# 1 Preface

# 1.1 Introduction

This user guide is designed to help you quickly get acquainted with the many functions routinely executed every day.

# 1.2 Audience

This user manual is intended for the central administrator of the Bank who controls the system and application parameters and ensures smooth functionality and flexibility of the banking application.

# 1.3 Document Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at <a href="http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc">http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc</a>.

# **1.4 Acronyms and Abbreviations**

Following are some of the acronyms and abbreviations you are likely to find in this user manual:

Abbreviation	Description
System	Core Maintenance Module
NLP	Natural Language Processing

# 1.5 List of Topics

This user manual is organized as follow:

Topics	Description
Multi Entity Maintenance	This topic describes about Multi Entity Maintenance module.
Core Maintenance	This topic describes about Core Maintenance module.
NLP Framework	This topic describes about NLP Framework.
Error Codes and Messages	This topic describes list of error codes and messages.
List of Glossary	This topic has alphabetical list of Core Maintenance processes with page references for quick navigation.

# **1.6 Related Documents**

For more information on any related features, you can refer to the following documents:

- Oracle Banking Security Management System User Guide
- Getting Started User Guide

# 1.7 Symbols

This user manual may refer to the following symbols:

$\rightarrow$	Represents Results
---------------	--------------------

# 2 Multi Entity Maintenance

This section of the user guide is designed to help multi entity admins to create new entities, users and entity admins.

**Prerequisites:** Multi entity admin user creation scripts should be run and multi entity admin user should be created in the LDAP. Please refer *Plato Infrastructure Services Installation Guide* for more details.

### 2.1 Entities

Multi entity admins can configure new entities.

### 2.1.1 View Entities

The summary screen provides a list of all entities.

- 1. From Home screen, click Entities. Under Entities, click View Entities.
  - $\rightarrow$  The **View Entities** screen is displayed.

#### Figure 1: View Entities

View Entities			$_{\mu^{k'}} \times$
Filter:			
Type to filter	×		
Entity Id		Entity Name	
ENT_1		Entity 1	
DEFAULTENTITY		DEFAULTENTITY	

2. Provide the details in the relevant data fields. Mandatory data fields are indicated accordingly. For more information on menus, refer to Table 1: View Entities – Field Description.

#### Table 1: View Entities – Field Description

Field	Description
Entity Id	Displays the entity Id of the entity.
Entity Name	Displays the name of the entity.

# 2.1.2 Create Entity

The maintenance screen allows multi entity admins to configure a new entity.

- 1. From Home screen, click Entities. Under Entities, click Create Entity.
  - → The Create Entity screen is displayed.

#### Figure 2: Create Entity

 Provide the details in the relevant data fields. Mandatory data fields are indicated accordingly. For more information on menus, refer to Table 2: Create Entity – Field Description.
 Table 2: Create Entity – Field Description

Field	Description
Entity Id	Specify the entity Id for the entity.
	This field is mandatory.
Entity Name	Specify the name of the entity.
	This field is mandatory.
HO Branch Code	Specify the head office branch code of the entity.
	This field is mandatory.
HO Branch Name	Specify the head office branch name of the entity.
	This field is mandatory.
HO Branch Address	Specify the head office branch address of the entity.
	This field is mandatory.
Host Code	Specify the host code.
	This field is mandatory.
Country	Select the head office branch country code.
	This field is mandatory.

Field	Description
Current HO Branch Posting Date	Select the head office branch current posting date. This field is mandatory.
Previous HO Branch Posting Date	Select the head office branch previous posting date. This field is mandatory.
Next HO Branch Posting Date	Select the head office branch next posting date. This field is mandatory.
Bank Name	Specify the bank name. This field is mandatory.
Bank Code	Specify the bank code. This field is mandatory.

### **Application JNDI Mapping**

By default, application Ids that require a JNDI appear. You can click + to add multiple application jndi mappings and click - to remove an application jndi mapping.

Application Id	Click <b>Search</b> and select the required application Ids from the list.
JNDI	Specify the JNDI for the application Id.

3. Click **Save**. You can view the confirmation entity details in the View Entities.

### 2.2 Users

Multi entity admins can create entity admins and users.

### 2.2.1 View Users

The summary screen provides a list of configured users.

