Oracle Banking Trade Finance Process Management

Welcome to the Oracle Banking Trade Finance Process Management (OBTFPM) User Guide. This guide provides an overview on the OBTFPM application and takes you through the various steps involved in creating and processing Trade Finance transactions.

This document will take you through following activities in OBTFPM:

- To create and handle Trade Finance transaction.
- Help users to conveniently create and process Trade Finance transaction

Overview

OBTFPM is a Trade Finance middle office platform, which enables bank to streamline the Trade Finance operations. OBTFPM enables the customers to send request for new Trade Finance transaction either by visiting the branch (offline channels) or through SWIFT/Trade Portal/other external systems (online channels).

Benefits

OBTFPM helps banks to manage Trade Finance operations across the globe in different currencies. OBTFPM allows you to:

- Handle all Trade Finance transactions in a single platform.
- Provides support for limit verification and limit earmarking.
- Provide amount block support for customer account.
- Provides acknowledgement to customers.
- Enables the user to upload related documents during transaction.
- Enables to Integrate with Back End applications for tracking limits, creating limit earmarks, amount blocks, checking KYC, AML and Sanction checks status.
- Create, track and close exceptions for the above checks.
- Enables to use customer specific templates for fast and easy processing of trade transactions that reoccur periodically.

Key Features

- Stand-alone system that can be paired with any Back End application.
- Minimum changes required to integrate with bank's existing core systems.
- Faster time to market.
- Capable to interface with corporate ERP and SWIFT to Corporate.
- Highly configurable based on bank specific needs.
- Flexibility in modifying processes.

Import LC Issuance Islamic

The design, development and functionality of the Islamic Import LC Issuance process flow is similar to that of conventional Import LC issuance process flow.

In the following sections, let's look at the details for Import LC Issuance Islamic process.

This section contains the following topics:

Common Initiation Stage	Registration
Data Enrichment	Customer Response - Draft Confirmation
Exceptions	Multi Level Approval
Customer - Acknowledgement	Customer - Reject Advice
Reject Approval	

Common Initiation Stage

The user can initiate the new shipping guarantee request from the common Initiate Task screen.

1. Using the entitled login credentials, login to the OBTFPM application.
2. Click **Trade Finance > Initiate Task**.

Provide the details based on the description in the following table:

Field	Description
Process Name	Select the process name to initiate the task.
Customer Id	Select the customer id of the applicant or applicant's bank.
Branch	Select the branch.

Action Buttons

Use action buttons based on the description in the following table:

Field	Description
Proceed	Task will get initiated to next logical stage.
Clear	The user can clear the contents update and can input values again.

Registration

The user initiates the transaction from Registration Stage, if the LC Issuance request is received from the Applicant at the branch counters either by fax, mail or physical application.

During Registration stage, register request for an Islamic Import LC received at the front desk (as an application received physically/received by mail/fax). During registration, the user captures the basic details of the application, check the signature of the applicant and upload related documents. On submit of the request, the customer should be notified with acknowledgement and the request should be available for an LC expert to handle in the next stage.

1. Using the entitled login credentials for Registration stage, login to the OBTFPM application.

The image shows the 'FuTura Bank Sign In' interface. It features a dark blue header with the bank's logo and name. Below the header, there are two input fields: 'User Name *' containing the text 'SRIDHAR' and 'Password *' with masked characters. A prominent green 'Sign In' button is located below the password field, and a smaller 'Cancel' button is positioned at the bottom center.

2. On login, user must be able to view the dashboard screen with widgets as mapped to the user.

The dashboard displays various data widgets. On the left is a navigation menu with options like 'Core Maintenance', 'Dashboard', 'Maintenance', 'Tasks', and 'Trade Finance'. The main area contains several widgets:

- Draft Confirmation Pending:** A table with columns 'Customer Name' and 'Application Date'.

Customer Name	Application Date
EMR & CO	25-06-2018
NA	25-06-2018
NA	21-06-2018
- Hand-off Failure:** A table with columns 'Branch', 'Process Name', and 'Stage Name'.

Branch	Process Name	Stage Name
Bank Futura	NA	Retry HandOf
- Priority Details:** A table with columns 'Branch', 'Process Name', and 'Stage Name'.

