# **Oracle Banking Trade Finance Process Management**

Welcome to the Oracle Banking Trade Finance Process Management (OBTFPM) User Guide. This guide provides an overview on the OBTFPM application and takes you through the various steps involved in creating and processing trade finance transactions.

This document will take you through following activities in OBTFPM:

• To create and handle trade finance transaction.

#### Overview

OBTFPM is a trade finance middle office platform, which enables bank to streamline the trade finance operations. OBTFPM enables the customers to send request for new trade finance transaction either by visiting the branch (offline channels) or through SWIFT/Trade Portal/other external systems (online channels).

#### **Benefits**

OBTFPM helps banks to manage trade finance operations across the globe in different currencies. OBTFPM allows you to:

- Handle all trade finance transactions in a single platform.
- Provides support for limit verification and limit earmarking.
- Provide amount block support for customer account.
- Provides acknowledgement to customers.
- Enables the user to upload related documents during transaction.
- Enables to Integrate with back end applications for tracking limits, creating limit earmarks, amount blocks, checking KYC, AML and Sanction checks status.
- Create, track and close exceptions for the above checks.
- Enables to use customer specific templates for fast and easy processing of trade transactions that reoccur periodically.

#### **Key Features**

- Stand-alone system that can be paired with any back end application.
- Minimum changes required to integrate with bank's existing core systems.
- Faster time to market.
- Capable to interface with corporate ERP and SWIFT to Corporate.
- Highly configurable based on bank specific needs.
- Flexibility in modifying processes.

# **Export LC Amendment**

Export LC Amendment process enables the user to make an amendment to the LC which had been already advised.

The amendments may need consent from the beneficiary of the LC. In such scenarios, after the processing of amendment, the amended LC is parked awaiting beneficiary consent.

In the following sections, let's look at the details for Export LC amendment process.

This section contains the following topics:

| Common Initiation Stage | Registration    |
|-------------------------|-----------------|
| Data Enrichment         | Exceptions      |
| Multi Level Approval    | Reject Approval |

## **Common Initiation Stage**

The user can initiate the new shipping guarantee request from the common Initiate Task screen.

- 1. Using the entitled login credentials, login to the OBTFPM application.
- 2. Click Trade Finance > Initiate Task.

| = ORACLE                | Initiate Task         |                       |                               | (PK2)<br>Mar 22, 2019 | JEEVA02 N<br>subham@gmail.com ji |

| Initiate Task           |                       |                       |                               |                       |                                  |
| Shipping Guarantee 🔹 🕨  |                       |                       |                               |                       |                                  |
| Swift Processing        |                       |                       |                               |                       |                                  |

Provide the details based on the description in the following table:

| Field               | Description                                   |
|---------------------|---|
| Process Name        | Select the process name to initiate the task. |
| LC Reference Number | Select the LC Reference Number.               |
| Branch              | Select the branch.                            |

### **Action Buttons**

Use action buttons based on the description in the following table:

| Field   | Description  |
|---------|--|
| Proceed | Task will get initiated to next logical stage.                     |
| Clear   | The user can clear the contents update and can input values again. |

## Registration

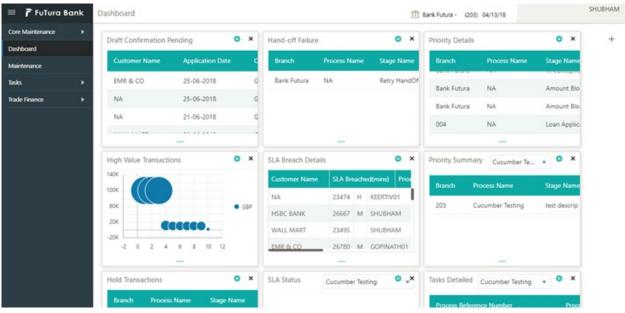

If the Letter Of Credit amendment request is submitted through branch, the Export LC amendment process starts from the Registration Stage.

During Registration stage, user can capture the basic details of the application and upload the related documents of the applicant. On submit of the request, the request will be available for an LC Amendment expert to handle the request in the next stage.

3. Using the entitled login credentials for Registration stage, login to the OBTFPM application.

Note

When an amendment to an Export LC which is linked to a Back to Back LC (Import LC) is initiated, system should display a message, the LC is linked to an Import LC.

## **Scrutiny**

On successful completion of Registration of an Export LC Amendment request, the request moves to Scrutiny stage. At this stage the gathered information during Registration are scrutinized.

**Non-Online Channel** - Export LC Amendment request that were received at the desk will move to Scrutiny stage post successful Registration. The requests will have the details entered during the Registration stage.

**Online Channel** - Requests that are received via like SWIFT are available directly for further processing from Scrutiny stage and available data for all data segments from Application stage to Data Enrichment stage would be auto populated.

Do the following steps to acquire a task currently at Scrutiny stage:

1. Using the entitled login credentials for Scrutiny stage, login to the OBTFPM application.

| ᅎ FuTura Bank |
|---------------|
| Sign In       |
| User Name *   |
| SRIDHAR       |
| Password *    |
|               |
|               |
| Sign In       |

2. On login, user must be able to view the dashboard screen with widgets as mapped to the user.

The Scrutiny stage has six sections as follows:

- Main Details
- Availability & Shipment
- Payment Details
- Amendment Details
- Additional Details
- Summary

Let's look at the details for Scrutiny stage. User can enter/update the following sections. Some of the fields that are already having value from Registration/online channels may not be editable.