- 1. From Home screen, click Users. Under Users, click View Users.
  - $\rightarrow$  The **View Users** screen is displayed.

 Provide the details in the relevant data fields. Mandatory data fields are indicated accordingly. For more information on menus, refer to Table 4: Create User – Field Description.
 Table 4: Create User – Field Description

Field	Description
User Id	Specify the user Id. This field is mandatory.
User Name	Specify the user name. This field is mandatory.
Locale	Specify the user locale. This field is mandatory.
Email ID	Specify the user email ID. This field is mandatory.
Start Date	Select the user start date. The start date of the user should greater than the Current HO Branch Posting Date. This field is mandatory.
End Date	Select the user end date. This field is mandatory.

Field	Description	
Entity Mapping		
Click + to add a row and provide the re	equired details.	
Entity Id	Click <b>Search</b> and select the entity to which the user belongs.	
Home Entity	Select whether the entity is user's home entity. Only one entity can be selected as Home Entity for a user	
Entity Admin	<ul> <li>Select whether the user is an entity admin of the entity.</li> <li>Marking a user as Entity Admin will give rights to the user to perform the following actions when logged in to that entity.</li> <li>Modify the details of the users in the entity.</li> </ul>	
	<ul> <li>Create branches in the entity</li> <li>Create roles in the entity.</li> <li>Assign the roles and branches to the users.</li> </ul>	

3. Click **Save**. You can view the confirmation entity details in the View Users.

# 3 Core Maintenance

This section is designed to help you quickly get acquainted with the many functions routinely executed everyday.

#### Prerequisites:

Specify User Id and Password, and login to Home screen.

This section contains the following topics:

- 3.1 Additional Field Maintenance
- 3.2 Advice
- 3.3 Amount Text Language
- 3.4 BIC Directory
- 3.5 Branch EOD
- 3.6 Country Code
- 3.7 Currency Definition
- 3.8 Currency Exchange Rate
- 3.9 Currency Holiday Master
- 3.10 Currency Pair Definition
- 3.11 Currency Rate Type
- 3.12 Customer Category
- 3.13 ECA System
- 3.14 External Bank Parameters
- 3.15 External Branch Parameters
- 3.16 External Chart Account
- 3.17 External Customer
- 3.18 External Customer Account
- 3.19 External Customer Account Structured Address
- 3.20 External Virtual Account Structured Address
- 3.21 Forget Process
- 3.22 Host Code
- 3.23 Language Code
- 3.24 Local Holiday

- 3.25 Media
- 3.26 Process Code
- 3.27 System Dates
- 3.28 Transaction Code
- 3.29 Upload Source
- 3.30 Upload Source Preference
- 3.31 Pricing Source System

# 3.1 Additional Field Maintenance

This screen is used to configure and maintain the additional fields for the transaction screens. To process this screen, perform the following steps:

- 1. From Home screen, click Core Maintenance. Under Core Maintenance, click Additional Field Maintenance.
  - → The Additional Field Maintenance Summary screen is displayed.

4. Click **Save**. You can view the confirmation advice details in the Additional Field Maintenance Summary.

## 3.2 Advice

You can configure various BIP advices that are available for the process.

This section contains following subsections:

- 3.2.1 Advice Summary
- 3.2.2 Advice Maintenance

### 3.2.1 Advice Summary

The summary screen provides a list of configured advice. You can configure an advice for a process using the Advice Maintenance. To process this screen, perform the following steps:

- 1. From Home screen, click Core Maintenance. Under Core Maintenance, click Advice.
- 2. Under Advice, click View Advice.

 $\rightarrow$  The **View Advice** screen is displayed.

#### Figure 7: View Advice

#### Table 7: View Advice – Field Description

Field	Description	
Advice Name	Displays the name of the advice.	
Advice Description Displays information about the advice.		
Micro Service Name Displays the name of the micro service.		
Status	Displays the status of the record.	

### 3.2.2 Advice Maintenance

The maintenance screen allows you to configure advices. To process this screen, perform the following steps:

- 1. From Home screen, click Core Maintenance. Under Core Maintenance, click Advice.
- 2. Under Advice, click Create Advice.
  - → The Create Advice screen is displayed.

