Oracle Banking Trade Finance Process Management

Welcome to the Oracle Banking Trade Finance Process Management (OBTFPM) User Guide. This guide provides an overview on the OBTFPM application and takes you through the various steps involved in creating and processing Trade Finance transactions.

This document will take you through following activities in OBTFPM:
- To create and handle Trade Finance transaction.
- Help users to conveniently create and process Trade Finance transaction

Overview

OBTFPM is a Trade Finance Middle Office platform, which enables bank to streamline the Trade Finance operations. OBTFPM enables the customers to send request for new Trade Finance transaction either by visiting the branch (offline channels) or through SWIFT/Trade Portal/other external systems (online channels).

Benefits

OBTFPM helps banks to manage Trade Finance operations across the globe in different currencies. OBTFPM allows you to:
- Handle all Trade Finance transactions in a single platform.
- Provides support for limit verification and limit earmarking.
- Provide amount block support for customer account.
- Provides acknowledgement to customers.
- Enables the user to upload related documents during transaction.
- Enables to Integrate with back end applications for tracking limits, creating limit earmarks, amount blocks, checking KYC, AML and Sanction checks status.
- Create, track and close exceptions for the above checks.
- Enables to use customer specific templates for fast and easy processing of trade transactions that reoccur periodically.

Key Features

- Stand-alone system that can be paired with any back end application.
- Minimum changes required to integrate with bank's existing core systems.
- Faster time to market.
- Capable to interface with corporate ERP and SWIFT to Corporate.
- Highly configurable based on bank specific needs.
- Flexibility in modifying processes.

ORACLE®

Import LC Closure

This process handles the Import LC Closure request.

This section contains the following topics:

Common Initiation Stage	Registration
Data Enrichment	Multi Level Approval
Reject Approval	

Common Initiation Stage

The user can initiate the new Import LC Closure from the common Initiate Task screen.

1. Using the entitled login credentials, login to the OBTFPM application.

2. Click **Trade Finance > Initiate Task.**
Provide the details based on the description in the following table:

Field	Description
Process Name	Select the process name to initiate the task.
Documentary Credit Number	Select the Documentary Credit Number.
Branch	Select the branch.

ORACLE®

Action Buttons

Use action buttons based on the description in the following table:

Field	Description
Proceed	Task will get initiated to next logical stage.
Clear	The user can clear the contents update and can input values again.

Registration

The Import LC Closure request received will be initiated in the Registration Stage.

1. Using the entitled login credentials for Registration stage, login to the OBTFPM application.

2. On login, user must be able to view the dashboard screen with widgets as mapped to the user.
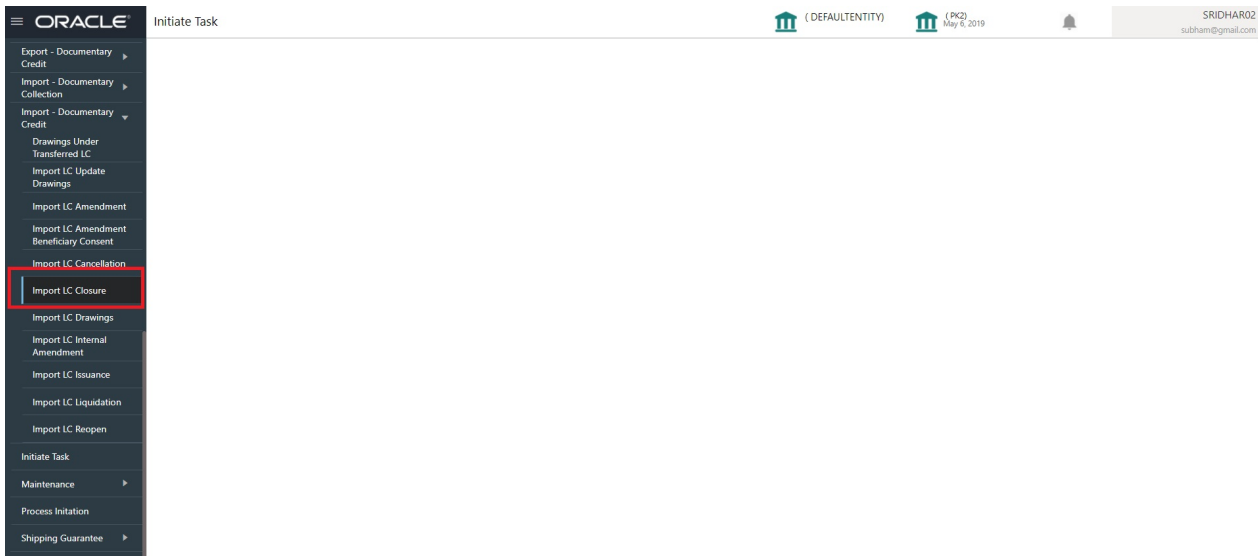

