# 1. Preface

## 1.1 Introduction

This manual is intended as a guide to help you define User Defined events in Oracle Banking Treasury Management. Besides this User Manual, you can find answers to specific features and procedures in the Online Help, which can be invoked, by choosing 'Help Contents' from the *Help* Menu of the software. You can further obtain information specific to a particular field by placing the cursor on the relevant field and striking <F1> on the keyboard.

## 1.2 Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc>.

## 1.3 Organization

This manual is organized as follows:

Chapter	Description
Chapter 1	<i>About this Manual</i> gives information on the intended audience. It also lists the various chapters covered in this User Manual.
Chapter 2	<i>Building User Defined Events</i> explains how to define events in Oracle Banking Treasury Management either for your own convenience or to suit the requirements of your bank.

## 1.4 Glossary of Icons

This User Manual may refer to all or some of the following icons.

Icons	Function
	Exit
	Add row
	Delete row
	Option List

## 1.5 Related Documents

For further information on procedures discussed in the manual, refer to the Oracle Banking Treasury Management manuals on:

- Core Services
- Common Procedures

## 2. User Defined Events

### 2.1 Introduction

A contract that you process in Oracle Banking Treasury Management goes through different stages during its life cycle. These stages are defined as Events. Every new module that you maintain has to be associated with a set of events, which is triggered at appropriate stages during the lifecycle of the contract.

Apart from the factory shipped events, you can create your own events as per the requirements of the bank.

This chapter contains the following sections:

- [Section 2.2, "Event Details"](#)
- [Section 2.3, "Treasury User Defined Events"](#)
- [Section 2.4, "Accounting Roles and Heads"](#)
- [Section 2.5, "User Defined Events"](#)

### 2.2 Event Details

This section contains the following topics:

- [Section 2.2.1, "Invoking User Defined Events Screen"](#)
- [Section 2.2.2, "Default Button"](#)
- [Section 2.2.3, "Value Date Derivation Button"](#)
- [Section 2.2.4, "Event Processing Button"](#)
- [Section 2.2.5, "Treasury Events"](#)

#### 2.2.1 Invoking User Defined Events

You can define the events through the **Treasury User Defined Events** screen. Enter **UDDTREV** in the field and clicking on the adjoining arrow button.

You can define events for a new module and also for existing modules in this screen.

Treasury User Defined Events

New Enter Query

Module \*  
Event Code \*  
Event Description

Acct Entry Definition No  
Advices Definition No  
User Data Element Advices Definition No

Apply  
Allow Charge No  
Allow Transaction Tax No

Association  
Allow Charge No  
Allow Transaction Tax No

Liquid Preference  
Allow Charge No  
Allow Transaction Tax No

Fields | Default

Maker	Date Time:	Mod No	Record Status
Checker	Date Time:		Authorization Status

Exit

User defined events is linked to a product and is triggered in the life cycle of a contract, which is processed under that product.

**Module**

Specify the module for which you want to set up a user-defined event. The adjoining option list contains all the module codes available in the system. Select the appropriate one.

**Event Code**

Specify the event code that you want to set up for the module.

**Event Description**

Give a brief description of the event that you are defining. The description that you enter is for information purposes.

**Accounting Entries Definition**

Specify the accounting entries definition. You have the following options:

- **Yes**
- **No**

**Advices Definition**

Specify the advice entries definition. You have the following options:

- **Yes**
- **No**

**User Data Element Advices Definition**

Specify the UDE advice definition. You have the following options:

- **Yes**
- **No**

**Association**

Indicate your preferences.

**Allow Charge**

Specify the association allow charge. You have the following options:

- **Yes**
- **No**

**Allow Transaction Tax**

Specify the association allow transaction tax. You have the following options:

- **Yes**
- **No**

**Apply**

Indicate your preferences.

### Allow Charge

Specify the application allow charge. You have the following options:

- **Yes**
- **No**

### Allow Transaction Tax

Specify the application allow transaction tax. You have the following options:

- **Yes**
- **No**

### Liquid Preference

Indicate your preferences.

### Allow Charge

Specify the liquidation allow charge. You have the following options:

- **Yes**
- **No**

### Allow Transaction Tax

Specify the liquidation allow transaction tax. You have the following options:

- **Yes**
- **No**

## 2.2.2 Default

Click **Default** tab in the **Treasury User Defined Events** screen to define the triggering parameters for the configured event.