Field	Description
	Click - icon to remove media details.
Media	Search and select the required media.
Branch	Search and select the required branch.
Currency	Search and select the required currency.
Report Locale	Specify the locale report details.
Report Absolute Path	Specify the report absolute path.
Format	Select a download file format for an advice from the dropdown list. The formats available are, PDF, PPTX, HTML, XLS, and RTF.
Swift Endpoint	Specify the swift endpoint.

4. Click Save. You can view the confirmation advice details in the Advice Summary.

# 3.3 Amount Text Language

You can configure an amount text language.

This section contains following subsections:

- 3.3.1 Amount Text Language Summary
- 3.3.2 Amount Text Language Maintenance

### 3.3.1 Amount Text Language Summary

The summary screen provides a list of configured amount text language. You can configure an amount text language using the Amount Text Language Maintenance. To process this screen, perform the following steps:

- 1. From Home screen, click Core Maintenance. Under Core Maintenance, click Amount Text Language.
- 2. Under Amount Text Language, click View Amount Text Language.
  - $\rightarrow$  The View Amount Text Language screen is displayed.

4. Click **Save**. You can view the configured amount text language details in the Amount Text Language Summary.

# 3.4 BIC Directory

As part of setting up basic information, you must maintain Bank Identifier Codes (BIC). You can configure the BIC directory for a customer.

This section contains following subsections:

- 3.4.1 BIC Directory Summary
- 3.4.2 BIC Directory Maintenance

### 3.4.1 BIC Directory Summary

The summary screen provides a list of configured BIC directory. You can configure the BIC directory using the BIC Directory Maintenance. To process this screen, perform the following steps:

- 1. From Home screen, click Core Maintenance. Under Core Maintenance, click BIC Directory.
- 2. Under **BIC Directory**, click **View BIC Directory**.
  - $\rightarrow$  The View BIC Directory screen is displayed.

 Provide the details in the relevant data fields. Mandatory data fields are indicated accordingly. For more information on menus, refer to Table 12: Create BIC Directory – Field Description.

Field	Description		
BIC Code	Specify the unique BIC Code by which the bank is identified by SWIFT.		
Bank Name	Specify the name for the bank.		
Customer Number	Search and select the required customer number.		
Customer Name	Based on the <b>Customer Number</b> selected, the information is auto-populated.		
Bank Address 1-3	Based on the <b>Customer Number</b> selected, the information is auto-populated.		
SWIFT Key	Specify the swift key details.		
Telex Key	Specify the unique telex key for the BIC directory.		

Table 12: Create BIC Directory – Field Description

Field	Description			
SWIFT Key Arrangement	Select the SWIFT key arrangement from the drop-down list.			
Relationship	Select one of the following options:			
	No: If selected, indicates that the BIC Entity is not a customer of your bank			
	• Mail: If selected, the BIC entity is not a recognized SWIFT entity but an address internal to your bank. In such cases, all correspondence directed to the particular BIC entity is sent as mail messages.			
	• Keys: If selected, a SWIFT/Telex connectivity exists between your bank and the bank for which you are maintaining details. Subsequently, you must specify the SWIFT/Telex Key in the adjacent field.			
Sub-type Code	Search and select the required sub-type code.			
BEI Indicator	Based on the <b>Sub-type Code</b> selected, the information is auto- populated.			
ADB Member	Select the ADB member from the drop-down list.			
Payment Message	Specify the payment message details.			
MT103+ Preferred	By default, this is disabled. If selected, indicates the counter party whose BIC code details you are capturing capacitate to receive payment messages in the MT 103 format.			
Blacklisted	By default, this is disabled. If selected, indicates the BIC entity is blacklisted.			
CUG Member	By default, this is disabled. If selected, indicates the BIC entity is a closed user group member. Remit Member: By default, this is disabled. If selected, indicates the customer is registered with MT 103 extended remittance information multiple user group.			
Update During Upload	By default, this is disabled. If selected, updated the BIC directory during an upload.			
Multi-Customer Credit Transfer	Specify the Multi-Customer Credit Transfer details.			
Multi-Customer Credit Transfer	By default, this is disabled. If selected, indicates multiple credit transfer feature [MT102 support] exists between the bank and the BIC entity.			

