Oracle Banking Trade Finance Process Management

Welcome to the Oracle Banking Trade Finance Process Management (OBTFPM) User Guide. This guide provides an overview on the OBTFPM application and takes you through the various steps involved in creating and processing trade finance transactions.

This document will take you through following activities in OBTFPM:

- To create and handle Trade Finance transaction.
- Help users to conveniently create and process Trade Finance transaction

Overview

OBTFPM is a Trade Finance middle office platform, which enables bank to streamline the trade finance operations. OBTFPM enables the customers to send request for new Trade Finance transaction either by visiting the branch (offline channels) or through SWIFT/Trade Portal/other external systems (online channels).

Benefits

OBTFPM helps banks to manage Trade Finance operations across the globe in different currencies. OBTFPM allows you to:

- Handle all Trade Finance transactions in a single platform.
- Provides support for limit verification and limit earmarking.
- Provide amount block support for customer account.
- Provides acknowledgement to customers.
- Enables the user to upload related documents during transaction.
- Enables to Integrate with back end applications for tracking limits, creating limit earmarks, amount blocks, checking KYC, AML and Sanction checks status.
- Create, track and close exceptions for the above checks.
- Enables to use customer specific templates for fast and easy processing of trade transactions that reoccur periodically.

Key Features

- Stand-alone system that can be paired with any back end application.
- Minimum changes required to integrate with bank's existing core systems.
- Faster time to market.
- Capable to interface with corporate ERP and SWIFT to Corporate.
- Highly configurable based on bank specific needs.
- Flexibility in modifying processes.

Export Documentary Collection Update

Export Documentary collection Update process involves update of an existing documentary collection under Export LC.

This section contains the following topics:

| Common Initiation Stage | Reject Approval |
|-------------------------|----------------------|
| Registration | Data Enrichment |
| Exceptions | Multi Level Approval |

Common Initiation Stage

The user can initiate the new export documentary collection update request from the common Initiate Task screen.

1. Using the entitled login credentials, login to the OBTFPM application.

2. Click Trade Finance > Initiate Task.

Provide the Application Details based on the description in the following table:

| Field | Description | Sample Values |
|----------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------|
| Documentary Collection Number | Provide the documentary collection reference. Alternatively, user can search the documentary collection reference using LOV. | |
| | In the LOV, user can search giving any combination details of Documentary Collection Number, Drawer, Currency, Amount, Product Code and Booking Date to fetch the collection details. Based on the search result, select the applicable documentary collection to update the details. | |
| Drawer | Read only field. | |
| | Drawer ID and name will be auto-populated based on the selected Documentary Collection Reference. | |
| | The user can change the parties in Update Collection Processes. Update summary should show both old and new parties. | |
| | Note | |
| | If the values are allowed to change and the selected drawee/ party is blacklisted the system displays a warning message. | |
| Branch | Read only field. | 203-Bank |
| | Branch details will be auto-populated based on the selected Documentary Collection Reference. | Futura -Branch FZ1 |

| Field | Description | Sample Values |
|------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------|
| Bill Amount | Read only field. | |
| | Bill amount will be auto-populated based on the selected Documentary Collection Reference. | |
| | Amendment to this field is enabled only if the Stage is Initial. | |
| Amount In Local Currency | System fetches the local currency equivalent value for the LC amount from back office (with decimal places). | |
| Process Reference Number | Unique OBTFPM task reference number for the transaction. | |
| | This is auto generated by the system based on process name and branch code. | |
| Customer Reference Number | System to populate customer reference number from the back end system once the Documentary Collection Number is selected. | |
| Priority | System will populate the priority of the customer based on priority maintenance. If priority is not maintained for the customer, system will populate 'Medium' as the default priority. User can change the priority populated any time before submit. | High |
| Submission Mode | Select the submission mode of Export Collection Booking Update request. By default the submission mode will have the value as 'Desk'. | Desk |
| | Desk- Request received through Desk | |
| | Courier- Request received through Courier | |
| Update Date | By default, the application will display branch's current date. | 04/13/2018 |
| Version Number | Version Number will be auto-generated. | |

Collection Details

Registration user can provide collection details in this section. Alternately, details can be provided by Data Enrichment user.

