Oracle Banking Trade Finance Process Management

Welcome to the Oracle Banking Trade Finance Process Management (OBTFPM) User Guide. This guide provides an overview on the OBTFPM application and takes you through the various steps involved in creating and processing trade finance transactions.

This document will take you through following activities in OBTFPM:

- To create and handle Trade Finance transaction.
- Help users to conveniently create and process trade finance transaction

Overview

OBTFPM is a Trade Finance Middle Office platform, which enables bank to streamline the trade finance operations. OBTFPM enables the customers to send request for new trade finance transaction either by visiting the branch (offline channels) or through SWIFT/Trade Portal/other external systems (online channels).

Benefits

OBTFPM helps banks to manage trade finance operations across the globe in different currencies. OBTFPM allows you to:

- Handle all trade finance transactions in a single platform.
- Provides support for limit verification and limit earmarking.
- Provide amount block support for customer account.
- Provides acknowledgement to customers.
- Enables the user to upload related documents during transaction.
- Enables to Integrate with back end applications for tracking limits, creating limit earmarks, amount blocks, checking KYC, AML and Sanction checks status.
- Create, track and close exceptions for the above checks.
- Enables to use customer specific templates for fast and easy processing of trade transactions that reoccur periodically.

Key Features

- Stand-alone system that can be paired with any back end application.
- Minimum changes required to integrate with bank's existing core systems.
- Faster time to market.
- Capable to interface with corporate ERP and SWIFT to Corporate.
- Highly configurable based on bank specific needs.
- Flexibility in modifying processes.

Import Documentary Collection Liquidation

Import Documentary Collection Liquidation process facilitates the user to handle the payment under a Documentary Collection.

This section contains the following topics:

Common Initiation Stage	Exceptions Reject Approval
Registration	Multi Level Approval
Data Enrichment	

Common Initiation Stage

The user can initiate the new import documentary collection liquidation request from the common Initiate Task screen.

1. Using the entitled login credentials, login to the OBTFPM application.
2. Click **Trade Finance > Initiate Task**.

Provide the details based on the description in the following table:

Field	Description
Process Name	Select the process name to initiate the task.
Documentary Collection Number	Select the Documentary Collection Number.
Branch	Select the branch.

Action Buttons

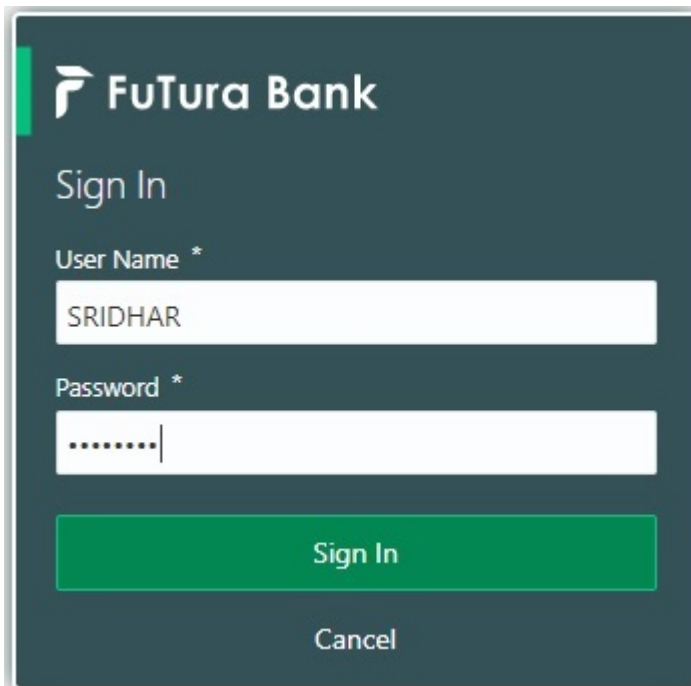

Use action buttons based on the description in the following table:

Field	Description
Proceed	Task will get initiated to next logical stage.
Clear	The user can clear the contents update and can input values again.

Registration

The process starts from Registration stage, during Registration stage, user can capture the basic details of the transaction and upload related documents. On submit, the request will be available for an collection expert to handle the request in the next stage.

1. Using the entitled login credentials for Registration stage, login to the OBTFPM application.

The screenshot shows a dark-themed login interface for FuTura Bank. At the top left is the FuTura Bank logo. Below it, the text 'Sign In' is displayed. There are two input fields: 'User Name *' containing the text 'SRIDHAR' and 'Password *' containing masked characters. Below the input fields are two buttons: a green 'Sign In' button and a white 'Cancel' button.