Branch	Process Name	Stage Name
Bank Futura	NA	Amount Blo
Bank Futura	NA	Amount Blo
004	NA	Loan Applic
- High Value Transactions:** A bubble chart showing transaction values on the y-axis (ranging from -20K to 140K) and a time-based x-axis (0 to 12). A legend indicates 'GSP'.
- SLA Breach Details:** A table with columns 'Customer Name', 'SLA Breached(mins)', and 'Priority'.

Customer Name	SLA Breached(mins)	Priority
NA	23474	H KEERTIV01
HSBC BANK	26667	M SHUBHAM
WALL MART	23495	M SHUBHAM
EMR & CO	26780	M GOPINATH01
- Priority Summary:** A table with columns 'Branch', 'Process Name', and 'Stage Name'.

Branch	Process Name	Stage Name
203	Cucumber Testing	test descrip
- Hold Transactions:** A table with columns 'Branch', 'Process Name', and 'Stage Name'.
- SLA Status:** A dropdown menu currently showing 'Cucumber Testing'.
- Tasks Detailed:** A dropdown menu currently showing 'Cucumber Testing'.

3. Click Trade Finance - Islamic > Import - Documentary Credit> Import LC Issuance Islamic.

The screenshot shows the Futura Bank dashboard with the 'Import LC Issuance Islamic' menu item highlighted in red. The dashboard contains three main sections:

- Priority Summary:** A table showing the status of various LC amendment processes.

Branch	Process Name	Stage Name	No of High Priority Items	No of Medium Priority Items	No of Low Priority Items
GS1	Export LC Amendment Beneficiary Consent	Registration	0	0	0
GS1	Export LC Amendment Beneficiary Consent	Approval1	0	0	0
GS1	Export LC Amendment Beneficiary Consent	Approval2	0	0	0
- High Priority Tasks:** A table listing tasks requiring attention.

Branch	Process Name	Stage Name	Process Reference Number	Customer Name	User ID
NA	NA	Scrutiny	203ILCIS0022468	Marks and Spencer	OBDX01
NA	NA	Scrutiny	203ILCIS0022466	Marks and Spencer	OBDX01
NA	NA	Scrutiny	203ILCIS0022464	Marks and Spencer	OBDX01
- Pending Exception Approval:** A table listing pending approvals.

Customer Name	Stage Name	Process Reference Number	Process Name	Branch Name	Currency
EMR & CO	KYC Exception Approval	GS1ILCIS0022081	NA	FBN UK	GBP
NESTLE	Amount Block Exception Approval	203ILCAM0022380	NA	DEMO BANK	GBP

The Registration stage has two sections Application Details and LC Details. Let's look at the details of Registration screens below:

Application Details

The screenshot shows the 'Import LC Issuance Islamic' application details form. It is divided into two main sections: Application Details and LC Details.

Application Details:

- Received From - Applicant Bank:

Provide the Miscellaneous Details based on the description in the following table:

Field	Description	Sample Values
Documents	Upload the required documents. Application displays mandatory documents to be uploaded for Import LC Issuance. Place holders are also available to upload additional documents submitted by the applicant.	
Remarks	Provide any additional information regarding the LC. This information can be viewed by other users processing the request.	

Action Buttons

Submit	On submit, system will trigger acknowledgment to the customer and give confirmation message for successful submission. Task will get moved to next logical stage of Import LC Issuance. If mandatory fields have not been captured, system will display an error message until the mandatory fields data are provided.	
Save & Close	Save the information provided and holds the task in 'My Task' queue for working later. This option will not submit the request.	
Cancel	Cancel the Import LC Issuance Registration stage inputs.	

Field	Description	Sample Values
Hold	<p>The details provided will be registered and status will be on hold.</p> <p>This option is used, if there are any pending information yet to be received from applicant and appropriate remarks must be provided.</p>	
Checklist	<p>Make sure that the details in the checklist are completed and acknowledge. If mandatory checklist items are not marked, system will display an error on submit.</p> 	

Scrutiny

On successful completion of Registration of an Import LC issuance request, the request moves to Scrutiny stage. At this stage the user can scrutinize the request for Islamic Import LC.

As part of scrutiny, the user can enter/update basic details of the Islamic LC request and can verify if the request can be progressed further.

Online Channel - Requests that are received via online channels like trade portal, external system and SWIFT are available directly for further processing from Scrutiny stage as in conventional process flow. The user verifies the data which gets auto populated for all data segments from Application stage to Data Enrichment stage.