The screenshot shows the 'Event Trigger' configuration window. It includes the following elements:

- Module \***: A text input field with a red asterisk.
- Event Code \***: A text input field with a red asterisk.
- Event Trigger**: Radio buttons for **Automatic** and **Manual**.
- Value Date Derivation**: A checkbox.
- Event Processing**: A checkbox.
- Execution Query**: A large text area for defining the triggering query.
- Status Bar**: Displays 'Value Date Derivation | Event Processing' and has 'OK' and 'Exit' buttons.

In this **Event Trigger** screen you can enter the following details below:

#### Module

The system displays the module code here.

#### Event Code

The system displays the event code here.

#### Event Trigger

The event, which you are defining, can be triggered in either of the following ways:

- **Automatic** – This means that the event should be triggered automatically during EOD.

- **Manual** - This means that the event should be triggered manually from the **Treasury User Defined Events** triggering screen.

### **Value Date Derivation**

Check this box to indicate that the value date derivation is defined for a particular event.

### **Event Processing**

Check this box to indicate the event processing is defined for a particular event.

### **Execution Query**

Enter the query condition to select the list of accounts for the execution of the event during EOD. Input to this field will be mandatory if you choose 'Automatic' triggering of the event.

## **2.2.3 Value Date Derivation**

Click the **Value Date Derivation** tab on the **Event Trigger** screen and specify the value date derivation logic.

In this **Derivation Rule** screen you can enter the following details:

#### **Module**

The system displays module code here.

#### **Event Code**

The system displays event code here.

#### **X**

Click the **X** button to execute the code. The derivation code is validated by the system. If any checks fail, you must alter the statement so that the validation can be made successfully. If any errors during validation system will display the error.

## **2.2.4 Event Processing**

Click the **Event Processing** tab on the **Event Trigger** screen and specify the following fields in the **Derivation Rule** screen to assign values for processing of the event.

In this screen you can enter the following details:

**Module Code**

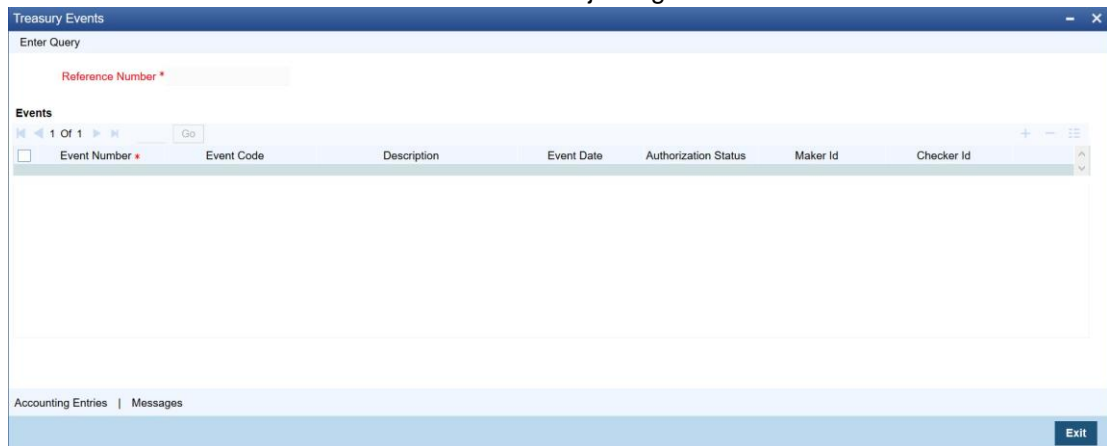

The system displays module code here.

**Event Code**

The system displays event code here.

**2.2.5 Treasury Events**

You can view the event details maintained in the **Treasury Events** screen of a contract screen. Enter **CSDTREVN** in the field and click on the adjoining arrow button.

**Reference Number**

Specify the reference number.

The system displays the following details:

- **Event Number**
- **Event code**
- **Description**
- **Event Date**
- **Authorization Status**
- **Maker Id**
- **Checker Id**

## Viewing Accounting Entries

You can view the accounting entries maintained for an event in the **Treasury Accounting Entries** screen. Enter **CSDTRACE** in the field and click on the adjoining arrow button. Specify the following fields in the **Account Entries** tab.

The screenshot shows the 'Treasury Accounting Entries' application window. At the top, there is an 'Enter Query' section with three input fields: 'Reference Number \*', 'Event Number \*', and 'Event \*'. Below this, there are two tabs: 'Accounting Entries' (which is active) and 'Overrides'. Under the 'Accounting Entries' tab, there is a 'Go' button and a table. The table has the following columns: Event, Branch, Account, Account Description, Debit or Credit, Amount Tag, Account Currency, Foreign Currency Amount, Rate, and Local Currency. The table is currently empty. At the bottom right of the window, there is an 'Exit' button.