2. On login, user must be able to view the dashboard screen with widgets as mapped to the user.

The dashboard displays several widgets:

- High Value Transactions:** A bubble chart showing transactions for GBP and EUR across a range of 0 to 12.
- High Priority Tasks:** A table listing tasks such as 'Import Documentary Collections' and 'Export LC Advising' with columns for Branch and Process Name.
- Priority Summary:** A table summarizing task priorities, including 'Export Documentary Collections-Update'.
- Pending Exception Approval:** A table with a search filter and columns for Customer Name, Stage Name, Process Reference Number, Process Name, Branch Name, and Currency. It lists exceptions like 'Amount Block Exception Approval' and 'Limit Earmarking Exception Approval'.
- SLA Status Summary:** A summary widget for 'Export Documentary Collections-Update'.

3. Click Trade Finance> Import Documentary Collection> Import Documentary Collection Liquidation.

The 'Free Tasks' page displays a table of tasks:

Action Buttons

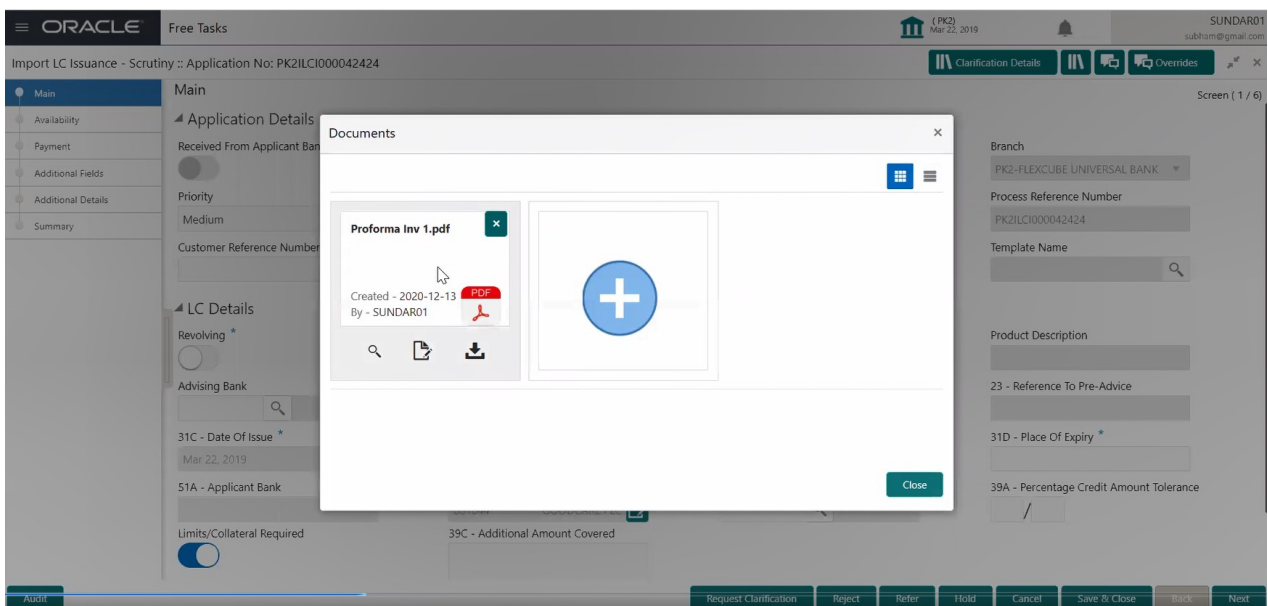

Field	Description	Sample Values
Submit	On submit, task will get moved to next logical stage of Import Documentary Collection Liquidation. If mandatory fields have not been captured, system will display an error message until the mandatory fields data are provided.	
Save & Close	Save the information provided and holds the task in 'My Task' queue for working later. This option will not submit the request.	
Cancel	Cancels the Import Documentary Collection Liquidation Task. Details entered will not be saved and the task will be removed.	
Hold	The details provided will be saved and status will be on hold. User must update the remarks on the reason for holding the task. This option is used, if there are any pending information yet to be received from applicant.	

OBTFPM- OBDX Bidirectional flow

As a part of Digital Experience, customers can initiate Trade Finance Transactions from online channels and the respective task will be available in OBTFPM for further handling.