Provide the Collection Details based on the description in the following table:

| Field | Description | Sample Values |
|--------------------|---------------------------------------------------------------------------------------|---------------|
| Documents Received | Documents Received will be auto-populated from the collection booking. | |
| Tenor Type | Read only field. Tenor Details will be auto-populated from the collection booking. | |

| Field | Description | Sample Values |
|------------------------------|--------------------------------------------------------------------------------------------------------------------------------------|---------------|
| Product Code | Read only field. | |
| | Product Code will be auto-populated from the Documentary Collection Number. | |
| Product Description | Read only field. | |
| | This field displays the description of the product as per the product code. | |

The Data Enrichment stage has six sections as follows:

- Main Details
- Maturity Details
- Additional Fields
- Advices

- Additional Details
- Updated Details
- Settlement Details
- Summary

Let's look at the details for Data enrichment stage. User can enter/update the following fields. Some of the fields that are already having value from Registration/online channels may not be editable.

Main Details

Main details section has two sub section as follows:

- Application Details
- Collection Details

Application Details

All fields displayed under Basic details section, would be read only except for the **Priority**. Refer to Application Details for more information of the fields.

| ain Details | Main Details | | | Scre |
|------------------|----------------------------------------|--------------------------|----------------------------------|---------------------------------|

Collection Details

The fields listed under this section are same as the fields listed under the Collection Details section in Registration. Refer to Collection Details for more information of the fields. During Registration, if user has not captured input, then user can capture the details in this section.

Action Buttons

Use action buttons based on the description in the following table:

| Field | Description | Sample Values |
|-----------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------|
| Documents | Click the Documents icon to View/Upload the required documents. | |
| | Application will display the mandatory and optional documents. | |
| | The user can view and input/view application details simultaneously. | |
| | When a user clicks on the uploaded document, Document window get opened and on clicking the view icon of the uploaded document, Application screen should get split into two. The one side of the document allows to view and on the other side allows to input/view the details in the application. | |
| Remarks | Click the Remarks icon to provide any additional information. This information can be viewed by other users processing the request. | |
| | Content from Remarks field should be handed off to Remarks field in Backend application. | |
| Overrides | Click to view the overrides accepted by the user. | |
| View Collection | Enables the user to view the latest collection values displayed in the respective fields. | |
| Save & Close | Save the details provided and holds the task in 'My Task' queue for further update. This option will not submit the request. | |
| Cancel | Cancel the Data Enrichment stage inputs. The details updated in this stage are not saved. The task will be available in 'My Task' queue. | |
| Hold | The details provided will be saved and status will be on hold.User must update the remarks on the reason for holding the task. | |
| | This option is used, if there are any pending information yet to be received from applicant. | |

| Field | Description | Sample Values |
|--------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------|
| Reject | On click of Reject, user must select a Reject Reason from a list displayed by the system. | |
| | Reject Codes: | |
| | R1- Documents missing | |
| | R2- Signature Missing | |
| | R3- Input Error | |
| | R4- Insufficient Balance/Limits | |
| | • R5 - Others. | |
| | Select a Reject code and give a Reject Description. | |
| | This reject reason will be available in the remarks window throughout the process. | |
| Refer | User must select a Refer Reason from the values displayed by the system. | |
| | Refer Codes: | |
| | R1- Documents missing | |
| | R2- Signature Missing | |
| | R3- Input Error | |
| | R4- Insufficient Balance/Limits | |
| | • R5 - Others. | |
| Next | On click of Next, system should validate if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment. | |

Draft Details

Update the draft details based on the description in the following table:

| Field | Description | Sample Values |
|--------------|------------------------------------------------------------------------------------------|---------------|
| Draft Code | Update the draft code. Alternatively, user can search the draft details using LOV. | |
| Draft Amount | Update the draft amount. | |
| Action | Click Edit icon to edit the draft code. Click Delete icon to delete the draft code. | |