ORACLE®

3. Click **Trade Finance> Import Documentary Credits> Import LC Closure.**

The Registration stage has two sections Application Details and LC Details. Let's look at the details of Registration screens below:

Application Details

Provide the Application Details based on the description in the following table:

Field	Description	Sample Values
Documentary Credit Number	Provide the documentary credit number. Alternatively, user can search the documentary credit number using LOV. In LOV search/advanced LOV search, user can input Customer ID, Beneficiary, Currency, Amount and User Reference to fetch the LC details. Based on the search result, select the applicable LC to be closed.	

Field	Description	Sample Values
Received From - Customer ID	Read only field. Customer ID will be auto-populated based on the selected LC.	001344
Customer Name	Read only field. Customer Name will be auto-populated based on the selected LC.	EMR & CO
Branch	Read only field. Branch details will be auto-populated based on the selected LC.	203-Bank Futura -Branch FZ1
Process Reference Number	Unique OBTFPM task reference number for the transaction. This is auto generated by the system based on process name and branch code.	
Priority	System will default the Priority as Low/Medium/High based on maintenance.	High
Submission Mode	Select the submission mode of Import LC Closure request. By default the submission mode will have the value as 'Desk'. **Desk-** Request received through Desk **Fax-** Request received through Fax **Email-** Request received through Email **Courier-** Request received through Courier	Desk
Closure Date	By default, the application will display branch's current date. **Note** Future date selection is not allowed.	04/13/2018
Customer Reference Number	User can enter the 'Reference number' provided by the applicant/ applicant bank. Enables the user to provide a unique Customer Reference Number for the closure.	

ORACLE®

LC Details

Provide the LC Details based on the description in the following table:

Field	Description	Sample Values
LC Type	Read only field. LC type will be populated based selected LC using documentary credit number.	
Product Code	Read only field. This field displays the product code of the selected LC.	
Product Description	Read only field. This field displays the description of the product as per the product code.	
Advising Bank	Read only field. This field displays the advising bank details (if provided) of the selected LC.	
40A - Form of Documentary Credit	Read only field. This field displays the form of documentary credit details of the selected LC.	
Date of Issue	Read only field. This field displays the LC issuance date.	
Applicable Rules	Read only field. This field displays the rules of the selected LC.	
Date Of Expiry	Read only field. This field displays the expiry date of the selected LC.	09/30/18
Place of Expiry	Read only field. This field displays the place of expiry of the selected LC.	
Applicant Bank	Read only field. This field displays the applicant bank details of the selected LC.	

ORACLE®

Field	Description	Sample Values
Applicant	Read only field. This field displays the details of the applicant of the selected LC.	
Beneficiary	Read only field. This field displays the beneficiary details of the selected LC.	
Currency Code, Amount	Read only field. This field displays the value of LC along with the currency details of the selected LC.	
Amount In Local Currency	Read only field. This field displays the amount of LC along in local currency.	
Percentage Credit Amount Tolerance	Read only field. This field displays the percentage credit amount tolerance details of the selected LC.	
Additional Amount Covered	Read only field. This field displays the details of additional amount covered of the selected LC.	
Shipping Guarantee Reference	Read only field. This field displays the details of additional amount covered of the selected LC.	

Miscellaneous

Provide the Miscellaneous Details based on the description in the following table:

Field	Description	Sample Values
Documents	Upload the documents received under the Documentary Collection.	

| Field	Description	Sample Values
Remarks	Provide any additional information regarding the collection. This information can be viewed by other users handling the request.	
Checklist	Make sure that the details in the checklist are completed and acknowledge. If mandatory checklist items are not selected, system will display an error on submit.	
View LC	Enables user to view the details of the LC.	
Action Buttons		
Submit	On submit, task will move to next logical stage of Import LC Closure. If mandatory fields have not been captured, system will display an error message until the mandatory fields data are provided.