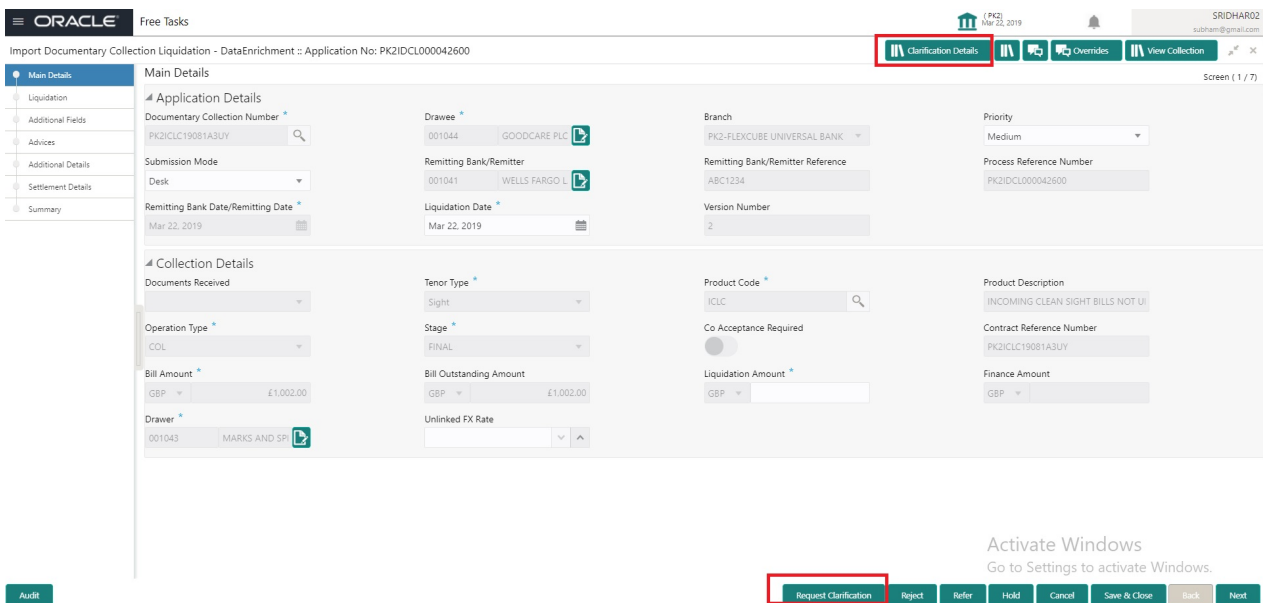

OBTFPM user, for task received from online channel, raise clarification and receive response from the customer.

1. Customer initiates the Trade Finance transaction in Online channel (OBDX) and upload the necessary documents.

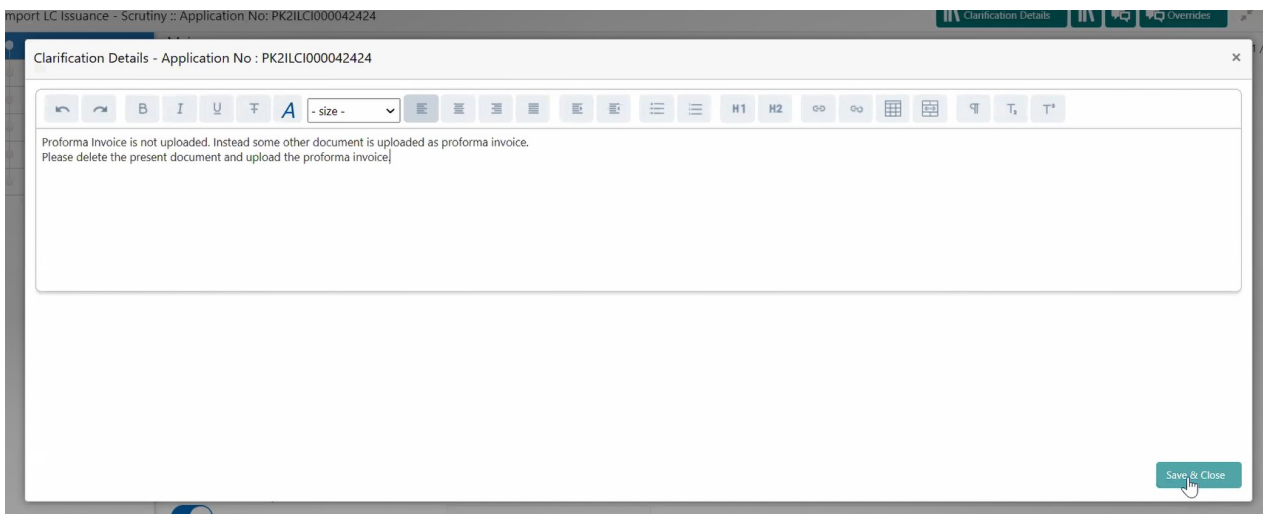

2. The task created will land in the Scrutiny stage of OBTFPM for handling by Trade expert for reviewing and identifying mismatch/incomplete data.

3. In the Scrutiny, Data Enrichment or Approval the bank user may require clarification from customer, OBTFPM user clicks **Request Clarification** button to request for online clarification from customer.

4. The **Request Clarification** detailed screen appears, user enters the information and clicks **Save**, the information should be sent to customer.

5. OBTFPM user should be able to see the details in the View Clarification window and the status will be Clarification Requested. The user can click Re clarification if required.

