1. Setting up Oracle FLEXCUBE Installer

1.1 Introduction

Before installing Oracle FLEXCUBE, you need to set up Oracle FLEXCUBE Installer on the server. This document explains the methods of setting up the installer.

The Oracle FLEXCUBE Installer picks up the source files from the Source Directory and builds the enterprise archive file. The enterprise archive file is then deployed on the Application Server using the Application Server admin console.

1.2 Scope of Installer

Building Application	Application building describes the process of creating property file with the required plug-ins and corresponding plug-in related properties, It also explains the process of building an application.		Mandatory installer components
			JDK Path
Deploying Application	Application deployment will create the resources in the selected application server and deploy the selected application in the application server		JDK PATH Application sever home
	WEBLOGIC	Deploying application in weblogic will create the resources required for deployment of an application in the weblogic server and deploy the selected application in the weblogic.	
	WEBSHERE	Deploying application in websphere will deploy the selected application in websphere.	
Database	This section describes the basic instructions for setting up the database, it explains the steps for Preparing schema from Baseline, compiling objects, loading static data setup and it also explains the step by step instructions for running Basic setup. It also explains the steps for Preparing schema from Baseline and loading data from dump and also explains the instructions for compiling objects and loading static data and imp dump		JDK path Oracle Home

1.3 Running Oracle FLEXCUBE Installer on Windows

Source folder in the local system appears as below:

Follow the steps given below to run the installer in Windows:

1. Invoke the installer by double-clicking 'FCUBSInstaller.bat' from the installer source folder.
2. You get a prompt to enter the Java Home Path. Enter the Java Home Path and press 'Enter' key. This is a mandatory field and the value entered is validated.

Refer Release Notes for valid JDK version

```
C:\Windows\system32\cmd.exe

Enter APPSERVER HOME Directory:c:\Software\Weblogic12211\wlserver_
```

5. The INSTALLER Welcome screen is displayed.
6. Proceed with installation process.

 On the first time launch of the installer on a system, all the fields in the installer will be displayed according to the values entered by the user at the command line level and the same data is saved in env.properties.

On subsequent launches of installer on the same machine, the installer will read the paths from env.properties and display in the respective fields.

The screenshot shows the 'Oracle FLEXCUBE Investor Servicing' prerequisites window. The title bar includes the Oracle logo. The main content area is titled 'Prerequisites' and contains the instruction: 'Please specify the JDK and Oracle Home path.' Below this, there are four fields: 'JDK Path' with the value 'C:/Software/Java/jdk1.8.0_91', 'Oracle Home' with 'C:/Software/Oracle12c/product/12.1.0/dbhome_1', 'Application Server Home' with 'C:/Software/Weblogic12211/wlserver', and 'Application Server Location' with a dropdown menu set to 'Local'. Each path field has a folder icon to its right. At the bottom, there are four buttons: 'Log', 'Back', 'Next', and 'Exit'.

 If you re-launch the installer which was closed abruptly, the following screen is displayed.

```
C:\windows\system32\cmd.exe
Flex Cube UBS : Release 11.4.0.0.0 - Production on 11:14:29.94 Fri 09/28/2012
Copyright (c) 2012, Oracle Financial Services Software Ltd. All rights reserved.

Checking the write permissions....
checking whether Installer is running....
Installer is already running.
Please manually delete the chk.flg file in order to continue.
Press any key to continue . . . _
```

In this case, you have to delete the file 'chk.flg', created in the installer sources and again re-launch the Installer.

1.4 Running Oracle FLEXCUBE Installer on LINUX

This section describes the method to run Oracle FLEXCUBE Installer on LINUX system.

1.4.1 Login to PUTTY

In order to run installer on LINUX machines, you need to login to the LINUX machine using PuTTY. Go to 'PuTTY Configuration' screen.

1. Specify the following details:

Host Name

Specify the host address of LINUX machine which you need to connect.

Protocol

Select SSH as the protocol.

2. Once you have provided these details, click 'Open'. You will be prompted for the login ID and password of the LINUX machine.

```
fcubs@IPL143DOR:~  
[fcubs@IPL143DOR ~]$ echo $SHELL  
/bin/bash  
[fcubs@IPL143DOR ~]$ cd #HOME  
[fcubs@IPL143DOR ~]$ pwd  
/home/fcubs  
[fcubs@IPL143DOR ~]$
```

3. Specify the login details:

You can check the current shell for the user in putty console using the following command.

echo \$SHELL

In case the current shell is not bash, you need to set the shell to bash.