### **Main Details**

Main details section has three sub section as follows:

- Application Details
- LC Details

#### **Application Details**

All fields displayed under Application details section, would be read only except for the **Priority** and **Cancel LC**. Refer to Application Details for more information of the fields.

Following are the fields which can be amended apart from the fields carried over from LC Details of Registration. Provide the details for the amendable fields based on the description in the following table:

| Field            | Description   | Sample Values |
|------------------|---|---------------|
| Applicable Rules | This field displays the rules of the selected Export LC and user can amend if required. |               |

| Field                                 | Description   | Sample Values |
|---------------------------------------|---|---------------|
| Date of Expiry                        | This field displays the expiry date of the selected <b>Export</b> LC and user can amend if required.                      |               |
| Place of Expiry                       | This field displays the place of expiry of the selected Export LC and user can amend if required.                         |               |
| Currency/Amount                       | This field displays the value of LC along with the currency details of the selected Export LC.                            |               |
| Percentage Credit Amount<br>Tolerance | This field displays the percentage credit amount tolerance details of the selected Export LC.                             |               |
| Purpose of message                    | Advice and Confirmation of the Credit<br>Amendment - Select this option, if LC requires<br>confirmation on the amendment. |               |
|                                       | Advice of the Credit Amendment - Select this option, if LC does not require confirmation on the amendment.                |               |
| Additional Amounts<br>Covered         | This field displays the details of additional amount covered of the selected LC and user can amend if required.           |               |

## **Action Buttons**

Use action buttons based on the description in the following table:

| Field     | Description  | Sample Values |
|-----------|--|---------------|
| Documents | Upload the required documents.   |               |
|           | Application displays mandatory documents to be<br>uploaded for amendment. Place holders are also<br>available to upload additional documents<br>submitted by the applicant.  |               |
|           | The user can view and input/view application details simultaneously.   |               |
|           | When a user clicks on the uploaded document,<br>Document window get opened and on clicking<br>the view icon of the uploaded document,<br>Application screen should get split into two.<br>The one side of the document allows to view<br>and on the other side allows to input/view the<br>details in the application. |               |
| Remarks   | Provide any additional information regarding the LC. This information can be viewed by other users processing the request.   |               |
| Overrides | Click to view the overrides accepted by the user.  |               |

| Field            | Description  | Sample Values |
|------------------|--|---------------|
| Incoming Message | Clicking this button allows the user to see the message in case of STP of incoming MT 767.   |               |
|                  | Clicking this button allows parsing and processing MT 707 along with the MT708 messages.   |               |
| View LC          | Enables the user to view the latest LC values displayed in the respective fields.  |               |
| Submit           | Task will get moved to next logical stage of<br>Export LC Amendment.   |               |
|                  | If mandatory fields have not been captured,<br>system will display an error message until the<br>mandatory fields data are provided.   |               |
| Save & Close     | Save the information provided and holds the task<br>in you queue for working later.<br>This option will not submit the request.  |               |
| Cancel           | Cancel the Scrutiny stage inputs.  |               |
| Hold             | The details provided will be on hold.<br>This option is used, if there are any pending<br>information yet to be received from applicant and<br>appropriate remarks must be provided. |               |
| Reject           | On click of Reject, user must select a Reject Reason from a list displayed by the system.  |               |
|                  | Reject Codes:  |               |
|                  | <ul> <li>R1- Documents missing</li> </ul>  |               |
|                  | R2- Signature Missing  |               |
|                  | R3- Input Error  |               |
|                  | <ul> <li>R4- Insufficient Balance/Limits</li> <li>R5 - Others.</li> </ul>  |               |
|                  | K5 - Others.     Select a Reject code and give a Reject     Description.   |               |
|                  | This reject reason will be available in the remarks window throughout the process.   |               |
| Refer            | User must select a Refer Reason from the values displayed by the system.   |               |
|                  | Refer Codes:   |               |
|                  | R1- Documents missing  |               |
|                  | R2- Signature Missing  |               |
|                  | R3- Input Error  |               |
|                  | R4- Insufficient Balance/Limits  |               |
|                  | • R5 - Others.   |               |

| Field | Description   | Sample Values |
|-------|---|---------------|
| Next  | On click of Next, system should validate if all the<br>mandatory fields have been captured. Necessary<br>error and override messages to be displayed. On<br>successful validation, system moves the task to<br>the next data segment. |               |

# Availability Shipment

User must verify/ Input/Update Availability, Shipment and Goods details of an Export LC request for the different fields under the respective data segments.

