
	<b>Note:</b> The <b>End Date</b> cannot be earlier than the <b>Start Date</b> .

- **Proposed Products** - Lists the products that are proposed for the account for enrollment. It contains the following columns:

Column Name	Column Description
Product Code	Displays the code of the enrolled product.
Product Description	Displays the description of the enrolled product.
Version Description	Displays the version of the enrolled product.
Product Type	Displays the type of product which is enrolled for the account.
Product Category	Indicates the category to which the product belongs.
Priority	Displays the priority in which the enrolled product is considered for the account.
Start Date	Displays the date from when the enrolled product is effective for the account.
	<b>Note:</b> By default, this date is set to the deal start date and cannot be edited.
End Date	Displays the date till when the enrolled product is effective for the account.
	<b>Note:</b> The <b>End Date</b> cannot be earlier than the <b>Start Date</b> .

**Note:**

On clicking the **Broadcast** () icon corresponding to a proposed enrolled product, the details of the product appears in the **Enroll Product** and **Product and Services** sections for editing.

**Note:** You cannot edit an enrolled product if the deal or deal version has reached the **Finalized** status.

You can delete the proposed product to which the account is enrolled by clicking the **Delete** () icon corresponding to a proposed enrolled product.

- **System Recommended Products & Packages** - Lists the products that you have recommended for enrollment while creating the deal. It contains the following columns:

Column Name	Column Description
Product Code	Displays the code of the recommended product.
Product Description	Displays the description of the recommended product.
Version Description	Displays the version of the recommended product.
Product Type	Displays the type of product which is recommended for the account.
Product Category	Indicates the category to which the recommended product belongs.
Start Date	Displays the date from when the recommended product is effective for the account.
	<b>Note:</b> By default, this date is set to the deal start date and cannot be edited.

Column Name	Column Description
End Date	Displays the date till when the recommended product is effective for the account.
	<b>Note:</b> The <b>End Date</b> cannot be earlier than the <b>Start Date</b> .

- **Enroll Product** - The **Enroll Product** section contains the following fields:

Field Name	Field Description
Enrollment ID	Displays the enrollment ID once the product is defined for an enrollment.
	<b>Note:</b> This field is auto-populated when a product is added for enrollment.
Start Date	Displays the date from when the product enrollment is effective.
	<b>Note:</b> By default, this date is set to the deal start date and cannot be changed.
End Date	Used to specify the date till when the product enrollment is effective for the accounts of the person.

**Note:**

The **Enroll Product** section appears in the **Product Enrollment** screen only when you are enrolling an account or accounts of a person for a product.

- **Products and Services** - Used to define the product and its services for enrollment. It contains the following fields in a grid:

Field Name	Field Description
Product	Used to indicate the product to which you want to enroll the account.
	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to the <b>Product</b> field. On clicking the <b>Search</b> icon, the <b>Fetch Eligible Products</b> window appears. On indicating the product, the description of the product appears in the <b>Product</b> field. Also, when you select a product, the <b>Standard Product</b> , <b>Product Services</b> , and the <b>Add-On Product Services</b> that are eligible for the product appears corresponding to the product.
Start Date	Used to specify the date from when the product is effective for the account.
	<b>Note:</b> By default this field is set to the deal start date and cannot be changed.

Field Name	Field Description
End Date	Used to specify the date till when the product is effective for the account.
	<b>Note:</b> The <b>End Date</b> cannot be earlier than the <b>Start Date</b> .
Priority	Used to specify the priority in which you want the product to be considered while calculating the financial summary of the deal.
Inclusion	Used to indicate whether you want to include the services of the product for the account.
	<b>Note:</b> By default, all the check boxes of the services provided by the product are selected. You can exclude a service by deselecting the check box corresponding to the respective service.
Standard Product	Displays the standard product which is included within the main product.
Start Date	Used to specify the date from when the standard product is effective.
	<b>Note:</b> By default this field is set to the deal start date and cannot be changed.
End Date	Used to specify the date till when the standard product is effective.
	<b>Note:</b> The <b>End Date</b> cannot be earlier than the <b>Start Date</b> .
Inclusion	Used to indicate whether the standard product is used for enrollment.
Product Services	Displays the service that is a part of the standard product.
Start Date	Used to specify the date from when the service is effective.
	<b>Note:</b> By default this field is set to the deal start date and cannot be changed.
End Date	Used to specify the date till when the service is effective.
	<b>Note:</b> The <b>End Date</b> cannot be earlier than the <b>Start Date</b> .
Inclusion	Used to indicate whether the service is used for enrollment.
Add on Services	Displays the add-on service which is a part of the packaged product.
Start Date	Used to specify the date from when the add-on service is effective.
	<b>Note:</b> By default this field is set to the deal start date and cannot be changed.
End Date	Used to specify the date till when the add-on service is effective.
	<b>Note:</b> The <b>End Date</b> cannot be earlier than the <b>Start Date</b> .
Inclusion	Used to indicate whether the add-on service is used for enrollment.

5. Enter the required details in the **Products and Services** section.

6. Click **Save**.

The account is enrolled for a product.

## Deleting a Proposed Product Enrollment of an Account

**Procedure**

To delete a proposed product enrollment of an account:

1. Ensure that the customer hierarchy is expanded in the **Simulation Details** zone.
2. Click the **Edit** (✎) icon in the **Product Enrollment** column corresponding to the account whose proposed product enrollment you want to delete.

The **Product Enrollment** screen appears.

3. Ensure that the **Proposed Products** section is expanded in the **Product Enrollment** screen.
4. In the **Proposed Products** section, click the **Delete** (🗑) icon corresponding to the product that you want to delete.

A message appears confirming whether you want to delete the proposed product enrollment.

5. Click **OK**.

The proposed product enrollment of the account is deleted.

## Pricing and Commitments

The **Pricing and Commitments** screen allows you to do the following:

- View the original and proposed pricing of the price item
- Edit the proposed pricing of the price item
- Override the proposed pricing of the price item
- View the original and proposed commitments of the price item
- Edit the proposed commitments of the price item

The **Pricing and Commitments** screen contains the following sections:

- **Pricing** - Used to view the original and proposed pricing of the price item. It also allows you to edit or override the proposed pricing of the price item. It contains the following zones:
  - *Projected Pricing* on page 3054
  - *Original Pricing* on page 3060
- **Commitments** - Used to view the original and proposed commitments of the price item. It also allows you to edit the proposed commitments of the price item. It contains the following zones:
  - *Proposed Commitments* on page 3064
  - *Original Volume* on page 3064

## Projected Pricing

The **Projected Pricing** zone allows to view, edit, or override the proposed pricing of the price item. It contains the following field:

Field Name	Field Description
Override	Used to indicate whether you want to override the price item pricing.

In addition, the **Projected Pricing** zone contains the following sections:

- **Main** - Displays basic information about the price item pricing. It contains the following fields:

Field Name	Field Description
Price Assignment ID	<p>Displays the price assignment ID.</p> <p><b>Note:</b> It is a read-only field and cannot be edited. A new <b>Price Assignment ID</b> is generated if you override the proposed pricing of the price item.</p>
Price Item	<p>Displays the price item for which the proposed pricing is defined.</p> <p><b>Note:</b> It is a read-only field and cannot be edited.</p>
Start Date	<p>Use to specify the date from when the pricing of the price item is effective for the deal.</p> <p><b>Note:</b> By default the deal start date appears in this field. You can define a seasonal pricing for the price item by overriding the price item pricing with a price assignment start date greater than the deal start date.</p>

Field Name	Field Description
Price Assignment Type	<p>Used to indicate the type of price assignment. The valid values are:</p> <ul style="list-style-type: none"> <li>• <b>Regular</b> - Used to indicate that the pricing is used to generate regular bill segment.</li> <li>• <b>Post Processing</b> - Used to indicate that the pricing is used to generate post processing bill segment. This type of price assignment can be done on usage accounts. The post processing bill segment is generated when you generate the bill for the usage account and not when you bill the usage account through an invoice account.</li> </ul> <p><b>Note:</b> The post processing bill segment is generated when the <b>Post Processing Sequence (PPSEQ)</b> characteristic is defined for the price item and when the price item is associated with another price item using the <b>Price Item Relationship Type</b>.</p> <ul style="list-style-type: none"> <li>• <b>Post Processing – Invoice Based</b> - Used to indicate that the pricing is used to generate post processing bill segment. This type of price assignment can be done on an invoice account, and, as a result, the post processing bill segment is generated on the invoice account.</li> </ul> <p><b>Note:</b> This is not applicable for price items whose <b>Price Item Usage</b> field is set to <b>Pricing</b>.</p> <ul style="list-style-type: none"> <li>• <b>Post Processing – Price Item Based</b> - Used to indicate that the pricing is used to generate post processing bill segment. This type of price assignment can be done on both invoice and usage accounts, but the post processing bill segment is generated only on the invoice account.</li> </ul> <p><b>Note:</b> This field is not applicable for price items whose <b>Price Item Usage</b> field is set to <b>Pricing</b>.</p>
End Date	Used to specify the date till when the pricing of the price item is effective for the deal.
Pricing Currency	Used to indicate the currency in which you want to define the pricing of the price item.
Pricing Eligibility	<p>Used to select the pricing eligibility criteria for the price item pricing.</p> <p><b>Note:</b> If you select the check box you can define the pricing eligibility of the price item in the <b>Price Component</b> section of this zone.</p>
Print Zero	<p>Used to indicate whether zero pricing should be displayed in the bill. The valid values are:</p> <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>

Field Name	Field Description
Rate Schedule	Used to specify the rate schedule that you want to use while defining price item pricing.
	<p><b>Note:</b></p> <p>Rate schedules control how the bills for the price item will be calculated.</p> <p>The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Rate Schedule Search</b> window appears where you can search for the respective rate schedule.</p>

- **TFM Information** - Displays the transaction information mapped with the price item. It contains the following fields:

Field Name	Field Description
Transaction Rating Criteria	Used to indicate how and when the transaction legs mapped to the price item are rated. The valid values are: <ul style="list-style-type: none"> <li>• Aggregate Transactions and Then Rate Aggregated SQs</li> <li>• Do Not Rate Transactions</li> <li>• Rate Transaction and Aggregate Calc Lines Across Transaction</li> <li>• Rate Transactions</li> </ul>
Aggregation Schedule	Used to indicate the transaction aggregation cycle. The valid values are: <ul style="list-style-type: none"> <li>• Daily</li> <li>• Weekly</li> <li>• Monthly</li> <li>• Quarterly</li> <li>• Yearly</li> </ul>
Do Not Aggregate Switch	Used to Indicate whether aggregation is required while rating the transactions before billing. The valid values are: <ul style="list-style-type: none"> <li>• Yes - Used to Indicate aggregation is not required while rating the transactions before billing.</li> <li>• No - Used to Indicate aggregation is required while rating the transactions before billing.</li> </ul>
Ignore Transaction	Used to indicate whether the transactions mapped to the price item is considered for billing. The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>

- **Pricing Parameter Information** - Displays the parameters based on which the price item pricing is defined. It contains the following columns:

Column Name	Column Description
Parameter	Indicates the parameter that is associated with the price item pricing.  <b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Price Item Parameter Search</b> window appears. The parameter search results displays only those parameters where the <b>Price Item</b> check box is selected.
Parameter Value	Displays the value of the parameter.

- **Characteristics** - Lists the characteristics defined for the price item pricing. It contains the following columns:

Column Name	Column Description
Effective Date	Used to specify the date from when the characteristic is effective for the price item pricing.
Characteristic Type	Used to indicate the characteristic type.  <b>Note:</b> The list includes only those characteristic types where the characteristic entity is set to <b>Projected Pricing</b> .
Characteristic Value	Used to specify the value for the characteristic type.  <b>Note:</b> If you select a predefined characteristic type, the <b>Search</b> (🔍) icon appears corresponding to the <b>Characteristic Value</b> field. On clicking the <b>Search</b> icon, the <b>Predefined Characteristic Search</b> window appears. On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the <b>Characteristic Value</b> field.

- **Price Component** - Used to define a list of price components of the rate component that you want to map with the price item pricing. It contains the following columns:

Column Name	Column Description
Rate Component	Displays the concatenated string of information about the rate component separated by comma (.).  <b>Note:</b> It is a read-only field and cannot be edited. This ID is generated automatically when you define the tiering setup of the rate component.
Display Sequence	Used to specify the sequence of price component whose rate is used for calculating the pricing of the price item.
Description	Used to specify the description of the price component.

Column Name	Column Description										
Show Price Component	Used to indicate whether you want to display the price component in the bill.										
Rate	Used to specify the rate defined for the price component.										
Eligibility and Tier Details	Used to specify the tiering criteria and eligibility criteria of the price component for the price item pricing.										
Tier Details	<p>On clicking the <b>Add</b>  icon, you can define the <b>Tiering Criteria</b> of the price component for the price item pricing. It contains the following columns:</p> <table border="1"> <thead> <tr> <th>Column Name</th> <th>Column Description</th> </tr> </thead> <tbody> <tr> <td>Display Sequence</td> <td>Used to specify the sequence of the tiering criteria.</td> </tr> <tr> <td>Tiering Criterion</td> <td>Used to indicate the tiering criteria.</td> </tr> <tr> <td>Lower Limit</td> <td>Used to specify the lower limit of the tiering range.</td> </tr> <tr> <td>Upper Limit</td> <td>Used to specify the upper limit of the tiering range.</td> </tr> </tbody> </table> <p><b>Note:</b> You can define the tiering criteria of a price component only when the <b>Tiering Type</b> of its rate component is <b>STEP</b> or <b>THRESHOLD</b>.</p>	Column Name	Column Description	Display Sequence	Used to specify the sequence of the tiering criteria.	Tiering Criterion	Used to indicate the tiering criteria.	Lower Limit	Used to specify the lower limit of the tiering range.	Upper Limit	Used to specify the upper limit of the tiering range.
Column Name	Column Description										
Display Sequence	Used to specify the sequence of the tiering criteria.										
Tiering Criterion	Used to indicate the tiering criteria.										
Lower Limit	Used to specify the lower limit of the tiering range.										
Upper Limit	Used to specify the upper limit of the tiering range.										

Column Name	Column Description														
Eligibility Details	<p data-bbox="690 218 1463 310">On clicking the <b>Add</b>  icon, you can define the eligibility criteria of the price component for the price item pricing. It contains the following columns:</p> <table border="1" data-bbox="690 338 1463 1948"> <thead> <tr> <th data-bbox="690 338 1027 386">Column Name</th> <th data-bbox="1027 338 1463 386">Column Description</th> </tr> </thead> <tbody> <tr> <td data-bbox="690 386 1027 499">Display Sequence</td> <td data-bbox="1027 386 1463 499">Used to specify the order in which the eligibility criteria should be executed in the rule.</td> </tr> <tr> <td data-bbox="690 499 1027 831">Parameter</td> <td data-bbox="1027 499 1463 831">           Used to indicate the left hand side parameter which you want to use along with the price item for price determination.           <div data-bbox="1036 657 1455 814" style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><b>Note:</b> The <b>Search</b>  icon appears corresponding to the <b>Parameter</b> field. ## Original Pricing

The **Original Pricing** zone allows you to view the details of the existing pricing of the price item. It contains the following sections:

- **Main** - Displays basic information about the price item pricing. It contains the following fields:

Field Name	Field Description
Price Assignment ID	Displays the price assignment ID.
Price Item	Displays the price item for which the original pricing is defined.
Start Date	Displays the date from when the pricing of the price item is effective for the deal.
Price Assignment Type	<p>Indicates the type of price assignment. The valid values are:</p> <ul style="list-style-type: none"> <li>• <b>Regular</b> - Indicates that the pricing is used to generate regular bill segment.</li> <li>• <b>Post Processing</b> - Indicates that the pricing is used to generate post processing bill segment. This type of price assignment can be done on usage accounts. The post processing bill segment is generated when you generate the bill for the usage account and not when you bill the usage account through an invoice account.</li> </ul> <div style="border: 1px solid black; padding: 5px; margin: 5px 0;"> <p><b>Note:</b> The post processing bill segment is generated when the <b>Post Processing Sequence (PPSEQ)</b> characteristic is defined for the price item and when the price item is associated with another price item using the <b>Price Item Relationship Type</b>.</p> </div> <ul style="list-style-type: none"> <li>• <b>Post Processing – Invoice Based</b> - Indicates that the pricing is used to generate post processing bill segment. This type of price assignment can be done on an invoice account, and, as a result, the post processing bill segment is generated on the invoice account.</li> </ul> <div style="border: 1px solid black; padding: 5px; margin: 5px 0;"> <p><b>Note:</b> This is not applicable for price items whose <b>Price Item Usage</b> field is set to <b>Pricing</b>.</p> </div> <ul style="list-style-type: none"> <li>• <b>Post Processing – Price Item Based</b> - Indicates that the pricing must be used to generate post processing bill segment. This type of price assignment can be done on both invoice and usage accounts, but the post processing bill segment is generated only on the invoice account.</li> </ul> <div style="border: 1px solid black; padding: 5px; margin: 5px 0;"> <p><b>Note:</b> This is not applicable for price items whose <b>Price Item Usage</b> field is set to <b>Pricing</b>.</p> </div>
End Date	Displays the date till when the pricing of the price item is effective for the deal.

Field Name	Field Description
Pricing Currency	Indicates the currency in which you want to define the pricing of the price item.
Pricing Eligibility	Indicates whether the pricing eligibility criteria is defined for the price item pricing in the <b>Price Component</b> section.
Print Zero	Indicates whether zero pricing should be displayed in the bill. The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>
Rate Schedule	Displays the rate schedule that you want to use while defining price item pricing.
	<b>Note:</b> Rate schedules control how the bills for the price item is calculated.

- **TFM Information** - Displays the transaction information mapped with the price item. It contains the following fields:

Field Name	Field Description
Transaction Rating Criteria	Indicates how and when the transaction legs mapped to the price item are rated. The valid values are: <ul style="list-style-type: none"> <li>• Aggregate Transactions and Then Rate Aggregated SQs</li> <li>• Do Not Rate Transactions</li> <li>• Rate Transaction and Aggregate Calc Lines Across Transaction</li> <li>• Rate Transactions</li> </ul>
Do Not Aggregate Switch	Indicates whether aggregation is required while rating the transactions before billing. The valid values are: <ul style="list-style-type: none"> <li>• <b>Yes</b> - Indicates aggregation is not required while rating the transactions before billing.</li> <li>• <b>No</b> - Indicates aggregation is required while rating the transactions before billing.</li> </ul>
Ignore Transaction	Indicates whether the transactions mapped to the price item is considered for billing. The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>
Aggregation Schedule	Indicates the transaction aggregation cycle. The valid values are: <ul style="list-style-type: none"> <li>• Daily</li> <li>• Weekly</li> <li>• Monthly</li> <li>• Quarterly</li> <li>• Yearly</li> </ul>

- **Pricing Parameter Information** - Displays the parameters based on which the price item pricing is defined. It contains the following columns:

Column Name	Column Description
Parameter	Indicates the parameter that is associated with the price item pricing.
Parameter Value	Displays the value of the parameter.

- **Characteristics** - Lists the characteristics defined for the price item pricing. It contains the following columns:

Column Name	Column Description
Effective Date	Displays the date from when the characteristic is effective for the price item pricing.
Characteristic Type	Indicates the characteristic type.
Characteristic Value	Displays the value for the characteristic type.

- **Price Component** - Lists the price components of the rate component that is mapped with the price item pricing. It contains the following columns:

Column Name	Column Description										
Rate Component	Displays the concatenated string of information about the rate component separated by comma (,).										
Display Sequence	Displays the sequence of price component whose rate is used for calculating the pricing of the price item.										
Description	Displays the description of the price component.										
Show Price Component	Indicates whether you want to display the price component in the bill.										
Rate	Displays the rate defined for the price component.										
Eligibility and Tier Details	Displays the tiering criteria and eligibility criteria for the price item pricing.										
Tier Details	<p>Displays information about the tiering criteria of the price component for the price item pricing. It contains the following columns:</p> <table border="1"> <thead> <tr> <th>Column Name</th> <th>Column Description</th> </tr> </thead> <tbody> <tr> <td>Display Sequence</td> <td>Displays the sequence of the tiering criteria.</td> </tr> <tr> <td>Tiering Criterion</td> <td>Indicates the tiering criteria.</td> </tr> <tr> <td>Lower Limit</td> <td>Displays the lower limit of the tiering range.</td> </tr> <tr> <td>Upper Limit</td> <td>Displays the upper limit of the tiering range.</td> </tr> </tbody> </table> <p><b>Note:</b> You can define the tiering criteria of a price component only when the <b>Tiering Type</b> of its rate component is <b>STEP</b> or <b>THRESHOLD</b>.</p>	Column Name	Column Description	Display Sequence	Displays the sequence of the tiering criteria.	Tiering Criterion	Indicates the tiering criteria.	Lower Limit	Displays the lower limit of the tiering range.	Upper Limit	Displays the upper limit of the tiering range.
Column Name	Column Description										
Display Sequence	Displays the sequence of the tiering criteria.										
Tiering Criterion	Indicates the tiering criteria.										
Lower Limit	Displays the lower limit of the tiering range.										
Upper Limit	Displays the upper limit of the tiering range.										

Column Name	Column Description												
Eligibility Details	<p>Displays information about the eligibility criteria of the price component for the price item pricing. It contains the following columns:</p> <table border="1" data-bbox="695 296 1459 1144"> <thead> <tr> <th data-bbox="695 296 1027 344">Column Name</th> <th data-bbox="1027 296 1459 344">Column Description</th> </tr> </thead> <tbody> <tr> <td data-bbox="695 344 1027 457">Display Sequence</td> <td data-bbox="1027 344 1459 457">Displays the order in which the eligibility criteria is executed in the rule.</td> </tr> <tr> <td data-bbox="695 457 1027 571">Parameter</td> <td data-bbox="1027 457 1459 571">Indicates the left hand side parameter which is used along with the price item for price determination.</td> </tr> <tr> <td data-bbox="695 571 1027 716">Operator</td> <td data-bbox="1027 571 1459 716">Indicates the relational operator that is used to define the relation between the left hand side and the right hand side parameters.</td> </tr> <tr> <td data-bbox="695 716 1027 968">Parameter Value Type</td> <td data-bbox="1027 716 1459 968">           Indicates the type of pricing eligibility. The valid values are:           <ul style="list-style-type: none"> <li>• <b>Parameter</b> - Indicates the type of parameter.</li> <li>• <b>Value</b> - Indicates the type of value.</li> </ul> </td> </tr> <tr> <td data-bbox="695 968 1027 1144">Parameter</td> <td data-bbox="1027 968 1459 1144">Displays the value for the <b>Parameter Value Type</b> as the right hand side parameter which you want to use along with the price item for price determination.</td> </tr> </tbody> </table>	Column Name	Column Description	Display Sequence	Displays the order in which the eligibility criteria is executed in the rule.	Parameter	Indicates the left hand side parameter which is used along with the price item for price determination.	Operator	Indicates the relational operator that is used to define the relation between the left hand side and the right hand side parameters.	Parameter Value Type	Indicates the type of pricing eligibility. The valid values are: <ul style="list-style-type: none"> <li>• <b>Parameter</b> - Indicates the type of parameter.</li> <li>• <b>Value</b> - Indicates the type of value.</li> </ul>	Parameter	Displays the value for the <b>Parameter Value Type</b> as the right hand side parameter which you want to use along with the price item for price determination.
Column Name	Column Description												
Display Sequence	Displays the order in which the eligibility criteria is executed in the rule.												
Parameter	Indicates the left hand side parameter which is used along with the price item for price determination.												
Operator	Indicates the relational operator that is used to define the relation between the left hand side and the right hand side parameters.												
Parameter Value Type	Indicates the type of pricing eligibility. The valid values are: <ul style="list-style-type: none"> <li>• <b>Parameter</b> - Indicates the type of parameter.</li> <li>• <b>Value</b> - Indicates the type of value.</li> </ul>												
Parameter	Displays the value for the <b>Parameter Value Type</b> as the right hand side parameter which you want to use along with the price item for price determination.												
Is True	<p>Indicates what happens when the condition is true (satisfied). The valid values are:</p> <ul style="list-style-type: none"> <li>• <b>Check next condition</b> - Indicates that the condition with the consecutive sequence number is executed.</li> <li>• <b>Rule is false</b> - Indicates that the action specified in the <b>Rule False Action</b> field is executed.</li> <li>• <b>Rule is true</b> - Indicates that the action specified in the <b>Rule True Action</b> field is executed.</li> </ul>												
Is False	<p>Indicates what happens when the condition is false (not satisfied). The valid values are:</p> <ul style="list-style-type: none"> <li>• <b>Check next condition</b> - Indicates that the condition with the consecutive sequence number is executed.</li> <li>• <b>Rule is false</b> - Indicates that the action specified in the <b>Rule False Action</b> field is executed.</li> <li>• <b>Rule is true</b> - Indicates that the action specified in the <b>Rule True Action</b> field is executed.</li> </ul>

**Proposed Commitments**

The **Proposed Commitments** zone allows to view or edit the proposed commitments of the price item for a person or account based on which the revenue is calculated for the deal. It contains the following columns:

Column Name	Column Description
Price Item	Displays the price item.
Pricing Parameters	Indicates the parameter based on which the pricing is defined for the price item.
SQI	Indicates the service quantity identifier that is associated with the price item.
Service Quantity	Used to specify the proposed SQI value using which the rates engine calculates the price item pricing.

**Editing a Proposed Price Item Pricing****Prerequisites**

To edit a proposed price item pricing, you should have:

- Values defined for the **Price Assignment Type** in the **PA\_TYPE\_FLAG** lookup field
- Currencies defined in the application
- Rate schedules, rate versions, and rate components defined in the application

- Values defined for **Transaction Rating Criteria** in the **TXN\_RATING\_CRITERIA** lookup field
- Values defined for **Pricing Rule Type** in the **PRC\_RULE\_TYPE\_FLG** lookup field
- Aggregation schedules defined in the application
- Parameters defined in the application (where the **Price Item** option is selected in the **Parameter Usage** section)
- Characteristic types defined in the application (where the characteristic entity is set to **Price Item Pricing**)
- Transactions mapped to the price item defined in the application
- Tiering criteria defined in the application
- Tiering setup for the rate components defined in the application
- Pricing eligibility defined in the application

### **Procedure**

To edit a proposed price item pricing:

1. Ensure that the **Projected Pricing** zone is expanded in the **Pricing and Commitments** screen when you are editing the *proposed* pricing of a price item.

The **Projected Pricing** zone contains the following field:

Field Name	Field Description	Mandatory (Yes or No)
Override	Used to indicate whether you want to override the price item pricing.	No
		<b>Note:</b> This field is required only while overriding the price item pricing.

In addition, the **Projected Pricing** zone contains the following sections:

- **Main** - Used to specify basic details about the price item pricing. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Price Assignment ID	Displays the price assignment ID.	Not Applicable
	<b>Note:</b> It is a read-only field and cannot be edited.	
Price Item	Displays the price item whose pricing you want to edit.	Not Applicable
	<b>Note:</b> It is a read-only field and cannot be edited.	
Start Date	Use to specify the date from when the pricing of the price item is effective for the deal.	Yes
	<b>Note:</b> By default the deal start date appears in this field.	

Field Name	Field Description	Mandatory (Yes or No)
Price Assignment Type	<p>Used to indicate the type of price assignment. The valid values are:</p> <ul style="list-style-type: none"> <li>• <b>Regular</b> - Used to indicate that the pricing is used to generate regular bill segment.</li> <li>• <b>Post Processing</b> - Used to indicate that the pricing is used to generate post processing bill segment. This type of price assignment can be done on usage accounts. The post processing bill segment is generated when you generate the bill for the usage account and not when you bill the usage account through an invoice account.</li> </ul> <div data-bbox="740 737 1192 978" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> The post processing bill segment is generated when the <b>Post Processing Sequence (PPSEQ)</b> characteristic is defined for the price item and when the price item is associated with another price item using the <b>Price Item Relationship Type</b>.</p> </div> <ul style="list-style-type: none"> <li>• <b>Post Processing – Invoice Based</b> - Used to indicate that the pricing is used to generate post processing bill segment. This type of price assignment can be done on an invoice account, and, as a result, the post processing bill segment is generated on the invoice account.</li> </ul> <div data-bbox="740 1234 1192 1350" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> This is not applicable for price items whose <b>Price Item Usage</b> field is set to <b>Pricing</b>.</p> </div> <ul style="list-style-type: none"> <li>• <b>Post Processing – Price Item Based</b> - Used to indicate that the pricing is used to generate post processing bill segment. This type of price assignment can be done on both invoice and usage accounts, but the post processing bill segment is generated only on the invoice account.</li> </ul> <div data-bbox="740 1606 1192 1722" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> This field is not applicable for price items whose <b>Price Item Usage</b> field is set to <b>Pricing</b>.</p> </div>	Yes
End Date	Used to specify the date till when the pricing of the price item is effective for the deal.	No
Pricing Currency	Used to indicate the currency in which you want to define the pricing of the price item.	Yes

Field Name	Field Description	Mandatory (Yes or No)
Pricing Eligibility	Used to define the pricing eligibility criteria for the price item pricing.	No
	<b>Note:</b> If you select the check box you can define the pricing eligibility of the price item in the <b>Price Component</b> section of this zone.	
Print Zero	Used to indicate whether zero pricing should be displayed in the bill. The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>	Yes
Rate Schedule	Used to specify the rate schedule that you want to use while defining price item pricing.	Yes
	<b>Note:</b> Rate schedules control how the bills for the price item will be calculated.  The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Rate Schedule Search</b> window appears where you can search for the respective rate schedule.	

- **TFM Information** - Used to map the transaction details with the price item. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Transaction Rating Criteria	Used to indicate how and when the transaction legs mapped to the price item are rated. The valid values are: <ul style="list-style-type: none"> <li>• Aggregate Transactions and Then Rate Aggregated SQs</li> <li>• Do Not Rate Transactions</li> <li>• Rate Transaction and Aggregate Calc Lines Across Transaction</li> <li>• Rate Transactions</li> </ul>	Yes
Aggregation Schedule	Used to indicate the transaction aggregation cycle. The valid values are: <ul style="list-style-type: none"> <li>• Daily</li> <li>• Weekly</li> <li>• Monthly</li> <li>• Quarterly</li> <li>• Yearly</li> </ul>	Yes

Field Name	Field Description	Mandatory (Yes or No)
Do Not Aggregate Switch	Used to Indicate whether aggregation is required while rating the transactions before billing. The valid values are: <ul style="list-style-type: none"> <li>• Yes - Used to Indicate aggregation is not required while rating the transactions before billing.</li> <li>• No - Used to Indicate aggregation is required while rating the transactions before billing.</li> </ul>	Yes
Ignore Transaction	Used to indicate whether the transactions mapped to the price item is considered for billing. The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>	Yes

- **Parameters** - Used to associate the parameters based on which you want to define the pricing of the price item. It contains the following columns:

Column Name	Column Description	Mandatory (Yes or No)
Parameter	Used to indicate the parameter that you want to associate with the price item pricing.	Yes (Conditional)
	<p><b>Note:</b></p> <p>The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Price Item Parameter Search</b> window appears.</p> <p>The parameter search results displays only those parameters where the <b>Price Item</b> check box is selected.</p>	<p><b>Note:</b> This field is required while associating parameters with the price item pricing.</p>
Parameter Value	Used to specify the value of the parameter.	Yes (Conditional)
		<p><b>Note:</b> This field is required while associating parameters with the price item pricing.</p>

- **Characteristics** - Used to define a list of characteristics for the price item pricing. It contains the following columns:

Column Name	Column Description	Mandatory (Yes or No)
Effective Date	Used to specify the date from when the characteristic is effective for price item pricing.	Yes (Conditional)
		<b>Note:</b> This field is required while defining characteristics for the price item pricing
Characteristic Type	Used to indicate the characteristic type.  <b>Note:</b> The list includes only those characteristic types where the characteristic entity is set to <b>Projected Pricing</b> .	Yes (Conditional)
		<b>Note:</b> This field is required while defining characteristics for the price item pricing
Characteristic Value	Used to specify the value for the characteristic type.  <b>Note:</b> If you select a predefined characteristic type, the <b>Search</b> (🔍) icon appears corresponding to the <b>Characteristic Value</b> field. On clicking the <b>Search</b> icon, the <b>Predefined Characteristic Search</b> window appears.  On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the <b>Characteristic Value</b> field.	Yes (Conditional)
		<b>Note:</b> This field is required while defining characteristics for the price item pricing

- **Price Component** - Used to define a list of price components of the rate component that you want to map with the price item pricing. It contains the following columns:

Column Name	Column Description	Mandatory (Yes or No)
Rate Component	Displays the concatenated string of information about the rate component separated by comma (,).  <b>Note:</b> It is a read-only field and cannot be edited. This ID is generated automatically when you define the tiering setup of the rate component.	Not applicable
Display Sequence	Used to specify the sequence of price component whose rate is used for calculating the pricing of the price item.	Yes
Description	Used to specify the description of the price component.	Yes

Column Name	Column Description	Mandatory (Yes or No)										
Show Price Component	Used to indicate whether you want to display the price component in the bill.	Yes (Conditional)										
		<b>Note:</b> This field is required for displaying the price component in the bill.										
Rate	Used to specify the rate defined for the price component.	Yes										
Eligibility and Tier Details	Used to specify the tiering criteria and eligibility criteria of the price component for the price item pricing.	Yes (Conditional)										
		<b>Note:</b> This field is required for specifying the tiering criteria and eligibility criteria of the price component for the price item pricing.										
Tier Details	<p>On clicking the <b>Add</b>  icon, you can view and edit the <b>Tiering Criteria</b> of the price component for the price item pricing. It contains the following columns:</p> <table border="1"> <thead> <tr> <th>Column Name</th> <th>Column Description</th> </tr> </thead> <tbody> <tr> <td>Display Sequence</td> <td>Used to specify the sequence of the tiering criteria.</td> </tr> <tr> <td>Tiering Criterion</td> <td>Used to indicate the tiering criteria.</td> </tr> <tr> <td>Lower Limit</td> <td>Used to specify the lower limit of the tiering range.</td> </tr> <tr> <td>Upper Limit</td> <td>Used to specify the upper limit of the tiering range.</td> </tr> </tbody> </table> <p><b>Note:</b> You can edit the tiering criteria of a price component only when the <b>Tiering Type</b> of its rate component is <b>STEP</b> or <b>THRESHOLD</b>.</p>	Column Name	Column Description	Display Sequence	Used to specify the sequence of the tiering criteria.	Tiering Criterion	Used to indicate the tiering criteria.	Lower Limit	Used to specify the lower limit of the tiering range.	Upper Limit	Used to specify the upper limit of the tiering range.	Yes (Conditional)
		Column Name	Column Description									
		Display Sequence	Used to specify the sequence of the tiering criteria.									
		Tiering Criterion	Used to indicate the tiering criteria.									
		Lower Limit	Used to specify the lower limit of the tiering range.									
		Upper Limit	Used to specify the upper limit of the tiering range.									
		<b>Note:</b> This field is required for specifying the tiering criteria of the price component for the price item pricing.										

Column Name	Column Description	Mandatory (Yes or No)		
Eligibility Details	On clicking the <b>Add</b>  icon, you can view and edit the eligibility criteria of the price component for the price item pricing. It contains the following columns:	Yes (Conditional)		
	<table border="1"> <thead> <tr> <th data-bbox="690 407 906 449">Column Name</th> <th data-bbox="906 407 1182 449">Column Description</th> </tr> </thead> </table>	Column Name	Column Description	<p><b>Note:</b> This field is required for specifying the eligibility criteria of the price component for the price item pricing.</p>
	Column Name	Column Description		
	Display Sequence	Used to specify the order in which the eligibility criteria should be executed in the rule.		
	Parameter	<p>Used to indicate the left hand side parameter which you want to use along with the price item for price determination.</p> <p><b>Note:</b> The <b>Search</b>  icon appears corresponding to the <b>Parameter</b> field. On clicking the <b>Search</b> icon, the <b>Parameter Search</b> window appears.</p>		
	Operator	Used to specify the relational operator to define the relation between the left hand side and right hand side parameters.		
	Parameter Value Type	<p>Used to indicate the type of pricing eligibility. The valid values are:</p> <ul style="list-style-type: none"> <li>• <b>Parameter</b> - Used to indicate the type of parameter.</li> <li>• <b>Value</b> - Used to indicate the type of value.</li> </ul>		
Parameter	Used to specify the value for the <b>Parameter Value Type</b> as the right hand side parameter which you want to use along with the price item for price determination.			
	<p><b>Note:</b></p>			

2. Modify the required details in the **Projected Pricing** zone.
3. Click **Save**

The changes made to the proposed price item pricing are saved.

## Overriding a Proposed Price Item Pricing

### Prerequisites

To override a proposed price item pricing, you should have:

- Values defined for the **Price Assignment Type** in the **PA\_TYPE\_FLAG** lookup field
- Currencies defined in the application
- Rate schedules, rate versions, and rate components defined in the application
- Values defined for **Transaction Rating Criteria** in the **TXN\_RATING\_CRITERIA** lookup field
- Values defined for **Pricing Rule Type** in the **PRC\_RULE\_TYPE\_FLG** lookup field
- Aggregation schedules defined in the application
- Parameters defined in the application (where the **Price Item** option is selected in the **Parameter Usage** section)
- Characteristic types defined in the application (where the characteristic entity is set to **Price Item Pricing**)
- Transactions mapped to the price item defined in the application
- Tiering criteria defined in the application
- Tiering setup for the rate components defined in the application
- Pricing eligibility defined in the application

### Procedure

To override a proposed price item pricing:

1. Ensure that the **Projected Pricing** zone is expanded in the **Pricing and Commitments** screen when you are overriding the *proposed pricing* of a price item.

The **Projected Pricing** zone contains the following field:

Field Name	Field Description	Mandatory (Yes or No)
Override	Used to indicate whether you want to override the price item pricing.	Yes

#### **Note:**

A new price assignment ID is created when you override a proposed price item pricing.

While overriding a price item pricing, you can define a seasonal pricing for a price item by changing the pricing effective date to a date greater than the deal start date.

In addition, the **Projected Pricing** zone contains the following sections:

- **Main** - Used to specify basic details about the price item pricing. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Price Assignment ID	Displays the price assignment ID.	Not Applicable
	<b>Note:</b> It is a read-only field and cannot be edited.	
Price Item	Displays the price item whose pricing you want to edit.	Not Applicable
	<b>Note:</b> It is a read-only field and cannot be edited.	
Start Date	Use to specify the date from when the pricing of the price item is effective for the deal.	Yes
	<b>Note:</b> By default the deal start date appears in this field.	

Field Name	Field Description	Mandatory (Yes or No)
Price Assignment Type	<p>Used to indicate the type of price assignment. The valid values are:</p> <ul style="list-style-type: none"> <li>• <b>Regular</b> - Used to indicate that the pricing is used to generate regular bill segment.</li> <li>• <b>Post Processing</b> - Used to indicate that the pricing is used to generate post processing bill segment. This type of price assignment can be done on usage accounts. The post processing bill segment is generated when you generate the bill for the usage account and not when you bill the usage account through an invoice account.</li> </ul> <div data-bbox="740 737 1192 978" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> The post processing bill segment is generated when the <b>Post Processing Sequence (PPSEQ)</b> characteristic is defined for the price item and when the price item is associated with another price item using the <b>Price Item Relationship Type</b>.</p> </div> <ul style="list-style-type: none"> <li>• <b>Post Processing – Invoice Based</b> - Used to indicate that the pricing is used to generate post processing bill segment. This type of price assignment can be done on an invoice account, and, as a result, the post processing bill segment is generated on the invoice account.</li> </ul> <div data-bbox="740 1234 1192 1346" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> This is not applicable for price items whose <b>Price Item Usage</b> field is set to <b>Pricing</b>.</p> </div> <ul style="list-style-type: none"> <li>• <b>Post Processing – Price Item Based</b> - Used to indicate that the pricing is used to generate post processing bill segment. This type of price assignment can be done on both invoice and usage accounts, but the post processing bill segment is generated only on the invoice account.</li> </ul> <div data-bbox="740 1608 1192 1719" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> This field is not applicable for price items whose <b>Price Item Usage</b> field is set to <b>Pricing</b>.</p> </div>	Yes
End Date	Used to specify the date till when the pricing of the price item is effective for the deal.	No
Pricing Currency	Used to indicate the currency in which you want to define the pricing of the price item.	Yes

Field Name	Field Description	Mandatory (Yes or No)
Pricing Eligibility	Used to define the pricing eligibility criteria for the price item pricing.	No
	<b>Note:</b> If you select the check box you can define the pricing eligibility of the price item in the <b>Price Component</b> section of this zone.	
Print Zero	Used to indicate whether zero pricing should be displayed in the bill. The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>	Yes
Rate Schedule	Used to specify the rate schedule that you want to use while defining price item pricing.	Yes
	<b>Note:</b> Rate schedules control how the bills for the price item will be calculated.  The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Rate Schedule Search</b> window appears where you can search for the respective rate schedule.	

- **TFM Information** - Used to map the transaction details with the price item. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Transaction Rating Criteria	Used to indicate how and when the transaction legs mapped to the price item are rated. The valid values are: <ul style="list-style-type: none"> <li>• Aggregate Transactions and Then Rate Aggregated SQs</li> <li>• Do Not Rate Transactions</li> <li>• Rate Transaction and Aggregate Calc Lines Across Transaction</li> <li>• Rate Transactions</li> </ul>	Yes
Aggregation Schedule	Used to indicate the transaction aggregation cycle. The valid values are: <ul style="list-style-type: none"> <li>• Daily</li> <li>• Weekly</li> <li>• Monthly</li> <li>• Quarterly</li> <li>• Yearly</li> </ul>	Yes

Field Name	Field Description	Mandatory (Yes or No)
Do Not Aggregate Switch	Used to Indicate whether aggregation is required while rating the transactions before billing. The valid values are: <ul style="list-style-type: none"> <li>• Yes - Used to Indicate aggregation is not required while rating the transactions before billing.</li> <li>• No - Used to Indicate aggregation is required while rating the transactions before billing.</li> </ul>	Yes
Ignore Transaction	Used to indicate whether the transactions mapped to the price item is considered for billing. The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>	Yes

- **Parameters** - Used to associate the parameters based on which you want to define the pricing of the price item. It contains the following columns:

Column Name	Column Description	Mandatory (Yes or No)
Parameter	Used to indicate the parameter that you want to associate with the price item pricing.	Yes (Conditional)
	<p><b>Note:</b></p> <p>The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Price Item Parameter Search</b> window appears.</p> <p>The parameter search results displays only those parameters where the <b>Price Item</b> check box is selected.</p>	<p><b>Note:</b> This field is required while associating parameters with the price item pricing.</p>
Parameter Value	Used to specify the value of the parameter.	Yes (Conditional)
		<p><b>Note:</b> This field is required while associating parameters with the price item pricing.</p>

- **Characteristics** - Used to define a list of characteristics for the price item pricing. It contains the following columns:

Column Name	Column Description	Mandatory (Yes or No)
Effective Date	Used to specify the date from when the characteristic is effective for price item pricing.	Yes (Conditional)
		<b>Note:</b> This field is required while defining characteristics for the price item pricing
Characteristic Type	Used to indicate the characteristic type.  <b>Note:</b> The list includes only those characteristic types where the characteristic entity is set to <b>Projected Pricing</b> .	Yes (Conditional)
		<b>Note:</b> This field is required while defining characteristics for the price item pricing
Characteristic Value	Used to specify the value for the characteristic type.  <b>Note:</b> If you select a predefined characteristic type, the <b>Search</b> (🔍) icon appears corresponding to the <b>Characteristic Value</b> field. On clicking the <b>Search</b> icon, the <b>Predefined Characteristic Search</b> window appears.  On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the <b>Characteristic Value</b> field.	Yes (Conditional)
		<b>Note:</b> This field is required while defining characteristics for the price item pricing

- **Price Component** - Used to define a list of price components of the rate component that you want to map with the price item pricing. It contains the following columns:

Column Name	Column Description	Mandatory (Yes or No)
Rate Component	Displays the concatenated string of information about the rate component separated by comma (,).	Not applicable
	<b>Note:</b> It is a read-only field and cannot be edited.  This ID is generated automatically when you define the tiering setup of the rate component.	
Display Sequence	Used to specify the sequence of price component whose rate is used for calculating the pricing of the price item.	Yes
Description	Used to specify the description of the price component.	Yes

Column Name	Column Description	Mandatory (Yes or No)										
Show Price Component	Used to indicate whether you want to display the price component in the bill.	Yes (Conditional)										
		<b>Note:</b> This field is required for displaying the price component in the bill.										
Rate	Used to specify the rate defined for the price component.	Yes										
Eligibility and Tier Details	Used to specify the tiering criteria and eligibility criteria of the price component for the price item pricing.	Yes (Conditional)										
		<b>Note:</b> This field is required for specifying the tiering criteria and eligibility criteria of the price component for the price item pricing.										
Tier Details	<p>On clicking the <b>Add</b>  icon, you can view and edit the <b>Tiering Criteria</b> of the price component for the price item pricing. ## Editing a Proposed Commitment

### Prerequisites

To edit a proposed commitment you should have:

- Proposed commitments defined for a price item

### Procedure

To edit a proposed commitment:

1. Ensure that price item hierarchy is expanded in the **Pricing and Commitments** section of the **Pricing and Commitments** screen.
2. In the **Pricing and Commitments** section, click the **Edit** (✎) icon in the **Volume and Commitments** column corresponding to the price item whose proposed commitment you want to edit.

The **Pricing and Commitments** screen appears. It contains the following sections:

- **Proposed Commitments** - Used to view or edit the proposed commitments of the price item for a customer or an account in a deal.
- **Original Volume** - Displays information about the existing commitments of the price item.

The **Proposed Commitments** section contains the following columns:

Column Name	Column Description	Mandatory (Yes or No)
Price Item	Displays the price item.	Not applicable
Pricing Parameters	Indicates the price item parameters which are used along with the price item for determining the price item pricing.	Not applicable
SQI	Indicates the service quantity identifier.	Not applicable
Service Quantity	Used to specify the SQI value using which the rates engine calculates the price item pricing.	Yes

3. Modify the required details in the **Proposed Commitments** section.

**Note:** You cannot edit a proposed commitment of a price item if the deal or deal version is in the **Finalized** status.

4. Click **Save**.

The changes made to the proposed commitment is saved.

## Mapping Terms and Conditions

The **Mapping Terms and Conditions** screen enables you to associate deal-specific terms and conditions with a price item or hierarchy entity of a person or account from the customer hierarchy in a deal. It contains the following sections:

- **Main** - The **Main** section indicates the price item or hierarchy entity with which you want to associate deal-specific terms and conditions. It contains the following fields:

Field Name	Field Description
Price Item	Indicates the price item of the person or account from the customer hierarchy in a deal with which you want to associate deal-specific terms and conditions.  <b>Note:</b> This field appears when you are associating deal-specific terms and conditions with a price item.
Hierarchy Entity	Indicates the hierarchy entity of the person or account from the customer hierarchy in a deal with which you want to associate deal-specific terms and conditions.  <b>Note:</b> This field appears when you are associating deal-specific terms and conditions with a hierarchy entity.

- **Deal-Specific Terms and Conditions** - The **Deal-Specific Terms and Conditions** section allows you to associate or disassociate deal-specific terms and conditions from the price item or hierarchy entity of a person or account from the customer hierarchy in a deal. It contains the following columns:

Column Name	Column Description
Terms and Conditions	Used to indicate a deal-specific term and condition which you want to associate with the price item or the hierarchy entity of the person or account.
Default	Used to indicate whether the term and condition is default or not.

