4.	Function ID Glossary	4-1

1. Preface

1.1 Introduction

This manual explains the features related to relationship manager in Oracle FLEXCUBE.

1.2 Audience

This manual is intended for the relationship managers in your bank.

1.3 Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc>.

1.4 Organization

This manual is organized into the following chapters:

Chapter	Description
Chapter 1	<i>About this Manual</i> gives information on the intended audience. It also lists the various chapters covered in this User Manual.
Chapter 2	<i>Relationship Manager</i> discusses the basic maintenances required to use the RM feature.
Chapter 3	<i>Relationship Manager Reports</i> explains the various reports generated for RM in Oracle FLEXCUBE and the settings required for report generation.
Chapter 4	<i>Function ID Glossary</i> has alphabetical listing of Function/Screen ID's used in the module with page references for quick navigation.

1.5 Glossary of Icons

This User Manual may refer to all or some of the following icons.

Icons	Function
	Exit
	Add row
	Delete row
	Option List

2. Relationship Manager

Relationship Managers (RM) are contact points at the bank for the customers. They handle initial customer contacts and ensure that the appropriate suite of products and solutions are offered to the customers. Relationship managers also develop an understanding of customers' day-to-day administrative and business activities and communicate the same to the front office and back office team.

Using Oracle FLEXCUBE, you can designate a customer or a group of customers to an RM. The RM will be responsible for helping the customers designated to him/her in need.

This chapter contains the following sections:

- [Section 2.1, "User Maintenance"](#)
- [Section 2.2, "RM Hierarchy Mapping"](#)
- [Section 2.3, "RM Mass Amendment"](#)
- [Section 2.3.1, "Changing Relationship Managers in Bulk"](#)

2.1 User Maintenance

This section contains the following topics:

- [Section 2.1.1, "Invoking User Maintenance Screen"](#)
- [Section 2.1.2, "Roles Button"](#)

2.1.1 Invoking User Maintenance Screen

Invoking User Maintenance Screen User Profile defines the activities that a user can carry out on the system. In Oracle FLEXCUBE, you can define user profiles with their role as 'Relationship Manager'. This section explains the process of defining a user profile with RM role.

To invoke the 'User Maintenance' screen, type 'SMDUSRDF' in the field at the top right corner of the Application tool bar and click the adjoining arrow button.

For more information on maintaining user profiles in Oracle FLEXCUBE, refer to the section 'Defining a User Profile' in Security Management System user manual.

User Identification

Specify the user ID. This ID identifies the user whose profile you are defining. In a user ID, you can use alphabets in upper or lower case, numbers 0 to 9 and _ (underscore).

The number of characters in a User ID should be greater than or equal to six and less than 12.

Name

Specify the name of the user.

Supervisor Identification

Specify the ID of the supervisor of the user. The option list displays all valid supervisor identifications maintained in the system. Choose the appropriate one.

In case of relationship managers, you can also use this field to define the RM hierarchy. For defining RM hierarchy in this method, you need to select the RM user who is one level up in the hierarchical order as the supervisor.

If the user is the superior in the RM hierarchical order, you can specify his/her own user ID as supervisor ID. The supervisor ID option list also shows the user ID of the user being maintained. This means, you can define an RM user as his/her own supervisor.

Note

The RM hierarchy defined in this method is considered only if the checkbox 'RM Hierarchy Setup Required' is not checked in 'Bank Parameters Maintenance' screen.

Supervisor Name

Based on the supervisor ID selected, the system displays the name of the supervisor.

Other RM Customer Access Restricted

You can restrict the users' access to the transactions of the customers who are assigned to a different relationship manager. Check this box to restrict the user from viewing, creating, authorizing or amending the transactions of the customers assigned to a different relationship manager.

If you do not check this box, the user can view, create, authorize and amend the transactions of the customers assigned to other relationship managers.

The customers not assigned to the RM include the customers assigned to other relationship managers as well as those who are not assigned to any relationship manager.

This is applicable to the users created with their role as 'Relationship Manager'.

2.1.2 Roles Button

A user role is associated to a user for a specific Branch in Oracle FLEXCUBE. The User at such a branch directly inherits the values set at the Role level. You can also define a user as a relationship manager by assigning the RM role.

To attach the user profile you are defining to a role, you must use the 'Roles' screen. Click 'Roles' button on 'User Maintenance' screen.

Branch Code *	Role *	Role Description
---------------	--------	------------------

Specify the following details:

Branch Code

Specify the branch code assigned to the user role. The option list displays all the valid branch codes maintained in the system. You can choose the appropriate one.

Role

Specify the role assigned to the user for the selected branch. The option list displays all valid roles maintained in the system. Choose the appropriate one.

Note

You can assign the role of Relationship Manager to a user by selecting 'RM-ROLE'.

Role Description

Based on the role selected, the system displays the role description.

Click add icon to add a record under the 'Roles' list. Specify the above details to attach more roles to the user.

To delete a role attached to a user profile, check the box beside it and click delete icon.