6. The task goes to **Awaiting Customer Clarification** state. until the response received from the customer.

ORACLE Awaiting Customer Clarification (PK2) Mar 22, 2019 SRIDHAR02 subham@gmail.com

Accept Clarification Close

8. The user can click **Accept Clarification** button, if the query raised has been answered by the customer. The status should change to Clarification Accepted. on next the task moves to the next logical stage.

9. Bank user checks the Clarification and opens the **Documents** Tab. System displays both the new document uploaded and the metadata for deleted document and the deleted document is displayed in

a blurred way. User can open the new document, the deleted document cannot be opened. System should also increment the version number of the documents.

Data Enrichment

On successful completion of registration of an Import Documentary Collection Liquidation, the request moves to data enrichment stage. In this stage the gathered information during registration are scrutinized.

Do the following steps to acquire a task currently at Data Enrichment stage:

1. Using the entitled login credentials for Data Enrichment stage, login to the OBTFPM application.

2. On login, user must be able to view the dashboard screen with widgets as mapped to the profile.

The screenshot shows the Oracle dashboard interface. The left sidebar contains navigation options: Core Maintenance, Dashboard, Maintenance, Security Management, Tasks, and Trade Finance. The main content area displays several widgets:

- High Value Transactions:** A bubble chart showing transaction values for GBP and EUR across a range of 0 to 12.
- High Priority Tasks:** A table listing tasks such as 'Import Documentary Collections', 'Export LC Advising', and 'Export LC Advising' with columns for Branch and Process Name.
- Priority Summary:** A table showing task details with columns for Branch, Process Name, and Currency.
- Pending Exception Approval:** A table with a search filter and columns for Customer Name, Stage Name, Process Reference Number, Process Name, Branch Name, and Currency. It lists entries like 'Amount Block Exception Approval' and 'Limit Earmarking Exception Approval'.
- SLA Status Summary:** A summary widget with a dropdown menu.

3. Click Trade Finance> Tasks> Free Tasks.

The screenshot shows the 'Free Tasks' page in Oracle. The left sidebar highlights 'Free Tasks' under the 'Tasks' category. The main content area displays a table of tasks with the following columns: Action, Priority, Process Name, Process Reference Number, Application Number, Stage, Application Date, Branch, and Count. The table contains 12 rows of task data.

The Data Enrichment stage has the following hops for data capture:

- Main Details
- Liquidation
- Additional Fields
- Advices
- Additional Details
- Settlement Details
- Summary

Let's look at the details for Data Enrichment stage. User can enter/update the following fields. Some of the fields that are already having value from registration stage may not be editable.

Main Details

Main details section has two sub section as follows:

- Application Details
- Collection Details

Application Details

All fields displayed under Application details section, would be read only except for the **Priority**. Refer to [Application Details](#) for more information of the fields.

Collection Details

The fields listed under this section are same as the fields listed under the [Collection Details](#) section in [Registration](#). Refer to [Collection Details](#) for more information of the fields. During registration, if user has not captured details, then user can capture the details in this section.

Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Documents	<p>Click the Documents icon to View/Upload the required documents.</p> <p>Application will display the mandatory and optional documents.</p> <p>The user can view and input/view application details simultaneously.</p> <p>When a user clicks on the uploaded document, Document window get opened and on clicking the view icon of the uploaded document, Application screen should get split into two. The one side of the document allows to view and on the other side allows to input/view the details in the application.</p>	
Remarks	<p>Click the Remarks icon to provide any additional information. This information can be viewed by other users processing the request.</p> <p>Content from Remarks field should be handed off to Remarks field in Backend application.</p>	
Overrides	Click to view the overrides accepted by the user.	

Field	Description	Sample Values
View Collection	Enables the user to view the latest collection values displayed in the respective fields.	
Save & Close	Save the details provided and holds the task in 'My Task' queue for further update. This option will not submit the request.	
Cancel	Cancel the Data Enrichment stage inputs. The details updated in this stage are not saved. The task will be available in 'My Task' queue.	
Hold	The details provided will be saved and status will be on hold. User must update the remarks on the reason for holding the task. This option is used, if there are any pending information yet to be received from applicant.	
Reject	On click of Reject, user must select a Reject Reason from a list displayed by the system. Reject Codes: <ul style="list-style-type: none"> ● R1- Documents missing ● R2- Signature Missing ● R3- Input Error ● R4- Insufficient Balance/Limits ● R5 - Others. Select a Reject code and give a Reject Description. This reject reason will be available in the remarks window throughout the process.	
Refer	User must select a Refer Reason from the values displayed by the system. Refer Codes: <ul style="list-style-type: none"> ● R1- Documents missing ● R2- Signature Missing ● R3- Input Error ● R4- Insufficient Balance/Limits ● R5 - Others. 	
Next	On click of Next, system should validate if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment.	