Maturity and Multi Tenor Liquidation Details

Update the maturity details based on the description in the following table:

| Field | Description | Sample Values |
|-------------------|-----------------------------------------------------------------------------------------------------------------------------------|---------------|
| SNo. | Serial number of the tenor record. | |
| Tenor Basis | Update the tenor basis, if the tenor is not sight. | |
| Tenor Description | The tenor base code description is displayed based on the selected tenor basis. The user to can edit the tenor description. | |
| Start Date | Update the tenor start date, if required. | |
| Tenor Days | Update the number of tenor days, if required | |
| Transit Days | Update the transit days, if the tenor is sight. | |

| Field | Description | Sample Values |
|--------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------|
| Maturity date | System displays the due date for the drawing based on tenor and tenor basis. | |
| | If tenor is sight, system will calculate the maturity date as 5 working days from document Received date. User can change this value to any date earlier than the maturity date up to system date. User cannot change the value to later than maturity date. | |
| | If tenor is Usance, system will calculate the maturity date based on the tenor basis and populate the maturity date. | |
| Bill Amount | Provide the bill amount. | |
| Liquidated Amount | Provide the liquidation amount. | |
| Exchange Rate | Provide the Exchange Rate. | |
| Liquidation Date | Provide the liquidation date. | |
| Liquidation Amount | Provide the bill amount. | |
| Action | Click Edit icon to edit the tenor record. | |
| | Click Delete icon to delete the tenor record. | |

In case of multi tenor, user can provide multiple maturity details by clicking the plus icon.

| Field | Description | Sample Values |
|--------------------------------|------------------------------------------------------------------------------------------------------------------------|---------------|
| Interest From Date | Update the interest From date. The interest from date cannot be earlier than branch date and later than maturity date. | |
| Interest To Date | Update the interest To date. The interest from date cannot be earlier than branch date and later than maturity date. | |
| Accept Commission From Date | Provide the accept commission from date. | |
| Accept Commission To Date | Provide the accept commission to date. | |

Additional Fields

Banks can configure user defined fields as per their requirement in the Additional Fields Screen.

Preferences

Select the preferences options based on the description in the following table:

| Field | Description | Sample Values |
|-------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------|
| Auto Liquidate | Select Auto Liquidate check box, if required. Auto Liquidation enables liquidation of the bill on the due date automatically from the back office system. | |
| Allow Roll over | Select Allow Rollover check box, if required. | |
| Protest Date | Select the Protest Date. | |
| Auto Change from Acceptance to Advance | Select Auto Change from Acceptance to Advance, if required. This flag indicates whether an Acceptance type of bill should be automatically converted into an Advance type of bill on its liquidation date. | |

| Field | Description | Sample Values |
|--------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------|
| Split Settlement | Toggle On : Enables the user to select more than one account for settlement (Split Settlement) for the liquidation of an import or export drawing or collection bill | Disable |
| | Toggle Off : Disables the user to select more than one account for settlement (Split Settlement) for the liquidation of an import or export drawing or collection bill | |
| Split Settlement | | |
| Component | Components gets defaulted based on the product selected. | |
| Currency | Application displays the default currency for the component. | |
| Amount | Amount for each component. This is populated from the transaction details of the drawing. | |
| Split Settlement Details | | |
| Select | Check box to select the record | |
| Sequence | Sequence of the settlement details. | |
| Amount | Amount for the split settlement. | |
| Settlement Account | Account for the split settlement. | |
| Account Customer | Customer account. | |
| Account Currency | Currency of the account. | |
| Account Branch | Branch of the customer's account. | |
| Exchange Rate | Exchange rate for the split settlement. | |
| Action | Click Edit icon to edit the split settlement details record. | |
| | Click Delete icon to delete the split settlement details record. | |

Cash Collateral Details

Select the cash collateral details options based on the description in the following table:

Cash collateral is applicable only for the bills which are co-accepted by the bank.

| Field | Description | Sample Values |
|----------------------------|-----------------------------------------------------------|---------------|
| Liquidate using Collateral | Select Liquidate using Collateral check box, if required. | |

| Field | Description | Sample Values |
|----------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------|
| Outstanding Collateral Amount | Select Auto Liquidate check box, if required. Auto Liquidation enables liquidation of the bill on the due date automatically from the back office system. | |

FX Linkage

This section enables the user to link the existing FX contract(s) to the Bill. User can link one or more FX deals to a bill. The linked value of an FX deal(s) must not exceed the value of the bill.

