2. Musharaka Corporate Islamic Financing

Oracle FLEXCUBE facilitates Corporate Islamic Financing through a process flow. The process of Musharaka refers to joint partnership, where the Bank and the customer combine their capital in forming a business. The Amount financed is the bank's share and the down payment amount is the customer's share in a typical Musharaka finance contract. Based on these values, the percentage sharing ratio between the Bank and the customer is displayed. Loss is distributed exactly according to the ratio of investment and the profit is divided according to the agreement of the partners.

This chapter contains the following topics:

- [Section 2.1, "Process Flow Diagram"](#)
- [Section 2.2, "Process Matrix"](#)
- [Section 2.3, "Stages in Corporate Islamic Financing Process Flow"](#)
- [Section 2.4, "Corporate Islamic Financing Application Details"](#)
- [Section 2.5, "Manual Liquidation"](#)

2.1 Process Flow Diagram

You can acquire a task by performing the following tasks:

1. Search for the application from the Quick search / Standard search options (or) look for the application in the assigned Queue.
2. Select the task and click on Acquire button.

All tasks that have been successfully completed are listed in the right side of the screen. Select the check box against your 'Workflow Ref No' and click 'Acquire' button at the top of the screen to acquire the next stage of the task.

The system displays the message as 'Acquire Successful' on successful acquisition of the task.

Click 'Ok' to proceed to the next stage. To select the acquired task for the next stage, select 'Acquired' under 'Standard' option in the 'Task' menu. All the tasks that have been successfully acquired are displayed in the right side of the screen. Search for your workflow reference number and click the 'Workflow Ref No' to open the required screen.

2.3 Stages in Corporate Islamic Financing Process Flow

. Musharaka process flow uses Oracle BPMN framework with multiple human tasks for workflow stages. The capture and enrichment of information in multiple steps can be dynamically assigned to different user roles, so that multiple users can take part in the transaction. Oracle Business rules are used for dynamic creation of multiple approval stages.

Following are the stages involved in Musharaka Corporate Islamic Financing:

Step 1. Financing Transaction Initiation

In the application entry stage, you can initiate the Musharaka contract and capture the requested details. The system populates the applicants details maintained. You can capture the purchase details of the asset in the Purchase Details tab. The system defaults the Asset type from the product. Click 'Multiple Asset' button to enter the details about the asset. You can pull Lead data and simulate application details. You can attach interactions to the application and upload the documents maintained for this stage.

Step 2. Application Follow-up

At this stage, you can upload the documents collected from the applicant and follow up if necessary documents are not submitted by the applicant. The Document Support team verifies and uploads the documents which are provided by the customer. The system does not allow modification of any other data in this stage. The collected documents are scanned and uploaded along with application.

Step 3. Application Enrichment

At this stage, the application is enriched with the details like Director Details, Financial Details, Linkages, and so on. The user can modify the customer details, if required. In this stage, the user can enter the asset details and multiple asset details. The system validates duplication of applications and applicants for CIF, CASA, Collaterals, Facilities, Cheque Book validation during SAVE operation.

Step 4. Underwriting Pre-Qualification

In this stage, the Credit Admin retrieves the documents and reviews it. Financial statements are put in a standard template and basic analysis is done including bank policy Islamic financing norms compliance checks. Details such as Terms and Conditions, Deviations, Summary, Comments, Documents can be captured in this stage.

Step 5. Underwriting Pre-Qualification Approval

At this stage, underwriter reviews the basic analysis done by the credit along with the application and supporting documents. Underwriter will decide whether to proceed with the deal or not based on the given information. The system allows modification of initial credit analysis done.

The underwriter evaluates the financial documents and project details provided by the customer and prepares the initial credit write up in this stage that includes standard set of terms and conditions. This credit write up is submitted to the credit admin for review and support. The system does not allow modification of customer data and other data provided in the previous stages.

Step 6. Risk Evaluation

At this stage, the user can evaluate the risk associated with the applicant and the application. The user can capture the risk based on credit scores and credit ratios . The user can perform horizontal and vertical analysis. The system does not allow modification of customer data and other data provided in the previous stages.

Step 7. Legal Verification

At this stage, any legal constraints associated with the applicant and the finance application are evaluated. The system does not allow modification of customer data and other data provided in the previous stages.

Step 8. Credit Analysis

In this stage, the Underwriter evaluates the financial documents and project details provided by the customer. The underwriter prepares the initial credit write up in this stage that includes standard set of terms and conditions. This credit write up is submitted to the credit admin for review and support. The system does not allow modification of customer data and other data provided in the previous stages.