2.2 RM Hierarchy Mapping

This section contains the following topics:

- [Section 2.2.1, "Invoking RM Hierarchy Mapping Screen"](#)
- [Section 2.2.2, "Viewing RM Hierarchy Mapping Summary"](#)
- [Section 2.2.3, "Viewing RM Hierarchy Summary"](#)

2.2.1 Invoking RM Hierarchy Mapping Screen

You can define the hierarchy for relationship managers at the bank. RM hierarchy can be defined in Oracle FLEXCUBE using two methods. One method is to select the RM user who is one level up in the hierarchical order as the supervisor of a RM user.

The other method is to define the hierarchical structure using 'RM Hierarchy Mapping' screen.

To invoke this screen, type 'STDRMHR' in the field at the top right corner of the Application toolbar and click the adjoining arrow button.

The screenshot shows a web application window titled "RM Hierarchy Mapping". At the top left, there is a "New" button. The main content area contains four input fields arranged in a 2x2 grid. The top-left field is labeled "RM ID *" in red text. The top-right field is labeled "RM Name". The bottom-left field is labeled "Parent RM ID *" in red text. The bottom-right field is labeled "Parent RM Name". Below the main content area is a light blue footer bar. It contains several fields: "Maker", "Checker", "Date Time:", "Mod No", "Record Status", and "Authorization Status". On the far right of the footer bar is a blue button labeled "Exit".

Specify the following details to define the RM hierarchy.

RM ID

Specify the relationship manager ID. The option list displays all valid RM user IDs maintained in the system. Choose the appropriate one.

Using this screen, you will assign a parent RM user to this user.

RM Name

Based on the RM ID, the system displays the name of the relationship manager.

Parent RM ID

Specify the parent RM ID. The option list displays all valid RM user IDs maintained in the system. Choose the appropriate one.

In the RM hierarchy, this RM user will be the parent user of the user selected above.

Parent RM Name

Based on the parent RM ID, the system displays the name of the parent relationship manager.

This method allows you to define the parent RM for all relationship managers, thus defining a RM hierarchy.

The RM hierarchy defined in this method is enabled only if the checkbox 'RM Hierarchy Setup Required' is checked in 'Bank Parameters Maintenance' screen.

2.2.2 Viewing RM Hierarchy Mapping Summary

You can view a summary of relationship managers hierarchy mapping using 'RM Hierarchy Mapping Summary' screen. To invoke the screen, type 'STSRMHR' in the field at the top right corner of the Application toolbar and click the adjoining arrow button.

You can search for RM hierarchy details based on one or more of the following parameters:

- Authorization status of the record
- Record status
- Relationship manager ID
- Parent relationship manager ID

Once you have set the search criteria, click 'Search' button. The system displays all RM hierarchy mapping records that match the search criteria. Double-click a record to view the detailed screen.

2.2.3 Viewing RM Hierarchy Summary

You can query for the hierarchy of relationship manager using 'RM Hierarchy Summary' screen. To invoke the screen, type 'STDRMHRV' in the field at the top right corner of the Application toolbar and click the adjoining arrow button.

The screenshot shows a web application window titled "RM Hierarchy Summary". At the top, there are two input fields: "RM Id*" and "RM Name". Below these is a search bar with a "Go" button and a "1 Of 1" indicator. Underneath is a table with the following headers: "RM Id", "RM Name", "Parent RM ID", and "Parent RM Name". The table body is empty. At the bottom right of the window, there is an "Exit" button.

You can query for the hierarchy details of a relationship manager.

Specify the following details:

RM ID

Specify the ID of the relationship manager whose hierarchy details you need to find. Choose the appropriate one from the option list.

Based on the RM ID selected, the system displays the relationship manager hierarchy details.

2.3 RM Mass Amendment

This section contains the following topics:

- [Section 2.3.1, "Changing Relationship Managers in Bulk"](#)
- [Section 2.3.2, "Viewing RM Mass Amendment Summary"](#)

2.3.1 Changing Relationship Managers in Bulk

Oracle FLEXCUBE allows you to change the some or all customers associated with one relationship manager to a different relationship manager. You can change the relationship manager for a number of customers at once using 'RM Mass Amendment' screen. To invoke the screen, type 'STDRMAMD' in the field at the top right corner of the application toolbar and click the adjoining arrow button.

Specify the following details:

Reference Number

The system generates and displays the reference number of the RM mass amendment operation.

From RM ID

Specify the ID of the relationship manager with whom the customers to be reassigned are associated with. The option list displays all valid RM IDs maintained in the system. Choose the appropriate one.

While processing the reassignment, the system assigns the selected customers associated with this RM to the RM specified in the field 'To RM ID'.

From RM Name

Based on the RM ID, the system displays the name of the relationship manager.

To RM ID

Specify the ID of the relationship manager to whom the customers will be reassigned. The option list displays all valid RM IDs maintained in the system. Choose the appropriate one.

While processing the reassignment, the system reassigns the selected customers to this RM.

To RM Name

Based on the RM ID selected, the system displays the name of the relationship manager.