Cancel	Cancels the Import LC Closure. Details entered will not be saved and the task will be removed.	
Hold	The details provided will be saved and status will be on hold.User must update the remarks on the reason for holding the task. This option is used, if there are any pending information yet to be received from applicant.	

Data Enrichment

As part of Data Enrichment, user can enter/update details of the Import LC Closure.

Do the following steps to acquire a task at Data enrichment stage:

ORACLE®

1. Using the entitled login credentials for Data Enrichment stage, login to the OBTFPM application.

2. On login, user must be able to view the dashboard screen with widgets as mapped to the user profile.

ORACLE®

3. Click **Trade Finance> Tasks> Free Tasks.**

4. Select the appropriate task and click **Acquire & Edit** to edit the task or click **Acquire** to edit the task from **My Tasks** tab.

5. The acquired task will be available in **My Tasks** tab. Click **Edit** to provide input for Data Enrichment stage.

The Data Enrichment stage has five sections as follows:

- Main Details

ORACLE®

- Advices
- Additional Details
- Summary

Let's look at the details for Data Enrichment stage. User must be able to enter/update the following fields.

Main Details

Main details section has two sub section as follows:

- Application Details
- LC Details

Application Details

All fields displayed under Basic details section, would be read only except for the **Priority**. Refer to Application Details for more information of the fields.

Following field can be amended based on the description provided in the following table:

Field	Description	Sample Values
Priority	User can change the priority defaulted' Values are High, Medium and Low.	High

ORACLE®

LC Details

The fields listed under this section are same as the fields listed under the LC Details section in Registration. Refer to LC Details for more information of the fields. During Registration, if user has not captured input, then user can capture the details in this section.

Action Buttons

Use action buttons based on the description in the following table:

Cancel	Cancel the Data Enrichment stage inputs. The details updated in this stage are not saved. The task will be available in 'My Task' queue.	
Hold	The details provided will be saved and status will be on hold.User must update the remarks on the reason for holding the task. This option is used, if there are any pending information yet to be received from applicant.	

ORACLE®

Field	Description	Sample Values
Reject	On click of Reject, user must select a Reject Reason from a list displayed by the system. Reject Codes: ● R1- Documents missing ● R2- Signature Missing ● R3- Input Error ● R4- Insufficient Balance/Limits ● R5 - Others. Select a Reject code and give a Reject Description. This reject reason will be available in the remarks window throughout the process.	
Refer	User must select a Refer Reason from the values displayed by the system. Refer Codes: ● R1- Documents missing ● R2- Signature Missing ● R3- Input Error ● R4- Insufficient Balance/Limits ● R5 - Others.	
Next	On click of Next, system should validate if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment.	

Advices

Advices menu displays the advices from the back office as tiles. User can edit the fields in the tile, if required.

DE User can view the Advices generated for Import LC Closure process.

ORACLE®

The user can also suppress the Advice, if required.

Field	Description	Sample Values
Suppress Advice	**Toggle on**: Switch on the toggle if advice is suppressed. **Toggle off**: Switch off the toggle if suppress advice is not required for the amendments	
Advice Name	User can select the instruction code as a part of free text.	
Medium	The medium of advices is defaulted from the system. User can update if required.	
Advice Party	Value be defaulted from Guarantee /SBLC Issuance. User can update if required.	
Party ID	Value be defaulted from Guarantee /SBLC Issuance. User can update if required.	

Field	Description	Sample Values
Party Name	Read only field. Value be defaulted from Guarantee /SBLC Issuance.	
Free Format Text		
FTT Code	User can select the FFT code as a part of free text.	
FFT Description	FFT description is populated based on the FFT code selected.	
+	Click plus icon to add new FFT code.	
–	Click minus icon to remove any existing FFT code.	
Instruction Details		
Instruction Code	User can select the instruction code as a part of free text.	
Instruction Description	Instruction description is populated based on the FFT code selected.	
+	Click plus icon to add new instruction code.	
–	Click minus icon to remove any existing instruction code.	

Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Documents	User can see the documents uploaded.	
Remarks	User can capture remarks as well as see remarks made in the earlier screens/stages.	
Overrides	Click to view the overrides accepted by the user.	