### **Reference Number**

Specify the transaction reference number

### **Event**

Specify the event.

### **Event Number**

The system displays the event number.

The following details are displayed in the Accounting Entries:

- **Event**
- **Branch**
- **Account**
- **Account Description**
- **Debit/Credit**
- **Amount Tag**
- **Account Currency**
- **Foreign Currency Amount**
- **Rate**
- **Local Currency Amount**
- **Date**
- **Value Date**
- **Txn Code**

## Override Details

Click on the **Overrides** tab to view the override details of the accounting entries.

The screenshot shows the 'Treasury Accounting Entries' application window. At the top, there is an 'Enter Query' section with two input fields: 'Reference Number \*' and 'Event Number \*'. Below this, there are two tabs: 'Accounting Entries' and 'Overrides', with 'Overrides' being the active tab. The main area displays a table with the following columns: 'Overrides', 'Override Status', 'Authorized By', and 'Auth Date Stamp'. The table is currently empty. At the bottom right of the window, there is an 'Exit' button.

## Viewing Messages

You can view the messages by selecting an event and clicking on **Message Details** button in the **Treasury Message** screen. Enter **CSDTRMVW** in the field and click on the adjoining arrow button.

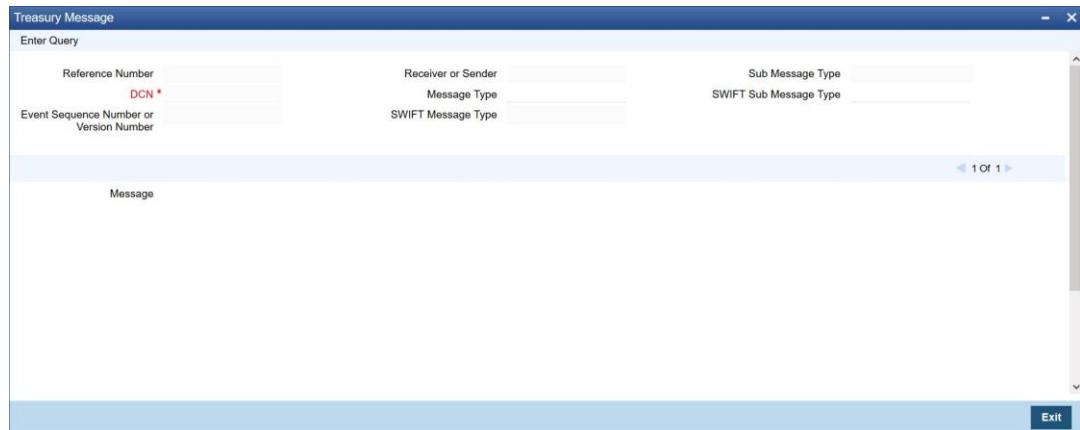

The screenshot shows the 'Treasury Message' application window. At the top, there is an 'Enter Query' section with three input fields: 'Contract Reference \*', 'Event Sequence Number \*', and 'Event'. Below this, there is a 'Messages' section with a table. The table has the following columns: 'Message Type', 'SWIFT Message Type', 'Sub Message Type', 'SWIFT Sub Message Type', 'Test Status', 'Medium', 'Message Status', and 'Authorization Status'. The table is currently empty. At the bottom of the window, there is a 'Print' button and an 'Exit' button.

The system displays the following details:

- **Contract Reference**
- **ESN**
- **Event**
- **Message Type**
- **SWIFT Message Type**
- **Sub Message Type**
- **SWIFT Sub Message Type**
- **Test Status**
- **Medium**
- **Message Status**
- **Authorization Status**
- **Receiver**
- **Receiver Name**
- **DCN**

## Message Details

Click the **Messaging Details** tab on the **Treasury Message** screen to view the message details.