Status

The system displays the status of the mass RM amendment. The status can be one of the following:

- Not Started – indicates that the mass amendment record has just been created
- Completed – indicates that the customer has been moved under the new RM without any error, after the mass amendment effective date
- Failed – indicates that the movement of customer from one RM to another RM has failed for any reason such as closure of CIF or closure of RM

Effective Date

Specify the date from which the RM change will be effective. The system will process the request during the RM mass amendment batch on this date. The customers will be associated with the other RM from this date onwards.

Allowed Customers/Restrictive Customers/All Customers

Specify the type of customers to whom the RM change is applicable. You can choose one of the following:

- Allowed Customers – if you select this, the system will change the RM of all customers selected under the 'Customers' grid
- Restrictive Customers – if you select this, the system will change the RM of all customers other than the restricted customers listed
- All Customers – if you select this, the system will change the RM of all customers under the RM

Customers

Select the customers to whom the RM change is applicable. You need to specify the following details of the customer:

Customer Number

Specify the CIF of the customer who will be reassigned to a different RM. The option list displays all valid customer numbers assigned to the RM selected under 'From RM ID'. Choose the appropriate one.

Customer Name

Based on the customer number, the system displays the name of the customer.

You can add more customers to the list by clicking the add button. In case you need to remove a customer from this list, check the adjoining checkbox and click delete button.

Once you have specified the above details, save the record.

The system processes the amendment during RM Mass Amendment batch at end of transactions input (EOTI) stage. This batch will reassign the customers from the current RM to the new RM specified here.

Once the customers are reassigned, the system updates the status as 'Completed'. In case of any failure during the process, the system updates the status as 'Failed' and logs the failure reason.

2.3.2 Viewing RM Mass Amendment Summary

You can view a summary of the RM mass amendments using 'RM Mass Amendment Summary' screen. To invoke this screen, type 'STSRMAMD' in the field at the top right corner of the Application toolbar and click the adjoining arrow button.

You can search the RM mass amendment summary based on one or more of the following parameters:

- Authorization status of the amendment maintenance
- Record status
- Reference number
- RM ID from which the customers are reassigned (From RM ID)
- RM ID to which the customers are reassigned (To RM ID)

Once you have set the search criteria, click search button. The system displays the following details of the RM mass amendment records that match the criteria.

- Authorization status
- Record status
- Reference number
- From RM ID
- To RM ID
- Effective Date

Double-click a record to view the details.

3. Relationship Manager Reports

Oracle FLEXCUBE allows you to generate a number of reports for relationship managers. These reports help them analyze their performances. This chapter explains the various reports generated for RM in Oracle FLEXCUBE and the settings required for report generation.

This chapter contains the following sections:

- [Section 3.1, "RM Report Parameters"](#)
- [Section 3.2, "Generating RM Reports"](#)
- [Section 3.3, "Upcoming Loan Payment Schedule Report"](#)
- [Section 3.4, "Non-performing Assets Report"](#)
- [Section 3.5, "Blacklisted Customers from Internal Bank Report"](#)
- [Section 3.6, "Blacklisted Customers from Central Bank Report"](#)
- [Section 3.7, "Overdue Schedules Report"](#)
- [Section 3.8, "Defaulted Loans from Customer-wise Report"](#)
- [Section 3.9, "Term Deposits Maturity Report"](#)
- [Section 3.10, "Term Deposits Closed Report"](#)
- [Section 3.11, "Term Deposits Opened Report"](#)
- [Section 3.12, "Term Deposits Exceeding Lien Limits Report"](#)
- [Section 3.13, "Customer Transaction beyond Threshold Amount Report"](#)
- [Section 3.14, "Customers with Negative Balance Report"](#)
- [Section 3.15, "Customer Utilizing below their Limit Report"](#)
- [Section 3.16, "Customers Due for Collateral Revaluation Report"](#)
- [Section 3.17, "Collaterals with Value Lesser than Utilized Limit Report"](#)
- [Section 3.18, "Customers Due for Credit Line Expiry Report"](#)
- [Section 3.19, "Period Based Business Report"](#)
- [Section 3.20, "New CASA Accounts Report"](#)
- [Section 3.21, "New Loans Accounts Report"](#)
- [Section 3.22, "New TD Accounts Report"](#)
- [Section 3.23, "Period based CASA Accounts Report"](#)
- [Section 3.24, "Period based Loan Accounts Report"](#)
- [Section 3.25, "Period based TD Accounts Report"](#)
- [Section 3.26, "Consolidated Customer Portfolio Report"](#)
- [Section 3.27, "RM Mass Amendment Failure Report"](#)

3.1 RM Report Parameters

This section contains the following topics:

- [Section 3.1.1, "Generating RM Report"](#)
- [Section 3.1.2, "Viewing RM Report Parameter Summary"](#)

3.1.1 Generating RM Report

You can set the parameters for the generation of various relationship manager reports using 'RM Report Parameter' screen. To invoke this screen, type 'STDRMPAR' in the field at the top right corner of the Application toolbar and click the adjoining arrow button.

Section	Parameter	Value
Bank Code	Bank Code *	000
TD	Lien Limit Percentage	90
	TD mature days	50
CASA	Withdrawal Threshold	500
	Deposit Threshold	600
	Negative Balance Threshold	500
Limits	Utilization Percentage	15
	Customers Due For Collateral Revaluation	7
	Customers Due For Credit Line Expiry	7
Loans	Loan mature days	400
	Wakala Expire Days	7

Specify the following details:

Bank Code

The system displays the bank code.