## Editing Deal-Specific Terms and Conditions

### Prerequisites

To edit deal-specific terms and conditions you should have:

- Terms and conditions associated with the deal

### Procedure

To edit deal-specific terms and conditions:

1. Search for the deal in the **Deal Dashboard** screen.
2. In the **Search Results** section, click the link in the **Deal Information** column corresponding to the deal whose terms and conditions you want to edit.  
The **Deal Information** screen appears.
3. Ensure that the customer hierarchy is expanded in the **Simulation Details** zone.
4. Click the **Edit** (✎) icon in the **Pricing and Commitments** column corresponding to the person or account whose terms and conditions you want to edit.  
The **Pricing and Commitments** screen appears.
5. Ensure that the **Price Item Hierarchy** sub-section is expanded in the **Pricing and Commitments** section when you are editing the deal-specific terms and conditions.
6. Click the **Edit** (✎) icon in the **Terms and Conditions** column corresponding to the price item, root level hierarchy entity, or non-level hierarchy entity whose

The **Mapping Terms and Conditions** screen appears. It contains the following sections:

- **Main** - The **Main** section displays the hierarchy entity to which the deal-specific terms and conditions are associated. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Price Item	Indicates the price item whose deal-specific terms and conditions you want to edit.	Not applicable
	<b>Note:</b> This field appears when you are editing the deal-specific terms and conditions of a price item.	
Root Level Hierarchy Entity	Indicates the root level hierarchy entity whose deal-specific terms and conditions you want to edit.	Not applicable
	<b>Note:</b> This field appears only when you are editing the deal-specific terms and conditions of a root level hierarchy entity.	

Field Name	Field Description	Mandatory (Yes or No)
Non-Root Level Hierarchy Entity	Indicates the non-root level hierarchy entity whose deal-specific terms and conditions you want to edit.	Not applicable
	<b>Note:</b> This field appears only when you are editing the deal-specific terms and conditions of a non-root level hierarchy entity.	

- **Deal-Specific Terms and Conditions** - The **Deal-Specific Terms and Conditions** section lists the deal-specific terms and conditions associated with the hierarchy entity. It contains the following columns:

Column Name	Column Description	Mandatory (Yes or No)
Terms and Conditions	Indicates the deal-specific terms and conditions associated with the price item, root level hierarchy entity, or non-root level hierarchy entity.	Not applicable
Default	Indicates whether the term and condition is default or not.	Not applicable

7. Edit the required term and condition in the **Deal-Specific Terms and Conditions** section.

**Note:** You can only disassociate a deal-specific term and condition from the **Deal-Specific Terms and Conditions** section.

8. Click the **Delete** (🗑️) icon corresponding to the term and condition that you want to disassociate from the deal.

**Note:** You cannot delete a term and condition which is set as default for the hierarchy entity.

9. Click **Save**.

The changes are made to the deal-specific terms and conditions.

## Deal Log and Comments

The **Deal Log and Comments** screen allows you to view the complete trail of actions performed on the deal. It also allows you to manually add a log entry for the deal. It contains the following sections:

- **Log** - The **Log** section contains the following fields:

Field Name	Field Description
Deal ID	Displays the deal ID.
Deal Information	Displays the concatenated string of deal information separated by a comma (,).

In addition, the **Log** section contains the following columns:

Column Name	Column Description
Creation Date Time	Displays the date and time when the action was performed on the deal due to which the log is created in the system.
Details	Displays the details of the actions performed on the deal.
User	Indicates the user who has performed the action on the deal.
Log Type	Indicates the type of log using which the action is performed on the deal.
Related Object	Indicates the object or entity which is created when the action is performed on the deal.  <b>Note:</b> At present, no data appears in this column. The implementation team can build the custom logic to meet the business requirements.
Status Reason	Indicates the reason why the action is performed on the deal.

- **Comments** - The **Comments** section contains the following columns:

Column Name	Column Description
Creation Date Time	Displays the date and time when the log entry is created for the deal in the system.
User	Indicates the user who has created the log entry for the deal in the system.
Comments	Displays the reason why the log entry is created for the deal.

In addition, the **Comments** section contains the following field:

Field Name	Field Description
Comment	Used to specify the reason for creating a new log entry for the deal.

## Adhoc Revenue and Cost

The **Adhoc Revenue and Cost** screen allows you to add, edit, or view the additional charges applicable for the deal while deal creation. It also allows you to add price item level adhoc charges for the deal. It contains the following fields in a grid:

Field Name	Field Description
Sequence	Used to specify the sequence number of the adhoc revenue or cost for the deal.
Currency	Used to indicate the currency in which you want to specify the adhoc charge for the deal. <b>Note:</b> The list includes only those currencies which are defined in the system.
Amount	Used to specify the amount for the adhoc revenue or cost. <b>Note:</b> You can also specify negative value in this field.

Field Name	Field Description
Division	Used to indicate the division for which the adhoc charge is applicable.  <b>Note:</b> You can view only those divisions to which you have access in the <b>Division</b> list.
Price Item	Used to indicate the price item for which you want to add the adhoc charge.  <b>Note:</b> By default, this field is inactive. This field appears when the <b>Price Item Level</b> option is selected from the <b>Revenue/Cost Type</b> list.  The <b>Search</b> (🔍) icon appears corresponding to the <b>Price Item</b> field. On clicking the <b>Search</b> icon, the <b>Price Item Search</b> window appears.  On indicating the price item, the description of the price item appears corresponding to the <b>Price Item</b> field.
Revenue/Cost Type	Used to indicate the group to which the adhoc charge belong. The valid values are: <ul style="list-style-type: none"><li>• Adhoc Revenue</li><li>• Courier Cost</li><li>• Deal Commission</li><li>• Price Item Level</li><li>• Travel Cost</li></ul> <b>Note:</b> The list includes only those values which are present in the <b>REVENU_COST_GRP_FLG</b> lookup field.
Amount Type	Used to indicate the type of amount using which you want to add an adhoc charge for the deal. The valid values are: <ul style="list-style-type: none"><li>• Cost</li><li>• Revenue</li></ul> <b>Note:</b> The list includes only those values which are present in the <b>REV_TYPE_FLG</b> lookup field.

How to add an adhoc revenue or cost for a deal	<a href="#">Adding Adhoc Revenue and Cost for a Deal</a> on page 3090

**Adding Adhoc Revenue and Cost for a Deal****Prerequisites**

To add an adhoc revenue and cost for a deal, you should have:

- Currencies defined in the application
- Values defined for the **Revenue/Cost Type** and **Revenue Type** in the **REVENU\_COST\_GRP\_FLG** and **REV\_TYPE\_FLG** lookup fields respectively.

### Procedure

To add an adhoc revenue and cost for a deal:

1. Search for the deal or deal version in the **Search Deal** zone of the **Deal Dashboard** screen for which you want to add an adhoc revenue and cost.
2. Click the **Adhoc Revenue and Cost** link at the top right corner of the **Deal Information** zone.

The **Adhoc Revenue And Cost** screen appears. It contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Sequence	Used to specify the sequence number of the adhoc revenue or cost for the deal.	Yes
Currency	Used to indicate the currency in which you want to specify the adhoc charge for the deal.  <b>Note:</b> The list includes only those currencies which are defined in the system.	Yes
Amount	Used to specify the amount for the adhoc revenue or cost.  <b>Note:</b> You can also specify negative value in this field.	Yes
Division	Used to indicate the division for which the adhoc charge is applicable.  <b>Note:</b> You can view only those divisions to which you have access in the <b>Division</b> list.	Yes
Price Item	Used to indicate the price item for which you want to add the adhoc charge.  <b>Note:</b> By default, this field is inactive. This field appears when the <b>Price Item Level</b> option is selected from the <b>Revenue/Cost Type</b> list.  The <b>Search</b> (🔍) icon appears corresponding to the <b>Price Item</b> field. On clicking the <b>Search</b> icon, the <b>Price Item Search</b> window appears.  On indicating the price item, the description of the price item appears corresponding to the <b>Price Item</b> field.	Yes (Conditional)  <b>Note:</b> This field is required while adding adhoc revenue and cost for price items.

Field Name	Field Description	Mandatory (Yes or No)
Revenue/Cost Type	Used to indicate the group to which the adhoc charge belongs. The valid values are: <ul style="list-style-type: none"> <li>• Adhoc Revenue</li> <li>• Courier Cost</li> <li>• Deal Commission</li> <li>• Price Item Level</li> <li>• Travel Cost</li> </ul>	Yes
	<b>Note:</b> The list includes only those values which are present in the <b>REVENU_COST_GRP_FLG</b> lookup field.	
Amount Type	Used to indicate the type of revenue using which you want to add an adhoc charge for the deal. The valid values are: <ul style="list-style-type: none"> <li>• Cost</li> <li>• Revenue</li> </ul>	Yes
	<b>Note:</b> The list includes only those values which are present in the <b>REV_TYPE_FLG</b> lookup field.	

- Enter the required details in the **Adhoc Revenue And Cost** screen.
- If you want to associate more than one adhoc revenue and cost for the deal, click the **Add (+)** icon corresponding to the adhoc revenue and cost and then repeat step 3.

**Note:** However, if you want to remove an adhoc revenue and cost from the deal, click the **Delete (🗑)** icon corresponding to the adhoc revenue and cost.

- Click **Save**.

The adhoc revenue and cost is added for the deal.

**Note:** You cannot add or edit an adhoc revenue and cost if the deal has reached the **Finalized** status.

## Terms and Conditions Mapping List

The **Terms and Conditions Mapping List** zone lists the terms and conditions that are already mapped to a price item, root-level hierarchy entity, or a non-root level hierarchy entity in the system. It contains the following columns:

Column Name	Column Description
Mapping Information	Displays the concatenated string of information about the mapped terms and conditions.  <b>Note:</b> It has a link. On clicking the link, the <b>Terms and Conditions Mapping Details</b> zone appears where you can view the mapping details of the respective terms and conditions.
Mapping Entity Type	Indicates the type of entity using which the terms and conditions are mapped in the system. The valid values are: <ul style="list-style-type: none"> <li>• Price Item</li> <li>• Non-Root Level Hierarchy Entity</li> <li>• Root Level Hierarchy Entity</li> </ul>
Mapping Entity	Displays the entity to which the terms and conditions are mapped.

You can filter the list using various search criteria (such as, **Mapping ID**, **Terms and Conditions**, and **Mapping Entity Type**) available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (  ) icon in the upper right corner of this zone.

On clicking the **Broadcast** (  ) icon corresponding to the terms and conditions mapping information, the **Terms and Conditions Mapping Details** zone appears with the mapping details of the respective terms and conditions.

**Note:** Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

## Terms and Conditions Mapping Details

The **Terms and Conditions Mapping Details** zone displays the mapping details of the terms and conditions. It contains the following sections:

- **Main** - Displays the basic mapping information about the terms and conditions. It contains the following fields:

Field Name	Field Description
Mapping ID	Displays the mapping ID of the terms and conditions.
Mapping Entity Type	Indicates the type of entity using which the terms and conditions are mapped in the system. The valid values are: <ul style="list-style-type: none"> <li>• Price Item</li> <li>• Non-Root Level Hierarchy Entity</li> <li>• Root Level Hierarchy Entity</li> </ul>
Mapping Entity	Indicates the entity to which the terms and conditions are mapped.
Price Item	Indicates the price item to which the terms and conditions are mapped. <p><b>Note:</b> This field appears when the terms and conditions are mapped using the <b>Mapping Entity Type</b> as <b>Price Item</b>.</p>
Non-Root Level Hierarchy Entity	Indicates the non-root level hierarchy entity to which the terms and conditions are mapped. <p><b>Note:</b> This field appears when the terms and conditions are mapped using the <b>Mapping Entity Type</b> as <b>Non-Root Level Hierarchy Entity</b>.</p>
Root Level Hierarchy Entity	Indicates the root level hierarchy entity to which the terms and conditions are mapped. <p><b>Note:</b> This field appears when the terms and conditions are mapped using the <b>Mapping Entity Type</b> as <b>Root Level Hierarchy Entity</b>.</p>

- **Record Actions** - This section contains the following button:

Button Name	Button Description
Edit	Used to edit the mapping details of the terms and conditions.

- **Record Information** - This section contains the following field:

Field Name	Field Description
Business Object	Indicates the business object using which the terms and conditions are mapped to the entity. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.
	<b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.

- **Terms and Conditions** - Lists the terms and conditions which are mapped to the entity. It contains the following columns:

Column Name	Column Description
Terms and Conditions	Displays the terms and conditions which are mapped to the entity.
	<b>Note:</b> It has a link. On clicking the link, the <b>Terms and Conditions</b> screen appears where you can view the details of the respective terms and conditions.
Start Date	Displays the date from when the terms and conditions are effective for the entity.
	<b>Note:</b> The start date cannot be later than the end date.
End Date	Displays the date till when the terms and conditions are effective for the entity.
	<b>Note:</b> The end date cannot be earlier than the start date.
Default	Indicates whether the mapped term and condition is default or not.

By default, the **Terms and Conditions Mapping Details** zone does not appear in the **Terms and Conditions Mapping** screen. It appears when you click the **Broadcast** (📢) icon corresponding to the terms and conditions mapping information in the **Terms and Conditions Mapping List** zone.

## Associating the Terms and Conditions with a Price Item

### Prerequisites

To associate the terms and conditions with a price item, you should have:

- Price item with which you want to associate the terms and conditions defined in the application
- Terms and conditions defined in the application

### **Procedure**

To associate the terms and conditions with a price item:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Main** menu, select **Deal Management** and then click **Terms and Conditions Mapping**.  
A sub-menu appears.
3. Click the **Add** option from the **Terms and Conditions Mapping** sub-menu.

The **Terms and Conditions Mapping** screen appears. It contains the following sections:

- **Main** - Used to specify basic details about the entity (i.e. price item, non-root level hierarchy entity, or root level hierarchy entity) with which you want to associate the terms and conditions. It contains the following fields:

<b>Field Name</b>	<b>Field Description</b>	<b>Mandatory (Yes or No)</b>
Mapping Entity Type	Used to indicate the type of entity using which you want to associate the terms and conditions. The valid values are: <ul style="list-style-type: none"> <li>• <b>Price Item</b> - Used to indicate that you want to associate the terms and conditions with a price item.</li> <li>• <b>Non-Root Level Hierarchy Entity</b> - Used to indicate that you want to associate the terms and conditions with a non-root level hierarchy entity.</li> <li>• <b>Root Level Hierarchy Entity</b> - Used to indicate that you want to associate the terms and conditions with a root level hierarchy entity.</li> </ul>	Yes

Field Name	Field Description	Mandatory (Yes or No)
Mapping Entity	<p>Used to indicate the entity with which you want to associate the terms and conditions.</p> <p><b>Note:</b></p> <p>The <b>Search</b> (🔍) icon appears corresponding to the <b>Mapping Entity</b> field. On clicking the <b>Search</b> icon, the <b>Price Item Terms and Conditions Mapping Search, Non-Root Level Hierarchy Entity Terms and Conditions Mapping Search, or Root Level Hierarchy Entity Terms and Conditions Mapping Search</b> window appears depending upon whether you select the <b>Price Item, Non-Root Level Hierarchy Entity, or Root-Level Hierarchy Entity</b> option from the <b>Mapping Entity Type</b> field respectively.</p> <p>On indicating the mapping entity, the description of the mapping entity appears corresponding to the <b>Mapping Entity</b> field.</p> <p>This field appears when you select the mapping entity type from the <b>Mapping Entity Type</b> field.</p>	Yes

- **Terms and Conditions** - Used to associate the terms and conditions with the entity (i.e. price item, non-root level hierarchy entity, or root level hierarchy entity). It contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Terms and Conditions	<p>Used to indicate the terms and conditions that you want to associate with the entity.</p> <p><b>Note:</b></p> <p>The <b>Search</b> (🔍) icon appears corresponding to the <b>Terms and Conditions</b> field. On clicking the <b>Search</b> icon, the <b>Terms and Conditions Search</b> window appears.</p> <p>On indicating the terms and conditions, the description of the terms and conditions appear corresponding to the <b>Terms and Conditions</b> field.</p> <p>You can search for only those terms and conditions whose <b>Terms and Conditions Usage</b> is set to <b>Deal</b> or <b>Invoice and Deal</b>.</p>	Yes

Field Name	Field Description	Mandatory (Yes or No)
Start Date	Used to specify the date from when the terms and conditions are associated with the entity.	Yes
	<b>Note:</b> The start date cannot be later than the end date.	
End Date	Used to specify the date till when the terms and conditions are associated with the entity.	No
	<b>Note:</b> The end date cannot be earlier than the start date.	
Default	Used to indicate whether the terms and conditions should be defaulted for the entity.	No
	<b>Note:</b> You must specify atleast one default terms and conditions for an entity.	

4. Select the **Price Item** option from the **Mapping Entity Type** field in the **Main** section.

The **Mapping Entity** field appears.

5. Search for the price item with which you want to associate the terms and conditions in the **Mapping Entity** field.
6. Associate terms and conditions with the price item in the **Terms and Conditions** section.

**Note:** The valid file extensions for associating terms and conditions are doc, xls, pdf, jpg, txt, avi, bmp, mp3 and rtf.

7. If you want to associate more than one terms and conditions with the price item, click the **Add (+)** icon.

**Note:** However, if you want to disassociate the terms and conditions from the price item, click the **Delete (🗑)** icon corresponding to the respective terms and conditions.

8. Click **Save**.

The terms and conditions are associated with the price item.

## Associating the Terms and Conditions with a Root Level Hierarchy Entity

### Prerequisites

To associate the terms and conditions with a root level hierarchy entity, you should have:

- Hierarchy entity with which you want to associate the terms and conditions defined in the application
- Terms and conditions defined in the application

### Procedure

To associate the terms and conditions with a root level hierarchy entity:

1. Click the **Menu** link in the **Application** toolbar.

A list appears.

2. From the **Main** menu, select **Deal Management** and then click **Terms and Conditions Mapping**.

A sub-menu appears.

3. Click the **Add** option from the **Terms and Conditions Mapping** sub-menu.

The **Terms and Conditions Mapping** screen appears. It contains the following sections:

- **Main** - Used to specify basic details about the entity (i.e. price item, non-root level hierarchy entity, or root level hierarchy entity) with which you want to associate the terms and conditions. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Mapping Entity Type	Used to indicate the type of entity using which you want to associate the terms and conditions. The valid values are: <ul style="list-style-type: none"> <li>• <b>Price Item</b> - Used to indicate that you want to associate the terms and conditions with a price item.</li> <li>• <b>Non-Root Level Hierarchy Entity</b> - Used to indicate that you want to associate the terms and conditions with a non-root level hierarchy entity.</li> <li>• <b>Root Level Hierarchy Entity</b> - Used to indicate that you want to associate the terms and conditions with a root level hierarchy entity.</li> </ul>	Yes

Field Name	Field Description	Mandatory (Yes or No)
Mapping Entity	<p>Used to indicate the entity with which you want to associate the terms and conditions.</p> <p><b>Note:</b></p> <p>The <b>Search</b> (🔍) icon appears corresponding to the <b>Mapping Entity</b> field. On clicking the <b>Search</b> icon, the <b>Price Item Terms and Conditions Mapping Search, Non-Root Level Hierarchy Entity Terms and Conditions Mapping Search, or Root Level Hierarchy Entity Terms and Conditions Mapping Search</b> window appears depending upon whether you select the <b>Price Item, Non-Root Level Hierarchy Entity, or Root-Level Hierarchy Entity</b> option from the <b>Mapping Entity Type</b> field respectively.</p> <p>On indicating the mapping entity, the description of the mapping entity appears corresponding to the <b>Mapping Entity</b> field.</p> <p>This field appears when you select the mapping entity type from the <b>Mapping Entity Type</b> field.</p>	Yes

- **Terms and Conditions** - Used to associate the terms and conditions with the entity (i.e. price item, non-root level hierarchy entity, or root level hierarchy entity). It contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Terms and Conditions	<p>Used to indicate the terms and conditions that you want to associate with the entity.</p> <p><b>Note:</b></p> <p>The <b>Search</b> (🔍) icon appears corresponding to the <b>Terms and Conditions</b> field. On clicking the <b>Search</b> icon, the <b>Terms and Conditions Search</b> window appears.</p> <p>On indicating the terms and conditions, the description of the terms and conditions appear corresponding to the <b>Terms and Conditions</b> field.</p> <p>You can search for only those terms and conditions whose <b>Terms and Conditions Usage</b> is set to <b>Deal</b> or <b>Invoice and Deal</b>.</p>	Yes

Field Name	Field Description	Mandatory (Yes or No)
Start Date	Used to specify the date from when the terms and conditions are associated with the entity.	Yes
	<b>Note:</b> The start date cannot be later than the end date.	
End Date	Used to specify the date till when the terms and conditions are associated with the entity.	No
	<b>Note:</b> The end date cannot be earlier than the start date.	
Default	Used to indicate whether the terms and conditions should be defaulted for the entity.	No
	<b>Note:</b> You must specify atleast one default terms and conditions for an entity.	

- Select the **Root Level Hierarchy Entity** option from the **Mapping Entity Type** field in the **Main** section.  
The **Mapping Entity** field appears.
- Search for the root level hierarchy entity with which you want to associate the terms and conditions in the **Mapping Entity** field.
- Associate terms and conditions with the root level hierarchy entity in the **Terms and Conditions** section.

**Note:** The valid file extensions for associating terms and conditions are doc, xls, pdf, jpg, txt, avi, bmp, mp3 and rtf.

- If you want to associate more than one terms and conditions with the root level hierarchy entity, click the **Add (+)** icon.

**Note:** However, if you want to disassociate the terms and conditions from the root level hierarchy entity, click the **Delete (🗑)** icon corresponding to the respective terms and conditions.

- Click **Save**.

The terms and conditions are associated with the root level hierarchy entity.

## Associating the Terms and Conditions with a Non-Root Level Hierarchy Entity

### Prerequisites

To associate the terms and conditions with a non-root level hierarchy entity, you should have:

- Hierarchy entity with which you want to associate the terms and conditions defined in the application
- Terms and conditions defined in the application

### Procedure

To associate the terms and conditions with a non-root level hierarchy entity:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Main** menu, select **Deal Management** and then click **Terms and Conditions Mapping**.  
A sub-menu appears.
3. Click the **Add** option from the **Terms and Conditions Mapping** sub-menu.

The **Terms and Conditions Mapping** screen appears. It contains the following sections:

- **Main** - Used to specify basic details about the entity (i.e. price item, non-root level hierarchy entity, or root level hierarchy entity) with which you want to associate the terms and conditions. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Mapping Entity Type	Used to indicate the type of entity using which you want to associate the terms and conditions. The valid values are: <ul style="list-style-type: none"> <li>• <b>Price Item</b> - Used to indicate that you want to associate the terms and conditions with a price item.</li> <li>• <b>Non-Root Level Hierarchy Entity</b> - Used to indicate that you want to associate the terms and conditions with a non-root level hierarchy entity.</li> <li>• <b>Root Level Hierarchy Entity</b> - Used to indicate that you want to associate the terms and conditions with a root level hierarchy entity.</li> </ul>	Yes

Field Name	Field Description	Mandatory (Yes or No)
Mapping Entity	<p>Used to indicate the entity with which you want to associate the terms and conditions.</p> <p><b>Note:</b></p> <p>The <b>Search</b> (🔍) icon appears corresponding to the <b>Mapping Entity</b> field. On clicking the <b>Search</b> icon, the <b>Price Item Terms and Conditions Mapping Search, Non-Root Level Hierarchy Entity Terms and Conditions Mapping Search, or Root Level Hierarchy Entity Terms and Conditions Mapping Search</b> window appears depending upon whether you select the <b>Price Item, Non-Root Level Hierarchy Entity, or Root-Level Hierarchy Entity</b> option from the <b>Mapping Entity Type</b> field respectively.</p> <p>On indicating the mapping entity, the description of the mapping entity appears corresponding to the <b>Mapping Entity</b> field.</p> <p>This field appears when you select the mapping entity type from the <b>Mapping Entity Type</b> field.</p>	Yes

- **Terms and Conditions** - Used to associate the terms and conditions with the entity (i.e. price item, non-root level hierarchy entity, or root level hierarchy entity). It contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Terms and Conditions	<p>Used to indicate the terms and conditions that you want to associate with the entity.</p> <p><b>Note:</b></p> <p>The <b>Search</b> (🔍) icon appears corresponding to the <b>Terms and Conditions</b> field. On clicking the <b>Search</b> icon, the <b>Terms and Conditions Search</b> window appears.</p> <p>On indicating the terms and conditions, the description of the terms and conditions appear corresponding to the <b>Terms and Conditions</b> field.</p> <p>You can search for only those terms and conditions whose <b>Terms and Conditions Usage</b> is set to <b>Deal</b> or <b>Invoice and Deal</b>.</p>	Yes

Field Name	Field Description	Mandatory (Yes or No)
Start Date	Used to specify the date from when the terms and conditions are associated with the entity.	Yes
	<b>Note:</b> The start date cannot be later than the end date.	
End Date	Used to specify the date till when the terms and conditions are associated with the entity.	No
	<b>Note:</b> The end date cannot be earlier than the start date.	
Default	Used to indicate whether the terms and conditions should be defaulted for the entity.	No
	<b>Note:</b> You must specify atleast one default terms and conditions for an entity.	

- Select the **Non-Root Level Hierarchy Entity** option from the **Mapping Entity Type** field in the **Main** section. The **Mapping Entity** field appears.
- Search for the non-root level hierarchy entity with which you want to associate the terms and conditions in the **Mapping Entity** field.
- Associate terms and conditions with the non-root level hierarchy entity in the **Terms and Conditions** section.

**Note:** The valid file extensions for associating terms and conditions are doc, xls, pdf, jpg, txt, avi, bmp, mp3 and rtf.

- If you want to associate more than one terms and conditions with the non-root level hierarchy entity, click the **Add (+)** icon.

**Note:** However, if you want to disassociate the terms and conditions from the non-root level hierarchy entity, click the **Delete (🗑)** icon corresponding to the respective terms and conditions.

- Click **Save**.

The terms and conditions are associated with the non-root level hierarchy entity.

## Editing the Terms and Conditions of a Price Item

### Prerequisites

To edit the terms and conditions of a price item, you should have:

- Terms and conditions associated with the price item.

### Procedure

To edit the terms and conditions of a price item:

1. Search for the price item in the **Terms and Conditions Mapping** screen.
2. In the **Search Results** section, click the **Broadcast** (  ) icon corresponding to the price item whose terms and conditions you want to edit.  
The **Terms And Conditions Mapping Details** zone appears.
3. Click the **Edit** button in the **Terms And Conditions Mapping Details** zone.

The **Terms And Conditions Mapping** screen appears. It contains the following sections:

- **Main** - Displays the basic information about the price item whose terms and conditions you want to edit. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Mapping ID	Displays the terms and conditions mapping ID for the price item.	Not applicable
Mapping Entity Type	Indicates the type of entity using which the terms and conditions are associated with the price item. The valid value is: <ul style="list-style-type: none"> <li>• Price Item</li> </ul>	Not applicable
Mapping Entity	Indicates the price item with which the terms and conditions are associated.	Not applicable

- **Terms and Conditions** - Lists the terms and conditions that are associated with the price item. It contains the following columns:

Column Name	Column Description	Mandatory (Yes or No)
Terms and Conditions	Used to indicate the terms and conditions that you want to associate with the price item.	Yes (Conditional)
	<p><b>Note:</b></p> <p>The <b>Search</b> (  ) icon appears corresponding to the <b>Terms and Conditions</b> field. On clicking the <b>Search</b> icon, the <b>Price Item Terms and Conditions Search</b> window appears.</p> <p>On indicating the terms and conditions, the description of the terms and conditions appear corresponding to the <b>Terms and Conditions</b> field.</p> <p>You can search for only those terms and conditions whose <b>Terms and Conditions Usage</b> is set to <b>Deal</b> or <b>Invoice and Deal</b> and the <b>Terms and Conditions Applicability</b> is set to <b>Price Item</b>.</p>	
		<b>Note:</b> This field is required while editing the terms and conditions of the price item.

Column Name	Column Description	Mandatory (Yes or No)
Start Date	Used to specify the date from when the terms and conditions are associated with the price item.	Yes (Conditional)  <b>Note:</b> This field is required while editing the terms and conditions of the price item.
	<b>Note:</b> The start date cannot be later than the end date.	
End Date	Used to specify the date till when the terms and conditions are associated with the price item.	No
	<b>Note:</b> The end date cannot be earlier than the start date.	
Default	Used to indicate whether the terms and conditions should be defaulted for the price item.	Yes
	<b>Note:</b> You must specify atleast one default terms and conditions for a price item.	

4. Modify the required details in the **Terms and Conditions** section, if required.
5. Associate or disassociate the terms and conditions from the price item, if required.
6. Click **Save**.

The changes made to the terms and conditions of the price item are saved.

## Viewing the Terms and Conditions Mapping Details

### Prerequisites

To view the terms and conditions mapping details, you should have:

- Terms and conditions mapped with the entity (i.e. price item, root level hierarchy entity, or non-root level hierarchy entity).

### Procedure

To view the terms and conditions mapping details:

1. Search for the entity in the **Terms and Conditions Mapping** screen.
2. In the **Search Results** section, click the **Broadcast** (📡) icon corresponding to the entity whose terms and conditions mapping details you want to view. The **Terms And Conditions Mapping Details** zone appears.
3. View the terms and conditions mapping details in the **Terms And Conditions Mapping Details** zone.

## Deal Approver Dashboard

The **Deal Approver Dashboard** screen allows you to view the To Do tasks assigned to the user that belongs to the access group as defined in the approval hierarchy of the **Deal Approval Profile** screen. It also allows you to search for deals which are assigned to the user for approval. It contains the following zones:

- [Deal Metrics](#) on page 3111
- [Deal To Do](#) on page 3111
- [Search Deal](#) on page 3112

### Deal Metrics

The **Deal Metrics** zone enables you to view the following information through a tiles chart for deals which are assigned to the user for approval:

- Number of deals created by the user
- Number of deals in the **Pending for Approval** status
- Number of deals yet to be finalized
- Number of deals yet to be accepted by the customer
- Number of deals accepted by the customer
- Number of deals rejected by the customer

In addition, you can view the above information through a bar and line chart by toggling the **Tiles/Chart** switch available in the **Deal Metrics** zone.

The bar chart indicates the number of deals in different statuses for an existing customer, existing account, and prospect. Whereas, the line chart indicates the deal revenue from an existing customer, existing account, and prospect.

**Note:** By default, the above information is shown for the period which is specified in the **Deal Limits in Months** option type of the **C1-DEAL** feature configuration. You can change the period if required.

You can filter the information using various criteria (such as, **Period From**, **Period To**, **Division**, **Customer Tier**, and **Customer Segment**) available in the **Deal Metrics** zone.

### Deal To Do

The **Deal To Do** zone lists the deal approval To Do's assigned to the user that belongs to the access group as defined in the approval hierarchy of the **Deal Approval Profile** screen. It also lists the deal information for which the deal approval To Do is generated. It contains the following columns:

Column name	Column Description
To Do	On clicking the <b>To Do</b> icon (📌), the <b>To Do Entry</b> screen appears where you can view the details of the respective To Do assigned to the user.
Deal Information	Displays the concatenated string of information about the deal separated by a comma (,) for which the To Do is created.
	<b>Note:</b> It has a link. On clicking the link, the <b>Deal Information</b> screen appears where you can perform the required action.

**Note:** By default, the system lists the To Do's for the user that are created in the period which is specified in the **Deal Limits in Months** option type of the **C1-DEAL** feature configuration. You can change the period if required.

You can filter the list using various criteria (such as, **To Do Type**, **Priority**, **Start Date**, and **End Date**) available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (🔍) icon in the upper right corner of this zone.

## Search Deal

The **Search Deal** zone allows you to search deals for which the next required action has to be performed by the user as per the deal approval workflow. It contains the following two sections:

- **Search Criteria** - The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Search By	Used to indicate whether you want to search for a deal using the deal, customer, or account details. The valid values are: <ul style="list-style-type: none"> <li>• Deal Details</li> <li>• Customer Details</li> <li>• Account Details</li> </ul>	Yes
	<b>Note:</b> By default, the <b>Deal Details</b> option is selected.	
Division	Used to search deals which are associated with a particular division to which the user belongs.	No
	<b>Note:</b> You can only view those divisions to which you have access in the <b>Division</b> list.	
Deal ID	Used to search for a particular deal.	No
	<b>Note:</b> This field appears when the <b>Deal Details</b> option is selected from the <b>Search By</b> list.	

Field Name	Field Description	Mandatory (Yes or No)
Start Date	Used to search deals which are effective from a particular date onwards.	No
	<p><b>Note:</b></p> <p>This field appears when the <b>Deal Details</b> option is selected from the <b>Search By</b> list.</p> <p>The start date cannot be later than the end date.</p>	
End Date	Used to search deals which are effective till a particular date.	No
	<p><b>Note:</b></p> <p>This field appears when the <b>Deal Details</b> option is selected from the <b>Search By</b> list.</p> <p>The end date cannot be earlier than the start date.</p>	
Status	Used to search deals with a particular status.	No
	<p><b>Note:</b> This field appears when the <b>Deal Details</b> option is selected from the <b>Search By</b> list.</p>	
Created By	Used to search deals which are created by a particular user.	No
	<p><b>Note:</b></p> <p>The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>User Search</b> window appears.</p> <p>On specifying the creator, the description of the creator appears corresponding to the <b>Created By</b> field.</p> <p>This field appears when the <b>Deal Details</b> option is selected from the <b>Search By</b> list.</p>	
Customer Segment	Used to search deals which are created for customers associated to a particular business component.	No
	<p><b>Note:</b> This field appears when the <b>Customer Details</b> option is selected from the <b>Search By</b> list.</p>	
Person ID	Used to search deals which are created for a particular customer.	No
	<p><b>Note:</b> This field appears when the <b>Customer Details</b> option is selected from the <b>Search By</b> list.</p>	

Field Name	Field Description	Mandatory (Yes or No)
Person Name	Used to search deals which are created for persons or accounts with a particular name.	No
	<b>Note:</b> This field appears when the <b>Customer Details</b> or <b>Account Details</b> option is selected from the <b>Search By</b> list.	
Person Identifier Type	Used to search deals which are created for persons using a particular identifier type.	Yes (Conditional)
	<b>Note:</b> This field appears when the <b>Customer Details</b> option is selected from the <b>Search By</b> list.	<b>Note:</b> If you enter person identifier as a search criteria, you have to select the person identifier type.
Person Identifier	Used to specify the value for the person identifier type for searching deals created for the persons.	Yes (Conditional)
	<b>Note:</b> This field appears when the <b>Customer Details</b> option is selected from the <b>Search By</b> list.	<b>Note:</b> If you enter person identifier type as a search criteria, you have to specify the person identifier.
Account ID	Used to search deal which is created for a particular account.	No
	<b>Note:</b> This field appears when the <b>Account Details</b> option is selected from the <b>Search By</b> list.	
Account Identifier Type	Used to search deals which are created for accounts using a particular identifier type.	Yes (Conditional)
	<b>Note:</b> This field appears when the <b>Account Details</b> option is selected from the <b>Search By</b> list.	<b>Note:</b> If you enter account identifier as a search criteria, you have to select the account identifier type.
Account Identifier	Used to specify the value of the account identifier type for searching deals created for accounts.	Yes (Conditional)
	<b>Note:</b> This field appears when the <b>Account Details</b> option is selected from the <b>Search By</b> list.	<b>Note:</b> If you enter account identifier type as a search criteria, you have to select the primary account identifier.

Field Name	Field Description	Mandatory (Yes or No)
Deal Entity	<p>Used to search deals which are created for a particular entity. The valid values are:</p> <ul style="list-style-type: none"> <li>• <b>Account</b> - Used to search deals which are created for the existing accounts in the system.</li> </ul>	Yes (Conditional)
	<p><b>Note:</b> This value appears when you select the <b>Deal Details</b> or <b>Account Details</b> option from the <b>Search By</b> list.</p>	<p><b>Note:</b> This field is required while searching for deals created for the respective entities.</p>
	<ul style="list-style-type: none"> <li>• <b>Customer</b> - Used to search deals which are created for the existing customers in the system.</li> </ul>	
	<p><b>Note:</b> This value appears when you select the <b>Deal Details</b> or <b>Customer Details</b> option from the <b>Search By</b> list.</p> <ul style="list-style-type: none"> <li>• <b>Prospect</b> - Used to search deals which are created for the existing prospects in the system.</li> </ul> <p><b>Note:</b> This value appears when you select the <b>Deal Details</b> or <b>Customer Details</b> option from the <b>Search By</b> list.</p>	
Deal Type	<p>Used to search deals which are created using a particular deal type.</p>	Yes (Conditional)
	<p><b>Note:</b></p> <p>The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Deal Type Search</b> window appears.</p> <p>On specifying the deal type, the description of the deal type appears corresponding to the <b>Deal Type</b> field.</p> <p>This field appears when the <b>Deal Details</b> option is selected from the <b>Search By</b> list.</p>	<p><b>Note:</b> This field is required while searching deals using the <b>Deal Details</b>.</p>
Deal Creation From Date	<p>Used to search deals which are created from a particular date onwards.</p> <p><b>Note:</b> By default, the system displays the date which is specified in the <b>Deal Limits in Months</b> option type of the <b>C1-DEAL</b> feature configuration. You can change the date if required.</p>	No

Field Name	Field Description	Mandatory (Yes or No)
Deal Creation To Date	Used to search deals which are created till a particular date.	No
	<b>Note:</b> By default, the system displays the date which is specified in the <b>Deal Limits in Months</b> option type of the <b>C1-DEAL</b> feature configuration. You can change the date if required.	
Deal Identifier	Used to search deals which are created using a particular deal identifier.	No
	<b>Note:</b> This field appears when the <b>Deal Details</b> option is selected from the <b>Search By</b> list.	
Assigned To My Role	Used to search only those deals to which the user has access for approval.	Yes (Conditional)
	<b>Note:</b> On clicking the check box you can search for deals as per the access group defined in the <b>Approval Hierarchy</b> of the <b>Deal Approval Profile</b> to which the user belongs.	

- **Search Results** - On clicking the **Search** button, a list of deals appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Deal Information	Displays the concatenated string of information about the deal separated by a comma (,).
	<b>Note:</b> It has a link. On clicking the link, the <b>Deal Information</b> screen appears where you can view the details of the respective deal.
Person Information	Displays the concatenated string of information about the main person for whom the deal is created in the system.
	<p><b>Note:</b></p> <p>It has a link. On clicking the link, the <b>Customer 360° Information</b> or the <b>Prospect Person</b> screen appears where you can view the details of the respective person.</p> <p>The <b>Customer 360° Information</b> screen appears when you select the <b>Account</b> or <b>Customer</b> option from the <b>Deal Entity</b> list in the <b>Search Criteria</b> while searching for a deal. Whereas, the <b>Prospect Person</b> screen appears when you select the <b>Prospect</b> option from the <b>Deal Entity</b> list in the <b>Search Criteria</b> while searching for a deal.</p>

Column Name	Column Description
Deal Entity	Indicates the entity for which the deal is created in the system. The valid values are: <ul style="list-style-type: none"> <li>• Account</li> <li>• Customer</li> <li>• Prospect</li> </ul>
Start Date	Displays the date from when the deal is effective for the deal entity.
End Date	Displays the date till when the deal is effective for the deal entity.
Status	Indicates the current status of the deal.
Created By	Displays the user who has created the deal in the system.
View Approval Workflow	On clicking the <b>View Approval Workflow</b> (  ) icon, the <b>Deal Approval Workflow</b> screen appears where you can view the details of the approval workflow of the respective deal.
Print Deal	On clicking the <b>Print</b> (  ) icon, the <b>Deal Extraction</b> screen appears where you can filter the options as per your requirement and extract the deal information in the PDF or Excel format.

**Note:**

By default, the **Search Results** section lists all the deals which are assigned to the user for the period as specified in the **Deal Limits in Months** option type of the **C1-DEAL** feature configuration.

Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** () icon in the upper right corner of this zone.

## Searching for a Deal

### Prerequisites

To search for a deal, you should have:

- Divisions defined in the application
- Deals or deal versions associated with the division to which the user belongs
- Deal types defined in the application
- Deal entities defined in the application

### Procedure

To search for a deal:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Main** menu, select **Deal Management** and then click **Deal Approver Dashboard**.  
The **Deal Approver Dashboard** screen appears.
3. Enter the search criteria in the **Search Deal** zone.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

#### 4. Click **Search**.

A list of deals that meet the search criteria appears in the **Search Results** section.

**Note:**

Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

By default, the **Search Results** section lists all the deals which are assigned to user and are in the **Pending for Approval** status for the period as specified in the **Deal Limits in Months** option type of the **C1-DEAL** feature configuration.

You must specify at least one search criterion while searching for a deal. One more search criterion is required when you are searching for a deal using the deal entity.

You must specify one more search criterion when you are searching for a deal using the division with the **Deal Details** option selected from the **Search By** list.

## Viewing the Person Information

### Procedure

To view the person information:

1. Search for the deal whose person information you want to view in the **Search Deal** zone of the **Deal Approver Dashboard** screen.
2. In the **Search Results** section, click the link in the **Person Information** column corresponding to the deal whose person information you want to view.

The **Customer 360° Information** or the **Prospect Person** screen appears.

**Note:** The **Customer 360° Information** screen appears when you select the **Account** or **Customer** option from the **Deal Entity** list in the **Search Criteria** while searching for a deal. Whereas, the **Prospect Person** screen appears when you select the **Prospect** option from the **Deal Entity** list in the **Search Criteria** while searching for a deal.

3. View the person information of the deal in the **Customer 360° Information - Person** tab or the **Prospect Person** screen.

## Relationship Workbench Manager

---

### Topics:

- [Relationship Manager Workbench](#)
- [Unpaid Invoices Page](#)
- [Inactive Customer Details](#)
- [Revenue Trends](#)

Oracle Revenue Management and Billing provides you a one-point-destination for all relationship/account managers an unified view of all customers under a single relationship manager on a screen named **Relationship Manager Workbench**. This data can then be easily used for analysis, such as:

- Cumulated revenue, average revenue, unpaid revenue details of the customers
- Cumulated details, active, inactive, and newly added customers under the relationship manager based on number of months that customer has done transaction from any account
- Number of deals in difference status

In other words, this feature allows you to drill down to see or act on all current and historical revenue management and billing details. This allows you professionally and efficiently to drive customer engagement and effectively elevate customer relationships.

## Relationship Manager Workbench

The **Relationship Manager Workbench** screen is designed for a relationship manager wherein the relationship manager can obtain a holistic view of all its customers. It is designed to provide the following statistics to a relationship manager:

- [Revenue Metrics](#) on page 3129
- [Customer Metrics](#) on page 3130
- [Customer Hierarchy](#) on page 3130
- [Deal Snapshot](#) on page 3134
- [Top 10 Customers by Revenue](#) on page 3135
- [Top 10 Product By Revenue](#) on page 3136
- [Top 10 Price Items by Revenue](#) on page 3136
- [Top 10 Customers Revenue Variations](#) on page 3136

In addition, a relationship manager can also view all the assigned To Dos from the **Relationship Manager Workbench** screen.

For more information on...	See...
<b>Relationship Manager Workbench</b> screen	<a href="#">Relationship Manager Workbench</a> on page 3128

**Parent Topic:** [Relationship Workbench Manager](#) on page 3127

## RM Workbench

The **RM Workbench** zone allows you to search for a customer using various search criteria. It contains the following fields:

- **Search Criteria-** The **Search Criteria** contains the following fields:

**Searching for a Customer****Prerequisites**

To search for a customer, you should have:

- 

**Procedure**

To search for a customer:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Main** menu, select **Relationship Manager Workbench**.  
The **Relationship Manager Workbench** screen appears.
3. Enter the search criteria in the **Customer Hierarchy** zone.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

4. Click **Search**.  
A list of customers that meet the search criteria appears in the **Search Results** section.

How to view the inactive customers accounts details	<a href="#">Viewing the Inactive Customer's Account Details</a> on page 3142

## Viewing the Inactive Customer's Account Details

### Procedure

To view the details of the inactive customers account:

1. Search for the customers under the relationship manager in the **RM Workbench** zone.
2. In the **Customer Metrics** zone, click the **Inactive Customers** tile whose details you want to view.  
The **Inactive Customer Details** screen appears.
3. Ensure that the **Main** tab is selected.
4. In the **Inactive Customer Details** zone, click the **Broadcast** ( ) icon corresponding to the customer information whose account details you want to view.  
The **Inactive Customers Account's Details** zone appears.
5. View the inactive customers accounts details in the **Inactive Customers Account's Details** zone.

<b>Customer Metrics</b> zone	<a href="#">Customer Metrics</a> on page 3130

## Revenue Trends

The **Revenue Trends** screen is designed to view of revenue and price item usage across the relationship manager portfolio . The **Revenue Trends** screen contains the following zones:

- [RM Trends Input](#) on page 3143
- [Revenue Trends](#) on page 3144
- [Price Item Revenue Vs Usage Trend](#) on page 3144

### RM Trends Input

The **RM Trend Input** zone enables you to search for a view the information through trends. It contains the following fields:

- **Search Criteria-** The **Search Criteria** contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Period From	Used to indicate the period from when revenue varies.	Yes
	<b>Note:</b> By default, month and year is selected.	
Period To	Used to indicate the period till when the revenue varies.	Yes
	<b>Note:</b> By default, month and year is selected.	
Relationship Manager	Used to search revenue variation belong to a particular relationship manager.	Yes
	<b>Note:</b> By default, the <b>Relationship Manager</b> is selected.	
Division	Used to indicate division.	No
Customer Segment	Used to indicate customer segment.	No
Customer Tier	Used to indicate customer tier.	No
Entity Type	Used to indicate the entity type	No
Entity Value	Used to indicate a valid value for the selected entity type.	Yes (Conditional)
		<b>Note:</b> his field is required if you select an option from the <b>Entity Type</b> field.

Field Name	Field Description	Mandatory (Yes or No)
Price Item Type Flag	Used to indicate a price item type flag.	No
Price Item	Used to indicate a price item.	No

**Note:**

You must specify at least one search criterion while searching for a customer. One more search criterion is required when you want to view revenue trend.

## FOP Reports

---

Oracle Revenue Management and Billing enables you to extract data using the following FOP reports:

- **User Access Report** - Enables you to view the permissions granted to a particular user for accessing the data.
- **Payment Summary Report** - Enables you to view the total payment made via a tender type for each customer in a division.
- **Payment Detail Report** - Enables you to view the individual payment details of each account and customer in a division.
- **Invoice Ageing Report** - Enables you to view the invoices which are due for payment in different aging buckets.
- **To Do Report** - Enables you to view the notifications (i.e. To Dos) assigned to a user and its current status.
- **Hold Details Report** - Enables you to view all entities (i.e. persons, accounts, or bills) for which the business processes, such as bill generation, automatic payment, funding, overdue, or refund, are on hold for a given period.
- **Transaction Rejection Summary Report** - Enables you to view the number of transactions mapped to a particular account and price item combination which are in the **Error** or **Ignored** status.
- **Transaction Rejection Details Report** - Enables you to view the details of the transactions which are in the **Error** or **Ignored** status.