Liquidation

Liquidation hop enables the user to view Documents, Shipment, Maturity Details and Draft Details to process the liquidation.

FX Linkage

This section enables the user to link the existing FX contract(s) to the bill. User can link one or more FX deals to a bill. The linked value of an FX deal(s) must not exceed the value of the bill.

FX contract linkage with the Bill booking can happen only for immediate liquidation of sight payment or for Usance. For manual sight payment, the user needs to link the FX contract on the date of liquidation of the bill.

Following are the features of FX Linkage in BC.

- FX linkage cannot be linked at Bills at initial stage.
- When a bill is drawn under LC, the details of forward contract linked as a part of the LC, will be defaulted at bill.
- Linked amount will be defaulted against the corresponding FX sequentially.
- User can delink or modify the defaulted FX details at in the Bill.
- Bill maturity date should be greater than or equal to FX Value date.
- Sum of Linked amount will not be greater than Bill contract amount.
- Linked amount will not be greater than the available amount for linkage.
- Current Utilized amount will display the liquidated/purchased/discounted/negotiated amount of Bill contract. It cannot go beyond the linked FX amount.
- When a bill is drawn under LC, delink of FX at BC is allowed only if the linked FX is not utilized by the bill.
- Multiple forward FX contract could be linked and exchange rate of FX contract vary from each. Hence, effective exchange rate for bill would be arrived using weighted average method and it is utilized during purchase/negotiation/discount or liquidation of the bill. The same will be populated in the Average FX Rate.

FX Reference Number	Bought Currency	SOLD Currency	Available Contract Amount	Rate	Linked Amount	Current Utilized Amount	Total Utilized Amount	FX Expiry Date	Action

Action	Click Edit icon to edit the Split Settlement details Click Delete icon to delete the Split Settlement details.	

Tracers

This section enables the user to view the defaulted Tracer details from back end application. It also allows the user to add new tracer details. Add new tracer details based on the description in the following table:

Acknowledgement Tracer and Payment Tracer are applicable for this process.

The screenshot shows a 'Tracer Details' window with two sections: 'Payment Tracer' and 'Acknowledgement Tracer'.
Payment Tracer: Includes a 'Tracer Required' toggle (checked), 'Number of Tracers' (3), 'Tracer Frequency' (Weekly), 'Tracer Medium' (SWIFT), 'Tracer Receiver Party' (dropdown), and 'Tracer Start Date' (Jan 1, 2014).
Acknowledgement Tracer: Includes a 'Tracer Required' toggle (unchecked), 'Number of Tracers' (empty), 'Tracer Frequency' (dropdown), 'Tracer Medium' (dropdown), 'Tracer Receiver Party' (Advising Bank), and 'Tracer Start Date' (Jan 1, 1970).
 At the bottom right, there are 'Save & Close' and 'Close' buttons.

Field	Description	Sample Values
Tracer Required	Select if Tracer is required or nor from the available drop list: <ul style="list-style-type: none"> Required Not required Till resolved 	
Number of Tracers	Provide the number tracers required.	

Field	Description	Sample Values
Tracer Frequency	Provide the frequency for generation of the Tracer.  Note This field is applicable only if Tracer Required has value as Till Resolved .	
Tracer Medium	Select the tracer medium from the LOV.  Note This field is applicable only if Tracer Required has value as Required or Till Resolved .	
Tracer Receiver Party	Select the tracer receiver party from the LOV.  Note This field is applicable only if Tracer Required has value as Required or Till Resolved .	
Tracer Start Date	Select the Tracer start date. Start date cannot be earlier than the branch date.  Note This field is applicable only if Tracer Required has value as Required or Till Resolved .	

Loan Preference

This section enables the user to link a loan to liquidate the document under collection. This section will be enabled based on the product selected for documents under collection.

Provide the loan preference details based on the description in the following table:

Field	Description	Sample Values
Drawing/Collection Ref	Defaults from the underlying task. User cannot change the value.	
Bill Currency-Amount	Outstanding Drawing/ Collection Currency and Amount. Defaults from the underlying task. User cannot change the value.	
Customer Id	Defaults from the underlying task. User cannot change the value.	
Customer Name	Applicant/ Drawee Name. Defaults from the underlying task. User cannot change the value.	
Product Code	Defaults from the underlying Collection/ Drawing Product maintenance. User cannot change the value.	
Loan Currency-Amount	Loan currency is defaulted from the bill currency. User can change this to Local Currency. System should display an error message on tab out if the currency selected is not a Bill currency or Local Currency. System populates the loan account based on the outstanding drawing/ Collection amount less the collateral amount. User cannot change the Loan amount.	
Loan Currency-Amount	If collateral amount is linked to the underlying drawing/ collection bill, the Loan Currency-amount to be utilized for liquidation to be input by the user here.	
Exchange Rate	Exchange rate applicable for Local Currency. System displays the Exchange rate from maintenance. User cannot change the value. System validates the exchange rate is within the allowed range.	
Loan Tenor Units	Period of loan. System defaults the value. User can change the value. The numerical value for Days or months or Years is applicable.	
Tenor Type	System defaults the value. User can change the value. Values are Days, Months and Years. The numerical value for Days or months or Years is applicable.	
Loan/Finance Value Date	System defaults the branch date as Value date. User cannot change the value.	