Field	Description		
Generate 102+	By default, this is disabled. If selected, generates 102+ message.		
Maximum Size in Bytes	Specify the maximum size.		
Request for Transfer	Specify the Request for Transfer details.		
Generate MT101	By default, this is disabled. If selected, indicates MT101 can be sent/received from this BIC. Select to generate MT101 message.		
Number of Transactions Per Page	Specify the number of transactions to view per page. If you do not specify a value it is defaulted to 10.		
Real Customer Number	Search and select the required real customer number.		
Real Customer Name	Based on the <b>Real Customer Number</b> selected, the information is auto- populated.		

4. Click **Save**. You can view the configure BIC directory in the BIC Directory Summary.

# 3.5 Branch EOD

You can invoke End of Day (EOD) to indicate that all the activities for the day are complete. Activities can be performed on the system only after the system date is changed to the next working day and authorized.

Most of the automated functions are part of the beginning of day operations. Thereafter, some of them must be executed when the system is in the EOTI (End of Transaction Input) stage.

This section contains following subsections:

- 3.5.1 Branch EOD Summary
- 3.5.2 Branch EOD Maintenance
- 3.5.3 Branch EOD Invoke

### 3.5.1 Branch EOD Summary

The summary screen provides list of branch workflow mappings. You can configure branch workflow mapping using the Branch EOD Maintenance. To process this screen, perform the following steps:

- 1. From Home screen, click Core Maintenance. Under Core Maintenance, click Branch EOD.
- 2. Under Branch EOD, click View EOD.

 $\rightarrow$  The **View EOD** screen is displayed.

#### Table 15: Invoke EOD – Field Description

Field	Description
Branch Code	Specify the branch code that is associated with the logged in user.
	This field is mandatory.
Description	Displays the description of the branch.
Current Branch Date	Displays the current branch date.

- 4. Click **Start** to invoke EOD for selected branch and Click **Refresh** to view the current status of batch.
- 5. Click **Retry** to restart the EOD workflow from the failed task.

**NOTE: Retry** button will be enabled only if the failed task status is encountered.

- 6. Click **Reset** to clear the branch selected.
- 7. Click **Refresh** to view the current status of batch.
- 8. Mouse-hover on the task to view the relevant details such as Start time, End time and Error if any.

#### Table 16: EOD Task – Status Description

Status	Description
Green	Task is completed
Yellow	Task is in progress
Red	Task failed due to some error.
Grey	Task is scheduled but not executed
Diamond Shape	Task has reached a milestone stage where execution will be paused. Right-click on milestone stage and select "Proceed" to resume batch execution.

For more information on EOD stages, please refer to EOD Configurations Guide of the respective products.

# 3.6 Country Code

You can configure a country code.

This section contains following subsections:

- 3.6.1 Country Code Summary
- 3.6.2 Country Code Maintenance

### 3.6.1 Country Code Summary

The summary screen provides a list of configured country code. You can configure a country code using the Country Code Maintenance. To process this screen, perform the following steps:

- 1. From Home screen, click Core Maintenance. Under Core Maintenance, click Country Code.
- 2. Under Country Code, click View Country Code.

 $\rightarrow$  The View Country Code screen is displayed.

Overall Limit	Specify the overall limit.

Field	Description
Blacklist	By default, this is disabled. If selected, indicates the country is blacklisted.
EU Member	By default, this is disabled. If selected, indicates the country is recognized by Swift as a part of the Intra European countries.
Generate 205	By default, this is disabled. If selected, indicates the cover message 205COV or 205 need to be generated for transactions involving this country. If you do not select this option, RTGS, 202 or 202COV message is generated.
IBAN Check Required	By default, this is disabled. If selected, indicates check required for an IBAN is mandatory.
BIC Clearing Code	By default, this is disabled. If selected, indicates the National ID in the BIC plus file is the clearing code. During upload of clearing codes from BIC plus file, the records belong to countries against which this box is selected.
Intra European	By default, this is disabled. If selected, indicates the country is an intra European country.

4. Click **Save**. You can view the configured country code details in the Country Code Summary.

# 3.7 Currency Definition

You can define the attributes of the currencies in which the bank can deal. For each currency, you can define attributes such as, the SWIFT code for the currency, the country the currency belongs, the interest method, the spot days, the settlement days, and so on.