This field contains a description of the goods and/or services of the issued LC and can be amended if required. Provide the Shipment Details based on the description in the following table:

| Field                 | Description   | Sample Values |
|-----------------------|---|---------------|
| INCO Terms            | Select the appropriate INCO terms.  |               |
| INCO Term Description | The description of the INCO Term.   |               |
| + Icon                | Click + icon to add goods details.  |               |
| - Icon                | Click - icon to remove goods details.   |               |
| Goods Code            | Click look up icon to select the goods code.  |               |
| Goods Type            | The goods type is auto populated depending on selected goods code.                                      |               |
| Goods Description     | The goods description is auto populated depending on selected goods code.                               |               |
| No of Units           | Enter the number of units being imported or exported.   |               |
| Price per Unit        | Enter the value for price per unit.   |               |
| Total Amount          | System to calculate the total price   |               |
|                       | In case of online request, the system should populate the total amount from incoming request.           |               |
|                       | System should validate that the total amount is equal to the value of the transaction (LC/ Collection). |               |
| Action                | Click Edit icon to edit the goods detail.   |               |
|                       | Click Delete icon to delete the goods detail.   |               |

### **Action Buttons**

Use action buttons based on the description in the following table:

| Field            | Description   | Sample Values |
|------------------|---|---------------|
| Documents        | Upload the required documents.  |               |
| Remarks          | Provide any additional information regarding the LC. This information can be viewed by other users processing the request.  |               |
| Overrides        | Click to view the overrides accepted by the user.   |               |
| Incoming Message | Clicking this button allows the user to see the message in case of STP of incoming MT 767.  |               |
| View LC          | Enables the user to view the latest LC values displayed in the respective fields.   |               |
| Save & Close     | Save the information provided and holds the task<br>in you queue for working later.<br>This option will not submit the request.   |               |
| Cancel           | Cancel the Export LC amendment Scrutiny stage inputs.   |               |
| Hold             | The details provided will be registered and status<br>will be on hold.<br>This option is used, if there are any pending<br>information yet to be received from applicant and<br>appropriate remarks must be provided.   |               |
| Reject           | <ul> <li>On click of Reject, user must select a Reject<br/>Reason from a list displayed by the system.</li> <li>Reject Codes: <ul> <li>R1- Documents missing</li> <li>R2- Signature Missing</li> <li>R3- Input Error</li> <li>R4- Insufficient Balance/Limits</li> <li>R5 - Others.</li> </ul> </li> <li>Select a Reject code and give a Reject<br/>Description.</li> <li>This reject reason will be available in the remarks<br/>window throughout the process.</li> </ul> |               |
| Refer            | User must select a Refer Reason from the values<br>displayed by the system.<br>Refer Codes:<br>R1- Documents missing<br>R2- Signature Missing<br>R3- Input Error<br>R4- Insufficient Balance/Limits<br>R5 - Others.   |               |

|   | Field | Description   | Sample Values |
|---|-------|---|---------------|
| - | Next  | On click of Next, system should validate if all the<br>mandatory fields have been captured. Necessary<br>error and override messages to be displayed. On<br>successful validation, system moves the task to<br>the next data segment. |               |

Information to Issuing Bank

Provide MT730 - Information to Issuing Bank details based on the description in the following table:

| Field                             | Description   | Sample Values |
|-----------------------------------|---|---------------|
| Sender to Receiver<br>Information | This field displays the additional information to receiver and can be modified, if required.                                      |               |
| Narrative                         | This field displays the additional information from<br>the advising bank to the issuing bank and can be<br>modified, if required. |               |
| Issuing Bank Account<br>Number    | This field displays the issuing bank account<br>number from the LOV and can be modified, if<br>required.                          |               |

| Field                 | Description  | Sample Values |
|-----------------------|--|---------------|
| Charges to be Claimed | This field displays the FFT from the LOV for the charges to be claimed and can be modified, if required. |               |
| Charges               | This field displays the charge details for advising and can be modified, if required.                    |               |
| Issuing Bank Date     | This field displays the issuing bank date and can be modified, if required.                              |               |
| Account with Bank     | This field displays the account to which the charges needs to be paid and can be modified, if required.  |               |

#### Information to Advise Through Bank

Provide MT710 - Information to Advise Through Bank details based on the description in the following table:

| Field                             | Description  | Sample Values |
|-----------------------------------|--|---------------|
| Sender to Receiver<br>Information | This field displays the additional information to receiver and can be modified, if required. |               |

#### **Action Buttons**

Use action buttons based on the description in the following table:

| Field            | Description   | Sample Values |
|------------------|---|---------------|
| Documents        | Upload the required documents.  |               |
| Remarks          | Provide any additional information regarding the LC. This information can be viewed by other users processing the request.  |               |
| View LC          | Enables the user to view the latest LC values displayed in the respective fields.   |               |
| Overrides        | Click to view the overrides accepted by the user.   |               |
| Incoming Message | Clicking this button allows the user to see the message in case of STP of incoming MT 767.  |               |
| Save & Close     | Save the information provided and holds the task<br>in you queue for working later.<br>This option will not submit the request  |               |
| Cancel           | Cancel the Scrutiny stage inputs.   |               |
| Hold             | The details provided will be registered and status<br>will be on hold.<br>This option is used, if there are any pending<br>information yet to be received from applicant and<br>appropriate remarks must be provided. |               |

| Field  | Description   | Sample Values |
|--------|---|---------------|
| Reject | <ul> <li>On click of Reject, user must select a reject reason from a list displayed by the system.</li> <li>Reject Codes: <ul> <li>R1- Documents missing</li> <li>R2- Signature Missing</li> <li>R3- Input Error</li> <li>R4- Insufficient Balance/Limits</li> <li>R5 - Others.</li> </ul> </li> <li>Select a reject code and give a reject description.</li> <li>This reject reason will be available in the remarks window throughout the process.</li> </ul> |               |
| Refer  | User must select a Refer Reason from the values<br>displayed by the system.<br>Refer Codes:<br>R1- Documents missing<br>R2- Signature Missing<br>R3- Input Error<br>R4- Insufficient Balance/Limits<br>R5 - Others.   |               |
| Next   | On click of Next, system should validate if all the<br>mandatory fields have been captured. Necessary<br>error and override messages to be displayed. On<br>successful validation, system moves the task to<br>the next data segment.   |               |

## **Amendment Details**

This section lists the amendments made to the LC. The amendment details table displays the original value and the amended values of the amended fields in two different columns to enable Scrutiny user to identify the modifications made to the LC.