Field	Description	Sample Values
Loan Maturity Date	Loan maturity date as default based on Tenor type and Tenor units. User cannot change the value.	
Liquidate Charge/Comm On LC	Toggle On: Turn the toggle on to include the outstanding Commission/charge to be included as part of Liquidation.	
Loan Interest/UDE Details		
User Defined Element ID	System populates the UDE Element ID as part of simulation. User are allowed to change the selection through LOV.	
UDE Description	System populates the UDE description as part of simulation. If a user changes the UDE ID, system should populate the description.	
Rate Code	System populates the Rate code as part of simulation.	
Usage	System populates the details as part of simulation.	
UDE Value	System populates the value as part of simulation.	
Limits		
Serial Number	System defaults the value.	
Linkage Type	System defaults the linkage type as "Facility" from back office.	
Linkage Reference Number	System defaults the Linkage reference as part of simulation. User can change the value. Linkages available for the customer should be displayed for selection.	
Linked Percentage	User can enter the value. Maximum is 100. User cannot enter negative values.	
Limit Amount	System defaults the value. System should populate the value based on the contribution percentage.

Sender to Receiver 6	Provide the sender to receiver message.	

Remittance Information

Provide the Payment Details based on the description in the following table:

Field	Description	Sample Values
Payment Detail 1	Provide the payment details.	
Payment Detail 2	Provide the payment details.	
Payment Detail 3	Provide the payment details.	
Payment Detail 4	Provide the payment details.	

Summary

User can review the summary of details updated in Data Enrichment stage of Import Documentary Collection Liquidation process.

The tiles must display a list of important fields with values. User can drill down from respective Summary Tiles into respective data segments.

Tiles Displayed in Summary

- Main Details - User can view details about application details and collection details.
- Party Details - User can view party details like remitting bank, drawee, drawer etc.
- Maturity Details - User can view the maturity details in case usance and multi tenor.
- Documents - User can view the document details.
- Shipment Details - User can view the shipment details.
- Additional Fields - User can view the additional fields.
- FX Linkage - User can view the details of FX Linkage.
- Updated Details - User can view the details updated to the Import Collection.
- Limits and Collaterals - User can view limits and collateral details.
- Charges - User can view charge details.
- Tracers - User can view the tracer details.
- Message Preview - User can view the preview of the simulated messages to remitting bank.
- Other Preferences - User can view the details of the preferences selected.
- Compliance - User can view compliance details. The status must be verified for KYC and to be initiated for AML and Sanction Checks.
- Accounting Details - User can view the accounting entries generated by back office system.

Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Documents	Click the Documents icon to View/Upload the required documents.	

Field	Description	Sample Values
Remarks	<p>Click the Remarks icon to provide any additional information. This information can be viewed by other users processing the request.</p> <p>Content from Remarks field should be handed off to Remarks field in Backend application.</p>	
Overrides	Click to view the overrides accepted by the user.	
View Collection	Enables the user to view the latest collection values displayed in the respective fields.	
Submit	<p>Task will move to next logical stage of Import Documentary Collection Liquidation.</p> <p>If mandatory fields have not been captured, system will display an error message highlighting that the mandatory fields have to be updated. In case of duplicate documents' system will terminate the process after handing off the details to back office.</p>	
Save & Close	<p>Save the details provided and holds the task in 'My Task' queue for further update.</p> <p>This option will not submit the request.</p>	
Cancel	Cancel the Data Enrichment stage inputs. The details updated in this stage are not saved. The task will be available in 'My Task' queue.	
Hold	<p>The details provided will be saved and status will be on hold. User must update the remarks on the reason for holding the task.</p> <p>This option is used, if there are any pending information yet to be received from applicant.</p>	
Reject	<p>On click of Reject, user must select a Reject Reason from a list displayed by the system.</p> <p>Reject Codes:</p> <ul style="list-style-type: none"> ● R1- Documents missing ● R2- Signature Missing ● R3- Input Error ● R4- Insufficient Balance/Limits ● R5 - Others. <p>Select a Reject code and give a Reject Description.</p> <p>This reject reason will be available in the remarks window throughout the process.</p>	

Field	Description	Sample Values
Refer	<p>User must select a Refer Reason from the values displayed by the system.</p> <p>Refer Codes:</p> <ul style="list-style-type: none"> • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others. 	

