1. Deploying Oracle Banking Treasury Management on WebLogic

1.1 Introduction

This chapter explains the steps to deploy Oracle Banking Treasury Management application into Oracle WebLogic application server.

1.2 Building Application

For building Oracle Banking Treasury Management Application, refer to the following chapters.

1.2.1 Building Application

Refer to the chapter 'Building Application'. This includes the following details:

- Creating Property File
- Building EAR File
- Configuring Plug-ins
- Loading Properties Files

1.3 Deploying Application in Oracle WebLogic

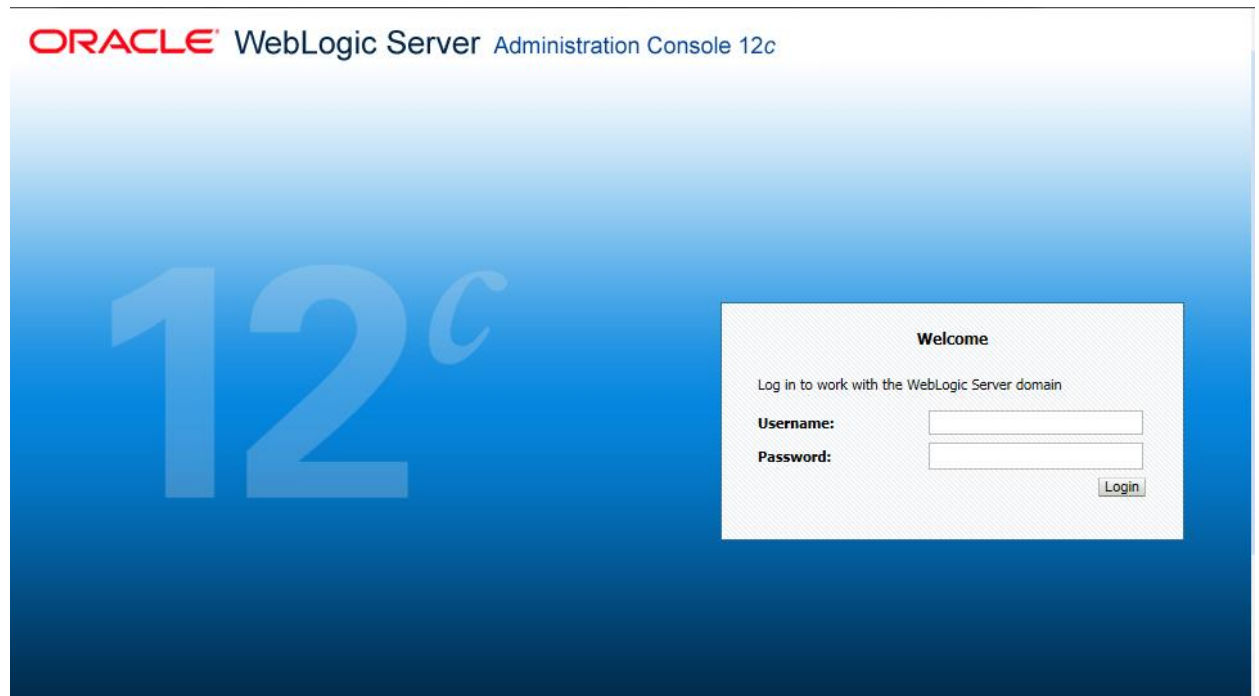

This section explains the method of deploying Oracle Banking Treasury Management Application into Oracle WebLogic application server.

1.3.1 Deploying Integration Adapter EAR from WebLogic Administration Console

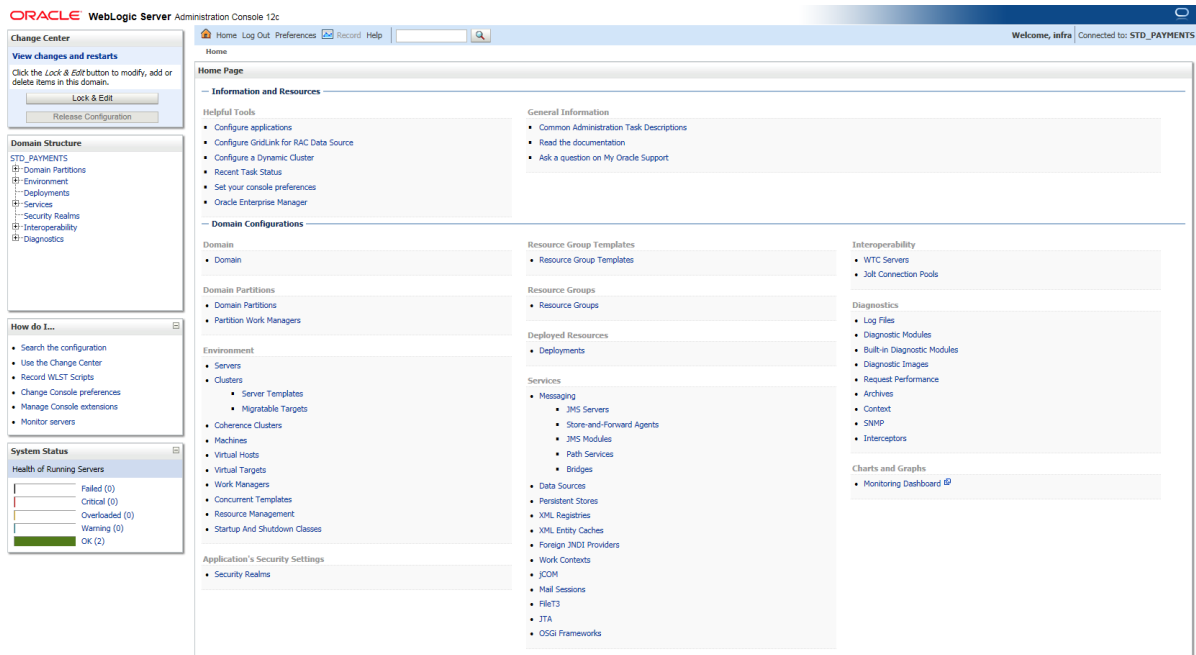

To deploy Oracle Banking Treasury Management Application from Oracle WebLogic administration console, follow the steps given below.

1. Start the Administrative Console of WebLogic application server. You can start this by entering Oracle WebLogic Admin Console URL in the address bar in an internet browser.
Eg: <http://10.10.10.10:1001/console>

The following screen is displayed:

2. Specify the WebLogic administrator user name and password. Click 'Log In'.

Summary of Deployments

Configuration

Control

Monitoring

This page displays the list of Java EE applications and standalone application modules installed to this domain.

You can update (redploy) or delete installed applications and modules from the domain by selecting the checkbox next to the application name and then using the controls on this page.

To install a new application or module for deployment to targets in this domain, click **Install**.

Locate deployment to install and prepare for deployment

Select the file path that represents the application root directory, archive file, exploded archive directory, or application module descriptor that you want to install. You can also enter the path of the application directory or file in the Path field.

Note: Only valid file paths are displayed below. If you cannot find your deployment files, upload your file(s) and/or confirm that your application contains the required deployment descriptors.

