Oracle Banking Trade Finance Process Management

Welcome to the Oracle Banking Trade Finance Process Management (OBTFPM) User Guide. This guide provides an overview on the OBTFPM application and takes you through the various steps involved in creating and processing Trade Finance transactions.

This document will take you through following activities in OBTFPM:

- To create and handle Trade Finance transaction.
- Help users to conveniently create and process Trade Finance transaction.

Overview

OBTFPM is a Trade Finance Middle Office platform, which enables bank to streamline the Trade Finance operations. OBTFPM enables the customers to send request for new trade finance transaction either by visiting the branch (offline channels) or through SWIFT/Trade Portal/other external systems (online channels).

Benefits

OBTFPM helps banks to manage Trade Finance operations across the globe in different currencies. OBTFPM allows you to:

- Handle all Trade Finance transactions in a single platform.
- Provides support for limit verification and limit earmarking.
- Provide amount block support for customer account.
- Provides acknowledgement to customers.
- Enables the user to upload related documents during transaction.
- Enables to Integrate with back end applications for tracking limits, creating limit earmarks, amount blocks, checking KYC, AML and Sanction checks status.
- Create, track and close exceptions for the above checks.
- Enables to use customer specific templates for fast and easy processing of trade transactions that reoccur periodically.

Key Features

- Stand-alone system that can be paired with any back end application.
- Minimum changes required to integrate with bank's existing core systems.
- Faster time to market.
- Capable to interface with corporate ERP and SWIFT to Corporate.
- Highly configurable based on bank specific needs.
- Flexibility in modifying processes.

Guarantee Issuance Claim Settlement

As a part of Guarantee Issuance Claim Settlement process, the user can initiate Settlement of Claim under a Guarantee/SBLC, when a valid claim is received from the Beneficiary or the Bank that is authorized by the Guarantor to raise a claim under the Guarantee/SBLC.

This section contains the following topics:

[Common Initiation Stage](#)

[Registration](#)

[Data Enrichment](#)

[Multi Level Approval](#)

Common Initiation Stage

The user can initiate the new update a claim lodged under a Guarantee/SBLC Issued request from the common Initiate Task screen.

1. Using the entitled login credentials, login to the OBTFPM application.
2. Click **Trade Finance > Initiate Task**.

Provide the details based on the description in the following table:

Field	Description
Process Name	Select the process name to initiate the task.
Branch	Select the branch.

Action Buttons

Use action buttons based on the description in the following table:

Field	Description
Proceed	Task will get initiated to next logical stage.

Field	Description
Clear	The user can clear the contents update and can input values again.

Registration

During the Registration stage, the user can register settlement of claim under a Guarantee/SBLC Issued.

In this stage the user can initiate Settlement of Claim under a Guarantee/ SBLC. The user can capture the basic details of the application.

1. Using the entitled login credentials for registration stage, login to the OBTFPM application.

2. On login, user must be able to view the dashboard screen with widgets as mapped to the user.

3. Click **Trade Finance**> **Bank Guarantee Issuance** > **Guarantee SBLC Issuance - Claim Update**.

The Registration stage has two sections Application Details and Guarantee Details. Let's look at the registration screens below:

Application Details

The request is received at the Branch/ Front office or Processing center. The user should be able to input the following details.

Provide the Application Details based on the description in the following table:

Field	Description	Sample Values
Guarantee/SBLC Number	User can enter the undertaking number. The user can also search the undertaking number through LOV search.	
Claim Serial Number	User can enter the claim serial number to which update has to be done.	

Field	Description	Sample Values
Beneficiary ID/ Name	Read only field. System defaults the Beneficiary ID/ Name from Guarantee/ SBLC claim.	001345
Branch	Customer's home branch will be displayed. Read only field. System defaults the branch name from Guarantee/ SBLC Issuance.	203-Bank Futura -Branch FZ1
Process Reference Number	Unique sequence number for the transaction. This is auto generated by the system based on process name and branch code.	203GTEISS000 001134
Priority	Priority maintained will be populated as either 'Low or Medium or High'. If priority is not maintained for a customer, 'Medium' priority will be defaulted.	High
Submission Mode	Select the submission mode of Guarantee Issuance request. By default the submission mode will have the value as 'Desk'. Desk - Request received through Desk Fax - Request received through Fax Email - Request received through Email	Desk
Claim Settlement Date	By default, the application will display branch's current date for the claim settlement date. Read only field.  Note Future date and back date selection is not allowed.	04/13/2018

Field	Description	Sample Values
Reject	<p>On click of Reject, user must select a reject reason from a list displayed by the system and the task may be terminated or moved to Reject Approval Stage.</p> <p>Reject Codes:</p> <ul style="list-style-type: none"> • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others. <p>Select a Reject code and give a reject description.</p> <p>This reject reason will be available in the remarks window throughout the process.</p>	
Refer	<p>On click of Refer, user will be able to refer the task back to the Data Enrichment user. User must select a Refer Reason from the values displayed by the system.</p> <p>Refer Codes:</p> <ul style="list-style-type: none"> • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others. 	
Hold	<p>The details provided will be on hold.</p> <p>This option is used, if there are any pending information yet to be received from applicant.</p>	