### **Charge Details**

On click of 'Next' in the previous screen, system will auto populate the charges, commission and tax components mapped to the product from the back office system.

| Edit | Component  | Currency | Amount | Modified | Billing   | Defer | Waive | Charge Party | Settlement Accou |
|------|------------|----------|--------|----------|-----------|-------|-------|--------------|------------------|
| ß    | LCCOURAMND | GBP      | £50.00 | incuncu  | 5 million |       |       | enargerary   | PK200104400      |

If default charges are available under the product, they should be defaulted here with values. If customer or customer group specific charges are maintained, then the same will be defaulted from back end system.

| Field           | Description  | Sample Values |
|-----------------|--|---------------|
| Edit Icon       | Click edit link to edit any existing Charge Details.   |               |
| Component       | Charge Component type.   |               |
| Currency        | Defaults the currency in which the charges have to be collected.   |               |
| Amount          | An amount that is maintained under the product code gets defaulted in this field. User can edit the value, if required.  |               |
| Modified Amount | From the default value, if the rate is changed or<br>the amount is changed, the value gets updated in<br>the modified amount field.  |               |
| Billing         | If charges are handled by separate billing engine,<br>then by selecting billing the details to be available<br>for billing engine for further processing.  |               |
|                 | On simulation of charges/commission from Back<br>Office, if any of the Charges/Commission<br>component for the customer is 'Billing' enabled,<br>'Billing' toggle for that component should be<br>automatically checked in OBTFPM. |               |
|                 | The user can not select/de-select the check box if it is de-selected by default.   |               |
|                 | This field is disabled, if 'Defer' toggle is enabled.  |               |

| Field              | Description   | Sample Values |
|--------------------|---|---------------|
| Defer              | If charges have to be deferred and collected at<br>any future step, this check box has to be<br>selected.   |               |
|                    | On simulation of charges/commission from Back<br>Office, if any of the Charges/Commission<br>component for the customer is AR-AP tracking<br>enabled, 'Defer' toggle for that component should<br>be automatically checked in OBTFPM. |               |
|                    | The user can select/de-select the check box. On de-selection the user has to click on 'Recalculate' charges button for re-simulation.   |               |
| Waive              | If charges have to be waived, this check box has<br>to be selected.<br>Based on the customer maintenance, the<br>charges should be marked for Billing or for Defer.<br>This field is disabled, if 'Defer' toggle is enabled.          |               |
| Charge Party       | Charge party will be beneficiary by default. You can change the value to applicant  |               |
| Settlement Account | Details of the settlement account.  |               |

Provide the Commission Details based on the description provided in the following table:

Commission Details

| Component           | Rate | Modified | Currency | Amount | Modified | Defer | Waive | Charge Party |
|---------------------|------|----------|----------|--------|----------|-------|-------|--------------|
| No data to display. |      |          |          |        |          |       |       |              |

| Field            | Description   | Sample Values |
|------------------|---|---------------|
| Assignee ID      | System lists all the third party that have been<br>maintained from the third party maintenance<br>replicated from back office. User can select the<br>assignee id.  |               |
| Assignee Name    | System defaults the assignee name pertaining to the assignee id.  |               |
| Address Line 1-4 | System defaults the assignee address.   |               |
| Assignment %     | User can input the percentage of LC amount that<br>has be assigned to the assignee. Once the user<br>updates the rate, the system has to calculate the<br>amount as per assigned rate and default in the<br>assigned amount field. If the user directly<br>captures the assigned amount then the assigned<br>percentage has to calculate the percentage and<br>the same to be populated in the screen. If<br>contribution is more than 100%, system to display<br>an alert message. Once contribution % is input<br>system will default the amount. System to<br>validate that Limit Contribution percentage plus<br>Collateral percentage is equal to 100. Otherwise<br>system to provide override.The assignment<br>percentage should be rounded to two decimal<br>places |               |
| Assignee Amount  | User can input the amount that has to be<br>assigned to the assignee. If the user has already<br>inputted the assignment percentage, system to<br>calculate the amount and populate the value   |               |
| Account Currency | User can select the account currency of the settlement account of the assignee. Only the currencies for which the settlement account is available, only those currency will be displayed.   |               |
| Account          | User can select the settlement account listed from the LOV.   |               |

### FX Linkage Details

This section enables the user to link the existing FX contract(s) to the LC transactions. User can link multiple forward FX contracts.FX contract linkage with the Bill booking can happen only for immediate liquidation of sight payment or for Usance. For manual sight payment, the user needs to link the FX contract on the date of liquidation of the Bill.