Path:

Recently Used Paths: (none)

Current Location: ddhp0520.i-flex.com \D:

 - 11.0
 - 9NT1272
 - APPOINT SOFTWARE SOLUTIONS
 - backup
 - bea
 - bea11g
 - bea_100
 - BmDbgs
 - ClearCase
 - CRC
 - Desktop
 - Documents and Settings

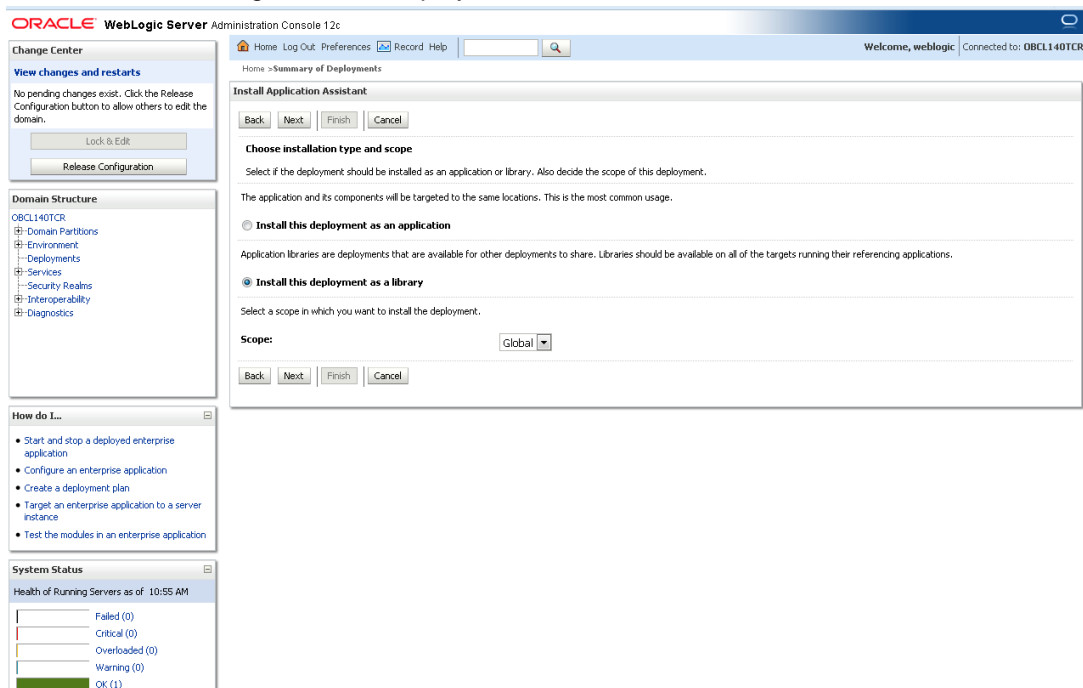

- ORACLE®

7. Click 'Next'. The following screen is displayed.

8. Select the application Adapter EAR from the list.

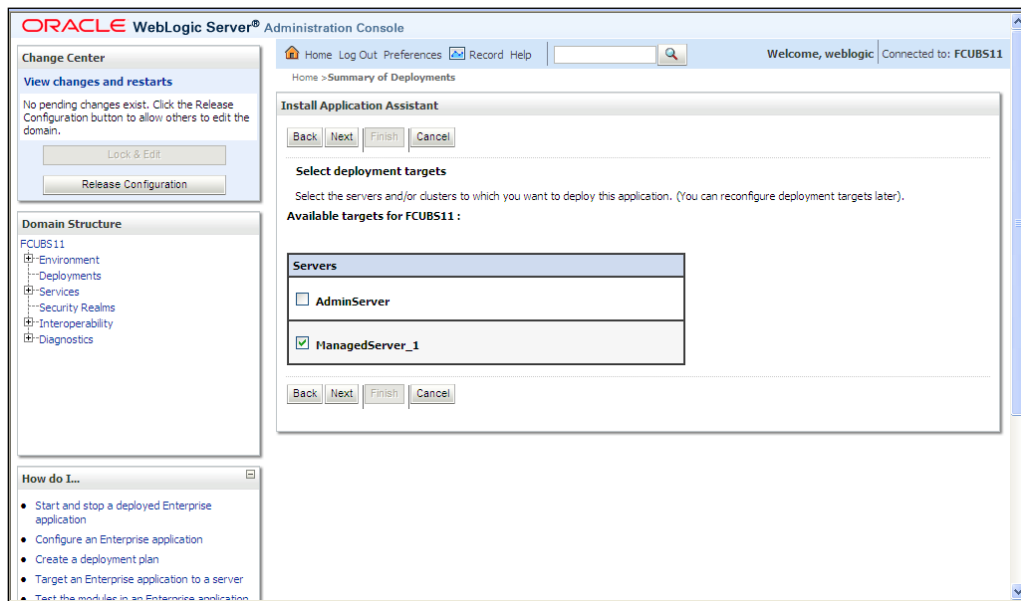

9. Click 'Next'. Following screen is displayed:

10. Choose the targeting style 'Install this deployment as a library'.

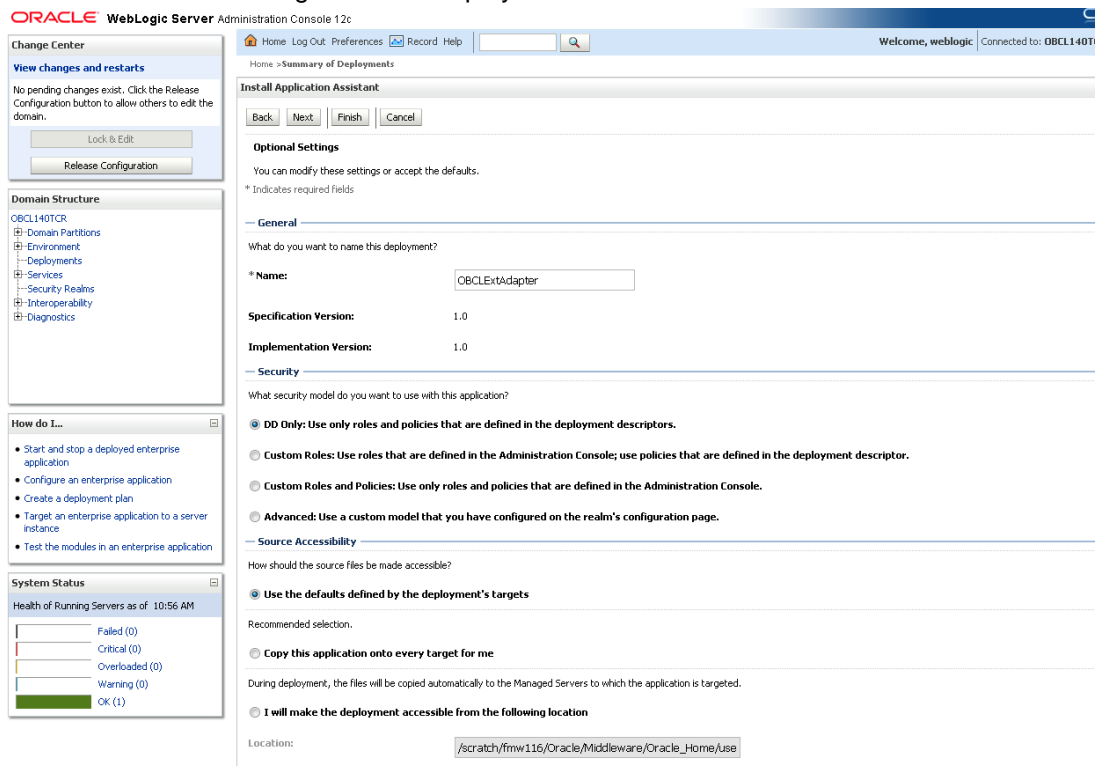

11. Click 'Next'.

12. The following screen is displayed

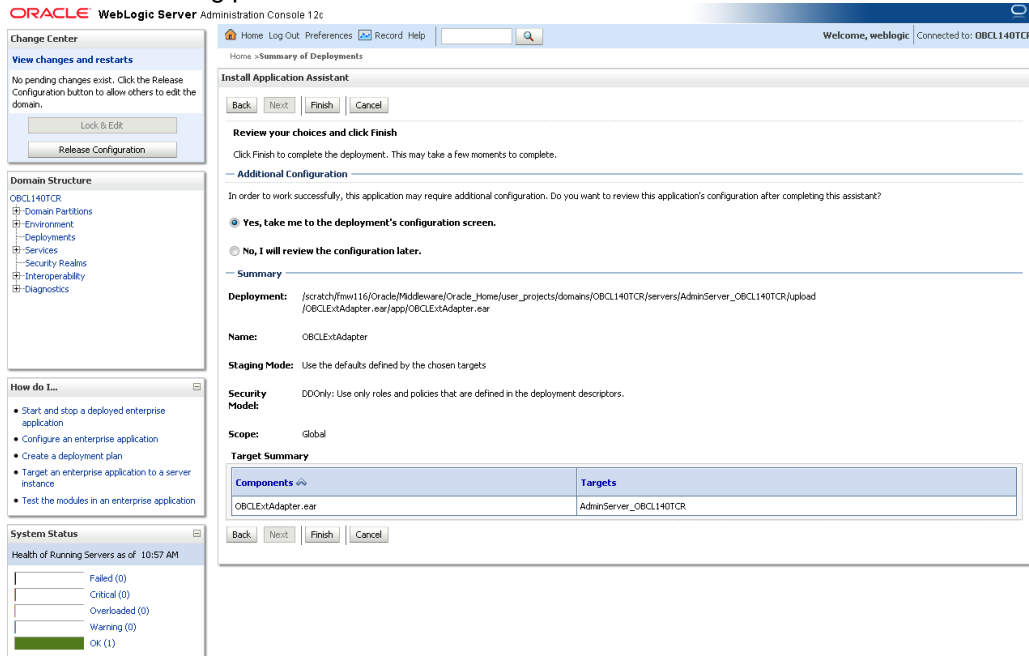

13. Select the target of the application. You can choose the server 'AdminServer' or 'Managed Server(s)'.

14. Click 'Next'. The following screen is displayed.