TD

You need to set the following parameters related to term deposits.

Lien Limit Percentage

Specify the lien limit percentage. If the lien of the term deposit is above this limit, the system will include the term deposit in the reports.

TD Mature Days

You can view in the user dashboard the term deposits that are close to maturity date. Specify the number of days prior to the closure date, during which the term deposit should be shown in the user dashboard.

For example, if you specify '6' as the TD Mature Days, the system will start displaying the TD in the dashboard six days before its maturity date.

CASA

You need to set the following parameters related to customer accounts.

Withdrawal Threshold

Specify the withdrawal threshold. On a day, if a customer withdraws beyond this limit, the system will include the details in the report.

Deposit Threshold

Specify the deposit threshold. On a day, if a customer deposits beyond this limit, the system will include the details in the report.

Negative Balance Threshold

Specify the negative balance threshold. If a customer account balance is less than this threshold, the system will include the details in the report.

Limits

You need to set the following parameters related to limits.

Utilization Percentage

Specify the utilization percentage. If a customer utilizes his/her liability level less than the utilization limit percentage, the system will include the details in the report.

Customers Due For Collateral Revaluation

Specify the customers due for collateral revaluation value which will be considered to list the customers whose collateral revaluation is due in the next defined days.

Customers Due for Credit Line Expiry

Specify the customers due for credit line expiry value. Based on this, the system displays the customers whose credit line expiry is due in next specific number of days.

Loans

You need to set the following parameters related to loans.

Loan Mature Days

Specify the loan mature days. The user dashboard will display the loans that are maturing within the number of days specified here. This is the number of days for which the you want the dashboards to display the loans maturing within these days.

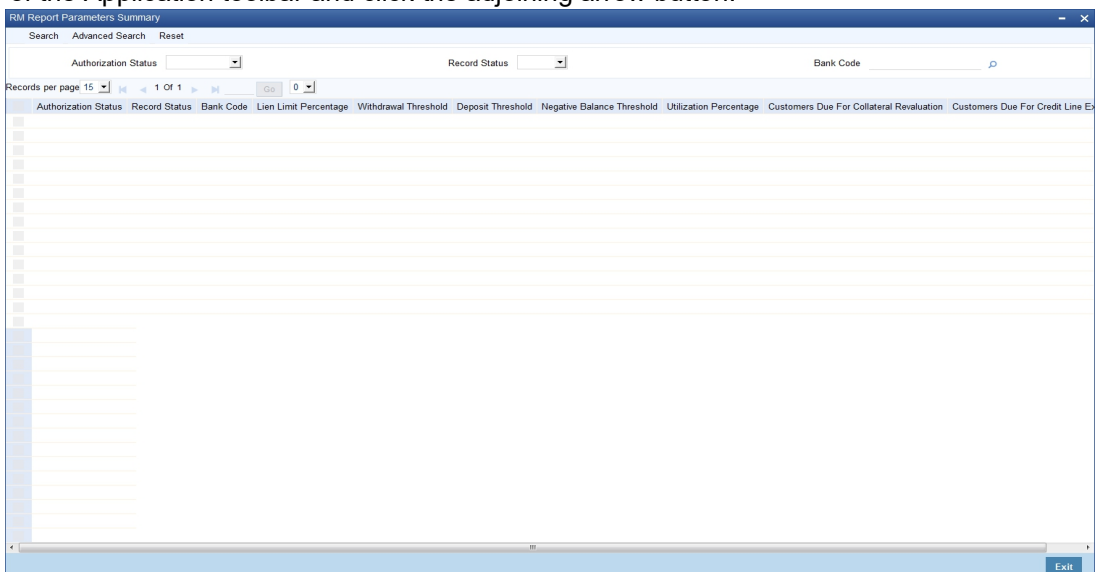

Wakala Expire Days

Specify the Wakala expire days. The loan dashboard will display the Wakala commitment contracts maturing within the number of days specified here.

Once you have defined the report parameters, save the record.

3.1.2 Viewing RM Report Parameter Summary

You can view a summary of the RM report parameters using 'RM Report Parameter Summary' screen. To invoke this screen, type 'STSRMPAR' in the field at the top right corner of the Application toolbar and click the adjoining arrow button.

You can search for the records based on one or more of the following parameters:

- Authorization status
- Record status
- Bank code

Once you have set the search criteria, click 'Search' button. The system displays the records that match the search criteria. Double-click a record to view the details.

3.2 Generating RM Reports

Relationship managers can generate the following reports in Oracle FLEXCUBE.