Currencies can be maintained only at the Head Office. The list of currencies are available to the branches based on the currencies defined for the country linked to the branch.

This section contains following subsections:

- 3.7.1 Currency Definition Summary
- 3.7.2 Currency Definition Maintenance

### 3.7.1 Currency Definition Summary

The summary screen provides a list of defined currency. You can define a currency using the Currency Definition Maintenance. To process this screen, perform the following steps:

- 1. From Home screen, click Core Maintenance. Under Core Maintenance, click Currency Definition.
- 2. Under Currency Definition, click View Currency Definition.

→ The View Currency Definition screen is displayed.

Currency Round Unit	Select the currency round unit.
Currency Format Mask	Specify the currency format mask details.
Currency Format Mask	Select one of the currency format.
Euro Type	Specify the Euro Type details.
Currency Euro Type	Select one of the currency Euro type.
Auto Exchange Rate	Specify the Auto exchange rate details.
Credit Auto Exchange Rate Limit	Specify the credit automatic exchange rate limit.
Debit Auto Exchange Rate Limit	Specify the debit automatic exchange rate limit.

Field	Description
Currency Country Mapping	Specify the currency country mapping details.
+	Click + icon to add the required currency country mapping details.
	Click - icon to remove the required currency country mapping details.
Country Code	Search and select the required country code.
Country Name	Specify the name of the country.
Currency Code	Search and select the required currency code.

### **Cut Off Time**

Refers to the time by which all transactions involving a currency should be generated. For a currency, you can indicate the cut-off hour and minute. This time should be expressed in the local time of the bank.

The maintenance of a cut-off time for a currency has particular reference to outgoing funds transfers involving it.

Example: The value date of a funds transfer transaction (incoming payment) involving USD, is 3rd June 2018. The number of cut-off days specified for the currency is 2. This means that the payment must be received on or before 1st June 2018. If the payment is received on 1st June, it must be received before the cut-off time specified for USD.

If the USD cut-off time is 1200 hrs, if the payment is received on 1st June 2018, it must be received before 1200 hrs.

4. Click Save. You can view the defined currency in the Currency Definition Summary.

# 3.8 Currency Exchange Rate

You can maintain exchange rates for a currency pair, the rates at which you buy and sell one currency for another. A bank determines its buy and sell rate for a currency pair by applying a spread (that is, its profit margin) to the mid-rate of the currency pair. Mid-rate is the basic rate at which a currency pair is exchanged.

The spread applied for a currency pair varies with the transaction type, while the mid-rate usually remains constant. Consequently, different rates are applicable to different transaction types. For instance dollars in currency are purchased at a certain rate, while USD traveler's checks are bought at a different rate. You can define a rate type which you would like to associate with a transaction type example: CASH, TRAVCHKS, and so on.

You can define the mid-rate, buy and sell spread applicable to each rate type; the buy and sell exchange rates are computed by the system. Buy rates and sell rates can either be maintained by individual branches or can be input by the HO and propagated to all the branches.

If the branch for which the rate is being uploaded or maintained is the head office branch, then the rate would be copied to all those branches that have the same country code as the head office branch.

If the branch for which the rate is being uploaded or maintained is not the head office branch, but it has the same country code as the head office branch, then the rate being uploaded or maintained would be specific to the branch and would not be copied to any other branch.

If the branch for which the rate is being uploaded or maintained is not the head office branch and also does not have the same country code as the head office branch, then the rate being maintained would be copied to all the branches that has the same country code linked as the branch for which the rate is being maintained or uploaded.

This section contains following subsections:

- 3.8.1 Currency Exchange Rate Summary
- 3.8.2 Currency Exchange Rate Maintenance

## 3.8.1 Currency Exchange Rate Summary

The summary screen provides a list of configured currency exchange rates. You can configure a currency exchange rate using the Currency Exchange Rate Maintenance. To process this screen, perform the following steps:

1. From Home screen, click Core Maintenance. Under Core Maintenance, click Currency Exchange Rate.

2. Under Currency Exchange Rate, click View Currency Exchange Rate.

 $\rightarrow$  The View Currency Exchange Rate screen is displayed.