1. Using the entitled login credentials for Scrutiny stage, login to the OBTFPM application.

2. On login, user must be able to view the dashboard screen with widgets as mapped to the user.

3. Click Trade Finance> Tasks> Free Tasks.

4. Select the appropriate task and click **Acquire & Edit** to edit the task or click **Acquire** to edit the task from **My Tasks**.

5. The acquired task will be available in **My Tasks** tab. Click **Edit** to scrutinize the registered task.

The Scrutiny stage has five sections as follows:

- Main Details
- Availability
- Payment
- Additional Details
- Summary

Let's look at the details for Scrutiny stage. User can enter/update the following fields. User cannot edit the fields that are already having value from Registration/online channels.

Audit - This button provides information about user initiated the transaction, initiated date, stage wise detail etc..

Port Of Discharge	<p>This field specifies the port of discharge or airport of destination to be indicated on the transport document.</p> <p>Online Channel – Read only</p> <p>Non Online Channel - Provide the details of Port/ Airport of Discharge.</p>  <p>Note</p> <p>This field is alternate to Place Of Final Destination. Any of these fields must have value and if both the fields has values, application will display an error message.</p>	
Place Of Final Destination	<p>This field specifies the final destination or place of delivery to be indicated on the transport document.</p> <p>Online Channel – Read only</p> <p>Non Online Channel - Provide the details of Place Of Final Destination.</p>  <p>Note</p> <p>This field is alternate to Port Of Discharge. Any of these fields must have value and if both the fields has values, application will display an error message.</p>	

Field	Description	Sample Values
Latest Date Of Shipment	<p>Provide the latest date for loading on board/ dispatch/taking in charge.</p>  <p>Note This field is alternate to Shipment Period. Latest date of shipment or shipment period must have value and if both the fields has values, application will display an error message.</p>	
Shipment Period	<p>Online Channel – Read- only Non Online Channel - Provide the details of Shipment.</p>  <p>Note This field is alternate to Latest Date Of Shipment. Latest date of shipment or shipment period must have value and if both the fields has values, application will display an error message.</p>	

Description Of Goods And Or Services

This field contains a description of the goods and/or services. Provide the Shipment Details based on the description in the following table:

Field	Description	Sample Values
INCO Terms	<p>Online Channel - Read only. Non Online Channel - Select the appropriate INCO terms.</p>	
INCO Term Description	The description of the INCO Term.	
+ Icon	Click + icon to add goods details.	
- Icon	Click - icon to remove goods details.	
Goods Code	Click look up icon to select the goods code. Once you select goods code, value will populate in Goods Type and Goods Description.	
Goods Type	The goods type is auto populated depending on selected goods code.	
Goods Description	The goods description is auto populated depending on selected goods code.	
No of Units	Enter the number of units being imported or exported.	

Field	Description	Sample Values
Price per Unit	Enter the value for price per unit.	
Total Amount	System to calculate the total price In case of online request, the system should populate the total amount from incoming request. System should validate that the total amount is equal to the value of the transaction (LC/ Collection).	

Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Documents	Click the Documents icon to Upload the required documents. Application will display the mandatory and optional documents.	
Remarks	Click the Remarks icon to provide any additional information. This information can be viewed by other users processing the request. Content from Remarks field should be handed off to Remarks field in Backend application.	
Overrides	Click to view overrides, if any.	
Common Group Message	Click Common Group Message button, to send MT799 and MT999 messages from within the task.	
Request Clarification	User should be able to specify the clarification details for requests received online.	
Signature	Click the Signature button to verify the signature of the customer/ bank if required. The user can view the Customer Number and Name of the signatory, Signature image and the applicable operation instructions if any available in the back-office system. If more than one signature is required, system should display all the signatures.	

Field	Description	Sample Values
Refer	<p>User must select a Refer Reason from the values displayed by the system.</p> <p>Refer Codes:</p> <ul style="list-style-type: none"> • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others. 	
Save & Close	<p>Save the information provided and holds the task in you queue for working later.</p> <p>This option will not submit the request.</p>	
Cancel	<p>Cancel the scrutiny stage inputs and the task gets landed in My Task menu.</p>	
Hold	<p>The details provided will be registered and status will be on hold.</p> <p>This option is used, if there are any pending information yet to be received from applicant and appropriate remarks must be provided.</p>	
Reject	<p>On click of Reject, user must select a Reject Reason from a list displayed by the system.</p> <p>Reject Codes:</p> <ul style="list-style-type: none"> • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others. <p>Select a Reject code and give a Reject Description.</p> <p>This reject reason will be available in the remarks window throughout the process. On reject, a reject notification gets generated to the applicant.</p>	
Next	<p>On click of Next, system should validate if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment.</p>	

Payment Details

The user can enter the Payment data segment details of an Import LC.