- Upcoming loan payment schedule report
- Non-performing assets report
- Blacklisted customers from internal bank report
- Blacklisted customers from central bank report
- Overdue schedules report
- Defaulted loans from customer-wise report
- TD maturity report
- TD account closed report
- TD account opened report
- Term deposits exceeding lien limit report
- Customer transaction beyond threshold amount report
- Outward clearing reject report
- Inward clearing reject report
- Customers with negative balance report
- Customer utilizing below their limit report
- Customers due for collateral revaluation report
- Customers due for credit line expiry report
- Period based business report
- New CASA accounts report
- New loans accounts report
- New TD accounts report
- Period based CASA accounts report
- Period based loan accounts report
- Period based TD accounts report
- Consolidated customer portfolio report
- Bank parameters maintenance report
- RM mass amendment failure report

These reports are discussed in detail under the following headings.

3.3 Upcoming Loan Payment Schedule Report

This section contains the following topics:

- [Section 3.3.1, "Generating Upcoming Payment Schedules Report"](#)
- [Section 3.3.2, "Contents of the Report"](#)

3.3.1 Generating Upcoming Payment Schedules Report

You can generate a customer-wise report of upcoming loan payment schedules. To invoke 'Upcoming Payment Schedules Report' screen, type 'STRCLPAY' in the field at the top right corner of the Application toolbar and click the adjoining arrow button.

Specify the following details:

Branch Code

Specify the branch for which you are generating the report. The option list displays all valid branch codes maintained in the system. Choose the appropriate one.

Branch Name

Based on the branch code selected, the system displays the name of the branch.

Due Date

Specify the due date of the payment schedule. The system will generate the report of payment schedules that are due as on the date specified here.

Include Subordinates

The relationship managers can generate the upcoming payment schedules for the customers who are associated with their subordinate RMs. Check this box to include the customers assigned to your subordinate RMs. If you do not check this box, the system will generate the report only for the customers assigned to you.

Report Format

Select the format of the report. The drop-down list displays the following formats:

- HTML
- RTF
- PDF
- Excel

Choose the appropriate one.

Report Output

Specify the report output type. The drop-down list displays the following options:

- Print – select this to print the report

- View – select this to view the contents of the report
- Spool – select this to spool the report for further use

Choose the appropriate one.

Printer At

Specify whether the printer is installed at the client or at a server. Choose the appropriate one from the drop-down list.

Printer

Specify the printer to print the report. The option list displays all valid printers applicable. Choose the appropriate one.

Once you have specified the above details, click 'OK' button. The system generates the report in the output type and format specified.

3.3.2 Contents of the Report

The upcoming loan payment schedules report contains the following details:

Header

Sr. No.	Field Name	Field Description

3.4 Non-performing Assets Report

This section contains the following topics:

- [Section 3.4.1, "Generating Non-Performing Assets Report"](#)
- [Section 3.4.2, "Contents of the Report"](#)

3.4.1 Generating Non-Performing Assets Report

You can generate a report of customers' non-performing assets. This report gives the list of customer loans that are in a particular status. To invoke 'Non-performing Assets' screen, type

'STRCLBAD' in the field at the top right corner of the Application toolbar and click the adjoining arrow button.

The screenshot shows a window titled "Non-Performing Assets Report". The window contains the following fields and controls:

- Branch Code: [Text Input]
- Account Status: [Text Input]
- Include Subordinates: [Yes] (checkbox)
- Report Format: [PDF] (dropdown)
- Report Output: [View] (dropdown)
- Branch Name: [Text Input]
- Description: [Text Input]
- Printer At: [Client] (dropdown)
- Printer: [Text Input]

Buttons: [Ok] [Exit]

Specify the following details:

Branch Code

Specify the branch for which you are generating the report. The option list displays all valid branch codes maintained in the system. Choose the appropriate one.

Branch Name

Based on the branch code selected, the system displays the name of the branch.

Account Status

You can generate the non-performing assets report for the accounts that are in a specific status. Specify the account status. The option list displays all valid account statuses available in the system. Choose the appropriate one.

Description

The system displays the description of the selected account status.

Include Subordinates

The relationship managers can generate the upcoming payment schedules for the customers who are associated with their subordinate RMs. Check this box to include the customers assigned to your subordinate RMs. If you do not check this box, the system will generate the report only for the customers assigned to you.

Once you have specified the above details, click 'OK' button. The system generates the report in the output type and format specified.

3.4.2 Contents of the Report

The non-performing assets report contains the following details:

Header

Sr. No.	Field Name	Field Description
1	Branch	Branch code
2	Branch Date	Branch date
3	Date & Time	Date on which report is generated
4	User Id	User ID
5	Module	Module code

Body

Sr. No.	Field Name	Field Description
1	RM ID	Relationship manager ID
2	Branch	Branch
3	Product Code	Product code
4	Product Desc	Product description
5	Customer No	CIF number
6	Customer Name	Customer name
7	Account Number	Loan account number
8	Currency	Loan account currency
9	Asset Value in LCY	Asset value in local currency
10	Account Status	Account status

3.5 Blacklisted Customers from Internal Bank Report

This section contains the following topic:

- [Section 3.5.1, "Generating Blacklisted Customers from Internal Bank Report"](#)

3.5.1 Generating Blacklisted Customers from Internal Bank Report

You can generate a report of blacklisted customers from internal bank and agencies. To invoke 'Blacklisted Customers from Internal Bank' screen, type 'STRNSFBC' in the field at the top right corner of the Application toolbar and click the adjoining arrow button.

