

Oracle Retail Order Broker

Release Notes

Release 15.0.10

April 2018

This document highlights the changes for Release 15.0.10 of Oracle Retail Order Broker.

Overview

Order Broker includes the following modules:

- **Routing Engine:** Distributed order broker that determines inventory availability across the enterprise, and uses advanced business rules to select locations that can fulfill orders
- **Supplier Direct Fulfillment:** Web-based vendor portal enabling vendors to share purchase orders and shipping information to simplify drop shipment
- **Store Connect:** Web portal that enables store associates to process and fulfill omni-channel orders

About Patch Releases

Oracle Retail patch releases are periodic releases that can include the following:

- New defect fixes
- Product enhancements
- Technology upgrades
- Performance fixes

Documentation for patch releases may include new and updated guides (for example, Operations Guides, User Guides, and so on) that apply to the patch release level. These documents include applicable updates made since the last patch release.

Hardware and Software Requirements

See the *Oracle Retail Order Broker Installation Guide* for the hardware and software requirements.

Client Browser Requirements

Supported browsers for the vendor portal, Store Connect, and the Order Broker administration screens:

- Chrome 43.0 or higher

- Internet Explorer 10.0 or higher
- Firefox 38.0 or higher

Technical Enhancements

Masked Personal Data in Logs

Personal data in log files, including name, address, email, and phone numbers, is now masked.

Integration Enhancements

Private Data Web Services

New web service requests support inquiry and anonymization of private data for users, customers, and vendors.

End User Access and Other Request (Right to Access): The GetPrivateData request supports inquiry into the private data in the Order Broker database based on order number, customer number, customer email address, vendor code, user ID, or user email address.

- Searching based on user ID includes Order Broker users, vendor users, and Store Connect users.
- Searching based on user email address includes Order Broker users, vendor users, Store Connect users, and brand contacts.

The GetPrivateData response returns names, addresses, phone numbers, and email addresses.

Right to Erasure and Anonymization: The ForgetPrivateData request can be used in two ways:

- To inquire into whether the specified order, customer, vendor, or user is eligible for anonymization. Although users are always eligible for deletion, customer-related and vendor information is eligible for deletion only if all related sales orders or purchase orders are closed.
- To request that the specified order, customer vendor, or user be anonymized. If eligible for anonymization, the data is replaced with asterisks. Once data is anonymized, it cannot be recovered.

A new Purge Customer Data from Completed Orders window has also been added to Order Broker. This window enables you to anonymize all completed sales orders and purchase orders that are older than the number of days specified in a new properties file setting.

Fixed Issues/Defects

The following table lists the issues fixed in this patch release:

Defect Number	Description
BugDB # 26358825	Added new property to support running imports in a multi-server environment.

Defect Number	Description
BugDB # 26503807	Corrected performance issues that occurred during the incremental import.
BugDB # 26539065	Corrected the order status list response XML message to format correctly when it includes a large number of orders.
BugDB # 26540174	Corrected locking issues that occurred during the incremental import.
BugDB # 26914436	Corrected system product import process to update valid records, and show the actual error count even if duplicate system products are found.
BugDB # 26599708	Corrected documentation on Event Logging screen.
Def # 5053	Changed displayed version number to always include a position for the patch number.

Oracle Corporation and its affiliates will not be responsible for any loss, costs, or damages incurred due to your access to or use of third-party content, products, or services.

Oracle Retail VAR Applications

The following restrictions and provisions only apply to the programs referred to in this section and licensed to you. You acknowledge that the programs may contain third party software (VAR applications) licensed to Oracle. Depending upon your product and its version number, the VAR applications may include:

(i) the **MicroStrategy** Components developed and licensed by MicroStrategy Services Corporation (MicroStrategy) of McLean, Virginia to Oracle and imbedded in the MicroStrategy for Oracle Retail Data Warehouse and MicroStrategy for Oracle Retail Planning & Optimization applications.

(ii) the **Wavelink** component developed and licensed by Wavelink Corporation (Wavelink) of Kirkland, Washington, to Oracle and imbedded in Oracle Retail Mobile Store Inventory Management.

(iii) the software component known as **Access Via™** licensed by Access Via of Seattle, Washington, and imbedded in Oracle Retail Signs and Oracle Retail Labels and Tags.

(iv) the software component known as **Adobe Flex™** licensed by Adobe Systems Incorporated of San Jose, California, and imbedded in Oracle Retail Promotion Planning & Optimization application.

You acknowledge and confirm that Oracle grants you use of only the object code of the VAR Applications. Oracle will not deliver source code to the VAR Applications to you. Notwithstanding any other term or condition of the agreement and this ordering document, you shall not cause or permit alteration of any VAR Applications. For purposes of this section, "alteration" refers to all alterations, translations, upgrades, enhancements, customizations or modifications of all or any portion of the VAR Applications including all reconfigurations, reassembly or reverse assembly, re-engineering or reverse engineering and recompilations or reverse compilations of the VAR Applications or any derivatives of the VAR Applications. You acknowledge that it shall be a breach of the agreement to utilize the relationship, and/or confidential information of the VAR Applications for purposes of competitive discovery.

The VAR Applications contain trade secrets of Oracle and Oracle's licensors and Customer shall not attempt, cause, or permit the alteration, decompilation, reverse engineering, disassembly or other reduction of the VAR Applications to a human perceivable form. Oracle reserves the right to replace, with functional equivalent software, any of the VAR Applications in future releases of the applicable program.