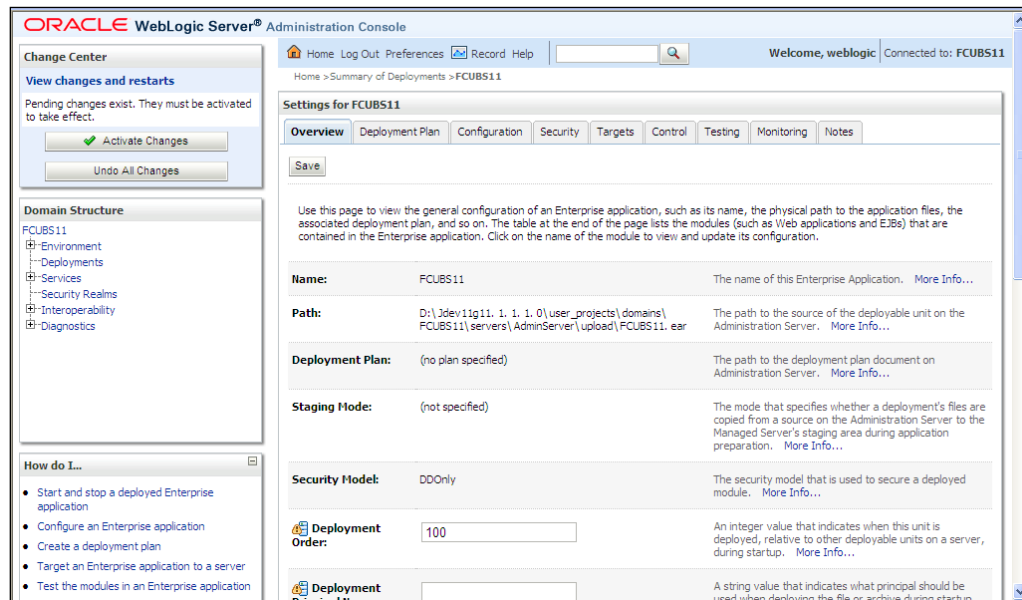

15. Check the deployment name.

16. The remaining portion of the screen is shown below:

17. Click 'Finish' button. The following screen is displayed.

18. Click 'Save' button. The message 'Settings updated successfully' is displayed.

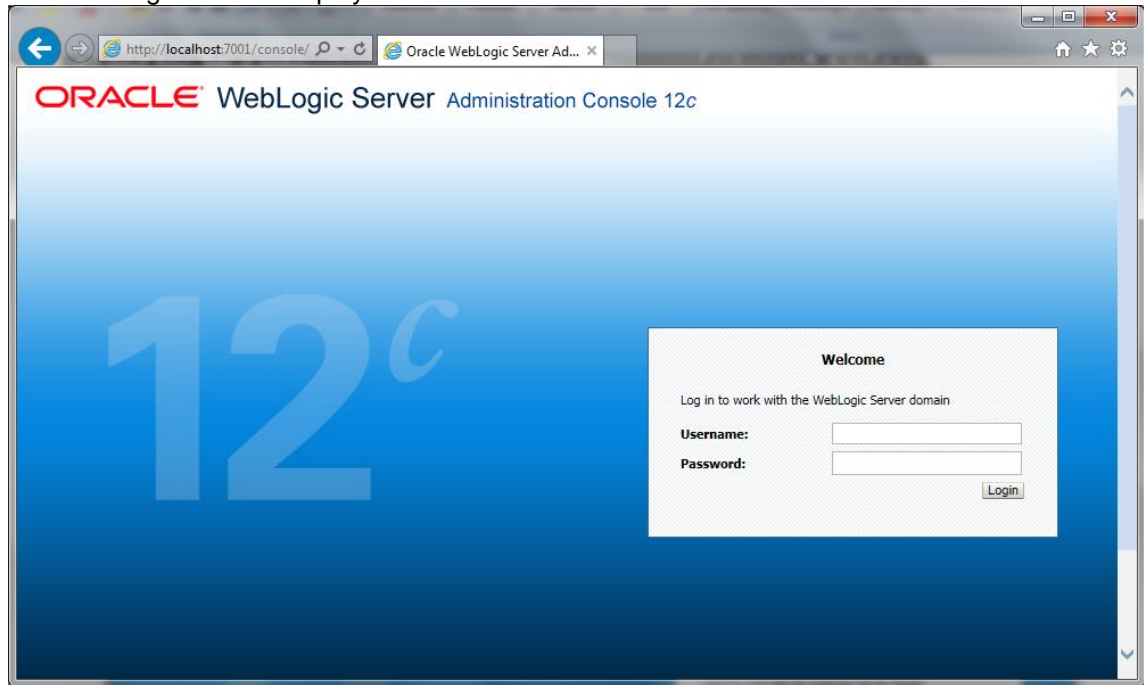

19. Click 'Activate Changes' button on the left pane. The message 'All the changes have been activated. No restarts are necessary' is displayed.

1.3.2 Deploying Dependency Library "Jax-RS"

This library must be installed before deploying OBTR.ear. Follow the below steps

1. Start the Administrative Console of WebLogic application server. You can start this by entering Oracle WebLogic Admin Console URL in the address bar in an internet browser.
Eg: <http://10.10.10.10:1001/console>