Rate Date	Select a rate date from the drop-down calendar.

4. Click **Save**. You can view the configured currency exchange rate details in the Currency Exchange Rate Summary.

# 3.9 Currency Holiday Master

You can configure a yearly list of holidays, for the currencies, defined in the currency screen. The system uses the information maintained to check if any settlement involving a foreign currency (in the foreign Exchange, Money market, and Funds Transfer, Loans and Deposit modules) falls on that currency's holiday. If yes, the system displays a message stating and ask the user for an override.

For any schedule or contract maturing at a future date, five years hence, you can input the future date, only if the calendar for that year is maintained. The currency holiday is maintained at the bank level by the Head Office.

This section contains following subsections:

- 3.9.1 Currency Holiday Master Summary
- 3.9.2 Currency Holiday Master Maintenance

## 3.9.1 Currency Holiday Master Summary

The summary screen provides a list of configured currency holiday. You can configure a currency holiday using the Currency Holiday Master Maintenance. To process this screen, perform the following steps:

- 1. From Home screen, click Core Maintenance. Under Core Maintenance, click Currency Holiday Master.
- 2. Under Currency Holiday Master, click View Currency Holiday Master.

→ The View Currency Holiday Master screen is displayed.

- Click Save. You can view the configured currency holidays in the Currency Holiday Master Summary.

# 3.10 Currency Pair Definition

In the foreign exchange markets, the exchange rates for some currency pairs such as the USD-GBP or USD-JPY are easily obtainable, since these are frequently traded. The exchange rates of other currencies such as the ZAR-INR (South African Rand - Indian Rupee), which is not traded very often, is determined through a third currency. The third currency is usually the US dollar, since the US dollar is quoted in all trading centers.

You can define the static attributes of currency pairs for which a regular market quote is readily available. For other pairs, which do not have a regular market quote, you need to specify the third currency through which the system should compute the exchange rate. The currency pair is maintained at the bank level by the Head Office branch.

This section contains following subsections:

- 3.10.1 Currency Pair Definition Summary
- 3.10.2 Currency Pair Definition Maintenance

## 3.10.1 Currency Pair Definition Summary

The summary screen provides a list of define a currency pair. You can define a currency pair using the Currency Pair Definition Maintenance. To process this screen, perform the following steps:

- 1. From Home screen, click Core Maintenance. Under Core Maintenance, click Currency Pair Definition.
- 2. Under Currency Pair Definition, click View Currency Pair Definition.
  - → The View Currency Pair Definition screen is displayed.

				Save Cancel

3. Provide the details in the relevant data fields. Mandatory data fields are indicated accordingly. For more information on menus, refer to Table 26: Create Currency Pair Definition – Field Description.

Field	Description
Currency 1-2	Search and select the required currency. A currency pair (specified as currency 1 and currency 2, in the currency pair) represents the two currencies for which you need to maintain exchange rates. To specify the pair, choose from the list provided against Currency 1. Select the pair for which you want to maintain parameters. The pair must be selected according to the quotation method followed by the market, which can be direct or indirect. Exchange rates can be defined for currency 1 against currency 2
	or currency 2 against currency 1.
Maintenance Country	Search and select the required maintenance country.

Field	Description									
Check through Currency	By default, this is disabled. If selected, indicates a check through currency.									
Through Currency	Search and select the required through currency for which the exchange rate between the currencies must be calculated.									
Number of Units	Select one of the number of units.									
Points Multiplier	Select the points multiplier.									
Quotation	Select one of the required quotation:									
	• Direct method the exchange rate for the currency pair is quoted as follows: Buy rate = mid rate - buy spread									
	Sell rate = mid rate + sell spread									
	Ccy 1 = Rate x Ccy 2									
	• Indirect method the exchange rate for the currency pair is quoted as follows: Buy rate = mid rate + buy spread									
	Sell rate = mid rate - sell spread									
	Ccy 2 = Rate x Ccy 1									
Spread Definition	Select one spread definition. The effective spread can be									
	calculated using any of the following two methods:									
	Percentage: Spread/100 x mid rate									
	Points: Spread x points multiplier									
	The method of spread definition that you specify applies to two									
	instances:									
	While maintaining exchange rates for the currency pair									
	While maintaining customer spread for the currency pair									

4. Click **Save**. You can view the defined currency pair details in the Currency Pair Definition Summary.

# 3.11 Currency Rate Type

You can configure a currency rate type.

