

SWITCH Simulator
Oracle FLEXCUBE Universal Banking
Release 14.5.1.0.0
Part No. F45406-01
[June] [2021]

Table of Contents

1. INTRODUCTION	1-1
1.1 SCOPE OF THE DOCUMENT.....	1-1
1.2 INTENDED AUDIENCE	1-1
1.3 ORGANIZATION OF THE DOCUMENT	1-1
2. SIMULATOR BASIC REQUIREMENTS.....	2-1
2.1 SOFTWARE REQUIREMENTS.....	2-1
2.2 REQUIRED EXTERNAL JARS	2-1
3. SIMULATOR DEPLOYMENT PROCESS.....	3-1
3.1 COPY FOLDER STRUCTURE.....	3-1
3.2 PLACE THE REQUIRED JARS	3-1
4. SIMULATOR BASIC CONFIGURATION.....	4-1
4.1 IP & PORT CONFIGURATION	4-1
4.2 BITMAP CONFIGURATION	4-1
4.3 HEADER LENGTH TYPE	4-1
5. SIMULATOR USAGE.....	5-1
5.1 START THE SIMULATOR.....	5-1
5.2 STOP THE SIMULATOR	5-2
5.3 LOAD THE PREVIOUS TRANSACTION DETAILS	5-2
5.4 SEND ISO TRANSACTION MESSAGE	5-5
5.5 AUTO GENERATION OF FIELDS	5-6
5.6 CLEAR OPTION OF SIMULATOR.....	5-6
5.7 SWITCH TO DIFFERENT VERSION	5-7

1. Introduction

1.1 Scope of the Document

This document explains the basic configuration and usage of the Simulator.

It provides a detailed description of the software requirements, building process, and Usage.

1.2 Intended Audience

The document is intended for the KERNEL implementation Team.

1.3 Organization of the Document

The organization of the document is as follows:

Chapter	Remarks
Chapter 1	Short Introduction to this document.
Chapter 2	Simulator Basic Requirements
Chapter 3	Simulator Deployment Process
Chapter 4	Simulator Basic Configuration
Chapter 5	Simulator Usage

2. Simulator Basic Requirements

2.1 Software Requirements

- Java JDK 1.5 and above
- Ant

2.2 Required External Jars

- log4j.jar
- commons-logging-1.0.4.jar
- commons-pool-1.2.jar
- xml.jar
- xerces-2.4.0.jar

Note: The external jar we could find in the any application server's folder (e.g: weblogic or IBM web spear or oc4j (please search entire home folder of application server home folder with .jar)).

3. Simulator Deployment Process

3.1 Copy Folder Structure

Get the simulator folder which has required folder structure, configuration related files and simulator related jar files from the below link and place it in the local system.

"FCUBS_14.0.0.0.0\SwitchGateway\utilities\SWJavaSimulator"

Assume that it is <HomeFolder>

3.2 Place the required Jars

Place the external jar files into <HomeFolder>/lib folder.

4. Simulator Basic Configuration

4.1 IP & Port Configuration

Config File Name: <HomeFolder>/<Version - xxxx>/config/properties.xml

Configuration (change):

- The following XPATH will contain the Host Name or IP of the system to which simulator has to send the generated ISO Messages.

XPATH: simulator/FepiServer/Ip

- The following XPATH will contain the port to which simulator will establish the TCP/IP connection

XPATH: simulator/FepiServer/Port

4.2 Bitmap Configuration

Config File Name: <HomeFolder>/<Version - xxxx>/config/properties.xml

- The following XPAH has to be used to configure the Bitmap Type

XPATH: simulator/Bitmap-AsciiMode

Supporting Bitmap Modes:

1. **ASCII – XPATH value should be true**
2. **BINARY – XPATH value should be false**

4.3 Header Length Type

Config File Name: <HomeFolder>/<Version - xxxx>/config/properties.xml

- The following XPAH has to be used to configure the Bitmap Type

XPATH: simulator/ HeaderLength-AsciiMode

Supporting Bitmap Modes:

1. **ASCII – XPATH value should be true**
2. **BINARY – XPATH value should be false**

5. Simulator Usage

5.1 Start the Simulator

By executing the Simulator.bat we can start the Simulator

File Path: <HomeFolder>/Simulator.bat

When simulator is started, it will load with default values

The screenshot shows the 'Simulator' application window with the 'Iso Simulator' tab selected. The window has a menu bar with 'Simulator', 'Configuration', and 'Help'. Below the menu bar is a toolbar with buttons for 'Send', 'Reversal', 'Clear', 'Close', and navigation arrows. The main area contains a grid of input fields for transaction data. The 'System Trace Audit No' field is pre-filled with '000000' and the 'Message Type' field is pre-filled with '1804'. The 'Function Code' field is pre-filled with '801'. The 'Orig Stan' field is pre-filled with '000000'.