ORACLE®

Field	Description	Sample Values
Refer	User must select a Refer Reason from the values displayed by the system. Refer Codes: • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others.	
Save & Close	Save the information provided and holds the task in for working later. This option will not submit the request.	
Cancel	Cancel the Data Enrichment stage inputs.	
Hold	The details provided will be on hold. This option is used, if there are any pending information yet to be received from applicant and appropriate remarks must be provided.	
Reject	On click of Reject, user must select a Reject Reason from a list displayed by the system. This reject reason will be available in the remarks window throughout the process.	
Next	On click of Next, system should validate if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment.	
Back	Click of Back to move the task to the previous segment.	

ORACLE®

Additional Details

Charge Details

This section displays charge details:

Field	Description	Sample Values
Component	Charge Component type.	
Currency	Defaults the currency in which the charges have to be collected.	
Amount	An amount that is maintained under the product code gets defaulted in this field.	
Modified	From the default value, if the rate is changed or the amount is changed, the value gets updated in the modified amount field.	

Field	Description	Sample Values
Billing	If charges are handled by separate billing engine, then by selecting billing the details to be available for billing engine for further processing. On simulation of charges/commission from Back Office, if any of the Charges/Commission component for the customer is 'Billing' enabled, 'Billing' toggle for that component should be automatically checked in OBTFPM. The user can not select/de-select the check box if it is de-selected by default. This field is disabled, if 'Defer' toggle is enabled.	
Defer	If charges have to be deferred and collected at any future step, this toggle has to be enabled. On simulation of charges/commission from Back Office, if any of the Charges/Commission component for the customer is AR-AP tracking enabled, 'Defer' toggle for that component should be automatically checked in OBTFPM. The user can select/de-select the check box. On de-selection the user has to click on 'Recalculate' charges button for re-simulation.	
Waive	If charges have to be waived, this toggle has to be enabled. Based on the customer maintenance, the charges should be marked for Billing or for Defer. This field is disabled, if 'Defer' toggle is enabled.	
Charge Party	Charge party will be applicant by default. You can change the value to beneficiary	
Settlement Account	Details of the settlement account.	

This section displays the commission details:

Field	Description	Sample Values
Component	This field displays the commission component.	

ORACLE®

Field	Description	Sample Values
Rate	Defaults from product. The commission rate, if available in Back Office defaults in OBTFPM. The user is able to change the rate. If flat commission is applicable, then commission amount defaulted from back office is modifiable by the user. Rate field will be blank and the user cannot modify the Rate field.	
Modified	From the default value, if the rate or amount is changed, the modified value gets updated in the modified amount field.	
Currency	Defaults the currency in which the commission needs to be collected	
Amount	An amount that is maintained under the product code defaults in this field. The commission rate, if available in Back Office defaults in OBTFPM. The user is able to change the rate, but not the commission amount directly. The amount gets modified based on the rate changed and the new amount is calculated in back office based on the new rate and is populated in OBTFPM. If flat commission is applicable, then commission amount defaulted from back office is modifiable by the user. Rate field will be blank and the user cannot modify the Rate field.	
Defer	If this toggle is enabled, charges/commissions has to be deferred and collected at any future step.	
Waive	Based on the customer maintenance, the charges/commission can be marked for Billing or Defer. If the defaulted Commission is changed to defer or billing or waive, system must capture the user details and the modification details in the 'Remarks' place holder.	
Charge Party	Charge party will be 'Applicant' by Default. You can change the value to Beneficiary	
Settlement Account	Details of the Settlement Account.	

The tax component is calculated based on the commission and defaults if maintained at product level. User cannot update tax details and any change in tax amount on account of modification of charges/ commission will be available on click of Re-Calculate button or on hand off to back-end system.

ORACLE®

This section displays the tax details:

Tax Details

Component	Currency	Amount	Billing	Defer	Settlement Account
LCTAX	GBP	£520.00			PK20010440017
LCTAX1	GBP	£4.00			PK20010440017

Save & Close   Cancel

Field	Description	Sample Values
Component	Tax Component type	
Currency	The tax currency is the same as the commission.	
Amount	The tax amount defaults based on the percentage of commission maintained. User can edit the tax amount, if required.	
Billing	If charges/commission/taxes are handled by separate billing engine, then by selecting billing the details to be available for billing engine for further processing.	
Defer	If charges/commission/taxes have to be deferred and collected at any future step, this toggle has to be enabled.	
Settlement Account	Details of the settlement account.	

Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Documents	Click the Documents icon to View/Upload the required documents.	
Remarks	Click the Remarks icon to provide any additional information. This information can be viewed by other users processing the request. Content from Remarks field should be handed off to Remarks field in Backend application.	
Overrides	Click to view the overrides accepted by the user.	
View LC	Enables user to view the details of the LC.	
View LC Events	Click this button to view all the Undertaking events under the LC Issued till date.	

ORACLE®

Field	Description	Sample Values
Save & Close	Save the details provided and holds the task in 'My Task' queue for further update. This option will not submit the request.	
Cancel	Cancel the Data Enrichment stage inputs. The details updated in this stage are not saved. The task will be available in 'My Task' queue.	
Hold	The details provided will be saved and status will be on hold.User must update the remarks on the reason for holding the task. This option is used, if there are any pending information yet to be received from applicant.	
Reject	On click of Reject, user must select a Reject Reason from a list displayed by the system. If mandatory fields have not been captured, system will display an error message highlighting that the mandatory fields have to be updated. In case of duplicate documents' system will terminate the process after handing off the details to back office.	
Save & Close	Save the details provided and holds the task in 'My Task' queue for further update. This option will not submit the request.	
Cancel	Cancel the Data Enrichment stage inputs. The details updated in this stage are not saved. The task will be available in 'My Task' queue.	
Hold	The details provided will be saved and status will be on hold.User must update the remarks on the reason for holding the task. This option is used, if there are any pending information yet to be received from applicant.	
Reject	On click of Reject, user must select a Reject Reason from a list displayed by the system. Reject Codes: • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others. Select a Reject code and give a Reject Description. This reject reason will be available in the remarks window throughout the process.	
Refer	User must select a Refer Reason from the values displayed by the system. Refer Codes: • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others.	

Multi Level Approval

Log in into OBTFPM application and acquire the task available in the approval stage in free task queue. Authorization User can acquire the task for approving.

ORACLE®

Summary

Tiles Displayed in Summary:

- Main Details - User can view details about application details and LC details.
- Party Details - User can view party details like applicant, advising bank etc.
- Charges - User can view charge details.
- Limit Details - User can view limit details.
- Compliance - User can view compliance details. The status must be verified for KYC and to be initiated for AML and Sanction Checks.

Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Reject	On click of Reject, user must select a Reject Reason from a list displayed by the system. Reject Codes: • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others. Select a Reject code and give a Reject Description. This reject reason will be available in the remarks window throughout the process.	
Hold	The details provided will be registered and status will be on hold. This option is used, if there are any pending information yet to be received from applicant.	

ORACLE®

Field	Description	Sample Values
Refer	User will be able to refer the task back to the Data Enrichment user.User must select a Refer Reason from the values displayed by the system. Refer Codes: - R1- Documents missing - R2- Signature Missing - R3- Input Error - R4- Insufficient Balance- Limits - R5 - Others	
Cancel	Cancel the approval.	
Approve	On approve, application must validate for all mandatory field values, and task must move to the next logical stage. If there are more approvers, task will move to the next approver for approval. If there are no more approvers, the transaction is handed off to the back end system for posting.	

Reject Approval

As a Reject approver, user can review a transaction rejected and waiting for reject confirmation.

Log in into OBTFPM application to view the reject approval tasks for Import Documentary Collection Booking available in queue. On opening the task, you will see summary tiles. The tiles will display a list of important fields with values.

The screen from which the reject was initiated can been seen highlighted in the tile view.

 User can drill down from reject summary tiles into respective data segments to verify the details of all fields under the data segment.

Summary

The screen up to which data was captured before reject will be available for the user to view in the summary tile. Other fields will be blank when verified from summary tile.

The data segment in which the task was rejected will have the tiles highlighted in a different colour (red).

- Main Details - User can view details about application details and document under collection.
- Party Details - User can view party details like applicant, Remitting Bank etc.
- Document Details - User can view document details.
- Shipment Details - User can view shipment details.
- Charges - User can view charge details.
- Maturity Details - User can view the maturity details.
- Message Preview - User can view the preview of the simulating message to the remitting bank.

ORACLE®