Following are the conditions of FX Linkage:

- If any LC Amendment is pending for beneficiary confirmation with FX changes, then the system, will not allow another amendment on this contract further.
- FX request will be processed in external system, only after successful amendment confirmation has been done.
- Sum of Linked amount will not be greater than LC contract amount. Linked amount will not be greater than the available amount for linkage.
- Delink of linked FX or Reduction of linked amount from the LC is allowed if the same is not attached to any Bills.

• Reduction of LC contract amount with FX, through LC amendment will be restricted, when the contract amount goes below the FX linkage amount. User will be intimated with the message.

FX Delivery Period From

| Field               | Description   | Sample Values |
|---------------------|---|---------------|
| FX Reference Number | Select the FX contract reference number from the LOV. On selection, system defaults date, available amount, bought currency, sold currency and rate.                          |               |
|                     | Forward FX Linkage available for selection at bill would be as follows,   |               |
|                     | <ul> <li>Counterparty of the FX contract should be<br/>the counterparty of the Bill contract.</li> </ul>  |               |
|                     | <ul> <li>Active Forward FX transactions authorized<br/>not marked for auto liquidation.</li> </ul>  |               |
|                     | <ul> <li>Bill contract currency should be BOT<br/>currency of the FX transaction in case of an<br/>export Bill or the SOLD currency in case of<br/>an Import Bill.</li> </ul> |               |

| Field                        | Description  | Sample Values |
|------------------------------|--|---------------|
| Currency                     | System defaults from the linked FX contract.   |               |
| Bought Currency              | System defaults from the linked FX contract.   |               |
| Sold Currency                | System defaults from the linked FX contract.   |               |
| Available Contract<br>Amount | Available amount will be FX contract amount minus the linked amount.   |               |
|                              | Available amount for linkage should be greater than Zero.  |               |
| Rate                         | Exchange rate is defaulted from the linked FX contract.  |               |
| Linked Amount                | Sum of Linked amount will not be greater than Bill/LC contract amount.   |               |
|                              | Linked amount will not be greater than the available amount for linkage.   |               |
| Current Utilized Amount      | Current Utilized amount displays the liquidated /<br>purchased /discounted /negotiated amount of BC<br>contract. It cannot go beyond the linked FX<br>amount.  |               |
| Total Utilized Amount        | Total Utilized amount displays the total amount<br>utilized against the corresponding linked FX. On<br>query, both Utilized and Total Utilized amount<br>holds the amount of latest version.   |               |
| FX Expiry Date               | System defaults expiry date from the linked FX contract.   |               |
| FX Delivery Period From      | Displays the FX delivery start date.   |               |
| FX Delivery Period To        | Displays the FX delivery end date.   |               |
| Action                       | Click the Edit icon to edit the FX linkage details.  |               |
|                              | Click the Delete icon to delete the FX linkage details.  |               |
| Average FX Rate              | Multiple forward FX contract could be linked, and<br>exchange rate of FX contract vary from each.<br>Hence, effective exchange rate for bill would be<br>arrived using weighted average method and it is<br>utilized during purchase/negotiation/discount or<br>liquidation of the bill. This will be populated in the<br>Average FX Rate. |               |

The Data Enrichment stage has six sections as follows:

- Main Details
- Availability Shipment
- Documents and Conditions
- Payment Details
- Amendment Details
- Additional Fields
- Advices
- Additional Details
- Summary

Let's look at the details for Data Enrichment stage. User must be able to enter/update the following fields. Some of the fields that are already having value from Scrutiny/Online channels may not be editable.

#### **Main Details**

Refer to Main Details.

#### **Availability Shipment**

Refer to Availability Shipment.

### **Documents and Conditions**

User must provide details of the required documents and additional conditions (if applicable) in this section.

Documents required section displays the list of documents required as per the issued LC and can be modified if required.

Online Channel - System will default the details received in the Description column. Based on the details populated, user can pick corresponding values for document code, originals and copy.

Non Online Channel - User can further edit (add or remove) the documents or document description as per requirement. Application will display an alert message, if both Bill Of lading" and 'Airway Bill' are chosen.

Based on the 'Product' selected, Application will default the documents required under the LC. User can edit the details, delete an existing document and also add additional documents to the defaulted list.

### **Additional Conditions**

| ⊿ Addi | tional Conditions |  |            |
|--------|-------------------|--|------------|
| Select | FFT Code          | FFT Description  | Action     |
|        | 57ACWITHBANK      |  | -          |
|        | 32BAMTUTIL        |  | <b>F</b> D |
|        | FFTLCAC           | DISCREPANCY FEE FOR USD 75 (OR EQUIVALENT IN L/C CURRENCY)PLUS ALL RELATIVE SWIFT CHARGES WILL B | -          |

Additional Conditions section displays the conditions of the issued LC and can be amended if required.

Online Channel - System will default the details received in the description column. System will parse the additional conditions required field into multiple line items based on line de-limiter (+) and shall populate each line item as a separate description. User can read the description and make any changes required to the description, also must be able to add more conditions.

Non Online Channel - User can use FFT to capture additional conditions and can edit the description populated from FFT. You should also be able to add additional FFT.