Code

Company Name

Company Address

Policy Number

Open Policy

Cover Date

Expiry Date

Takaful Amount

Utilized Amount

Provide the Takaful details based on the description in the following table:

Field	Description	Sample Values
Company Details		
Company Code	Select the Company Code from the LOV.	

Field	Description	Sample Values
Company Name	Read only field. Insurance company details will be displayed as per the selected Company Code from the LOV.	
Company Address	Read only field. Insurance company address will be displayed as per the selected Insurance Company Code from the LOV.	
Policy Number	Provide the policy number.	
Open Policy	If enabled, this field denotes whether the policy is an open policy.	
Cover Date	This field displays the date up to which the policy is covered.	
Expiry Date	This field displays the expiry date of the policy.	
Takaful Amount	The insurance policy amount.	
Utilized Amount	The utilized amount.	

FX Linkage

This section enables the user to link the existing FX contract(s) to the LC transactions. User can link multiple forward FX contracts.

FX contract linkage with the Bill booking can happen only for immediate liquidation of sight payment or for Usance. For manual sight payment, the user needs to link the FX contract on the date of liquidation of the Bill.

Provide the FX linkage detail based on the description in the following table:

Field	Description	Sample Values
FX Reference Number	<p>Select the FX contract reference number from the LOV.</p> <p>On select and save and close, system defaults the available amount, bot currency, sold currency and rate.</p> <p>Forward FX Linkage available for selection at bill would be as follows,</p> <ul style="list-style-type: none"> • Counterparty of the FX contract should be the counterparty of the Bill contract. • Active Forward FX transactions authorized not marked for auto liquidation. <p>Bill contract currency should be BOT currency of the FX transaction in case of an export Bill or the SOLD currency in case of an Import Bill.</p>	
Bought Currency	This field displays the currency from the linked FX contract.	
Sold Currency	This field displays the currency from the linked FX contract.	
Available ContractAmount	Available amount will be FX contract amount minus the linked amount. Available amount for linkage should be greater than Zero.	
Rate	This field displays the rate at which the contract is booked.	

Field	Description	Sample Values
Linked Amount	Sum of Linked amount will not be greater than LC contract amount. Linked amount will not be greater than the available amount for linkage.	
Current Utilized amount	This field displays the liquidated /purchased / discounted /negotiated amount of BC contract. It cannot go beyond the linked FX amount.	
Total Utilized amount	This field displays the total amount utilized against the corresponding linked FX. On query, both Utilized and Total Utilized amount holds the amount of latest version.	
Amount in Contract Currency	This field displays the amount in contract currency converted from FX currency.	
FX Expiry Date	This field displays the expiry date from the linked FX contract.	
FX Delivery Period - From	This field displays the date from which the contract is valid for utilization.	
FX Delivery Period - To	This field displays the date to which the contract is valid for utilization.	
Action	Click the Edit icon to modify the FX details. Click the Delete icon to delete the FX details.	
Average FX Rate	Multiple forward FX contract could be linked, and exchange rate of FX contract vary from each. Hence, effective exchange rate for bill would be arrived using weighted average method and it is utilized during purchase/negotiation/discount or liquidation of the bill. This will be populated in the Average FX Rate.	

Preview

User can preview the draft SWIFT message based on message type and the draft mail advice based on the advice type.

The screenshot shows a 'Preview Messages' window with two side-by-side preview panes. The left pane is titled 'Preview - SWIFT Message' and contains a 'Language' dropdown set to 'English' and a 'Message Type' dropdown set to 'Select'. Below these is a large greyed-out area labeled 'Preview Advice'. The right pane is titled 'Preview - Mail Advice' and contains a 'Language' dropdown set to 'English' and an 'Advice Type' dropdown set to 'LC_INSTRUMENT'. Below these are fields for 'DATE : 01-FEB-19' and 'PAGE : 1', followed by a large greyed-out area containing the text: 'LC INSTRUMENT - BANK'S COPY', 'NESTLE', 'NESGG82SXXX', 'DOCUMENTARY CREDIT', and 'LETTER OF CREDIT INSTRUMENT'. At the bottom right of the window are 'Save & Close' and 'Cancel' buttons.

Provide the Preview details based on the description in the following table:

Field	Description	Sample Values
Preview - Swift Message		
Language	Read only field. English is set as default language for the preview.	
Message type	Select the message type from the drop down. User can choose to see preview of different message like MT 700, MT 740 and MT 701.	
Preview - Mail Advice		
Language	Read only field. English is set as default language for the preview.	
Advice type	Select the advice type.	

Tracer Details

User can trace the response for the discrepancies identified.

Acknowledgement Tracer

Provide the acknowledgement tracer details based on the description in the following table:

Field	Description	Sample Values
Tracer Required	Toggle on - Switch on the toggle to capture the tracer details. Toggle off - Switch of the toggle, if user does not require to capture tracer details.	
Number of Tracers	Provide the number of tracers required.	
Tracer Frequency	System will default the days set up at the product level. Value can be 1, 2 etc. which represents daily, once in 2 days etc.

Tiles Displayed in Summary

- Main Details - User can view and modify details about application details and LC details, if required.

- Party Details - User can view and modify party details like beneficiary, advising bank etc., if required.
- Availability - User can view and modify availability and shipment details, if required.
- Payment - User can view and modify all details related to payments, if required.
- Documents & Condition - User can view and modify the documents required grid and the additional conditions grid, if required.
- Additional Fields - User can view and modify the details of additional fields, if required.
- Limits and Collaterals - User can view and modify limits and collateral details, if required.
- Commission and Charges and Taxes - User can view and modify charge details, if required.
- Revolving Details - User can view and modify revolving details on revolving LC, if applicable.
- Preview Messages - User can view preview messages, if required.
- Compliance - User can view compliance details. The status must be verified for KYC and to be initiated for AML and Sanction Checks.
- Accounting Details - User can view the accounting entries generated in back office.

Note

When the Value Date is different from the Transaction Date for one or more accounting entries, system displays an Alert Message “Value Date is different from Transaction Date for one or more Accounting entries.

Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Documents	Click the Documents icon to Upload the required documents. Application will display the mandatory and optional documents.	
Remarks	Click the Remarks icon to provide any additional information. This information can be viewed by other users processing the request. Content from Remarks field should be handed off to Remarks field in Backend application.	
Overrides	Click to view overrides, if any.	
Common Group Message	Click Common Group Message button, to send MT799 and MT999 messages from within the task.	
Request Clarification	User should be able to specify the clarification details for requests received online.	

Field	Description	Sample Values
Refer	<p>User must select a Refer Reason from the values displayed by the system.</p> <p>Refer Codes:</p> <ul style="list-style-type: none"> • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others. 	
Submit	<p>Task will get moved to next logical stage of Import LC Issuance.</p> <p>If mandatory fields have not been captured, system will display an error message until the mandatory fields data are provided.</p>	
Save & Close	<p>Save the information provided and holds the task in you queue for working later.</p> <p>This option will not submit the request</p>	
Cancel	<p>Cancel the Data Enrichment stage inputs and the task gets landed in My Task menu.</p>	
Hold	<p>The details provided will be registered and status will be on hold.</p> <p>This option is used, if there are any pending information yet to be received from applicant and appropriate remarks must be provided.</p>	
Reject	<p>On click of Reject, user must select a Reject Reason from a list displayed by the system.</p> <p>Reject Codes:</p> <ul style="list-style-type: none"> • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others. <p>Select a Reject code and give a Reject Description.</p> <p>This reject reason will be available in the remarks window throughout the process. On reject, a reject notification gets generated to the applicant.</p>	

Customer Response - Draft Confirmation

The user can review and handle the customer's response received for the draft confirmation for LC issuance transactions, which is sent to the customer for their verification and confirmation. The OBTFPM system sends Draft MT700 along with up to seven MT701 messages as attachment to the customer.

The Transaction Reference Number is masked, before sending the Draft Import LC for Customer approval.

The customer response can be received both by online and offline mode. In non-online mode, user receives the response in the branch.

In online mode the customer will share their response online that will be automatically updated in the customer response field in the task, which is available in the customer response pending stage.

Log in into OBTFPM application, and open the task to see customer response screen.

Customer Response

Language - Read only field

Draft Message - Read only field

Draft Confirmation

Draft Confirmation required - Read only field

Customer Response - This field will be available for you to update any of the below response based on the customer's reply

- Accepted
- Changes Required - Change and proceed

For non-online response – User can select customer response from one of the three drop list values mentioned above.

For Online response – Read only

Customer Remarks - Capture the remarks of the customer.

Response Date - Non-Online channel – Update the date on which the customer response has been received.

Online Channel – Read only

Exceptions

The Import LC Issuance request, before it reaches the approval stage, the application will validate the Amount Block, KYC and AML. If any of these failed in validation will reach exception stage for further clearance for the exceptions.

Exception - Amount Block

As part of amount block validation, application will check if sufficient balance is available in the account to create the block. On hand-off, system will debit the blocked account to the extent of block and credit charges/ commission account in case of charges block or credit the amount in suspense account for blocks created for collateral.

The transactions that have failed amount block due to non-availability of amount in respective account will reach the amount block exception stage.

Log in into OBTFPM application, amount block exception queue. Amount block validation failed tasks for trade transactions will be listed in the queue. Open the task to view summary of important fields with values.

Exception is created when sufficient balance is not available for blocking the settlement account and the same can be addressed by the approver in the following ways:

Approve:

- Settlement amount will be funded (outside of this process)
- Allow account to be overdrawn during hand-off

Refer:

- Refer back to DE providing alternate settlement account to be used for block.
- Different collateral to be mapped or utilize lines in place of collateral.

Reject:

Reject the transaction due to non-availability of sufficient balance in settlement account

Amount Bock Exception

This section will display the amount block exception details.

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Reject	<p>On click of reject, user must select a Reject Reason from a list displayed by the system.</p> <p>Reject Codes:</p> <ul style="list-style-type: none">• R1- Documents missing• R2- Signature Missing• R3- Input Error• R4- Insufficient Balance/Limits• R5 - Others. <p>Select a Reject code and give a Reject Description.</p> <p>This reject reason will be available in the remarks window throughout the process. On reject, a reject notification gets generated to the applicant.</p>	
Hold	<p>The details provided will be registered and status will be on hold.</p> <p>This option is used, if there are any pending information yet to be received from applicant and appropriate remarks must be provided.</p>	
Refer	<p>User will be able to refer the task back to the Data Enrichment user. User must select a Refer Reason from the values displayed by the system.</p> <p>Refer Codes:</p> <ul style="list-style-type: none">• R1- Documents missing• R2- Signature Missing• R3- Input Error• R4- Insufficient Balance- Limits• R5 - Others	
Cancel	<p>Cancel the Import LC issuance Amount Block Exception check and the task gets landed in My Task menu.</p>	
Approve	<p>On approve, application must validate for all mandatory field values, and task must move to the next logical stage.</p>	

Field	Description	Sample Values
Back	Task moves to previous logical step.	

Exception - Know Your Customer (KYC)

As part of KYC validation, application will check if necessary KYC documents are available and valid for the applicant. The transactions that have failed KYC due to non-availability / expired KYC verification will reach KYC exception stage.

Log in into OBTFPM application, KYC exception queue. KYC exception failed tasks for Trade Finance transactions must be listed in your queue. Open the task, to see summary tiles that display a summary of important fields with values.

User can pick up a transaction and do the following actions:

Approve

- After changing the KYC status in the Back End application (outside this process).
- Without changing the KYC status in the Back End application.
- Reject (with appropriate reject reason).

Summary

Tiles Displayed in Summary:

- Main Details - User can view and modify details about application details and LC details, if required.
- Party Details - User can view and modify party details like beneficiary, advising bank etc., if required
- Limits and Collaterals - User can view and modify limits and collateral details, if required.
- Compliance - User can view compliance details. The status must be verified for KYC and to be initiated for AML and Sanction Checks.

Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Reject	<p>On click of Reject, user must select a Reject Reason from a list displayed by the system.</p> <p>Reject Codes:</p> <ul style="list-style-type: none"> • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others. <p>Select a Reject code and give a Reject Description.</p> <p>This reject reason will be available in the remarks window throughout the process. On reject, a reject notification gets generated to the applicant.</p>	

Field	Description	Sample Values
Hold	The details provided will be registered and status will be on hold. This option is used, if there are any pending information yet to be received from applicant and appropriate remarks must be provided.	
Refer	User will be able to refer the task back to the Data Enrichment user. User must select a Refer Reason from the values displayed by the system. Refer Codes: <ul style="list-style-type: none"> ● R1- Documents missing ● R2- Signature Missing ● R3- Input Error ● R4- Insufficient Balance- Limits ● R5 - Others 	
Cancel	Cancel the Import LC issuance KYC exception check and the task gets landed in My Task menu.	
Approve	On approve, application must validate for all mandatory field values, and task must move to the next logical stage.	
Back	Task moves to previous logical step.	

Exception - Limit Check/Credit

The transactions that have failed limit check due to non-availability of limits will be available in limit check exception queue for further handling.

Log in into OBTFPM application, limit check exception queue. Limit check exception failed tasks for Trade Finance transactions must be listed in your queue. Open the task, to see summary tiles that display a summary of important fields with values.

Limit check Exception approver can do the following actions:

Approve

- Limit enhanced in the Back End (outside this process).
- Without enhancing limit in the Back End.

Refer

- Refer back to DE providing alternate limit id to map
- Refer additional collateral to be mapped

Reject

The transaction due to non-availability of limits capturing reject reason.

Summary

Tiles Displayed in Summary:

- Main Details - User can view and modify details about application details and LC details, if required.

- Party Details - User can view and modify party details like beneficiary, advising bank etc., if required
- Availability - User can view and modify availability and shipment details, if required.
- Payment - User can view and modify all details related to payments, if required.
- Documents & Condition - User can view and modify the documents required grid and the additional conditions grid, if required.
- Limits Details - User can view and modify limits details, if required.
- Charges - User can view and modify charge details, if required.
- Revolving Details - User can view and modify revolving details on revolving LC, if applicable.
- Preview Messages - User can view and modify preview details, if required.
- Compliance - User can view compliance details. The status must be verified for KYC and to be initiated for AML and Sanction Checks.
- Accounting Details - User can view the accounting entries generated in back office.

Note

When the Value Date is different from the Transaction Date for one or more accounting entries, system displays an Alert Message “Value Date is different from Transaction Date for one or more Accounting entries.

Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Reject	<p>On click of Reject, user must select a Reject Reason from a list displayed by the system.</p> <p>Reject Codes:</p> <ul style="list-style-type: none"> • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others. <p>Select a Reject code and give a Reject Description.</p> <p>This reject reason will be available in the remarks window throughout the process. On reject, a reject notification gets generated to the applicant.</p>	
Hold	<p>The details provided will be registered and status will be on hold.</p> <p>This option is used, if there are any pending information yet to be received from applicant and appropriate remarks must be provided.</p>	

Field	Description	Sample Values
Refer	User will be able to refer the task back to the Data Enrichment user. User must select a Refer Reason from the values displayed by the system. Refer Codes: <ul style="list-style-type: none"> • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance- Limits • R5 - Others 	
Cancel	Cancel the Import LC Issuance Limit exception check and the task gets landed in My Task menu.	
Approve	On approve, application must validate for all mandatory field values, and task must move to the next logical stage.	
Back	Task moves to previous logical step.	

Multi Level Approval

Log in into OBTFPM application and open the task to see the summary tiles. The tiles should display a list of important fields with values. User must be able to drill down from summary Tiles into respective data segments to verify the details of all fields under the data segment.