Field Name	Value
Acquiring Institution	
Forwarding Institution	
CAT ID	
CA ID Code	
Transaction Date Time	
System Trace Audit No	000000
Message Type	1804
Primary Account Number	
Processing Code	
Card Acceptor Name/Loc...	
Narrative	
Approval code	
Response Code	
Additional Amount....	
Net Avail Bal	
Uncleared Bal	
Ledger Balance	
Additional Data....	
Field Length indicator	
Preauthorisation Hold	
Pre-Authorization Sequen...	
Referral Phone Number	
Transaction Amount	0
Reconciliation Amount	0
Conversion Rate Reconciliation	
R.R.No	
Transaction Ccy Code	
Reconciliation Ccy Code	
Cardholder Billing Ccy Code	
Function Code	801
Date & Time Local Transcation	
Date Effective	
Date Settlement	
Date Capture	
Year Transmission	
To Account	
From Account	
Mini Statement	
POS Code	
Amount Fee	
Original Data Elements	
Orig Message	
Orig STAN	000000
Orig Txn Date & Time	

5.2 **Stop the Simulator**

Closing the simulator is preferred by using Close option of the simulator, since what ever the transactions are done so far will get saved in the transactions log history.

So that when we open next time we would be able to load the previous transactions what ever are done.

5.3 **Load the previous Transaction Details**

We can use to load the previous Transaction details on to the Simulator Panel, using Simulator menu, and then click on of the following

- First Record
- Next Record
- Previous Record
- Last Record

The following snap shot is to load the Last transaction

While choosing the option

Send	Alt-S		Transaction Amount	0
Reversal	Alt-R		Reconciliation Amount	0
Clear	Alt-L		Conversion Rate Reconciliation	
Close	Alt-X		R.R.No	
First Record	Alt-1		Transaction Ccy Code	
Previous Record	Alt-2		Reconciliation Ccy Code	
Next Record	Alt-3		Cardholder Billing Ccy Code	
Last Record	Alt-4		Function Code	801
CA ID Code			Date & Time Local Transaction	
Transmission Date Time			Date Effective	
System Trace Audit No	000000		Date Settlement	
Message Type	1804		Date Capture	
Primary Account Number			Year Transmission	
Processing Code			To Account	
Card Acceptor Name/Loc...			From Account	
Narrative			Mini Statement	
Approval code			POS Code	
Response Code			Amount Fee	
Additional Amount....			Original Data Elements	
Net Avail Bal			Orig Message	
Uncleared Bal			Orig STAN	
Ledger Balance			Orig Txn Date & Time	
Additional Data....				
Field Length indicator				
Preauthorisation Hold				
Pre-Authorization Sequen...				
Referral Phone Number				

After choosing the option

The screenshot shows a software window titled "Simulator Configuration Help" with a standard Windows-style title bar. Below the title bar is a menu bar with "Simulator", "Configuration", and "Help". Under the "Simulator" menu, there are buttons for "Send", "Reversal", "Clear", "Close", and navigation buttons: "<|", "<", ">", and ">|".

The main area is labeled "Iso Simulator" and contains a grid of input fields for transaction data. The fields are organized into two columns:

Acquiring Institution	12323	Transaction Amount	000000000000
Forwarding Institution		Reconciliation Amount	000000000000
CAT ID	4234	Conversion Rate Reconciliation	
CA ID Code		R.R.No	00001265
Transmission Date Time	0711104918	Transaction Ccy Code	123
System Trace Audit No	000001	Reconciliation Ccy Code	
Message Type	1200	Cardholder Billing Ccy Code	
Primary Account Number	1234567890123456	Function Code	801
Processing Code	311000	Date & Time Local Transaction	080711104918
Card Acceptor Name/Loc...		Date Effective	0807
Narrative		Date Settlement	080711
Approval code		Date Capture	0711
Response Code		Year Transmission	
Additional Amount....		To Account	
Net Avail Bal		From Account	100695
Uncleared Bal		Mini Statement	
Ledger Balance		POS Code	
Additional Data....		Amount Fee	
Field Length indicator		Original Data Elements	
Preauthorisation Hold		Orig Message	
Pre-Authorization Sequen...		Orig STAN	
Referral Phone Number		Orig Txn Date & Time	

We can also do the same sort of work using buttons located on the standard tool bar

- <| will load the First Record
- > will load the Next Record
- < will load the Previous Record
- >| will load the Last record

5.4 Send ISO Transaction Message

Once if the data is entered in the required fields, we just need to choose send option of the simulator. Once if the send option is selected, It does the basic validation, prepares the ISO message based on the configurations, and will send the message to the host.

Once simulator send the Transaction to the host, It will start looking for response, and wits till some time (configured time) and if it doesn't get the response I t will popup the message.