You can check the user home directory using the following command.

cd \$HOME

\$pwd

1.4.2 Running Oracle FLEXCUBE Installer through XManager

In order to run Oracle FLEXCUBE Installer on LINUX machine, you need to have the software called XManager. This section contains the settings required for running Oracle FLEXCUBE Installer through XManager on LINUX machines.

Install XManager. You can find an icon 'Xstart' inside XManager folder. Double-click 'Xstart' icon in order to connect to the server. The following screen is displayed.

1. Specify the following details:

Session

Specify the session name.

Host

Specify the LINUX machine IP address.

Protocol

Specify the protocol based on the the operating system.

A few examples for the protocols for various operating systems are given below:

Operating System	Protocol
Oracle Enterprise Linux	SSH

User Name

Specify the LINUX user name.

Password

Specify the password for the LINUX user name.

Excution Command

Specify the execution command based on the operating system.

Operating System	Execution Command
Oracle Enterprise Linux	/usr/bin/xterm -ls -display \$DISPLAY

2. Once you have specified the details, click 'Run'. The Xstart Console window is displayed.

```
fcubs@IPL143DOR: ~/test/GatewayInstaller/SOURCE
[fcubs@IPL143DOR SOURCE]$ ls
build.xml          FCUBSInstaller.jar  Library          nbproject_build
config            FCUBSInstaller.sh  logs            nbproject_dist
%DOMAIN_HOME%    Images              MANIFEST.MF     ScriptTest.sh
FCUBSInstaller.bat InstallOptions      nbproject       src
[fcubs@IPL143DOR SOURCE]$ ./FCUBSInstaller.sh
```

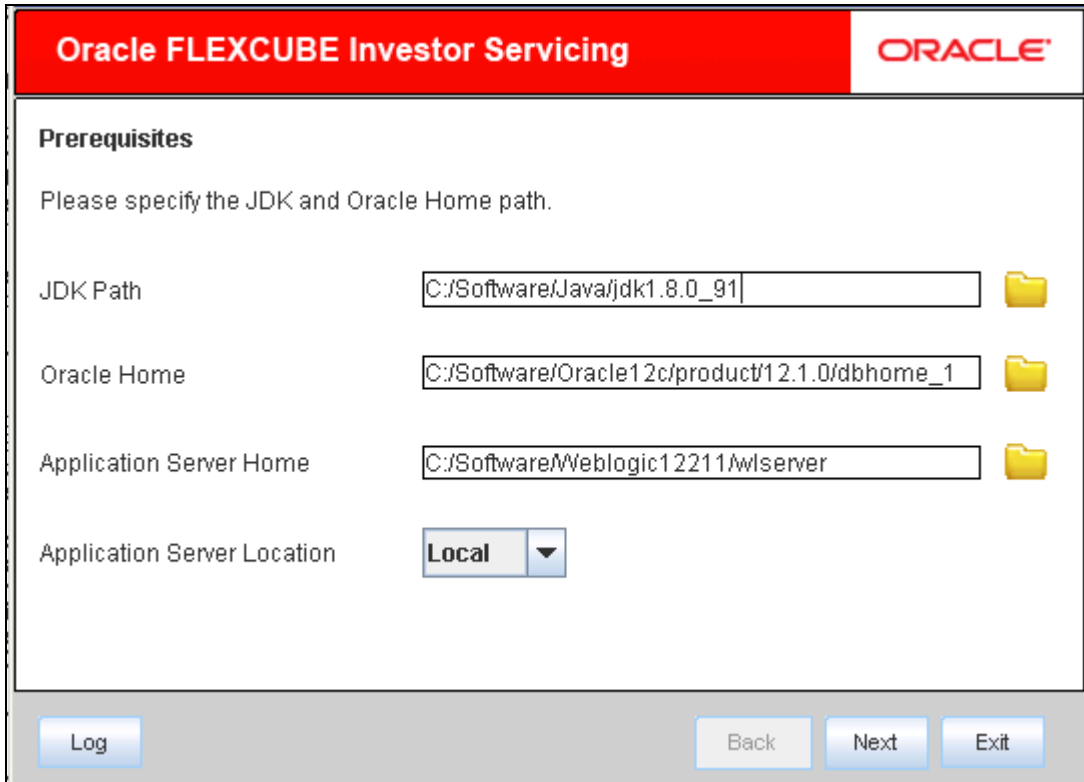

3. Use the following command to list the files present in the directory:

ls

In order to run the installer, you need to invoke the 'FCUBSInstaller.sh' file using the following command.