#### **Payment Details**

#### Refer to Payment Details.

#### Limits & Collateral

Limit availability needs to be checked if amendment involves increase in amount or tolerance or both. This is applicable for confirmation of the unconfirmed LC or increasing the amount or tolerance if already LC is already confirmed. Provide the Limit Details based on the description in the following table:

|      | Details       |           |                |            |                     |                  |                    |            |                               |               |                       |                 |            |          |

| Collateral%                    | User must enter the percentage of collateral to be<br>linked to this transaction. If the value is more than<br>100% system will display an alert message.   |               |
|                                | The collateral % maintained for the customer is<br>defaulted into the Collateral Details screen. If<br>collateral % is not maintained for the customer,<br>then system should default the collateral %<br>maintained for the product. User can modify the<br>defaulted collateral percentage, in which case<br>system should display a override message<br>"Defaulted Collateral Percentage modified. |               |
| Currency                       | The LC currency will get defaulted in this field.   |               |
| Contribution Amount            | Collateral contribution amount will get defaulted in this field.  |               |
|                                | The collateral % maintained for the customer is<br>defaulted into the Collateral Details screen. If<br>collateral % is not maintained for the customer,<br>then system should default the collateral %<br>maintained for the product. User can modify the<br>defaulted collateral percentage, in which case<br>system should display a override message<br>"Defaulted Collateral Percentage modified. |               |
| Settlement Account             | Select the settlement account for then collateral.  |               |
| Settlement Account<br>Branch   | Settlement Account Branch will be auto-<br>populated based on the Settlement Account selection.   |               |
| Settlement Account<br>Currency | Select the Settlement Account Currency.   |               |
| Account Available Amount       | Account Available Amount will be auto-populated based on the Settlement Account selection.  |               |
| Response                       | Response can be 'Success' or 'Amount not<br>Available'.   |               |
| Response Message               | Detailed Response message.  |               |

### **Charge Details**

On click of 'Next' in the previous screen, system will auto populate the charges, commission and tax components mapped to the product from the back office system.

| Edit | Component  | Currency | Amount | Modified | Billing | Defer | Waive | Charge Party | Settlement Account |
|------|------------|----------|--------|----------|---------|-------|-------|--------------|--------------------|
| ß    | LCCOURAMND | GBP      | £50.00 |          |         |       |       |              | PK20010440017      |

If default charges are available under the product, they should be defaulted here with values. If customer or customer group specific charges are maintained, then the same will be defaulted from back end system.

| Field              | Description   | Sample Values |
|--------------------|---|---------------|
| Component          | Charge Component type.  |               |
| Currency           | Defaults the currency in which the charges have to be collected.  |               |
| Amount             | An amount that is maintained under the product<br>code gets defaulted in this field. User can edit the<br>value, if required.   |               |
| Modified Amount    | From the default value, if the rate is changed or<br>the amount is changed, the value gets updated in<br>the modified amount field.   |               |
| Billing            | If charges are handled by separate billing engine,<br>then by selecting billing the details to be available<br>for billing engine for further processing.   |               |
|                    | On simulation of charges/commission from Back<br>Office, if any of the Charges/Commission<br>component for the customer is 'Billing' enabled,<br>'Billing' toggle for that component should be<br>automatically checked in OBTFPM.    |               |
|                    | The user can not select/de-select the check box if it is de-selected by default.  |               |
|                    | This field is disabled, if 'Defer' toggle is enabled.   |               |
| Defer              | If charges have to be deferred and collected at<br>any future step, this check box has to be<br>selected.   |               |
|                    | On simulation of charges/commission from Back<br>Office, if any of the Charges/Commission<br>component for the customer is AR-AP tracking<br>enabled, 'Defer' toggle for that component should<br>be automatically checked in OBTFPM. |               |
|                    | The user can select/de-select the check box. On de-selection the user has to click on 'Recalculate' charges button for re-simulation.   |               |
| Waive              | If charges have to be waived, this check box has to be selected.  |               |
|                    | Based on the customer maintenance, the charges should be marked for Billing or for Defer.   |               |
|                    | This field is disabled, if 'Defer' toggle is enabled.   |               |
| Charge Party       | Charge party will be beneficiary by default. You can change the value to applicant.   |               |
| Settlement Account | Details of the settlement account.  |               |

Provide the Commission Details based on the description provided in the following table:

Commission Details

| Component             | Rate    | Modified | Currency | Amount | Modified | Defer | Waive | Charge Party |
|-----------------------|---------|----------|----------|--------|----------|-------|-------|--------------|
| No data to display.   |         |          |          |        |          |       |       |              |
| Page 1 (0 of 0 items) | К < 1 > | ×        |          |        |          |       |       |              |

| Field           | Description   | Sample Values |
|-----------------|---|---------------|
| Component       | Select the commission component   |               |
| Rate            | Defaults from product.  |               |
|                 | The commission rate, if available in Back Office defaults in OBTFPM. The user is able to change the rate.   |               |
|                 | If flat commission is applicable, then commission<br>amount defaulted from back office is modifiable<br>by the user. Rate field will be blank and the user<br>cannot modify the Rate field.   |               |
| Currency        | Defaults the currency in which the commission needs to be collected   |               |
| Amount          | An amount that is maintained under the product<br>code defaults in this field.<br>The commission rate, if available in Back Office<br>defaults in OBTFPM. The user is able to change<br>the rate, but not the commission amount directly.<br>The amount gets modified based on the rate<br>changed and the new amount is calculated in<br>back office based on the new rate and is<br>populated in OBTFPM.<br>If flat commission is applicable, then commission<br>amount defaulted from back office is modifiable<br>by the user. Rate field will be blank and the user<br>cannot modify the Rate field. |               |
| Modified Amount | From the default value, if the rate or amount is changed, the modified value gets updated in the modified amount field.   |               |
| Billing         | If charges/commission is handled by separate<br>billing engine, then by selecting billing the details<br>to be available for billing engine for further<br>processing.  |               |
| Defer           | Select the check box, if charges/commissions has to be deferred and collected at any future step.   |               |