Field	Description	Sample Values
Cancel	On click of Cancel the user can cancel the task window and return to the dashboard. The data input will not be saved.	
Save & Close	Save the information provided and holds the task in 'My Tasks' for working later. This option will not submit the request	
Back	On clicking Back, system should move the task to the previous segment.	
Next	On click of Next, system should validate if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment.	
Documents	Click the Document icon to view the Documents already uploaded as part of Registration stage and also can upload additional documents.	
Remarks	Click the Remarks icon to view the remarks captured as part of Registration stage and also can input Remarks, which can be seen by other users.	
Overrides	Click to view overrides, if any.	
Incoming Message	Clicking this button allows the user to see the message in case of STP of incoming MT 767.	
View Undertaking	Clicking this button allows the user to view the undertaking details.	

Additional Details

As a part of Additional details section, Guarantee /Standby claim settlement may have impact on Charges.

If any of the fields in the financial section of the pop up screen is checked then the limits and collaterals screen will be enabled.

Charge Details

On landing the Additional Details section, the default commission, charges and tax if any will get populated.

If default charges are available under the product, they should be defaulted here with values. If customer or customer group specific charges are maintained, then the same will be defaulted from back end system.

Component	Currency	Amount	Modified	Billing	Defer	Waive	Charge Party	Settlement Account
LCCOURAMND	GBP	£50.00		<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>		ADD000714026
LCSWIFTAMN	GBP	£50.00		<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>		0002008977575

Provide the Charge Details based on the description provided in the following table:

Field	Description	Sample Values
Component	Charge Component type.	
Currency	Defaults the currency in which the charges have to be collected.	
Amount	An amount that is maintained under the product code gets defaulted in this field. User can edit the value, if required.	
Modified	From the default value, if the rate is changed or the amount is changed, the same gets updated in 'Modified' field.	

Field	Description	Sample Values
Billing	<p>If charges are handled by separate billing engine, then by selecting billing the details to be available for billing engine for further processing.</p> <p>On simulation of charges/commission from Back Office, if any of the Charges/Commission component for the customer is 'Billing' enabled, 'Billing' toggle for that component should be automatically checked in OBTFPM.</p> <p>The user can not select/de-select the check box if it is de-selected by default.</p> <p>This field is disabled, if 'Defer' toggle is enabled.</p>	
Defer	<p>If charges have to be deferred and collected at any future step, this check box has to be selected.</p> <p>On simulation of charges/commission from Back Office, if any of the Charges/Commission component for the customer is AR-AP tracking enabled, 'Defer' toggle for that component should be automatically checked in OBTFPM.</p> <p>The user can select/de-select the check box. On de-selection the user has to click on 'Recalculate' charges button for re-simulation</p>	
Waive	<p>If charges have to be waived, this check box has to be selected.</p> <p>Based on the customer maintenance, the charges should be marked for Billing or for Defer.</p> <p>If the user changes the defaulted charging to defer or billing or waive, system must capture the user details and the modification details in the 'Remarks' placeholder.</p> <p>This field is disabled, if 'Defer' toggle is enabled.</p>	
Charge Party	Charge party will be applicant by default. You can change the value to beneficiary	
Settlement Account	Details of the settlement account.	

Commission Details

The values gets defaulted, In the Commission Details section, If default commission is maintained under the product.

Commission Details

Component	Rate	Modified	Currency	Amount	Modified	Defer	Waive	Charge Party	Settlement Account
No data to display.									

Provide the Commission Details based on the description provided in the following table:

Field	Description	Sample Values
Component	Select the commission component	
Rate	Defaults from product. User can change the rate, if required.	
Currency	Defaults the currency in which the commission has to be collected.

Payment Details

As part of DE, the bank user can capture the payment details under a claim. The user can also be able to input the transaction details.

The user can scrutinize the claim settlement request and input data as required.

Provide the payment details based on the description in the following table:

Field	Description	Sample Values
Liquidate using Collateral	If the claim settlement has to be paid, vide collateral the user has to select the Liquidate using collateral. User can liquidate using collateral only if collateral has been mapped at the time of Guarantee Issuance. In case collateral not mapped during issuance, user cannot add collaterals and use the same during liquidation.	
Outstanding Collateral Amount	Read Only field. System defaults the outstanding collateral amount (if mapped).	

Field	Description	Sample Values
Advance by Loan	If the claim settlement has to be paid, vide loan the user has to select the Advance by loan.	
Settle Available Amount	If partial settlement amount is debited from applicant and the balance have to be settled against loan, user to select this option.	

Loan Preferences

User can capture the loan preferences details in this tab.

Provide the loan preference details based on the description in the following table:

Field	Description	Sample Values
Product Code	Read only field. This field displays the loan product linked to the product.	
Customer ID	Read only field. This field displays the customer ID of the applicant/applicant bank.	
Customer Name	Read only field. This field displays the applicant/applicant bank name.	
Bill Currency - Amount	Read only field. This field displays the bill currency.	
Credit Line	Enables the user to select the Line to be utilized. In case of multiple lines, user must be able to attach the required number of lines.	
Tenor Type	Application defaults the loan tenor based on the product.	
Loan Tenor Units	Application defaults the loan tenor units based on the product.	