Step 9. Collateral Evaluation

At this stage, the collaterals submitted for the finance application are evaluated. After evaluation the details are passed on to the underwriter. In case, if the collateral is new, then Collateral Creation process flow is initiated. The system does not allow modification of customer data and requested details in this stage.

Step 10. Underwriting Proposal Preparation

At this stage, the credit admin evaluates the application based on the inputs from the previous stages. The credit admin will review the initial credit write up and decides to support or reject the application. The credit admin will also have the option to send the application to underwriter for revision. The underwriter arrives at the interest rate, tenor and the charges, based on the evaluation of the application with details and analysis performed so far. The Underwriter prepares the final credit recommendation summary that will include all aspects of the deal like borrower details, finance details, underwriting details, pricing, justification for recommendation and final term sheet.

Step 11. Underwriting Proposal Review

At this stage, the Credit Admin reviews the credit recommendation summary. If there is any error, then the credit admin routes the application back to underwriter for rectification. The system does not allow any modification of details in this stage by the credit admin.

Step 12. Application Modification

At this stage, the user modifies the application details as per the underwriter review comments. The user interacts the customer, in case of additional documents which are required for further processing as mentioned by the reviewer. In case of any additional approval, the modified application is sent back to underwriter for pre-qualification approval.

Step 13. Sanction Approval

At this stage, the Credit Admin approves or rejects the application based on the credit recommendation summary. The Credit Admin can add comments justifying the sanction. The system does not allow modification of data provided in earlier stages. The system generates the sanction letter for approval or regret letter for rejection as the case may be and send it to the account manager.

Step 14.Sanction Letter Review

At this stage, the account manager reviews the sanction letter or regret letter and sends it to the borrower.

Step 15.Customer Sign-off

At this stage, the customer signs off the sanction letter acknowledging the terms mentioned therein. The document support team receives the signed copy of the sanction letter and uploads the same on to the system. If the borrower rejects the sanction, the application is terminated in this stage. The system does not allow modification of data provided in earlier stages.

Step 16.Documentation and TC Verification

At this stage, the finance documentation team prepares the finance documents for execution by the borrower. Once the documents are ready, it is sent to the borrower for sign off. The details entered in earlier stages cannot be modified.

Step 17.Documentation Follow Up

At this stage, a follow up is done on the mandatory documents, which are yet to be collected from the customer or the borrower. Once the documents are received, it is sent to the borrower for sign off. The details entered in earlier stages cannot be modified.

Step 18.Down Payment

At this stage, the user can do Down Payment for the contract. This is an optional stage. The task will come to this stage only when Down Payment amount is given. Down Payment can be done before or after finance account creation. The user can give the details about the payment amount and settlement account and proceed.

If the user has not given the payment details and preceded, then down payment will not happen for the account and will move to the next stage, but system will throw an override.

If the down payment is done before account creation, then once the account is created system will automatically link the down payment reference number to the finance account on creation.

If the down payment amount is not null and if down payment is not done, then account will be created in 'Uninitiated' status. Once the user does down payment for the entire down payment amount, the account status will be changed to 'Initiated'.

Step 19.Manual Retry

For any exception during the hand off/ unavailability of CI service, the instance is moved to Manual retry stage where the user is allowed to manually re-initiate the core hand off after core validation.

Step 20.Final Documentation

This stage is visited only if the 'Final Documentation Required' flag is checked in the 'Documents & TC Verification' stage. At this stage, documentation team will prepare the finance documents for execution.

Step 21. Vendor Payment

At this stage, the user can do vendor payment for the contract in this stage. The system populates the vendor details for the assets in 'Vendor Payment Details' block.

The user can enter the product code, payment currency and fund ID details. The total amount paid will get populated which will be the sum of the amount paid to all vendors. The payment details for each vendor and asset can be entered in the multiple entry blocks. On save, the vendor payment happens based on the details given and the task will proceed to the next stage.

Step 22. Sale Confirmation

At this stage, after checking with customer, the bank user confirms the sale of the property. Post confirmation, the task is moved to user acceptance.

Step 23. User Acceptance

At this stage, withdrawal from the lease contract due to some reasons after finance account creation is possible.

Step 24. Manual Liquidation

At this stage, if the disbursement has happened and user has rejected the offer, then there will be a provision to liquidate the contract. For liquidation, full disbursed amount should be selected.
