Oracle Utilities Network Management System Integration to Oracle Field Service Release Notes, Release 21B

Copyright ©2021 Oracle and/or its affiliates. All rights reserved.

This software and related documentation are provided under a license agreement containing restrictions on use and disclosure and are protected by intellectual property laws. Except as expressly permitted in your license agreement or allowed by law, you may not use, copy, reproduce, translate, broadcast, modify, license, transmit, distribute, exhibit, perform, publish, or display any part, in any form, or by any means. Reverse engineering, disassembly, or decompilation of this software, unless required by law for interoperability, is prohibited.

The information contained herein is subject to change without notice and is not warranted to be error-free. If you find any errors, please report them to us in writing.

If this is software or related documentation that is delivered to the U.S. Government or anyone licensing it on behalf of the U.S. Government, then the following notice is applicable:

U.S. GOVERNMENT END USERS: Oracle programs (including any operating system, integrated software, any programs embedded, installed or activated on delivered hardware, and modifications of such programs) and Oracle computer documentation or other Oracle data delivered to or accessed by U.S. Government end users are "commercial computer software" or "commercial computer software documentation" pursuant to the applicable Federal Acquisition Regulation and agency-specific supplemental regulations. As such, the use, reproduction, duplication, release, display, disclosure, modification, preparation of derivative works, and/or adaptation of i) Oracle programs (including any operating system, integrated software, any programs embedded, installed or activated on delivered hardware, and modifications of such programs), ii) Oracle computer documentation and/or iii) other Oracle data, is subject to the rights and limitations specified in the license contained in the applicable contract. The terms governing the U.S. Government's use of Oracle cloud services are defined by the applicable contract for such services. No other rights are granted to the U.S. Government.

This software or hardware is developed for general use in a variety of information management applications. It is not developed or intended for use in any inherently dangerous applications, including applications that may create a risk of personal injury. If you use this software or hardware in dangerous applications, then you shall be responsible to take all appropriate fail-safe, backup, redundancy, and other measures to ensure its safe use. Oracle Corporation and its affiliates disclaim any liability for any damages caused by use of this software or hardware in dangerous applications.

Oracle and Java are registered trademarks of Oracle and/or its affiliates. Other names may be trademarks of their respective owners.

Intel and Intel Inside are trademarks or registered trademarks of Intel Corporation. All SPARC trademarks are used under license and are trademarks or registered trademarks of SPARC International, Inc. AMD, Epyc, and the AMD logo are trademarks or registered trademarks of Advanced Micro Devices. UNIX is a registered trademark of The Open Group.

This software or hardware and documentation may provide access to or information about content, products, and services from third parties. Oracle Corporation and its affiliates are not responsible for and expressly disclaim all warranties of any kind with respect to third-party content, products, and services unless otherwise set forth in an applicable agreement between you and Oracle. Oracle Corporation and its affiliates will not be responsible for any loss, costs, or damages incurred due to your access to or use of third-party content, products, or services, except as set forth in an applicable agreement between you and Oracle.

Preface

Welcome to the Oracle Utilities Network Management System Integration to Oracle Field Service Release Notes.

The preface includes the following:

- [Audience](#)
- [Documentation and Resources](#)
- [Documentation Accessibility](#)
- [Conventions](#)
- [Acronyms](#)

Audience

This document is intended for anyone implementing the Oracle Utilities Network Management System integration to Oracle Field Service.

Documentation and Resources

For more information regarding this integration, foundation technology and the edge applications, refer to the following documents:

Product Documentation

Topic	Description
Oracle Utilities Network Management System Integration to Oracle Field Service documentation	Refer to the Oracle Utilities applications documentation page: http://docs.oracle.com/cd/E72219_01/documentation.html
Oracle Utilities Network Management System documentation	
Oracle Field Service documentation	https://docs.oracle.com/en/cloud/saas/field-service/21c/index.html

Additional Documentation

Resource	Location
Oracle Integration Cloud Service documentation	Refer to the OIC documentation at: https://docs.oracle.com/en/cloud/paas/integration-cloud/index.html
Oracle Support	Visit My Oracle Support at https://support.oracle.com regularly to stay informed about updates and patches. Refer to the <i>Certification Matrix for Oracle Utilities Products (Doc ID 1454143.1)</i> on My Oracle Support to determine if support for newer versions of the listed products is included. For more information, refer to the Oracle Utilities Integrations page at http://my.oracle.com/site/tugbu/productsindustry/productinfo/utilities/integration/index.htm
Oracle Technology Network (OTN) Latest versions of documents	http://www.oracle.com/technetwork/index.html
Oracle University for training opportunities	http://education.oracle.com/

Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc>.

Access to Oracle Support

Oracle customers have access to electronic support for the hearing impaired. Visit: <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=info> or <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=trs>

Conventions

The following text conventions are used in this document:

Convention	Meaning
boldface	Boldface type indicates graphical user interface elements associated with an action, or terms defined in text or the glossary.
<i>italic</i>	Italic type indicates book titles, emphasis, or placeholder variables for which you supply particular values.
monospace	Monospace type indicates commands within a paragraph, URLs, code in examples, text that appears on the screen, or text that you enter.

Acronyms

The following terms are used in this document:

Term	Expanded Form
OUNMS	Oracle Utilities Network Management System
OFS	Oracle Field Service
OIC	Oracle Integration Cloud

Release Notes

This release notes outline the information about the functionality in integrating Oracle Utilities Network Management System with Oracle Field Service. Each section includes a brief description of the feature, the steps to enable or start using the feature, and any tips or considerations.