FX contract linkage with the Bill booking can happen only for immediate liquidation of sight payment or for Usance. For manual sight payment, the user needs to link the FX contract on the date of liquidation of the bill.

Following are the features of FX Linkage in BC.

- FX linkage cannot be linked at Bills at initial stage.
- When a bill is drawn under LC, the details of forward contract linked as a part of the LC, will be defaulted at bill.
- Linked amount will be defaulted against the corresponding FX sequentially.
- User can delink or modify the defaulted FX details at in the Bill.
- Bill maturity date should be greater than or equal to FX Value date.
- Sum of Linked amount will not be greater than Bill contract amount.
- Linked amount will not be greater than the available amount for linkage.
- Current Utilized amount will display the liquidated/purchased/discounted/negotiated amount of Bill contract. It cannot go beyond the linked FX amount.
- When a bill is drawn under LC, delink of FX at BC is allowed only if the linked FX is not utilized by the bill.
- Multiple forward FX contract could be linked and exchange rate of FX contract vary from each. Hence, effective exchange rate for bill would be arrived using weighted average method and it is utilized during purchase/negotiation/discount or liquidation of the bill. The same will be populated in the Average FX Rate.

| Linkage | | | | | | | | | |
|--------------------|-----------------|---------------|---------------------------|------|---------------|-------------------------|-----------------------|----------------|------------------|
| FX Linkage | | | | | | | | | |
| X Reference Number | Bought Currency | SOLD Currency | Available Contract Amount | Rate | Linked Amount | Current Utilized Amount | Total Utilized Amount | FX Expiry Date | Action |
| PK2FXF1200760501 | EUR | GBP | US\$10,000.00 | 1.33 | US\$10,000.00 | | | 28-Jun-2020 | |
| | | | | | | | | | Save & Close Cat |

| Field | Description | Sample Values |
|--------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------|
| FX Reference Number | Select the FX contract reference number from the LOV. | |
| | On select and save and close, system defaults the available amount, bot currency, sold currency and rate. | |
| | Forward FX Linkage available for selection at bill would be as follows, | |
| | Counterparty of the FX contract should be the counterparty of the Bill contract. | |
| | Active Forward FX transactions authorized not marked for auto liquidation. | |
| | Bill contract currency should be BOT currency of the FX transaction in case of an export Bill or the SOLD currency in case of an Import Bill. | |
| Bought Currency | This field displays the currency from the linked FX contract. | |
| Sold Currency | This field displays the currency from the linked FX contract. | |
| Available Contract Amount | Available amount will be FX contract amount minus the linked amount. Available amount for linkage should be greater than Zero. | |
| Rate | This field displays the rate at which the contract is booked. | |
| Linked Amount | Sum of Linked amount will not be greater than LC contract amount. | |
| | Linked amount will not be greater than the available amount for linkage. | |
| Current Utilized amount | This field displays the liquidated /purchased / discounted /negotiated amount of BC contract. It cannot go beyond the linked FX amount. | |
| Total Utilized amount | This field displays the total amount utilized against the corresponding linked FX. On query, both Utilized and Total Utilized amount holds the amount of latest version. | |
| Amount in Contract Currency | This field displays the amount in contract currency converted from FX currency. | |
| FX Expiry Date | This field displays the expiry date from the linked FX contract. | |
| FX Delivery Period - From | This field displays the date from which the contract is valid for utilization. | |
| FX Delivery Period - To | This field displays the date to which the contract is valid for utilization. | |

| Field | Description | Sample Values |
|-----------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------|
| Action | Click the Edit icon to modify the FX details. Click the Delete icon to delete the FX details. | |
| Average FX Rate | Multiple forward FX contract could be linked, and exchange rate of FX contract vary from each. Hence, effective exchange rate for bill would be arrived using weighted average method and it is utilized during purchase/negotiation/discount or liquidation of the bill. This will be populated in the Average FX Rate. | |