2. The following screen is displayed:

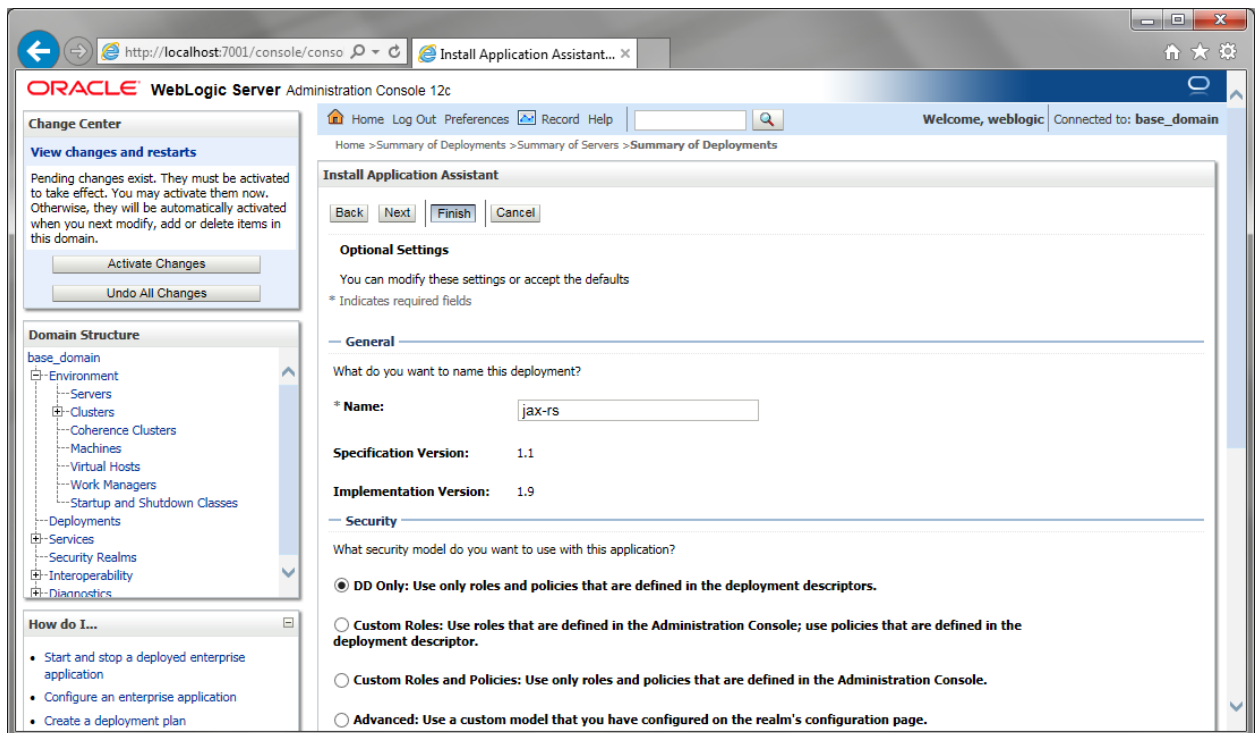

3. Specify the WebLogic administrator user name and password. Click 'Log In'.

The following screen is displayed:

Select "install this deployment as library", select target server as managed server and click next.

Click finish button

This library must appear in the deployment with Type column as “Library”

Note :- latest Jax-rs version will be jax-rs(2.0,2.22.1.0)

1.3.3 **Deploying OBTRM Application from WebLogic Administration Console**

To deploy Oracle Banking Treasury Management Application from Oracle WebLogic administration console, follow the steps given below.

1. Start the Administrative Console of WebLogic application server. You can start this by entering Oracle WebLogic Admin Console URL in the address bar in an internet browser.
Eg: <http://10.10.10.10:1001/console>

The following screen is displayed:

2. Specify the WebLogic administrator user name and password. Click ‘Log In’.

The following screen is displayed:

The screenshot displays the Oracle WebLogic Server Administration Console 12c Home Page. The interface is divided into several sections:

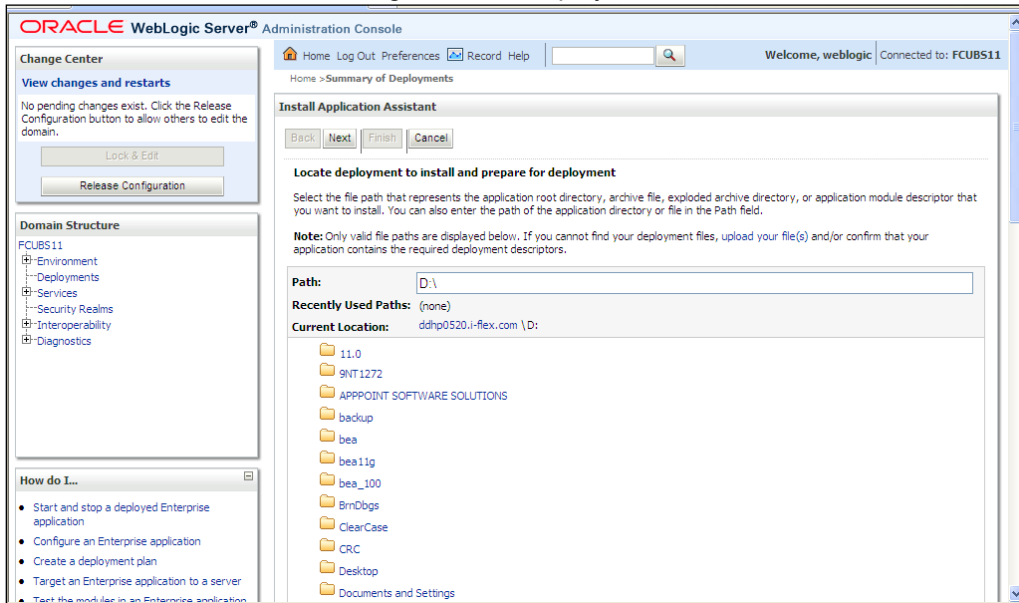

- Change Center:** Includes a 'View changes and restarts' section with a 'Lock & Edit' button and a 'Release Configuration' button.
- Domain Structure:** A tree view showing the domain hierarchy: STD_PAYMENTS > Domain Partitions > Environment > Deployments > Services > Security Realms > Interoperability > Diagnostics.
- How do I...:** A list of links for searching configuration, using the Change Center, recording WLST scripts, changing console preferences, managing console extensions, and monitoring servers.
- System Status:** A section titled 'Health of Running Servers' showing a bar chart with status indicators: Failed (0), Critical (0), Overloaded (0), Warning (0), and OK (2).
- Home Page:** The main content area with sections for:
 - Information and Resources:** Helpful Tools (Configure applications, Configure GridLink for RAC Data Source, Configure a Dynamic Cluster, Recent Task Status, Set your console preferences, Oracle Enterprise Manager) and General Information (Common Administration Task Descriptions, Read the documentation, Ask a question on My Oracle Support).
 - Domain Configurations:** Domain, Domain Partitions, Environment, Servers, Clusters, Server Templates, Migrateable Targets, Coherence Clusters, Machines, Virtual Hosts, Virtual Targets, Work Managers, Concurrent Templates, Resource Management, Startup And Shutdown Classes, Application's Security Settings, Security Realms.
 - Resource Group Templates:** Resource Group Templates.
 - Resource Groups:** Resource Groups.
 - Deployed Resources:** Deployments.
 - Services:** Messaging (JMS Servers, Store-and-Forward Agents, JMS Modules, Path Services, Bridges), Data Sources, Persistent Stores, XML Registries, XML Entity Caches, Foreign JNDI Providers, Work Contexts, JCOIN, Mail Sessions, FileT3, JTA, OSGI Frameworks.
 - Interoperability:** WTC Servers, Jolt Connection Pools.
 - Diagnostics:** Log Files, Diagnostic Modules, Built-in Diagnostic Modules, Diagnostic Images, Request Performance, Archives, Context, SNMP, Interceptors.
 - Charts and Graphs:** Monitoring Dashboard.