For further details on the fields on this screen and the contents of this report, refer to the section 'Report of Blacklisted Customers' in Core Entities user manual.

3.6 Blacklisted Customers from Central Bank Report

This section contains the following topic:

- [Section 3.6.1, "Generating Blacklisted Customers from Central Bank Report"](#)

3.6.1 Generating Blacklisted Customers from Central Bank Report

You can generate a report of blacklisted customers from central bank or agencies. To invoke 'Blacklisted Customers from Central Bank' screen, type 'STRNSFCB' in the field at the top right corner of the Application tool bar and click the adjoining arrow button.

For further details on the fields on this screen and the contents of this report, refer to the section 'Report of Blacklisted Customers' in Core Entities user manual.

3.7 Overdue Schedules Report

This section contains the following topics:

- [Section 3.7.1, "Generating Overdue Schedules Report"](#)
- [Section 3.7.2, "Contents of the Report"](#)

3.7.1 Generating Overdue Schedules Report

You can generate a report of loan accounts that are overdue based on the due date. To invoke 'Overdue Schedules Report' screen, type 'CLRPOSCH' in the field at the top right corner of the Application tool bar and click the adjoining arrow button.

The screenshot shows a software window titled "Overdue Schedules report". The window contains a form with the following fields and controls:

- Product Type**: Text input field.
- Product Code**: Text input field.
- Value Date**: Section header for date-related fields.
 - From Date**: Text input field.
 - To Date**: Text input field.
- Report Format**: Dropdown menu with "PDF" selected.
- Report Output**: Dropdown menu with "View" selected.
- Currency**: Text input field.
- Customer**: Text input field.
- Schedule Date**: Section header for date-related fields.
 - From Date**: Text input field.
 - To Date**: Text input field.
- Printer At**: Dropdown menu with "Client" selected.
- Printer**: Text input field.

At the bottom right of the window, there are two buttons: "Ok" and "Exit".

Specify the following details:

Overdue Report

Specify the following details:

Branch Code

Specify the branch code for which you are generating the report. The option list displays all valid branch codes maintained in the system. Choose the appropriate one.

Product Type

Specify the product type for which you are generating the report. The option list displays all valid product types maintained in the system. Choose the appropriate one.

Product Code

Specify the loan product code for which you are generating the report. The option list displays all valid loan product codes maintained in the system. Choose the appropriate one.

Currency

Specify the currency for which you are generating the report. The option list displays all valid currency codes maintained in the system. Choose the appropriate one.

Customer

Specify the customer for whom you are generating the report. The option list displays all valid customer numbers maintained in the system. Choose the appropriate one.

Value Date

Specify the following details:

From Date

Specify the start date of the value date range. Click the date button to choose an appropriate date from the calendar.

To Date

Specify the end date of the value date range. Click the date button to choose an appropriate date from the calendar.

Schedule Date

Specify the following details:

From Date

Specify the start date of the loan schedule date range. Click the date button to choose an appropriate date from the calendar.

To Date

Specify the end date of the loan schedule date range. Click the date button to choose an appropriate date from the calendar.

Include Subordinates

The relationship managers can generate the reports for the customers who are associated with their subordinate RMs. Select 'Yes' to include the customers assigned to your subordinate RMs. If you select 'No', the system will generate the report only for the customers assigned to you.

3.7.2 Contents of the Report

The overdue schedules report contains the following details:

Header

Sr. No.	Field Name	Field Description
1	Branch	Branch Code
2	Branch Date	Branch Date
3	Date & Time	Date on which report is generated
4	User Id	User ID
5	Module	Module Code

Body

Sr. No.	Field Name	Field Description
1	RM ID	Relationship Manager ID
2	Account Number	Account Number
3	Customer No	CIF Number
4	Customer Name	Customer Name
5	Status	Account Status
6	Scheduled Date	Scheduled Due date
7	Overdue Amount	Overdue Amount
8	Component	Component Code
9	Currency	Component Currency
10	Overdue Days	Overdue Days

3.8 Defaulted Loans from Customer-wise Report

This section contains the following topics:

- [Section 3.8.1, "Generating Defaulted Loans Customer-wise Report"](#)
- [Section 3.8.2, "Contents of the Report"](#)

3.8.1 Generating Defaulted Loans Customer-wise Report

You can generate a customer-wise report of loans that are defaulted. To invoke 'Defaulted Loans Customer-wise' screen, type 'STRCLDEF' in the field at the top right corner of the Application tool bar and click the adjoining arrow button.

Specify the following details:

Branch Code

Specify the branch for which you need to generate the report. The option list displays all valid branch codes maintained in the system. Choose the appropriate one.

Branch Name

Based on the branch code, the system displays the branch name.

Account Status

Specify the loan account status. The option list displays all valid statuses. Choose the appropriate one.

The system generates the report of the accounts in this status.

Description

Based on the loan account status selected, the system displays the status description.

Include Subordinates

The relationship managers can generate the reports for the customers who are associated with their subordinate RMs. Select 'Yes' to include the customers assigned to your subordinate RMs. If you select 'No', the system will generate the report only for the customers assigned to you.