This section contains following subsections:

- 3.11.1 Currency Rate Type Summary
- 3.11.2 Currency Rate Type Maintenance

## 3.11.1 Currency Rate Type Summary

The summary screen provides a list of configured currency rate type. You can configure a currency rate type using the Currency Rate Type Maintenance. To process this screen, perform the following steps:

Customer Category	Search and select the required customer category.
Relationship Manager ID	Specify the relationship manager ID.
Address	Specify the address details.
Address Line 1-4	Specify the customer address details.
Country	Search and select the required country.
Other Details	Specify the other details.
Postal Code	Specify the postal code details.
Deceased	By default, this is disabled. If selected, indicates the customer is deceased.
Frozen	By default, this is disabled. If selected, indicates the customer account is frozen.
Whereabouts Unknown	By default, this is disabled. If selected, indicates the customer's whereabouts are unknown.
Sanction Check Required	By default, this is disabled. If selected, indicates the sanction check is required.
Walk-in Customer	By default, this is disabled. If selected, indicates a walk-in customer.
Staff	By default, this is disabled. If selected, indicates a staff customer.

Field	Description
Language	Search and select the required language.
Nationality	Search and select the required nationality.

4. Click **Save**. You can view the configured external customer details in the External Customer Summary. In addition, the external customers can be directly replicated from the host system using service API.

# 3.18 External Customer Account

You can configure the external customer account details.

This section contains following subsections:

- 3.18.1 External Customer Account Summary
- 3.18.2 External Customer Account Maintenance

### 3.18.1 External Customer Account Summary

The summary screen provides a list of configured external customer accounts. You can configure the external customer accounts using the External Customer Account Maintenance. To process this screen, perform the following steps:

- 1. From Home screen, click Core Maintenance. Under Core Maintenance, click External Customer Account.
- 2. Under External Customer Account, click View External Customer Account.

→ The View External Customer Account screen is displayed.

Figure 40: View External Customer Account

For more information on menus, refer to Table 41: View External Customer Account – Field Description.

Field	Description
Customer Number	Displays the customer number associated with the account name.
Customer Account Number	Displays the customer account number associated with the account name.
Account Name	Displays the name of the account.
Status	Displays the status of the record.

### Table 41: View External Customer Account – Field Description

### 3.18.2 External Customer Account Maintenance

The maintenance screen allows you to configure external customer account details. To process this screen, perform the following steps:

- 1. From Home screen, click Core Maintenance. Under Core Maintenance, click External Customer Account.
- 2. Under External Customer Account, click Create External Customer Account.

→ The Create External Customer Account screen is displayed.

# 3.21 Forget Process

The Personally identifiable information (PII) is any data that could potentially identify a specific individual. PII data access can be controlled based on the user role and you can configure details of a customer who wants to be forgotten if the customer withdraws/does not avail the virtual account facility.

This section contains following subsections:

- 3.21.1 Forgotten Customers Summary
- 3.21.2 Forget Customer Maintenance

## 3.21.1 Forgotten Customers Summary

The summary screen provides a list of configured customer to be forgotten. You can configure a customer detail who wants to be forgotten using the Forget Customer Maintenance. To process this screen, perform the following steps:

- 1. From Home screen, click Core Maintenance. Under Core Maintenance, click Forget Process.
- 2. Under Forget Process, click View Forgotten Customer.

→ The View Forgotten Customer screen is displayed.

#### Figure 45: View Forgotten Customers

For more information on menus, refer to Table 46: View Forgotten Customers - Field Description.

# 3.26 Process Code

Process code enables the user to set the process code to the individual stages according to the process.

This section contains following subsections:

- 3.26.1 View Process Code
- 3.26.2 Process Code Maintenance

### 3.26.1 View Process Code

The summary screen provides a list of configured process codes. You can add a process code using the Process Code Maintenance. To process this screen, perform the following steps:

- 1. From Home screen, click Core Maintenance. Under Core Maintenance, click Process Code.
- 2. Under Process Code, click View Process Code.