Exceptions

The Import Collection Booking Liquidation request, before the task moves to the approval stage, the application will validate the Amount Block, KYC and AML. A failure in validation of any of them, the task will reach exception stage for further approval for the exceptions.

Exception - Amount Block

As part of amount block validation, application will check if sufficient balance is available in the account to create an amount block. On hand-off, system will debit the blocked account to the extent earmark and credit charges/ commission account in case of charges block or credit the amount in suspense account for earmarks created for collateral.

The transactions that have failed amount block due to non-availability of amount in respective account will reach the amount block exception stage.

Log in into OBTFPM application, amount block exception queue. Amount block validation failed tasks for trade transactions will be listed in the queue. Open the task to view summary of updated available fields with values.

Exception is created when sufficient balance is not available for blocking the settlement account and the same can be addressed by the approver in the following ways:

Approve:

- Settlement amount will be funded (outside of this process)
- Allow account to be overdrawn during hand-off

Refer:

- Refer back to DE providing alternate settlement account to be used for block.
- Different collateral to be mapped or utilize lines in place of collateral.

Reject:

Reject the transaction due to non-availability of sufficient balance in settlement account

Amount Bock Exception

This section will display the amount block exception details.

Summary

Tiles Displayed in Summary:

- Main Details - User can view and modify details about application details and LC details, if required.
- Party Details - User can view and modify party details like beneficiary, advising bank etc., if required
- Limits and Collaterals - User can view and modify limits and collateral details, if required.
- Charge Details - User can view and modify details provided for charges, if required.

Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Reject	<p>On click of reject, user must select a Reject Reason from a list displayed by the system.</p> <p>Reject Codes:</p> <ul style="list-style-type: none"> • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others. <p>Select a Reject code and give a Reject Description.</p> <p>This reject reason will be available in the remarks window throughout the process.</p>	
Hold	<p>The details provided will be registered and status will be on hold.</p> <p>This option is used, if there are any pending information yet to be received from applicant.</p>	
Refer	<p>User will be able to refer the task back to the Data Enrichment user. User must select a Refer Reason from the values displayed by the system.</p> <p>Refer Codes:</p> <ul style="list-style-type: none"> • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance- Limits • R5 - Others 	
Cancel	<p>Cancel the Import Documentary Collection Liquidation Amount Block Exception check.</p>	
Approve	<p>On approve, application must validate for all mandatory field values, and task must move to the next logical stage.</p>	
Back	<p>Task moves to previous logical step.</p>	

Exception - Know Your Customer (KYC)

As part of KYC validation, application will check if necessary KYC documents are available and valid for the applicant. The transactions that have failed KYC due to non-availability / expired KYC verification will reach KYC exception stage.

Log in into OBTFPM application, KYC exception queue. KYC exception failed tasks for trade finance transactions will be listed in your queue. Open the task, to see summary tiles that display a summary of available updated fields with values.

User can pick up a transaction and do the following actions:

Approve

- After changing the KYC status in the back end application (outside this process).
- Without changing the KYC status in the back end application.
- Reject (with appropriate reject reason).

Summary

Tiles Displayed in Summary:

- Main Details - User can view details about application details and LC details.
- Party Details - User can view party details like applicant, advising bank etc.
- Document Details - User can view document details.
- Draft Details - User can view the draft details.
- Shipment Details - User can view shipment details.
- Charges - User can view charge details.
- Maturity Details - User can view the maturity details.
- Advices - User can view the advices.
- Payment Details - User can view the payment details.
- FX Linkage - User can view the FX Linkage details.
- Settlement Details - User can view the settlement details.
- Message Preview - User can view the preview of the simulating message to the remitting bank.
- Compliance - User can view compliance details. The status must be verified for KYC and to be initiated for AML and Sanction Checks.

Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Reject	<p>On click of Reject, user must select a Reject Reason from a list displayed by the system.</p> <p>Reject Codes:</p> <ul style="list-style-type: none"> • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others. <p>Select a Reject code and give a Reject Description.</p> <p>This reject reason will be available in the remarks window throughout the process.</p>	

Field	Description	Sample Values
Hold	The details provided will be registered and status will be on hold. This option is used, if there are any pending information yet to be received from applicant.	
Refer	User will be able to refer the task back to the Data Enrichment user. User must select a Refer Reason from the values displayed by the system. Refer Codes: <ul style="list-style-type: none"> ● R1- Documents missing ● R2- Signature Missing ● R3- Input Error ● R4- Insufficient Balance- Limits ● R5 - Others 	
Cancel	Cancel the Import Documentary Collection Liquidation KYC exception check.	
Approve	On approve, application must validate for all mandatory field values, and task must move to the next logical stage.	
Back	Task moves to previous logical step.	

Exception - Limit Check/Credit

The transactions that have failed limit check due to non-availability of limits will be available in limit check exception queue for further handling.