Field	Description	Sample Values
Exchange Rate	This field will be enabled only if the claim currency and Loan Currency are different. If FX linkage is available, system to display the Exchange rate from FX linkage. System will display the card rate, if FX linkage is not applicable.	
Loan Currency-Amount	Select the currency for the loan amount.	
Loan Maturity Date	System defaults the date based on the Loan value date and Loan tenor. User cannot change the value.	

FX Linkage

This section enables the user to link the existing FX contract(s) to the drawing. User can link one or more FX deals to a drawing/bill. The linked value of an FX deal(s) must not exceed the value of the drawing/bill.

FX contract linkage with the Drawing/Bill booking can happen only for immediate liquidation of sight payment or for Usance. For manual sight payment, the user needs to link the FX contract on the date of liquidation of the drawing/bill.

Provide the FX linkage detail based on the description in the following table:

Field	Description	Sample Values
Drawing Currency	Read only field. This field displays the currency details from the drawing.	
Drawing Amount	Read only field. This field displays the drawing amount from the drawing.	

Field	Description	Sample Values
Drawing Maturity Date	System to display the due date for the drawing in case of a Usance bill. In case of a sight bill, the system should display the current branch date as Maturity Date (for processing immediate payment).	
Contract Currency	This field displays the currency of the FX contract.	
Contract Available Amount	This field displays the unlinked/ available amount under the FX contract.	
Rate	This field displays the rate at which the contract is booked.	
Amount in Contract Currency	This field displays the amount in contract currency converted from FX currency.	
Expiry Date	This field displays the expiry date of the contract.	
Delivery Period From	Start date of the delivery period.	
Delivery Period To	End date of the delivery period.

Summary

User can review the summary screen for Guarantee /Standby Claim settlement request.

In this section the user can see the summary tiles. The tiles must display a list of important fields with values. The tiles where fields have been amended is highlighted in different color, User must be also able to drill down from summary tiles into respective data segments.

The screenshot shows the Oracle application interface for a Guarantee SBLC Issuance. The main content area is titled "Summary" and contains a grid of summary tiles. The tiles are organized into three rows and four columns. The first row contains "Main", "Additional Fields", "Advices", and "Commission, Charges and taxes". The second row contains "Preview Messages", "Payment Details", "Settlement Details", and "Party Details". The third row contains "Compliance" and "Accounting Details". Each tile displays key information such as booking dates, submission modes, amounts, and various details related to the issuance. The interface also includes a navigation menu on the left, a top header with the Oracle logo and user information, and a bottom toolbar with buttons for "Audit", "Reject", "Refer", "Hold", "Cancel", "Save & Close", "Back", "Next", and "Submit".

Tiles Displayed in Summary

- Main Details - User can view the application details and Guarantee/ Standby details. User can modify the details if required.
- Party Details - User can view the party details like beneficiary, advising bank etc.
- Payment Details - User can view the payment details.
- Loan Preferences – User can view the loan preferences.
- FX Linkage – User can view the FX Linkages.
- Charges - User can view the details provided for charges. User can modify the details if required.
- Preview Message - User can drill down to view the message preview, legal verification and customer draft confirmation details.
- Settlement Details – User should be able to view the settlement details.
- Split Settlement Details – User should be able to view the split settlement details.
- Accounting Entries - User can see the accounting details.
- Compliance – The compliance tile has the KYC, Sanctions and AML.

Action Buttons

Field	Description	Sample Values
Documents	Click the Document icon to view the Documents already uploaded as part of Registration stage and also can upload additional documents.	
Remarks	Click the Remarks icon to view the remarks captured as part of Registration stage and also can input Remarks, which can be seen by other users.	
Overrides	Click to view overrides, if any.	
Incoming Message	Clicking this button allows the user to see the message in case of STP of incoming MT 767.	
View Undertaking	Clicking this button allows the user to view the undertaking details.	

Multi Level Approval

This stage allows the approver user to approve a Claim settlement under Guarantee Issued Transaction.

Log in into OBTFPM application and open the task to see the summary tiles. The tiles should display a list of important fields with values. User must be able to drill down from summary Tiles into respective data segments to verify the details of all fields under the data segment.

Re-Key Authorization

The application will request approver for few critical field values as an authorization step. If the values captured match with the values available in the screen, system will allow user to open the transaction screens for further verification. If the re-key values are different from the values captured, then application will display an error message.

Open the task and re-key some of the critical field values from the request in the Re-key screen. Some of the fields below will dynamically be available for re-key.:

- Applicant Name
- Beneficiary Name
- Undertaking Currency
- Undertaking Amount
- Expiry Date

Re-key is applicable to the first approver in case of multiple approvers. All approvers will however be able to see the summary tiles and the details in the screen by drill down from tiles.