These FOP reports are not shipped with the product. Oracle Revenue Management and Billing provides the UserAccessReport, PaymentSummaryReport, PaymentDetailReport, AgingReport, TodoReport, HoldEntityDetailsReport, TransactionRejectionSummary, and TransactionRejectionDetail XSL files using which you can create the respective report. Once the FOP report is created, you can extract the data from the system in the PDF format using the FOP report. For more information about these FOP reports, refer to *Oracle Revenue Management and Billing FOP Reports Guide*.

## Hold Request Creation, Modification, Release, and View Through Inbound Web Service

---

### Topics:

- [Prerequisites](#)
- [C1-CreateHoldRequest Business Service](#)
- [C1-GetHoldRequestHistory Business Service](#)
- [C1-ReleaseHoldRequest Business Service](#)
- [C1-UpdateHoldRequest Business Service](#)

Oracle Revenue Management and Billing enables you to create, edit, and release a hold request through a web service. It also enables you to view the details of a hold request through a web service. You can send the hold request creation, modification, release, or view request from the external system through an inbound web service. The following business services are shipped with the product to support different hold request operations:

Business Service	Description
C1-CreateHoldRequest	Used to create a hold request for a single entity (i.e. for a particular person, account, or bill). For more information, see <a href="#">C1-CreateHoldRequest Business Service</a> on page 3149
C1-UpdateHoldRequest	Used to edit an active hold request. For more information, see <a href="#">C1-UpdateHoldRequest Business Service</a> on page 3186
C1-GetHoldRequestHistory	Used to fetch the details of an active hold request with a single entity (i.e. person, account, or bill). The system enables you to track the hold request view response sent to the external system using the Inbound Web Service History feature. For more information, see <a href="#">C1-GetHoldRequestHistory Business Service</a> on page 3165
C1-ReleaseHoldRequest	Used to release an active hold request with a single entity (i.e. person, account, or bill). For more information, see <a href="#">C1-ReleaseHoldRequest Business Service</a> on page 3177

You can create one inbound web service which supports all four operations - hold request creation, hold request update, hold request release, and hold request view. Alternatively, you can create four different inbound web services - one for hold request creation, another for hold request update, third for hold request release, and fourth for hold request view.

You can create a SOAP or REST based inbound web service. If you want to send the request in the XML and/or JSON format, you need to ensure that you create a REST based inbound web service. However, if you want to send the request in the XML format, you can create a SOAP or REST based inbound web service.

For more information on how to setup this feature, see [Prerequisites](#) on page 3148.

## Prerequisites

The following table lists the prerequisites for hold request creation, modification, release, and view through an inbound web service:

If you want to...	Then...
C1-CreateHoldRequest	<p>You need to do the following:</p> <ul style="list-style-type: none"> <li>• Define a REST or SOAP based inbound web service to call the <b>C1-CreateHoldRequest</b> business service.</li> <li>• Authorize the ORMB user to access the required application service</li> <li>• Define the required hold request type for the hold request where the <b>Approval Required</b> flag is configured as <b>No</b>.</li> <li>• Define the required hold reason and comments</li> <li>• Define the required values for the <b>HOLD_ENTITY_LVL_FLG</b> lookup field.</li> <li>• Define the required values for the <b>HOLD_PROCESS_FLG</b> lookup field.</li> <li>• Define the required characteristic types where the characteristic entity is set to <b>Hold Request</b></li> </ul>
C1-UpdateHoldRequest	<p>Used to edit an active hold request. Through this service, you can edit the following details of an active hold request:</p> <ul style="list-style-type: none"> <li>• End date, comments, and characteristics of a hold request</li> <li>• End date of a single hold entity in a hold request</li> <li>• End date of multiple hold processes in a hold request</li> </ul> <p>It also allows you to delete a characteristic of a hold request. While sending the request for hold request modification, you need to specify the following details:</p> <ul style="list-style-type: none"> <li>• Hold request ID</li> <li>• Hold entity ID (i.e. person ID, account ID, or bill ID)</li> </ul> <p>Once the hold request is edited through the service, the hold request ID is sent in the response. The system enables you to track the hold request modification response sent to the external system using the Inbound Web Service History feature.</p>
C1-GetHoldRequestHistory	<p>Used to fetch the details of an active hold request with a single entity (i.e. person, account, or bill). The system enables you to track the hold request view response sent to the external system using the Inbound Web Service History feature.</p>
C1-ReleaseHoldRequest	<p>Used to release an active hold request with a single entity (i.e. person, account, or bill). While sending the request for hold request release, you need to specify the following details:</p> <ul style="list-style-type: none"> <li>• Hold request ID</li> <li>• Hold release reason and comments</li> </ul> <p>Once the hold request is released through the service, the hold request ID is sent in the response along with its status and end date. Note that the hold request end date is set to the system date. The system enables you to track the hold request release response sent to the external system using the Inbound Web Service History feature.</p>

**Related Topics**

For more information on...	See...
How to setup the <b>C1-HOLDSRCH</b> feature configuration	<a href="#">Setting the C1-HOLDSRCH Feature Configuration</a>

**C1-CreateHoldRequest Business Service**

---

The **Create Hold Request (C1-CreateHoldRequest)** business service enables you to create a hold request for a single entity (i.e. for a particular account, bill, or person). You can call this business service from an external system through an inbound web service. If you want to send the hold request creation request in the XML and/or JSON format, you need to ensure that you create a REST based inbound web service in Oracle Revenue Management and Billing. However, if you want to send the hold request creation request in the XML format, you can create a SOAP or REST based inbound web service in Oracle Revenue Management and Billing.

While sending the request for hold request creation, you need to specify the following details:

- Hold request type, hold request start date, and hold request end date or hold days (which is used to calculate hold request end date if not specified)
- Entity (i.e. ACCT, BILL, or PERS) for which you want to create the hold request
- Hold reason and comments
- Entity identifiers when the entity is an account or a person, and the entity ID when the entity is a bill.
- Hold entity and hold process end dates
- Business processes (i.e. ATPY, BILL, FNDG, OVDU, REFD) which you want to hold for the entity
- Characteristics of the hold request

**Points to Note:**

- You must specify an active hold request type where the approval process is not configured for activation and release.
- If you do not specify the hold request type, the system, by default, considers the hold request type specified in the **Default Hold Request Type for IWS** option type of the **C1-HOLDSRCH** feature configuration.
- This business service does not allow you to create past dated or future dated hold request. Therefore, you must always set the hold request start date to the system date.
- Even if you explicitly specify a value for the defer processing count in the hold request type, it is no longer considered by this business service while creating a hold request.
- The upstream system may provide the hold request type to override the default hold request type, mentioned in the hold request inbound web service.
- If the hold request is in **DRAFT** status, this business service continues to operate in the background until the status of the hold request is set to **ACTIVE**.

On creating a hold request, the status of the hold request is set to **ACTIVE**. Once the hold request is created through the service, the hold request ID is sent in the response along with its status. The system enables you to track the hold request creation response sent to the external system using the Inbound Web Service History feature. For more information, see [Inbound Web Service History](#)

## Hold Request Creation Request and Response - Tags in XML Format

**Note:** We recommend you to refer the [Hold Request Creation Request in the XML Format](#) on page 3150 and [Hold Request Creation Response in the XML Format](#) on page 3151 topics in parallel while understanding the below mentioned tags. This will help you to understand how the tags are nested in the XML format.

Before calling the **C1-CreateHoldRequest** business service through an inbound web service, you need to ensure that the hold request creation request contains the following tags:

Tag Name	Tag Description	Mandatory (Yes or No)
C1-CreateHoldRequest	Used to indicate that you want to invoke the <b>C1-CreateHoldRequest</b> business service.	Yes
holdRequest	Used to specify the details of the hold request.	Yes
sourceSystem	Used to indicate the external system from which the hold creation request is sent.  <b>Note:</b> You must specify an external system which is already defined in the system.  The external system is used when the <b>Inbound Web Service History</b> feature is enabled. The specified external system should match the external system which is associated with the outbound message type specified in the <b>C1-IWSHIST</b> algorithm. If the external system is not specified in the hold request creation request, the system, by default, stamps the external system associated with the outbound message type (specified in the <b>C1-IWSHIST</b> algorithm) corresponding to the record in the <b>C1_IWS_HIST</b> table. For more information, see <a href="#">Inbound Web Service History</a> .	No
externalTransactionId	Used to indicate the transaction in the external system through which the hold request creation request is sent.  <b>Note:</b> The external transaction ID is used when the <b>Inbound Web Service History</b> feature is enabled.	No
externalSourceId	Used to specify the external source system ID.  <b>Note:</b> The external source system ID is used when the <b>Inbound Web Service History</b> feature is enabled.	No
holdStartDate	Used to specify the date from when the hold request is effective.	Yes

Tag Name	Tag Description	Mandatory (Yes or No)								
holdEndDate	Used to specify the date till when the hold request is effective.	Yes (Conditional)								
	<b>Note:</b> The hold request end date must be either derived or provided by the upstream system before creating a hold request in an <b>Active</b> status.	<b>Note:</b> This data is required if the <b>holdDays</b> is not specified.								
holdDays	Used to specify the number of days an entity should be kept on hold in the hold request.	Yes (Conditional)								
	<b>Note:</b> If the <b>holdEndDate</b> is not specified, the system calculates the <b>holdEndDate</b> by adding the <b>holdDays</b> to the <b>holdStartDate</b> .  The system considers the <b>holdDays</b> as calendar days which include all the 7 days in a week.	<b>Note:</b> This data is required if <b>holdEndDate</b> is not specified.								
holdRequestType	Used to specify an active hold request type where the approval process is not configured for activation and release.	No								
	<b>Note:</b> If an active hold request type is used where the approval process is configured, the system throws an error with a failure response.									
holdEntity	Used to indicate the type of the entity for which you want to create the hold request. The valid values are: <ul style="list-style-type: none"> <li>• <b>ACCT</b> - Used when you want to specify the account.</li> <li>• <b>BILL</b> - Used when you want to specify the bill.</li> <li>• <b>PERS</b> - Used when you want to specify the person.</li> </ul>	Yes								
	<b>Note:</b>									
	<table border="1"> <thead> <tr> <th>If...</th> <th>Then</th> </tr> </thead> <tbody> <tr> <td>You are creating the hold request for an <b>ACCT</b> entity</td> <td>You can add <b>Auto Pay</b>, <b>Bill Generation</b>, <b>Funding</b>, and <b>Overdue</b> process in the hold request.</td> </tr> <tr> <td>You are creating the hold request for a <b>BILL</b> entity</td> <td>You can only add <b>Funding</b> process in the hold request.</td> </tr> <tr> <td>You are creating the hold request for a <b>PERS</b> entity</td> <td>You can add <b>Bill Generation</b> and <b>Funding</b> process in the hold request.</td> </tr> </tbody> </table>		If...	Then	You are creating the hold request for an <b>ACCT</b> entity	You can add <b>Auto Pay</b> , <b>Bill Generation</b> , <b>Funding</b> , and <b>Overdue</b> process in the hold request.	You are creating the hold request for a <b>BILL</b> entity	You can only add <b>Funding</b> process in the hold request.	You are creating the hold request for a <b>PERS</b> entity	You can add <b>Bill Generation</b> and <b>Funding</b> process in the hold request.
	If...		Then							
You are creating the hold request for an <b>ACCT</b> entity	You can add <b>Auto Pay</b> , <b>Bill Generation</b> , <b>Funding</b> , and <b>Overdue</b> process in the hold request.									
You are creating the hold request for a <b>BILL</b> entity	You can only add <b>Funding</b> process in the hold request.									
You are creating the hold request for a <b>PERS</b> entity	You can add <b>Bill Generation</b> and <b>Funding</b> process in the hold request.									
You must specify a value which is already defined in the <b>HOLD_ENTITY_LVL_FLG</b> lookup field. It must be in the <b>Active</b> status.										

Tag Name	Tag Description	Mandatory (Yes or No)
holdReason	Used to specify the reason for the hold request.	Yes
	<b>Note:</b> You must specify a value which is already defined in the <b>HOLD_REASON_FLG</b> lookup field and is in the <b>Active</b> status.	
holdComments	Used to specify additional information about the hold request.	No
entityIdentifierType	Used to specify the entity type.	Yes (Conditional)
	<b>Note:</b> You cannot specify <b>BILL</b> as a type for the entity identifier.	
entityIdentifierValue	Used to specify the entity identifier (i.e. account or person).	Yes (Conditional)
	<b>Note:</b> You cannot specify <b>BILL</b> as a value for the entity identifier.	
entityId	Used to specify a list of entities for which you want to create a hold request.	Yes (Conditional)
	<b>Note:</b> You need to specify the entity ID when the hold entity is <b>BILL</b> .	
holdEntityEndDate	Used to specify the date till when the entity is effective for hold request.	No
hierarchySwitch	Used to associate the hold entity with the entity hierarchy relationship.	No
holdProcessData	Used to specify process information for the hold request.	Yes
holdProcess	Used to specify the process that you want to keep on hold in the hold request. The valid values are: <ul style="list-style-type: none"> <li>• <b>ATPY</b> - Used when you want to specify the auto pay process.</li> <li>• <b>BILL</b> - Used when you want to specify the bill generation process.</li> <li>• <b>FNDG</b> - Used when you want to specify the funding process.</li> <li>• <b>OVDU</b> - Used when you want to specify the overdue process.</li> </ul>	Yes
	<b>Note:</b> You must specify a value which is already defined in the <b>HOLD_PROCESS_FLG</b> lookup field. It must be in the <b>Active</b> status.	
holdProcessEndDate	Used to specify the date till when the entity is effective for hold request.	No
characteristics	Used to specify a characteristic for the hold request.	Yes

Tag Name	Tag Description	Mandatory (Yes or No)
characteristicType	Used to indicate the characteristic type.	Yes
	<b>Note:</b> You must specify a characteristic type where the characteristic entity is set to <b>Hold Request</b> and which is associated with the hold request type.	
characteristicValue	Used to specify the value for the characteristic type.	Yes
effectiveDate	Used to specify the date from when the characteristic is effective.	Yes

The following table lists and describes the tags which appear in the hold request creation response in the XML format:

Tag Name	Tag Description
statusCd	Indicates whether the hold request creation request is successfully processed or not. The valid values are: <ul style="list-style-type: none"> <li>• Success</li> <li>• Failure</li> </ul>
holdRequestId	Displays the hold request ID.
holdStatus	Indicates the current status of the hold request.
messageText	Indicates the error that occurred while creating the hold request.
	<b>Note:</b> This tag appears when the value in the <b>statusCd</b> tag is set to <b>Failure</b> .

## Hold Request Creation Request and Response - Attribute/Value Pairs in JSON Format

**Note:** We recommend you to refer the [Hold Request Creation Request in the JSON Format](#) on page 3155 and [Hold Request Creation Response in the JSON Format](#) on page 3156 topics in parallel while understanding the below mentioned attributes. This will help you to understand how the attribute/value pairs are structured in the JSON format.

Before calling the **C1-CreateHoldRequest** business service through an inbound web service, you need to ensure that the hold request creation request contains the following attributes:

Attribute Name	Attribute Description	Mandatory (Yes or No)
C1-CreateHoldRequest	Used to indicate that you want to invoke the <b>C1-CreateHoldRequest</b> business service.	Yes
holdRequest	Used to specify the details of the hold request.	Yes

Attribute Name	Attribute Description	Mandatory (Yes or No)
sourceSystem	Used to indicate the external system from which the hold creation request is sent.	No
	<p><b>Note:</b></p> <p>You must specify an external system which is already defined in the system.</p> <p>The external system is used when the <b>Inbound Web Service History</b> feature is enabled. The specified external system should match the external system which is associated with the outbound message type specified in the <b>C1-IWSHIST</b> algorithm. If the external system is not specified in the hold request creation request, the system, by default, stamps the external system associated with the outbound message type (specified in the <b>C1-IWSHIST</b> algorithm) corresponding to the record in the <b>C1_IWS_HIST</b> table. For more information, see <a href="#">Inbound Web Service History</a>.</p>	
externalTransactionId	Used to indicate the transaction in the external system through which the hold request creation request is sent.	No
	<p><b>Note:</b> The external transaction ID is used when the <b>Inbound Web Service History</b> feature is enabled.</p>	
externalSourceId	Used to specify the external source system ID.	No
	<p><b>Note:</b> The external source system ID is used when the <b>Inbound Web Service History</b> feature is enabled.</p>	
holdStartDate	Used to specify the date from when the hold request is effective.	Yes
holdEndDate	Used to specify the date till when the hold request is effective.	Yes (Conditional)
		<p><b>Note:</b> This data is required if the <b>holdDays</b> is not specified.</p>
holdDays	Used to specify the number of days an entity should be kept on hold in the hold request.	Yes (Conditional)
	<p><b>Note:</b></p> <p>If the <b>holdEndDate</b> is not specified, the system calculates the <b>holdEndDate</b> by adding the <b>holdDays</b> to the <b>holdStartDate</b>.</p> <p>The system considers the <b>holdDays</b> as calendar days which include all the 7 days in a week.</p>	<p><b>Note:</b> This data is required if <b>holdEndDate</b> is not specified.</p>

Attribute Name	Attribute Description	Mandatory (Yes or No)								
holdRequestType	Used to specify an active hold request type where the approval process is not configured for activation and release.	No								
	<b>Note:</b> If an active hold request type is used where the approval process is configured, the system throws an error with a failure response.									
holdEntity	Used to indicate the type of the entity for which you want to create the hold request. The valid values are: <ul style="list-style-type: none"> <li>• <b>ACCT</b> - Used when you want to specify the account.</li> <li>• <b>BILL</b> - Used when you want to specify the bill.</li> <li>• <b>PERS</b> - Used when you want to specify the person.</li> </ul>	Yes								
	<b>Note:</b>									
	<table border="1" data-bbox="492 751 1203 947"> <thead> <tr> <th data-bbox="492 751 820 800">If...</th> <th data-bbox="820 751 1203 800">Then</th> </tr> </thead> <tbody> <tr> <td data-bbox="492 800 820 947">You are creating the hold request for an <b>ACCT</b> entity</td> <td data-bbox="820 800 1203 947">You can add <b>Auto Pay, Bill Generation, Funding,</b> and <b>Overdue</b> process in the hold request.</td> </tr> <tr> <td data-bbox="492 947 820 1031">You are creating the hold request for a <b>BILL</b> entity</td> <td data-bbox="820 947 1203 1031">You can only add <b>Funding</b> process in the hold request.</td> </tr> <tr> <td data-bbox="492 1031 820 1142">You are creating the hold request for a <b>PERS</b> entity</td> <td data-bbox="820 1031 1203 1142">You can add <b>Bill Generation</b> and <b>Funding</b> process in the hold request.</td> </tr> </tbody> </table>		If...	Then	You are creating the hold request for an <b>ACCT</b> entity	You can add <b>Auto Pay, Bill Generation, Funding,</b> and <b>Overdue</b> process in the hold request.	You are creating the hold request for a <b>BILL</b> entity	You can only add <b>Funding</b> process in the hold request.	You are creating the hold request for a <b>PERS</b> entity	You can add <b>Bill Generation</b> and <b>Funding</b> process in the hold request.
	If...		Then							
	You are creating the hold request for an <b>ACCT</b> entity		You can add <b>Auto Pay, Bill Generation, Funding,</b> and <b>Overdue</b> process in the hold request.							
You are creating the hold request for a <b>BILL</b> entity	You can only add <b>Funding</b> process in the hold request.									
You are creating the hold request for a <b>PERS</b> entity	You can add <b>Bill Generation</b> and <b>Funding</b> process in the hold request.									
You must specify a value which is already defined in the <b>HOLD_ENTITY_LVL_FLG</b> lookup field. It must be in the <b>Active</b> status.										
holdReason	Used to specify the reason for the hold request.	Yes								
	<b>Note:</b> You must specify a value which is already defined in the <b>HOLD_REASON_FLG</b> lookup field. It must be in the <b>Active</b> status.									
holdComments	Used to specify additional information about the hold request.	No								
entityIdentifierType	Used to specify the entity type.	Yes (Conditional)								
	<b>Note:</b> You cannot specify <b>BILL</b> as a type for the entity identifier.									
		<b>Note:</b> This data is required while defining or editing a hold request.								

Attribute Name	Attribute Description	Mandatory (Yes or No)
entityIdentifierValue	Used to specify the entity identifier (i.e. account or person).	Yes (Conditional)
	<b>Note:</b> You cannot specify <b>BILL</b> as a value for the entity identifier.	<b>Note:</b> This data is required while defining or editing a hold request.
entityId	Used to specify a list of entities for which you want to create a hold request.	Yes (Conditional)
	<b>Note:</b> You need to specify the entityId when <b>BILL</b> is used as a hold entity.	<b>Note:</b> This data is required while defining or editing a hold request.
holdEntityEndDate	Used to specify the date till when the entity is effective for hold request.	No
hierarchySwitch	Used to associate the hold entity with the entity hierarchy relationship.	No
holdProcessData	Used to specify process information for the hold request.	Yes
holdProcess	Used to specify the process that you want to keep on hold in the hold request. The valid values are: <ul style="list-style-type: none"> <li>• <b>ATPY</b> - Used when you want to specify the auto pay process.</li> <li>• <b>BILL</b> - Used when you want to specify the bill generation process.</li> <li>• <b>FNDG</b> - Used when you want to specify the funding process.</li> <li>• <b>OVDU</b> - Used when you want to specify the overdue process.</li> </ul>	Yes
	<b>Note:</b> You must specify a value which is already defined in the <b>HOLD_PROCESS_FLG</b> lookup field. It must be in the <b>Active</b> status.	
holdProcessEndDate	Used to specify the date till when the entity is effective for hold request.	No
characteristics	Used to specify a characteristic for the hold request.	Yes
characteristicType	Used to indicate the characteristic type.	Yes
	<b>Note:</b> You must specify a characteristic type where the characteristic entity is set to <b>Hold Request</b> and which is associated with the hold request type.	
characteristicValue	Used to specify the value for the characteristic type.	Yes
effectiveDate	Used to specify the date from when the characteristic is effective.	Yes

The following table lists and describes the tags which appear in the hold request creation response in the JSON format:

Attribute Name	Attribute Description
statusCd	Indicates whether the hold request creation request is successfully processed or not. The valid values are: <ul style="list-style-type: none"> <li>• Success</li> <li>• Failure</li> </ul>
holdRequestId	Displays the hold request ID.
holdStatus	Indicates the current status of the hold request.
messageText	Indicates the error that occurred while creating the hold request.
	<b>Note:</b> This tag appears when the value in the <b>statusCd</b> tag is set to <b>Failure</b> .

## C1-GetHoldRequestHistory Business Service

The **Inquire Hold Request Details (C1-GetHoldRequestHistory)** business service enables you to view the details of an active hold request for a single entity (i.e. person, account, or bill). You can call this business service from an external system through an inbound web service. If you want to send the hold request view request in the XML and/or JSON format, you need to ensure that you create a REST based inbound web service in Oracle Revenue Management and Billing. However, if you want to send the hold request view request in the XML format, you can create a SOAP or REST based inbound web service in Oracle Revenue Management and Billing.

While sending the hold request view request, you need to specify the following details:

- Either the entity identifier type and entity identifier value or the entity ID.

**Note:** Specify a valid entity ID in the hold request view request which is used in the system.

The system enables you to track the hold request view response sent to the external system using the Inbound Web Service History feature. For more information, see [Inbound Web Service History](#)

## Hold Request View Request and Response - Tags in XML Format

**Note:** We recommend you to refer the [Hold Request View Request in the XML Format](#) on page 3166 and [Hold Request View Response in the XML Format](#) on page 3166 topics in parallel while understanding the below mentioned tags. This will help you to understand how the tags are nested in the XML format.

Before calling the **C1-GetHoldRequestHistory** business service through an inbound web service, you need to ensure that the hold request view request contains the following tags:

Tag Name	Tag Description	Mandatory (Yes or No)
C1-GetHoldRequestHistory	Used to indicate that you want to invoke the <b>C1-GetHoldRequestHistory</b> business service.	Yes
getHoldReqHistRequest	Used to specify the details of the hold request which you want to view.	Yes

Tag Name	Tag Description	Mandatory (Yes or No)
sourceSystem	Used to indicate the external system from which the hold view request is received.	No
	<p><b>Note:</b></p> <p>You must specify an external system which is already defined in the system.</p> <p>The external system is used when the <b>Inbound Web Service History</b> feature is enabled. The specified external system should match the external system which is associated with the outbound message type specified in the <b>C1-IWSHIST</b> algorithm. If the external system is not specified in the hold request view request, the system, by default, stamps the external system associated with the outbound message type (specified in the <b>C1-IWSHIST</b> algorithm) corresponding to the record in the <b>C1_IWS_HIST</b> table. For more information, see <i>Inbound Web Service History</i>.</p>	
c1ExternalTransactionId	Used to indicate the transaction in the external system through which the hold request view request is sent.	No
	<p><b>Note:</b> The external transaction ID is used when the <b>Inbound Web Service History</b> feature is enabled.</p>	
externalSourceId	Used to specify the external source system ID.	No
	<p><b>Note:</b> The external source system ID is used when the <b>Inbound Web Service History</b> feature is enabled.</p>	
getHoldReqStartDt	Used when you want to view hold request details which are created from a particular date onwards.	Yes
getHoldReqEndDt	Used when you want to view hold request details which are created till a particular date.	No
getHoldReqEntity	Used when you want to view the hold request details for a particular entity. The valid values are: <ul style="list-style-type: none"> <li>• <b>ACCT</b></li> <li>• <b>BILL</b></li> <li>• <b>PERS</b></li> </ul>	Yes
getHoldReqReason	Used when you want to view the hold request details based on a specific reason.	Yes
	<p><b>Note:</b> You must specify a value which is already defined in the <b>HOLD_REASON_FLG</b> lookup field and is in the <b>Active</b> status.</p>	

Tag Name	Tag Description	Mandatory (Yes or No)
getHoldReqEntIdentType	Used to specify the entity type.	Yes (Conditional)
	<b>Note:</b> You cannot specify <b>BILL</b> as a type for the entity identifier.	<b>Note:</b> This data is required while viewing a hold request.
getHoldReqEntIdentValue	Used to specify the entity identifier (i.e. account or person).	Yes (Conditional)
	<b>Note:</b> You cannot specify <b>BILL</b> as a value for the entity identifier.	<b>Note:</b> This data is required while viewing a hold request.
getHoldReqEntityId	Used to specify a list of entities for which you want to create a hold request.	Yes (Conditional)
	<b>Note:</b> You need to specify the entityId when <b>BILL</b> is used as a hold entity.	<b>Note:</b> This data is required while viewing a hold request.
getHoldReqProcess	Used when you want to view the hold request details for a specific process. The valid values are: <ul style="list-style-type: none"> <li>• <b>ATPY</b></li> <li>• <b>BILL</b></li> <li>• <b>FNDG</b></li> <li>• <b>OVDU</b></li> </ul>	Yes

The following table lists and describes the tags which appear in the hold request view response in the XML format:

Tag Name	Tag Description
holdReqHistResponse	Displays the response returned by the business service in relation to the hold request.
statusCd	Indicates whether the hold request view request is successfully processed or not. The valid values are: <ul style="list-style-type: none"> <li>• Success</li> <li>• Failure</li> </ul>
messageText	Indicates the error that occurred while creating the hold request.
	<b>Note:</b> This tag appears when the value in the <b>statusCd</b> tag is set to <b>Failure</b> .
holdReqHistList	Displays the details of a hold request.
holdRequestId	Displays the hold request ID.
holdReqStartDt	Displays the date from when the hold request was effective.
holdReqEndDt	Displays the date till when the hold request was effective.
holdStatus	Indicates the current status of the hold request.

Tag Name	Tag Description
holdReqType	Indicates the type using which the hold request was created.
holdReqReason	Indicates the reason which was specified when the hold request was created.
holdReqEntity	Indicates the entity for which the hold request was created.
holdReqProcesses	Indicates the process which was kept on hold in the hold request.

## Hold Request View Request and Response - Attribute/Value Pairs in JSON Format

**Note:** We recommend you to refer the [Hold Request View Request in the JSON Format](#) on page 3170 and [Hold Request View Response in the JSON Format](#) on page 3170 topics in parallel while understanding the below mentioned attributes. This will help you to understand how the attribute/value pairs are structured in the JSON format.

Before calling the **C1-GetHoldRequestHistory** business service through an inbound web service, you need to ensure that the hold request view request contains the following tags:

Tag Name	Tag Description	Mandatory (Yes or No)
C1-GetHoldRequestHistory	Used to indicate that you want to invoke the <b>C1-GetHoldRequestHistory</b> business service.	Yes
getHoldReqHistRequest	Used to specify the details of the hold request which you want to view.	Yes
sourceSystem	Used to indicate the external system from which the hold view request is received.  <b>Note:</b> You must specify an external system which is already defined in the system.  The external system is used when the <b>Inbound Web Service History</b> feature is enabled. The specified external system should match the external system which is associated with the outbound message type specified in the <b>C1-IWSHIST</b> algorithm. If the external system is not specified in the hold request view request, the system, by default, stamps the external system associated with the outbound message type (specified in the <b>C1-IWSHIST</b> algorithm) corresponding to the record in the <b>C1_IWS_HIST</b> table. For more information, see <a href="#">Inbound Web Service History</a> .	No
c1ExternalTransactionId	Used to indicate the transaction in the external system through which the hold request view request is sent.  <b>Note:</b> The external transaction ID is used when the <b>Inbound Web Service History</b> feature is enabled.	No
externalSourceId	Used to specify the external source system ID.  <b>Note:</b> The external source system ID is used when the <b>Inbound Web Service History</b> feature is enabled.	No
getHoldReqStartDt	Used when you want to view hold request details which are created from a particular date onwards.	Yes
getHoldReqEndDt	Used when you want to view hold request details which are created till a particular date.	No
getHoldReqEntity	Used when you want to view the hold request details for a particular entity. The valid values are: <ul style="list-style-type: none"> <li>• <b>ACCT</b></li> <li>• <b>BILL</b></li> <li>• <b>PERS</b></li> </ul>	Yes
getHoldReqReason	Used when you want to view the hold request details based on a specific reason.  <b>Note:</b> You must specify a value which is already defined in the <b>HOLD_REASON_FLG</b> lookup field and is in the <b>Active</b> status.	Yes

Tag Name	Tag Description	Mandatory (Yes or No)
getHoldReqEntIdentType	Used to specify the entity type.	Yes (Conditional)
	<b>Note:</b> You cannot specify <b>BILL</b> as a type for the entity identifier.	<b>Note:</b> This data is required while viewing a hold request.
getHoldReqEntIdentValue	Used to specify the entity identifier (i.e. account or person).	Yes (Conditional)
	<b>Note:</b> You cannot specify <b>BILL</b> as a value for the entity identifier.	<b>Note:</b> This data is required while viewing a hold request.
getHoldReqEntityId	Used to specify a list of entities for which you want to create a hold request.	Yes (Conditional)
	<b>Note:</b> You need to specify the entityId when <b>BILL</b> is used as a hold entity.	<b>Note:</b> This data is required while viewing a hold request.
getHoldReqProcess	Used when you want to view the hold request details for a specific process. The valid values are: <ul style="list-style-type: none"> <li>• <b>ATPY</b></li> <li>• <b>BILL</b></li> <li>• <b>FNDG</b></li> <li>• <b>OVDU</b></li> </ul>	Yes

The following table lists and describes the tags which appear in the hold request view response in the XML format:

Tag Name	Tag Description
holdReqHistResponse	Displays the response returned by the business service in relation to the hold request.
statusCd	Indicates whether the hold request view request is successfully processed or not. The valid values are: <ul style="list-style-type: none"> <li>• Success</li> <li>• Failure</li> </ul>
messageText	Indicates the error that occurred while creating the hold request.
	<b>Note:</b> This tag appears when the value in the <b>statusCd</b> tag is set to <b>Failure</b> .
holdReqHistList	Displays the details of a hold request.
holdRequestId	Displays the hold request ID.
holdReqStartDt	Displays the date from when the hold request was effective.
holdReqEndDt	Displays the date till when the hold request was effective.
holdStatus	Indicates the current status of the hold request.

Tag Name	Tag Description
holdReqType	Indicates the type using which the hold request was created.
holdReqReason	Indicates the reason which was specified when the hold request was created.
holdReqEntity	Indicates the entity for which the hold request was created.
holdReqProcesses	Indicates the process which was kept on hold in the hold request.

## Sample Hold Request View Request and Response in the XML Format

Using the below example, you can view a hold request for the **ACCT** account entity where **ATPY** auto pay process is on hold.

### Sample Hold Request View Request in the XML Format

```
<C1-GetHoldRequestHistory>
  <getHoldReqHistRequest>
    <sourceSystem>SIMPLE_PRIME_HOLD</sourceSystem>
    <externalSourceId>ESI1</externalSourceId>
    <clExternalTransactionId>ETI1</clExternalTransactionId>
    <getHoldReqStartDt>2022-01-01</getHoldReqStartDt>
    <getHoldReqEndDt></getHoldReqEndDt>
    <getHoldReqEntity>ACCT</getHoldReqEntity>
    <getHoldReqReason>TORNADO_IN_TX</getHoldReqReason>
    <getHoldReqEntIdentType>SSN_NO</getHoldReqEntIdentType>
    <getHoldReqEntIdentValue>987-65-4321</getHoldReqEntIdentValue>
    <getHoldReqEntityId>003526636627</getHoldReqEntityId>
    <getHoldReqProcess>ATPY</getHoldReqProcess>
  </getHoldReqHistRequest>
</C1-GetHoldRequestHistory>
```

### Sample Hold Request View Response in the XML Format

The following information is received as response when the hold request is processed successfully.

```
<C1-GetHoldRequestHistory>
  <getHoldReqHistRequest>
    <sourceSystem>SIMPLE_PRIME_HOLD</sourceSystem>
    <externalSourceId>ESI1</externalSourceId>
    <clExternalTransactionId>ETI1</clExternalTransactionId>
    <getHoldReqStartDt>2022-01-01</getHoldReqStartDt>
    <getHoldReqEndDt></getHoldReqEndDt>
    <getHoldReqEntity>ACCT</getHoldReqEntity>
    <getHoldReqReason>TORNADO_IN_TX</getHoldReqReason>
    <getHoldReqEntIdentType>SSN_NO</getHoldReqEntIdentType>
    <getHoldReqEntIdentValue>987-65-4321</getHoldReqEntIdentValue>
    <getHoldReqEntityId>003526636627</getHoldReqEntityId>
    <getHoldReqProcess>ATPY</getHoldReqProcess>
  </getHoldReqHistRequest>
  <holdReqHistResponse>
    <statusCd>SUCCESS</statusCd>
    <messageText></messageText>
    <holdReqHistList>
      <holdReqId>006046575162</holdReqId>
```

```

    <holdReqStartDt>2022-01-01</holdReqStartDt>
    <holdReqEndDt></holdReqEndDt>
    <holdReqStatus>ACTIVE</holdReqStatus>
    <holdReqType>HOLD_WITHOUT_APPROVAL</holdReqType>
    <holdReqReason>TORNADO_IN_TX</holdReqReason>
    <holdReqEntity>003526636627</holdReqEntity>
    <holdReqProcesses>ATPY</holdReqProcesses>
  </holdReqHistList>
</holdReqHistResponse>
</C1-GetHoldRequestHistory>

```

The following information is received from the hold request when the requested search parameters fail to return any search results.

```

<C1-GetHoldRequestHistory>
  <getHoldReqHistRequest>
    <sourceSystem>SIMPLE_PRIME_TEST</sourceSystem>
    <externalSourceId>ESI55</externalSourceId>
    <c1ExternalTransactionId>ETI33</c1ExternalTransactionId>
    <getHoldReqStartDt>2021-12-01</getHoldReqStartDt>
    <getHoldReqEndDt></getHoldReqEndDt>
    <getHoldReqEntity>PERS</getHoldReqEntity>
    <getHoldReqReason>FLOODS_IN_TX</getHoldReqReason>
    <getHoldReqEntIdentType>SSN_NO</getHoldReqEntIdentType>
    <getHoldReqEntIdentValue>987-65-4323</getHoldReqEntIdentValue>
    <getHoldReqEntityId>004556623427</getHoldReqEntityId>
    <getHoldReqProcess>ATPY</getHoldReqProcess>
  </getHoldReqHistRequest>
  <holdReqHistResponse>
    <statusCd>FAILURE</statusCd>
    <messageText>The system could not retrieve hold request ID based on
the search parameters.
    </messageText>
    <holdReqHistList>
      <holdReqId></holdReqId>
      <holdReqStartDt></holdReqStartDt>
      <holdReqEndDt></holdReqEndDt>
      <holdReqStatus></holdReqStatus>
      <holdReqType></holdReqType>
      <holdReqReason></holdReqReason>
      <holdReqEntity></holdReqEntity>
      <holdReqProcesses></holdReqProcesses>
    </holdReqHistList>
  </holdReqHistResponse>
</C1-GetHoldRequestHistory>

```

## C1-ReleaseHoldRequest Business Service

The **Release Hold Request (C1-ReleaseHoldRequest)** business service enables you to release an active hold request for a single entity (i.e. person, account, or bill). You can call this business service from an external system through an inbound web service. If you want to send the hold request release request in the XML and/or JSON format, you need to ensure that you create a REST based inbound web service in Oracle Revenue Management and Billing. However, if you want to send the hold request release request in the XML format, you can create a SOAP or REST based inbound web service in Oracle Revenue Management and Billing.

While sending the hold request release request, you need to specify the following details:

- Hold request ID
- Hold release reason and comments

Once the hold request is released through this business service, the hold request ID is sent in the response along with its status and end date. Note that the hold request end date is set to the system date. The system enables you to track the hold request release response sent to the external system using the Inbound Web Service History feature. For more information, see [Inbound Web Service History](#)

## Hold Request Release Request and Response - Tags in XML Format

**Note:** We recommend you to refer the [Hold Request Release Request in the XML Format](#) on page 3178 and [Hold Request Release Response in the XML Format](#) on page 3179 topics in parallel while understanding the below mentioned tags. This will help you to understand how the tags are nested in the XML format.

Before calling the **C1-ReleaseHoldRequest** business service through an inbound web service, you need to ensure that the hold request view request contains the following tags:

Tag Name	Tag Description	Mandatory (Yes or No)
C1-ReleaseHoldRequest	Used to indicate that you want to invoke the <b>C1-ReleaseHoldRequest</b> business service.	Yes

Tag Name	Tag Description	Mandatory (Yes or No)
sourceSystem	Used to indicate the external system from which the hold release request is received.  <b>Note:</b> You must specify an external system which is already defined in the system.  The external system is used when the <b>Inbound Web Service History</b> feature is enabled. The specified external system should match the external system which is associated with the outbound message type specified in the <b>C1-IWSHIST</b> algorithm. If the external system is not specified in the hold request view request, the system, by default, stamps the external system associated with the outbound message type (specified in the <b>C1-IWSHIST</b> algorithm) corresponding to the record in the <b>C1_IWS_HIST</b> table. For more information, see <a href="#">Inbound Web Service History</a> .	No
externalTransactionId	Used to indicate the transaction in the external system through which the hold request release request is sent.  <b>Note:</b> The external transaction ID is used when the <b>Inbound Web Service History</b> feature is enabled.	No
externalSourceId	Used to specify the external source system ID.  <b>Note:</b> The external source system ID is used when the <b>Inbound Web Service History</b> feature is enabled.	No
holdRequestId	Used to specify the hold request ID of the hold request for which the hold request release request is sent.  <b>Note:</b> You must specify the hold request ID which is already defined in the system.	Yes
holdReleaseReason	Used to specify the reason for releasing the hold request.  <b>Note:</b> You must specify a value which is already defined in the <b>HOLD_REASON_FLG</b> lookup field. It must be in the <b>Active</b> status.	Yes
holdComments	Used to specify additional information about the hold request.	No

The following table lists and describes the tags which appear in the hold request view response in the XML format:

Tag Name	Tag Description
requestProcessStatus	Indicates whether the hold request view request is successfully processed or not. The valid values are: <ul style="list-style-type: none"> <li>• Success</li> <li>• Failure</li> </ul>
holdRequestId	Displays the hold request ID.

Tag Name	Tag Description
holdReleaseReason	Indicates the reason which was specified when the hold request was released.
holdComments	Displays additional information about the hold request.
errormsg	Indicates the error that occurred while creating the hold request.
	<b>Note:</b> This tag appears when the value in the <b>requestProcessStatus</b> tag is set to <b>Failure</b> .
holdEndDate	Displays the date till when the hold request was effective.
holdStatus	Indicates the current status of the hold request.

## Hold Request Release Request and Response - Tags in JSON Format

**Note:** We recommend you to refer the [Hold Request Release Request in the JSON Format](#) on page 3181 and [Hold Request Release Response in the JSON Format](#) on page 3182 topics in parallel while understanding the below mentioned tags. This will help you to understand how the tags are nested in the XML format.

Before calling the **C1-ReleaseHoldRequest** business service through an inbound web service, you need to ensure that the hold request view request contains the following tags:

Tag Name	Tag Description	Mandatory (Yes or No)
C1-ReleaseHoldRequest	Used to indicate that you want to invoke the <b>C1-ReleaseHoldRequest</b> business service.	Yes

Tag Name	Tag Description	Mandatory (Yes or No)
sourceSystem	Used to indicate the external system from which the hold release request is received.  <b>Note:</b> You must specify an external system which is already defined in the system.  The external system is used when the <b>Inbound Web Service History</b> feature is enabled. The specified external system should match the external system which is associated with the outbound message type specified in the <b>C1-IWSHIST</b> algorithm. If the external system is not specified in the hold request view request, the system, by default, stamps the external system associated with the outbound message type (specified in the <b>C1-IWSHIST</b> algorithm) corresponding to the record in the <b>C1_IWS_HIST</b> table. For more information, see <a href="#">Inbound Web Service History</a> .	No
externalTransactionId	Used to indicate the transaction in the external system through which the hold request release request is sent.  <b>Note:</b> The external transaction ID is used when the <b>Inbound Web Service History</b> feature is enabled.	No
externalSourceId	Used to specify the external source system ID.  <b>Note:</b> The external source system ID is used when the <b>Inbound Web Service History</b> feature is enabled.	No
holdRequestId	Used to specify the hold request ID of the hold request for which the hold request release request is sent.  <b>Note:</b> You must specify the hold request ID which is already defined in the system.	Yes
holdReleaseReason	Used to specify the reason for releasing the hold request.  <b>Note:</b> You must specify a value which is already defined in the <b>HOLD_REASON_FLG</b> lookup field. It must be in the <b>Active</b> status.	Yes
holdComments	Used to specify additional information about the hold request.	No

The following table lists and describes the tags which appear in the hold request view response in the XML format:

Tag Name	Tag Description
requestProcessStatus	Indicates whether the hold request view request is successfully processed or not. The valid values are: <ul style="list-style-type: none"> <li>• Success</li> <li>• Failure</li> </ul>
holdRequestId	Displays the hold request ID.

Tag Name	Tag Description
holdReleaseReason	Indicates the reason which was specified when the hold request was released.
holdComments	Displays additional information about the hold request.
errormsg	Indicates the error that occurred while creating the hold request.
	<b>Note:</b> This tag appears when the value in the <b>requestProcessStatus</b> tag is set to <b>Failure</b> .
holdEndDate	Displays the date till when the hold request was effective.
holdStatus	Indicates the current status of the hold request.

## Sample Hold Request Release Request and Response in the XML Format

Using the below example, you can release a hold request with an **Active** status for the **22559977334488** hold request ID.

### Sample Hold Request Release Request in the XML Format

```
<C1-ReleaseHoldRequest>
  <sourceSystem>SRC_AMER_PRIME</sourceSystem>
  <externalTransactionId>ETI44</externalTransactionId>
  <externalSourceId>ESI77</externalSourceId>
  <holdRequestId>22559977334488</holdRequestId>
  <holdReleaseReason>TROPICAL_CYCLONE</holdReleaseReason>
  <holdComments>CYCLONE PHENOMENON WAS SEEN</holdComments>
</C1-ReleaseHoldRequest>
```

### Sample Hold Request Release Response in the XML Format

The following information is received as response when the hold request is processed successfully.

```
<C1-ReleaseHoldRequest>
  <requestProcessStatus>SUCCESS</requestProcessStatus>
  <sourceSystem>SRC_AMER_PRIME</sourceSystem>
  <externalTransactionId>ETI44</externalTransactionId>
  <externalSourceId>ESI77</externalSourceId>
  <holdRequestId>22559977334488</holdRequestId>
  <holdReleaseReason>TROPICAL_CYCLONE</holdReleaseReason>
  <holdComments>CYCLONE PHENOMENON WAS SEEN</holdComments>
  <holdEndDate>2022-31-01</holdEndDate>
  <holdRequestStatus>RELEASE</holdRequestStatus>
  <errormsg></errormsg>
</C1-ReleaseHoldRequest>
```

The following information is received from the hold request when the hold request ID passed in the release request is invalid.

```
<C1-ReleaseHoldRequest>
  <requestProcessStatus>FAILURE</requestProcessStatus>
  <sourceSystem>SRC_AMER_PRIME</sourceSystem>
  <externalTransactionId>ETI44</externalTransactionId>
  <externalSourceId>ESI77</externalSourceId>
  <holdRequestId>790420762397</holdRequestId>
```

```
<holdReleaseReason>TROPICAL_CYCLONE</holdReleaseReason>
<holdComments>CYCLONE PHENOMENON WAS SEEN</holdComments>
<holdEndDate></holdEndDate>
<holdRequestStatus></holdRequestStatus>
<errmsg>The hold request ID 790420762397 is invalid</errmsg>
</Cl-ReleaseHoldRequest>
```

## Sample Hold Request Release Request and Response in the JSON Format

Using the below example, you can release a hold request with an **Active** status for the **44776611339988** hold request ID.

### Sample Hold Request View Request in the JSON Format

```
{
  "Cl-ReleaseHoldRequest": {
    "sourceSystem": "SRC_PANAMER_PRIME"
    "externalTransactionId": "ETI01"
    "externalSourceId": "ESI05"
    "holdRequestId": "44776611339988"
    "holdReleaseReason": "FLOODS"
    "holdComments": "HEAVY FLOODS IN DOWNTOWN"
  }
}
```

### Sample Hold Request Release Response in the JSON Format

```
{
  "Cl-ReleaseHoldRequest": {
    "requestProcessStatus": "SUCCESS"
    "sourceSystem": "SRC_PANAMER_PRIME"
    "externalTransactionId": "ETI01"
    "externalSourceId": "ESI05"
    "holdRequestId": "44776611339988"
    "holdReleaseReason": "FLOODS"
    "holdComments": "HEAVY FLOODS IN DOWNTOWN"
    "holdEndDate": "2022-02-28"
    "holdRequestStatus": "RELEASE"
    "errmsg": ""
  }
}
```

The following information is received from the hold request when the hold request ID passed in the release request is invalid.

```
{
  "Cl-ReleaseHoldRequest": {
    "requestProcessStatus": "FAILURE"
    "sourceSystem": "SRC_PANAMER_PRIME"
    "externalTransactionId": "ETI01"
    "externalSourceId": "ESI05"
    "holdRequestId": "55772211339988"
    "holdReleaseReason": "FLOODS"
    "holdComments": "HEAVY FLOODS IN DOWNTOWN"
  }
}
```

```

    "holdEndDate": ""
    "holdRequestStatus": ""
    "errmsg": "The hold request ID 55772211339988 is invalid"
  }
}

```

## C1-UpdateHoldRequest Business Service

The **Update Hold Request (C1-UpdateHoldRequest)** business service enables you to edit an active hold request. You can call this business service from an external system through an inbound web service. If you want to send the hold request update request in the XML and/or JSON format, you need to ensure that you create a REST based inbound web service in Oracle Revenue Management and Billing. However, if you want to send the hold request update request in the XML format, you can create a SOAP or REST based inbound web service in Oracle Revenue Management and Billing.