Pre-Shipment Credit

Liquidation of pre-shipment credit is applicable only is the operation type is PUR or DIS. Provide the preshipment credit details based on the description in the following table:

| Field | Description | Sample Values |
|-------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------|
| Pre-Shipment Credit Number | Provide the Pre-Shipment Credit Number. Alternatively, user can search the Pre-Shipment Credit Number in the LOV. Note If there are any pre-shipment credits available for the selected pre-shipment credit number, application will display message: | |
| | There are earlier pre-shipment credit/s. Do you want to continue? | |
| Currency | Read only field. Application defaults the currency based on the selected pre-shipment credit number. | |
| Outstanding Amount | Read only field. Application defaults the outstanding amount based on the selected pre-shipment credit number. | |
| Repayment Amount | Provide the repayment amount for the respective pre-shipment credit number. | |

Tracers

This section enables the user to view the default Tracer details from back end application. It also allows the user to add new Tracer details. Add new Tracer details based on the description in the following table:

| Tracer Details | | | | | | | | |
|-----------------------|---|-------------------|------------|------------------|---|---------------|--------------|------|
| Payment Tracer | | | | | | | | |
| Tracer Required | | Number of Tracers | | Tracer Frequency | | Tracer Medium | | |
| | | 2 | | Weekly | • | SWIFT | • | |
| Tracer Receiver Party | | Tracer Start Date | | | | | | |
| ACCEPTING BANK | Q | | *** | | | | | |
| Acceptance Tracer | | | | | | | | |
| Tracer Required | | Number of Tracers | | Tracer Frequency | | Tracer Medium | | |
| \bigcirc | | 0 | | | | | * | |
| Tracer Receiver Party | | Tracer Start Date | | | | | | |
| | Q | | ** | | | | | |
| | | | | | | | | |
| | | | | | | | Save & Close | Clos |

Acknowledgement Tracer, Acceptance Tracer and Payment Tracer are applicable for this process.

| Field | Description | Sample Values |
|-----------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------|---------------|
| Tracer Required | Select if tracer is required or nor from the available drop list: • Required • Not required • Till resolved | |
| Number of Tracers | Provide the number of tracers required. | |
| Tracer Frequency | Provide the frequency for generation of the Tracer. Note This field is applicable only if Tracer Required has value as Till Resolved. | |
| Tracer Medium | Select the tracer medium from the LOV. Note This field is applicable only if Tracer Required has value as Required or Till Resolved. | |
| Tracer Receiver Party | Select the tracer receiver party from the LOV. Note This field is applicable only if Tracer Required has value as Required or Till Resolved. | |

| Field | Description | Sample Values |
|-------------------|----------------------------------------------------------------------------------|---------------|
| Tracer Start Date | Select the tracer start date. Start date cannot be earlier than the branch date. | |
| | Note This field is applicable only if Tracer | |
| | Required has value as Required or Till Resolved . | |

Interest Details

The user can view and modify the Interest Details Simulated from Back Office system.

| Interest Detai | Interest Details | | | | | | | | | | | | | | |

| Field | Description | Sample Values |
|-----------------------|------------------------------------------------------------------------------------------------------------------------------------------------------|---------------|
| Component | This field displays the component maintained in the back office. | |
| Component Description | This description of the component. | |
| Rate Type | System defaults the rate type maintained for the component in back office. | |
| | Value can be: | |
| | Fixed Floating | |
| | Special | |
| Rate Code | This field displays the rate code applicable for the Component. | |
| Min Spread | This field displays the minimum spread applicable for the Rate Code. | |
| | This field have value only if the Rate Type is Floating. | |
| Max Spread | This field displays the maximum spread applicable for the Rate Code. | |
| | This field have value only if the Rate Type is Floating. | |
| Spread | This field displays the spread applicable for the Component in case of Floating Rate Component. User can change the defaulted value. | |
| | System validates whether the spread input is within the Minimum to Maximum Spread. | |
| Min Rate | This field displays the minimum rate applicable for the Rate Code. | |
| Max Rate | This field displays the maximum rate applicable for the Rate Code. | |
| Rate | This field displays the value applicable for the Rate Code. | |
| | User can change the value if the Rate Type is Fixed . System validates whether the Rate input is between the Minimum and Maximum Rate. | |
| Modified Rate | This field displays the modified rate. | |
| Currency | System defaults the Interest currency in this field. | |