3.8.2 Contents of the Report

The defaulted loans report contains the following details:

Header Elements

Sr. No.	Field Name	Field Description
1	Branch	Branch Code
2	Branch Date	Branch Date
3	Date & Time	Date on which report is generated
4	User Id	User ID
5	Module	Module Code

Detail Block Elements

Sr. No.	Field Name	Field Description
1	RM ID	Relationship Manager ID
2	Branch Code	Branch Code
3	Account Number	Account Number
4	Customer No	CIF Number
5	Customer Name	Customer Name
6	Product Code	Product Code
7	Product Desc	Product Description
8	Currency	Loan Account Currency
9	Loan Amount	Loan Financed
10	Status	Account Status

3.9 Term Deposits Maturity Report

This section contains the following topic:

- [Section 3.9.1, "Generating Term Deposit Maturity Report"](#)

3.9.1 Generating Term Deposit Maturity Report

This report lists the term deposits that will be matured for the given period. You can generate this report using 'TD Account Maturity Report' screen.

To invoke this screen, type 'TDRMATR' in the field at the top right corner of the Application tool bar and click on the adjoining arrow button.

For further details on the fields on this screen and the contents of this report, refer to the section 'Term Deposits Maturity Report' in chapter Reports of the Term Deposits user manual.

3.10 Term Deposits Closed Report

This section contains the following topic:

- [Section 3.10.1, "Generating Term Deposits Closed Report"](#)

3.10.1 Generating Term Deposits Closed Report

This report list the term deposit accounts which are closed for the given period, and that are currently on open status. You can generate this report using 'TD Account Closed Report' screen. To invoke this screen, type 'TDRCLOSE' in the field at the top right corner of the Application toolbar and click the adjoining arrow button.

For further details on the fields on this screen and the contents of this report, refer to the section 'Term Deposits Closed for the Period Report' in chapter Reports of the Term Deposits user manual.

3.11 Term Deposits Opened Report

This section contains the following topic:

- [Section 3.11.1, "Generating Term Deposits Opened Report"](#)

3.11.1 Generating Term Deposits Opened Report

This report lists the term deposit accounts which are opened for the given period, and that are currently on open status.

You can generate this report using 'TD Account Opened Report' screen. To invoke this screen, type 'TDROPEN' in the field at the top right corner of the Application toolbar and click the adjoining arrow button.

The screenshot shows a window titled "TD Account Opened Report" with a blue header bar. The main area contains a form with the following fields and controls:

- From Date * (text input)
- To Date * (text input)
- Branch (text input)
- Account Class (text input)
- Customer (text input)
- Report Format: PDF (dropdown menu)
- Report Output: View (dropdown menu)
- Printer At: Client (dropdown menu)
- Printer (text input)

At the bottom right of the window, there are two buttons: "Ok" and "Exit".

For further details on the fields on this screen and the contents of this report, refer to the section 'Term Deposits Opened for the Period Report' in chapter Reports of the Term Deposits user manual.

3.12 Term Deposits Exceeding Lien Limits Report

This section contains the following topic:

- [Section 3.12.1, "Generating Term Deposits Exceeding Lien Limit Report"](#)

3.12.1 Generating Term Deposits Exceeding Lien Limit Report

You can generate a report of term deposits exceeding the lien reports using 'Term Deposits Exceeding Lien Limit' screen. To invoke the screen, type 'STRLELMT' in the field at the top right corner of the application toolbar and click the adjoining arrow button.

The screenshot shows a software window titled "Term Deposits exceeding Lien Limit". The window contains the following fields and controls:

- Branch Code: [Text Input]
- Branch Name: [Text Input]
- Customer: [Text Input]
- Customer Name: [Text Input]
- Include Subordinates: [Yes] (dropdown menu)
- Report Format: [PDF] (dropdown menu)
- Report Output: [View] (dropdown menu)
- Printer At: [Client] (dropdown menu)
- Printer: [Text Input]

At the bottom right of the window, there are two buttons: "Ok" and "Exit".

For further details on the fields on this screen and the contents of this report, refer to the section 'Term Deposits Exceeding Lien Limits Report' in chapter Reports of the Term Deposits user manual.

3.13 Customer Transaction beyond Threshold Amount Report

This section contains the following topics:

- [Section 3.13.1, "Generating Customer Transaction beyond Threshold Amount Report"](#)
- [Section 3.13.2, "Contents of the Report"](#)

3.13.1 Generating Customer Transaction beyond Threshold Amount Report

You can generate a report of deposit and withdrawal transactions that are beyond the threshold defined in Oracle FLEXCUBE. To invoke 'Customer Transaction beyond Threshold

'Amount Report' screen, type 'STRWBDA' in the field at the top right corner of the Application toolbar and click the adjoining arrow button.

Customer transaction beyond threshold amount report

Branch Code _____ Branch Name _____

Account No _____ Account Description _____

Include Subordinates Yes ▾

Report Format PDF ▾ Printer At Client ▾

Report Output View ▾ Printer _____

Ok Exit

Specify the following details:

Branch Code

Specify the branch for which you are generating the report. The option list displays all valid branch codes maintained in the system. Choose the appropriate one.