While sending the hold request update request, you need to specify the following details:

- Hold request ID
- Hold entity ID (i.e. person ID, account ID, or bill ID)

Through this service, you can edit the following details of an active hold request:

- End date, comments, and characteristics of a hold request
- End date of a single hold entity in a hold request
- End date of multiple hold processes in a hold request

Once the hold request is edited through the service, the hold request ID is sent in the response. The system enables you to track the hold request release response sent to the external system using the Inbound Web Service History feature. For more information, see [Inbound Web Service History](#)

externalSourceId	<p>Used to specify the external source system ID.</p> <p><b>Note:</b> The external source system ID is used when the <b>Inbound Web Service History</b> feature is enabled.</p>	No
holdRequestId	<p>Used to specify the hold request ID of the hold request for which the hold request update request is sent.</p> <p><b>Note:</b> You must specify the hold request ID which is already defined in the system.</p>	Yes
holdComments	Used to specify additional information about the hold request.	No
holdEndDate	<p>Used to specify the date till when the hold request is effective.</p> <p><b>Note:</b> The hold request end date must be either derived or provided by the upstream system before creating a hold request in an <b>Active</b> status.</p> <p>The hold request end date cannot be earlier than the hold process end date.</p>	No
entityId	<p>Used to specify a list of entities for which you want to create a hold request.</p> <p><b>Note:</b> You need to specify the entity ID when the hold entity is <b>BILL</b>.</p>	No

Tag Name	Tag Description	Mandatory (Yes or No)
entityEndDate	<p>Used to specify the date till when the entity is effective for hold request.</p> <p><b>Note:</b></p> <p>The entity end date cannot be later than the hold end date and earlier than the hold process end date.</p> <p>The entity end date cannot be later than the system date.</p> <p>At present, you can only update the end date of a single entity specified in the hold request update request. If there are two or more entities on hold, you need to initiate a separate hold request update request for each entity in order to update its respective end date.</p>	No
holdProcessData	Used to specify the details of the hold process.	No
holdProcess	<p>Used to specify the process that you want to keep on hold in the hold request. The valid values are:</p> <ul style="list-style-type: none"> <li>• <b>ATPY</b> - Used when you want to specify the auto pay process.</li> <li>• <b>BILL</b> - Used when you want to specify the bill generation process.</li> <li>• <b>FNDG</b> - Used when you want to specify the funding process.</li> <li>• <b>OVDU</b> - Used when you want to specify the overdue process.</li> </ul> <p><b>Note:</b> You must specify a value which is already defined in the <b>HOLD_PROCESS_FLG</b> lookup field. It must be in the <b>Active</b> status.</p>	<p>Yes (Conditional)</p> <p><b>Note:</b> This data is required while updating the hold request information.</p>
holdProcessEndDate	<p>Used to specify the date till when the entity is effective for hold request.</p> <p><b>Note:</b></p> <p>The hold process end date cannot be later than the hold end date.</p> <p>At present, you can only update the end date of a single process specified in the hold request update request. If there are two or more processes on hold, you need to initiate a separate hold request update request for each process in order to update its respective end date.</p>	No
characteristics	Used to specify a characteristic for the hold request.	<p>Yes (Conditional)</p> <p><b>Note:</b> This data is required while updating the hold request information.</p>

Tag Name	Tag Description	Mandatory (Yes or No)
action	Used to specify the action to be performed on the characteristic. The valid values are: <ul style="list-style-type: none"> <li>• <b>Update</b></li> <li>• <b>Delete</b></li> </ul>	Yes (Conditional)  <b>Note:</b> This data is required while updating the hold request information.
characteristicType	Used to indicate the characteristic type.  <b>Note:</b> You must specify a characteristic type where the characteristic entity is set to <b>Hold Request</b> and which is associated with the hold request type.	Yes (Conditional)  <b>Note:</b> This data is required while updating the hold request information.
characteristicValue	Used to specify the value for the characteristic type.  <b>Note:</b> You must specify a characteristic value which is associated with the characteristic type and is present in the system.	Yes (Conditional)  <b>Note:</b> This data is required while updating the hold request information.
effectiveDate	Used to specify the date from when the characteristic is effective.	Yes (Conditional)  <b>Note:</b> This data is required while updating the hold request information.

The following table lists and describes the tags which appear in the hold request view response in the XML format:

Tag Name	Tag Description
requestProcessStatus	Indicates whether the hold request update request is successfully processed or not. The valid values are: <ul style="list-style-type: none"> <li>• Success</li> <li>• Failure</li> </ul>
holdRequestId	Displays the hold request ID.
errormsg	Indicates the error that occurred while updating the hold request.  <b>Note:</b> This tag appears when the value in the <b>requestProcessStatus</b> tag is set to <b>Failure</b> .

Tag Name	Tag Description	Mandatory (Yes or No)
action	Used to specify the action to be performed on the characteristic. The valid values are: <ul style="list-style-type: none"> <li>• <b>Update</b></li> <li>• <b>Delete</b></li> </ul>	Yes (Conditional)
		<b>Note:</b> This data is required while updating the hold request information.
characteristicType	Used to indicate the characteristic type.  <b>Note:</b> You must specify a characteristic type where the characteristic entity is set to <b>Hold Request</b> and which is associated with the hold request type.	Yes (Conditional)
		<b>Note:</b> This data is required while updating the hold request information.
characteristicValue	Used to specify the value for the characteristic type.  <b>Note:</b> You must specify a characteristic value which is associated with the characteristic type and is present in the system.	Yes (Conditional)
		<b>Note:</b> This data is required while updating the hold request information.
effectiveDate	Used to specify the date from when the characteristic is effective.	Yes (Conditional)
		<b>Note:</b> This data is required while updating the hold request information.

The following table lists and describes the tags which appear in the hold request view response in the XML format:

Tag Name	Tag Description
requestProcessStatus	Indicates whether the hold request update request is successfully processed or not. The valid values are: <ul style="list-style-type: none"> <li>• Success</li> <li>• Failure</li> </ul>
holdRequestId	Displays the hold request ID.
errormsg	Indicates the error that occurred while updating the hold request.
	<b>Note:</b> This tag appears when the value in the <b>requestProcessStatus</b> tag is set to <b>Failure</b> .

# Chapter 46

---

## Hold Direct Debit Instruction

---

### Topics:

- [Prerequisites](#)
- [Algorithms Used in C1-AutoPayRequest](#)
- [Auto Pay Request Status Transition without Approval](#)
- [Auto Pay Request Status Transition with Approval](#)
- [Auto Pay Request Type](#)
- [Auto Pay Request \(Used for Searching\)](#)
- [Auto Pay Request \(Used for Viewing\)](#)

In the financial services and health insurance domains, there might be scenarios wherein the customers would like to review their invoices before the charges are directly debited from their accounts. In such scenarios, there is a need to hold a direct debit (i.e. automatic payment) for a bill until the confirmation is received from the customer.

Oracle Revenue Management and Billing provides the ability to hold a direct debit (i.e. automatic payment) for a bill until the confirmation is received from the customer. A new field named **Auto Pay Review Required** is added in the **Auto Pay** tab of the **Account** screen. On completing a bill for an account, the system creates the automatic payment records in the **CI\_BILL\_ACH** table as per the auto pay instructions defined for the account. If the **Auto Pay Review Required** option is selected, the system sets the **EXTRACT\_ELIG\_SW** column corresponding to the automatic payment records in the **CI\_BILL\_ACH** table to **N**. However, if the **Auto Pay Review Required** option is not selected, the system sets the **EXTRACT\_ELIG\_SW** column corresponding to the automatic payment records in the **CI\_BILL\_ACH** table to **Y**. The **EXTRACT\_ELIG\_SW** column indicates whether the automatic payment record is eligible for the extraction. If the **EXTRACT\_ELIG\_SW** column is set to **N**, the **APAYCRET** batch does not consider the automatic payment record in the **CI\_BILL\_ACH** table for automatic payment creation.

Once the confirmation is received for one or more bills, the system enables you to create an automatic payment request for the bills. While creating an automatic payment request, you need to specify an automatic payment request type using which you want to create the automatic payment request. It is the automatic payment request type which helps the system to determine:

- The business object using which the automatic payment request should be created in the system
- Whether the approval is required for the automatic payment request

Once you specify the automatic payment request type, the system creates the automatic payment request in the **Draft** status. You can then include the bills for which invoice confirmation is received from the customers in the automatic payment request. At least one bill should be included in the automatic payment request. Before submitting an automatic payment request, you need to do the following:

- Edit the Schedule Extract Date (if required) of each bill
- Set the **Eligible for Extraction** field of each bill to **Y**

You can also delete a bill from an automatic payment request when it is in the **Draft** status. Once you edit the required details of the bills in an automatic payment request, you can submit the automatic payment request. If the approval

process is not configured in the respective automatic payment request type, the system does the following:

- Updates the **ELIG\_EXTRACT\_SW** and **APAY\_CRE\_DT** columns corresponding to the automatic payment records in the **CI\_BILL\_ACH** table
- Changes the status of the automatic payment request to **Processed**

If the approval process is configured in the respective automatic payment request type, the system changes the status of the automatic payment request to **Approval In Progress**. A To Do notification is created for the approver using the approval To Do type (specified in the respective automatic payment request type) and assigned to the users with the approval To Do role (specified in the respective automatic payment request type). Once the approver reviews an automatic payment request, the approver can approve, reject, or resubmit the automatic payment request based on the observations. If the approver approves the automatic payment request, the system does the following:

- Updates the **ELIG\_EXTRACT\_SW** and **APAY\_CRE\_DT** columns corresponding to the automatic payment records in the **CI\_BILL\_ACH** table
- Changes the status of the automatic payment request to **Processed**

If the approver rejects an automatic payment request, the status of the automatic payment request is changed to **Rejected**. However, if the approver requests the submitter to resubmit an automatic payment request, the status of the automatic payment request is changed to **Draft**. A To Do notification is created for the submitter using the submitter To Do type (specified in the respective automatic payment request type) and assigned to the users with the submitter To Do role (specified in the respective automatic payment request type). While rejecting or resubmitting an automatic payment request, the approver needs to specify the reason for rejection or resubmission.

To implement the hold direct debit feature, the following new screens are introduced in this release:

- **Auto Pay Request Type** - Enables you to create, edit, delete, and copy an automatic payment request type.
- **Auto Pay Request (Used for Searching)** - Enables you to search for an automatic payment request. It also enables you to create an automatic payment request.
- **Auto Pay Request (Used for Viewing)** - Enables you to edit, delete, submit, approve, reject, and resubmit the automatic payment request. It also enables you to add, edit, and delete bills from the automatic payment request.

In addition, the following changes are made to the system:

- **Auto Pay Review Required** - This field is added in the **Auto Pay** tab of the **Account** screen. It indicates whether you want to hold direct debit (i.e. automatic payment) for the bills of the account until the confirmation is received from the customer.
- **Eligible for Extraction** - This column is added in the **Auto Pay** tab of the **Bill** screen. It indicates whether the automatic payment record for the bill is eligible for extraction.

## Prerequisites

To setup the auto pay request feature, you need to do the following:

- Auto pay request type business object defined in the application
- Auto pay request types defined in the system.
- Approval To Do types and To Do roles defined in the application
- Submitter To Do types and To Do roles defined in the application
- Characteristic types defined in the application

## Algorithms Used in C1-AutoPayRequest

The following table lists the algorithm which is attached to the **C1-AutoPayRequest** business object:

System Event	Algorithm	Algorithm Type	Description
Information	C1-APAYRQINF	C1-APAYRQINF	Refer to <a href="#">C1-APAYRQINF</a> on page 3203

The following table lists the algorithms which are used in the lifecycle of the **C1-AutoPayRequest** business object:

Status	System Event	Algorithm	Algorithm Type	Description
Draft	Exit	F1-TODOCOMPL	F1-TODOCOMPL	Refer to <a href="#">F1-TODOCOMPL</a> on page 1580
Submitted	Enter	C1-APAYSUB	C1-APAYSUB	Refer to <a href="#">C1-APAYSUB</a> on page 3204
Approval In Progress	Enter	C1-APAYAPP	C1-APAYAPP	Refer to <a href="#">C1-APAYAPP</a> on page 3204

Processed	-	-	-	-
Rejected	-	-	-	-

### C1-APAYRQINF

The **C1-APAYRQINF** algorithm generates the auto pay request information string and is plugged in at **System Event**:

**Information** of business object: **C1-AutoPayRequest**.

It concatenates the following fields:

- Auto Pay Request Type Description
- Auto Pay Request Status Description
- Auto Pay Request ID

## F1-TODOCOMPL

This algorithm type completes the To Do entries that are linked to an object when the object exits the given status.

It finds and completes all open To Do entries where the business object's primary key is defined as a drill key. However, if the **Exclude To Do Entries From Auto Completion** characteristic is set to **Y** for the business object, the system does not automatically complete the respective To Do entry.

## C1-APAYSUB

The **C1-APAYSUB** algorithm will be plugged at the **“Enter” System event** of the business object (**C1-AutoPayRequest**) life cycle status: **SUBMITTED**.

This algorithm checks the following:

1. Whether the approval is required for the auto pay request based on the configuration in auto pay request type (**IS\_APPR\_REQ = Y**).
  - a. If the approval is required for the auto pay request, the status of the auto pay request is changed to **Approval In Progress**.
  - b. If the approval is not required for the auto pay request, the status of the auto pay request is changed to **UPDATEAPAY**.
2. At least one auto pay record is selected in the auto pay request.
3. Updated scheduled extraction date cannot be less than system date.
4. **Auto Pay Request** cannot be created for any auto pay record if the same auto pay record is selected in another request which is in the **Approval In Progress** status.

## C1-APAYAPP

The **C1-APAYAPP** algorithm creates the following:

1. A To Do using the To Do type specified in the approval profile which is attached to the **Auto Pay Request Type**. The To Do is sent to the appropriate users in the approval hierarchy depending on whether hierarchical approval is required or not.
2. A log entry is added when a To Do is created using the To Do type. It will create To Do Entry when **Auto Pay Request** enters in the **Approval in Progress** status from **Submit** status.

## C1-UPDAPAY

The **C1-UPDAPAY** algorithm will be plugged in at **“Enter” System event** of the business object (**C1-AutoPayRequest**) life cycle status: **UPDATEAPAY**.

1. The **Extract Eligible Switch** and **Auto Pay Creation Date** are updated in the **CI\_BILL\_ACH** table with the latest values present in **Auto Pay Request Details** table. The auto pay request status is then changed to **PROCESSED**.
2. If the bill which is present in the **Auto Pay Request** is cancelled then the latest details of **Extract Eligible Switch** and **Auto Pay Creation Date** are not updated in the **CI\_BILL\_ACH** table and the auto pay request status is changed to **PROCESSED**.

## C1-APAYAPRVD

The **C1-APAYAPRVD** algorithm is the **Enter** status algorithm. This algorithm is invoked when you approve an **Auto Pay Request**. It confirms whether the approval flag is true and the status of the **Auto Pay request** is **APPROVED** to transit it to the next level.

## C1-APAYRESUB

The **C1-APAYRESUB** algorithm is invoked on the **Re-Submit** button. It moves the status of the **Auto Pay Request** to **Draft**.

A To Do is generated for the user as submitter whose To Do type and To Do role are fetched from the **Auto Pay Request Type**. This algorithm creates the To Do entry when the **Auto Pay Request** enters into the **Return to Submitter** status from the **Approval In Progress** status.

## Auto Pay Request Status Transition without Approval

The following figure graphically indicates how an auto pay request moves from one status to another when the approval process is not configured in the auto pay request type:

## Auto Pay Request Status Transition with Approval

The following figure graphically indicates how an auto pay request moves from one status to another when the approval process is configured in the auto pay request type:

## Auto Pay Request Type

The **Auto Pay Request Type** screen allows you to define, edit, copy, and delete an auto pay request type. It also allows you to view the details of an auto pay request type. It contains the following zones:

- [Auto Pay Request Type List](#) on page 3206
- [Auto Pay Request Type](#) on page 3207

## Auto Pay Request Type List

The **Auto Pay Request Type List** zone lists the auto pay request types that are already defined in the system. It contains the following columns:

Column Name	Column Description
Auto Pay Request Type	Displays the auto pay request type.
Description	Displays the description of the auto pay request type.
Edit	On clicking the <b>Edit</b> (✎) icon, the <b>Auto Pay Request Type</b> screen appears where you can edit the details of the auto pay request type.
Duplicate	On clicking the <b>Duplicate</b> (📄) icon, the <b>Auto Pay Request Type</b> screen appears where you can define an auto pay request type using an existing auto pay request type.
Delete	On clicking the <b>Delete</b> (🗑) icon, you can delete the auto pay request type.  <b>Note:</b> You can delete an auto pay request type only when an auto pay request is not yet created using the auto pay request type.

On clicking the **Broadcast** (📡) icon corresponding to an auto pay request type, the **Auto Pay Request Type** zone appears with the details of the respective auto pay request type.

<b>Auto Pay Request Type</b> zone	<a href="#">Auto Pay Request Type</a> on page 3207

## Auto Pay Request Type

The **Auto Pay Request Type** zone displays the details of the auto pay request type. It contains the following sections:

- **Main** - Displays basic information about the auto pay request type. It contains the following fields:

Field Name	Field Description
Auto Pay Request Type	Displays the auto pay request type.
Description	Displays the description of the auto pay request type.
Related Transaction BO	Indicates the business object using which the auto pay transaction is performed. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.  <b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.
Detailed Description	Displays additional information about the auto pay request type.
Auto Pay Request Action	Indicates the action which is performed on the auto pay request using the auto pay request type.

Field Name	Field Description
Status	Indicates the current status of the auto pay request type. The valid values are: <ul style="list-style-type: none"> <li>Active</li> <li>Inactive</li> </ul>
Approval Required	Indicates whether approval is required for the auto pay request which is created using the auto pay request type.
Approval To Do Type	Indicates that the To Do entry of the specified To Do Type is created when you submit the auto pay request for an approval.  <b>Note:</b> It has a link. On clicking the link, the <b>To Do Type</b> screen appears where you can view the details of the respective To Do type. This field appears only when the <b>Approval Required</b> option is selected.
Approval To Do Role	Indicates that the users which belong to the specified To Do role can only approve the auto pay request when it is submitted for an approval.  <b>Note:</b> It has a link. On clicking the link, the <b>To Do Role</b> screen appears where you can view the details of the respective To Do role. This field appears only when the <b>Approval Required</b> option is selected.
Submitter To Do Type	Indicates that the To Do entry of the specified To Do task is created when an auto pay request is resubmitted by an approver.  <b>Note:</b> It has a link. On clicking the link, the <b>To Do Type</b> screen appears where you can view the details of the respective To Do type.
Submitter To Do Role	Indicates that the approvers which belong to the specified To Do role can only resubmit the auto pay request.  <b>Note:</b> It has a link. On clicking the link, the <b>To Do Role</b> screen appears where you can view the details of the respective To Do role.

- **Characteristic** - Lists the characteristics defined for the auto pay request type. It contains the following columns:

Column Name	Column Description
Characteristic Type	Indicates the characteristic type.
Characteristic Value	Displays the value of the characteristic type.

- **Record Actions** - The **Record Actions** section contains the following buttons:

Button Name	Button Description
Edit	Used to edit the details of the auto pay request type.

Button Name	Button Description
Delete	Used to delete the auto pay request type.
	<b>Note:</b> You can delete an auto pay request type only when an auto pay request is not yet created using the auto pay request type.
Duplicate	Used to create a new auto pay request type using an existing auto pay request type.

- **Record Information** - The **Record Information** section contains the following fields:

Field Name	Field Description
Business Object	Indicates the business object using which the auto pay request type is created in the system. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.
	<b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.

By default, the **Auto Pay Request Type** zone does not appear in the **Auto Pay Request Type** screen. It appears only when you click the **Broadcast** (📡) icon corresponding to an auto pay request type in the **Auto Pay Request Type List** zone.

## Defining an Auto Pay Request Type

### Prerequisites

To define an auto pay request type, you should have:

- Auto pay request type business objects defined in the application
- Approval To Do Types and To Do roles defined in the application
- Submitter To Do Types and To Do roles defined in the application

### Procedure

To define an auto pay request type:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **A** and then click **Auto Pay Request Type**.

A sub-menu appears.

- Click the **Add** option from the **Auto Pay Request Type** sub-menu.

**Tip:** Alternatively, you can access the **Auto Pay Request Type** screen by clicking the **Add** button in the **Page Title** area of the **Auto Pay Request Type** screen.

**Note:** The **Select Business Object** screen appears when there are multiple auto pay request type business objects defined in the application. If there is only one auto pay request type business object defined in the application, the **Auto Pay Request Type** screen appears.

- Select the required auto pay request type business object from the respective field.
- Click **OK**.

The **Auto Pay Request Type** screen appears. It contains the following sections:

- Main** - Used to specify basic details about the auto pay request type.
- Characteristics** - Used to define the characteristics for the auto pay request type.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Auto Pay Request Type	Used to specify the auto pay request type.	Yes
Business Object	Indicates the business object using which the auto pay request type is defined in the system.	Not applicable
Description	Used to specify the description for the auto pay request type.	Yes
Related Transaction BO	Used to indicate the business object using which the auto pay transaction is performed. The valid value is: <ul style="list-style-type: none"> <li>Auto Pay Request</li> </ul>	Yes
Detailed Description	Used to specify additional information about the auto pay request type.	No
Auto Pay Request Action	Indicates the action which is performed on the auto pay request using the auto pay request type. The valid value is: <ul style="list-style-type: none"> <li>Update</li> </ul>	Not applicable
	<b>Note:</b> By default, the <b>Update</b> option is selected and cannot be edited.	
Status	Used to indicate the current status of the auto pay request type. The valid values are: <ul style="list-style-type: none"> <li>Active</li> <li>Inactive</li> </ul>	Yes
	<b>Note:</b> You cannot change the status of an auto pay request type to <b>Inactive</b> when an auto pay request created using the auto pay request type is in the <b>Draft</b> or <b>Rejected</b> status.	

Field Name	Field Description	Mandatory (Yes or No)
Approval Required	Used to indicate whether approval is required for the auto pay request which is created using the auto pay request type.	No
Approval To Do Type	<p>Used to specify the To Do entry of the specified To Do Type that is created when you submit the auto pay request for an approval.</p> <p><b>Note:</b></p> <p>The <b>Search</b> (🔍) icon appears corresponding to the <b>Approval To Do Type</b> field. On clicking the <b>Search</b> icon, the <b>To Do Type Search</b> window appears.</p> <p>On specifying the To Do type, the description of the To Do type appears corresponding to the <b>Approval To Do Type</b> field.</p> <p>This field appears only when the <b>Approval Required</b> check box is selected.</p>	<p>Yes (Conditional)</p> <p><b>Note:</b> This field is required while approving an auto pay request which is created using the auto pay request type.</p>
Approval To Do Role	<p>Used to indicate the users which belong to the specified To Do role who can approve the auto pay request when it is submitted for an approval.</p> <p><b>Note:</b></p> <p>The list includes only those To Do roles which are associated with the specified <b>Approval To Do Type</b>.</p> <p>This field appears only when the <b>Approval Required</b> check box is selected.</p>	<p>Yes (Conditional)</p> <p><b>Note:</b> This field is required while approving an auto pay request which is created using the auto pay request type.</p>
Submitter To Do Type	<p>Used to indicate the To Do entry of the specified To Do Type that is created when an auto pay request is resubmitted by an approver.</p> <p><b>Note:</b></p> <p>The <b>Search</b> (🔍) icon appears corresponding to the <b>Submitter To Do Type</b> field. On clicking the <b>Search</b> icon, the <b>To Do Type Search</b> window appears.</p> <p>On specifying the To Do type, the description of the To Do type appears corresponding to the <b>Submitter To Do Type</b> field.</p> <p>This field appears only when the <b>Approval Required</b> check box is selected.</p>	<p>Yes (Conditional)</p> <p><b>Note:</b> This field is required while resubmitting an auto pay request which is created using the auto pay request type.</p>

Field Name	Field Description	Mandatory (Yes or No)
Submitter To Do Role	Used to indicate the users which belong to the specified To Do role who can resubmit the auto pay request when it is submitted for an approval.	Yes (Conditional)
	<p><b>Note:</b></p> <p>The list includes only those To Do roles which are associated with the specified <b>Submitter To Do Type</b>.</p> <p>This field appears only when the <b>Approval Required</b> check box is selected.</p>	<p><b>Note:</b> This field is required while resubmitting an auto pay request which is created using the auto pay request type.</p>

- Enter the required details in the **Main** section.
- Define a list of characteristics for the auto pay request type, if required.
- Click **Save**.

The auto pay request type is defined.

## Defining a Characteristic for an Auto Pay Request Type

### Prerequisites

To define a characteristic for an auto pay request type, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to **Auto Pay Request Type**)

### Procedure

To define a characteristic for an auto pay request type:

- Ensure that the **Characteristics** section is expanded when you are defining, editing, or copying an auto pay request type.

The **Characteristics** section contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Characteristic Type	Used to indicate the characteristic type.	Yes (Conditional)
	<p><b>Note:</b> The list includes only those characteristic types where the characteristic entity is set to <b>Auto Pay Request Type</b>.</p>	<p><b>Note:</b> This field is required while defining a characteristic for the auto pay request type.</p>

Field Name	Field Description	Mandatory (Yes or No)
Characteristic Value	Used to specify the value for the characteristic type.	Yes (Conditional)
	<p><b>Note:</b></p> <p>If you select a predefined characteristic type, the <b>Search</b> (🔍) icon appears corresponding to the <b>Characteristic Value</b> field. On clicking the <b>Search</b> icon, you can search for the respective characteristic value.</p> <p>On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the <b>Characteristic Value</b> field.</p>	<p><b>Note:</b> This field is required while defining a characteristic for the auto pay request type.</p>

- Enter the required details in the **Characteristics** section.
- If you want to define more than one characteristic for the auto pay request type, click the **Add** (+) icon and then repeat step 2.

**Note:** However, if you want to remove a characteristic from the auto pay request type, click the **Delete** (🗑️) icon corresponding to the characteristic.

## Editing an Auto Pay Request Type

### Prerequisites

To edit an auto pay request type, you should have:

- Auto pay request type that you want to edit defined in the application

### Procedure

To edit an auto pay request type:

- Click the **Admin** link in the **Application** toolbar.  
A list appears.
- From the **Admin** menu, select **A** and then click **Auto Pay Request Type**.  
A sub-menu appears.
- Click the **Search** option from the **Auto Pay Request Type** sub-menu.  
The **Auto Pay Request Type** screen appears.
- In the **Auto Pay Request Type List** zone, click the **Edit** (✎) icon in the **Edit** column corresponding to the auto pay request type whose details you want to edit.

The **Auto Pay Request Type** screen appears. It contains the following sections:

- **Main** - Used to specify basic details about the auto pay request type.
- **Characteristics** - Used to define the characteristics for the auto pay request type.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Auto Pay Request Type	Displays the auto pay request type.	Not applicable
Business Object	Indicates the business object using which the auto pay request type is defined in the system.	Not applicable
Description	Used to specify the description for the auto pay request type.	Yes
Related Transaction BO	Used to indicate the business object using which the auto pay transaction is performed.	Yes
Detailed Description	Used to specify additional information about the auto pay request type.	No
Auto Pay Request Action	Displays the action which is performed on the auto pay request using the auto pay request type.	Not applicable
Status	Used to indicate the status of the auto pay request type. The valid values are: <ul style="list-style-type: none"> <li>• Active</li> <li>• Inactive</li> </ul>	Yes
Approval Required	Used to indicate whether approval is required for the auto pay request which is created using the auto pay request type.	No
Approval To Do Type	Used to indicate the To Do task which is performed by the approver while approving the auto pay request. <p><b>Note:</b></p> <p>The <b>Search</b> (🔍) icon appears corresponding to the <b>Approval To Do Type</b> field. On clicking the <b>Search</b> (🔍) icon, the <b>To Do Type Search</b> window appears.</p> <p>On specifying the To Do type, the description of the To Do type appears corresponding to the <b>Approval To Do Type</b> field.</p> <p>This field appears when the <b>Approval Required</b> option is selected.</p>	Yes

Field Name	Field Description	Mandatory (Yes or No)
Approval To Do Role	Used to indicate the users with the specified To Do role who can approve the auto pay request.	Yes
	<p><b>Note:</b></p> <p>The list includes only those To Do roles which are associated with the approval To Do type.</p> <p>This field appears when the <b>Approval Required</b> option is selected.</p>	
Submitter To Do Type	Used to indicate the To Do task created when an auto pay request is submitted by an approver.	Yes
	<p><b>Note:</b></p> <p>The <b>Search</b> (🔍) icon appears corresponding to the <b>Submitter To Do Type</b> field. On clicking the <b>Search</b> icon, the <b>To Do Type Search</b> window appears.</p> <p>On specifying the To Do type, the description of the To Do type appears corresponding to the <b>Submitter To Do Type</b> field.</p>	
Submitter To Do Role	Used to indicate the users with the specified To Do role who can submit the auto pay request for approval.	Yes
	<p><b>Note:</b> The list includes only those To Do roles which are associated with the submitter To Do type.</p>	

**Tip:** Alternatively, you can access this screen by clicking the **Edit** button in the **Auto Pay Request Type** zone.

5. Modify the required details in the **Main** section.
6. Define, edit, or remove characteristics of the auto pay request type, if required.
7. Click **Save**.

The changes made to the auto pay request type are saved.

## Copying an Auto Pay Request Type

Instead of creating an auto pay request type from scratch, you can create a new auto pay request type using an existing auto pay request type. This is possible through copying an auto pay request type. On copying an auto pay request type, the details including the characteristics are copied to the new auto pay request type. You can then edit the details, if required.

### **Prerequisites**

To copy an auto pay request type, you should have:

- Auto pay request type (whose copy you want to create) defined in the application
- Auto pay request business objects defined in the application

### **Procedure**

To copy an auto pay request type:

1. Click the **Admin** link in the **Application** toolbar.

A list appears.

2. From the **Admin** menu, select **A** and then click **Auto Pay Request Type**.

A sub-menu appears.

3. Click the **Search** option from the **Auto Pay Request Type** sub-menu.

The **Auto Pay Request Type** screen appears.

4. In the **Auto Pay Request Type List** zone, click the **Duplicate**  icon in the **Duplicate** column corresponding to the auto pay request type whose copy you want to create.

The **Auto Pay Request Type** screen appears. It contains the following sections:

- **Main** - Used to specify basic details about the auto pay request type.
- **Characteristics** - Used to define the characteristics for the auto pay request type.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Auto Pay Request Type	Used to specify the auto pay request type.	Yes
Business Object	Indicates the business object using which the auto pay request type is defined in the system.	Not applicable
Description	Used to specify the description for the auto pay request type.	Yes
Related Transaction BO	Used to indicate the business object using which the auto pay transaction is performed.	Yes
Detailed Description	Used to specify additional information about the auto pay request type.	No
Status	Used to indicate the status of the auto pay request type. The valid values are: <ul style="list-style-type: none"> <li>• Active</li> <li>• Inactive</li> </ul>	Yes

Field Name	Field Description	Mandatory (Yes or No)
Approval Required	Used to indicate whether approval is required for the auto pay request which is created using the auto pay request type.	No
Approval To Do Type	<p>Used to indicate the To Do task which is performed by the approver while approving the auto pay request.</p> <p><b>Note:</b></p> <p>The <b>Search</b> (🔍) icon appears corresponding to the <b>Approval To Do Type</b> field. On clicking the <b>Search</b> icon, the <b>To Do Type Search</b> window appears.</p> <p>On specifying the To Do type, the description of the To Do type appears corresponding to the <b>Approval To Do Type</b> field.</p> <p>This field appears when the <b>Approval Required</b> option is selected.</p>	Yes
Approval To Do Role	<p>Used to indicate the users with the specified To Do role who can approve the auto pay request.</p> <p><b>Note:</b></p> <p>The list includes only those To Do roles which are associated with the approval To Do type.</p> <p>This field appears when the <b>Approval Required</b> option is selected.</p>	Yes
Submitter To Do Type	<p>Used to indicate the To Do task created when an auto pay request is submitted by an approver.</p> <p><b>Note:</b></p> <p>The <b>Search</b> (🔍) icon appears corresponding to the <b>Submitter To Do Type</b> field. On clicking the <b>Search</b> icon, the <b>To Do Type Search</b> window appears.</p> <p>On specifying the To Do type, the description of the To Do type appears corresponding to the <b>Submitter To Do Type</b> field.</p>	Yes

Field Name	Field Description	Mandatory (Yes or No)
Submitter To Do Role	Used to indicate the users with the specified To Do role who can submit the auto pay request for approval.	Yes
	<b>Note:</b> The list includes only those To Do roles which are associated with the submitter To Do type.	

**Tip:** Alternatively, you can copy an auto pay request type by clicking the **Duplicate** button in the **Auto Pay Request Type** zone.

- Enter the required details in the **Main** section.
- Define, edit, or remove characteristics of the auto pay request type, if required.
- Click **Save**.

The new auto pay request type is defined.

## Deleting an Auto Pay Request Type

### **Procedure**

To delete an auto pay request type:

- Click the **Admin** link in the **Application** toolbar.  
A list appears.
- From the **Admin** menu, select **A** and then click **Auto Pay Request Type**.  
A sub-menu appears.
- Click the **Search** option from the **Auto Pay Request Type** sub-menu.  
The **Auto Pay Request Type** screen appears.
- In the **Auto Pay Request Type List** zone, click the **Delete** (🗑️) icon in the **Delete** column corresponding to the auto pay request type that you want to delete.  
A message appears confirming whether you want to delete the auto pay request type.

**Tip:** Alternatively, you can delete an auto pay request type by clicking the **Delete** button in the **Auto Pay Request Type** zone.

- Click **OK**.

The auto pay request type is deleted.

## Auto Pay Request (Used for Searching)

The **Auto Pay Request** screen allows you to search for an auto pay request using various search criteria. It contains the following zone:

- [Search Auto Pay Request](#) on page 3219

Through this screen, you can navigate to the following screen:

- [Auto Pay Request \(Used for Viewing\)](#) on page 3225

## Search Auto Pay Request

The **Search Auto Pay Request** zone allows you to search for an auto pay request using various search criteria. It contains the following two sections:

- **Search Criteria** - The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Search By	Used to indicate whether you want to search for an auto pay request using the auto pay request or person, account or bill details. The valid values are: <ul style="list-style-type: none"> <li>Request Details</li> <li>Person, Account or Bill Details</li> </ul>	Yes
	<b>Note:</b> By default, the <b>Request Details</b> option is selected.	
Auto Pay Request Type	Used to search auto pay requests which are created using a particular auto pay request type.	No
	<b>Note:</b> This field appears when the <b>Request Details</b> option is selected from the <b>Search By</b> list.	
Status	Used to search auto pay requests with a particular status. The valid values are: <ul style="list-style-type: none"> <li>Approved</li> <li>Approval in Progress</li> <li>Draft</li> <li>Processed</li> <li>Rejected</li> <li>Update Auto Pay Record</li> </ul>	Yes
	<b>Note:</b> This field appears when the <b>Request Details</b> option is selected from the <b>Search By</b> list.	
Created From	Used to search auto pay requests which are created from a particular date onwards.	No
	<b>Note:</b> This field appears when the <b>Request Details</b> option is selected from the <b>Search By</b> list.	
User ID	Used to search auto pay requests which are created by a particular user.	No
	<b>Note:</b> This field appears when the <b>Request Details</b> option is selected from the <b>Search By</b> list.	

Field Name	Field Description	Mandatory (Yes or No)
Created Until	Used to search auto pay requests which are created till a particular date.	No
	<b>Note:</b> This field appears when the <b>Request Details</b> option is selected from the <b>Search By</b> list.	
Auto Pay Request ID	Used to search a particular auto pay request.	No
	<b>Note:</b> This field appears when the <b>Request Details</b> option is selected from the <b>Search By</b> list.	
Person ID	Used to search auto pay requests which include bills of a particular person.	No
	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to the <b>Person ID</b> field. On clicking the <b>Search</b> icon, the <b>Person Search</b> window appears. This field appears when the <b>Person, Account or Bill Details</b> option is selected from the <b>Search By</b> list.	
Account ID	Used to search auto pay requests which include bills of a particular account.	No
	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to the <b>Account ID</b> field. On clicking the <b>Search</b> icon, the <b>Account Search</b> window appears. This field appears when the <b>Person, Account or Bill Details</b> option is selected from the <b>Search By</b> list.	
Bill ID	Used to search auto pay requests which include a particular bill.	No
	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to the <b>Bill ID</b> field. On clicking the <b>Search</b> icon, the <b>Bill Search</b> window appears. This field appears when the <b>Person, Account or Bill Details</b> option is selected from the <b>Search By</b> list.	

Field Name	Field Description	Mandatory (Yes or No)
From Bill Date	Used to search auto pay requests which include bills created from a particular date onwards.	No
	<b>Note:</b> This field appears when the <b>Person, Account or Bill Details</b> option is selected from the <b>Search By</b> list.	
Auto Pay ID	Used to search auto pay requests which include bills of a particular auto pay ID.	No
	<b>Note:</b> This field appears when the <b>Person, Account or Bill Details</b> option is selected from the <b>Search By</b> list.	
To Bill Date	Used to search auto pay requests which include bills created till a particular date.	No
	<b>Note:</b> This field appears when the <b>Person, Account or Bill Details</b> option is selected from the <b>Search By</b> list.	

**Note:** You must specify at least one search criterion while searching for an auto pay request.

- **Search Results** - On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Creation Date Time	Displays the date and time when the auto pay request is created.
Auto Pay Request Information	Displays the concatenated string of information about the auto pay request.
	<b>Note:</b> It has a link. On clicking the link, the <b>Auto Pay Request</b> screen appears where you can view the details of the respective auto pay request.
Status	Indicates the status of the auto pay request. The valid values are: <ul style="list-style-type: none"> <li>• Approved</li> <li>• Approval in Progress</li> <li>• Draft</li> <li>• Processed</li> <li>• Rejected</li> <li>• Update Auto Pay Record</li> </ul>
Auto Pay Request Type	Indicates the type of the auto pay request.
Created By	Indicates the concatenated string of the user information who has created the auto pay request.

**Note:** Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

## Searching for an Auto Pay Request

### Prerequisites

To search for an auto pay request, you should have:

- Auto pay request types defined in the application

### Procedure

To search for an auto pay request:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Main** menu, select **Accounting and Receivable** and then click **Auto Pay Request**.  
A sub-menu appears.
3. Click the **Search** option from the **Auto Pay Request** sub-menu.  
The **Auto Pay Request** screen appears.
4. Enter the search criteria in the **Search Auto Pay Request** zone.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

5. Click **Search**.

A list of auto pay requests that meet the search criteria appears in the **Search Results** section.

## Creating an Auto Pay Request

### Prerequisites

To create an auto pay request, you should have:

- Auto pay request types defined in the application

### Procedure

To create an auto pay request:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.

- From the **Main** menu, select **Accounting and Receivable** and then click **Auto Pay Request**.

A sub-menu appears.

- Click the **Add** option from the **Auto Pay Request** sub-menu.

The **Add Auto Pay Request** screen appears. It contains the following field:

Field Name	Field Description	Mandatory (Yes or No)
Auto Pay Request Type	Used to indicate the auto pay request type using which you want to create the auto pay request for the bills.	Yes

**Tip:** Alternatively, you can access this screen by clicking the **Add** button in the **Page Title** area of the **Auto Pay Request** screen.

- Select the required auto pay request type from the **Add Auto Pay Request** screen.
- Click **OK**.

The **Auto Pay Request** screen appears with the auto pay request details in the **Draft** status.

- Add the auto pay line items of the bills by searching for the bills in the **Search Bills** zone of the **Auto Pay Request - Bills** tab.
- Define characteristics for the auto pay request by editing the auto pay request, if required.
- Add logs for the auto pay request in the **Auto Pay Request Log** zone of the **Auto Pay Request - Log** tab, if required.

## Defining a Characteristic for an Auto Pay Request

### Prerequisites

To define a characteristic for an auto pay request, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to **Auto Pay Request**)

### Procedure

To define a characteristic for an auto pay request:

1. Click **Edit** button, on the **Auto Pay Request** zone in the Main tab of the **Auto Pay Request** screen.

The **Characteristics** section contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Effective Date	Used to specify the date from when the characteristic is effective for the auto pay request.	Yes (Conditional)
		<b>Note:</b> This field is required while defining a characteristic for the auto pay request.
Characteristic Type	Used to indicate the characteristic type.	Yes (Conditional)
		<b>Note:</b> The list includes only those characteristic types where the characteristic entity is set to <b>Auto Pay Request</b> . <b>Note:</b> This field is required while defining a characteristic for the auto pay request.
Characteristic Value	Used to specify the value for the characteristic type.	Yes (Conditional)
		<b>Note:</b> This field is required while defining a characteristic for the auto pay request. <b>Note:</b> If you select a predefined characteristic type, the <b>Search</b> (🔍) icon appears corresponding to the <b>Characteristic Value</b> field. On clicking the <b>Search</b> icon, the <b>Predefined Characteristic Search</b> window appears. On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the <b>Characteristic Value</b> field.

2. Enter the required details in the **Characteristics** section.
3. If you want to define more than one characteristic for the auto pay request, click the **Add (+)** icon and then repeat step 2.

**Note:** However, if you want to remove a characteristic from the auto pay request, click the **Delete (🗑)** icon corresponding to the characteristic.

4. Click **Save**.

The characteristics are defined for the auto pay request.

# Chapter 47

---

## Garbling Customer Information

---

Oracle Revenue Management and Billing enables you to garble the personal information of a customer, such as the customer name, address, email ID, social security number or any other identifier, birth date, gender, and so on. On receiving the data erasure request from a customer, the data controller will garble the personal information of the customer by masking the data with random characters and then cease the access to the customer records.

To garble the information of one or more persons, you need to do the following:

1. Define the **Garble Data (C1-GRBL)** characteristic for each person whose data needs to be garbled and set its value to **Y**.
2. Execute the **Garble Person Information (C1-GRBPI)** batch. For more information about this batch, see *Oracle Revenue Management and Billing Batch Guide*.

On executing the **Garble Person Information (C1-GRBPI)** batch, the system identifies the persons where the **Garble Data (C1-GRBL)** characteristic is set to **Y** and the **Garbling Completed (C1-GBCM)** characteristic is either not defined or set to **N**. Note that the system considers the **Garble Data (C1-GRBL)** characteristic value which is effective on the batch business date.

Once the persons are identified, the data in the following fields is masked with random characters across all records in the system:

- ACCOUNT\_NBR
- ACCT\_NBR
- ADDRESS1
- ADDRESS1\_UPR
- ADDRESS2
- ADDRESS3
- ADDRESS4
- BIRTH\_DT
- BROKER\_NAME
- CITY
- COUNTRY
- COUNTY
- CUSTOMER\_NAME
- EMAILID

- ENTITY\_NAME
- ENTITY\_NAME1
- ENTITY\_NAME2
- ENTITY\_NAME3
- GEO\_CODE
- HOUSE\_TYPE
- IN\_CITY\_LIMIT
- NAME1
- OVRD\_MAIL\_NAME1
- OVRD\_MAIL\_NAME2
- OVRD\_MAIL\_NAME3
- PER\_ID\_NBR
- PHONE
- POSTAL
- POSTAL\_UPR
- STATE

In other words, the personal and account related information of a customer is garbled across the system. In addition, this batch allows you to garble the required characteristics and identifiers of a person and account.

**Note:** An account may have one or more persons linked to it. The information of an account is garbled when the data erasure request is received for the main customer of the account.

Once the personal and account related information of a customer is garbled, the access group of the person is changed to **C1GB** (which does not have any data access role). This ensures that the data of the person and his or her accounts cannot be accessed from any screens in the system. If an approval transaction contains personal and account related information of a customer, you cannot even view the approval transaction in the system.

**Note:** The access is forbidden for performing any transaction for the person and account only from the user interface and web services and not through the background process.

You can also garble the data of a person using the **C1-GRBPI** inbound web service. However, you can garble the data of only one person at a time using this inbound web service.

# Chapter 48

---

## Deleting Inactive Customer or Closed Account Information

---

Oracle Revenue Management and Billing enables you to delete all records of a person or account from the system. A new batch named **C1-GDPR** is introduced in this release. It enables you to delete all records of a person or account from the system. You can either delete the records of a particular person or account using its ID or delete the records of a set of persons or accounts at once using its characteristic. A new characteristic type named **C1-GDPRE** is shipped with the product. While executing the batch, the system first checks whether the person or account ID is specified in the batch. If so, the batch deletes the records of the respective person or account from the system. You cannot specify both the person and account ID at the same time while executing the batch.

If the person or account ID is not specified while executing the batch, the system checks whether the **Delete Characteristic Type** parameter is defined in the **C1-GDPR** batch. You can define the **C1-GDPRE** characteristic for the persons or accounts whose records you want to delete from the system. If you set the **Delete Characteristic Type** parameter in the **C1-GDPR** batch to **C1-GDPRE**, the batch considers those person or accounts for deletion where the **C1-GDPRE** characteristic is set to **Y**.

The system deletes all records of a particular account only when the following conditions are met:

- Account's closing date is earlier than or equal to system date
- All contracts of the account should either be in the **Closed** or **Canceled** status

The system deletes all records of a particular person only when the following conditions are met:

- The closing date of all its accounts is earlier than or equal to system date
- All contracts of all its accounts should either be in the **Closed** or **Canceled** status

The **C1-GDPR** batch contains the following parameters:

- **Account ID** – Used to indicate the account whose records you want to delete from the system.
- **Person ID** – Used to indicate the person whose records you want to delete from the system.
- **Delete Characteristic Type** – Used to specify the characteristic type. Here, you must specify the **C1-GDPRE** characteristic type. The system then considers those person or accounts for deletion where the **C1-GDPRE** characteristic is set to **Y**.

- **Clear CLOB Data** – Used to indicate whether you want to delete the references of the persons or accounts considered for deletion from the CLOB data. The valid values are **Y** and **N**. Note that if you set the value for this parameter to **Y**, the performance of the batch would be impacted when there is voluminous data.
- **Thread Pool Name** – Used to specify the thread pool on which you want to execute the batch.

The **C1-GDPR** batch is a multi-threaded batch. The multi-threading is based on the person or account ID and chunks for multi-threading are created based on numerical distribution of person or account ID.

- [C1-PRDPSPR](#)
- [C1-PRDCT-VAL](#)
- [C1-PRD-TRN](#)
- [C1-MPINFO](#)
- [C1-MP-VAL](#)
- [F1-AT-RQJ](#)
- [C1-OFFRINFO](#)
- [C1-OFFER-VAL](#)
- [C1-BNDLINFO](#)
- [C1-BUNDL-VAL](#)
- [Product \(Used for Searching\)](#)
- [Product \(Used for Adding\)](#)
- [Market Product \(Used for Searching\)](#)

Oracle Revenue Management and Billing facilitates you to maintain and bill a variety of products and services for the retail banking domain. You can define the following types of products in the system:

- Product
- Product Group

As the name indicates, a product group is a group of products. A product group are maintained in the system mainly for the reporting purposes. You can define a product and product group which may belong to different product categories, such as Checking, Loans, Savings, etc. A product or product group must be associated with at least one division. You can associate a product or product group with more than one division.