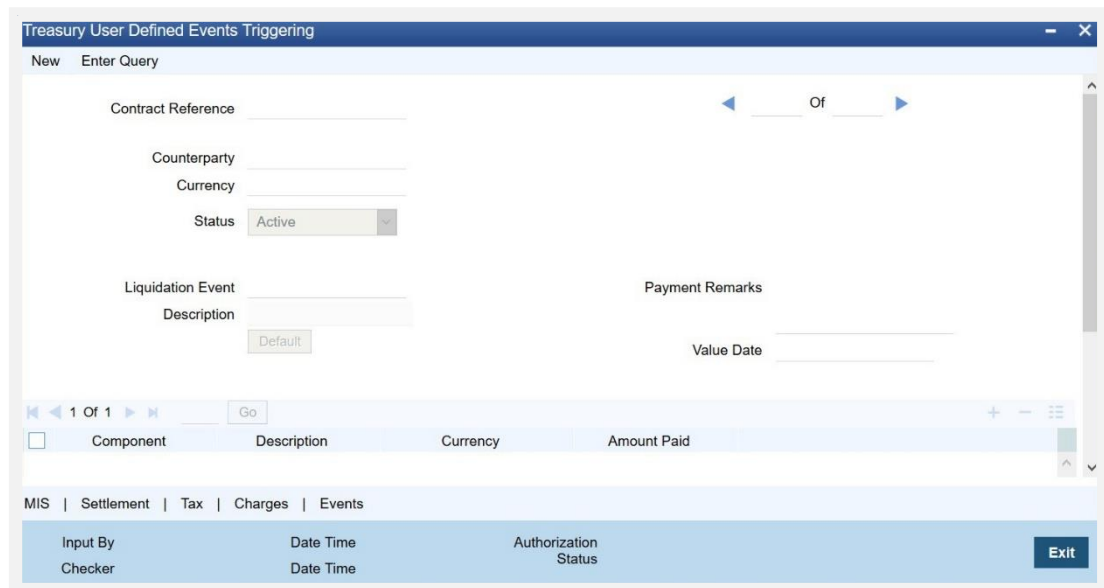

The screenshot shows the 'Treasury Message' window with the following fields:

- Reference Number (with a red 'DCN \*' indicator)
- Receiver or Sender
- Sub Message Type
- Event Sequence Number or Version Number
- Message Type
- SWIFT Sub Message Type
- SWIFT Message Type

Below the search fields is a 'Message' display area with a '1 Of 1' indicator. An 'Exit' button is located at the bottom right.

## 2.3 Treasury User Defined Events Triggering

You can use the **Treasury User Defined Events Triggering** screen to manually trigger the user defined events for accounts. Enter **UDDTREV** in the field and click on the adjoining arrow button.

The screenshot shows the 'Treasury User Defined Events Triggering' window with the following fields:

- Contract Reference
- Counterparty
- Currency
- Status (set to 'Active')
- Liquidation Event Description (with a 'Default' button)
- Payment Remarks
- Value Date

Below the search fields is a table with the following columns: Component, Description, Currency, and Amount Paid. The table is currently empty. A 'Go' button is located to the right of the table. At the bottom, there are fields for 'Input By', 'Checker', 'Date Time', and 'Authorization Status'. An 'Exit' button is located at the bottom right.

Here you need to specify the following details:

### **Contract Reference**

Select the contract reference number from the adjoining option list.

### **Event**

Select the event from the adjoining option list.

### **Description**

Give a brief description on the event.

### **Payment Remarks**

Specify remarks pertaining to the payment on the account.

## Value Date

If the value date derivation rule has been maintained for the event code, the system will calculate the value date and display it here. However, you can change it.

## Amount Details

The system displays the following amount details:

- **Component**
- **Description**
- **Currency**
- **Amount Paid**

## 2.4 Accounting Roles and Heads

This section contains the following topics:

- Treasury Roles and Heads
- Accounting Roles

### 2.4.1 Treasury Roles and Heads

You can define the amount tags for accounting roles through the **Treasury Role and Head Maintenance** screen. Enter **UDDTRRLT** in the field and click on the adjoining arrow button.

Treasury Role and Head Maintenance

New Enter Query

Module Id \_\_\_\_\_

Module Description \_\_\_\_\_

Amount Tag Accounting Roles

1 Of 1 Go

<input type="checkbox"/>	Amount Tag	Description	Charge	Accounting	Transaction Tax	Local Currency	Local Currency Eq.Tag	Derivation
	1 Of 1							

Maker Date Time: Mod No Record Status

Checker Date Time: Authorization Status

Exit

You can specify the following parameters for the module:

- **Amount Tag**
- **Accounting Roles**

### Amount Tag

This tab is displayed by default when you invoke the screen.

#### **Amount Tag**

Specify the amount tag.

#### **Description**

Enter the brief description for amount tag.

#### **Charge**

Indicate whether the amount tag pertains to a charge or not by choosing one of the following

options:

- **Yes**
- **No**

### Accounting

Indicate whether accounting entries are required or not by choosing one of the following options:

- **Yes**
- **No**

### Transaction Tax

Indicate whether transaction tax is applicable or not by choosing one of the following options:

- **Yes**
- **No**

### Local Currency

Indicate the local currency preference by choosing one of the following options:

- **Average**
- **Equivalent**

### Local Currency Equivalent Tag

Specify the amount tag for the local currency equivalent amount.

