# 1. Deploying Oracle Banking Treasury Management on WebLogic

# 1.1 Introduction

This chapter explains the steps to deploy Oracle Banking Treasury Management application into Oracle WebLogic application server.

# 1.2 **Building Application**

For building Oracle Banking Treasury Management Application, refer to the following chapters.

# 1.2.1 Building Application

Refer to the chapter 'Building Application'. This includes the following details:

- Creating Property File
- Building EAR File
- Configuring Plug-ins
- Loading Properties Files

# 1.3 Deploying Application in Oracle WebLogic

This section explains the method of deploying Oracle Banking Treasury Management Application into Oracle WebLogic application server.

#### 1.3.1 Deploying Integration Adapter EAR from WebLogic Administration Console

To deploy Oracle Banking Treasury Management Application from Oracle WebLogic administration console, follow the steps given below.

 Start the Administrative Console of WebLogic application server. You can start this by entering Oracle WebLogic Admin Console URL in the address bar in an internet browser.
 Eg: http://10.10.10.101/console

The following screen is displayed:

ORACLE WebLogic Server Administration Con	sole 12c
120	Welcome         Log in to work with the WebLogic Server domain         Username:         Password:         Login

2. Specify the WebLogic administrator user name and password. Click 'Log In'.

### 1.3.3 Deploying OBTRM Application from WebLogic Administration Console

To deploy Oracle Banking Treasury Management Application from Oracle WebLogic administration console, follow the steps given below.

 Start the Administrative Console of WebLogic application server. You can start this by entering Oracle WebLogic Admin Console URL in the address bar in an internet browser. Eg: http://10.10.10.1001/console

The following screen is displayed:

ORACLE WebLogic Server Administration Console	12c
	Welcome         Log in to work with the WebLogic Server domain         Username:         Password:         Login

2. Specify the WebLogic administrator user name and password. Click 'Log In'.

## The following screen is displayed:

WebLogic Server Version: 12.2.1.0.0 Convrict (c) 1996 2015. Oracla and/or its affil

There are several ways you can target an application.            • Install this deployment as an application        The application and its components will be targeted to the same locations. This is the most common usage.             • Install this deployment as a library        Application libraries are deployments that are available for other deployments to share. Libraries should be available on all of the targets running their referencing applications.             • Install this deployment as an application, but target the components individually             Useful when one or more of the modules or components must have targets unique from the rest of the application.             Back       Install	111

21. Click 'Yes'. The following screen is displayed.

This completes the deployment process.

## 1.3.4 <u>Deploying Gateway/Scheduler Applications from WebLogic Administration</u> <u>Console</u>

To deploy Oracle Banking Treasury Management Gateway/Scheduler Application from Oracle WebLogic administration console, follow the steps given below.

 Launch Administrative Console of WebLogic application server. You can launch this by entering Oracle WebLogic Admin Console URL in the address bar in an internet browser. Eg: http://10.10.10.1001/console

22. The following screen is displayed:

ORACLE WebLogic Server Administration	Console 12c
120	Welcome         Log in to work with the WebLogic Server domain         Username:         Password:         Login

23. Specify the WebLogic administrator user name and password. Click 'Log In'.

The following screen is displayed:
