# 1. Preface

This document describes the steps to create FLEXCUBE IS Function ID using extensible Rapid Application Development (Open Development) tool.

#### 1.1 <u>Audience</u>

The Open Development Function ID Development book is intended for the FLEXCUBE Application Developers who perform the following tasks with Extensible Open Development:

- Develop the new screen (also called as function ID)
- To modify the existing screen
- Bug Fixing the existing screen

To Use this manual, you need conceptual and working knowledge of the below:

Proficiency	Resources
FLEXCUBE IS Development overview	Development Overview Guide
Open Development function ID development getting started	Getting Started
Open Development Reference	Reference
Open Development installation and setup guide	Installation and Setup

#### 1.2 Related documents

For more information on Function ID Development, see these resources:

- Overview Guide
- Getting Started
- Reference
- Installation and Setup

#### 1.3 Conventions

The following text conventions are used in this document:

#### Convention Meaning:

boldface	Boldface type indicates graphical user interface elements (for example, menus and menu items, buttons, tabs, dialog controls), including options that you select.

italic	italic type indicates book titles, emphasis, or placeholder variables forwhich you supply particular values.
monospace	Monospace type indicates language and syntax elements, directory and File name, URLs, text that appears on the screen, or text that you enter.
STOP	Indicates important information

#### 1.4 Pre-request

• Open Development environment with designated project and release details

Refer FCIS-FD05-02-02-Open Development-Installation and Setup for installation and setup of project/release details

• Target FLEXCUBE IS environment

# 2. Introduction

#### 2.1 How to use this Guide

The information in this guide includes:

- <u>Chapter 2, "Introduction"</u>
   This is introduction section.
- <u>Chapter 3, "Manual Static data population"</u> This section describes the prerequisites before creating a Function Id.
- <u>Chapter 4, "Header Information"</u> This section describes the Header Credentials in detail.
- <u>Chapter 5, "Preferences"</u>

This section describes basic functionalities and information about the screen.

- <u>Chapter 6, "Datasources"</u> This section describes the steps required to get started with Function Creation.
- <u>Chapter 7, "List of Values"</u>
  This section describes steps to add List Of Values definitions.
- <u>Chapter 8, "Datablocks"</u> This section describes the actions to be performed after adding Datasources.
- <u>Chapter 9, "Screen Layout Design"</u>
   This section describes the steps required to design the Screen Layout.
- <u>Chapter 10, "Fieldsets"</u>

This section describes the steps required to map the Fields to specific locations in the Screen.

- <u>Chapter 11, "Actions"</u>
   This section describes the amendable and web service information.
- <u>Chapter 12, "Summary"</u> This section describes the steps to design the Summary Screen.
- <u>Chapter 13, "Open Development Tool Files Generation"</u> This section describes steps to generate and deploy Open Development Tool Files.
- <u>Chapter 14, "Testing"</u>
  This section describes steps to Test the created Screen in FLEXCUBE.

# 3. Manual Static data population

This section explains the data base tables that need to be manually populated to start the Open Development screen development.

## 3.1 CSTB\_DATA\_DICTIONARY maintenance

Add rows in CSTB\_DATA\_DICTIONARY for Table/View and columns.

Column Name	Data Type	Data Length	Constraints
TABLE_NAME	VARCHAR2	50	PRIMARY
COLUMN_NAME	VARCHAR2	50	PRIMARY
LABEL_CODE	VARCHAR2	255	
FIELD_NAME	VARCHAR2	255	

#### 3.2 CSTB\_LABELS maintenance

Add rows in CSTB\_LABELS for all label code required.

Column Name	Data Type	Data Length	Constraints
LABEL_CODE	VARCHAR2	255	PRIMARY
LANGUAGE_CODE	VARCHAR2	3	
LABEL_TYPE	VARCHAR2	20	
LABEL_DESCRIPTION	VARCHAR2	4000	

#### 3.3 <u>STTB\_PK\_COLS maintenance</u>

Add rows in STTB\_PK\_COLS for tables that are part of data sources.

Column Name	Data Type	Data Length	Constraints
TABLE_NAME	VARCHAR2	30	PRIMARY
COLUMN_LIST	VARCHAR2	300	
DATA_TYPE_LIST	VARCHAR2	300	
DATA_LENGTH_LIST	VARCHAR2	100	

## 3.4 Table needs to be created in the database schema.

Database schema that is linked with the flexcube should contain the table or view structure. This will act as the data source to the screen.

# 4. Header Information –Basic Information about the Screen

Log into the Open Development Tool and click on Browser Tab. Then click on the Function Generation tab that appears on the left hand side.

#### 4.1 <u>Action</u>

A header appears where the "New" option is chosen from the Action options. The Function-id is to be entered in the space just below.

• The PK Cols and the PK Types Details are to be obtained using Pl/sql developer. The command window is opened and the command "ED Table\_Name" is entered.

On pressing enter, the details of the tables are seen. The details listed in the Keys Tab under the column labeled as "Columns" are typed in the Open Development Tool where the PK Cols details are needed. The entries are given separated by ~ symbol.