Click **Derivation** button and invoke the **Derivation Rule Details** screen to derive the amount and currency for the amount tag.

The screenshot shows a software interface for defining derivation rules. It features two columns: 'Amount Rule Derivation' and 'Currency Rule Derivation'. Each column contains a text input field for the rule name, a checkbox for 'Type', and an 'Execute' button. The 'Type' checkboxes are currently unchecked, and 'Default' buttons are visible below them. The interface also includes 'Module Code' and 'Amount Tag' input fields at the top, and 'Ok' and 'Cancel' buttons at the bottom right.

Here you can specify derivation logic for the following:

- **Amount Rule**
- **Currency Rule**

### Module Code

The system displays module code here.

### Amount Tag

The system displays the amount tag here.

### Amount Rule Derivation

You can specify the following details.

### Amount Rule Type

Check this box if the amount has to be derived based on a specified condition. The amount for a particular tag can be derived based on a condition.

### **Derivation Amount Rule**

If you have checked against the option 'Amount Rule Type', the system will derive the amount for the amount tag that is being defined. You can use the following as variables while creating the derivation rule:

- SDE

You can use any of the following SDEs:

- CUSTOMER\_CATEGORY - Category of the customer of the loan
- CUSTOMER\_ID - Customer ID
- ACCOUNT\_CCY - Loan account's currency
- TODAY - Today
- NEXT\_WORKDAY - Date of next workday
- PAYMENT\_VALUE\_DATE - Payment value date
- LAST\_PAYMENT\_DATE - Last payment date for the customer
- TOTAL\_DUE\_AMOUNT - Sum of all the Outstanding Balances for the Customer
- LAST\_PAYMENT\_AMOUNT - Last Payment Amount for the Customer
- CURRENT\_PAYMENT\_AMOUNT - Current Amount which is Due
- PAID\_INTEREST\_AMOUNT - Total Interest Amount Paid
- INTEREST\_ACCRUED\_AMOUNT - Sum of all the Accrued Amounts for Interest
- \_OVR\_DAYS - <Component> overdue days
- \_EXPECTED - <Component> expected amount
- \_OUTSTAND - <Component> outstanding amount
- \_CCY - <Component> currency
- \_OVERDUE - <Component> overdue amount

### **Amount Rule Error Description**

Enter a brief description about amount rule error that should be displayed in case the derivation fails.

### **Currency Rule Derivation**

The currency can either be derived from the existing account currency or can be maintained as a UDF field in the account or it can be hard-coded in the 'Currency Rule Definition' screen.

### **Currency Rule Type**

Check this box if the currency for a particular amount tag has to be derived based on the derivation rule.

### **Derivation Currency Rule**

Specify the rule based on which the system should derive the currency for the amount tag. You need to assign a value to 'L\_CCY'. For instance, the rule may be given as under.

BEGIN

Select contract\_ccy

into l\_ccy

from cstb\_tf\_contract

where contract\_ref\_no = p\_acc\_no

and branch\_code = p\_branch

END;

### **Currency Rule Error Description**

Enter a brief description about currency rule error that should be displayed in case the derivation fails.

## **2.4.2 Accounting Roles Tab**

Click **Accounting Role** tab in the **Treasury Role and Head Maintenance** screen.

The screenshot shows the 'Treasury Role and Head Maintenance' window. At the top, there is a 'Save' button. Below it are input fields for 'Module Id', 'Module Description', and 'Amount Tag' (which is currently set to 'Accounting Roles'). A navigation bar shows '1 Of 1' records. Below the navigation bar is a table with columns for 'Role Code', 'Description', and 'Role Type'. The table is currently empty. At the bottom of the window, there are fields for 'Maker', 'Checker', 'Date Time', 'Mod No', 'Record Status', and 'Authorization Status', along with a 'Cancel' button.

In this screen you can enter the following details:

### **Role Code**

Specify the role code.

### **Description**

Enter a brief description about role code.

### **Role Type**

Select the role type from the adjoining drop-down list. The following values are available:

- **Asset**
- **Liability**
- **Income**
- **Expense**
- **C Asset**
- **C Liability**
- **Customer**

## **2.5 User Defined Events**

This section contains the following topics:

- [Section 2.5.1, "Triggering User Defined Events Automatically"](#)

### **2.5.1 Triggering User Defined Events Automatically**

You can add the user defined event batch to the mandatory programs to be run for the module, using the **Mandatory Batch Program Maintenance** screen. Enter **EIDMANPE**

in the field and click the adjoining arrow button.

Mandatory Batch Program Maintenance