The release notes focuses on the following:

- [Overview](#)
- [Supported Applications](#)
- [About Oracle Utilities Network Management System](#)
- [About Oracle Field Service](#)
- [About Oracle Integration Cloud](#)
- [New Features Summary](#)
- [Known Issues](#)

Overview

Oracle Utilities Network Management System Integration to Oracle Field Service helps to manage a fieldwork originated in Oracle Utilities Network Management System using Oracle Field Service. This pre-built integration represents significant business value for utilities that need to manage their field operations.

For more information about the functionality, refer to the *Oracle Utilities Network Management System Integration to Oracle Field Service Configuration Guide* included in this release.

The integration supports the following flows:

- Create/Update/Cancel activity (Oracle Utilities Network Management System initiated)
- Admin Sync (Oracle Utilities Network Management System initiated)
- Activity Update (Oracle Field Service initiated)
- Event Details Update (Oracle Field Service initiated)
- Failed Equipment Update (Oracle Field Service initiated)

The following diagram illustrates the business processes supported in this integration.

In this integration, Oracle Integration Cloud is used as a middleware to connect the applications. It uses SOAP and REST APIs to facilitate communication between these two applications.

Supported Applications

The supported application versions in this integration are:

- Oracle Utilities Network Management System - V2.5.0.1 and higher
- Oracle Integration Cloud - V21.2.3.0.0 and higher
- Oracle Field Service - 21C and higher

Refer to the *Certification Matrix for Oracle Utilities Products (Doc ID 1454143.1)* on My Oracle Support to determine if support for newer versions of the listed products is included.

About Oracle Utilities Network Management System

Oracle Utilities Network Management System processes trouble calls from the customers and analyzes those to determine the probable outage locations. It generates Estimated Restoration Times (ERTs) that can be provided back to the customers. In addition, it keeps a history of all customer calls that were entered in the system, as well as a history of all events that were known to affect a customer even if the customer did not call in.

In addition to responding to unplanned outages and non-outage problems, Oracle Utilities Network Management System helps a utility plan maintenance work or new construction that may affect existing customers. When Oracle Utilities Network Management System generates detailed switching plans, customers are informed about planned outages that impact them.

About Oracle Field Service

Oracle Field Service is built on time-based, self-learning, and predictive technology, empowering to solve business problems while evolving the field service organization. It has various modules to choose, such as forecasting, routing, capacity, mobility, collaboration, core manage, smart location and customer communication. It leverages the performance pattern profiles to create optimal daily routes and schedules, and continues to learn as employee work patterns change over time.

About Oracle Integration Cloud

Oracle Integration Cloud is a unified platform to integrate the applications, automate processes and create applications.

Using integrations, connect the applications into a continuous business flow. The integrations can be quickly developed and activated between both the cloud and on-premises applications. The lookups help to match application-specific codes between the two applications. Oracle Integration Cloud provides graphical mapper where the user can map just by dragging and dropping between the applications.

New Features Summary

This integration includes the following features:

- [Activity Management](#)
- [Event Details Updates](#)
- [Failed Equipment Updates](#)
- [Admin Sync](#)

Activity Management

Activity Management integration will send status updates from Oracle Field Service to Oracle Utilities Network Management System. The following activities updates are supported in this flow:

- Activity Updated
- Activity Moved
- Activity Started
- Activity Suspended
- Activity Not Done
- Activity Cancelled
- Activity Completed

Any activity changes in Oracle Field Service will be synchronized to Oracle Utilities Network Management System and the corresponding event details will be updated.

Activity Management integration includes the following activity updates from Oracle Utilities Network Management System to Oracle Field Service:

- Create/Update/Cancel activities

Note that the support for standard trouble activities (switching and damage assessment activities) is not included in this release.

Event Details Updates

The Event Details Updates process will send event details form data from Oracle Field Service to Oracle Utilities Network Management System.

Failed Equipment Updates

The Failed Equipment Updates process retrieves the activity details information from Oracle Field Service and the parsed failed equipment data will be updated to Oracle Utilities Network Management System.

Admin Sync

The Admin Sync process synchronizes the following data from Oracle Utilities Network Management System to Oracle Field Service:

- Pick List
- Failed Equipment
- Phases
- Manufacturers
- Crew Types - Work Skills
- Control Zones

- Pick List Environment
- Customer Types

This integration can be scheduled to synchronize at set intervals configured in Oracle Integration Cloud.

Known Issues

The known issues in this integration are:

Bug Number	Description
33275218	NMS-OFSC: IN ANDROID TAB AND IOS, ON CLICKING ACTIVITY LINK ACTIVITY BLOCKS, NO INFO TEXTBOXES LIKE SELECT TECHNICIAN ARE COMING AS IN CASE OF BROWSER
33275170	NMS-OFSC: IN IOS, ACTIVITY LINKS SCROLL BAR IS NOT WORKING
33275127	NMS-OFSC: IN ANDROID TABLET AND IOS, ON DOUBLE CLICKING OF ACTIVITY LINK ACTIVITY BLOCK, IT IS NOT REDIRECTING TO ACTIVITY DETAILS PAGE
33264433	NMS-OFSC: CALLS AND RESTORATION DATA PLUGIN DETAILS ARE NOT LOADED AFTER CANCELLING OR SUSPENDING ANY ACTIVITY
