# 1. Local Limits in FCUBS without ELCM

## 1.1 Introduction

This document explains the usage of local limit functionalities in Oracle FLEXCUBE UBS without ELCM.

### 1.1.1 Setup

Oracle FLEXCUBE UBS Application Setup without ELCM by maintaining "ELCM\_SETUP\_MODE" = "N" in CSTB\_PARAM.

## 1.2 Local Limits

In UBS set without ELCM system supports two types of local limits could be created namely,

- Local Facility-Facilities for which utilization and validations are tracked with in UBS
- Local Collateral-Collaterals for which utilization and validations are tracked with in UBS.

Local Collateral and facilities are allowed to be used in CASA and other modules

### 1.2.1 Customer creation with Track Limits (For usage of Limits in UBS without Limits)

For creation of local facility or collateral, The "Track Limits" Flag has to be opted in Customer Maintenance (STDCIF) under "Additional" tab. On authorization of customer system will automatically create the liability and link it with the customer on authorization.

- Customer number is used as Liability number/Optionally an existing liability number can be selected. In that case this customer would be linked existing Liability .Existing details of the liability would not be changed.
- Customer Full name (FULL\_NAME) is used as Liability Name for Individual type of customers
- Customer Name (CUSTOMER\_NAME1) is used for Liability Name for other type of customers like Corporate/Bank.
- Customer's branch (LOCAL\_BRANCH) is used as Liability branch
- Branch local currency is used as Liability currency
- A configurable override would be displayed if an existing liability is mapped instead of creating a new one.

You can invoke the 'Customer Maintenance' screen by typing 'STDCIF' in the field at the top right corner of the Application tool bar and clicking the adjoining arrow button.

You can also navigate to Customers > Operations > Customer Input.

The screenshot shows the Oracle Customer Maintenance application window. The window title is "Customer Maintenance". The menu bar includes "New", "Copy", "Close", "Unlock", "Print", and "Enter Query". The main area is divided into several sections: "Type" (Individual, Corporate, Bank, Special Customer No Generation), "Full Name" (VINAY P), "Short Name" (VINAY), "Branch Code" (000), and "Customer Category" (INDIVIDUAL, Private Customer). There are tabs for "Personal", "Corporate", "Additional", "Director", "Auxiliary", "Check List", and "MFI Details". The "Additional" tab is selected. Below this are fields for "Pincode", "Country", "Misc Details" (SWIFT Code, Access Group, Charge Group, Clearing Group, Tax Group, Customer Classification), "External Reference Number", "Location" (IN), "FX Netting Customer" (003962), "Media" (MAIL), "SSN", "Auto Account Creation", "Track Limits" (checked), and "Liability Id" (003962). On the right, there are sections for "Combined Statement Plan" (Auto Generated Statement Plan, Frequency, Statement Day), "Virtual Account" (Allow Virtual Accounts, Virtual Customer ID), and "Sanction Check" (Sanction Check Required At Transaction Level). At the bottom, there is a status bar with "Group | MIS | Joint | Standing Instructions | Linked Entities | Text | Fields | Image | Limits | CLS Restrictions | MT920 | Domestic | Professional | Cards | Linked Account |", "Maker LIJOJAMES02", "Date Time: 2018-03-16 20:36:35", "Mod No 1", "Record Status Open", "Checker LIJOJAMES03", "Date Time: 2018-03-16 20:39:08", "Authorization Authorized Status", and an "Exit" button.