3. You need to deploy an EAR. For e.g. 'OBTR.ear'. Go to 'Deployment'.

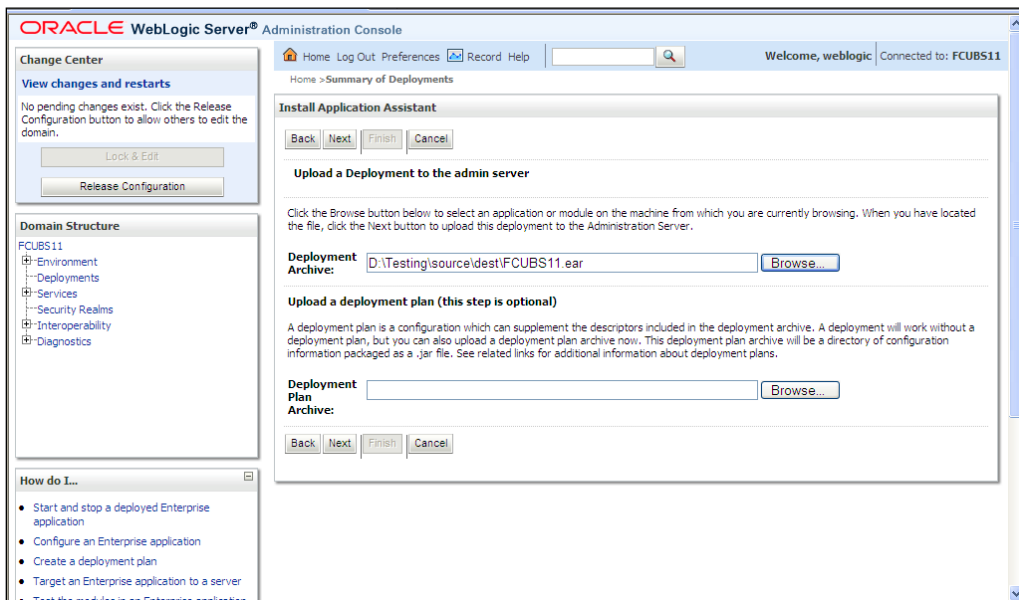

Click 'Lock & Edit' button to enable the buttons. This action enables the buttons.

The screenshot displays the Oracle WebLogic Server Administration Console 12c Summary of Deployments page. The page shows a table of deployed applications and modules. The table has columns for Name, State, Health, Type, Targets, Scope, Domain Partitions, and Deployment Order. The table lists various applications and modules, including 'self.oracle.businesseditor(1.0,12.2.1.0.0)', 'self.oracle.domain(1.0,12.2.1.0.0)', 'self.oracle.domain.webapp(1.0,12.2.1.0.0)', 'coherence-transaction-war', 'JMS Application (12.2.1.0.0)', 'jms', 'jmsagentdimpl.jar(12.4.12.1.0.4.0)', 'jmsagentdimpl.jar(12.4.12.1.0.4.0)', 'jmsagentdimpl.jar(12.4.12.1.0.4.0)', 'jms', 'jmscore', 'jmscoreclient.jar', 'jmscorecommon.jar', 'jmscoreconsole.jar', 'jmscoreintl.jar(11.2.0.1.0,12.1.0.0.0)', 'jmscoreintl.jar', 'jmscoreintl.jar(11.2.0.1.0,12.1.0.0.0)', 'jmscoreintl.jar(11.2.0.1.0,12.1.0.0.0)', 'jmscoreintl.jar(11.2.0.1.0,12.1.0.0.0)', 'jmscore.jar', and 'jmscore.common(12.4,12.1.0.4.0)'.

4. Click 'Install' button. The following screen is displayed:

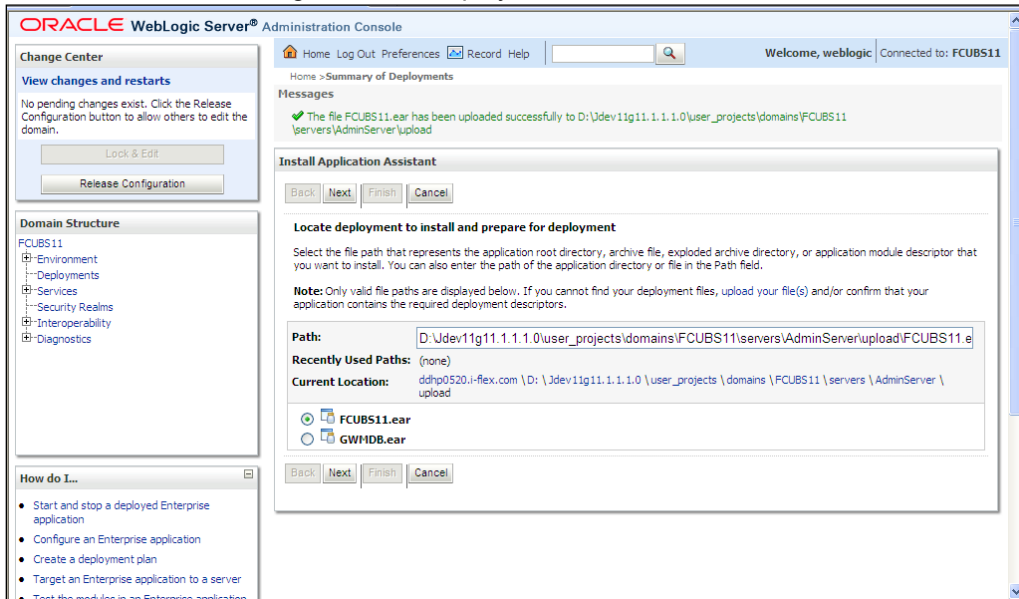

5. In order to specify the path/location of the enterprise archive file, click the link 'upload your file(s)'.
6. Click 'Next'. The following screen is displayed:

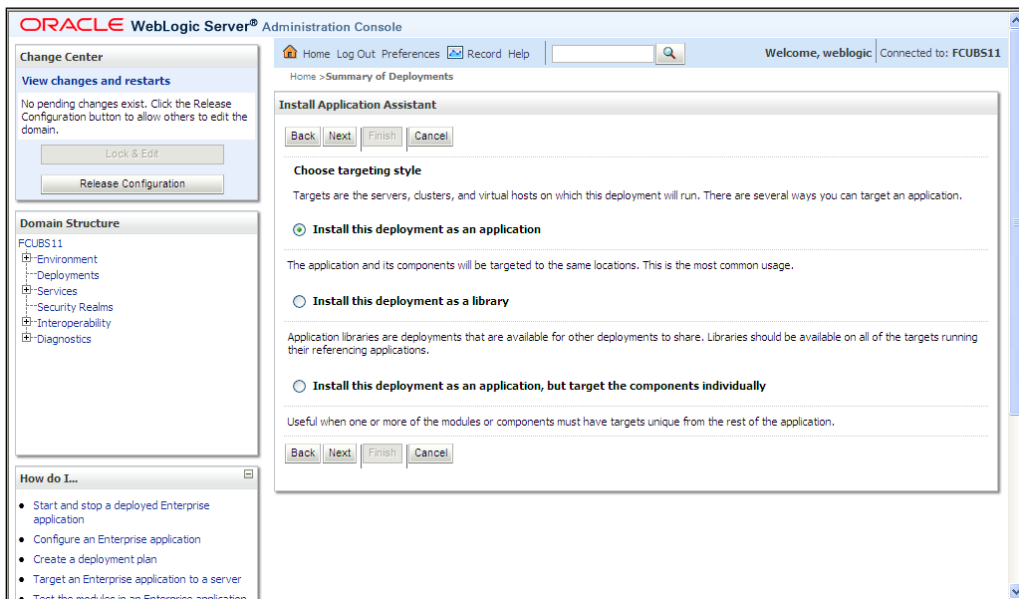

7. Specify the EAR file path. You can use the 'Browse' button to locate the file.

8. Click 'Next'. The following screen is displayed.

9. Select the application OBTRM EAR created from the list.

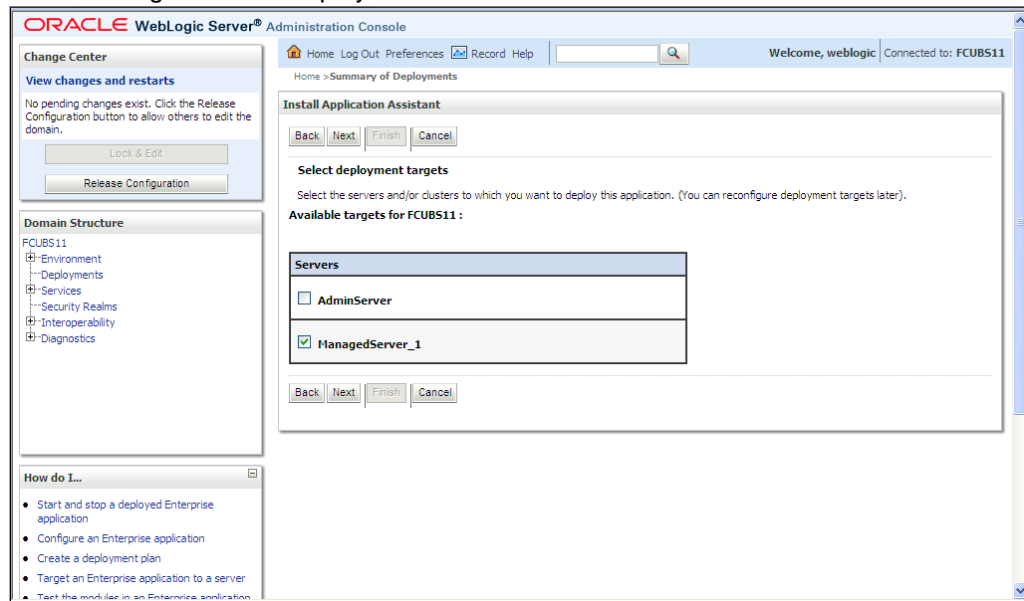

10. Click 'Next'. Following screen is displayed:

11. Choose the targeting style 'Install this deployment as an application'.

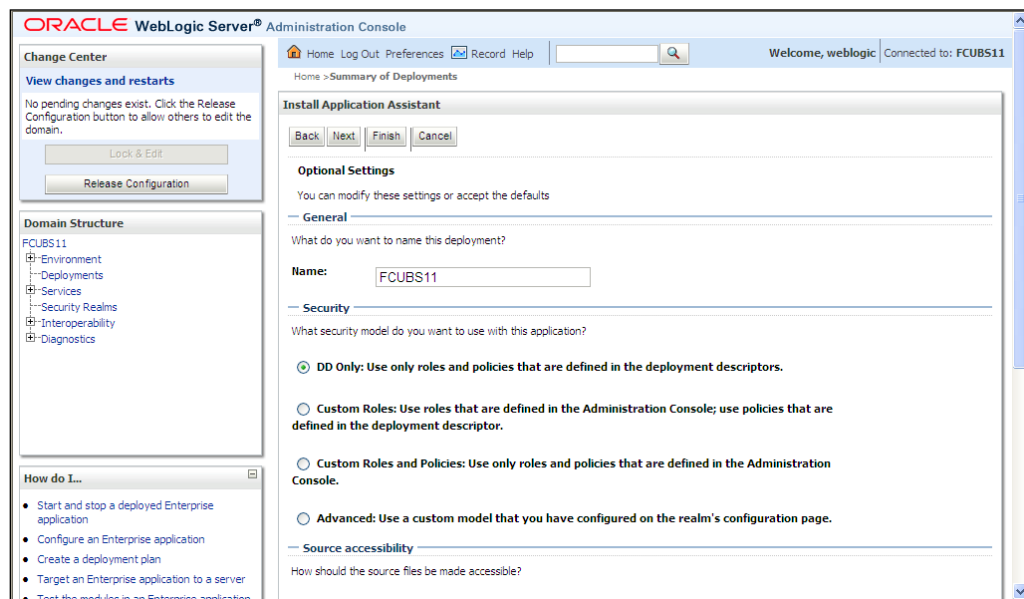

12. Click 'Next'.

The following screen is displayed

13. Select the target of the application. You can choose the server 'AdminServer' or 'Managed Server(s)'.

14. Click 'Next'. The following screen appears.

15. Check the deployment name.

The remaining portion of the screen is shown below:

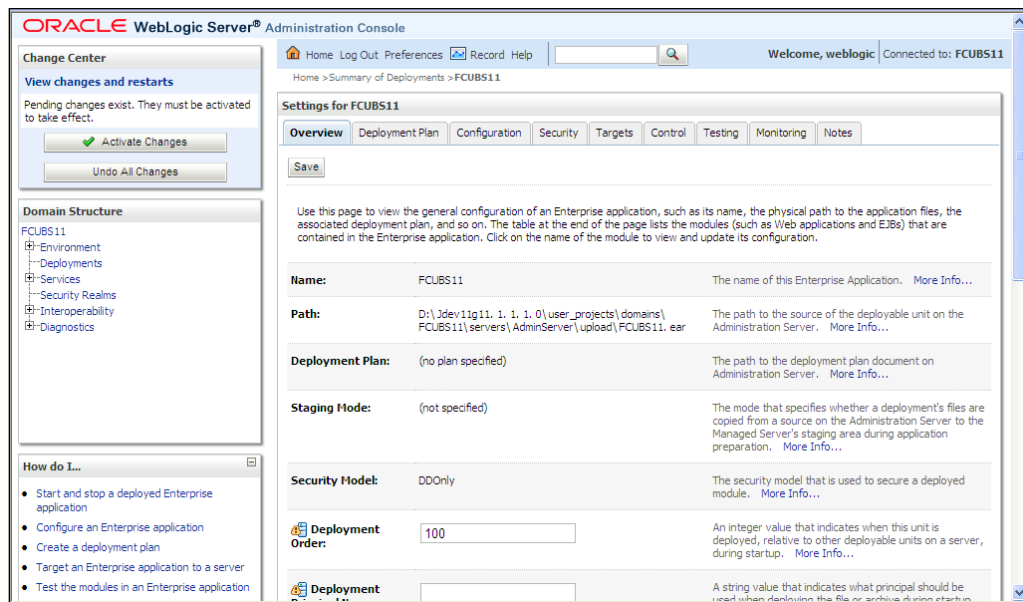

The screenshot shows the 'Security' and 'Source accessibility' configuration screens. The left sidebar contains a tree view with 'Security Realms', 'Interoperability', and 'Diagnostics'. Below the tree is a 'How do I...' section with a list of tasks: 'Start and stop a deployed Enterprise application', 'Configure an Enterprise application', 'Create a deployment plan', 'Target an Enterprise application to a server', and 'Test the modules in an Enterprise application'. Below that is a 'System Status' section showing 'Health of Running Servers' with a bar chart indicating 'Failed (0)', 'Critical (0)', 'Overloaded (0)', 'Warning (0)', and 'OK (1)'. The main content area is divided into two sections: 'Security' and 'Source accessibility'. The 'Security' section asks 'What security model do you want to use with this application?' and has three radio button options: 'DD Only: Use only roles and policies that are defined in the deployment descriptors.' (selected), 'Custom Roles: Use roles that are defined in the Administration Console; use policies that are defined in the deployment descriptor.', and 'Custom Roles and Policies: Use only roles and policies that are defined in the Administration Console.'. The 'Source accessibility' section asks 'How should the source files be made accessible?' and has two radio button options: 'Use the defaults defined by the deployment's targets' (selected) and 'Copy this application onto every target for me'. Below the 'Source accessibility' section is a 'Location' text field with the value 'D:\dev11g11.1.1.0\user_projects\domains\FCUBS11\src'. At the bottom are 'Back', 'Next', 'Finish', and 'Cancel' buttons.

16. Check whether the deployment location is accessible or not.

The following screen is displayed.