The system enables you to add one or more product services in a product. A product service may include one or more services which are defined as price items in the system. You can define, edit, delete, and copy a product service using an existing screen named **Product Service**. You can add multiple product services in a product. The system enables you to indicate whether the product service is a mandatory or optional service offered with the product. A product must have at least one mandatory product service.

A product consists of one or more market products. For example, the Loan product can include different market products, such as Personal Loan, Auto Loan, Home Equity Loan, Education Loan, etc. An account can enroll for a market product. While creating a market product for a product, the system inherits the list of divisions and product services from the product. You can associate a market product with only those divisions to which the product belongs. By default, the market product includes the mandatory services of the product. You may or may not include the optional services of the product in the market product. You can define eligibility rules for a market product. The system executes the eligibility rule which is effective while enrolling an account for a market product. If the eligibility rule is met, the system enrolls the account for the market product. However, if the eligibility rule is not met, the system does not enroll the account for the market product. A market product must be associated with at least one price list. You can associate multiple price lists with a market product.

The system enables you to define an offer which can be included in more than one market product. For example, the Car Loan and Two-Wheeler Loan market products may provide same offers, such as No Processing Cost, No Collateral, etc. An account can enroll for an offer. While creating an offer, the system inherits the list of divisions and product services from all market products in which it is included. By default, the offer includes the mandatory services of the product. You may or may not include the optional services of the market product in the offer. You can define eligibility rules for an offer.

- [Market Product \(Used for Adding\)](#)
- [Offer \(Used for Searching\)](#)
- [Offer \(Used for Adding\)](#)
- [Bundle \(Used for Searching\)](#)
- [Bundle \(Used for Adding\)](#)

The system executes the eligibility rule which is effective while enrolling an account for an offer. If the eligibility rule is met, the system enrolls the account for the offer. However, if the eligibility rule is not met, the system does not enroll the account for the offer. An offer must be associated with at least one price list. You can associate multiple price lists with an offer.

The system enables you to define a bundle which can be included in more than one market product. For example, you can define a bundle of services, such as Car Loan, Loan Insurance, etc. in the Car Loan market product. An account can enroll for a bundle. While creating a bundle, the system derives the divisions which are common in all market products in which it is included. It also inherits the list of product services from all market products. By default, the bundle includes the mandatory services of the product. You may or may not include the optional services of the market product in the bundle. Here, you can include additional services which are not included in the product or market product. You can define eligibility rules for a bundle. The system executes the eligibility rule which is effective while enrolling an account for a bundle. If the eligibility rule is met, the system enrolls the account for the bundle. However, if the eligibility rule is not met, the system does not enroll the account for the bundle. A bundle must be associated with at least one price list. You can associate multiple price lists with a bundle.

A product, market product, offer, and bundle goes through a lifecycle in the system. On creating a product, market product, offer, and bundle, their status is set to **Draft**. On submitting a product, market product, offer, and bundle, their status is set to **Active**. A new batch named **C1-PDTRN** is introduced in this release. It transitions the status of a product, market product, offer, and bundle to **Retired** when its end date is earlier than the batch business date.

To implement this new feature, the following new screens are introduced in this release:

- Product
- Product Information
- Market Product
- Market Product Information
- Offer
- Offer Information
- Bundle
- Bundle Information

You can access these screens from the **Retail Banking** menu.

## Prerequisites

To setup the retail banking feature, you need to do the following:

- Product Categories and Product Types define in the application.
- Define the Terms and Conditions in the application.
- Product Manager's To Do Roles define in the application.
- Divisions associated with the access group to which the user belongs.
- Characteristics Types defined in the application (where the characteristic entity is set to the product, market product, offer or bundle).
- Parent Groups define in the application.
- Product Services define in the application.
- Parameters and Parameter Value Types (based on which you want to define eligibility criteria of the market product) define in the application.
- Price Lists define in the application.

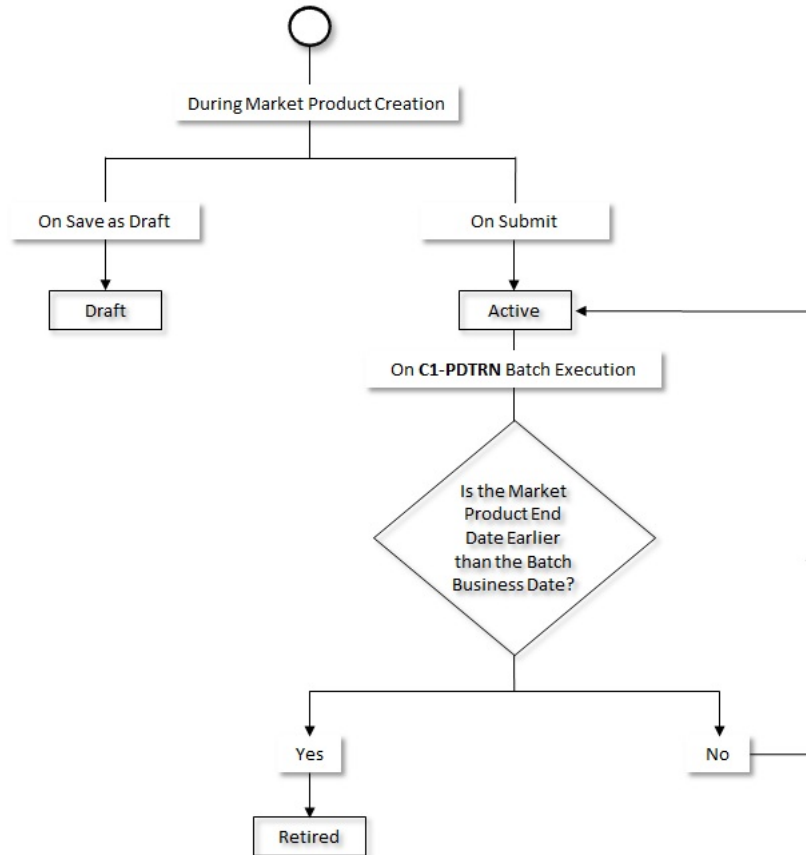

## Product Status Transition

The following figure graphically indicates how the product moves from one status to another when the approval process is configured in the product:

## Market Product Status Transition

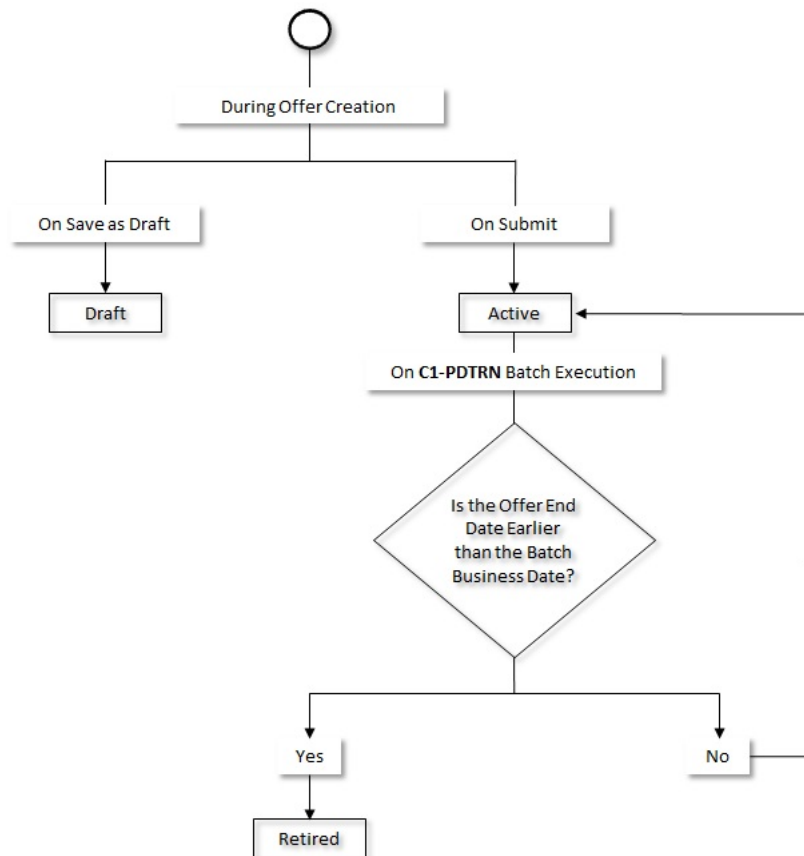

The following figure graphically indicates how the market product moves from one status to another when the approval process is configured in the market product:

## Offer Status Transition

The following figure graphically indicates how the offer moves from one status to another when the approval process is configured in the offer:

## Bundle Status Transition

---

The following figure graphically indicates how the bundle moves from one status to another when the approval process is configured in the bundle:

## Algorithms Used in C1\_PRODUCT

The following table lists the algorithms which are attached to the **C1\_PRODUCT** business object:

System Event	Algorithm	Algorithm Type	Description
Audit	C1-APPTXNBAS	C1-APPTXNBAS	Refer to <a href="#">C1-APPTXNBAS</a> on page 3252
Information	C1-PRDINFO	C1-PRDINFO	Refer to <a href="#">C1-PRDINFO</a> on page 3252
Post-Processing	C1-PRDPSPR	C1-PRDPSPR	Refer to <a href="#">C1-PRDPSPR</a> on page 3253

System Event	Algorithm	Algorithm Type	Description
Validation	C1-PRDCT-VAL	C1-PRDCT-VAL	Refer to <a href="#">C1-PRDCT-VAL</a> on page 3253

The following table lists the algorithms which are used in the lifecycle of the **C1\_PRODUCT** business object:

Status	System Event	Algorithm	Algorithm Type	Description
Draft	-	-	-	-
Active	Monitor	C1-PRD-TRN	C1-PRD-TRN	<a href="#">C1-PRD-TRN</a> on page 3253
Retired	-	-	-	-

## Algorithms Used in C1\_MARKET\_PRODUCT

The following table lists the algorithms which are attached to the **C1\_MARKET\_PRODUCT** business object:

System Event	Algorithm	Algorithm Type	Description
Information	C1-MPINFO	C1-PDINFO	Refer to <a href="#">C1-MPINFO</a> on page 3253
Validation	C1-MP-VAL	C1-MP-VAL	Refer to <a href="#">C1-MP-VAL</a> on page 3253

The following table lists the algorithms which are used in the lifecycle of the **C1\_MARKET\_PRODUCT** business object:

Status	System Event	Algorithm	Algorithm Type	Description
Draft	-	-	-	-
Active	Monitor	F1-AT-RQJ	F1-AT-RQJ	Refer to <a href="#">F1-AT-RQJ</a> on page 3253
Retired	-	-	-	-

## Algorithms Used in C1\_OFFER

The following table lists the algorithm which is attached to the **C1\_OFFER** business object:

System Event	Algorithm	Algorithm Type	Description
Information	C1-OFFRINFO	C1-PDINFO	Refer to <a href="#">C1-OFFRINFO</a> on page 3254
Validation	C1-OFFER-VAL	C1-OFFER-VAL	Refer to <a href="#">C1-OFFER-VAL</a> on page 3254

The following table lists the algorithms which are used in the lifecycle of the **C1\_OFFER** business object:

Status	System Event	Algorithm	Algorithm Type	Description
Draft	-	-	-	-
Active	Monitor	F1-AT-RQJ	F1-GEN-BOMNJ	Refer to <a href="#">F1-AT-RQJ</a> on page 3253
Retired	-	-	-	-

## Algorithms Used in C1\_BUNDLE

The following table lists the algorithms which are attached to the **C1\_BUNDLE** business object:

System Event	Algorithm	Algorithm Type	Description
Information	C1-BNDLINFO	C1-PDINFO	Refer to <a href="#">C1-BNDLINFO</a> on page 3254
Validation	C1-BUNDL-VAL	C1-BUNDL-VAL	Refer to <a href="#">C1-BUNDL-VAL</a> on page 3254

The following table lists the algorithms which are used in the lifecycle of the **C1\_BUNDLE** business object:

Status	System Event	Algorithm	Algorithm Type	Description
Draft	-	-	-	-
Active	Monitor	F1-AT-RQJ	F1-GEN-BOMNJ	Refer to <a href="#">F1-AT-RQJ</a> on page 3253
Retired	-	-	-	-

## C1-APPTXNBAS

The **C1-APPTXNBAS** is the standard audit algorithm used by approval workflow responsible for creating approval transactions. This algorithm is to be specified on the business object audit algorithm spot, for the business objects that are part of approval workflow groups.

**Parameters: Approval Request Generation (Y/N)** - Used to indicate whether the approval workflow request must be created when no changes are made while editing the object. If you set the value to **N**, the approval workflow request is not created when no changes are made while editing the object. However, if you leave this field blank or set the value to **Y**, the approval workflow request is created irrespective of whether any changes are made or not in the object.

## C1-PRDINFO

The **C1-PRDINFO** algorithm generates the product information string. It concatenates the provided fields in the parameters, separated by the provided separator in the specified order. The eligible field parameters are listed below:

- PRODUCT\_CD
- DESCR
- PROD\_TYP\_FLG
- PRODUCT\_CAT\_FLG

- BO\_STATUS\_CD
- START\_DT
- END\_DT
- PROD\_MNGR
- PROD\_MNGR\_TD\_ROLE
- TC\_TYPE\_CD

## C1-PRDPSPR

---

Product Post Processing Algorithm.

## C1-PRDCT-VAL

---

The **C1-PRDCT-VAL** algorithm validates the product before saving it to the database.

## C1-PRD-TRN

---

The **C1-PRD-TRN** algorithm is responsible for monitoring the product end date. It transitions the status of a product, market product, offer, and bundle to **Retired** when its end date is earlier than the batch business date.

## C1-MPINFO

---

The **C1-MPINFO** algorithm generates the market product, offer, and bundle information string. It concatenates the provided fields in the parameters, separated by the provided separator in the specified order: The eligible field parameters are listed below:

- ENTITY\_CODE
- ENTITY\_TYPE
- DESCR
- DESCRLONG
- START\_DT
- END\_DT
- TC\_TYPE\_CD
- BO\_STATUS\_CD
- PRODUCT\_CD

## C1-MP-VAL

---

The **C1-MP-VAL** algorithm validates the market product before saving it to the database.

## F1-AT-RQJ

---

The **F1-AT-RQJ** algorithm type transitions the business object current state to the input **Next Status** or to the status related to the input **Next Transition Condition**. Either one but not both soft parameters may be specified. If both soft

parameters are not specified, the business object will be transitioned to the default next status specified in the lifecycle. Algorithms of this algorithm type may be defined for any business object status as its monitor algorithm.

## C1-OFFRINFO

---

The **C1-OFFRINFO** algorithm generates the market product, offer, and bundle information string. It concatenates the provided fields in the parameters, separated by the provided separator in the specified order: The eligible field parameters are listed below:

- ENTITY\_CODE
- ENTITY\_TYPE
- DESCR
- DESCRLONG
- START\_DT
- END\_DT
- TC\_TYPE\_CD
- BO\_STATUS\_CD PRODUCT\_CD

## C1-OFFER-VAL

---

The **C1-OFFER-VAL** algorithm validates the offer before saving it to the database.

## C1-BNDLINFO

---

The **C1-BNDLINFO** algorithm generates the market product, offer, and bundle information string. It concatenates the provided fields in the parameters, separated by the provided separator in the specified order: The eligible field parameters are listed below:

- ENTITY\_CODE
- ENTITY\_TYPE
- DESCR
- DESCRLONG
- START\_DT
- END\_DT
- TC\_TYPE\_CD
- BO\_STATUS\_CD PRODUCT\_CD

## C1-BUNDL-VAL

---

The **C1-BUNDL-VAL** algorithm validates the bundle before saving it to the database.

## Product (Used for Searching)

---

The **Product** screen allows you to search for a product using various search criteria. It also allows you to add, edit, or copy an existing product. It contains the following zone:

- [Search Product](#) on page 3255

### Related Topics

For more information on...	See...
How to search for a product	<a href="#">Searching for a Product</a> on page 3256
How to add a product	<a href="#">Adding a Product</a> on page 3263

How to copy a product	<a href="#">Copying a Product</a> on page 3259

## Search Product

The **Search Product** zone allows you to search for a product using various search criteria. It contains the two following sections:

- **Search Criteria** - The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Search By	Used to indicate whether you want to search products which are added by you or search all the products available in the system. The valid values are: <ul style="list-style-type: none"> <li>• My Products</li> <li>• All Products</li> </ul>	No
	<b>Note:</b> By default, the <b>My Products</b> option is selected.	
Product Code	Used to search for a particular product.	No
Product Type	Used to search products of a particular type.	No
Product Category	Used to search products which belong to a particular category.	No
Status	Used to search products having a particular status. The valid values are: <ul style="list-style-type: none"> <li>• Active</li> <li>• Draft</li> <li>• Retired</li> </ul>	No
Start Date	Used to search products which are effective from a particular date onwards.	No
End Date	Used to search products which are effective till a particular date.	No

- **Search Results** - On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Product Information	Displays the concatenated string of information about the product separated by a comma (,).

Column Name	Column Description
Status	<p>Indicates the current status of the product. The valid values are:</p> <ul style="list-style-type: none"> <li>Active</li> <li>Draft</li> <li>Retired</li> </ul> <p><b>Note:</b></p> <p>If the product is in the active status, it is indicated by the <b>Active</b> (  Active ) icon.</p> <p>If the product is in the draft status, it is indicated by the <b>Draft</b> (  Draft ) icon.</p> <p>If the product is in the retired status, it is indicated by the <b>Retired</b> (  Retire ) icon.</p>
Product Type	Indicates the type of the product.
Product Category	Indicates the category to which the product belongs.
Start Date	Displays the date from when the product is effective in the system.
End Date	Displays the date till when the product is effective in the system.
Copy	On clicking the <b>Copy</b> (  ) icon, the <b>Product Information</b> screen appears where you can add a new product using an existing product.
Edit	On clicking the <b>Edit</b> (  ) icon, the <b>Product Information</b> screen appears where you can edit the details of the existing product.

<p><b>Note:</b></p> <p>Pagination is used to display limited number of records in this zone. You can use the navigation links, such as <b>Previous</b> and <b>Next</b> to navigate between pages.</p> <p>By default, <b>Search Results</b> section lists all the products added by the user.</p>
--

How to edit the details of a product	<a href="#">Editing a Product</a> on page 3257
How to copy a product	<a href="#">Copying a Product</a> on page 3259

## Searching for a Product

### Prerequisites

To search a product, you should have:

- Product defined in the application.

### Procedure

To search a product:

1. Click the **Menu** link in the **Application** toolbar.

A list appears.

- From the **Main** menu, select **Retail Banking** and then click the **Product** sub-menu.

A sub-menu appears.

- Click the **Search** option from the **Product** sub-menu.

The **Product** screen appears.

- Enter the search criteria in the **Search Product** zone.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

- Click **Search** button.

A list of product that meet the search criteria appears in the **Search Results** section.

**Note:** Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

### **Related Topics**

<b>For more information on...</b>	<b>See...</b>
<b>Product Search</b> Screen	<a href="#">Search Product</a> on page 3255
How to add the product	<a href="#">Adding a Product</a> on page 3263
How to copy the product	<a href="#">Copying a Product</a> on page 3259
How to edit the product	<a href="#">Editing a Product</a> on page 3257

## **Editing a Product**

### **Procedure**

To edit a product:

- Search for the product in the **Product** screen whose details you want to edit.
- In the **Search Results** section, click the **Edit** (✎) icon in the **Edit** column corresponding to the product whose details you want to edit.

The **Product Information** screen appears. It contains the following pages:

- [Product Information - Basic Details](#) on page 3261
- [Product Information - Other Details](#) on page 3262
- [Product Information - Services](#) on page 3263

The **Basic Details** page contains the following zone:

- [Basic Details](#)

The **Basic Details** zone contains the following fields:

<b>Field Name</b>	<b>Field Description</b>	<b>Mandatory (Yes or No)</b>
Product Category	Displays the category of the product.	Not applicable

Field Name	Field Description	Mandatory (Yes or No)
Product Code	Displays the product code.	Not applicable
Product Name	Used to specify the product.	Not applicable
Description	Used to specify the description of the product.	Yes
Product Type	Displays the product type.	Not applicable
Start Date	Displays the date from when the product is effective in the system.	Not applicable
End Date	Used to specify the date till when the product is effective in the system.	No
Terms and Conditions	Used to associate terms and conditions with the product.	No
	<b>Note:</b> The <b>Search</b> (🔍) appears corresponding to the <b>Terms and Conditions</b> field. On clicking the <b>Search</b> icon, the <b>Terms and Conditions Search for Product</b> window appears where you can associate the terms and conditions with the product.	
Product Manager	Used to assign the product to the product manager for the approval process.	No
	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to the <b>Product Manager</b> field. On clicking the <b>Search</b> icon, the <b>User Search</b> window appears where you can search for the user.	
Product Manager To Do Role	Used to specify the To Do role for the To Do task which is performed by the product manager.	No
	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to the <b>Product Manager To Do Role</b> field. On clicking the <b>Search</b> icon, the <b>To Do Role Search</b> window appears where you can search for the To Do role.	

3. Modify the required details in the **Basic Details** page.
4. Associate or disassociate the product from a division in the **Other Details** page, if required.
5. Add, edit, or remove the characteristics from the product in the **Other Details** page, if required.
6. Associate or disassociate the product from the parent group in the **Other Details** page, if required.
7. Add, edit, or remove services from the product in the **Services** page, if required.
8. Click **Submit**.

A window appears confirming the product is submitted in the system.

9. Click the **Close** button in the confirmation window.

The product is modified.

How to associate the product to a parent group	<a href="#">Associating the Product to a Parent Group</a> on page 3267
How to add a service for the product	<a href="#">Adding a Service for the Product</a> on page 3267

**Copying a Product**

Instead of creating a product from scratch, you can create a new product using an existing product. This is possible through copying a product. On copying a product, the details including the associated divisions, characteristics, associated parent groups, and the services are copied to the new product. You can then edit the details, if required.

**Prerequisites**

To copy a product, you should have:

- Product (whose copy you want to create) defined in the application

**Procedure**

To copy a product:

1. Search for the product in the **Product** screen whose copy you want to create.
2. In the **Search Results** section, click the **Copy** (📄) icon in the **Copy** column corresponding to the product whose copy you want to create.

The **Product Information** screen appears. It contains the following pages:

- [Product Information - Basic Details](#) on page 3261
- [Product Information - Other Details](#) on page 3262
- [Product Information - Services](#) on page 3263

The **Basic Details** page contains the following zone:

- [Basic Details](#) on page 3261

The **Basic Details** zone contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Product Category	Used to indicate the category of the product.	Yes
Product Code	Used to specify the product code.	Yes
Product Name	Used to specify the product.	Yes
Description	Used to specify the description for the product.	Yes
Product Type	Used to indicate the type of the product.	Yes
Start Date	Used to specify the date from when the product is effective.	Yes
End Date	Used to specify the date till when the product is effective.	No

Field Name	Field Description	Mandatory (Yes or No)
Terms and Conditions	Used to associate terms and conditions with the product.	No
	<b>Note:</b> The <b>Search</b> (🔍) appears corresponding to the <b>Terms and Conditions</b> field. On clicking the <b>Search</b> icon, the <b>Terms and Conditions Search for Product</b> window appears where you can associate the terms and conditions with the product.	
Product Manager	Used to assign the product to the product manager for the approval process.	No
	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to the <b>Product Manager</b> field. On clicking the <b>Search</b> icon, the <b>User Search</b> window appears where you can search for the user.	
Product Manager To Do Role	Used to specify the To Do role for the To Do task which is performed by the product manager.	No
	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to the <b>Product Manager To Do Role</b> field. On clicking the <b>Search</b> icon, the <b>To Do Role Search</b> window appears where you can search for the To Do role.	

3. Enter the required details in the **Basic Details** page.
4. Associate or disassociate the product from a division in the **Other Details** page, if required.
5. Add, edit, or remove the characteristics from the product in the **Other Details** page, if required.
6. Associate or disassociate the product from the parent group in the **Other Details** page, if required.
7. Add, edit, or remove services from the product in the **Services** page, if required.
8. Click **Submit**.

A window appears confirming the product is submitted in the system.

9. Click the **Close** button in the confirmation window.

The new product is added.

## Adding a Product

### Prerequisites

To add a product, you should have:

- Product categories defined in the application.
- Product types defined in the application.

- Terms and conditions defined in the application.
- Product manager's To Do roles defined in the application.

### **Procedure**

To add a product:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Main** menu, select **Retail Banking** and then click the **Product** sub-menu.  
A sub-menu appears.
3. Click the **Add** option from the **Product** sub-menu.

The **Product Information** screen appears. It contains the following pages:

- [Product Information - Basic Details](#) on page 3261
- [Product Information - Other Details](#) on page 3262
- [Product Information - Services](#) on page 3263

The **Basic Details** page contains the following zone:

- [Basic Details](#) on page 3261

The **Basic Details** zone contains the following fields:

<b>Field Name</b>	<b>Field Description</b>	<b>Mandatory (Yes or No)</b>
Product Category	Used to indicate the category of the product.	Yes
Product Code	Used to specify the product code.	Yes
Product Name	Used to specify the product.	Yes
Description	Used to specify the description for the product.	Yes
Product Type	Used to indicate the type of the product.	Yes
Start Date	Used to specify the date from when the product is effective.	Yes
End Date	Used to specify the date till when the product is effective.	No
Terms and Conditions	Used to associate terms and conditions with the product.  <b>Note:</b> The <b>Search</b> (🔍) appears corresponding to the <b>Terms and Conditions</b> field. On clicking the <b>Search</b> icon, the <b>Terms and Conditions Search for Product</b> window appears where you can associate the terms and conditions with the product.	No

Field Name	Field Description	Mandatory (Yes or No)
Product Manager	Used to assign the product to the product manager for the approval process.	No
	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to the <b>Product Manager</b> field. On clicking the <b>Search</b> icon, the <b>User Search</b> window appears where you can search for the user.	
Product Manager To Do Role	Used to specify the To Do role for the To Do task which is performed by the product manager.	No
	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to the <b>Product Manager To Do Role</b> field. On clicking the <b>Search</b> icon, the <b>To Do Role Search</b> window appears where you can search for the To Do role.	

4. Enter the required details in the **Basic Details** page.
5. Associate the product with divisions in the **Other Details** page, if required.
6. Define characteristics for the product in the **Other Details** page, if required.
7. Associate the product to a parent group in the **Other Details** page, if required.
8. Add a service for the product in the **Services** page, if required.
9. Click **Submit**.

A window appears confirming the product is submitted in the system.

10. Click the **Close** button in the confirmation window.

The product is added.

**Tip:** Alternatively, you can access the **Product Information** screen by clicking the **Add Product** button in the **Page Title** area of the **Product** screen.

## **Searching for a Market Product**

### **Prerequisites**

To search a market product, you should have:

- Market Product defined in the application.

- Product defined in the application.
- Product Group defined in the application.

### **Procedure**

To search a market product:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Main** menu, select **Retail Banking** and then click the **Market Product** sub-menu.  
A sub-menu appears.
3. Click the **Search** option from the **Market Product** sub-menu.  
The **Market Product** screen appears.
4. Enter the search criteria in the **Search Market Product** zone.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

5. Click **Search** button.  
A list of market product that meet the search criteria appears in the **Search Results** section.

**Note:** Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

## **Editing a Market Product**

### **Procedure**

To edit a market product:

1. Search for the market product in the **Market Product** screen whose details you want to edit.
2. In the **Search Results** section, click the **Edit** (✎) icon in the **Edit** column corresponding to the market product whose details you want to edit.

The **Market Product** screen appears. It contains the following pages:

- [Market Product Information - Basic Details](#) on page 3275
- [Market Product Information - Other Details](#) on page 3276
- [Market Product Information - Eligibility](#) on page 3277
- [Market Product Information - Services](#) on page 3279

- [Market Product Information - Price List](#) on page 3280

The **Basic Details** page contains the following zone:

- [Basic Details](#)

The **Basic Details** zone contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Market Product Code	Displays the market product code.	Not applicable
Market Product Name	Displays the market product.	Not applicable
Description	Used to specify the description of the market product.	No
Start Date	Displays the date from when the market product is effective in the system.	Not applicable
End Date	Used to specify the date till when the market product is effective in the system.	No
Terms and Conditions	Used to associate terms and conditions with the market product.	No
	<b>Note:</b> The <b>Search</b>  appears corresponding to the <b>Terms and Conditions</b> field. On clicking the <b>Search</b> icon, the <b>Terms and Conditions Search for Product</b> window appears where you can associate the terms and conditions with the market product.	

3. Modify the required details in the **Basic Details** page.
4. Associate or disassociate the market product from a division in the **Other Details** page, if required.
5. Add, edit, or remove the characteristics from the market product in the **Other Details** page, if required.
6. Add, edit, or remove the eligibility rule from the market product in the **Eligibility** page, if required.
7. Add, edit, or remove the price list from the market product in the **Price List** page, if required.
8. Click **Submit**.

A window appears confirming the market product is submitted in the system.

9. Click the **Close** button in the confirmation window.

**Note:** You cannot edit fields from the **Services** page when a service is already associated to the product.

The market product is modified.

## Copying a Market Product

Instead of creating a market product from scratch, you can create a new market product using an existing market product. This is possible through copying a market product. On copying a market product, the details including the associated divisions, characteristics, services, and the price list are copied to the new market product. You can then edit the details, if required.

### Prerequisites

To copy a market product, you should have:

- Market Product (whose copy you want to create) defined in the application

### Procedure

To copy a market product:

1. Search for the market product in the **Market Product** screen whose copy you want to create.
2. In the **Search Results** section, click the **Copy** (📄) icon in the **Copy** column corresponding to the market product whose copy you want to create.

The **Market Product** screen appears. It contains the following pages:

- [Market Product Information - Basic Details](#) on page 3275
- [Market Product Information - Other Details](#) on page 3276
- [Market Product Information - Eligibility](#) on page 3277
- [Market Product Information - Services](#) on page 3279
- [Market Product Information - Price List](#) on page 3280

The **Basic Details** page contains the following zone:

- [Basic Details](#)

The **Basic Details** zone contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Market Product Code	Used to specify the market product code.	Yes
Market Product Name	Used to specify the market product.	Yes
Description	Used to specify the description for the market product.	No
Start Date	Used to specify the date from when the market product is effective.	Yes
End Date	Used to specify the date till when the market product is effective.	No

Field Name	Field Description	Mandatory (Yes or No)
Terms and Conditions	Used to associate terms and conditions with the market product.	No
	<b>Note:</b> The <b>Search</b> (🔍) appears corresponding to the <b>Terms and Conditions</b> field. On clicking the <b>Search</b> icon, the <b>Terms and Conditions Search for Product</b> window appears where you can associate the terms and conditions with the market product.	

3. Enter the required details in the **Basic Details** page.
4. Associate or disassociate the market product from a division in the **Other Details** page, if required.
5. Add, edit, or remove the characteristics from the market product in the **Other Details** page, if required.
6. Add, edit, or remove the eligibility rule from the market product in the **Eligibility** page, if required
7. Add, edit, or remove the price list from the market product in the **Price List** page, if required
8. Click **Submit**.

A window appears confirming the market product is submitted in the system.

9. Click the **Close** button in the confirmation window.

**Note:** You cannot edit fields from the **Services** page when a service is already associated to the product.

The new market product is added.

A sub-menu appears.
3. Click the **Search** option from the **Offer** sub-menu.  
The **Offer** screen appears.
4. Enter the search criteria in the **Search Offer** zone.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

5. Click **Search** button.

A list of offer that meet the search criteria appears in the **Search Results** section.

**Note:** Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

## Editing an Offer

### Procedure

To edit an offer:

1. Search for an offer in the **Offer** screen whose details you want to edit.

2. In the **Search Results** section, click the **Edit**  icon in the **Edit** column corresponding to an offer whose details you want to edit.

The **Offer Information** screen appears. It contains the following pages:

- [Offer Information - Basic Details](#) on page 3297
- [Offer Information - Other Details](#) on page 3298
- [Offer Information - Eligibility](#) on page 3298
- [Offer Information - Services](#) on page 3300
- [Offer Information - Price List](#) on page 3301

The **Basic Details** page contains the following zone:

- [Basic Details](#) on page 3297

The **Basic Details** zone contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Offer Code	Displays the offer code.	Not applicable
Offer Name	Used to specify the offer.	Not applicable
Description	Used to specify the description of the offer.	No
Start Date	Displays the date from when the market product is effective in the system.	Not applicable
End Date	Displays the date till when the market product is effective in the system.	Not applicable
Terms and Conditions	Used to associate terms and conditions with the offer.  <b>Note:</b> The <b>Search</b>  appears corresponding to the <b>Terms and Conditions</b> field. On clicking the <b>Search</b> icon, the <b>Terms and Conditions Search for Product</b> window appears where you can associate the terms and conditions with the product.	No
Market Product Name	Used to specify the market product.  <b>Note:</b> The <b>Search</b>  appears corresponding to the <b>Market Product Name</b> field. On clicking the <b>Search</b> icon, the <b>Search Market Product to Offer</b> window appears where you can associate the market product with the offer.	No
Product Category	Displays the product category.	Not applicable
Product Type	Displays the product type.	Not applicable
Product Name	Displays the concatenated string of information about the product separated by a comma (,).	Not applicable

3. Modify the required details in the **Basic Details** page.

4. Associate or disassociate the offer with a market product in the **Basic Details** page.
5. Associate or disassociate the offer from a division in the **Other Details** page, if required.
6. Add, edit, or remove the characteristics from the offer in the **Other Details** page, if required.
7. Add, edit, or remove the eligibility rule from the offer in the **Eligibility** page, if required.
8. Add, edit, or remove the services from the offer in the **Eligibility** page, if required.
9. Add, edit, or remove the price list from the offer in the **Price List** page, if required.
10. Click **Submit**.

A window appears confirming the offer is submitted in the system.

11. Click the **Close** button in the confirmation window.

**Note:** You cannot edit fields from the **Services** page when a service is already associated to an offer.

The offer is modified.

## **Copying an Offer**

Instead of creating an offer from scratch, you can create a new offer using an existing offer. This is possible through copying an offer. On copying an offer, the details including the associated divisions, characteristics, services, and the price list are copied to the new offer. You can then edit the details, if required.

### **Prerequisites**

To copy an offer, you should have:

- Offer(whose copy you want to create) defined in the application

### **Procedure**

To copy an offer:

1. Search for an offer in the **Offer** screen whose copy you want to create.
2. In the **Search Results** section, click the **Copy** (📄) icon in the **Copy** column corresponding to the offer whose copy you want to create.

The **Offer Information** screen appears. It contains the following pages:

- [Offer Information - Basic Details](#) on page 3297
- [Offer Information - Other Details](#) on page 3298

- [Offer Information - Eligibility](#) on page 3298
- [Offer Information - Services](#) on page 3300
- [Offer Information - Price List](#) on page 3301

The **Basic Details** page contains the following zone:

- [Basic Details](#) on page 3297

The **Basic Details** zone contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Offer Code	Used to specify the offer code.	Yes
Offer Name	Used to specify the offer.	Yes
Description	Used to specify the description for the offer.	No
Start Date	Used to specify the date from when the offer is effective.	Yes
End Date	Used to specify the date till when the offer is effective.	Yes
Terms and Conditions	Used to associate terms and conditions with the offer.	No
	<b>Note:</b> The <b>Search</b> (🔍) appears corresponding to the <b>Terms and Conditions</b> field. On clicking the <b>Search</b> icon, the <b>Terms and Conditions Search for Product</b> window appears where you can associate the terms and conditions with the offer.	

The **Basic Details** zone contains the **Add Market Products** section. This section contains following fields:

Field Name	Field Description	Mandatory (Yes or No)
Market Product Name	Used to indicate the search value of the market product name.	No
	<b>Note:</b> The <b>Search</b> (🔍) appears corresponding to the <b>Market Product Name</b> field. On clicking the <b>Search</b> icon, the window appears where you can associate the terms and conditions with the product.	
Product Category	Displays the product category associated with the selected market product.	Not applicable
Product Type	Displays the product type associated with the selected market product.	Not applicable
Product Name	Displays the product associated with the selected market product.	Not applicable

3. Enter the required details in the **Basic Details** page.
4. Associate or disassociate the offer with a market product in the **Basic Details** page.

5. Associate or disassociate the offer from a division in the **Other Details** page, if required.
6. Add, edit, or remove the characteristics from the offer in the **Other Details** page, if required.
7. Add, edit, or remove the eligibility rule from the offer in the **Eligibility** page, if required
8. Add, edit, or remove the services from the offer in the **Eligibility** page, if required
9. Add, edit, or remove the price list from the offer in the **Price List** page, if required
10. Click **Submit**.

A window appears confirming the offer is submitted in the system.

11. Click the **Close** button in the confirmation window.

**Note:** You cannot edit fields from the **Services** page when a service is already associated to the product.

The new offer is added.

## Associating a Price List with an Offer

### Prerequisites

To associate an offer with a price list, you should have:

- Price list defined in the application.

### Procedure

To associate an offer with a price list:

1. Ensure that the **Price List** zone expanded in the of **Price List** page when you are associating the offer with the Price List.

The **Price List** zone contains **Search Price List** section.

The **Search Price List** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Price List ID or Description	Used to indicate whether you want to search for a price list using the price list details.	No
Start Date	Used to specify the date from when the price list of the product is effective.	No
End Date	Used to specify the date till when the price list of the product is effective.	No

The **Search Results** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Select	Used to indicate whether the price list is selected or not.	Yes
Price List ID or Description	Displays the price list id and name.	Not applicable
Start Date	Displays the date from when the price list of the product is effective.	Not applicable
End Date	Displays the date till when the price list of the product is effective.	Not applicable

2. Select the required price list in the grid, to associate with the offer.
3. Click **Back** button, to go back to **Services** page.
4. Click **Save as Draft**, to save the offer in the draft.
5. Click **Select and Proceed**, to go to **Price List Added** section. It contains the following fields in the grid:

Field Name	Field Description	Mandatory (Yes or No)
Priority	Indicates the order in which the assigned price list must be considered while determining the price item pricing for the offer.	No
Price List ID or Description	Used to indicate whether you want to search for a price list using the price list details.	No
Validity Period	Used to specify the period date range or number of days for which the price list is valid. It is used to calculate price list assignment validity end date while assigning the price list to the offer. The valid values are: <ul style="list-style-type: none"> <li>• Date Range</li> <li>• Number of Days</li> </ul>	No

6. Add, edit or delete the required price list in the grid, to associate with the offer.
7. Click **Add More** button, to go back to previous section to add and associate the price list with the offer.
8. Click **Back** button, to go back to **Services** page.
9. Click **Save as Draft**, to save the offer in the draft.

The offer is saved as draft in the application.

10. Click **Submit**.

A window appears confirming the offer is submitted in the system.

11. Click the **Close** button in the confirmation window.

The offer is added.

**Tip:** Alternatively, you can access the **Offer Information** screen by clicking the **Add Market Product** button in the **Page Title** area of the **Offer** screen.

## **Searching for a Bundle**

### **Prerequisites**

To search a bundle, you should have:

- Bundle defined in the application.
- Market Product defined in the application.
- Product defined in the application.

### **Procedure**

To search a bundle:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Main** menu, select **Retail Banking** and then click the **Bundle** sub-menu.  
A sub-menu appears.
3. Click the **Search** option from the **Bundle** sub-menu.  
The **Bundle** screen appears.
4. Enter the search criteria in the **Search Bundle** zone.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

5. Click **Search** button.  
A list of bundle that meet the search criteria appears in the **Search Results** section.

**Note:** Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

## Editing a Bundle

### Procedure

To edit a bundle:

1. Search for the bundle in the **Bundle** screen whose details you want to edit.
2. In the **Search Results** section, click the **Edit** (✎) icon in the **Edit** column corresponding to the bundle whose details you want to edit.

The **Bundle Information** screen appears. It contains the following pages:

- [Bundle Information - Basic Details](#) on page 3318
- [Bundle Information - Other Details](#) on page 3319
- [Bundle Information - Eligibility](#) on page 3320
- [Bundle Information - Services](#) on page 3322
- [Bundle Information - Price List](#) on page 3322

The **Basic Details** page contains the following zone:

- [Basic Details](#)

The **Basic Details** zone contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Bundle Code	Displays the bundle code.	Not applicable
Bundle Name	Used to specify the bundle.	Yes
Description	Used to specify the description of the bundle.	No
Start Date	Displays the date from when the bundle is effective in the system.	Not applicable
End Date	Used to specify the date till when the bundle is effective in the system.	No
Terms and Conditions	Used to associate terms and conditions with the bundle.  <b>Note:</b> The <b>Search</b> (🔍) appears corresponding to the <b>Terms and Conditions</b> field. On clicking the <b>Search</b> icon, the <b>Terms and Conditions Search for Product</b> window appears where you can associate the terms and conditions with the bundle.	No

Field Name	Field Description	Mandatory (Yes or No)
Market Product Name	Used to specify the market product.	No
	<b>Note:</b> The <b>Search</b>  appears corresponding to the <b>Market Product Name</b> field. On clicking the <b>Search</b> icon, the <b>Search Market Product to Offer</b> window appears where you can associate the market product with the offer.	
Product Category	Displays the product category.	Not applicable
Product Type	Displays the product type.	Not applicable
Product Name	Displays the concatenated string of information about the product separated by a comma (,).	Not applicable

3. Modify the required details in the **Basic Details** page.
4. Associate or disassociate the bundle with a market product in the **Basic Details** page.
5. Associate or disassociate the bundle from a division in the **Other Details** page, if required.
6. Add, edit, or remove the characteristics from the bundle in the **Other Details** page, if required.
7. Add, edit, or remove the eligibility rule from the bundle in the **Eligibility** page, if required.
8. Add, edit, or remove the price list from the bundle in the **Price List** page, if required.
9. Click **Submit**.

A window appears confirming the bundle is submitted in the system.

10. Click the **Close** button in the confirmation window.

**Note:** You cannot edit fields from the **Services** page when a service is already associated to the product.

The bundle is modified.

## Copying a Bundle

Instead of creating a bundle from scratch, you can create a new bundle using an existing bundle. This is possible through copying a bundle. On copying a bundle, the details including the associated divisions, characteristics, services and the price list are copied to the new bundle. You can then edit the details, if required.

### Prerequisites

To copy a bundle, you should have:

- Bundle(whose copy you want to create) defined in the application

### Procedure

To copy a bundle:

1. Search for a bundle in the **Bundle** screen whose copy you want to create.
2. In the **Search Results** section, click the **Copy** () icon in the **Copy** column corresponding to the bundle whose copy you want to create.

The **Bundle Information** screen appears. It contains the following pages:

- [Bundle Information - Basic Details](#) on page 3318
- [Bundle Information - Other Details](#) on page 3319
- [Bundle Information - Eligibility](#) on page 3320
- [Bundle Information - Services](#) on page 3322
- [Bundle Information - Price List](#) on page 3322

The **Basic Details** page contains the following zone:

- [Basic Details](#) on page 3318

The **Basic Details** zone contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Bundle Code	Used to specify the bundle code.	Yes
Bundle Name	Used to specify the bundle.	Yes
Description	Used to specify the description for the bundle.	No
Start Date	Used to specify the date from when the bundle is effective.	Yes
End Date	Used to specify the date till when the bundle is effective.	No
Terms and Conditions	Used to associate terms and conditions with the bundle.  <b>Note:</b> The <b>Search</b> (  ) appears corresponding to the <b>Terms and Conditions</b> field. On clicking the <b>Search</b> icon, the <b>Terms and Conditions Search for Product</b> window appears where you can associate the terms and conditions with the bundle.	No

Field Name	Field Description	Mandatory (Yes or No)
Market Product Name	Used to specify the market product.	Yes
	<b>Note:</b> The <b>Search</b> (🔍) appears corresponding to the <b>Market Product Name</b> field. On clicking the <b>Search</b> icon, the <b>Search Market Product to Offer</b> window appears where you can associate the market product with the offer.	
Product Category	Displays the product category.	Not applicable
Product Type	Displays the product type.	Not applicable
Product Name	Displays the concatenated string of information about the product separated by a comma (,).	Not applicable

3. Modify the required details in the **Basic Details** page.
4. Associate or disassociate the bundle with a market product in the **Basic Details** page
5. Associate or disassociate the bundle from a division in the **Other Details** page, if required.
6. Add, edit, or remove the characteristics from the bundle in the **Other Details** page, if required.
7. Add, edit, or remove the eligibility rule from the bundle in the **Eligibility** page, if required.
8. Add, edit, or remove the price list from the bundle in the **Price List** page, if required.
9. Click **Submit**.

A window appears confirming the bundle is submitted in the system.

10. Click the **Close** button in the confirmation window.

**Note:** You cannot edit fields from the **Services** page when a service is already associated to the product.

The new bundle is added.

## Adding a Bundle

### Prerequisites

To add a bundle, you should have:

- Market product defined in the application.

### **Procedure**

To add a bundle:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Main** menu, select **Retail Banking** and then click the **Bundle** sub-menu.  
A sub-menu appears.
3. Click the **Add** option from the **Bundle** sub-menu.

The **Bundle Information** screen appears. It contains the following pages:

- [Bundle Information - Basic Details](#) on page 3318
- [Bundle Information - Other Details](#) on page 3319
- [Bundle Information - Eligibility](#) on page 3320
- [Bundle Information - Services](#) on page 3322
- [Bundle Information - Price List](#) on page 3322

The **Basic Details** page contains the following zone:

- [Basic Details](#) on page 3318

The **Basic Details** zone contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Bundle Code	Used to specify the bundle code.	Yes
Bundle Name	Used to specify the bundle.	Yes
Description	Used to specify the description for the bundle.	No
Start Date	Used to specify the date from when the bundle is effective.	Yes
End Date	Used to specify the date till when the bundle is effective.	No
Terms and Conditions	Used to associate terms and conditions with the bundle.  <b>Note:</b> The <b>Search</b> (🔍) appears corresponding to the <b>Terms and Conditions</b> field. On clicking the <b>Search</b> icon, the <b>Terms and Conditions Search for Product</b> window appears where you can associate the terms and conditions with the product.	No

The **Basic Details** zone contains the **Add Markets Product** section. This section contains following fields:

Field Name	Field Description	Mandatory (Yes or No)
Market Product Name	Used to indicate the search value of the market product name.	Yes
	<b>Note:</b> The <b>Search</b>  appears corresponding to the <b>Market Product Name</b> field. On clicking the <b>Search</b> icon, the window appears where you can associate the terms and conditions with the product.	
Product Category	Displays the product category associated with the selected market product.	Not applicable
Product Type	Displays the product type associated with the selected market product.	Not applicable
Product Name	Displays the product associated with the selected market product.	Not applicable

4. Select the required market product from the search result.
5. Enter the required details in the **Basic Details** page.
6. Associate the bundle with divisions in the **Other Details** page, if required.
7. Define characteristics for the bundle in the **Other Details** page, if required.
8. Define and add eligibility rule and parameter for the bundle in the **Eligibility** page, if required.
9. Add a service for the bundle in the **Services** page, if required.
10. Search and select the price list for the bundle in the **Price List** page, if required..
11. Click **Submit**.

A window appears confirming the bundle is submitted in the system.

12. Click the **Close** button in the confirmation window.

The bundle is added.