## 1.2.2 Modification of Track Limit Details.

User can mark the track limits enabled during customer modification as well. Changing the Track limit from yes to No is allowed during customer modification

### 1.2.3 Local Facility Creation

Facilities can be created once we done with the customers are created with Track Limit flag enabled. Local utilization tracking will be done when using this facility in FCUBS modules. Limit related validations are performed in UBS for local Facilities and shown during the transactions as applicable

To create the facilities, follow the steps below:

1. Navigate to Common Entity > Limits Maintenance > External Facilities Maintenance' (STDCRFAC) screen.

The screenshot shows the 'External Facilities Maintenance' window with the following data:

Host Code	HOST1	<input checked="" type="checkbox"/> Revolving Line
Branch		<input type="checkbox"/> Unadvised
Liability No *	004208	<input type="checkbox"/> Bulk PMT Required
Liability Name	LJOLMS	<input checked="" type="radio"/> Local
Line Code *	CASAOD01	<input type="radio"/> Global
Serial No *	1	
Description		
Line Currency *	GBP	
Source Line Code		
Source Line Serial		
Source Liability ID		
Source System		

**Amounts**

Limit Amount *	50,000.00	Effective Line Amount	50,000.00
Limit Amount Basis	Limit Amount		

**Availability**

Line Start Date *	2018-03-16	Line Expiry Date	YYYY-MM-DD
<input checked="" type="checkbox"/> Availability Flag			

**LBL\_INFO\_FIELD**

Block Amount		Transfer Amount	
Collateral Contribution			

**Fields**

Maker	LJOJAMES01	Date Time	2018-03-16 10:07:51	Mod No	1	Record Status	Open
Checker		Date Time		Authorization	Unauthorized	Status	

2. Create the facility with 'Utilization tracking' as "Local".

## 1.2.4 Local Collateral Creation

Collaterals can be created once we done with the customers are created with Track Limit flag enabled .Collaterals can be created from Local Collateral Maintenance (STDCOLAT) screen.

- Local utilization tracking will be done when using this local collateral from modules.
- For CASA, Linked portion will be blocked upfront on linkage. Further, there will not be any utilization tracking for each transaction.
- Limit related validations are performed in UBS for local Facilities and shown during the transactions as applicable.

You can invoke the 'Local Collateral Maintenance' screen by typing 'STDCOLAT' in the field at the top right corner of the Application tool bar and clicking the adjoining arrow button.

You can also navigate to Common Entity > Limits Maintenance > Local Collateral Input screen.

The screenshot displays the 'Local Collateral Maintenance' application window. The title bar includes 'Local Collateral Maintenance' and standard window controls. Below the title bar is a menu bar with options: 'New', 'Copy', 'Close', 'Unlock', 'Print', and 'Enter Query'. The main area is divided into two columns of input fields. The left column contains: 'Collateral Code \*' (MAINCOLLT004434), 'Collateral Description' (Property), 'Collateral Currency' (GBP), 'Collateral Value' (empty), 'Collateral Contribution' (200,000.00), 'Start Date' (2018-03-16), 'End Date' (YYYY-MM-DD), 'Available Amount' (100,000.00), 'Utilized Amount' (100,000.00), and 'Blocked Amount' (0.00). The right column contains: 'Branch Code' (000), 'Liability Number \*' (004434), 'Collateral Type' (Property), and 'Source Code' (empty). At the bottom, there is a 'Linkage | Change Log' section and a status bar with fields for 'Maker JAROM01', 'Date Time: 2018-03-16 18:03:30', 'Mod No 1', 'Record Status Open', 'Checker JAROM01', 'Date Time: 2018-03-16 18:03:30', 'Authorization Authorized Status', and an 'Exit' button.

## 1.3 CASA Limits

CASA module support linkage of local limit types in a UBS without ELCM setup mode.

### 1.3.1 Account class parameters specific to Limits

- 'Overdraft facility' under account class – 'Preferences' sub screen should be enabled to attach the limits with the account created under that account class.
- 'Limit Check' flag under account class – 'Preferences' sub screen should be enabled for utilization tracking or using local facility.
- Margin on Advance against uncollected fund and default CASA OD interest parameters are can be maintained under account class – 'Default Limits' subsystem.
- Also the default 'Fund Utilization Sequence' and Channel wise sequences are should be chosen. This is used for raising overrides to control the usage of account level limits. For more information, Please refer *FCUBS\_14.0.0.0.0\_DesignDocument\_Limit\_Changes.docx*

You can invoke the 'Account Class Maintenance' screen by typing 'STDACCLS' in the field at the top right corner of the Application tool bar and clicking the adjoining arrow button.