./FCUBSInstaller.sh OR sh FCUBSInstaller.sh

The command starts the installer. The User will be prompted to enter the JAVA Home (mandatory), Application Server Home(Optional) AND ORACLE Home (Optional) after which the following screen is displayed.

The screenshot shows the Oracle FLEXCUBE Investor Servicing installer prerequisites screen. The title bar is red with the text "Oracle FLEXCUBE Investor Servicing" and the Oracle logo. Below the title bar, the text "Prerequisites" is displayed. A message reads: "Please specify the JDK and Oracle Home path." There are four input fields: "JDK Path" with the value "C:/Software/Java/jdk1.8.0_91", "Oracle Home" with the value "C:/Software/Oracle12c/product/12.1.0/dbhome_1", "Application Server Home" with the value "C:/Software/Weblogic12211/wlserver", and "Application Server Location" with a dropdown menu set to "Local". Each path field has a folder icon to its right. At the bottom of the window, there are four buttons: "Log", "Back", "Next", and "Exit".

4. Proceed with installation process.

 On the first time launch of the installer on a system, all the fields in the installer will be displayed according to the values entered by the user at the command line level and the same data is saved in env.properties.

On subsequent launches of installer on the same machine, the installer will read the paths from env.properties and display in the respective fields.

The screenshot shows the Oracle FLEXCUBE Investor Servicing installer prerequisites screen. The title bar is red with the text "Oracle FLEXCUBE Investor Servicing" and the Oracle logo. The main content area is white and contains the following fields:

- Prerequisites**
Please specify the JDK and Oracle Home path.
- JDK Path**: 
- Oracle Home**: 
- Application Server Home**: 
- Application Server Location**: 

At the bottom of the window, there are four buttons: "Log", "Back", "Next", and "Exit".

5. Proceed with installation process.

The 'Installer folder and the Destination folder must be present in the LINUX server with full access permissions.

2. Running Oracle FLEXCUBE Installer in Silent Mode

This section describes the method to run Oracle FLEXCUBE Installer in silent mode.

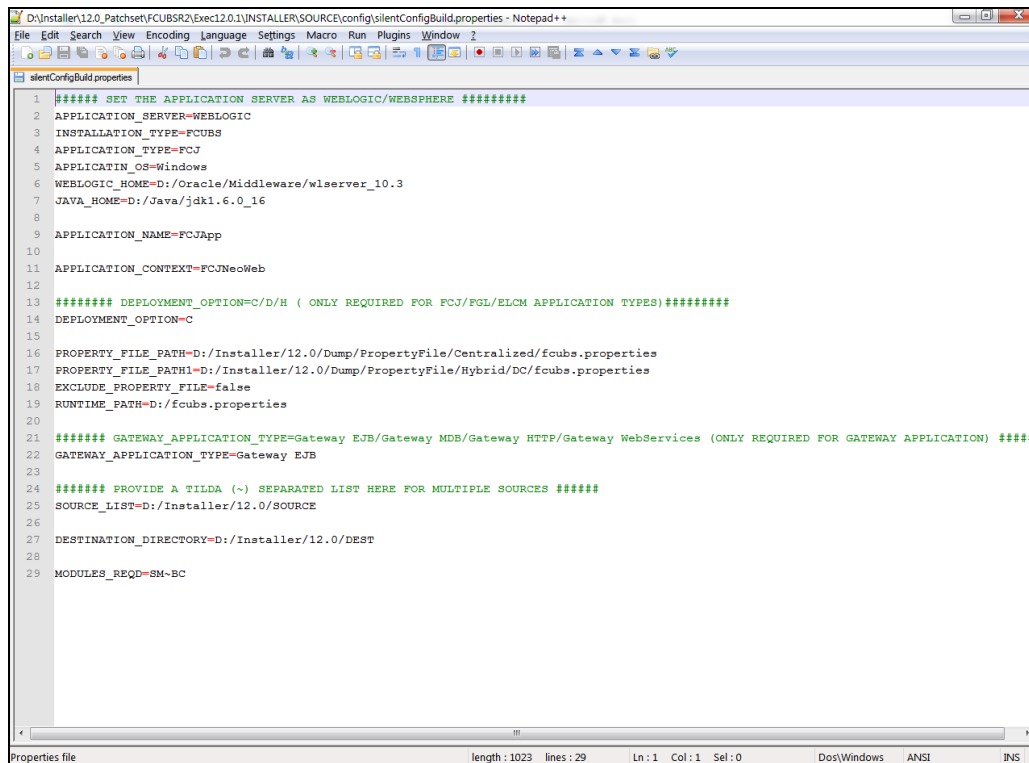

Following features are supported in silent mode:

1. EAR Build (FCIS, Gateway)
2. Deployment (FCIS, Gateway)
3. Data Base Installation
4. User Creation and Report DSN

In order to run Oracle FLEXCUBE Installer in silent mode, you need to modify/edit the following properties files with proper values:

Path: \INSTALLER\SOURCE\config\

- 'silentConfigBuild.properties' to build Application in silent mode
- 'silentConfigDatabase.properties' to setup Database in silent mode
- 'silentUserCreation_ReportsDSNproperties' to set up user creation and report DSN.
- 'silentAppDeployment.properties' to deploy application on Weblogic Server.
- 'silentWASDeployment.properties' to deploy application on Websphere Server.

```
1 ##### SET THE APPLICATION SERVER AS WEBLOGIC/WEBSHERE #####
2 APPLICATION_SERVER=WEBLOGIC
3 INSTALLATION_TYPE=FCUBS
4 APPLICATION_TYPE=FCJ
5 APPLICATION_OS=Windows
6 WEBLOGIC_HOME=D:/Oracle/Middleware/wlserver_10.3
7 JAVA_HOME=D:/Java/jdk1.6.0_16
8
9 APPLICATION_NAME=FCJApp
10
11 APPLICATION_CONTEXT=FCJNeoWeb
12
13 ##### DEPLOYMENT_OPTION=C/D/H ( ONLY REQUIRED FOR FCJ/FGL/ELCM APPLICATION TYPES)#####

20
21 ##### GATEWAY_APPLICATION_TYPE=Gateway EJB/Gateway MDB/Gateway HTTP/Gateway WebServices (ONLY REQUIRED FOR GATEWAY APPLICATION) #####
22 GATEWAY_APPLICATION_TYPE=Gateway EJB
23
24 ##### PROVIDE A TILDA (-) SEPARATED LIST HERE FOR MULTIPLE SOURCES #####
25 SOURCE_LIST=D:/Installer/12.0/SOURCE
26
27 DESTINATION_DIRECTORY=D:/Installer/12.0/DEST
28
29 MODULES_REQD=SM-BC
```

Follow the steps below given to run the installer in silent mode.

2.1.1 Running Installer in Silent Mode in Windows

In order to run the installer in silent mode in Windows, follow the steps given below.

1. In command prompt, navigate to the folder where the 'FCUBSInstaller.bat' is located.
2. Type the below command for
 - EAR Build (FCIS, Gateway)
FCUBSInstaller.bat /s AB <INSTALLER>/config/silentConfigBuild.properties
 - Deployment on Weblogic Server
FCUBSInstaller.bat /s AD <INSTALLER>/config/silentAppDeployment.properties
 - Deployment on Websphere Server
FCUBSInstaller.bat /s AD <INSTALLER>/config/silentWASDeployment.properties
 - Data Base Installation
FCUBSInstaller.bat /s DB <INSTALLER>/config/silentConfigDatabase.properties
 - User Creation
FCUBSInstaller.bat /s UC <INSTALLER>/config/
silentUserCreation_ReportsDSN.properties
 - Report DSN
FCUBSInstaller.bat /s RP <INSTALLER>/config/
silentUserCreation_ReportsDSN.properties
(the command should be given in a single line)
3. Once the installer finishes the task, this log window gets closed automatically.

2.1.2 Running Installer in Silent Mode in Linux

You can run Oracle FLEXCUBE is Installer in silent mode using the following command:

The command should be given in a single line.

- EAR Build (FCIS, Gateway)
sh FCUBSInstaller.sh /s AB <INSTALLER>/config/ silentConfigBuild.properties
- Data Base Installation
sh FCUBSInstaller.sh /s DB <INSTALLER>/config/ silentConfigDatabase.properties
- Deployment on Weblogic Server
sh FCUBSInstaller.sh /s AD <INSTALLER>/config/silentAppDeployment.properties
- Deployment on Websphere Server
sh FCUBSInstaller.sh /s AD <INSTALLER>/config/silentWASDeployment.properties
- User Creation
sh FCUBSInstaller.sh /s UC
<INSTALLER>/config/silentUserCreation_ReportsDSN.properties
- Report DSN
sh FCUBSInstaller.sh /s RP <INSTALLER>/config/
silentUserCreation_ReportsDSN.properties

Use the exact folder location instead of '<INSTALLER>' in the command.