**Tip:** Alternatively, you can access the **Bundle Information** screen by clicking the **Add Bundle** button in the **Page Title** area of the **Bundle** screen.

## Associating the Bundle with a Market Product

### Prerequisites

To associate the bundle with a market product, you should have:

- Market product defined in the application.

### Procedure

To associate the bundle with a market product:

1. Search the required market product in the **Market Product Name** field, to associate with the bundle.

**Note:** The **Search** (🔍) appears corresponding to the **Market Product Name** field. On clicking the **Search** icon, the **Search Market Product to Offer** window appears where you can associate the offer with a market product.

2. Click **Save as Draft**, to save the bundle in the draft.
3. Click **Next**, to go to **Other Details** page.

The bundle is saved as draft in the application.

## Associating the Bundle with a Division

### Prerequisites

To associate the bundle with a division, you should have:

- Bundle defined in the application.
- Divisions defined in the application.

### Procedure

To associate the bundle with a division:

1. Ensure that the **Division** section is expanded in the **Other Details** zone of **Other Details** page when you are associating the bundle with a division.

The **Division** section contains divisions associated with the selected product or market product.

2. Select the required divisions in the **Division** section, to associate with the bundle.
3. Click **Back** button, to go back to **Basic Details** page.
4. Click **Save as Draft**, to save the market product in the draft.
5. Click **Next**, to go to **Services** page.

The bundle is saved as draft in the application.

## Defining a Characteristic for the Bundle

### Prerequisites

To define a characteristic to the bundle, you should have:

- Characteristic type defined in the application.

### Procedure

To define characteristic type to the bundle:

1. Ensure that the **Additional Attributes** section is expanded in the **Other Details** zone of **Other Details** page when you are defining characteristic type to the bundle.

The **Additional Attributes** zone contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Effective Date	Used to specify the date from when the characteristics type and characteristics value is effective.	Yes
Characteristics Type	Used to indicate the characteristic type.	Yes
Characteristics Value	Used to specify the value for the characteristic type.	Yes

2. Enter the required details in the **Additional Attributes** section.
3. Click **Save as Draft**, to save the bundle in the draft.
4. Click **Next**, to go to **Eligibility** page.

The bundle is saved as draft in the application.

## Defining Eligibility Criteria for the Bundle

### Prerequisites

To define eligibility criteria for the bundle, you should have:

- Parameter defined in the application.

### Procedure

To define eligibility criteria for the bundle:

1. Ensure that the **Eligibility** zone is expanded in the **Eligibility** page when you are defining eligibility criteria for the bundle.

The **Eligibility** zone contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Eligibility Rule	Used to specify a eligibility rule for the bundle.	Yes

Field Name	Field Description	Mandatory (Yes or No)
Start Date	Used to specify the date from when the eligibility rule will be effective.	Yes
End Date	Used to specify the date till when the eligibility rule will be effective.	No
Parameter	Used to search the parameter which you want to associate with the eligibility rule.	Yes
	<b>Note:</b> The <b>Search</b> (🔍) appears corresponding to the fields. On clicking the <b>Search</b> icon, the <b>Parameter Search</b> window appears where you can search for the required parameter.	
Operator	Used to specify the relational operator to define the relation between the parameter name and value.	Yes
Parameter Value Type	Used to indicate the parameter value against which you want to compare the parameter. The valid values are: <ul style="list-style-type: none"> <li>• Parameter</li> <li>• Value</li> </ul>	Yes
Parameter	Used to search the parameter (on the right hand side) against which you want to compare the parameter (on the left hand side).	Yes
	<b>Note:</b> The <b>Search</b> (🔍) appears corresponding to the fields. On clicking the <b>Search</b> icon, the <b>Parameter Search</b> window appears where you can search for the required parameter.	
Is True	Used to indicate what happens when the condition is true (satisfied). The valid values are: <ul style="list-style-type: none"> <li>• <b>Check Next Condition</b> - Indicates that the condition with consecutive sequence number should be executed.</li> <li>• <b>Rule Is False</b> - Indicates that the action specified in the <b>Rule False Action</b> field should be executed.</li> <li>• <b>Rule Is True</b> - Indicates that the action specified in the <b>Rule True Action</b> field should be executed.</li> </ul>	Yes

Field Name	Field Description	Mandatory (Yes or No)
Is False	Used to indicate what happens when the condition is false (not satisfied). The valid values are: <ul style="list-style-type: none"> <li>• <b>Check Next Condition</b> - Indicates that the condition with consecutive sequence number should be executed.</li> <li>• <b>Rule Is False</b> - Indicates that the action specified in the <b>Rule False Action</b> field should be executed.</li> <li>• <b>Rule Is True</b> - Indicates that the action specified in the <b>Rule True Action</b> field should be executed.</li> </ul>	Yes
Is Sufficient	Used to indicate what happens when the data is insufficient. The valid values are: <ul style="list-style-type: none"> <li>• <b>Check Next Condition</b> - Indicates that the condition with consecutive sequence number should be executed.</li> <li>• <b>Rule Is False</b> - Indicates that the action specified in the <b>Rule False Action</b> field should be executed.</li> <li>• <b>Rule Is True</b> - Indicates that the action specified in the <b>Rule True Action</b> field should be executed.</li> </ul>	Yes

The **Eligibility** zone contains the **Eligibility Rules** table which contain following columns:

Column	Column Description
Eligibility Rule	Displays eligibility rule of the bundle.
Start Date	Displays the date from when the eligibility rule is effective.
End Date	Displays the date till when the eligibility rule is effective.

2. Enter the required details in the **Eligibility** zone.
3. Click **Save as Draft**, to save the bundle in the draft.
4. Click **Next**, to go to **Services** page.

The bundle is saved as draft in the application.

## Adding a Service for a Bundle

### Prerequisites

To add a service to a bundle, you should have:

- Market product defined in the application.

- Service defined in the application.

### **Procedure**

To add a service to a bundle:

1. Ensure that the **Services** section is expanded in the **Services** zone of **Services** page when you are add service to a bundle.

The **Services** zone contains the following fields:

<b>Field Name</b>	<b>Field Description</b>	<b>Mandatory (Yes or No)</b>
Product Service	Used to specify the product service.	Not applicable
Description	Used to specify the description of the product service.	Not applicable
Start Date	Used to specify the date from when the product service will be effective.	Not applicable
	<b>Note:</b> The product service end date cannot be earlier than the product service start date.	
End Date	Used to specify the date till when the product service will be effective.	Not applicable
	<b>Note:</b> The product service end date cannot be earlier than the product service start date.	
Mandatory	Indicates whether the product service is mandatory or not.	Not applicable
Mandatory Services	Displays the services associated with the selected product.	Not applicable
Optional Services	Used to add the service for a bundle.	No

2. Enter the required details in the **Services** section.
3. Click **Save as Draft**, to save the bundle in the draft.
4. Click **Submit**, to save the bundle.

## **Associating a Price List with the Bundle**

### **Prerequisites**

To associate the bundle with a price list, you should have:

- Price list defined in the application.

**Procedure**

To associate the bundle with a price list:

1. Ensure that the **Price List** zone expanded in the of **Price List** page when you are associating the bundle with the price list.

The **Price List** zone contains **Search Price List** section.

The **Search Price List** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Price List ID or Description	Used to indicate whether you want to search for a price list using the price list details.	Yes
Start Date	Used to specify the date from when the price list of the product is effective.	Yes
End Date	Used to specify the date till when the price list of the product is effective.	No

The **Search Results** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Select	Used to indicate whether the price list is selected or not.	Yes
Price List ID and Description	Displays the price list id and name.	Not applicable
Start Date	Displays the date from when the price list of the product is effective.	Not applicable
End Date	Displays the date till when the price list of the product is effective.	Not applicable

2. Select the required price list in the grid, to associate with the bundle.
3. Click **Back** button, to go back to **Services** page.
4. Click **Save as Draft**, to save the bundle in the draft.
5. Click **Select and Proceed**, to go to **Price List Added** section. It contains the following fields in the grid:

Field Name	Field Description	Mandatory (Yes or No)
Priority	Indicates the order in which the assigned price list must be considered while determining the price item pricing for the bundle.	Yes
Price List ID or Description	Used to indicate whether you want to search for a price list using the price list details.	Not applicable
Validity Period	Used to specify the period date range or number of days for which the price list is valid. It is used to calculate price list assignment validity end date while assigning the price list to the bundle. The valid values are: <ul style="list-style-type: none"> <li>• Date Range</li> <li>• Number of Days</li> </ul>	Not applicable

6. Add, edit or delete the required price list in the grid, to associate with the bundle.

7. Click **Add More** button, to go back to previous section to add and associate the price list with the bundle.
8. Click **Back** button, to go back to **Services** page.
9. Click **Save as Draft**, to save the bundle in the draft.

The bundle is saved as draft in the application.

10. Click **Submit**.

A window appears confirming the bundle is submitted in the system.

11. Click the **Close** button in the confirmation window.

The bundle is added.

**Tip:** Alternatively, you can access the **Bundle Information** screen by clicking the **Add Bundle** button in the **Page Title** area of the **Bundle** screen.

# Chapter 50

---

## Retail Banking Product Inbound Web Services

---

### Topics:

- [Prerequisites](#)
- [C1\\_GETELIGIBLEPROD Business Service](#)
- [C1-GetProdDetail Business Service](#)
- [C1PRDCTENRL Business Service](#)

Oracle Revenue Management and Billing provides the ability to do the following through an inbound web service:

- View the details of a retail banking product, market product, offer, and bundle
- Derive the eligible market product, offer, and bundle for a person or an account

The following inbound web services are shipped with the product:

- **C1-GetEligibleProduct** - This is a SOAP based inbound web service. It supports the XML format. It enables you to derive eligible active market products, offers, and bundles for the person or account on the processing date. You can specify the eligibility parameters along with the person or account details when you want to simulate the response. It also enables you to view the details of an active product, market product, offer, and/or bundle which is effective on the processing date. You can extract the data in the following templates:
  - **Summary** - Used when you want to extract the details of the market product, offer, and/or bundle without pricing.
  - **Detail** - Used when you want to extract the details of the market product, offer, and/or bundle with pricing.
- **C1-GetEligibleProductRest** - This is a REST based inbound web service. It supports the JSON and XML formats. It enables you to derive eligible active market products, offers, and bundles for the person or account on the processing date. You can specify the eligibility parameters along with the person or account details when you want to simulate the response. It also enables you to view the details of an active product, market product, offer, and/or bundle which is effective on the processing date. You can extract the data in the following templates:
  - **Summary** - Used when you want to extract the details of the market product, offer, and/or bundle without pricing.
  - **Detail** - Used when you want to extract the details of the market product, offer, and/or bundle with pricing.
- **C1-GetProdDetail** - This is a SOAP based inbound web service. It supports the XML format. It enables you to view the details of an active market product, offer, or bundle which is effective on the processing date. You can extract the data in the following templates:
  - **Summary** - Used when you want to extract the details of the market product, offer, or bundle without pricing.

- **Detail** - Used when you want to extract the details of the market product, offer, or bundle with pricing.
- **C1-GetProdDetailRest** - This is a REST based inbound web service. It supports the JSON and XML formats. It enables you to view the details of an active market product, offer, or bundle which is effective on the processing date. You can extract the data in the following templates:
  - **Summary** - Used when you want to extract the details of the market product, offer, or bundle without pricing.
  - **Detail** - Used when you want to extract the details of the market product, offer, or bundle with pricing.

## Prerequisites

The following table lists the prerequisites for eligible derivation of the active market products, offers, or bundles, to view the details of the active market products, offers, or bundles, and to enroll the account to market products, offers, or bundles through an inbound web service:

If you want to...	Then...
Drive eligible market products, offers, or bundles through an inbound web service	<p>You need to do the following:</p> <ul style="list-style-type: none"> <li>• Retail banking product catalog definitions are created in the system.</li> <li>• Price item pricing defined for all the retail banking product catalog definition in the system</li> <li>• Define a REST or SOAP based inbound web service to call the <b>C1_GETELIGIBLEPROD</b> business service.</li> <li>• Active market products, offers, or bundles are required in the system.</li> <li>• Provide the required input parameters, such as,               <ul style="list-style-type: none"> <li>• Product Category</li> <li>• Product Code</li> <li>• Product Type</li> <li>• Entity Code</li> <li>• Entity Type</li> <li>• Person account</li> <li>• Process Date</li> </ul> </li> </ul>
View the details of the active market product, offer, or bundle through an inbound web service	<p>You need to do the following:</p> <ul style="list-style-type: none"> <li>• Retail banking product catalog definitions are created in the system.</li> <li>• Price item pricing defined for all the retail banking product catalog definition in the system</li> <li>• Define a REST or SOAP based inbound web service to call the <b>C1-GetProdDetail</b> business service.</li> <li>• Active market products, offers, or bundles are required in the system.</li> <li>• Provide the required input parameters, such as,               <ul style="list-style-type: none"> <li>• Entity Code</li> <li>• Entity Type</li> <li>• Person account</li> </ul> </li> </ul>

If you want to...	Then...
Enroll the account to market products, offers, or bundles through an inbound web service	You need to do the following: <ul style="list-style-type: none"> <li>• Division, Contract Type, Customer Class, and Customer details setup defined in the application to enroll the account to market products, offers, or bundles.</li> <li>• Definition of market products, offers, or bundles should be created in the system before sending enrollment request.</li> </ul>

## C1\_GETELIGIBLEPROD Business Service

The **C1\_GETELIGIBLEPROD** business service enables you to derive the eligible active market products, offers, or bundles for the person or an account on the processing date. It also enables you to view the details of an eligible active market products, offers, or bundles which are effective on the processing date. You can call this business service from an external system through an inbound web service. If you want to send the request in the XML and/or JSON format, you need to ensure that you create a REST based inbound web service in Oracle Revenue Management and Billing. However, if you want to send the request in the XML format, you can create a SOAP or REST based inbound web service in Oracle Revenue Management and Billing.

You can extract the data in the following template:

- **Summary:** Used to derive the details of the eligible active market products, offers, and/or bundles without pricing.
- **Detail:** Used to derive the details of the eligible active market products, offers, and/or bundles with pricing.

To drive for an eligible active market products, offers, or bundles for the person or account, provide the following input parameters:

- Product Category
- Product Code
- Product Type
- Entity Type
- Entity Code
- Person account
- Process Date

**Note:** Entity is referred to market product, offer or bundle.

## Eligible Market Products, Offers, or Bundles Derivation Request and Response - Tags in XML Format

**Note:** We recommend you to refer the topics [Eligible Market Products, Offers, or Bundles Derivation Request in the XML Format](#) on page 3337 and [Eligible Market Products, Offers, or Bundles Derivation Response in the XML Format](#) on page 3338 in parallel while understanding the below mentioned tags. This will help you to understand how the tags are nested in the XML format.

Before calling the **C1\_GETELIGIBLEPROD** business service through an inbound web service, you need to ensure that the eligible active market products, offers, or bundles derivation request contains the following tags:

Tag Name	Tag Description	Mandatory (Yes or No)
productCode	Used to specify the product code to derive the details of the eligible active entities.	Yes(Conditional)
	<b>Note:</b> Entity is referred to market product, offer or bundle.	<b>Note:</b> This field is required if the product category, entity type, or entity code are not entered.
productCategoryFlg	Used to specify the product category flag to derive the details of the eligible active entities.	No
	<b>Note:</b> Entity is referred to market product, offer or bundle.	
division	Used to specify the division to derive the details of the eligible active entities which are associated with a particular division.	Yes(Conditional)
		<b>Note:</b> This field is required with product code, product category, entity type or entity code to derive the entities of the specific division.

Tag Name	Tag Description	Mandatory (Yes or No)
entityType	Used to indicate the entity type to derive the details of the eligible active entities.	Yes(Conditional)
		<b>Note:</b> This field is required if the entity code is entered.
		<b>Note:</b> This field is required if the product code, or product category are not entered.
entityCode	Used to specify the entity code to derive the details of the eligible active entities.	Yes(Conditional)
		<b>Note:</b> This field is required if the product code or product category are not entered.
processDate	Used to specify the date to derive the details of effective market products, offers, or bundles for that date.	Yes(Conditional)
		<b>Note:</b> If the date is not entered then it will display the default date from the system on which the enquiry is made.
accountId	Used to indicate the account for which you want to derive the details of the active entities.	Yes(Conditional)
		<b>Note:</b> If this field is not entered then all active entities will be extract.
		<b>Note:</b> This field is required if you want to derive the details of eligible active entities for specific person or account.
acctIdtype	Used to indicate the type of account identifier type for which you to derive the details of the eligible active entity.	No
acctIdentifierValue	Used to specify the value for the account identifier type for which you to derive the details of the eligible active entities.	Yes(Conditional)
		<b>Note:</b> This field is required if you want to derive the details of eligible active entities for specific person or account.
personId	Used to specify the person account for which you want to derive the details of eligible active market products, offers, or bundles.	Yes(Conditional)
		<b>Note:</b> This field is required if you want to derive the details of eligible active entities for specific person or account.
custIdTypeCd	Used to indicate the customer ID type for which you want to derive the details of eligible active market products, offers, or bundles.	No

Tag Name	Tag Description	Mandatory (Yes or No)
perIdentifireVal	Used to specify the value of person identifier for which you want to derive the details of eligible active market products, offers, or bundles.	No
productLinkedEntity	Used to specify product linked entity(market product code) for which you want to derive the details of eligible active offers or bundles linked with that particular code.	No
linkedEntityCode	Used to specify code of the linked entity(market product code) for which you want to derive the details of eligible active offers or bundles linked with that particular code.	Yes(Conditional) <b>Note:</b> This field is required when you want to derive offer or bundle linked with the particular market product.
linkedEntityType	Used to indicate type of the linked entity(market product code) for which you want to derive the details of eligible active offer or bundle linked with that particular code.	Yes(Conditional) <b>Note:</b> This field is required when you want to derive offer or bundle linked with the particular market product.
eligibleParameter	Used to specify the eligibility parameter based on which you want to derive the details of eligible active market products, offers, or bundles.	Yes(Conditional) <b>Note:</b> If this field is not entered then system will take the eligibility details from the person or account.
priceParmCode	Used to specify the eligibility parameter code based on which you want to derive the details of eligible active market products, offers, or bundles.	Yes(Conditional) <b>Note:</b> If this field is not entered then system will take the eligibility details from the person or account.
priceParmVal	Used to specify the eligibility parameter value based on which you want to derive the details of eligible active market products, offers, or bundles.	Yes(Conditional) <b>Note:</b> If this field is not entered then system will take the eligibility details from the person or account.

The following table lists and describes the tags which appear in the eligible active market products, offers, or bundles derivation response XML format:

Tag Name	Tag Description
entityList	Displays the list of eligible market products, offers, or bundles.
entityCode	Displays the entity code.
entityType	Displays the entity type.
entityName	Displays the entity name.

Tag Name	Tag Description
entityStartDate	Displays the date from when the entity is effective.
entityEndDate	Displays the date till when the entity is effective.
entityCodeDescr	Displays the description of the entity code.
termsAndCondition	Displays the terms and condition of the entity.
termAndConditionDesc	Displays the description of the terms and conditions of the entity.
status	Displays the status of the entity.
productList	Displays the list of the eligible products to which the requested entity belongs.
productCode	Displays the code of the eligible product to which the requested entity belongs.
productDescription	Displays the description of the eligible product to which the requested entity belongs.
productTypFlgDesc	Displays the description of the eligible product type flag to which the requested entity belongs.
productCategoryFlgDesc	Displays the description of the eligible product category flag to which the requested entity belongs.
productLinkedEntity	Displays the list of eligible market products, offers, and bundles.
linkedEntityStartDate	Displays the date from when the linked entity is effective.
linkedEntityEndDate	Displays the date till when the linked entity is effective.
linkedEntityCode	Displays the linked entity code for the requested entity code.
linkedEntityType	Displays the linked entity type for the requested entity code.
	<b>Note:</b> It is applicable in case of offer and bundle.
EntityDivision	Displays the division to which the requested entity belongs.
divisionCode	Displays the division code to which the requested entity belongs.
eligibilityDetails	Indicates the name of group tag.
eligibilityStartDate	Displays the date from when the eligibility of the entity is effective.
eligibilityEndDate	Displays the date till when the eligibility of the entity is effective.
eligibilityDescription	Displays the description of the eligibility to which the requested entity belongs.
eligibilityRule	Indicates the name of group tag.
sequenceNumber	Indicates the sequence number of eligibility condition.
lhsPriceParmCd	Indicates the left side parameter code of the eligibility condition.
operator	Indicates the operator to evaluate the condition.
rhsPriceParmCd	Indicates the right side parameter code of the eligibility condition.
rhsPriceParmVal	Indicates the right side parameter value of the eligibility condition.
lhsPriceParmCd1	Indicates the left side parameter code of the eligibility condition.
rhsPriceParmTypeFlg	Indicates the value of the right side flag.
trueFlag	Indicates the true eligibility condition.
falseFlag	Indicates the false eligibility condition.

<b>Tag Name</b>	<b>Tag Description</b>
insufficientFlag	Indicates the insufficient eligibility condition.
services	Indicates the name of group tag.
serviceName	Displays the service configured to the requested entity code.
mandatoryFlag	Indicates the mandatory or optional type of the services.
pricing	Indicates the name of group tag.
priority	Displays the priority in sequence of the price list of the entities.
priceListId	Displays the Price List ID.
priceListDescription	Displays the description of the price list.
priceListStartDate	Displays the date from when the price list of the entity is effective.
priceListEndDate	Displays the date till when the price list of the entity is effective.
noOfDays	Displays the validity of price list in number of days.
priceItemCode	Displays the price item code.
priceitemDescr	Displays the description of the price item.
priceAsgnId	Displays the price assignment ID.
validityFlag	Indicates the validity of the price item.
sourceEntityType	Displays the source entity type.
sourceEntityCode	Displays the source entity code.
priceListInfo	Displays the information of the price list.
priceComponent	Indicates the name of group tag.
priceCompId	Displays the price component ID.
pricecomptier	Indicates the name of group tag.
priceCompSequenceNo	Displays the sequence number of the price component.
priceItemParmGroupID	Displays the parameter group ID of the price item.
toVal	Indicates the tiering to value of the price item.
fromVal	Indicates the tiering from value of the price item.
timeOfUse	Indicates the tiering time of use.
priceItemCode	Displays the price item code.
priceCriteria	Displays the price criteria of the price item.
priceCompId	Displays the price component ID.
tieSeqNum	Indicates the tiering sequence number.
version	Displays the version number.
priceComponentDescription	Displays the description of the price component.
valueAmt	Displays the value amount of the price component.
priceComponentDisplay	Displays the price component.

Tag Name	Tag Description
rcMapId	Displays the rate component map ID.
tieredFlag	Indicates the tire flag.
priceCompSequenceNo	Displays the sequence of the price component.
messageCategory	Indicates the category of the message.
messageNumber	Indicates the number of the message.
messageText	Displays the message.
longDescription	Displays the long description.
inquiryTypeFlag	Displays the inquiry type flag.  <b>Note:</b> If the inquiry type flag value is <b>SMRY</b> then service will provide details of eligible entities without price component and if the inquiry type flag value is <b>DETL</b> then service will provide details of eligible entities with price component

## Eligible Market Products, Offers, or Bundles Derivation Request and Response - Attribute/Value Pairs in JSON Format

**Note:** We recommend you to refer the topics [Eligible Market Products, Offers, or Bundles Derivation Request in the JSON Format](#) on page 3425 and [Eligible Market Products, Offers, or Bundles Derivation Response in the JSON Format](#) on page 3426 in parallel while understanding the below mentioned attributes. This will help you to understand how the attributes/values are structured in the JSON format.

Before calling the **C1\_GETELIGIBLEPROD** business service through an inbound web service, you need to ensure that the eligible active market products, offers, or bundles derivation request contains the following attributes:

Attribute Name	Attribute Description	Mandatory (Yes or No)
productCode	Used to specify the product code to derive the details of the eligible active entities.	Yes(Conditional)
	<b>Note:</b> Entity is referred to market product, offer or bundle.	<b>Note:</b> This field is required if the product category, entity type, or entity code are not entered.
productCategoryFlg	Used to specify the product category flag to derive the details of the eligible active entities.	No
	<b>Note:</b> Entity is referred to market product, offer or bundle.	
division	Used to specify the division to derive the details of the eligible active entities which are associated with a particular division.	Yes(Conditional)
		<b>Note:</b> This field is required with product code, product category, entity type or entity code to extract the entities of the specific division.

Attribute Name	Attribute Description	Mandatory (Yes or No)
entityType	Used to indicate the entity type to derive the details of the eligible active entities.	Yes(Conditional)
		<b>Note:</b> This field is required if the entity code is entered.
		<b>Note:</b> This field is required if the product code, or product category are not entered.
entityCode	Used to specify the entity code to derive the details of the eligible active entities.	Yes(Conditional)
		<b>Note:</b> This field is required if the product code or product category are not entered.
processDate	Used to specify the date to derive the details of effective market products, offers, or bundles for that date.	Yes(Conditional)
		<b>Note:</b> If the date is not entered then it will display the default date from the system on which the enquiry is made.
accountId	Used to indicate the account for which you want to derive the details of the eligible active entities.	Yes(Conditional)
		<b>Note:</b> If this field is not entered then all active entity will be extract.
		<b>Note:</b> This field is required if you want to derive the details of eligible active entities for specific person or account.
acctldtype	Used to indicate the type of account identifier type for which you to derive the details of the eligible active entities.	No
acctIdentifierValue	Used to specify the value for the account identifier type for which you to derive the details of the eligible active entity.	Yes(Conditional)
		<b>Note:</b> This field is required if you want to derive the details of eligible active entities for specific person or account.
personId	Used to specify the person account for which you want to derive the details of eligible active market products, offers, or bundles.	Yes(Conditional)
		<b>Note:</b> This field is required if you want to derive the details of eligible active entities for specific person or account.
custldTypeCd	Used to indicate the customer ID type for which you want to derive the details of eligible active market products, offers, or bundles.	No

Attribute Name	Attribute Description	Mandatory (Yes or No)
perIdentifireVal	Used to specify the value of person identifier for which you want to derive the details of eligible active market products, offers, or bundles.	No
productLinkedEntity	Used to specify product linked entity(market product code) for which you want to derive the details of eligible active offers or bundles linked with that particular code.	No
linkedEntityCode	Used to specify code of the linked entity(market product code) for which you want to derive the details of eligible active offers or bundles linked with that particular code.	Yes(Conditional) <b>Note:</b> This field is required when you want to derive offer or bundle linked with the particular market product.
linkedEntityType	Used to indicate type of the linked entity(market product code) for which you want to derive the details of eligible active offer or bundle linked with that particular code.	Yes(Conditional) <b>Note:</b> This field is required when you want to derive offer or bundle linked with the particular market product.
eligibleParameter	Used to specify the eligibility parameter based on which you want to derive the details of eligible active market products, offers, or bundles.	Yes(Conditional) <b>Note:</b> If this field is not entered then system will take the eligibility details from the person or account.
priceParmCode	Used to specify the eligibility parameter code based on which you want to derive the details of eligible active market products, offers, or bundles.	Yes(Conditional) <b>Note:</b> If this field is not entered then system will take the eligibility details from the person or account.
priceParmVal	Used to specify the eligibility parameter value based on which you want to derive the details of eligible active market products, offers, or bundles.	Yes(Conditional) <b>Note:</b> If this field is not entered then system will take the eligibility details from the person or account.

The following table lists and describes the attributes which appear in the eligible active market products, offers, or bundles derivation response JSON format:

Attribute Name	Attribute Description
entityList	Displays the list of eligible market products, offers, or bundles.
entityCode	Displays the entity code.
entityType	Displays the entity type.
entityName	Displays the entity name.

Attribute Name	Attribute Description
entityStartDate	Displays the date from when the entity is effective.
entityEndDate	Displays the date till when the entity is effective.
entityCodeDescr	Displays the description of the entity.
termsAndCondition	Displays the terms and condition of the entity.
termAndConditionDesc	Displays the description of the terms and conditions of the entity.
status	Displays the status of the entity.
productList	Displays the list of the eligible products to which the requested entity belongs.
productCode	Displays the code of the eligible product to which the requested entity belongs.
productDescription	Displays the description of the eligible product to which the requested entity belongs.
productTypFlgDesc	Displays the description of the eligible product type flag to which the requested entity belongs.
productCategoryFlgDesc	Displays the description of the eligible product category flag to which the requested entity belongs.
productLinkedEntity	Displays the list of eligible market products, offers, and bundles.
linkedEntityStartDate	Displays the date from when the linked entity is effective.
linkedEntityEndDate	Displays the date till when the linked entity is effective.
linkedEntityCode	Displays the linked entity code for the requested entity code.
linkedEntityType	Displays the linked entity for the requested entity code.
	<b>Note:</b> It is applicable in case of offer and bundle.
EntityDivision	Displays the division to which the requested entity belongs.
divisionCode	Displays the division code to which the requested entity belongs.
eligibilityDetails	Indicates the name of group tag.
eligibilityStartDate	Displays the date from when the eligibility of the entity is effective.
eligibilityEndDate	Displays the date till when the eligibility of the entity is effective.
eligibilityDescription	Displays the description of the eligibility to which the requested entity belongs.
eligibilityRule	Indicates the name of group tag.
sequenceNumber	Indicates the sequence number of eligibility condition.
lhsPriceParmCd	Indicates the left side parameter code of the eligibility condition.
operator	Indicates the operator to evaluate the condition
rhsPriceParmCd	Indicates the right side parameter code of the eligibility condition.
rhsPriceParmVal	Indicates the right side parameter value of the eligibility condition.
lhsPriceParmCd1	Indicates the left side parameter code of the eligibility condition.
rhsPriceParmTypeFlg	Indicates the value of the right side flag.
trueFlag	Indicates the true condition.
falseFlag	Indicates the false condition.

<b>Attribute Name</b>	<b>Attribute Description</b>
insufficientFlag	Indicates the insufficient condition.
services	Indicates the name of group tag.
serviceName	Displays the service configured at the requested entity code.
mandatoryFlag	Indicates the mandatory or optional type of the services.
pricing	Indicates the name of group tag.
priority	Displays the priority in sequence of the price list of the entities.
priceListId	Displays the Price List ID.
priceListDescription	Displays the description of the price list.
priceListStartDate	Displays the date from when the price list of the entity is effective.
priceListEndDate	Displays the date till when the price list of the entity is effective.
noOfDays	Displays the validity of price list in number of days.
priceItemCode	Displays the price item code.
priceitemDescr	Displays the description of the price item.
priceAsgnId	Displays the price assignment ID.
validityFlag	Indicates the validity of the price item.
sourceEntityType	Displays the source entity type.
sourceEntityCode	Displays the source entity code.
priceListInfo	Displays the information of the price list.
priceComponent	Indicates the name of group tag.
priceCompId	Displays the price component ID.
pricecomptier	Indicates the name of group tag.
priceCompSequenceNo	Displays the sequence number of the price component.
priceItemParmGroupID	Displays the parameter group ID of the price item.
toVal	Indicates the tiering to value of the price item.
fromVal	Indicates the tiering from value of the price item.
timeOfUse	Indicates the tiering time of use.
priceItemCode	Displays the price item code.
priceCriteria	Displays the price criteria of the price item.
priceCompId	Displays the price component ID.
tieSeqNum	Indicates the tiering sequence number.
version	Displays the version number.
priceComponentDescription	Displays the description of the price component.
valueAmt	Displays the value amount of the price component.
priceComponentDisplay	Displays the price component.

Attribute Name	Attribute Description
rcMapId	Displays the rate component map ID.
tieredFlag	Indicates the tire flag.
priceCompSequenceNo	Displays the sequence of the price component.
messageCategory	Indicates the category of the message.
messageNumber	Indicates the number of the message.
messageText	Displays the message.
longDescription	Displays the long description.
inquiryTypeFlag	Displays the inquiry type flag.  <b>Note:</b> If the inquiry type flag value is <b>SMRY</b> then service will provide details of eligible entities without price component and if the inquiry type flag value is <b>DETL</b> then service will provide details of eligible entities with price component

## Sample Eligible Offer Derivation Request and Response in the JSON Format

Using the below example, you can derive eligible offers for the **2406432705** account which are processed on **2022-01-11**.

### Sample Eligible Offer Request in the JSON Format

```

{
  "C1_GETELIGIBLEPROD":
  {
    "productCode": "LOAN_001",
    "productCategoryFlg": "",
    "division": "IND",
    "entityType": "OFFR",

## Sample Eligible Bundle Derivation Request and Response in the JSON Format

Using the below example, you can derive eligible bundles of the **2406432705** account which is processed on date 2022-01-11.

### Sample Eligible Bundle Request in the JSON Format

```

{
  "C1_GETELIGIBLEPROD":
  {
    "productCode": "LOAN_001",
    "productCategoryFlg": "",
    "division": "IND",
    "entityType": "BNDL",
  }
}

```

```

    "entityCode": "CHECKBUND_003",
    "processDate": "2022-01-11",
    "accountId": "",
    "acctIdtype": "",
    "acctIdentifierValue": "",
    "personId": "",
    "custIdTypeCd": "",
    "perIdentifireVal": "",
    "productLinkedEntity":
    {
      "linkedEntityCode": "CHECKMP_001",
      "linkedEntityType": "MP",
    }
    "eligibleParameter":
    {
      "priceParmCode": "",
      "priceParmVal": "",
    }
  }
}

```

### **Sample Eligible Bundle Response in the JSON Format**

```

{

**C1-GetProdDetail Business Service**

The **C1-GetProdDetail** business service enables you to view the details of an active market product, offer, or bundle for the person or account which is effective on the processing date. You can call this business service from an external system through an inbound web service. You can send the request in XML or JSON format through inbound web service in Oracle Revenue Management and Billing.

If you want to send the request in the XML and/or JSON format, you need to ensure that you create a REST based inbound web service in Oracle Revenue Management and Billing. However, if you want to send the request in the XML format, you can create a SOAP or REST based inbound web service in Oracle Revenue Management and Billing.

You can extract the data in the following template:

- **Summary:** Used to extract the details of the market product, offer, and/or bundle without pricing.
- **Detail:** Used to extract the details of the market product, offer, and/or bundle with pricing.

To search for viewing the details active market product, offer, or bundle for the person or account, provide the following input parameters:

- Entity Code
- Entity Type
- Person account

**Note:** Entity is referred to market product, offer or bundle.

## Market Product, Offer, or Bundle View Request - Tags in XML Format

**Note:** We recommend you to refer the topics [Market Product, Offer, or Bundle View Request in the XML Format](#) on page 3517 and [Market Product, Offer, or Bundle View Response in the XML Format](#) on page 3518 in parallel while understanding the below mentioned tags. This will help you to understand how the tags are nested in the XML format.

Before calling the **C1-GetProdDetail** business service through an inbound web service, you need to ensure that the active market products, offers, or bundles view request contains the following tags:

Tag Name	Tag Description	Mandatory (Yes or No)
entityCode	Used to specify the entity code to get details of the active entity.	Yes
	<b>Note:</b> Entity is referred to market product, offer or bundle.	
entityType	Used to indicate the entity type to get details of the active entity.	Yes
	<b>Note:</b> Entity is referred to market product, offer or bundle.	
processDate	Used to specify the date to get the effective market product, offer, or bundle for that date.	Yes(Conditional)
		<b>Note:</b> If the date is not entered then it will display the default date from the system on which the enquiry is made.
inquiryTypeFlag	Used to indicate whether you want to view the basic details without price components or the complete details with price components of the entity. The valid values are: <ul style="list-style-type: none"> <li>Detail (DETL) - Used to indicate whether you want to view the complete details with price components of the entity.</li> <li>Summary (SMRY) - Used to indicate whether you want to view the basic details without price components of the product.</li> </ul>	Yes(Conditional)
		<b>Note:</b> The default value is <b>SMRY</b> .

Tag Name	Tag Description	Mandatory (Yes or No)
division	Used to indicate the division to which the entity belongs.	Yes(Conditional)
		<b>Note:</b> This field is required with product code, product category, entity type or entity code to extract the entity of the specific division.

The following table lists and describes the tags which appear in the view active market products, offers, or bundles derivation response XML format:

Tag Name	Tag Description
entityName	Displays the entity name.
entityStartDate	Displays the date from when the entity is effective.
entityEndDate	Displays the date till when the entity is effective.
termsAndCondition	Displays the terms and condition of the entity.
status	Displays the status of the entity.
termsAndCondDescr	Displays the description of the terms and conditions of the entity.
messageCategory	Indicates the category of the message.
messageNumber	Indicates the number of the message.
messageText	Displays the message.
longDescription	Displays the long description.
productlist	Displays the list of the eligible product to which the requested entity belongs.
productCode	Used to display the code of the parent product.
productName	Used to display the parent product.
prodTypFlg	Displays the code of the eligible product to which the requested entity belongs.
productCategoryFlgDes	Displays the description of the eligible product category flag to which the requested entity belongs.
EntityDivision	Used to indicate the division of the requested entity.
divisionCode	Displays the division to which the requested entity belongs.
productLinkedEntity	Displays the list of eligible market product, offer, and bundle.
linkedEntityCode	Displays the linked entity code for the requested entity code.
linkedEntityName	Displays the linked entity for the requested entity code.
linkedEntityType	Displays the linked entity type for the requested entity code.
eligibilityDetails	Indicates the name of group tag.
eligibilityDescription	Displays the description of the eligibility to which the requested entity belongs.
eligibilityStartDate	Displays the date from when the eligibility of the entity is effective.
eligibilityEndDate	Displays the date till when the eligibility of the entity is effective.

<b>Tag Name</b>	<b>Tag Description</b>
eligibilityRule	This is group tag under the eligibility details.
rhsPriceParmCd	Indicates the right side parameter code of the eligibility condition.
rhsPriceParmVal	Indicates the right side parameter value of the eligibility condition.
lhsPriceParmCd	Indicates the left side parameter code of the eligibility condition.
rhsPriceParmTypeFlg	Indicates the value of the right side flag.
trueFlag	Indicates the true condition.
trueFlagDescr	Displays the description for the true flag condition.
falseFlag	Indicates the false condition.
falseFlagDescr	Displays the description for the false flag condition.
insufficientFlag	Indicates the insufficient condition.
insufficientFlagDescr	Displays the description for the insufficient flag condition.
eligibilityRuleFlg	Indicates the eligibility rule flag condition.
eligibilityDescr	Displays the description of the eligibility criteria for the input entity.
operator	Indicates the operator to evaluate the condition.
priceParmCode	Displays the price parameter code.
sequenceNumber	Displays the sequence number of the eligibility condition.
pricing	Displays the price of the requested entity.
priceListId	Displays the price list ID.
priceListDescription	Displays the description of the Price List.
priority	Displays the priority in sequence of the price list of the entity.
validityFlag	Indicates the validity of the price item.
noOfDays	Displays the validity of price list in number of days.
priceItemCode	Displays the price item code.
priceitemCodeDescr	Displays the description of the price item.
priceAsgnId	Displays the price assignment ID.
priceListStartDate	Displays the date from when the price list of the entity is effective.
priceListEndDate	Displays the date till when the price list of the entity is effective.
priceComponent	Indicates the name of group tag.
priceCompId	Displays the price component ID.
priceCompDescr	Displays the description of the price component.
valueAmt	Displays the value amount of the price component.
tieredFlag	Indicates the tire flag.
pricecomptier	Indicates the name of group tag.
priceItemParmGroupId	Displays the parameter group ID of the price item.

Tag Name	Tag Description
toVal	Indicates the tiering to value of the price item.
fromVal	Indicates the tiering from value of the price item.
timeOfUse	Indicates the tiering time of use.
priceCompPriceItem	Displays the price component of the price item.
priceCriteria	Displays the price criteria of the price item.
priceCompTierId	Displays the price component tier ID.
tieringSeqNum	Indicates the tiering sequence number.
parmString	Indicates the parameter string of the price item.

## Market Product, Offer, or Bundle View Request and Response - Attribute/Value Pairs in JSON Format

**Note:** We recommend you to refer the topics [Market Product, Offer, or Bundle View Request in the JSON Format](#) on page 3611 and [Market Product, Offer, or Bundle View Response in the JSON Format](#) on page 3612 in parallel while understanding the below mentioned tags. This will help you to understand how the attribute/value pairs structured in the JSON format.

Before calling the **C1-GetProdDetail** business service through an inbound web service, you need to ensure that the active market products, offers, or bundles view request contains the following attributes:

Attribute Name	Attribute Description	Mandatory (Yes or No)
entityCode	Used to specify the entity code to get the active entity.	Yes
	<b>Note:</b> Entity is referred to market product, offer or bundle.	
entityType	Used to indicate the entity type to get the active entity.	Yes
processDate	Used to specify the date to get the effective market product, offer, or bundle for that date.	Yes(Conditional)
		<b>Note:</b> If the date is not entered then it will display the default date from the system on which the enquiry is made.
inquiryTypeFlag	Used to indicate whether you want to view the basic details without price components or the complete details with price components of the entity. The valid values are: <ul style="list-style-type: none"> <li>Detail (DETL) - Used to indicate whether you want to view the complete details with price components of the entity.</li> <li>Summary (SMRY) - Used to indicate whether you want to view the basic details without price components of the entity.</li> </ul>	Yes(Conditional)
		<b>Note:</b> The default is SMRY.
division	Used to indicate the division to which the entity belongs.	Yes(Conditional)
		<b>Note:</b> This field is required with product code, product category, entity type or entity code to extract the entity of the specific division.

The following table lists and describes the attributes which appear in the view active market products, offers, or bundles derivation response JSON format:

Attribute Name	Attribute Description
entityName	Displays the entity name.

<b>Attribute Name</b>	<b>Attribute Description</b>
entityStartDate	Displays the date from when the entity is effective.
entityEndDate	Displays the date till when the entity is effective.
termsAndCondition	Displays the terms and condition of the entity.
status	Displays the status of the entity.
termsAndCondndescri	Displays the description of the terms and conditions of the entity.
messageCategory	Indicates the category of the message.
messageNumber	Indicates the number of the message.
messageText	Displays the message.
longDescription	Displays the long description.
productlist	Displays the list of the eligible product to which the requested entity belongs.
productCode	Used to display the code of the parent product.
productName	Used to display the parent product.
prodTypFlg	Displays the code of the eligible product to which the requested entity belongs.
productCategoryFlgDes	Displays the description of the eligible product category flag to which the requested entity belongs.
EntityDivision	Used to indicate the division of the requested entity.
divisionCode	Displays the division to which the requested entity belongs.
productLinkedEntity	Displays the list of eligible market product, offer, and bundle.
linkedEntityCode	Displays the linked entity code for the requested entity code.
linkedEntityName	Displays the linked entity for the requested entity code.
linkedEntityType	Displays the linked entity type for the requested entity code.
eligibilityDetails	Indicates the name of group tag.
eligibilityDescription	Displays the description of the eligibility to which the requested entity belongs.
eligibilityStartDate	Displays the date from when the eligibility of the entity is effective.
eligibilityEndDate	Displays the date till when the eligibility of the entity is effective.
eligibilityRule	This is group tag under the eligibility details.
rhsPriceParmCd	Indicates the right side parameter code of the eligibility condition.
rhsPriceParmVal	Indicates the right side parameter value of the eligibility condition.
lhsPriceParmCd	Indicates the left side parameter code of the eligibility condition.
rhsPriceParmTypeFlg	Indicates the value of the right side flag.
trueFlag	Indicates the true condition.
trueFlagDescr	Displays the description for the true flag condition.
falseFlag	Indicates the false condition.
falseFlagDescr	Displays the description for the false flag condition.
insufficientFlag	Indicates the insufficient condition.

<b>Attribute Name</b>	<b>Attribute Description</b>
insufficientFlagDescr	Displays the description for the insufficient flag condition.
eligibilityRuleFlg	Indicates the eligibility rule flag condition.
eligibilityDescr	Displays the description of the eligibility criteria for the input entity.
operator	Indicates the operator to evaluate the condition.
priceParmCode	Displays the price parameter code.
sequenceNumber	Displays the sequence number of the eligibility condition.
pricing	Displays the price of the requested entity.
priceListId	Displays the price list ID.
priceListDescription	Displays the description of the Price List.
priority	Displays the priority in sequence of the price list of the entity.
validityFlag	Indicates the validity of the price item.
noOfDays	Displays the validity of price list in number of days.
priceItemCode	Displays the price item code.
priceitemCodeDescr	Displays the description of the price item.
priceAsgnId	Displays the price assignment ID.
priceListStartDate	Displays the date from when the price list of the entity is effective.
priceListEndDate	Displays the date till when the price list of the entity is effective.
priceComponent	Indicates the name of group tag.
priceCompId	Displays the price component ID.
priceCompDescr	Displays the description of the price component.
valueAmt	Displays the value amount of the price component.
tieredFlag	Indicates the tire flag.
pricecomptier	Indicates the name of group tag.
priceItemParmGroupID	Displays the parameter group ID of the price item.
toVal	Indicates the tiering to value of the price item.
fromVal	Indicates the tiering from value of the price item.
timeOfUse	Indicates the tiering time of use.
priceCompPriceItem	Displays the price component of the price item.
priceCriteria	Displays the price criteria of the price item.
priceCompTierId	Displays the price component tier ID.
tieringSeqNum	Indicates the tiering sequence number.
parmString	Indicates the parameter string of the price item.

## Sample Bundle View Request and Response in the JSON Format

Using the below example, you can view bundles which are processed on the date 2022-01-11.

### Sample Bundle View Request in the JSON Format

```
{
  "C1-GetProdDetail":
  {
    "entityCode": "CHECKBUND_003",
    "entityType": "BNDL",
    "processDate": "2022-02-11",
    "inquiryTypeFlag": "DETL",
    "division": "IND",
  }
}
```

### Sample Bundle View Response in the JSON Format

```
{
  "C1-GetProdDetail":
  {
    "entityCode": "CHECKBUND_003",
    "entityType": "BNDL",
    "processDate": "2022-02-11",
    "inquiryTypeFlag": "",
    "division": "IND",
  }
  "viewResponse":

## Sample Bundle View Summary Request and Response in the JSON Format

Using the below example, you can view summary of bundles which are processed on the date 2022-01-11.

### Sample Bundle View Summary Request in the JSON Format

```

{
  "C1-GetProdDetail":
  {
    "entityCode": "CHECKBUND_003",
    "entityType": "BNDL",
    "processDate": "2022-02-11",
    "inquiryTypeFlag": "SMRY",
    "division": "IND",
  }
}

```

### Sample Bundle View Summary Response in the JSON Format

```

{
  "C1-GetProdDetail":
  {
    "entityCode": "CHECKBUND_003",
    "entityType": "BNDL",
    "processDate": "2022-02-11",
    "inquiryTypeFlag": "SMRY",
  }
}

```

```

The **C1-CUSTACCSA** algorithm is invoked to create new person, account, and contract, if the person, account, and contract is not created while account enrollment with passing parameter values received for this service. This algorithm is attached at Division's algorithm. This algorithm do the following:

- Checks input service parameters which are required person such as person identifier type, person identifier type/value, account identifier, account identifier type/value, or division are not null. If the parameters are null the system send the error message.
- Checks whether the person id or person identifier type values exist in the system. If the values are exist in the system then it retrieve the person details or set the values to create the new person in the system. The values are:
  - Person Type
  - Primary Person Name Type
  - Person Name
  - Primary Person Identifier Type
  - Primary Person Identifier Type Value
  - Division Code
  - Date of Birth
  - Effective Date
  - Address Type
  - Address Line 1
  - Address Line 2
  - Address Line 3
  - Address Line 4
  - Phone
  - City
  - State
  - Zip Code
  - Country
  - Email
  - Characteristic Effective Date
  - Characteristic Type
  - Characteristic Value
- Get the required default values by fetching values configured at person defaulting template code passed as input to the algorithm. For example, Access Group
- Invoke the personDTO.new.entity() or person BO to create new person in the system.
- Create new account for person on successful person creation/retrieval.
- Get the required default values by fetching values configured at account defaulting template code passed as input to the algorithm.
- Sets required values to create new account in the system. The values are:
  - Customer Class - It can be fetched from account default template.
  - Access Group - It can be fetched from account default template.
  - Person ID - It can be used from retrieved or newly created person.