Log in into OBTFPM application, limit check exception queue. Limit check exception failed tasks for trade finance transactions must be listed in your queue. Open the task, to see summary tiles that display a summary of important fields with values.

Limit check Exception approver can do the following actions:

Approve

- Limit enhanced in the back end (outside this process).
- Without enhancing limit in the back end.

Refer

- Refer back to DE providing alternate limit id to map
- Refer additional collateral to be mapped

Reject

The transaction due to non-availability of limits capturing reject reason.

Limit/Credit Check

This section will display the amount block exception details.

Summary

Tiles Displayed in Summary:

- Main Details - User can view and modify details about application details and LC details, if required.
- Party Details - User can view and modify party details like beneficiary, advising bank etc., if required
- Availability and Shipment - User can view and modify availability and shipment details, if required.
- Payments - User can view and modify all details related to payments, if required.
- Documents & Condition - User can view and modify the documents required grid and the additional conditions grid, if required.
- Limits and Collaterals - User can view and modify limits and collateral details, if required.
- Charges - User can view and modify charge details, if required.
- Revolving Details - User can view and modify revolving details on revolving LC, if applicable.
- Preview Messages - User can view and modify preview details, if required.
- Compliance - User can view compliance details. The status must be verified for KYC and to be initiated for AML and Sanction Checks.

Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Reject	<p>On click of Reject, user must select a Reject Reason from a list displayed by the system.</p> <p>Reject Codes:</p> <ul style="list-style-type: none"> • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others. <p>Select a Reject code and give a Reject Description.</p> <p>This reject reason will be available in the remarks window throughout the process.</p>

Approve	On approve, application must validate for all mandatory field values, and task must move to the next logical stage.	
Back	Task moves to previous logical step.	

Multi Level Approval

Log in into OBTFPM application and acquire the task available in the approval stage in free task queue. Authorization User can acquire the task for approving.

Authorization Re-Key (Non-Online Channel)

For non online channel, application will request approver for few critical field values as an authorization step. If the values captured match with the values available in the screen, system will allow user to open the transaction screens for further verification. If the re-key values are different from the values captured, then application will display an error message.

Open the task and re-key some of the critical field values from the request in the Re-key screen. Some of the fields below will dynamically be available for re-key.:

- Drawee Name
- Drawer Name
- Bill Currency
- Bill Amount

Re-key is applicable to the first approver in case of multiple approvers. All approvers will however be able see the summary tiles and the details in the screen by drill down from tiles.

The screenshot displays the FuTura Bank OBTFPM application interface. On the left is a navigation menu with categories like Core Maintenance, Dashboard, Maintenance, Security Management, Tasks, and Trade Finance. The main area shows a 'Free Tasks' table with columns for Action, Priority, Application Number, Process Name, Stage, and Back Office Ref No. A modal dialog titled 'Approval Rekey' is open, containing fields for 'Applicant Party' (000262) and 'Application Date' (Feb 1, 2019), both with green checkmarks indicating successful validation. The dialog also has buttons for 'Incoming Message', 'Documents', 'Remarks', 'Proceed', 'Refer', and 'Cancel'. The background table shows several task entries, including 'Import LC Liquidation' and 'Export LC Advising'.

Cancel	Cancel the approval.	
Approve	<p>On approve, application must validate for all mandatory field values, and task must move to the next logical stage. If there are more approvers, task will move to the next approver for approval. If there are no more approvers, the transaction is handed off to the back end system for posting.</p>	

Reject Approval

As a Reject approver, user can review a transaction rejected and waiting for reject confirmation.

Log in into OBTFPM application to view the reject approval tasks for Import Documentary Collection Booking available in queue. On opening the task, you will see summary tiles. The tiles will display a list of important fields with values.

The screen from which the reject was initiated can be seen highlighted in the tile view.

User can drill down from reject summary tiles into respective data segments to verify the details of all fields under the data segment.

Summary

The screen up to which data was captured before reject will be available for the user to view in the summary tile. Other fields will be blank when verified from summary tile.

The data segment in which the task was rejected will have the tiles highlighted in a different colour (red).

- Main Details - User can view details about application details and document under collection.
- Party Details - User can view party details like applicant, Remitting Bank etc.
- Document Details - User can view document details.
- Shipment Details - User can view shipment details.
- Charges - User can view charge details.
- Maturity Details - User can view the maturity details.
- Message Preview - User can view the preview of the simulating message to the remitting bank.

Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Reject Approve	On click of Reject Approve, the transaction is rejected.	
Reject Decline	On click of Reject Decline, the task moves back to the stage where it was rejected. User can update the reason for reject decline in remarks.	
Hold	User can put the transaction on 'Hold'. Task will remain in Pending state.	
Cancel	Cancel the Reject Approval.