You can also navigate to Customer Accounts > Customer Accounts Maintenance > Account Classes

**Preferences**

Limit Check

Ok Cancel

### 1.3.2 Maintaining Limits at Customer Account Level

The following sources of funds will be considered for utilization at account level.

Component	Impact in Limit	Remarks
B- Balance	Nil	Balance refers to clear balance available for debits at account.
S- Sweep in Funds	Nil	Funds available as a result of Sweep in Set Up including Cover account, auto deposit and term deposit linkages
O- OD Limit	Yes	Will apply to account level OD limits like <ul style="list-style-type: none"> <li>• Term Deposits</li> <li>• Local Collateral</li> <li>• Un-secured Limit</li> </ul>
A- AUF limit	Yes	<ul style="list-style-type: none"> <li>• Limit granted against uncollected funds available in the account</li> <li>• It will be issued after reserving a portion of the uncollected funds as margin.</li> </ul>
L – Line	Yes	<ul style="list-style-type: none"> <li>• Local Facility linked at account level</li> </ul>
T – TOD	Yes	<ul style="list-style-type: none"> <li>• Temporary Overdraft given at account level</li> </ul>
D – Daylight	Yes	<ul style="list-style-type: none"> <li>• Day Light Limit amount given to the account</li> </ul>
V- Overline	Yes	<ul style="list-style-type: none"> <li>• Always last component to be utilized</li> </ul>

Utilization sequence will be defaulted from account class.

### 1.3.2.1 Using Term Deposit as Collateral

Follow the steps below to book a term deposit as collateral:

1. Invoke the 'Account Class Maintenance' screen by typing 'STDACCLS' in the field at the top right corner of the Application tool bar and clicking the adjoining arrow button.

The screenshot shows the 'Deposit Account Booking' application window. The 'TD Collateral Linkage' section has a checkbox labeled 'Allow Collateral Linkage' which is checked and highlighted with a red box. The 'Account Class' is set to 'DEP01'. The 'Pay In Option' section has 'Pay In By' set to 'Others'. The 'Recurring Deposit' section has 'Auto Payment Takedown' and 'Move Maturities to Unclaimed' checked. The 'Auto Deposit' section has 'Sweep Type' set to 'Default from Account'. The 'Option' section has 'Track Receivable' checked. The 'Goal Account Details' section has 'Goal Reference Number' empty. The status bar at the bottom shows 'Maker LIJAMES02', 'Checker LIJAMES03', 'Date Time: 2018-03-16 20:50:25', 'Mod No 1', 'Record Status Open', and 'Authorization Authorized Status'. An 'Exit' button is visible in the bottom right corner.

2. Book a term deposit with the flag "Allow Collateral Linkage" enabled.
3. Once the term deposit is authorized, it will get listed in Customer Account Maintenance

### 1.3.2.2 Local Collateral

Local collaterals created in Sec 1.2.3 are allowed to link as account level OD. Linked portion will be blocked upfront on linkage. Further, there will not be any utilization tracking on each transaction.

### 1.3.2.3 Un-secured Limit

It is a clean limit assigned without any collateral. i.e. Unsecured limits granted not backed by collaterals.

You can invoke the 'Customer Account Maintenance' screen by typing 'STDCUSAC' in the field at the top right corner of the Application tool bar and clicking the adjoining arrow button.

You can also navigate to Customer Accounts > Customer Accounts Operations > Customer Account Input.

The screenshot displays the 'Account Limits' application window. It contains several input fields for configuring limits, including 'Limit Currency' (GBP), 'Credit Start Date', 'Credit Rev Date', 'Cr Transaction Limit', 'Advance against Uncollected Funds' (AUF Limit: 1,000.00), 'Temporary OD Limit' (TOD Limit: 2,000.00), 'Renew Frequency', 'Renew Unit', 'Renew TOD', 'Daylight Limit' (0.00), 'Utilization Sequence' (BSDOATLV), and 'Netting Required' (No).