- Account Source - It can be fetched from account default template.
- Bill Route Type - It can be fetched from account default template. For example, Postal
- Account Category - It can be fetched from account default template. For example, Usage
- Relationship Type - It can be fetched from account default template. For example, Main Customer

The input values from service are:

- Setup Date - Account Opening Date
- Invoice Currency - Account Currency Code
- Account Closure Date - Closing date
- Account Closure Date - Closing date

**Note:** If the account closing date is provided then should not be less than Account Opening Date.

- Account Number Type code - Account Identifier Type
- Account Number - Account Identifier Value
- Division - Division Code
- Invokes the `accountDTO.new.entity()` or account BO to create new person in the system.
- On successful account creation, to retrieve the distinct contract types configured at price items associated with market product. The values for contract creation are:
  - Account ID
  - Division
  - Contract Type
  - Start Date
  - End Date

The soft parameter of the algorithm are:

- Person Defaulting Template - This parameter value is person defaulting template code. The parameter value is used to fetch default values required in the process of new person creation process.
- Account Defaulting Template - This parameter value is account defaulting template code. The parameter value is used to fetch default values required in the process of new account creation process.

This business service enables to edit the enrollment status and close/stop the enrollment by using action flag. The valid values of action flag are:

- Active
- Inactive
- Closed

The validation algorithm is executed before persisting the data using the business object. There are different validation for different action flag (Add, Edit, and Close) and different entities (Market Product, Offer and Bundle). The scenarios are:

If...	Then...
The entity type is Market Product and value of action flag is <b>Add</b>	<ul style="list-style-type: none"> <li>The market product should be in <b>Active</b> status while enrolling to the account. The account enrollment date should be within market product start date and end date.</li> <li>The division code of the respective market product should be defined in which the account is opened.</li> </ul>
The entity type is Market Product and value of action flag is <b>Edit</b>	
The entity type is Market Product and value of action flag is <b>Close</b>	<ul style="list-style-type: none"> <li>The system should not accept future date as account close date.</li> </ul>
The entity type is Offer and value of action flag is <b>Add/Edit</b>	<ul style="list-style-type: none"> <li>The account can be enrolled to only one active offer at a time.</li> <li>The offer should be active while enrolling to the account.</li> <li>The offer subscription date should be within offer start date and end date.</li> <li>The account can be enrolled to the offer only if the market product in which that particular offer is defined is enrolled to the account.</li> <li>If the enrollment status is either <b>Active</b> or <b>Inactive</b> for “Account ID + Offer Code” combination then the same account ID cannot be enrolled to that offer once again.</li> <li>If there is Active offer subscribed to the account then same account cannot enroll to the other offer.</li> <li>The division code of the respective offer should be defined in which the account is opened.</li> </ul>
The entity type is Offer and value of action flag is <b>Close</b>	<ul style="list-style-type: none"> <li>The system should not accept future date as account close date.</li> </ul>
The entity type is Bundle and value of action flag is <b>Add/Edit</b>	<ul style="list-style-type: none"> <li>The account can be enrolled to only one active bundle at a time.</li> <li>The bundle should be active while enrolling to the account.</li> <li>The bundle subscription date should be within bundle start date and end date.</li> <li>The account numbers which are enrolled to the bundle should belongs to the same person.</li> <li>The division code of the respective offer should be defined in which the account is opened.</li> <li>If there is Active bundle subscribed to the account then same account cannot enroll to the other bundle.</li> </ul>
The entity type is Bundle and value of action flag is <b>Close</b>	<ul style="list-style-type: none"> <li>The system should not accept future date as account close date.</li> </ul>

You can call this business service from an external system through an inbound web service. You can send the request in XML or JSON format through inbound web service in Oracle Revenue Management and Billing.

If you want to send the request in the XML and/or JSON format, you need to ensure that you create a REST based inbound web service in Oracle Revenue Management and Billing. However, if you want to send the request in the XML format, you can create a SOAP or REST based inbound web service in Oracle Revenue Management and Billing.

To search for viewing the details active market product, offer, or bundle for the person or account, provide the following input parameters:

- Person Detail
- Account Detail
- Market Product Detail
- Offer Detail
- Bundle Detail

## Market Product, Offer, or Bundle Enrollment Request and Response - Tags in XML Format

**Note:** We recommend you to refer the topics [Market Product, Offer, or Bundle Enrollment Request in the XML Format](#) on page 3695 and [Market Product, Offer, or Bundle Enrollment Response in the XML Format](#) on page 3697 in parallel while understanding the below mentioned tags. This will help you to understand how the tags are nested in the XML format.

Before calling the **C1PRDCTENRL** business service through an inbound web service, you need to ensure that the market product, offer, or bundle enrollment request contains the following tags:

Tag Name	Tag Description	Mandatory (Yes or No)
enrollment	Indicates the name of group tag which encapsulates the single enrollment request.	<p>No</p> <p><b>Note:</b> The market product should be enrolled to the account in the system before the offer or bundle is enrolled. The enrollment status for market product should be <b>Active</b> during enrollment and will change to <b>Closed</b> when action flag is pass as close.</p> <p><b>Note:</b> The market product, offer or bundle should be in <b>Active</b> status while enrolling to the account.</p> <p><b>Note:</b> When the service is called to enroll the account to offer / bundle subscription then offer / bundle subscription will created with the account which is already enrolled to market product.</p> <p><b>Note:</b> The enrollment start date of offer or bundle should be between start date and end date of the offer or bundle definition.</p> <p><b>Note:</b> If there is 'Active Offer or Bundle subscription' exists in the system then same account cannot be enrolled to other offer or bundle.</p> <p><b>Note:</b> Only one account can be enroll to one market product.</p> <p><b>Note:</b> The account can be enrolled to another offer if the existing offer enrollment is closed.</p> <p><b>Note:</b> The account can be enrolled to another bundle if the existing bundle enrollment is closed.</p> <p><b>Note:</b> Multiple accounts of the same person can be enrolled to the bundle. If multiple accounts of the person are enrolled to the bundle then bundle enrollment/ subscription date and enrollment characteristics will be same for all accounts which are enrolled/ subscribed to the bundle.</p> <p><b>Note:</b> The service will create new account if the account is not exist in the system while enrolling a market product to the person account.</p>

Tag Name	Tag Description	Mandatory (Yes or No)
enrollmentcharlist	Indicates the name of group tag.	No
characteristicValue	Used to specify the characteristic value.	Yes(Conditional) <b>Note:</b> This field is required if other characteristic value fields are not specified.
characteristicType	Used to indicate the characteristic type for characteristics.	Yes
effectiveDate	Used to specify the effective date for characteristics.	Yes

Tag Name	Tag Description	Mandatory (Yes or No)
actionFlag	<p>Used to indicate for which action service is called. This service is called to add, edit, or close the enrollment. The valid values are:</p> <ul style="list-style-type: none"> <li>• Add</li> <li>• Edit</li> <li>• Close</li> </ul> <p><b>Note:</b> In edit market product scenario, the account closing date should not be null and it should be greater than account opening date.</p> <p><b>Note:</b> In edit market product scenario, you can only edit account characteristics. You cannot edit the other details.</p> <p><b>Note:</b> In edit offer/bundle scenario, you can only modify the status from <b>Active</b> to <b>Inactive</b> or <b>Inactive</b> to <b>Active</b>.</p> <p><b>Note:</b> If service invokes <b>Close</b> account enrollment request to market product, then it will only close the enrollment to market product and not to offer or bundle.</p> <p><b>Note:</b> You should invoke another <b>Close</b> request to close enrollment to offer or bundle.</p> <p><b>Note:</b> In edit offer/bundle scenario, you can only modify the enrollment status from <b>Active</b> to <b>Inactive</b> or <b>Inactive</b> to <b>Active</b>.</p> <p><b>Note:</b> If service invokes <b>Close</b> account enrollment request to the market product, then it will only close the enrollment to market product and not to the offer or bundle. The system should invoke another close request to close account enrollment to offer or bundle.</p> <p><b>Note:</b> To stop or close enrollment the system should pass Action Flag value as <b>Close</b>, the Action Flag value is edit and enrollment is close then the system will throw an error.</p>	Yes
personDetails	Indicates the name of group tag.	No
personId	Used to indicate Person ID.	Yes(Conditional) <p><b>Note:</b> This field is required if person identifier type and value are not specified.</p>
accountdetailslist	Indicates the name of group tag.	No

Tag Name	Tag Description	Mandatory (Yes or No)
accountcharlist	Indicates the name of group tag.	No
characteristicValue2	Used to specify the characteristic value.	Yes(Conditional) <b>Note:</b> This field is required if other characteristic value fields are not specified.
characteristicType2	Used to specify the characteristic type for characteristics.	Yes
effectiveDate2	Used to specify the effective date for characteristics.	Yes
actionFlag2	Used to indicate for which action service is called. This service is called to add, edit, or close the enrollment. The valid values are: <ul style="list-style-type: none"> <li>• Add</li> <li>• Edit</li> <li>• Close</li> </ul> <b>Note:</b> In edit market product scenario, you can only edit account characteristics. You cannot edit the other details.	No

Tag Name	Tag Description	Mandatory (Yes or No)
enrollmentStatus	<p>Used to indicate status of enrollment/subscription.</p> <p>The valid values are:</p> <ul style="list-style-type: none"> <li>• Active</li> <li>• Inactive</li> <li>• Closed</li> </ul>	Yes(Conditional)
		<p><b>Note:</b> You can edit enrollment status only if the entity type is either offer or bundle.</p>
		<p><b>Note:</b> The Market Product is set to <b>Active</b> during the enrollment and remains the same even after the enrollment end date is stamped. The status will change to <b>Closed</b> only when the action flag passes the <b>Close</b> value.</p>
		<p><b>Note:</b></p> <ul style="list-style-type: none"> <li>• The account can be enrolled to the offer if the status of the existing offer enrollment is <b>Closed</b>.</li> <li>• The account cannot be enrolled to another offer if <b>Active</b> offer enrollment already exists in the system.</li> </ul>
		<p><b>Note:</b> You cannot enroll to another bundle if one bundle enrollment is already exists for an account in the system. It can be enrolled if the status of existing bundle is <b>Closed</b>.</p>
closingDate	<p>Used to indicate the account close date.</p>	Yes(Conditional)
		<p><b>Note:</b> This will be considered as account enrollment end date.</p>
		<p><b>Note:</b> If the close date is specified, then the close date should be not be less than account opening date.</p>
accountId	Used to indicate the account ID.	Yes(Conditional)
		<p><b>Note:</b> This field is required if the entity type is market product.</p>
currency	Used to indicate the currency code of account.	Yes

Tag Name	Tag Description	Mandatory (Yes or No)
setUpDate	Used to specify the date which is used as account enrollment date and new account setup date.	Yes
	<b>Note:</b> This date should not be the future date.	
division	Used to indicate the division to which the account belongs.	Yes
accountNumber	Used to indicate the bank account number.	Yes(Conditional)
		<b>Note:</b> This field is required if the account identifier type is specified.
accountIdentifierType	Used to indicate the account identifier type.	Yes(Conditional)
		<b>Note:</b> This field is required if the Account ID is not specified.
personcharlist	Indicates the name of group tag.	No
characteristicValue3	Used to specify the characteristic value.	Yes(Conditional)
		<b>Note:</b> This field is required if other characteristic value fields are not specified.
characteristicType3	Used to specify the characteristic type for characteristics.	Yes
effectiveDate3	Used to specify the effective date for characteristics.	Yes
actionFlag3		
emailAddress	Used to specify email address of the person.	Yes(Conditional)
		<b>Note:</b> This field is required for new customer.
country	Used to indicate the country where person belongs to.	Yes(Conditional)
		<b>Note:</b> This field is required for new customer.
state	Used to indicate the state where person belongs to.	Yes(Conditional)
		<b>Note:</b> This field is required for new customer.
city	Used to indicate the city where person belongs to.	Yes(Conditional)
		<b>Note:</b> This field is required for new customer.

Tag Name	Tag Description	Mandatory (Yes or No)
address4	Used to indicate address line.	Yes(Conditional)
		<b>Note:</b> This field is required for new customer.
address3	Used to indicate address line.	Yes(Conditional)
		<b>Note:</b> This field is required for new customer.
address2	Used to indicate address line.	Yes(Conditional)
		<b>Note:</b> This field is required for new customer.
address1	Used to indicate address line.	Yes(Conditional)
		<b>Note:</b> This field is required for new customer.
addressTypeFlg	Used to indicate type of address.	Yes(Conditional)
		<b>Note:</b> This field is required for new customer.
creationDateTime	Used to specify the date and time when the person exists in the system.	Yes(Conditional)
		<b>Note:</b> This field is required for new customer.
birthDate	Used to indicate the date of birth of the person.	Yes(Conditional)
		<b>Note:</b> This field is required for new customer.
division2	Used to indicate the division to which the person account belongs.	No
personIdNumber	Used to indicate the person ID.	Yes(Conditional)
		<b>Note:</b> This field is required if the person identifier type and value is not specified.
personIdentifiers	Used to indicate the person identifier.	Yes(Conditional)
		<b>Note:</b> This field is required either person type or ID.
personNames	Used to specify the person name whose account you want to create.	Yes(Conditional)
		<b>Note:</b> This field is required for new customer.

Tag Name	Tag Description	Mandatory (Yes or No)
nameType	Used to indicate the person name type of the person name.	Yes(Conditional) <b>Note:</b> This field is required for new customer.
personOrBusiness		
startDate	Used to indicate offer/bundle enrollment start date. This date should not be back date. <b>Note:</b> It is applicable only to the offer/bundle .	Yes(Conditional) <b>Note:</b> This field is required if action flag is set to add and entity type is offer or bundle. <b>Note:</b> If the date is not specified then the field is set to the system date.
comments	Used to specify additional comments while enrollment.	No
entityCode	Used to indicate the entity code. <b>Note:</b> Entity is referred to market product, offer or bundle.	Yes
entityType	Used to indicate the type of entity for which enrollment is done.	Yes
enrollmentAction		

The following table lists and describes the tags which appear in the eligible active market products, offers, or bundles derivation response XML format:

Tag Name	Tag Description
error	Indicates the name of group tag.
errorDescription	Displays the error description.
errorMsgText	Displays the error message.
messageNumber	Displays the number of the message.
erroCategory	Displays the category of the error.
enrollResponse	Indicates the name of group tag which encloses the complete response of the service.
messageText	Displays the success message of the enrollment.
productEnrollmentId	Displays the product enrollment ID.

## Market Product, Offer, or Bundle Enrollment Request and Response - Attribute/Value Pairs in JSON Format

**Note:** We recommend you to refer the topics [Market Product, Offer, or Bundle Enrollment Request in the JSON Format](#) on page 3719 and [Market Product, Offer, or Bundle Enrollment Response in the JSON Format](#) on page 3721 in parallel while understanding the below mentioned attributes/values. This will help you to understand how the attributes/values are structured in the JSON format.

Before calling the **C1PRDCTENRL** business service through an inbound web service, you need to ensure that the market product, offer, or bundle enrollment request contains the following attribute:

Attribute Name	Attribute Description	Mandatory (Yes or No)
enrollment	Indicates the name of group attribute which encapsulates the single enrollment request.	<p data-bbox="1092 212 1463 243">No</p> <p data-bbox="1092 264 1463 390"><b>Note:</b> The market product should be enroll to the account in the system before the offer or bundle is enrolled.</p> <p data-bbox="1092 432 1463 516"><b>Note:</b> The market product, offer or bundle should be in active status while enrolling to the account.</p> <p data-bbox="1092 558 1463 684"><b>Note:</b> The enrollment start date of offer or bundle should be between start date and end date of the offer or bundle definition.</p> <p data-bbox="1092 726 1463 884"><b>Note:</b> If there is 'Active Offer or Bundle subscription' exists in the system then same account cannot be enrolled to other offer or bundle.</p> <p data-bbox="1092 926 1463 1010"><b>Note:</b> Only one account can be enroll to one market product, offer, or bundle.</p> <p data-bbox="1092 1052 1463 1335"><b>Note:</b> Multiple accounts of the same person can be enrolled to the bundle. If multiple accounts of the person are enrolled to the bundle then bundle enrollment/ subscription date and enrollment characteristics will be same for all accounts which are enrolled/ subscribed to the bundle.</p> <p data-bbox="1092 1377 1463 1535"><b>Note:</b> The service will create new account if the account is not exist in the system while enrolling a market product to the person account.</p> <p data-bbox="1092 1577 1463 1734"><b>Note:</b> The service will create new person if the person is not exist in the system while enrolling a market product to the person account.</p> <p data-bbox="1092 1776 1463 1934"><b>Note:</b> The service will find contract types which are assigned to price items of the market product and creates the contract for each contract type.</p>

Attribute Name	Attribute Description	Mandatory (Yes or No)
enrollmentcharlist	Indicates the name of group attribute.	No
characteristicValue	Used to specify the characteristic value.	Yes(Conditional) <b>Note:</b> This field is required if other characteristic value fields are not specified.
characteristicType	Used to indicate the characteristic type for characteristics.	Yes
effectiveDate	Used to specify the effective date for characteristics.	Yes
actionFlag	Used to indicate for which action service is called. This service is called to add, edit, or close the enrollment. The valid values are: <ul style="list-style-type: none"> <li>• Add</li> <li>• Edit</li> <li>• Close</li> </ul> <b>Note:</b> In edit market product scenario, the account closing date should not be null and it should be greater than account opening date.  <b>Note:</b> In edit market product scenario, you can only edit account characteristics. You cannot edit the other details.  <b>Note:</b> In edit offer/bundle scenario, you can only modify the status from <b>Active</b> to <b>Inactive</b> or <b>Inactive</b> to <b>Active</b> .  <b>Note:</b> If service invokes <b>Close</b> account enrollment request to market product, then it will only close the enrollment to market product and not to offer or bundle.  <b>Note:</b> You should invoke another <b>Close</b> request to close enrollment to offer or bundle.	Yes
personDetails	Indicates the name of group attribute.	No
personId	Used to indicate Person ID.	Yes(Conditional) <b>Note:</b> This field is required if person identifier type and value are not specified.
accountdetailslist	Indicates the name of group attribute.	No
accountcharlist	Indicates the name of group attribute.	No

Attribute Name	Attribute Description	Mandatory (Yes or No)
characteristicValue2	Used to specify the characteristic value.	Yes(Conditional) <b>Note:</b> This field is required if other characteristic value fields are not specified.
characteristicType2	Used to specify the characteristic type for characteristics.	Yes
effectiveDate2	Used to specify the effective date for characteristics.	Yes
actionFlag2	Used to indicate for which action service is called. This service is called to add, edit, or close the enrollment. The valid values are: <ul style="list-style-type: none"> <li>• Add</li> <li>• Edit</li> <li>• Close</li> </ul> <b>Note:</b> In edit market product scenario, you can only edit account characteristics. You cannot edit the other details.  <b>Note:</b> In edit offer/bundle scenario, you can only modify the status from <b>Active</b> to <b>Inactive</b> or <b>Inactive</b> to <b>Active</b> .  <b>Note:</b> If service invokes <b>Close</b> account enrollment request to the market product, then it will only close the enrollment to market product and not to the offer or bundle.  <b>Note:</b> You should invoke another <b>Close</b> request to close enrollment to offer or bundle.	No

Attribute Name	Attribute Description	Mandatory (Yes or No)
enrollmentStatus	<p>Used to indicate status of enrollment/subscription.</p> <p>The valid values are:</p> <ul style="list-style-type: none"> <li>• Active</li> <li>• Inactive</li> <li>• Closed</li> </ul>	Yes(Conditional)
		<p><b>Note:</b> You can edit enrollment status only if the entity type is either offer or bundle.</p>
		<p><b>Note:</b> The Market Product is set to <b>Active</b> during the enrollment and remains the same even after the enrollment end date is stamped. The status will change to <b>Closed</b> only when the action flag passes the <b>Close</b> value.</p>
		<p><b>Note:</b></p> <ul style="list-style-type: none"> <li>• The account can be enrolled to the offer if the status of the existing offer enrollment is <b>Closed</b>.</li> <li>• The account cannot be enrolled to another offer if <b>Active</b> offer enrollment already exists in the system.</li> </ul>
		<p><b>Note:</b> You cannot enroll to another bundle if one bundle enrollment is already exists for an account in the system. It can be enrolled if the status of existing bundle is <b>Closed</b>.</p>
closingDate	Used to indicate the account close date.	Yes(Conditional)
	<p><b>Note:</b> This will be considered as account enrollment end date.</p> <p><b>Note:</b> If the close date is specified, then the close date should be not be less than account opening date.</p>	<p><b>Note:</b> This field is required if the entity type is market product.</p>
accountId	Used to indicate the account ID.	<p>Yes(Conditional)</p> <p><b>Note:</b> This field is required if the entity type is market product.</p>

Attribute Name	Attribute Description	Mandatory (Yes or No)
currency	Used to indicate the currency code of account.	Yes
setUpDate	Used to specify the date which is used as account enrollment date and new account setup date.	Yes
	<b>Note:</b> This date should not be the future date.	
division	Used to indicate the division to which the account belongs.	Yes
accountNumber	Used to indicate the bank account number.	Yes(Conditional)
		<b>Note:</b> This field is required if the account identifier type is specified.
accountIdentifierType	Used to indicate the account identifier type.	Yes(Conditional)
		<b>Note:</b> This field is required if the Account ID is not specified.
personcharlist	Indicates the name of group attribute.	No
characteristicValue3	Used to specify the characteristic value.	Yes(Conditional)
		<b>Note:</b> This field is required if other characteristic value fields are not specified.
characteristicType3	Used to specify the characteristic type for characteristics.	Yes
effectiveDate3	Used to specify the effective date for characteristics.	Yes
actionFlag3		
emailAddress	Used to specify email address of the person.	Yes(Conditional)
		<b>Note:</b> This field is required for new customer.
country	Used to indicate the country where person belongs to.	Yes(Conditional)
		<b>Note:</b> This field is required for new customer.
state	Used to indicate the state where person belongs to.	Yes(Conditional)
		<b>Note:</b> This field is required for new customer.
city	Used to indicate the city where person belongs to.	Yes(Conditional)
		<b>Note:</b> This field is required for new customer.

Attribute Name	Attribute Description	Mandatory (Yes or No)
address4	Used to indicate address line.	Yes(Conditional)
		<b>Note:</b> This field is required for new customer.
address3	Used to indicate address line.	Yes(Conditional)
		<b>Note:</b> This field is required for new customer.
address2	Used to indicate address line.	Yes(Conditional)
		<b>Note:</b> This field is required for new customer.
address1	Used to indicate address line.	Yes(Conditional)
		<b>Note:</b> This field is required for new customer.
addressTypeFlg	Used to indicate type of address.	Yes(Conditional)
		<b>Note:</b> This field is required for new customer.
creationDateTime	Used to specify the date and time when the person exists in the system.	Yes(Conditional)
		<b>Note:</b> This field is required for new customer.
birthDate	Used to indicate the date of birth of the person.	Yes(Conditional)
		<b>Note:</b> This field is required for new customer.
division2	Used to indicate the division to which the person account belongs.	No
personIdNumber	Used to indicate the person ID.	Yes(Conditional)
		<b>Note:</b> This field is required if the person identifier type and value is not specified.
personIdentifiers	Used to indicate the person identifier type and person ID.	Yes(Conditional)
		<b>Note:</b> This field is required either person type or ID.
personNames	Used to specify the person name whose account you want to create.	Yes(Conditional)
		<b>Note:</b> This field is required for new customer.

Attribute Name	Attribute Description	Mandatory (Yes or No)
nameType	Used to indicate the person name type of the person name.	Yes(Conditional) <b>Note:</b> This field is required for new customer.
personOrBusiness		
startDate	Used to indicate offer/bundle enrollment start date. This date should not be back date. <b>Note:</b> It is applicable only to the offer/bundle .	Yes(Conditional) <b>Note:</b> This field is required if action flag is set to add and entity type is offer or bundle. <b>Note:</b> If the date is not specified then the field is set to the system date.
comments	Used to specify additional comments while enrollment.	No
entityCode	Used to indicate the entity code. <b>Note:</b> Entity is referred to market product, offer or bundle.	Yes
entityType	Used to indicate the type of entity for which enrollment is done.	Yes
enrollmentAction		

The following table lists and describes the attribute which appear in the eligible active market products, offers, or bundles derivation response JSON format:

Attribute Name	Attribute Description
error	Indicates the name of group attribute.
errorDescription	Displays the error description.
errorMsgText	Displays the error message.
messageNumber	Displays the number of the message.
erroCategory	Displays the category of the error.
enrollResponse	Indicates the name of group attribute which encloses the complete response of the service.
messageText	Displays the success message of the enrollment.
productEnrollmentId	Displays the product enrollment ID.

## Most Commonly Used Tasks

---

**Topics:**

- [Changing the Layout](#)

This section lists some of the common tasks that are performed while using various functionality in the application.

## Changing the Layout

---

You can change the layout of the zone by:

- [Removing a Column from the Zone](#) on page 3748
- [Adding a Column to the Zone](#) on page 3748
- [Rearranging Columns in the Zone](#) on page 3748

### Adding a Column to the Zone

Once you have removed the columns from the zone, you can add them back to the zone. To add a column to the zone:

1. Click the **Column Configuration** () icon in the upper right corner of the zone.

A panel appears at the bottom of the zone with a list of column names.

**Note:** The column names with the white background in the panel are currently not displayed in the zone.

2. Drag and drop the column name from the panel to the location where you want to add the column in the zone.  
The white background of the column name in the panel changes to the grey background indicating that the column is currently displayed in the zone.
3. If you want to add another column name from the panel to the zone, repeat the second step. Click the **Refresh** button, data will be displayed to the columns added in the zone.

#### Related Topics

For more information on...	See...
How to change the layout of the zone	<a href="#">Changing the Layout</a> on page 3748

### Rearranging Columns in the Zone

You can change the order in which the columns are displayed in the zone. To change the position of a column in the zone:

1. Click the column name whose position you want to change in the zone.
2. Drag and drop the column name between the columns where you want to place the selected column.

The position of the column changes in the zone.

#### Related Topics

For more information on...	See...
How to change the layout of the zone	<a href="#">Changing the Layout</a> on page 3748

### Removing a Column from the Zone

To remove a column from the zone:

Click the **Delete** () icon corresponding to the column name that you want to remove from the zone.

The column is removed from the zone and is currently displayed with white background in the panel.

**Note:** Alternatively you can remove the column from the zone by clicking the Delete (🗑️) icon corresponding to the column name in the panel.

# Appendix

# B

---

## Administration

---

**Topics:**

- [UI Maps](#)
- [Feature Configurations](#)

This section lists some of the administrative tasks.

## UI Maps

---

This section explains how to create the UI maps for viewing and modifying data of the business objects within the approval workflow group.

### Creating Display UI Map for an Approval Workflow Group

The system provides you with the ability to automatically generate a Display UI map, and associate it with the approval workflow group. Alternatively, you can create a Display UI map manually, and attach it to the approval workflow group.

#### **Procedure**

To create a Display UI map manually:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **U** and then click **UI Map**.  
A sub-menu appears.
3. Click the **Search** option from the **UI Map** sub-menu.  
The **UI Map** screen appears.
4. In the **Main** tab, enter the name and description of the Display UI map.

**Note:** The system uses the CM\_<Approval Workflow Group Code>\_AppTxn\_Display naming convention while automatically generating a Display UI map. Therefore, do not use this naming convention while creating a Display UI map manually.

5. Select **Complete HTML Document** from the **UI Map Type** list.
6. Click the **Schema** tab.  
The **Schema** tab appears.
7. Add the following schema in the **Scheme Editor** zone:

```
<schema>
  <<Business Object Name> type="group">
    <includeBO name="<Business Object Name>" />
  </<Business Object Name>>
</schema>
```

In the above schema, you must replace <Business Object Name> with the name of the business object. For example, if you want to create a Display UI map for account, you must use the following schema:

```
<schema>
  <account type="group">
    <includeBO name="Account" />
  </account>
</schema>
```

8. Click the **Save** link in the **Actions/Navigation** area.  
The **Display Only** and **Input Map** buttons are enabled on the dashboard.
9. Click the **Display Only** button.  
The HTML code is generated in the **HTML Editor** zone.
10. Click the **Save** link in the **Actions/Navigation** area.  
The changes are saved.

**Related Topics**

For more information on...	See...
How to define an approval workflow group	<a href="#">Defining an Approval Workflow Group</a> on page 850
How to edit an approval workflow group	<a href="#">Editing an Approval Workflow Group</a> on page 860

**Creating Input UI Map for an Approval Workflow Group**

The system provides you with the ability to automatically generate an Input UI map, and associate it with the approval workflow group. Alternatively, you can create an Input UI map manually, and attach it to the approval workflow group.

**Procedure**

To create an Input UI map manually:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **U** and then click **UI Map**.  
A sub-menu appears.
3. Click the **Search** option from the **UI Map** sub-menu.  
The **UI Map** screen appears.
4. In the **Main** tab, enter the name and description of the Input UI map.

**Note:** The system uses the CM\_<Approval Workflow Group Code>\_AppTxn\_Input naming convention while automatically generating an Input UI map. Therefore, do not use this naming convention while creating an Input UI map manually.

5. Select **Complete HTML Document** from the **UI Map Type** list.
6. Click the **Schema** tab.  
The **Schema** tab appears.
7. Add the following schema in the **Scheme Editor** zone:

```
<schema>
  <approvalTransactionId/>
  <action/>
  <<Business Object Name> type="group">
    <includeBO name="<Business Object Name>" />
  </<Business Object Name>>
</schema>
```

In the above schema, you must replace <Business Object Name> with the name of the business object. For example, if you want to create an Input UI map for account, you must use the following schema:

```
<schema>
  <approvalTransactionId/>
  <action/>
  <account type="group">
    <includeBO name="Account" />
  </account>
</schema>
```

The <approvalTransactionId/> tag is used in the schema to retrieve the approval transaction ID of the respective business object. The <action/> tag is used in the schema to retrieve the action performed by the submitter.

- Click the **Save** link in the **Actions/Navigation** area.

The **Display Only** and **Input Map** buttons are enabled on the dashboard.

- Click the **Input Map** button.

The HTML code is generated in the **HTML Editor** zone.

- Add the following tag in the head tag:

```
<script language="javascript" type="text/javascript" src="code/
approvalWorkflow.js"></script>
```

- Add the text highlighted in bold within the tag as shown below:

```
<td>
<input onClick="performAction('<Approval Workflow Group Code>');"
oraMdLabel="SAVE_BTN_LBL" class="oraButton" type="button">
<input onClick="oraSubmitMap('CANCEL', false);" oraMdLabel="CANCEL_LBL"
class="oraButton" type="button">
</td>
```

In the above HTML code, you must replace <Approval Workflow Group Code> with the code of the approval workflow group for which you are creating a UI map.

- Click the **Save** link in the **Actions/Navigation** area.

The changes are saved.

## **Feature Configurations**

---

This section explains how to set various feature configurations which are required for implementing various features in Oracle Revenue Management and Billing.

### **Setting the C1\_ACCTINFO Feature Configuration**

#### **Prerequisites**

To set the **C1\_ACCTINFO** feature configuration, you should have:

- Account Type characteristic type defined in the application (where the characteristic entity is set to Account)
- Invoice Group Account characteristic type defined in the application (where the characteristic entity is set to Account)

#### **Procedure**

To set the **C1\_ACCTINFO** feature configuration:

- Click the **Admin** link in the **Application** toolbar.

A list appears.

- From the **Admin** menu, select **F** and then click **Feature Configuration**.

A sub-menu appears.

- Click the **Search** option from the **Feature Configuration** sub-menu.

The **Feature Configuration Search** window appears.

- Enter **C1\_ACCTINFO** in the **Feature Name** field.

- Click the **Search** button corresponding to the **Feature Name** field.

The **Feature Configuration** screen appears. It contains the following option types:

Option Type	Description	Mandatory (Yes or No)
Account Type	Used to specify the characteristic type. This characteristic type is used to define the type of account in the <b>Account</b> screen.	Yes
	<b>Note:</b> By default, the <b>C1_F_ATY</b> characteristic type is specified. If you want to use account types other than the ones defined in the <b>C1_F_ATY</b> characteristic type, you need to create a new predefined characteristic type and add the required account types as its characteristic values. Then, specify the newly created characteristic type as the value for this option type.	
Invoice Group Account	Used to specify the characteristic type. This characteristic type is used to indicate whether the account is a master or member account in the <b>Account</b> screen.	Yes
	<b>Note:</b> By default, the <b>C1_F_IGA</b> characteristic type is specified. If you want to use any other characteristic type other than <b>C1_F_IGA</b> , you need to create a new predefined characteristic type and add two characteristic values — Y and N. Then, specify the newly created characteristic type as the value for this option type.	

- Enter the values for the required option types in the **Feature Configuration** screen.

- Click the **Save** button in the **Page Title** area.

The changes made to the feature configuration are saved.

### **Related Topics**

Invoicing Group	<a href="#">Invoicing Group</a> on page 249

## Setting the C1\_AXENTITY Feature Configuration

The **C1\_AXENTITY** feature configuration enables you to configure various settings related to the **Approval Workflow** feature.

### Prerequisites

To set the **C1\_AXENTITY** feature configuration, you should have:

- An algorithm defined using the **C1-APPTXN** algorithm type in the application
- To Do types defined in the application
- Fields defined in the application
- XSL files that you want to use for the Input and Display UI maps

### Procedure

To set the **C1\_AXENTITY** feature configuration:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **F** and then click **Feature Configuration**.  
A sub-menu appears.
3. Click the **Search** option from the **Feature Configuration** sub-menu.  
The **Feature Configuration Search** window appears.
4. Enter **C1\_AXENTITY** in the **Feature Name** field.
5. Click the **Search** button corresponding to the **Feature Name** field.

The **Feature Configuration** screen appears. It contains the following option types:

Option Type	Description	Mandatory (Yes or No)
Approval Transaction Compare New or Missing Entry Color	Used to indicate the color in which you want to highlight the new record or new additions made to the existing record. This helps in comparing the existing and new data while reviewing an approval transaction.  <b>Note:</b> You must specify a hexadecimal value for this option type.	Yes
Approval Transaction Compare Value Changed Color	Used to indicate the color in which you want to highlight the modifications made to the existing data. This helps in comparing the existing and new data while reviewing an approval transaction.  <b>Note:</b> You must specify a hexadecimal value for this option type.	Yes

Option Type	Description	Mandatory (Yes or No)
Approval Transaction Entity Access Algorithms	<p>Used to specify the algorithm which controls access to the maintenance objects based on the access group and division.</p> <p><b>Note:</b> By default, the value is set to <b>C1-APPTXN</b>. If you create new maintenance objects and want to control the access of these new maintenance objects based on the access group and division, you have to create a custom algorithm and then attach it to this option type. In such case, you will have to define this option type twice — one with the default algorithm (that is, <b>C1-APPTXN</b>) and another with the custom algorithm.</p>	Yes
Approval Transaction Resolve To Do Type	<p>Used to indicate that To Do entry of the specified To Do type must be created when an approver at any level in the hierarchy rejects an approval transaction.</p> <p><b>Note:</b> You must specify a To Do type which is already defined in the system.</p>	Yes
Approval Transaction screen timeout	<p>Used to indicate the time (in minutes) in which the screen timeout message should appear in the <b>Comparison: New versus Existing</b> screen when the system takes longer time to display an approval transaction.</p>	Yes
Disable Approval Transaction Fields in Input UI Maps	<p>Used to indicate the fields that you want to disable whenever the input UI maps are regenerated.</p> <p><b>Note:</b> You must specify a field which is already defined in the application.</p>	Yes
Display Existing Panel on Left Side (Y/N)	<p>Used to indicate whether you want to view the existing or new data in the left panel while reviewing an approval transaction. The valid values are:</p> <ul style="list-style-type: none"> <li>• <b>Y</b> - Used when you want the existing data to appear in the left panel of the <b>Comparison: New versus Existing</b> screen.</li> <li>• <b>N</b> - Used when you want the new data to appear in the left panel of the <b>Comparison: New versus Existing</b> screen.</li> </ul> <p><b>Note:</b> If you do not specify the value for this option type, by default, it is set to <b>N</b>.</p>	No

Option Type	Description	Mandatory (Yes or No)
Display Information String	Used to indicate whether the approval transaction information string should appear in the <b>Comparison: New versus Existing</b> screen when you are reviewing an approval transaction of a construct. The valid values are: <ul style="list-style-type: none"> <li>true</li> <li>false</li> </ul>	Yes
Display UI XSL	Used to indicate the XSL file that you want to use while regenerating the Display UI maps.	Yes
Display only Differences of fields on UI	Used to indicate whether you want to view only those fields of a record where the data is added or updated or all fields of a record while reviewing an approval transaction. The valid values are: <ul style="list-style-type: none"> <li><b>Yes</b> - Used when you want to view only those fields of a record where the data is added or updated in the <b>Comparison: New versus Existing</b> screen.</li> <li><b>No</b> - Used when you want to view all fields of a record in the <b>Comparison: New versus Existing</b> screen.</li> </ul>	Yes
Input UI XSL	Used to indicate the XSL file that you want to use while regenerating the Input UI maps.	Yes

- Enter the values for the required option types in the **Feature Configuration** screen.
- Click the **Save** button in the **Page Title** area.

The changes made to the feature configuration are saved.

## Setting the C1\_DIVFUNCT Feature Configuration

### Procedure

To set the **C1\_DIVFUNCT** feature configuration:

- Click the **Admin** link in the **Application** toolbar.  
A list appears.
- From the **Admin** menu, select **F** and then click **Feature Configuration**.  
A sub-menu appears.
- Click the **Search** option from the **Feature Configuration** sub-menu.  
The **Feature Configuration Search** window appears.
- Enter **C1\_DIVFUNCT** in the **Feature Name** field.
- Click the **Search** button corresponding to the **Feature Name** field.

The **Feature Configuration** screen appears. It contains the following option types:

Option Type	Description	Mandatory (Yes or No)
Enforce division-specific validations	Used to indicate whether the division-specific validations must be triggered on the <b>Person</b> , <b>Account</b> and <b>Contract</b> screens. The valid values are: <ul style="list-style-type: none"> <li>• Y</li> <li>• N</li> </ul>	Yes

6. Enter the values for the required option types in the **Feature Configuration** screen.
7. Click the **Save** button in the **Page Title** area.

The changes made to the feature configuration are saved.

## Setting the C1-Deal Feature Configuration

The **C1-Deal** feature configuration enables you to configure various settings related to the **Deal Management** feature.

### Prerequisites

To set the **C1-Deal** feature configuration, you should have:

- Required FOP based reports defined in the application

### Procedure

To set the **C1-Deal** feature configuration:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **F** and then click **Feature Configuration**.  
A sub-menu appears.
3. Click the **Search** option from the **Feature Configuration** sub-menu.  
The **Feature Configuration Search** window appears.
4. Enter **C1-Deal** in the **Feature Name** field.
5. Click the **Search** button corresponding to the **Feature Name** field.  
The **Feature Configuration** screen appears. It contains the following option types:

Option Type	Description	Mandatory (Yes or No)
Account Limit for Online Hierarchy Creation	<p>Used to determine whether the customer hierarchy for a deal should be created in the online or deferred mode. If the number of accounts in the customer hierarchy does not exceed the account limit, the system creates the corresponding prospect persons and accounts for the deal immediately and then changes the status of the deal to <b>Pending Simulation</b>. However, if the number of accounts in the customer hierarchy exceeds the account limit, the status of the deal is changed to <b>Hierarchy Creation Deferred</b>.</p> <p><b>Note:</b></p> <p>This option type is considered when a deal is created for an existing customer or prospect with the simulation type set to <b>Customer</b>.</p> <p>You must specify a value greater than or equal to zero.</p> <p>On executing the <b>C1_HRC</b> batch, the system checks whether there are any deals in the <b>Hierarchy Creation Deferred</b> status. If so, the system creates the corresponding prospect persons and accounts for the deal and then changes the status of the deal to <b>Pending Simulation</b>. For more information about the batch, see <i>Oracle Revenue Management and Billing Batch Guide</i>.</p>	Yes
Footnote Character for Terms & Conditions in Deal Extract	Used to specify a special character which you want to use while inserting terms and conditions of a price item or hierarchy entity as footnotes in the deal extract report. For example, *, \$, &, #, etc.	Yes
Deal Comparison Report	<p>Used to specify the FOP based report using which you want to extract the deal comparison report in the Excel format.</p> <p><b>Note:</b> You can set the value of this option type to <b>DCMR</b> or to any custom FOP based report which is designed to show the deal comparison report in the Excel format.</p>	Yes

Option Type	Description	Mandatory (Yes or No)
Company Logo File Name for Deal Extract	<p data-bbox="613 205 1149 331">Used to specify the company logo file that you want to embed while extracting the deal information in the PDF format for the customer review and acceptance.</p> <p data-bbox="613 359 1149 688"><b>Note:</b> You must upload the specified company logo file in the required FOP based report using which you want to extract the deal information in the PDF format. It is then stored at the following location: <code>/scratch/rmbbuild/spl/ INSTALL_DIR/splapp/reporting/xsl/</code> Here, you must specify a file name along with the extension.</p>	Yes
Price Item Status Characteristic Type	<p data-bbox="613 739 1149 1003">Used to indicate the characteristic type where the status of a price item is stored. This characteristic type is defined for a price item. The system uses this characteristic type while deriving active price items in the price item hierarchy of an existing customer or account in a deal. Here, you must specify a characteristic type where the characteristic entity is set to <b>Price Item</b>.</p> <p data-bbox="613 1016 1149 1087"><b>Note:</b> The <b>C1-DLPIS</b> characteristic type is shipped with the product.</p>	Yes

Option Type	Description	Mandatory (Yes or No)
Default Period in Deal Dashboard and Deal Approver Dashboard	<p>Used to specify the duration in months. The system calculates the default period considering the specified duration and system date, and accordingly shows the details for the default period in:</p> <ul style="list-style-type: none"> <li>• <b>Deal Metrics, Deal Statistics, Deal To Dos,</b> and <b>Search Deal</b> zones of the <b>Deal Dashboard</b> screen</li> <li>• <b>Deal Metrics, Deal To Dos</b> and <b>Search Deal</b> zones of the <b>Deal Approver Dashboard</b> screen</li> </ul> <p>For example, if the system date is 07-11-2021 and the value for this option type is set to 12, then the system displays the following information in the respective zone of the <b>Deal Dashboard</b> screen on 07-11-2021:</p> <ul style="list-style-type: none"> <li>• <b>Deal Metrics</b> - Indicates number of deals which are created, pending for approval, ready for finalization, pending for client acceptance, won, and rejected between Aug 2020 to July 2021.</li> <li>• <b>Deal Statistics</b> - Graphically represents the number of deals of an existing customer, existing account, and prospect in a particular status.</li> <li>• <b>Deal To Dos</b> - Lists the To Dos which are created between Aug 2020 to July 2021.</li> <li>• <b>Search Deals</b> - Lists deals where start date fall between Aug 2020 to July 2021.</li> </ul>	Yes
Deal Profitability Report	<p>Used to specify the FOP based report using which you want to extract the deal profitability report in the Excel format.</p> <p><b>Note:</b> You can set the value of this option type to <b>DLPRTXLR</b> or to any custom FOP based report which is designed to show the deal profitability report in the Excel format.</p>	Yes
Deal External Report in Excel	<p>Used to specify the FOP based report using which you want to extract the deal information in the Excel format for the customer review and acceptance.</p> <p><b>Note:</b> You can set the value of this option type to <b>DEEEXCEL</b> or to any custom FOP based report which is designed to show the deal information to the customer in the Excel format.</p>	Yes

Option Type	Description	Mandatory (Yes or No)
Deal External Report in PDF	Used to specify the FOP based report using which you want to extract the deal information in the PDF format for the customer review and acceptance.	Yes
	<b>Note:</b> You can set the value of this option type to <b>DEEPDF</b> or to any custom FOP based report which is designed to show the deal information to the customer in the PDF format.	
Deal Internal Report in Excel	Used to specify the FOP based report using which you want to extract the deal information in the Excel format for the internal review.	Yes
	<b>Note:</b> You can set the value of this option type to <b>DEIEXCEL</b> or to any custom FOP based report which is designed to show the deal information to the internal user in the Excel format.	
Deal Internal Report in PDF	Used to specify the FOP based report using which you want to extract the deal information in the PDF format for the internal review.	Yes
	<b>Note:</b> You can set the value of this option type to <b>DEIPDF</b> or to any custom FOP based report which is designed to show the deal information to the internal user in the PDF format.	
Validate Average Price Against Proposed Price List Pricing	Used to indicate whether the average price of a price item in a deal should be validated against the proposed price list pricing. The valid values are: <ul style="list-style-type: none"> <li>• <b>Y</b> - Indicates that the average price of a price item in a deal should be validated against the proposed price list pricing.</li> <li>• <b>N</b> - Indicates that the average price of a price item in a deal should be validated against the eligible price list pricing.</li> </ul>	Yes
	<b>Note:</b> This option type is considered when the <b>Price Item Approval Required</b> field is set to <b>Yes</b> in the respective deal type.	
Deal Pricing and Commitments - Pagination Limit	Used to specify the maximum number of records that can be displayed on filtering the data in each page of the <b>Deal Pricing and Commitments</b> screen.	Yes
	<b>Note:</b> You must specify a numeric value greater than zero.	