Based on the branch code, the system displays the name of the branch.

Account Number

Specify the account number for which you are generating the report. The option list displays all valid account numbers available to you. Choose the appropriate one.

Based on the account number, the system displays the description of the account.

Include Subordinates

The relationship managers can generate the reports for the customers who are associated with their subordinate RMs. Select 'Yes' to include the customers assigned to your subordinate RMs. If you select 'No', the system will generate the report only for the customers assigned to you.

3.13.2 Contents of the Report

The customer transaction beyond threshold amount report contains the following details:

Header Elements

Sr. No.	Field Name	Field Description
1	Branch	Branch Code
2	Branch Date	Branch Date

3.19 Period Based Business Report

This section contains the following topics:

- [Section 3.19.1, "Generating Period Based Business Report"](#)
- [Section 3.19.2, "Contents of the Report"](#)

3.19.1 Generating Period Based Business Report

The relationship managers can generate a report of their business performance for a given period. This report contains the details of CASA, TD and loan transactions created by the relationship manager and subordinates. To invoke 'Period Based Business Report' screen,

type 'STRMBUS' in the field at the top right corner of the application toolbar and click the adjoining arrow button.

Period Based Business Report

Branch Code _____ Branch Name _____

From Date * _____ To Date * _____

Include Subordinates Yes ▾ Transaction Type CASA ▾

Report Format PDF ▾ Printer At Client ▾

Report Output View ▾ Printer _____

Ok Exit

Specify the following details:

Branch Code

Specify the branch for which you are generating the report. The option list displays all valid branch codes maintained in the system. Choose the appropriate one.

Based on the branch code, the system displays the name of the branch.

From Date

Specify the start date of the report period. The business report is generated for a period that begins from this date.

To Date

Specify the end date of the report period. The business report is generated for a period that ends on this date.

Transaction Type

Specify the type of transactions that you wish to include in the report. You can generate the report for the following transaction types:

- CASA – choose this to generate the report of CASA transactions alone
- TD – choose this to generate the report for term deposit transactions alone
- Loans – choose this to generate the report for loans transactions alone
- All – choose this to generate the report for all CASA, term deposit and loans transactions

Include Subordinates

The relationship managers can generate the reports for the customers who are associated with their subordinate RMs. Select 'Yes' to include the customers assigned to your subordinate RMs. If you select 'No', the system will generate the report only for the customers assigned to you.

3.20 New CASA Accounts Report

This section contains the following topics:

- [Section 3.20.1, "Generating New CASA Accounts Report"](#)
- [Section 3.20.2, "Contents of the Report"](#)

3.20.1 Generating New CASA Accounts Report

You can generate a report of newly created CASA accounts for the customers assigned to you and your subordinates. To invoke 'New CASA Accounts' screen, type 'STRNEWCA' in the field at the top right corner of the Application toolbar and click the adjoining arrow button.

Specify the following details:

Branch Code

Specify the branch for which you are generating the report. The option list displays all valid branch codes maintained in the system. Choose the appropriate one.

Based on the branch code, the system displays the name of the branch.

From Date

Specify the start date of the report period. The business report is generated for a period that begins from this date.

To Date

Specify the end date of the report period. The business report is generated for a period that ends on this date.

Include Subordinates

The relationship managers can generate the reports for the customers who are associated with their subordinate RMs. Select 'Yes' to include the customers assigned to your subordinate RMs. If you select 'No', the system will generate the report only for the customers assigned to you.

Once you have specified the above details, click 'OK' button. The system generates the report which graphically represents the number of CASA accounts created during the specific period.

3.20.2 Contents of the Report

This report contains the following details:

Header Elements

Sr. No.	Field Name	Field Description
1	Branch	Branch Code
2	Branch Date	Branch Date
3	Date & Time	Date on which report is generated
4	User Id	User ID
5	Module	Module Code

Body Elements

Sr. No.	Field Name	Field Description
1	Number of Newly opened CASA Accounts	Number of Newly opened CASA Accounts

3.21 New Loans Accounts Report

This section contains the following topics:

- [Section 3.21.1, "Generating New Loans Accounts Report"](#)
- [Section 3.21.2, "Contents of the Report"](#)

3.21.1 Generating New Loans Accounts Report

You can generate a report of newly created loan accounts for the customers assigned to you and your subordinates. To invoke 'New Loans Accounts RM-wise' screen, type 'STRNEWLO' in the field at the top right corner of the Application toolbar and click the adjoining arrow button.

The screenshot shows a software window titled "New Loans Accounts RM-wise". The window contains the following elements:

- Branch Code:
- Branch Name:
- From Date *:
- To Date *:
- Include Subordinates: (dropdown)
- Report Format: (dropdown)
- Report Output: (dropdown)
- Printer At: (dropdown)
- Printer:
- Buttons: Ok, Exit

Specify the following details:

Branch Code

Specify the branch for which you are generating the report. The option list displays all valid branch codes maintained in the system. Choose the appropriate one.

Based on the branch code, the system displays the name of the branch.

From Date

Specify the start date of the report period. The business report is generated for a period that begins from this date.