| Field | Description | Sample Values |
|--------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------|
| Amount | User can input the interest amount, in case the Rate Type is Special , else user can not be able to input the amount. In such cases, the amount will be calculated by back office immediately only if the Interest is collected in Advance or if Back Dated Interest is collected. In that scenario, the Amount will be populated on Re-simulation from back office. Otherwise Interest will be calculated only in the batch as maintained. | |
| Waive | User can waive the Interest applicable. System displays an override, if the user has waived the Interest. | |
| Charge Party | System displays the Charge Party based on the type of transaction. In case of Export Transactions, Drawer should be the defaulted Charge Party for Collection Bills and Beneficiary for the LC Bills. In case of Import Transactions, Drawee should be the Charge Party for Collection and Applicant for the LC Bills | |
| Settlement Account | System defaults the Settlement Account of the Charge Party for debit of Interest. User can change the value. System should display an error if a different customer is chosen. If different account of the Charge Party is selected, system should display a override. In case the user modifies the Interest Rate, the user should click on Recalculate button to get the modified amount from the back office and display the new Amount.(Recalculation is done in back office and not in OBTFPM) | |

Exceptions

The Export Collection Update request, before the task moves to the approval stage, the application will validate the Amount Block, KYC and AML. A failure in validation of any of them, the task will reach exception stage for further approval for the exceptions.

Exception - Amount Block

As part of amount block validation, application will check if sufficient balance is available in the account to create an amount block. On hand-off, system will debit the blocked account to the extent earmark and credit charges/ commission account in case of charges block or credit the amount in suspense account for earmarks created for collateral.

The transactions that have failed amount block due to non-availability of amount in respective account will reach the amount block exception stage.

Log in into OBTFPM application, amount block exception queue. Amount block validation failed tasks for trade transactions will be listed in the queue. Open the task to view summary of updated available fields with values.

Exception is created when sufficient balance is not available for blocking the settlement account and the same can be addressed by the approver in the following ways:

Approve:

- Settlement amount will be funded (outside of this process)
- Allow account to be overdrawn during hand-off

Refer:

- Refer back to DE providing alternate settlement account to be used for block.
- Different collateral to be mapped or utilize lines in place of collateral.

Reject:

Reject the transaction due to non-availability of sufficient balance in settlement account

Amount Bock Exception

This section will display the amount block exception details.

Summary

Tiles Displayed in Summary:

- Main Details User can view and modify details about application details and LC details, if required.
- Party Details User can view and modify party details like beneficiary, advising bank etc., if required
- Limits and Collaterals User can view and modify limits and collateral details, if required.
- Charge Details User can view and modify details provided for charges, if required.

Action Buttons

Use action buttons based on the description in the following table:

| Field | Description | Sample Values |
|---------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------|
| Reject | On click of reject, user must select a Reject Reason from a list displayed by the system. | |

| | Select a Reject code and give a Reject Description. | |
| | This reject reason will be available in the remarks window throughout the process. | |
| Hold | The details provided will be registered and status will be on hold. | |
| | This option is used, if there are any pending information yet to be received from applicant. | |
| Refer | User will be able to refer the task back to the Data Enrichment user.User must select a Refer Reason from the values displayed by the system. Refer Codes: | |
| | R1- Documents missing | |
| | R2- Signature Missing | |
| | R3- Input Error | |
| | R4- Insufficient Balance- Limits | |
| | R5 - Others | |
| Cancel | Cancel the Export Collection Update Amount Block Exception check. | |
| Approve | On approve, application must validate for all mandatory field values, and task must move to the next logical stage. | |
| Back | Task moves to previous logical step. | |

Exception - Know Your Customer (KYC)

As part of KYC validation, application will check if necessary KYC documents are available and valid for the applicant. The transactions that have failed KYC due to non-availability / expired KYC verification will reach KYC exception stage.