If simulator get the response, first it clears the all the fields of the panel and will display the fields values those are present in the response

The screenshot shows the 'Iso Simulator' application window. The title bar includes 'Simulator', 'Configuration', and 'Help'. Below the title bar is a menu bar with 'Send', 'Reversal', 'Clear', and 'Close'. There are also navigation buttons: '<|', '<', '>', and '>|'. The main area is titled 'Iso Simulator' and contains a form with two columns of fields. The left column includes: Acquiring Institution (12323), Forwarding Institution, CAT ID (4234), CA ID Code, Transmission Date Time (0711161907), System Trace Audit No (000003), Message Type (1210), Primary Account Number (1234567890123456), Processing Code (311000), Card Acceptor Name/Loc..., Narrative, Approval code, Response Code (06), Additional Amount..., Net Avail Bal, Uncleared Bal, Ledger Balance, Additional Data..., Field Length Indicator, Preauthorisation Hold, Pre-Authorization Sequen..., Referral Phone Number, Reason for Chargeback, and Number of Chargeback. The right column includes: Transaction Amount (000000000000), Reconciliation Amount (000000000000), Conversion Rate Reconciliation, R.R.No (00001265), Transaction Ccy Code (123), Reconciliation Ccy Code, Cardholder Billing Ccy Code, Function Code (801), Date & Time Local Transcation (080711161907), Date Effective (0807), Date Settlement (080711), Date Capture (0711), Year Transmission, To Account, From Account (100695), Mini Statement, POS Code, Amount Fee, Original Data Elements, Orig Message, Orig STAN, Orig Txn Date & Time, and Orig Acquirer.

After getting Response:

The screenshot shows the 'Iso Simulator' application window. The title bar includes 'Simulator Configuration Help' and standard window controls. Below the title bar is a menu bar with 'Send', 'Reversal', 'Clear', 'Close', and navigation buttons. The main area is a form titled 'Iso Simulator' containing two columns of fields. The left column includes fields like 'Acquiring Institution', 'Forwarding Institution', 'CAT ID', 'CA ID Code', 'Transmission Date Time', 'System Trace Audit No', 'Message Type', 'Primary Account Number', 'Processing Code', 'Card Acceptor Name/Loc...', 'Narrative', 'Approval code', 'Response Code', 'Additional Amount...', 'Net Avail Bal', 'Uncleared Bal', 'Ledger Balance', 'Additional Data...', 'Field Length indicator', 'Preauthorisation Hold', 'Pre-Authorization Sequen...', 'Referral Phone Number', 'Reason for Chargeback', and 'Number of Chargeback'. The right column includes fields like 'Transaction Amount', 'Reconciliation Amount', 'Conversion Rate Reconciliation', 'RR.No', 'Transaction Ccy Code', 'Reconciliation Ccy Code', 'Cardholder Billing Ccy Code', 'Function Code', 'Date & Time Local Transcation', 'Date Effective', 'Date Settlement', 'Date Capture', 'Year Transmission', 'To Account', 'From Account', 'Mini Statement', 'POS Code', 'Amount Fee', 'Original Data Elements', 'Orig Message', 'Orig STAN', 'Orig Txn Date & Time', and 'Orig Acquirer'. Each field has a corresponding input box with some pre-filled values.

Note: Request to restart the Simulator if we don't get response for one message.

5.5 Auto Generation of Fields

Few field's values will be generated automatically. And will be populated when we choose the send option. Just before validating the fields values, It will generates the values for the fields (As per the configuration e.g: STAN), will populate on the panel then will validates and prepares the message and will send.

5.6 Clear option of simulator

It just clears the field's values of Simulator Panel

5.7 Switch to different Version

Click on Configuration menu. Then it will popup open dialog box. Select the one of the version folders available

When we click on configuration

After Selecting the Version Folder

The screenshot shows the 'Simulator Configuration' window with the 'Iso Simulator' tab selected. The window contains two columns of input fields for configuring an ISO transaction. The top bar includes a menu (Simulator, Configuration, Help) and buttons (Send, Reversal, Clear, Close) along with navigation arrows. The input fields are organized as follows:

Field Name	Value
Acquiring Institution	
Forwarding Institution	
CAT ID	
CA ID Code	
Transmission Date Time	
System Trace Audit No	000000
Message Type	800
Primary Account Num...	
Processing Code	
Card Acceptor Name	
Narrative	
Authorisation code	
Retrieval Reference No	
Point of Service Condi...	
Response Code	
Additional Amount	
Amount Transaction	0
Settlement Amount	0
Conversion Rate Settlem...	
Transaction Fee Amount	00000000
Settlement Fee Amount	00000000
Trans Processing Fee Amt	00000000
Settl Processing Fee Amt	00000000
Transaction Ccy Code	
Settlement Ccy Code	
Cardholder Billing Ccy Co...	
Network Management Inf...	301
Time Local Transaction	
Date Local Transaction	
Date Settlement	
Date Capture	
Year Transmission	
To Account	
From Account	
Original Transaction Defa...	
Replacement Amounts	

Note:

- Once if we switch to another version, all the transactions will get saved, new version related property files, and transaction history will be loaded. Once version related things are loaded, rest of the operations is same.
- When we are using sub fields, we must enter all the sub fields, otherwise corresponding field value won't be the part of the generated ISO Message.