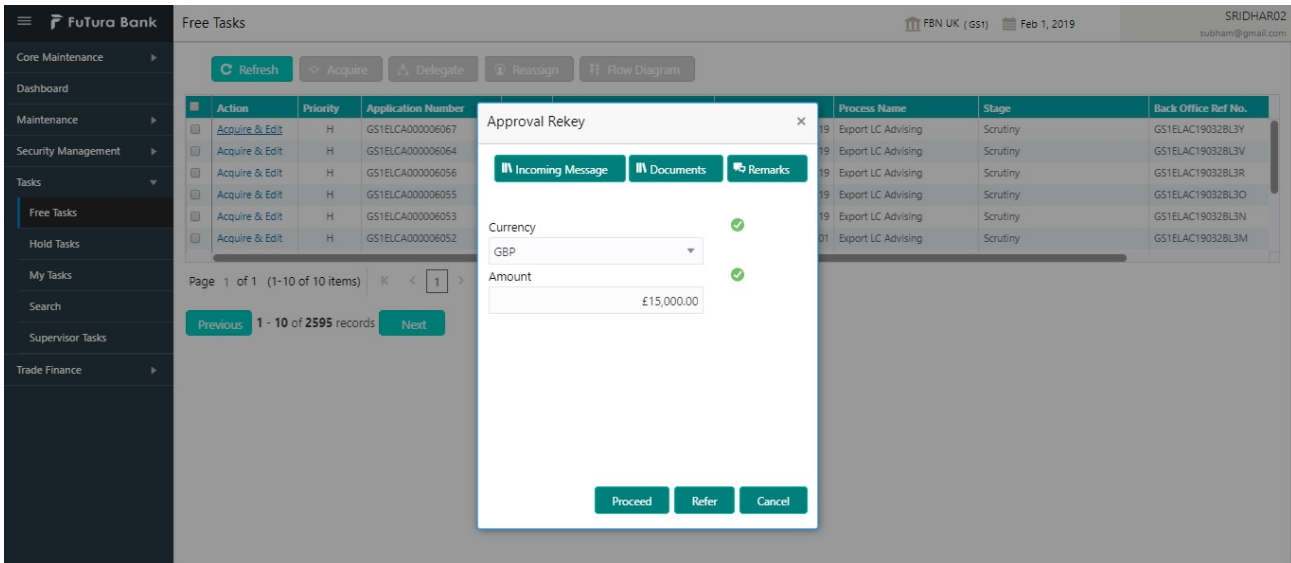

Authorization Re-Key

For non online channel, application will request approver for few critical field values as an authorization step. If the values captured match with the values available in the screen, system will allow user to open the transaction screens for further verification. If the re-key values are different from the values captured, then application will display an error message.

Open the task and re-key some of the critical field values from the request in the Re-key screen. Some of the fields below will dynamically be available for re-key.:

- Currency
- Amount

Re-key is applicable to the first approver in case of multiple approvers. All approvers will however be able to see the summary tiles and the details in the screen by drill down from tiles.

Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Documents	Upload the required documents. Application displays mandatory documents to be uploaded for Import LC Issuance. Place holders are also available to upload additional documents submitted by the applicant.	
Remarks	Provide any additional information regarding the LC. This information can be viewed by other users processing the request.	
Incoming Message	Displays the incoming message, if any.	

Action Buttons

Proceed	On proceed, the screen navigates to approval summary screen.	
Refer	User will be able to refer the task back to the Data Enrichment user. User must select a Refer Reason from the values displayed by the system. Refer Codes: <ul style="list-style-type: none"> ● R1- Documents missing ● R2- Signature Missing ● R3- Input Error ● R5 - Others 	
Cancel	Cancel the Import LC Issuance Approval Rekey.

For any further queries about details of your Import LC application review, please contact us at our bank customer support ph.no xxxxxxxxxxxx

Yours Truly

Authorized Signatory

Reject Approval

As a Reject approver, user can review a transaction rejected and waiting for reject confirmation.

Log in into OBTFPM application to view the reject approval tasks for Import LC Issuance in queue. On opening the task, you will see summary tiles. The tiles will display a list of important fields with values.

The tile containing the screen from where the reject was triggered will be highlighted in red.

User can drill down from reject summary tiles into respective data segments to verify the details of all fields under the data segment.

Application Details

The application details data segment have values for requests received from both non-online and online channels.

Summary

The data captured during handling of the transaction until the stage when reject is given will be available in the summary tile. Other fields will be blank when verified from summary tile.

The data segment in which the task was rejected will have the tiles highlighted in a different colour (red).

- Main Details - User can view and modify details about application details and LC details, if required.
- Party Details - User can view and modify party details like beneficiary, advising bank etc., if required
- Availability and Shipment - User can view and modify availability and shipment details, if required.
- Payments - User can view and modify all details related to payments, if required.
- Documents & Condition - User can view and modify the documents required grid and the additional conditions grid, if required.
- Limits and Collaterals - User can view and modify limits and collateral details, if required.
- Charges - User can view and modify charge details, if required.
- Revolving Details - User can view and modify revolving details on revolving LC, if applicable.
- Preview Messages - User can view and modify preview details, if required.
- Compliance - User can view compliance details. The status must be verified for KYC and to be initiated for AML and Sanction Checks.

Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Reject Approve	On click of Reject Approve, the transaction is rejected.	
Reject Decline	On click of Reject Decline, the task moves back to the stage where it was rejected. User can update the reason for reject decline in remarks.	
Hold	User can put the transaction on 'Hold'. Task will remain in Pending state.	
Cancel	Cancel the Reject Approval.