Log in into OBTFPM application, KYC exception queue. KYC exception failed tasks for trade finance transactions will be listed in your queue. Open the task, to see summary tiles that display a summary of available updated fields with values.

User can pick up a transaction and do the following actions:

Approve

- After changing the KYC status in the back end application (outside this process).
- Without changing the KYC status in the back end application.
- Reject (with appropriate reject reason).

Summary

Tiles Displayed in Summary:

| Approve | On approve, application must validate for all mandatory field values, and task must move to the next logical stage. | |
| Back | Task moves to previous logical step. | |

Multi Level Approval

Log in into OBTFPM application and acquire the task available in the approval stage in free task queue. Authorization User can acquire the task for approving.

Authorization Re-Key (Non-Online Channel)

For non online channel, application will request approver for few critical field values as an authorization step. If the values captured match with the values available in the screen, system will allow user to open the transaction screens for further verification. If the re-key values are different from the values captured, then application will display an error message.

Open the task and re-key some of the critical field values from the request in the Re-key screen. Some of the fields below will dynamically be available for re-key.:

- Drawee Name
- Drawer Name
- Bill Currency
- Bill Amount

Re-key is applicable to the first approver in case of multiple approvers. All approvers will however be able see the summary tiles and the details in the screen by drill down from tiles.

Reject Hold Refer Cancel

Action Buttons

Use action buttons based on the description in the following table:

| Field | Description | Sample Values |
|---------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------|
| Reject | On click of Reject, user must select a Reject Reason from a list displayed by the system. | |
| | Reject Codes: | |
| | R1- Documents missing | |
| | R2- Signature Missing | |
| | R3- Input Error | |
| | R4- Insufficient Balance/Limits | |
| | • R5 - Others. | |
| | Select a Reject code and give a Reject Description. | |
| | This reject reason will be available in the remarks window throughout the process. | |
| Hold | The details provided will be registered and status will be on hold. | |
| | This option is used, if there are any pending | |
| | information yet to be received from applicant. | |
| Refer | User will be able to refer the task back to the Data Enrichment user.User must select a Refer Reason from the values displayed by the system. Refer Codes: | |
| | R1- Documents missing | |
| | R2- Signature Missing | |
| | R3- Input Error | |
| | R4- Insufficient Balance- Limits | |
| | R5 - Others | |
| Cancel | Cancel the approval. | |
| Approve | On approve, application must validate for all mandatory field values, and task must move to the next logical stage. If there are more approvers, task will move to the next approver for approval. If there are no more approvers, the transaction is handed off to the back end system for posting. | |

Reject Approval

As a Reject approver, user can review a transaction rejected and waiting for reject confirmation.

Log in into OBTFPM application to view the reject approval tasks for Import Documentary Collection Booking available in queue. On opening the task, you will see summary tiles. The tiles will display a list of important fields with values.

The screen from which the reject was initiated can been seen highlighted in the tile view.

User can drill down from reject summary tiles into respective data segments to verify the details of all fields under the data segment.

Summary

The screen up to which data was captured before reject will be available for the user to view in the summary tile. Other fields will be blank when verified from summary tile.

The data segment in which the task was rejected will have the tiles highlighted in a different colour (red).

- Main Details User can view details about application details and document under collection.
- Party Details User can view party details like applicant, Remitting Bank etc.
- Document Details User can view document details.
- Shipment Details User can view shipment details.
- Charges User can view charge details.
- Maturity Details User can view the maturity details.
- Message Preview User can view the preview of the simulating message to the remitting bank.

Action Buttons

| Field | Description | Sample Values |
|----------------|-----------------------------------------------------------------------------------------------------------------------------------------------------|---------------|
| Reject Approve | On click of Reject Approve, the transaction is rejected. | |
| Reject Decline | On click of Reject Decline, the task moves back to the stage where it was rejected. User can update the reason for reject decline in remarks. | |
| Hold | User can put the transaction on 'Hold'. Task will remain in Pending state. | |
| Cancel | Cancel the Reject Approval. | |