| Field              | Description  | Sample Values |
|--------------------|--|---------------|
| Waive              | Select the check box to waive charges/ commission.   |               |
|                    | Based on the customer maintenance, the charges/commission can be marked for Billing or Defer.  |               |
|                    | If the defaulted Commission is changed to defer<br>or billing or waive, system must capture the user<br>details and the modification details in the<br>'Remarks' place holder. |               |
| Charge Party       | Charge party will be 'Beneficiary' by Default. You can change the value to Applicant   |               |
| Settlement Account | Details of the Settlement Account.   |               |

The tax component is calculated based on the commission and defaults if maintained at product level. User cannot update tax details and any change in tax amount on account of modification of charges/ commission will be available on click of Re-Calculate button or on hand off to back-end system.

Tax details are defaulted from the back-end system.

Tax Details

| Component           | Currency | Amount | Billing | Defer | Settlement Account |
|---------------------|----------|--------|---------|-------|--------------------|
| No data to display. |          |        |         |       |                    |

#### Tiles Displayed in Summary

- Main Details User can view and modify details about application details and LC details, if required.
- Party Details User can view and modify party details like beneficiary, advising bank etc., if required.
- Availability and Shipment User can view and modify availability and shipment details, if required.
- Payments User can view and modify all details related to payments, if required.
- Amendment Details User can view the amended details of the issued LC.
- Additional Fields User can view the details of additional fields of the issued LC.
- Documents & Condition User can view and modify the documents required grid and the additional conditions grid, if required.
- Limits and Collaterals User can view and modify limits and collateral details, if required.
- Charges User can view and modify charge details, if required.
- Compliance User can view compliance details. The status must be verified for KYC and to be initiated for AML and Sanction Checks.
- Accounting Details User can view the accounting entries generated in back office.

#### **Action Buttons**

| Field        | Description  | Sample Values |
|--------------|--|---------------|
| Submit       | Task will get moved to next logical stage of<br>Export LC Amendment.   |               |
|              | If mandatory fields have not been captured,<br>system will display an error message until the<br>mandatory fields data are provided. |               |
| Save & Close | Save the information provided and holds the task<br>in you queue for working later.<br>This option will not submit the request       |               |

Use action buttons based on the description in the following table:

| Field  | Description   | Sample Values |
|--------|---|---------------|
| Cancel | Cancel the Data Enrichment stage inputs.  |               |
| Hold   | The details provided will be registered and status<br>will be on hold.<br>This option is used, if there are any pending<br>information yet to be received from applicant and<br>appropriate remarks must be provided.   |               |
| Reject | <ul> <li>On click of Reject, user must select a Reject<br/>Reason from a list displayed by the system.</li> <li>Reject Codes: <ul> <li>R1- Documents missing</li> <li>R2- Signature Missing</li> <li>R3- Input Error</li> <li>R4- Insufficient Balance/Limits</li> <li>R5 - Others.</li> </ul> </li> <li>Select a Reject code and give a Reject<br/>Description.</li> <li>This reject reason will be available in the remarks<br/>window throughout the process.</li> </ul> |               |

# **Exceptions**

The Export LC Amendment request, before it reaches the approval stage, the application will validate the Amount Block, KYC and AML. If any of these failed in validation will reach exception stage for further clearance for the exceptions.

#### **Exception - Amount Block**

As part of amount block validation, application will check if sufficient balance is available in the account to create the block. On hand-off, system will debit the blocked account to the extent of block and credit charges/ commission account in case of charges block or credit the amount in suspense account for blocks created for collateral.

The transactions that have failed amount block due to non-availability of amount in respective account will reach the amount block exception stage.

Log in into OBTFPM application, amount block exception queue. Amount block validation failed tasks for trade transactions will be listed in the queue. Open the task to view summary of important fields with values.

Exception is created when sufficient balance is not available for blocking the settlement account and the same can be addressed by the approver in the following ways:

#### Approve:

- Settlement amount will be funded (outside of this process)
- Allow account to be overdrawn during hand-off

#### Refer:

• Refer back to DE providing alternate settlement account to be used for block.

• Different collateral to be mapped or utilize lines in place of collateral.

Reject:

Reject the transaction due to non-availability of sufficient balance in settlement account

#### **Amount Bock Exception**

#### This section will display the amount block exception details.

|         | <ul> <li>R1- Documents missing</li> </ul>   |               |
|         | <ul> <li>R2- Signature Missing</li> </ul>   |               |
|         | R3- Input Error   |               |
|         | <ul> <li>R4- Insufficient Balance- Limits</li> </ul>  |               |
|         | R5 - Others   |               |
| Cancel  | Cancel the Export LC Amendment Amount Block Exception check.  |               |
| Approve | On approve, application must validate for all mandatory field values, and task must move to the next logical stage.   |               |
| Back    | Task moves to previous logical step.  |               |

### Exception - Know Your Customer (KYC)

As part of KYC validation, application will check if necessary KYC documents are available and valid for the applicant. The transactions that have failed KYC due to non-availability / expired KYC verification will reach KYC exception stage.