For our example, the PK Cols Details are written as:

CUSTOMER\_NO

Now click on the Columns Tab. The Types column is looked up for the entries corresponding to the PK Cols details filled.

In our example, the Type corresponding to CUSTOMER\_NO is VARCHAR2. Thus the entry into the PK Types details for this table is:

Other Master data sources are to be added in the same way.

In case of Detail Data sources, the Relation Type is to be changed to "One to Many" and the Multirecord option is made "Yes" and the Relation clause should be given.

• By right clicking on the Table name (Datasource) in Open Development Tool, and clicking "Add", required columns are added by clicking the check boxes.

# 7. List of Values

 New LOVs are defined in Open Development Tool by right clicking and pressing "Add". The below screen appears and the LOV name should be given here.

• The LOV Query is entered into the slSequent screen. Then click on "Populate". Entries become visible and the details such as datatype and Labels are checked.

In case block for Detail Data sources, the Relation Type is to be changed to "One to Many"

Multi record option is made "Yes ", Parent field should be maintained and Master block should be "NO".

- The columns that were added in the datasources in our earlier step will now have to be added in the corresponding datablock as well by right-clicking on the already added datablock and then pressing "Add".
- The column name is typed into the field name and we click on the corresponding space for Label Code to fill all the entries for the row. We the click the check boxes then click "OK" in the screen below.

• In order to design the screen, we require the addition of sections.

• Use the "+" button to add and then name the partition. Width and sub partitions can be selected accordingly.

Similarly, we do the same for the third section and partition creation

# 10. Field Sets

The various fieldsets that are required are shown in the screen below. For this example, we require four fieldsets named FST\_TL\_MAIN\_P1, FST\_TL\_MAIN\_P2,

FST\_DUE\_STATUS and FST\_ADV\_STATUS.

• Add a new field set by right clicking on the field set folder and then click "ADD".

# 11. Actions

This is the place where amendable information and web services information is captured in Open Development Tool.

For maintenance type of function system enables the below action codes only:

- QUERY
- NEW
- MODIFY
- AUTHORIZE
- DELETE
- CLOSE
- REOPEN

For transaction Screens all the action would be enabled

CRACLE® FLEXCUBE     Management and Integration Console     Saravan       Browser -       Windows     Launch FC UBS     User Preferences     Change Password     Sign       Function Calegory Maintenance       Action     Function     Function     Header Template     None     Image: Colorant Sign       Search     Form Actions     Form Actions     Form Action     Image: Colorant Sign       Bertersences     XSD Type Identifier     Service Name     Operation Id       B DataBlocks     Image: Colorant Sign     Image: Colorant Sign       B DataBlocks

# 12. Summary

- In Open Development Tool, the summary screen is created using the summary option on the left side of the screen.
- The datablock, the datasource and other details are filled and then the necessary fields are taken into the right side.
- Please ensure that the primary key of the Data source must be queried.
- Multi Branch Where Clause is for querying multi branch screens.

U.S. GOVERNMENT END USERS: Oracle programs (including any operating system, integrated software, any programs embedded, installed or activated on delivered hardware, and modifications of such programs) and Oracle computer documentation or other Oracle data delivered to or accessed by U.S. Government end users are "commercial computer software" or "commercial computer software documentation" pursuant to the applicable Federal Acquisition Regulation and agency-specific supplemental regulations. As such, the use, reproduction, duplication, release, display, disclosure, modification, preparation of derivative works, and/or adaptation of i) Oracle programs (including any operating system, integrated software, any programs embedded, installed or activated on delivered hardware, and modifications of such programs), ii) Oracle computer documentation and/or iii) other Oracle data, is subject to the rights and limitations specified in the license contained in the applicable contract. The terms governing the U.S. Government's use of Oracle cloud services are defined by the applicable contract for such services. No other rights are granted to the U.S. Government.

This software or hardware is developed for general use in a variety of information management applications. It is not developed or intended for use in any inherently dangerous applications, including applications that may create a risk of personal injury. If you use this software or hardware in dangerous applications, then you shall be responsible to take all appropriate failsafe, backup, redundancy, and other measures to ensure its safe use. Oracle Corporation and its affiliates disclaim any liability for any damages caused by use of this software or hardware in dangerous applications.

This software and related documentation are provided under a license agreement containing restrictions on use and disclosure and are protected by intellectual property laws. Except as expressly permitted in your license agreement or allowed by law, you may not use, copy, reproduce, translate, broadcast, modify, license, transmit, distribute, exhibit, perform, publish or display any part, in any form, or by any means. Reverse engineering, disassembly, or decompilation of this software, unless required by law for interoperability, is prohibited.

The information contained herein is subject to change without notice and is not warranted to be error-free. If you find any errors, please report them to us in writing.

This software or hardware and documentation may provide access to or information on content, products and services from third parties. Oracle Corporation and its affiliates are not responsible for and expressly disclaim all warranties of any kind with respect to third-party content, products, and services. Oracle Corporation and its affiliates will not be responsible for any loss, costs, or damages incurred due to your access to or use of third-party content, products, or services.