Below the input fields is a 'Limit Details' section with a table showing the following data:

Limit Type	Linkage Reference	Branch	Available Linkage Amount	Linkage Currency	Available Amount (ACY)	Linked Amount (ACY)	Linkage Percentage
<input checked="" type="checkbox"/> Term Deposit	000039622655	000	20,000.00	GBP	20,000.00	16,000.00	80
<input type="checkbox"/> Unsecured	UNSEC000962001	000		GBP		14,000.00	20
<input type="checkbox"/> Collateral	LCL_COLLAT_01	000	25,000.00	GBP	25,000.00	3,000.00	12

At the bottom of the window is a 'Line Linkage' section with a table showing the following data:

Linkage Ref No	Liability Number	Effective Date	Account Limit Amount	Ear Marked Amount
<input checked="" type="checkbox"/> LINE0039621	003962	2018-03-16	40,000.00	35,000.00

The window includes navigation controls (back, forward, search) and 'Ok' and 'Exit' buttons at the bottom right.

### 1.3.2.4 Limit Balance after Limit Linkage

	Local Collateral	Local Facility

## 1.3.3 Account Balance and Limit Balance/Utilization after debit Transaction

### 1.3.3.1 Scenario 1

- Considering the above mentioned account (Sec 1.2.6.5) and balance (Sec 1.2.6.4), Debit the account for 50 GBP
- System completes the transaction without any override as it has sufficient account balance

### 1.3.3.2 **Scenario 2**

- Considering the above mentioned account (Sec 1.2.6.5) and balance (Sec 1.2.6.4), Debit the account for 250 GBP
- System will use below components and raise overrides
  - B - Balance 84 GBP
  - O – OD Limit 666 GBP
- Sweep and Daylight components are not available to use.

### 1.3.3.3 **Scenario 3**

- Considering the above mentioned account (Sec 1.2.6.5) and balance (Sec 1.2.6.4), Debit the account for 33333 GBP
- System will use below components and raise overrides
  - B - Balance 84 GBP
  - O – OD Limit 33000 GBP
  - A – AUF 249 GBP
- Sweep and Daylight components are not available to use.

### 1.3.3.4 **Scenario 4**

- Considering the above mentioned account (Sec 1.2.6.5) and balance (Sec 1.2.6.4), Debit the account for 35000 GBP
- System will use below components and raise overrides
  - B - Balance 84 GBP
  - O – OD Limit 33000 GBP
  - A – AUF 750 GBP
  - T – TOD 1166 GBP
- Sweep and Daylight components are not available to use.

### 1.3.3.5 **Scenario 5**

- Considering the above mentioned account (Sec 1.2.6.5) and balance (Sec 1.2.6.4), Debit the account for 36000 GBP
- System will use below components and raise overrides
  - B - Balance 84 GBP
  - O – OD Limit 33000 GBP
  - A – AUF 750 GBP
  - T – TOD 2000 GBP
  - L – Line 166 GBP (Local utilization tracking will be done in Line)
- Sweep and Daylight components are not available to use.

You can invoke the 'Journal Entry Input' screen by typing 'DEDJNLON' in the field at the top right corner of the Application tool bar and clicking the adjoining arrow button.

You can also navigate to Accounting and MIS > Journal Posting Operation > Journal Entry Online

**Limit Balance**

	Local Collateral	Local Facility

## 1.5 Customer Limit Details Query(STDLMBAL)

User shall invoke Customer Limit Details Query screen to view the limit details for customer .This screen provide all the limit details for a customer and its utilisations

Navigate to Limits and Collaterals>Query>Customer Limit Details.

The screenshot displays the 'Customer Limit Details' application window. It features a search section with the following fields:

- Customer No \* 004208
- Customer Name LIJOLMS
- Branch Code 000
- Liability Currency GBP
- Liability Number 004208

Below the search section are two data tables:

**Facility Details**