The screenshot shows the 'Install Application Assistant' screen. The left sidebar is the same as in the previous screenshot. The main content area is titled 'Install Application Assistant' and has 'Back', 'Next', 'Finish', and 'Cancel' buttons. Below the buttons is a 'Review your choices and click Finish' section with a message: 'Click Finish to complete the deployment. This may take a few moments to complete.' Below that is an 'Additional configuration' section with a message: 'In order to work successfully, this application may require additional configuration. Do you want to review this application's configuration after completing this assistant?' and two radio button options: 'Yes, take me to the deployment's configuration screen.' (selected) and 'No, I will review the configuration later.'. Below that is a 'Summary' section with the following information: 'Deployment: D:\dev11g11.1.1.0\user_projects\domains\FCUBS11\servers\AdminServer\upload\FCUBS11.ear', 'Name: FCUBS11', 'Staging mode: Use the defaults defined by the chosen targets', and 'Security Model: DDOnly: Use only roles and policies that are defined in the deployment descriptors.'. Below the summary is a 'Target Summary' table with two columns: 'Components' and 'Targets'. The table has one row: 'FCUBS11.ear' and 'ManagedServer_1'. At the bottom are 'Back', 'Next', 'Finish', and 'Cancel' buttons.

17. Click 'Finish' button. The following screen is displayed.

18. Click 'Save' button. The message 'Settings updated successfully' is displayed.

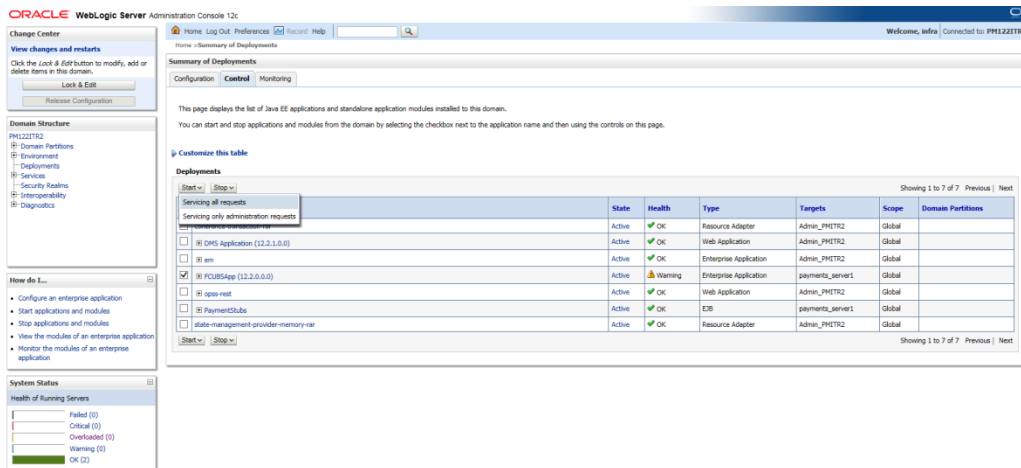

19. Click 'Activate Changes' button on the left pane. The message 'All the changes have been activated. No restarts are necessary' is displayed.

The screen is given below:

Click 'Deployment' on the left pane. Switch to Control tab .The following screen is displayed.

20. Click 'Start' drop-down button and select 'Servicing all requests'.

The following screen is displayed.

21. Click 'Yes'. The following screen is displayed.

This completes the deployment process.

1.3.4 Deploying Gateway/Scheduler Applications from WebLogic Administration Console

To deploy Oracle Banking Treasury Management Gateway/Scheduler Application from Oracle WebLogic administration console, follow the steps given below.

1. Launch Administrative Console of WebLogic application server. You can launch this by entering Oracle WebLogic Admin Console URL in the address bar in an internet browser.
Eg: <http://10.10.10.10:1001/console>

22. The following screen is displayed:

23. Specify the WebLogic administrator user name and password. Click 'Log In'.

The following screen is displayed:

24. You need to deploy an EAR. For e.g. 'GWEJB.ear'. Go to 'Deployment'.

Click 'Lock & Edit' button to enable the buttons. This action enables the buttons.

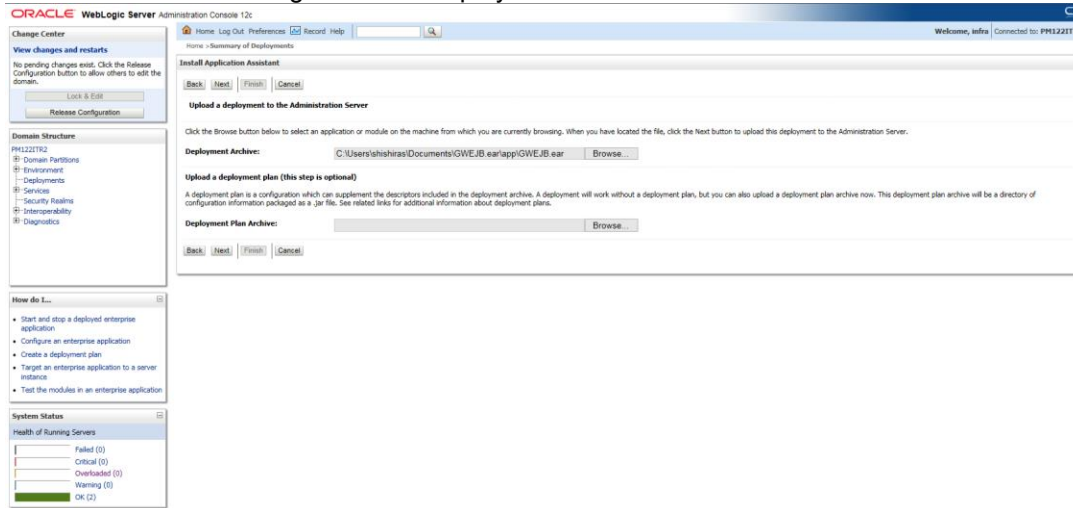

25. Click 'Install' button. The following screen is displayed:

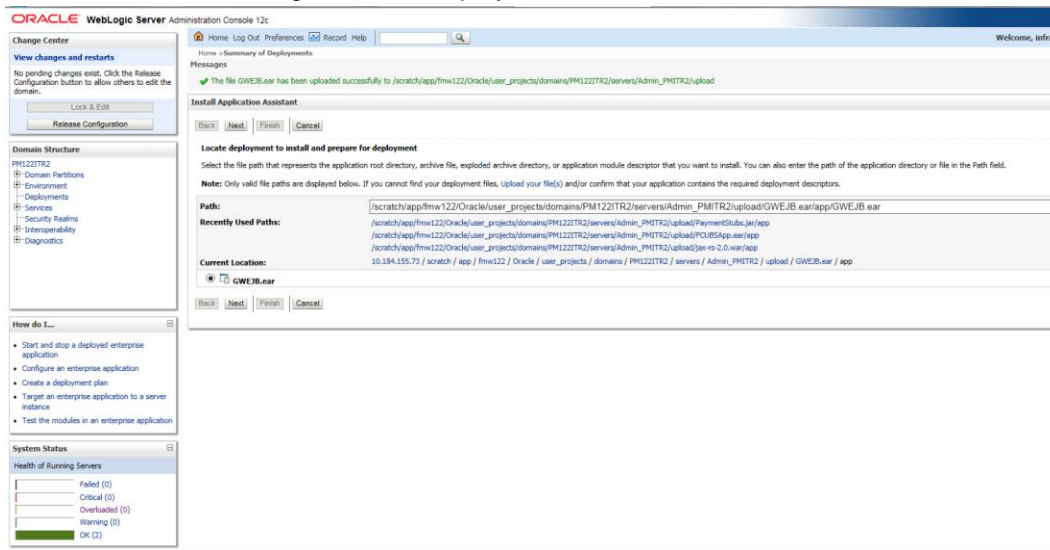

26. In order to specify the path/location of the enterprise archive file, click the link 'upload your file(s)'.

27. Click 'Next'. The following screen is displayed:

28. Specify the EAR file path. You can use the 'Browse' button to locate the file.

29. Click 'Next'. The following screen is displayed:

30. Select the application from the list.

31. Click 'Next'. Following screen is displayed:

The screenshot shows the 'Install Application Assistant' window in the Oracle WebLogic Server Administration Console 12c. The window has a sidebar on the left with sections: 'Change Center' (with 'View changes and restarts' and 'Release Configuration' buttons), 'Domain Structure' (a tree view showing 'PM1221TR2' and its sub-nodes: 'Domain Partitions', 'Environment', 'Deployments', 'Services', 'Security Realms', 'Interoperability', and 'Diagnostics'), 'How do I...' (a list of tasks), and 'System Status' (a 'Health of Running Servers' bar chart showing 'Failed (0)', 'Critical (0)', 'Overloaded (0)', 'Warning (0)', and 'OK (2)'). The main area is titled 'Install Application Assistant' and contains the following content:

- Buttons: Back, Next, Finish, Cancel.
- Section: **Choose installation type and scope**
- Text: 'Select if the deployment should be installed as an application or library. Also decide the scope of this deployment. The application and its components will be targeted to the same locations. This is the most common usage.'
- Radio buttons:
 - ☒ **Install this deployment as an application**
Application libraries are deployments that are available for other deployments to share. Libraries should be available on all of the targets running their referencing applications.
 - ☐ **Install this deployment as a library**
 - ☐ **Install this deployment as an application, but target the components individually**
Useful when one or more of the modules or components must have targets unique from the rest of the application. Select a scope in which you want to install the deployment.
- Text: 'Select a scope in which you want to install the deployment.'
- Text: 'Scope:' followed by a dropdown menu showing 'Global'.
- Buttons: Back, Next, Finish, Cancel.

32. Choose the targeting style 'Install this deployment as an application'.

33. Click 'Next'.

The following screen is displayed

The screenshot shows the 'Select deployment targets' window in the Oracle WebLogic Server Administration Console 12c. The window has a sidebar on the left with sections: 'Change Center' (with 'View changes and restarts' and 'Release Configuration' buttons), 'Domain Structure' (a tree view showing 'PM1221TR2' and its sub-nodes: 'Domain Partitions', 'Environment', 'Deployments', 'Services', 'Security Realms', 'Interoperability', and 'Diagnostics'), 'How do I...' (a list of tasks), and 'System Status' (a 'Health of Running Servers' bar chart showing 'Failed (0)', 'Critical (0)', 'Overloaded (0)', 'Warning (0)', and 'OK (2)'). The main area is titled 'Select deployment targets' and contains the following content:

- Buttons: Back, Next, Finish, Cancel.
- Section: **Select deployment targets**
- Text: 'Select the servers and/or clusters to which you want to deploy this application. (You can reconfigure deployment targets later).'
- Section: **Available targets for GWEJB :**
- Table:

Servers
<input type="checkbox"/> Admin_PM1TR2
<input checked="" type="checkbox"/> payments_server1
- Buttons: Back, Next, Finish, Cancel.

34. Select the target of the application. You can choose the server 'AdminServer' or 'Managed Server(s)'.

35. Click 'Next'. The following screen is displayed.

Optional Settings

You can modify these settings or accept the defaults.

* Indicates required fields

General

What do you want to name this deployment?

Name: GWEJB

Security

What security model do you want to use with this application?

DD Only: Use only roles and policies that are defined in the deployment descriptors.

Custom Roles: Use roles that are defined in the Administration Console; use policies that are defined in the deployment descriptor.

Custom Roles and Policies: Use only roles and policies that are defined in the Administration Console.

Advanced: Use a custom model that you have configured on the realm's configuration page.

Source Accessibility

How should the source files be made accessible?

Use the defaults defined by the deployment's targets

Recommended selection.

Copy this application onto every target for me

During deployment, the files will be copied automatically to the Managed Servers to which the application is targeted.

I will make the deployment accessible from the following location

Locations: /scratch/app/v12212/user_projects/domains/FCAPACK125/serv

Provide the location from where all targets will access this application's files. This is often a shared directory. You must ensure the application files exist in this location and that each target can reach the location.

Plan Source Accessibility

How should the plan source files be made accessible?

Use the same accessibility as the application

36. Check the deployment name.

The remaining portion of the screen is shown below:

Save

Use this page to view the general configuration of an enterprise application, such as its name, the physical path to the application files, the associated deployment plan, and so on. The table at the end of the page lists the modules (such as Web applications) contained in the enterprise application. Click on the name of the module to view and update its configuration.

Name: GWEJB The name of this enterprise application. [More Info...](#)

Scope: Global Specifies if this enterprise application is accessible within the domain, a partition, or a resource template. [More Info...](#)

Archive Version: 12.2.0.0.0 The archive version, specified from the manifest or overridden during deployment. [More Info...](#)

Path: /scratch/app/fmw122/Oracle/user_projects/domains/PM1221TR2/servers/Admin_PM12R2/upload/GWEJB.ear/app/GWEJB.ear The path to the source of the deployable unit on the Administration Server. [More Info...](#)

Deployment Plan: (no plan specified) The path to the deployment plan document on the Administration Server. [More Info...](#)

Staging Mode: (not specified) Specifies whether a deployment's files are copied from a source on the Administration Server's staging area during application preparation. [More Info...](#)

Plan Staging Mode: (not specified) Specifies whether an application's deployment plan is copied from a source on the Administration Server's staging area during application preparation. [More Info...](#)

Security Model: DDOOnly The security model that is used to secure a deployed module. [More Info...](#)

Deployment Order: 100 An integer value that indicates when this unit is deployed, relative to other deployable units during startup. [More Info...](#)

Deployment Principal Name: A string value that indicates the principal that should be used when deploying the file or arc and shutdown. This principal will be used to set the current subject when calling out into interfaces such as ApplicationLifecycleListener. If no principal name is specified, then the arc will be used. [More Info...](#)

38. Click 'Save' button. The message 'Settings updated successfully' is displayed.

The screenshot shows the Oracle WebLogic Server Administration Console. On the left, the 'Change Center' pane displays 'View changes and restarts' with a message 'Settings updated successfully'. Below this, the 'Domain Structure' pane shows a tree view with 'PM1221TR2' expanded, showing 'Domain Partitions', 'Environment', 'Deployments', 'Services', 'Security Realms', 'Interoperability', and 'Diagnostics'. The 'System Status' pane shows 'Health of Running Servers' with a list of servers: 'Failed (0)', 'Critical (0)', 'Overloaded (0)', 'Warning (0)', and 'OK (2)'. The main area displays the 'Settings for GWEJB(12.2.0.0.0)' page. The 'Overview' tab is selected, showing a table of configuration details for GWEJB. The 'Modules and Components' section at the bottom lists GWEJB(12.2.0.0.0) and its sub-components: EJBs, PCMainProcEJB, and PCSrvRouterEJB.

39. Click 'Activate Changes' button on the left pane. The message 'All the changes have been activated. No restarts are necessary' is displayed.

The screen is given below:

The screenshot shows the Oracle WebLogic Server Administration Console. On the left, the 'Change Center' pane displays 'View changes and restarts' with a message 'All changes have been activated. No restarts are necessary'. Below this, the 'Domain Structure' pane shows a tree view with 'PM1221TR2' expanded, showing 'Domain Partitions', 'Environment', 'Deployments', 'Services', 'Security Realms', 'Interoperability', and 'Diagnostics'. The 'System Status' pane shows 'Health of Running Servers' with a list of servers: 'Failed (0)', 'Critical (0)', 'Overloaded (0)', 'Warning (0)', and 'OK (2)'. The main area displays the 'Settings for GWEJB(12.2.0.0.0)' page. The 'Overview' tab is selected, showing a table of configuration details for GWEJB. The 'Modules and Components' section at the bottom lists GWEJB(12.2.0.0.0) and its sub-components: EJBs, PCMainProcEJB, and PCSrvRouterEJB.

Click 'Deployment' on the left pane. Switch to Control tab. The following screen is displayed.