Log in into OBTFPM application, KYC exception queue. KYC exception failed tasks for trade finance transactions must be listed in your queue. Open the task, to see summary tiles that display a summary of important fields with values.

User can pick up a transaction and do the following actions:

#### Approve

- After changing the KYC status in the back end application (outside this process).
- Without changing the KYC status in the back end application.
- Reject (with appropriate reject reason).

Tiles Displayed in Summary:

- Main Details User can view and modify details about application details and LC details, if required.
- Party Details User can view and modify party details like beneficiary, advising bank etc., if required
- Limits and Collaterals User can view and modify limits and collateral details, if required.
- Compliance User can view compliance details. The status must be verified for KYC and to be initiated for AML and Sanction Checks.

#### **Action Buttons**

Use action buttons based on the description in the following table:

| Field   | Description   | Sample Values |
|---------|---|---------------|
| Reject  | On click of Reject, user must select a Reject Reason from a list displayed by the system.   |               |
|         | Reject Codes:   |               |
|         | <ul> <li>R1- Documents missing</li> </ul>   |               |
|         | R2- Signature Missing   |               |
|         | R3- Input Error   |               |
|         | <ul> <li>R4- Insufficient Balance/Limits</li> </ul>   |               |
|         | • R5 - Others.  |               |
|         | Select a Reject code and give a Reject Description.   |               |
|         | This reject reason will be available in the remarks window throughout the process.  |               |
| Hold    | The details provided will be registered and status will be on hold.   |               |
|         | This option is used, if there are any pending<br>information yet to be received from applicant and<br>appropriate remarks must be provided.                         |               |
| Refer   | User will be able to refer the task back to the Data<br>Enrichment user.User must select a Refer<br>Reason from the values displayed by the system.<br>Refer Codes: |               |
|         | <ul> <li>R1- Documents missing</li> </ul>   |               |
|         | <ul> <li>R2- Signature Missing</li> </ul>   |               |
|         | R3- Input Error   |               |
|         | <ul> <li>R4- Insufficient Balance- Limits</li> </ul>  |               |
|         | R5 - Others   |               |
| Cancel  | Cancel the Export LC Amendment KYC exception check.   |               |
| Approve | On approve, application must validate for all mandatory field values, and task must move to the next logical stage.   |               |
| Back    | Task moves to previous logical step.  |               |

### **Exception - Limit Check/Credit**

The transactions that have failed limit check due to non-availability of limits will be available in limit check exception queue for further handling.

Log in into OBTFPM application, limit check exception queue. Limit check exception failed tasks for trade finance transactions must be listed in your queue. Open the task, to see summary tiles that display a summary of important fields with values.

Limit check Exception approver can do the following actions:

#### Approve

- Limit enhanced in the back end (outside this process).
- Without enhancing limit in the back end.

#### Refer

- Refer back to DE providing alternate limit id to map
- Refer additional collateral to be mapped

#### Reject

The transaction due to non-availability of limits capturing reject reason.

#### Application

Refer to Application Details.

#### Limit/Credit Check

This section will display the amount block exception details.

If there are more<br>approvers, task will move to the next approver<br>for approval. If there are no more approvers, the<br>transaction is handed off to the back end system<br>for posting. |               |

# **Reject Approval**

As a Reject approver, user can review a transaction rejected and waiting for reject confirmation.

Log in into OBTFPM application to view the reject approval tasks for Export LC Amendment in queue. On opening the task, you will see summary tiles. The tiles will display a list of important fields with values.

The tile containing the screen from where the reject was triggered will be highlighted in red.

User can drill down from reject summary tiles into respective data segments to verify the details of all fields under the data segment.

#### **Application Details**

The application details data segment have values for requests received from both non-online and online channels.

#### Summary

The data captured during handling of the transaction until the stage when reject is given will be available in the summary tile. Other fields will be blank when verified from summary tile.

The data segment in which the task was rejected will have the tiles highlighted in a different colour (red).

- Main Details User can view and modify details about application details and LC details, if required.
- Party Details User can view and modify party details like beneficiary, advising bank etc., if required
- Availability and Shipment User can view and modify availability and shipment details, if required.
- Payments User can view and modify all details related to payments, if required.
- Amended Details User can view the amended details of the issued LC.
- Documents & Condition User can view and modify the documents required grid and the additional conditions grid, if required.
- Limits and Collaterals User can view and modify limits and collateral details, if required.
- Charges User can view and modify charge details, if required.
- Compliance User can view compliance details. The status must be verified for KYC and to be initiated for AML and Sanction Checks.

#### **Action Buttons**

Use action buttons based on the description in the following table:

| Field          | Description   | Sample Values |
|----------------|---|---------------|
| Reject Approve | On click of Reject Approve, the transaction is rejected.  |               |
| Reject Decline | On click of Reject Decline, the task moves back<br>to the stage where it was rejected. User can<br>update the reason for reject decline in remarks. |               |
| Hold           | User can put the transaction on 'Hold'. Task will remain in Pending state.  |               |
| Cancel         | Cancel the Reject Approval.   |               |