Option Type	Description	Mandatory (Yes or No)
Deal Questionnaire - Pagination Limit	<p>Used to specify the number of questions that should appear in the <b>Questionnaire</b> page of the <b>Deal Information</b> screen.</p> <p><b>Note:</b> You must specify a numeric value greater than zero.</p>	Yes
Refer Volume Aggregation	<p>Used to indicate whether you want to derive the following for an account in a deal from the charge and volume aggregation tables:</p> <ul style="list-style-type: none"> <li>• Recurring and non-recurring pass through charges</li> <li>• Commitments from recurring and non-recurring SQI based billable charges</li> </ul> <p>The valid values are:</p> <ul style="list-style-type: none"> <li>• <b>Y</b> - Indicates that you want to extract the charges and commitments of an account from the <b>C1_CHARGE_AGGR</b> and <b>C1_VOLUME_AGGR</b> tables, respectively, while viewing the pricing and commitment details of the account.</li> </ul> <p><b>Note:</b> If you want to refer the data from the <b>C1_CHARGE_AGGR</b> and <b>C1_VOLUME_AGGR</b> tables, you need to execute the <b>PREAGGR</b> and <b>CSTPREAG</b> batches before creating a deal for an existing customer or account. For more information about these batches, see <i>Oracle Revenue Management and Billing Batch Guide</i>.</p> <ul style="list-style-type: none"> <li>• <b>N</b> - Indicates that you want to derive the charges and commitments of an account for the deal frequency, at the runtime, while viewing the pricing and commitment details of the account.</li> </ul>	Yes
Thread Count for Price Item Hierarchy	<p>Used to specify the number of threads you want to spawn in parallel. It is used while deriving the price item hierarchy for an existing customer or account in a deal.</p> <p><b>Note:</b> You must specify a numeric value greater than zero.</p>	Yes

Option Type	Description	Mandatory (Yes or No)
Valid Period for Seasonal Pricing in Months	Used to specify the maximum duration in months for which you can offer a seasonal pricing for a price item in a deal. The system then validates the end date of a seasonal pricing using the specified duration. For example, if the value for this option type is set to 6 and the seasonal pricing start date is 02-01-2021, then the system checks whether the end date of the seasonal pricing is not beyond 07-31-2021.	Yes
Volume and Commitment Limit Online Simulation	<p>Used to determine whether the cost, revenue, and profitability for a deal version should be calculated in the online or deferred mode. If the proposed commitments do not exceed the specified limit, the system calculates the cost, revenue, and profitability for the deal version immediately and then changes the status of the deal and its version to <b>Simulated</b>. However, if the proposed commitments exceed the specified limit, the status of the deal is changed to <b>Simulation Deferred</b>.</p> <p><b>Note:</b></p> <p>You must specify a value greater than or equal to zero.</p> <p>On executing the <b>C1_SMLD</b> batch, the system checks whether there are any deals in the <b>Simulation Deferred</b> status. If so, the system calculates the cost, revenue, and profitability for the deal version and then changes the status of the deal and its version to <b>Simulated</b>. For more information about the batch, see <i>Oracle Revenue Management and Billing Batch Guide</i>.</p>	Yes

6. Enter the values for the required option types in the **Feature Configuration** screen.
7. Click the **Save** button in the **Page Title** area.

The changes made to the feature configuration are saved.

## Setting the C1-EHRCONFIG Feature Configuration

The **C1-EHRCONFIG** feature configuration enables the system to determine the maximum number of levels that can be included in an entity hierarchy relationship. Accordingly, the system enables you to create hierarchy entities for upto one level less than the level specified in the **Maximum Hierarchy Level** option type of the **C1-EHRCONFIG** feature configuration. For example, if you set the **Maximum Hierarchy Level** option type to 5, the system allows you to create hierarchy entities for upto four levels (i.e. Level 1, Level 2, Level 3, and Level 4). The last level (i.e. Level 5) is reserved for a price item that you want to include in an entity hierarchy relationship. Therefore, you need to accordingly set the value as per the business requirements.

### Procedure

To set the **C1-EHRCONFIG** feature configuration:

1. Click the **Admin** link in the **Application** toolbar.

A list appears.

- From the **Admin** menu, select **F** and then click **Feature Configuration**.

A sub-menu appears.

- Click the **Search** option from the **Feature Configuration** sub-menu.

The **Feature Configuration Search** window appears.

- Enter **C1-EHRCONFIG** in the **Feature Name** field.

- Click the **Search** button corresponding to the **Feature Name** field.

The **Feature Configuration** screen appears. It contains the following option type:

Option Type	Description	Mandatory (Yes or No)
Maximum Hierarchy Level	Used to indicate the maximum number of levels that you want to include in an entity hierarchy relationship.  <b>Note:</b> At present, the system supports maximum 10 levels in an entity hierarchy relationship. Therefore, you can define hierarchy entities for upto 9 levels. The last level (i.e. Level 10) is reserved for a price item that you want to include in an entity hierarchy relationship. By default, the value is set to 10. If you do not require 10 levels in an entity hierarchy relationship, you can set a lower maximum limit in this option type.	Yes

- Enter the value for the required option type in the **Feature Configuration** screen.

- Click the **Save** button in the **Page Title** area.

The changes made to the feature configuration are saved.

## **Setting the C1\_EXCHRATE Feature Configuration**

### **Procedure**

To set the **C1\_EXCHRATE** feature configuration:

- Click the **Admin** link in the **Application** toolbar.

A list appears.

- From the **Admin** menu, select **F** and then click **Feature Configuration**.

A sub-menu appears.

- Click the **Search** option from the **Feature Configuration** sub-menu.

The **Feature Configuration Search** window appears.

4. Enter **C1\_EXCHRATE** in the **Feature Name** field.
5. Click the **Search** button corresponding to the **Feature Name** field.

The **Feature Configuration** screen appears. It contains the following option types:

Option Type	Description	Mandatory (Yes or No)
End Date Required for Division Override	Used to indicate whether the end date is mandatory for a division-specific exchange rate. The valid values are: <ul style="list-style-type: none"> <li>• Y</li> <li>• N</li> </ul> By default, the value of this option type is set to <b>N</b> .	Yes

6. Enter the values for the required option types in the **Feature Configuration** screen.
7. Click the **Save** button in the **Page Title** area.

The changes made to the feature configuration are saved.

## Setting the C1\_EXP\_OVRD Feature Configuration

### Procedure

To set the **C1\_EXP\_OVRD** feature configuration:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **F** and then click **Feature Configuration**.  
A sub-menu appears.
3. Click the **Search** option from the **Feature Configuration** sub-menu.  
The **Feature Configuration Search** window appears.
4. Enter **C1\_EXP\_OVRD** in the **Feature Name** field.
5. Click the **Search** button corresponding to the **Feature Name** field.

The **Feature Configuration** screen appears. It contains the following option types:

Option Type	Description	Mandatory (Yes or No)
Expire Override Switch	Used to indicate whether you want to automatically expire an agreed pricing when the agreed pricing of a person or an account without end date is overridden. The valid values are: <ul style="list-style-type: none"> <li>• Y</li> <li>• N</li> </ul>	Yes

6. Enter the values for the required option types in the **Feature Configuration** screen.
7. Click the **Save** button in the **Page Title** area.

The changes made to the feature configuration are saved.

## Setting the C1\_FINTRANOP Feature Configuration

The **C1\_FINTRANOP** feature configuration enables the system to determine various options which should be considered while creating billable charges, determining a price item pricing, generating bill segments, and while creating an actual bill using a trial bill.

### **Procedure**

To set the **C1\_FINTRANOP** feature configuration:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **F** and then click **Feature Configuration**.  
A sub-menu appears.
3. Click the **Search** option from the **Feature Configuration** sub-menu.  
The **Feature Configuration Search** window appears.
4. Enter **C1\_FINTRANOP** in the **Feature Name** field.
5. Click the **Search** button corresponding to the **Feature Name** field.

The **Feature Configuration** screen appears. It contains the following option types:

Option Type	Description	Mandatory (Yes or No)
Account Financial History Details Switch	<p>Used to indicate whether detailed or summarized information should be displayed for an account in the <b>Account Financial History</b> screen. The valid values are:</p> <ul style="list-style-type: none"> <li>• <b>Y</b> - Used when you want to list all financial transactions of a bill, payment, or adjustment for an account in the <b>Account Financial History</b> screen.</li> <li>• <b>N</b> - Used when you want to summarize all financial transactions of a particular type on an entity (i.e. bill, payment, or adjustment) and display the total amount in the <b>Account Financial History</b> screen.</li> </ul> <p><b>Note:</b> If you do not specify the value for this option type, by default, it is set to <b>Y</b>.</p>	No
Allow Caching Of Rule Based Autopay List	<p>Used to indicate whether you want to cache the rule based auto pay instructions of an account when the <b>C1-APRULEEVL</b> algorithm is invoked. The valid values are:</p> <ul style="list-style-type: none"> <li>• Y</li> <li>• N</li> </ul> <p><b>Note:</b> If you do not specify the value for this option type, by default, it is set to <b>N</b>.</p>	No
Avoid Pricing Crawling if Rate Schedule present at Contract	<p>Used to indicate that the system should not determine the price item pricing using the price assignment search algorithm (which is attached on the account's division) when the effective rate schedule is present on the contract. The valid values are:</p> <ul style="list-style-type: none"> <li>• Y</li> <li>• N</li> </ul> <p><b>Note:</b> If you do not specify the value for this option type, by default, it is set to <b>N</b>.</p>	No

Option Type	Description	Mandatory (Yes or No)
Bill Segment Regeneration on Freeze	<p>Used to indicate whether you want to regenerate the bill segments before freezing them. The valid value is:</p> <ul style="list-style-type: none"> <li>• Y</li> <li>• N</li> </ul> <p><b>Note:</b></p> <p>If you do not specify the value for this option type, by default, it is set to <b>N</b>.</p> <p>If the <b>Freeze and Complete</b> option is selected for the respective window period in the bill cycle and the <b>Bill Segment Regeneration on Freeze</b> option type is set to <b>Y</b>, then the bill segments are regenerated and the status of the bill segments is set to <b>Frozen</b>. However, if the <b>Freeze and Complete</b> option is not selected for the respective window period in the bill cycle, then the bill segments are always regenerated irrespective of whether the <b>Bill Segment Regeneration on Freeze</b> option type is set to <b>Y</b> or <b>N</b>.</p>	No
Billable Charges Date	<p>Used to indicate whether you want to consider the non-recurring billable charges whose start or end date is earlier than or equal to the cut-off date. The valid values are:</p> <ul style="list-style-type: none"> <li>• <b>S</b> - Used when you want to consider the non-recurring billable charges whose start date is earlier than or equal to the cut-off date.</li> <li>• <b>E</b> - Used when you want to consider the non-recurring billable charges whose end date is earlier than or equal to the cut-off date.</li> </ul> <p><b>Note:</b></p> <p>If you do not specify the value for this option type, by default, it is set to <b>S</b>.</p> <p>The system always considers the recurring billable charges whose start date is earlier than the cut-off date and end date is later than the cut-off date irrespective of whether the <b>Billable Charges Date</b> option type is set to <b>S</b> or <b>E</b>.</p>	No

Option Type	Description	Mandatory (Yes or No)
Skip Priceitem Contract Type Validation	<p>Used to indicate whether you want to skip the price item's and billable charge's contract's contract type validation. The valid values are:</p> <ul style="list-style-type: none"> <li>• <b>Y</b> - Used when you to create a billable charge for a price item on the contract which is created using a contract type to which the price item is not associated.</li> <li>• <b>N</b> - Used when you to create a billable charge for a price item on the contract which is created using a contract type to which the price item is associated.</li> </ul> <p><b>Note:</b> If you do not specify the value for this option type, by default, it is set to <b>N</b>.</p>	No
Rate Component Step Optimization	<p>Used to indicate whether you want to determine the rate for all tiering ranges of a step tiered rate component or for only those tiering ranges of a step tiered rate component till when the quantity is exhausted. The valid values are:</p> <ul style="list-style-type: none"> <li>• <b>Y</b> - Used when you want to determine the rate for only those tiering ranges of a step tiered rate component till when the quantity is exhausted. It helps to improve the performance of the billing batches. If you set this option type to <b>Y</b>, always ensure that you define the price components with the tiering ranges in the ascending order.</li> <li>• <b>N</b> - Used when you want to determine the rate for all tiering ranges of a step tiered rate component.</li> </ul> <p><b>Note:</b> If you do not specify the value for this option type, by default, it is set to <b>N</b>.</p>	No
Trial Bill Characteristics Conversion	<p>Used to indicate whether you want to copy the trial bill's characteristics when an actual bill is created using a trial bill. The valid values are:</p> <ul style="list-style-type: none"> <li>• Y</li> <li>• N</li> </ul> <p><b>Note:</b> If you do not specify the value for this option type, by default, it is set to <b>N</b>.</p>	No

6. Enter the values for the required option types in the **Feature Configuration** screen.

7. Click the **Save** button in the **Page Title** area.

The changes made to the feature configuration are saved.

## Setting the C1\_FM Feature Configuration

### Procedure

To set the **C1\_FM** feature configuration:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **F** and then click **Feature Configuration**.  
A sub-menu appears.
3. Click the **Search** option from the **Feature Configuration** sub-menu.  
The **Feature Configuration Search** window appears.
4. Enter **C1\_FM** in the **Feature Name** field.
5. Click the **Search** button corresponding to the **Feature Name** field.

The **Feature Configuration** screen appears. It contains the following option types:

Option Type	Description	Mandatory (Yes or No)
First Batch in Transaction Aggregation Cycle	Used to specify the first mandatory batch that you want to be executed in the transaction aggregation cycle.	Yes
	<b>Note:</b> At present, the system does not support any value other than <b>C1-TXNIP</b> for this option type.	
Last Batch in Transaction Aggregation Cycle	Used to specify the last mandatory batch that you want to be executed in the transaction aggregation cycle.	Yes
	<b>Note:</b> At present, the system does not support any value other than <b>C1-TXNCU</b> for this option type.	
Disaggregation - Price Assignment	Used to indicate whether the disaggregation request should be automatically created for a person or account when a price item is assigned to the person or account or the existing price item pricing assigned to the person or account is modified. The valid values are: <ul style="list-style-type: none"> <li>• true</li> <li>• false</li> </ul>	No
	<b>Note:</b> You can use this feature when an algorithm which is created using the <b>TXNDISAGGPRA</b> algorithm type is attached to the <b>Post-Processing</b> system event of the <b>C1_PRASGN_BO</b> business object.	

Option Type	Description	Mandatory (Yes or No)
Allow Duplicate Summary ID	<p>Used to indicate whether the transaction legs can have duplicate summary ID while creating an aggregated billable charge using the <b>Service Quantity Calculation (C1-TXNSQ)</b> batch. The valid values are:</p> <ul style="list-style-type: none"> <li>• true</li> <li>• false</li> </ul> <p><b>Note:</b></p> <p>If you set this option type to <b>false</b>, the system does not create the aggregated billable charge when one or more transaction legs have the same summary ID.</p> <p>If you do not specify the value for this option type, by default, the value is set to <b>false</b>.</p>	No

Option Type	Description	Mandatory (Yes or No)
Parallel Query Degree	<p>Used to specify the degree of parallelism that you want to use while creating chunks (i.e. work units) in various Transaction Feed Management (TFM) batches. The valid values are:</p> <ul style="list-style-type: none"> <li>• 1</li> <li>• 2</li> <li>• 3</li> <li>• 4</li> <li>• 5</li> <li>• 6</li> <li>• 7</li> </ul> <p><b>Note:</b></p> <p>With the parallel query feature, multiple threads on the database can work together simultaneously to process a single SQL statement which is used to create chunks. This helps to improve the batch performance.</p> <p>The system calculates the number of threads on the database that can be used to execute the SQL statement by setting 2 to the power of the specified parallel query degree. For example, if you set the parallel query degree to 4, the system uses 16 (i.e. 2<sup>4</sup>) threads on the database to create work units.</p> <p>You must set the parallel query degree depending on the infrastructure available on the site. If you do not specify the value for this option type, by default, the parallel query degree is set to 2.</p>	No
Price Item Determination Batch Description	Used to specify the description for the batch which is used for validating the transaction and deriving the price item in the transaction aggregation cycle. For example, <b>Validate Transaction and Derive Price Item</b> . This description appears in the error message when the transaction aggregation batches are not executed in the specified sequence.	Yes

Option Type	Description	Mandatory (Yes or No)
Remove Duplicates from Accumulated Rule Output	<p>Used to indicate whether duplicate transaction legs must be created during the transaction aggregation cycle through the rule output accumulation process. The valid values are:</p> <ul style="list-style-type: none"> <li>• true</li> <li>• false</li> </ul> <p><b>Note:</b> If you do not specify the value for this option type, by default, the value is set to <b>false</b>.</p>	No
Rule Output Accumulation	<p>Used to indicate whether the system should accumulate the output parameters of all rules where the criteria returns <b>Rule Is True</b> irrespective of whether the rule true action is set to <b>Next Dependent</b>, <b>Next Rule by Priority</b>, or <b>Success</b> and then create transaction legs using the accumulated output parameters. The valid values are:</p> <ul style="list-style-type: none"> <li>• true</li> <li>• false</li> </ul> <p><b>Note:</b> If you do not specify the value for this option type, by default, the value is set to <b>false</b>.</p>	No
Show Default Values in Price Item Pricing	<p>Used to indicate whether the default values must appear in the <b>Ignore Transaction</b>, <b>Aggregate Transaction</b>, and <b>Aggregation Schedule</b> fields while defining the price item pricing. The valid values are:</p> <ul style="list-style-type: none"> <li>• Y</li> <li>• N</li> </ul>	Yes
Use Materialized Views	<p>Used to indicate whether the price item pricing information must be cached in the <b>CI_PRC_AGRD</b>, <b>CI_PRC_PL</b>, and <b>CI_PRC_INH_PL</b> tables. The valid values are:</p> <ul style="list-style-type: none"> <li>• true</li> <li>• false</li> </ul>	Yes
Maximum Price Item Parameters Cache Size	<p>Used to indicate the maximum number of price items whose parameter information can be cached in the memory.</p>	Yes
Maximum Price Item Parameter Groups Cache Size	<p>Used to indicate the maximum number of price item parameter groups whose information can be cached in the memory.</p>	Yes

Option Type	Description	Mandatory (Yes or No)
SQ Recalculation Required	<p>Used to indicate whether the SQIs in an aggregated billable charge must be recalculated while executing the <b>C1-TXNCU</b> batch. The valid values are:</p> <ul style="list-style-type: none"> <li>• Y</li> <li>• N</li> </ul> <p><b>Note:</b> If you do not specify the value for this option type or if you set the value to <b>N</b>, the system will not recalculate the SQIs in an aggregated billable charge.</p>	No
Transaction Detail Account Validation	<p>Used to indicate whether the account must be validated during the transaction validation process. The valid values are:</p> <ul style="list-style-type: none"> <li>• Y</li> <li>• N</li> </ul> <p><b>Note:</b></p> <p>If you set this option type to <b>N</b>, the system overrides the transaction's account identifier type, account identifier, and division with the first derived account's account identifier type, account identifier, and division, respectively.</p> <p>If you do not specify the value for this option type, the system will validate the account during the transaction validation process.</p>	No
Populate Summary Table Batch Description	<p>Used to specify the description for the batch which is used for adding a summary record in the <b>CI_TXN_DTL_PRITM_SUMMARY</b> table. For example, <b>Populate CI_TXN_DTL_PRITM_SUMMARY Table</b>. This description appears in the error message when the transaction aggregation batches are not executed in the specified sequence.</p>	<p>Yes (Conditional)</p> <p><b>Note:</b> This data is required when the <b>Use C1-TXNPS During Transaction Aggregation</b> option type is set to <b>true</b>.</p>
Find Price Item Pricing Batch Description	<p>Used to specify the description for the batch which is used for finding the price item pricing for transactions in the transaction aggregation cycle. For example, <b>Price Item Pricing Verification</b>. This description appears in the error message when the transaction aggregation batches are not executed in the specified sequence.</p>	Yes

Option Type	Description	Mandatory (Yes or No)
Update Transaction Status Batch Description	Used to specify the description for the batch which is used for updating the status of the transactions (for which the error has occurred) in the transaction aggregation cycle. For example, <b>Update Status</b> . This description appears in the error message when the transaction aggregation batches are not executed in the specified sequence.	Yes
Service Quantity Calculation Batch Description	Used to specify the description for the batch which is used for creating the billable charges for transactions in the transaction aggregation cycle. For example, <b>Service Quantity Calculation</b> . This description appears in the error message when the transaction aggregation batches are not executed in the specified sequence.	Yes
Transaction Completion Batch Description	Used to specify the description for the batch which is used for updating the status of the transactions in the transaction aggregation cycle. For example, <b>Mark Completion</b> . This description appears in the error message when the transaction aggregation batches are not executed in the specified sequence.	Yes
Cleanup Unwanted Data Batch Description	Used to specify the description for the batch which is used for updating or deleting billable charges created for transactions in the transaction aggregation cycle. For example, <b>Clean Up</b> . This description appears in the error message when the transaction aggregation batches are not executed in the specified sequence.	Yes

Option Type	Description	Mandatory (Yes or No)
Use C1-TXNPS During Transaction Aggregation	<p>Used to indicate whether you want to use an alternative transaction aggregation process when the aggregation ratio is low. The valid values are:</p> <ul style="list-style-type: none"> <li>• true</li> <li>• false</li> </ul> <p><b>Note:</b> If you set this option type to <b>true</b>, you need to execute the following batches in the specified order in the transaction aggregation cycle:</p> <ol style="list-style-type: none"> <li>1. Flush All Caches (F1-FLUSH)</li> <li>2. Refresh Pricing (C1-TXNRP)</li> <li>3. Header Validation (C1-TXNHV)</li> <li>4. Validate Transaction and Derive Price Item (C1-TXNIP)</li> <li>5. Populate CI_TXN_DTL_PRITM_SUMMARY Table (C1-TXNPS)</li> <li>6. Price Item Pricing Verification (C1-TXNVP)</li> <li>7. Update Status (C1-TXNEX)</li> <li>8. Service Quantity Calculation (C1-TXNSQ)</li> <li>9. Mark Completion (C1-TXNCM)</li> <li>10. Clean Up (C1-TXNCU) with the <b>Request Type</b> parameter set to <b>EROR</b></li> </ol>	No

6. Enter the values for the required option types in the **Feature Configuration** screen.
7. Click the **Save** button in the **Page Title** area.

The changes made to the feature configuration are saved.

## Setting the C1-INCT Feature Configuration

The **C1-INCT** feature configuration enables you to configure various settings related to the **Construct Based Billing and Settlement** feature.

### Prerequisites

To set the **C1-INCT** feature configuration, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to **Contract Type**)

**Procedure**

To set the **C1-INCT** feature configuration:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **F** and then click **Feature Configuration**.  
A sub-menu appears.
3. Click the **Search** option from the **Feature Configuration** sub-menu.  
The **Feature Configuration Search** window appears.
4. Enter **C1-INCT** in the **Feature Name** field.
5. Click the **Search** button corresponding to the **Feature Name** field.

The **Feature Configuration** screen appears. It contains the following option types:

Option Type	Description	Mandatory (Yes or No)
Settlement Currency Validation Required	Used to indicate whether you want to enable or disable the linked accounts' and settlement account's currency validation. The valid values are: <ul style="list-style-type: none"> <li>• <b>Y</b> - Used when you want to validate whether the linked accounts' currency matches the settlement account's currency.</li> <li>• <b>N</b> - Used when you do not want to validate whether the linked accounts' currency matches the settlement account's currency.</li> </ul>	No
<b>Note:</b> If you do not specify the value for this option type, by default, it is set to <b>N</b> .		
Target Contract Characteristic Type	Used to indicate the characteristic type which stores the contract type using which the contract should be created for the new invoice account when the construct is activated. This characteristic type must be defined on the usage accounts' contract's contract type.	Yes
<b>Note:</b> You must specify a characteristic type where the characteristic entity is set to <b>Contract Type</b> .		

6. Enter the values for the required option types in the **Feature Configuration** screen.
7. Click the **Save** button in the **Page Title** area.

The changes made to the feature configuration are saved.

## Setting the C1\_MASPRI Feature Configuration

**Procedure**

To set the **C1\_MASPRI** feature configuration:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **F** and then click **Feature Configuration**.  
A sub-menu appears.
3. Click the **Search** option from the **Feature Configuration** sub-menu.  
The **Feature Configuration Search** window appears.
4. Enter **C1\_MASPRI** in the **Feature Name** field.
5. Click the **Search** button corresponding to the **Feature Name** field.

The **Feature Configuration** screen appears. It contains the following option types:

Option Type	Description	Mandatory (Yes or No)
Thread Count	Used to specify the number of threads you want to spawn in parallel. It is used while creating a batch job for a mass pricing update request using the <b>C1-GENRQ</b> batch control.	Yes
Thread Pool Name	Used to specify the thread pool on which you want to execute the batch. It is used while creating a batch job for a mass pricing update request using the <b>C1-GENRQ</b> batch control.	Yes

6. Enter the values for the required option types in the **Feature Configuration** screen.
7. Click the **Save** button in the **Page Title** area.

The changes made to the feature configuration are saved.

## **Setting the C1\_MLTCURACC Feature Configuration**

The **C1\_MLTCURACC** feature configuration enables you to configure various settings related to the **Multi-Currency Accounts** feature.

### **Prerequisites**

To set the **C1\_MLTCURACC** feature configuration, you should have:

- Adjustment types and adjustment cancel reasons defined in the application

### **Procedure**

To set the **C1\_MLTCURACC** feature configuration:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **F** and then click **Feature Configuration**.  
A sub-menu appears.

- Click the **Search** option from the **Feature Configuration** sub-menu.

The **Feature Configuration Search** window appears.

- Enter **C1\_MLTCURACC** in the **Feature Name** field.

- Click the **Search** button corresponding to the **Feature Name** field.

The **Feature Configuration** screen appears. It contains the following option types:

Option Type	Description	Mandatory (Yes or No)												
Allow Multi-Currency Accounts	<p>Used to indicate whether you want to enable the <b>Multi-Currency Accounts</b> feature. The valid values are:</p> <ul style="list-style-type: none"> <li><b>Y</b> - If the <b>Allow Multi-Currency Accounts</b> option type is set to <b>Y</b>, the following fields are enabled in the respective screen: <table border="1" data-bbox="657 646 1166 1014"> <thead> <tr> <th>Screen Name</th> <th>Field Name</th> </tr> </thead> <tbody> <tr> <td>Account</td> <td>Invoice Currency</td> </tr> <tr> <td>Billable Charge</td> <td>Currency Code (for Bill Line)</td> </tr> <tr> <td>Adjustment</td> <td>Currency</td> </tr> <tr> <td>Payment Event Add</td> <td>Payment Currency</td> </tr> <tr> <td>Rate Component</td> <td>Allow Currency Conversion</td> </tr> </tbody> </table> </li> <li><b>N</b> - If the <b>Allow Multi-Currency Accounts</b> option type is set to <b>N</b>, the <b>Invoice Currency</b> field is disabled in the <b>Account</b> screen. By default, the base currency of the account's division appears in the <b>Invoice Currency</b> field. If the base currency is not defined for the account's division, the currency code specified in the <b>Installation Options - Framework</b> screen appears in the <b>Invoice Currency</b> field.</li> </ul> <p><b>Note:</b> If you do not specify the value for this option type, by default, it is set to <b>N</b>.</p>	Screen Name	Field Name	Account	Invoice Currency	Billable Charge	Currency Code (for Bill Line)	Adjustment	Currency	Payment Event Add	Payment Currency	Rate Component	Allow Currency Conversion	No
Screen Name	Field Name													
Account	Invoice Currency													
Billable Charge	Currency Code (for Bill Line)													
Adjustment	Currency													
Payment Event Add	Payment Currency													
Rate Component	Allow Currency Conversion													
Transfer Adjustment Type	<p>Used to specify the adjustment type using which you want to create a transfer adjustment when an amount is converted from one currency to another.</p> <p><b>Note:</b> You must specify an adjustment type which is already defined in the system.</p>	<p>Yes (Conditional)</p> <p><b>Note:</b> This data is required when the <b>Allow Multi-Currency Accounts</b> option type is set to <b>Y</b>.</p>												
Reason Code for Cancelling Original Adjustment	<p>Used to specify the reason code that you want to use while cancelling the original currency conversion adjustment.</p> <p><b>Note:</b> You must specify an adjustment cancel reason which is already defined in the system.</p>	<p>Yes (Conditional)</p> <p><b>Note:</b> This data is required when the <b>Allow Multi-Currency Accounts</b> option type is set to <b>Y</b>.</p>												

6. Enter the values for the required option types in the **Feature Configuration** screen.
7. Click the **Save** button in the **Page Title** area.

The changes made to the feature configuration are saved.

## Setting the C1-ODBFC Feature Configuration

### Procedure

To set the **C1-ODBFC** feature configuration:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **F** and then click **Feature Configuration**.  
A sub-menu appears.
3. Click the **Search** option from the **Feature Configuration** sub-menu.  
The **Feature Configuration Search** window appears.
4. Enter **C1-ODBFC** in the **Feature Name** field.
5. Click the **Search** button corresponding to the **Feature Name** field.

The **Feature Configuration** screen appears. It contains the following option types:

Option Type	Description	Mandatory (Yes or No)
Average Record Size	Used to specify the average size of a usage record in bytes. By default, the value is set to 500. You can change the value, if required.	Yes
Billable Charge Chunk Size	Used to specify the number of billable charges you want to create in each work unit. By default, the value is set to 500. You can change the value, if required.	Yes
File Size Limit	Used to specify the size of a usage data file in bytes. By default, the value is set to 100000. You can change the value, if required.	Yes
Online Bill Creation Limit	Used to determine whether adhoc bills must be generated for a usage data file online or through the background process. If the total number of billable charges created for a usage data file exceeds the online bill creation limit, adhoc bills are generated for the usage data file through a batch process. By default, the value is set to 500. You can change the value, if required.	Yes

Option Type	Description	Mandatory (Yes or No)
Staging XML Size	Used to specify the number of usage records you want to parse and map in each XML file. By default, the value is set to 500. You can change the value, if required.	Yes
Thread Count	Used to specify the number of threads you want to spawn in parallel.	No
Thread Pool Name	Used to specify the thread pool on which you want to execute the batch.	No
Transaction Limit	Used to determine whether billable charges for a usage data file must be created online or through the background process. If the total number of valid or approved records in a usage data file exceeds the transaction limit, billable charges are created for the valid or approved records through a batch process.	No
Validation Chunk Size	Used to specify the number of usage records you want to validate or revalidate in each work unit. By default, the value is set to 500. You can change the value, if required.	Yes

- Enter the value for the option types in the **Feature Configuration** screen.
- Click the **Save** button in the **Page Title** area.

The changes made to the feature configuration are saved.

## Setting the C1-OFFSETREQ Feature Configuration

The **C1-OFFSETREQ** feature configuration enables the system to determine whether the completed debit or credit bills of the effective child persons of the main customer (whose bill is added as the primary bill in the offset request) should be listed when you search for a bill in the offset request.

### Procedure

To set the **C1-OFFSETREQ** feature configuration:

- Click the **Admin** link in the **Application** toolbar.  
A list appears.
- From the **Admin** menu, select **F** and then click **Feature Configuration**.

A sub-menu appears.

3. Click the **Search** option from the **Feature Configuration** sub-menu.

The **Feature Configuration Search** window appears.

4. Enter **C1-OFFSETREQ** in the **Feature Name** field.
5. Click the **Search** button corresponding to the **Feature Name** field.

The **Feature Configuration** screen appears. It contains the following option type:

Option Type	Description	Mandatory (Yes or No)
Allow Offsetting Across Persons	Used to indicate whether you want to offset bills across main customer's hierarchy. The valid values are: <ul style="list-style-type: none"> <li>• <b>Y</b> - Used when you want to offset one or more bills of the main customer against one or more bills of the same or other accounts of the main customer or against one or more bills of the accounts of its effective child persons.</li> <li>• <b>N</b> - Used when you want to offset one or more bills of the main customer against one or more bills of the same or other accounts of the main customer.</li> </ul>	Yes

6. Enter the value for the required option type in the **Feature Configuration** screen.
7. Click the **Save** button in the **Page Title** area.

The changes made to the feature configuration are saved.

## Setting the C1-PAYPORTAL Feature Configuration

### Procedure

To set the **C1-PAYPORTAL** feature configuration:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **F** and then click **Feature Configuration**.  
A sub-menu appears.
3. Click the **Search** option from the **Feature Configuration** sub-menu.  
The **Feature Configuration Search** window appears.
4. Enter **C1-PAYPORTAL** in the **Feature Name** field.
5. Click the **Search** button corresponding to the **Feature Name** field.

The **Feature Configuration** screen appears. It contains the following option types:

Option Type	Description	Mandatory (Yes or No)
Allow Overpayment	Used to indicate whether you want to allow overpayment against an entity while editing the payment amount. The valid values are: <ul style="list-style-type: none"> <li>true</li> <li>false</li> </ul>	Yes
FK Reference for Bill	Used to indicate the foreign key reference which generates the information string for a bill in the <b>Edit Payment Amount</b> screen.  <b>Note:</b> The C1-BLACT foreign key reference for bill is shipped with the product. You can also create a custom foreign key reference, if required.	Yes
FK Reference for Bill Segment	Used to indicate the foreign key reference which generates the information string for a bill segment in the <b>Edit Payment Amount</b> screen.  <b>Note:</b> The C1-BSEG foreign key reference for bill segment is shipped with the product. You can also create a custom foreign key reference, if required.	Yes
FK Reference for Contract	Used to indicate the foreign key reference which generates the information string for a contract in the <b>Edit Payment Amount</b> screen.  <b>Note:</b> The C1_F_SA foreign key reference for contract is shipped with the product. You can also create a custom foreign key reference, if required.	Yes
FK Reference for Settlement	Used to indicate the foreign key reference which generates the information string for a settlement ID in the <b>Edit Payment Amount</b> screen.  <b>Note:</b> At present, no foreign key reference for settlement ID is shipped with the product. Only the settlement ID appears in the information string. You can create a foreign key reference for settlement ID and specify it in this field.	No

- Enter the values for the required option types in the **Feature Configuration** screen.
- Click the **Save** button in the **Page Title** area.

The changes made to the feature configuration are saved.

## Setting the C1\_PER\_REL Feature Configuration

You can define person to person relationship type sequence in the **C1\_PER\_REL** feature configuration. This sequence is used while searching for effective price item pricing at the parent customer level.

### Procedure

To set the **C1\_PER\_REL** feature configuration:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **F** and then click **Feature Configuration**.  
A sub-menu appears.
3. Click the **Search** option from the **Feature Configuration** sub-menu.  
The **Feature Configuration Search** window appears.
4. Enter **C1\_PER\_REL** in the **Feature Name** field.
5. Click the **Search** button corresponding to the **Feature Name** field.

The **Feature Configuration** screen appears. It contains the following option types:

Option Type	Description	Mandatory (Yes or No)
Person to Person Relationship Type	Used to indicate the person to person relationship type.	Yes
	<b>Note:</b> If you want to define more than one relationship type in the feature configuration, you need to specify the sequence in which the relationship type should be considered while searching effective price item pricing at the parent customer level.	

6. Enter the values for the required option types in the **Feature Configuration** screen.
7. Click the **Save** button in the **Page Title** area.

The changes made to the feature configuration are saved.

## Setting the C1-PLSM Feature Configuration

The **C1-PLSM** feature configuration enables you to extract the details and summary of a price list simulation in the Excel format. Two FOP based reports are shipped with the product — **PLSM\_DETEXL** and **PLSM\_SMRYEXL**. You can use these FOP based reports or create the custom FOP based reports to extract the data in the Excel format.

### Prerequisites

To set the **C1-PLSM** feature configuration, you should have:

- Required FOP based reports defined in the application

### **Procedure**

To set the **C1-PLSM** feature configuration:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **F** and then click **Feature Configuration**.  
A sub-menu appears.
3. Click the **Search** option from the **Feature Configuration** sub-menu.  
The **Feature Configuration Search** window appears.
4. Enter **C1-PLSM** in the **Feature Name** field.
5. Click the **Search** button corresponding to the **Feature Name** field.

The **Feature Configuration** screen appears. It contains the following option types:

Option Type	Description	Mandatory (Yes or No)
Detail Report Code Excel	Used to specify the FOP based report using which you want to extract the detailed report of a price list simulation in the Excel format.	Yes
	<b>Note:</b> You can set the value of this option type to <b>PLSM_DETEXL</b> or to any custom FOP based report which is designed to show the detailed report of a price list simulation in the Excel format.	
Summary Report Code Excel	Used to specify the FOP based report using which you want to extract the summarized report of a price list simulation in the Excel format.	Yes
	<b>Note:</b> You can set the value of this option type to <b>PLSM_SMRYEXL</b> or to any custom FOP based report which is designed to show the summarized report of a price list simulation in the Excel format.	

6. Enter the values for the required option types in the **Feature Configuration** screen.
7. Click the **Save** button in the **Page Title** area.  
The changes made to the feature configuration are saved.

## **Setting the C1\_PPARM\_FLG Feature Configuration**

The **C1\_PPARM\_FLG** feature configuration enables the system to determine whether the multi parameter based pricing or variance parameter based pricing feature is enabled. For more information on how to define pricing for a price item or price item bundle based on multiple parameters, see [Multi Parameter Based Pricing](#) on page 271. For more information on how to define pricing for a price item or price item bundle based on variance parameter, see [Variance Parameter Based Pricing](#) on page 271.

### **Procedure**

To set the **C1\_PPARM\_FLG** feature configuration:

1. Click the **Admin** link in the **Application** toolbar.

A list appears.

- From the **Admin** menu, select **F** and then click **Feature Configuration**.

A sub-menu appears.

- Click the **Search** option from the **Feature Configuration** sub-menu.

The **Feature Configuration Search** window appears.

- Enter **C1\_PPARM\_FLG** in the **Feature Name** field.

- Click the **Search** button corresponding to the **Feature Name** field.

The **Feature Configuration** screen appears. It contains the following option type:

Option Type	Description	Mandatory (Yes or No)
Multi Price Parameter	Used to indicate whether you want to enable the multi parameter or variance parameter based pricing feature. The valid values are: <ul style="list-style-type: none"> <li><b>True</b> - Used when you want to enable the multi parameter based pricing feature.</li> <li><b>False</b> - Used when you want to enable the variance parameter based pricing feature.</li> </ul>	Yes

- Enter the value for the required option type in the **Feature Configuration** screen.

- Click the **Save** button in the **Page Title** area.

The changes made to the feature configuration are saved.

## Setting the C1\_PR\_REC Feature Configuration

### Procedure

To set the **C1\_PR\_REC** feature configuration:

- Click the **Admin** link in the **Application** toolbar.

A list appears.

- From the **Admin** menu, select **F** and then click **Feature Configuration**.

A sub-menu appears.

- Click the **Search** option from the **Feature Configuration** sub-menu.

The **Feature Configuration Search** window appears.

- Enter **C1\_PR\_REC** in the **Feature Name** field.

- Click the **Search** button corresponding to the **Feature Name** field.

The **Feature Configuration** screen appears. It contains the following option types:

Option Type	Description	Mandatory (Yes or No)
Effective Pricing RecordSet Limit	Used to specify the number of records that can be displayed in the <b>Search Results</b> section of the <b>Effective Price Assignment</b> zone. The value must be an integer and not in decimals. The maximum number of records that can be displayed are 5000.	Yes
	<b>Note:</b> If you enter the value as <b>0</b> or if you do not specify the value for the <b>Effective Pricing RecordSet Limit</b> option type, no records will be displayed in the <b>Search Results</b> section.	

6. Enter the values for the required option types in the **Feature Configuration** screen.

7. Click the **Save** button in the **Page Title** area.

The changes made to the feature configuration are saved.

### Related Topics

## Setting the C1\_PRICING Feature Configuration

The **C1\_PRICING** feature configuration enables the system to determine the following:

- The contract type that should be associated with a price item or price item bundle which is available for pricing.
- The priority that should be defaulted while assigning a price list to a person or an account from the user interface or through a business service.
- Whether the logs should be maintained when the **C1-GetAllAssignedPriceLists**, **C1-AssignPriceList**, **C1-GetEffectivePricing**, **C1-GetAccountRate**, **C1\_PRICEASSIGN\_SERVICE**, **C1-PriceAccount**, and **C1-GetPricing** business services are invoked.

### Prerequisites

To set the **C1\_PRICING** feature configuration, you should have:

- Contract types defined in the application

### Procedure

To set the **C1\_PRICING** feature configuration:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **F** and then click **Feature Configuration**.  
A sub-menu appears.
3. Click the **Search** option from the **Feature Configuration** sub-menu.

The **Feature Configuration Search** window appears.

4. Enter **C1\_PRICING** in the **Feature Name** field.
5. Click the **Search** button corresponding to the **Feature Name** field.

The **Feature Configuration** screen appears. It contains the following option types:

Option Type	Description	Mandatory (Yes or No)
Default Contract Type	Used to indicate the contract type that you want to associate with a price item or price item bundle which is available for pricing.	Yes
	<b>Note:</b> You must specify a contract type which is already defined in the system. You must ensure that the specified contract type is defined for all divisions in the system.	
Default Price List Priority	Used to indicate the default priority that should appear in the <b>Price List Assignment</b> screen when you assign a price list to a person or an account. You can then edit the priority, if required. It is also used when both the priority and priority indicator are not passed to the <b>C1-AssignPriceList</b> business service.	No
	<b>Note:</b> The value for this option type must be a positive integer.	
Enable Service Logging	Used to indicate whether you want to maintain logs when the <b>C1-GetAllAssignedPriceLists</b> , <b>C1-AssignPriceList</b> , <b>C1-GetEffectivePricing</b> , <b>C1-GetAccountRate</b> , <b>C1_PRICEASSIGN_SERVICE</b> , <b>C1-PriceAccount</b> , and <b>C1-GetPricing</b> business services are invoked. The valid values are: <ul style="list-style-type: none"> <li>• True</li> <li>• False</li> </ul>	No

6. Enter the values for the required option types in the **Feature Configuration** screen.
7. Click the **Save** button in the **Page Title** area.

The changes made to the feature configuration are saved.

## Setting the C1\_PRASNORDR Feature Configuration

The **C1\_PRASNORDR** feature configuration enables the system to determine the manner in which price assignments should be searched for a global customer. For more information on how effective price item pricing is derived, see [Price Assignment Search Mechanism](#) on page 276.

### Prerequisites

To set the **C1\_PRASNORDR** feature configuration, you should have:

- An algorithm defined using the **C1\_PRASN\_PP** algorithm type in the application

### Procedure

To set the **C1\_PRASNORDR** feature configuration:

- Click the **Admin** link in the **Application** toolbar.  
A list appears.
- From the **Admin** menu, select **F** and then click **Feature Configuration**.  
A sub-menu appears.
- Click the **Search** option from the **Feature Configuration** sub-menu.  
The **Feature Configuration Search** window appears.
- Enter **C1\_PRASNORDR** in the **Feature Name** field.
- Click the **Search** button corresponding to the **Feature Name** field.

The **Feature Configuration** screen appears. It contains the following option type:

Option Type	Description	Mandatory (Yes or No)
Price Assignment Algorithm	Used to specify the algorithm using which the price assignment should be searched for a global customer. <b>Note:</b> You must specify an algorithm which is already defined in the system.	Yes

- Enter the value for the required option type in the **Feature Configuration** screen.
- Click the **Save** button in the **Page Title** area.

The changes made to the feature configuration are saved.

## Setting the C1-PYREQSRT Feature Configuration

### Procedure

To set the **C1-PYREQSRT** feature configuration:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **F** and then click **Feature Configuration**.  
A sub-menu appears.
3. Click the **Search** option from the **Feature Configuration** sub-menu.  
The **Feature Configuration Search** window appears.
4. Enter **C1-PYREQSRT** in the **Feature Name** field.
5. Click the **Search** button corresponding to the **Feature Name** field.

The **Feature Configuration** screen appears. It contains the following option types:

Option Type	Description	Mandatory (Yes or No)
Bill	Used to sort columns by the selected option type. The table fields in CI_BILL table are used to set the values for the option type <b>Bill</b> . It also enables sorting by order. Its valid values are: <ul style="list-style-type: none"> <li>• Ascending</li> <li>• Descending</li> </ul>	No
Bill Segment	Used to sort columns by the selected option type. The table fields in CI_BSEG table are used to set the values for the option type <b>Bill Segment</b> . It also enables sorting by order. Its valid values are: <ul style="list-style-type: none"> <li>• Ascending</li> <li>• Descending</li> </ul>	No
Contract	Used to sort columns by the selected option type. The table fields in CI_SA table are used to set the values for the option type <b>Contract</b> . It also enables sorting by order. Its valid values are: <ul style="list-style-type: none"> <li>• Ascending</li> <li>• Descending</li> </ul>	No

**Note:** Above options types are configured for the **Sort By** field for sorting columns on the **Edit Payment Amount** screen.

6. Enter the values for the required option types in the **Feature Configuration** screen.
7. Click the **Save** button in the **Page Title** area.

The changes made to the feature configuration are saved.

## Setting the C1\_RLENG Feature Configuration

### Procedure

To set the **C1\_RLENG** feature configuration:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **F** and then click **Feature Configuration**.  
A sub-menu appears.
3. Click the **Search** option from the **Feature Configuration** sub-menu.  
The **Feature Configuration Search** window appears.
4. Enter **C1\_RLENG** in the **Feature Name** field.
5. Click the **Search** button corresponding to the **Feature Name** field.

The **Feature Configuration** screen appears. It contains the following option types:

Option Type	Description	Mandatory (Yes or No)
Logging Rules for Transaction Feed	Used to indicate whether a log should be generated when you execute the <b>Transaction Validation and Initial Product Determination (C1-TXNIP)</b> batch. The valid values are: <ul style="list-style-type: none"> <li>• True</li> <li>• False</li> </ul>	Yes
	<b>Note:</b> This log indicates the rules that were executed for each transaction and whether each rule passed or failed during the execution.	
Maximum Number of Rules in Cache	Used to indicate the maximum number of rules whose entry should be created in the log file.	Yes

6. Enter the values for the required option types in the **Feature Configuration** screen.
7. Click the **Save** button in the **Page Title** area.

The changes made to the feature configuration are saved.

## Setting the C1-TXNDMYID Feature Configuration

For manually added transactions, the system can generate header details including the header ID automatically if you set the option types in the **C1-TXNDMYID** feature configuration.

### Procedure

To set the **C1-TXNDMYID** feature configuration:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **F** and then click **Feature Configuration**.  
A sub-menu appears.
3. Click the **Search** option from the **Feature Configuration** sub-menu.  
The **Feature Configuration Search** window appears.
4. Enter **C1-TXNDMYID** in the **Feature Name** field.
5. Click the **Search** button corresponding to the **Feature Name** field.

The **Feature Configuration** screen appears. It contains the following option types:

Option Type	Description	Mandatory (Yes or No)
Dummy File Name	Used to specify the dummy file name.	Yes
Dummy Header ID	Used to specify the dummy header ID.	Yes
Dummy Transaction Source	Used to specify the dummy transaction source.	Yes
Dummy Header Date	Used to specify the dummy header date.	Yes

6. Enter the values for the required option types in the **Feature Configuration** screen.
7. Click the **Save** button in the **Page Title** area.  
The changes made to the feature configuration are saved.

## **Setting the C1-PAYFLUPLD Feature Configuration**

### **Procedure**

To set the **C1-PAYFLUPLD** feature configuration:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **F** and then click **Feature Configuration**.  
A sub-menu appears.
3. Click the **Search** option from the **Feature Configuration** sub-menu.  
The **Feature Configuration Search** window appears.
4. Enter **C1-PAYFLUPLD** in the **Feature Name** field.
5. Click the **Search** button corresponding to the **Feature Name** field.  
The **Feature Configuration** screen appears. It contains the following option types:

Option Type	Description	Mandatory (Yes or No)
Payment Portal Thread Count	Used to specify the number of threads you want to spawn in parallel. This value is used when a batch job is automatically created for the <b>Create Payments from Payment Staging Records (PUPL)</b> batch.	No
	<b>Note:</b> By default, the value is set to <b>5</b> . You can change the value, if required.	
Thread Pool Name	Used to specify the thread pool on which you want to execute the batch. This value is used when a batch job is automatically created for the following batches: <ul style="list-style-type: none"> <li>• Upload Payment Records in Pre-Staging Area (C1-PYUP1)</li> <li>• Move Payment Records to Staging Area (C1-PYUP2)</li> <li>• Create Payments from Payment Staging Records (PUPL)</li> </ul>	No

6. Enter the values for the required option types in the **Feature Configuration** screen.
7. Click the **Save** button in the **Page Title** area.

The changes made to the feature configuration are saved.