→ The View Process Code screen is displayed.

### Figure 55: View Process Code

For more information on menus, refer to Table 56: View Process Code - Field Description.

Field	Description
Process Code	Displays the process code.
Description	Displays the description of process code.
Status	Displays the status of the record.

#### Table 56: View Process Code – Field Description

## 3.26.2 Process Code Maintenance

Process Code Maintenance screen allows you to define the stages for a particular process. The process code information that is defined in this screen will be used in further business processing to construct the stages. To process this screen, perform the following steps:

- 1. From Home screen, click Core Maintenance. Under Core Maintenance, click Process Code.
  - $\rightarrow$  The **Process Code** screen is displayed.

Process Code			
Process Code *		Process Name *	
RLLOAN		Retail Loan Process Test	
Stage ID	Stage Description	Seq Order	Source Stage
RPM_RLNORG_APPEN	Application Entry	1	<b>⊻</b>
		2	
RPM_RLNORG_ENRCH	Application Enrichment		
RPM_RUNORG_UNDWT	Underwriting	3	
RPM_RLNORG_ASSMT	Assessment	4	
RPM_RLNORG_OFFISSUE	Offer Issue	6	
RPM_RLNORG_OFFACCEPT	Customer Offer Accept/Reject	7	
		10	
RLNORG_HANDOFF_RETRY	Handoff Retry	10	
			Add Row Remove Row
Phase Code	Phase Description	Seq Order	Stage ID
APP_VER	Application Verification		RPM_RLNORG_APPEN ×
		1	RPM_RUNORG_ENRCH ×
			RPM_RLNORG_ASSMT ×
			RPM_RLNORG_UNDWT ×
APP_APPR	Application Approval	2	RPM_RLNORG_OFFISSUE ×
			RPM_RLNORG_OFFACCEPT × RLNORG_HANDOFF_RETRY ×
			Add Row Remove Row
			ALC NON TRANSPORT

Figure 56: Process Code

2. Provide the details in the relevant data fields. Mandatory data fields are indicated accordingly. For more information on menus, refer to Table 57: Process Code – Field Description.

Field	Description
Process Code	Specify the code. This field is mandatory process.
Process Name	Specify the process name. This field is mandatory.
Process Version	Specify the process version. This field is mandatory.
Domain	Specify the process domain. This field is mandatory.
Stage ID	Specify the unique stage ID.
Stage Description	Specify the stage description.
Seq Order	Displays the sequential order of the stage in the entire process.

Table 57: Process Code – Field Description

Field	Description
Source Stage	Select it to indicate if the specific stage is the source stage of the process.
Add Row	Click <b>Add Row</b> to add a row and to capture the stage details that needs to be mapped to the process code.
Delete Row	Click <b>Delete Row</b> to delete a row with stage details.
Phase Code	Specify the phase code.
Phase Description	Specify the phase description.
Seq Order	Displays the sequential order of the phase.
Stage ID	Select the stage ID from the drop down list. Available options in the drop-down will be based on Stage ID mentioned at Process Code level.
Add Row	Click <b>Add Row</b> to add a row and to capture the phase details that needs to be mapped to the process code.
Delete Row	Click <b>Delete Row</b> to delete a row with phase details.

3. Click Save. You can view the configured process codes in the View Process Code.

# 3.27 System Dates

You can view the system date details.

This section contains following subsections:

• 3.27.1 System Dates Summary

## 3.27.1 System Dates Summary

The summary screen provides a list of configured system date. To process this screen, perform the following steps:

- 1. From Home screen, click Core Maintenance. Under Core Maintenance, click System Dates.
- 2. Under System Dates, click View System Dates.

→ The View System Dates screen is displayed.

### Figure 57: View System Dates

Field	Description
Transaction Code	Specify the transaction code details.
Description	Specify additional information about the transaction code.
Source System	Search and select the required source system.
Source Transaction Code	Specify the source transaction code details.

#### Table 60: Create Transaction Code – Field Description

4. Click **Save**. You can view the configured transaction code details in the Transaction Code Summary.

# 3.29 Upload Source

You can upload a source code.

This section contains following subsections:

- 3.29.1 Upload Source Summary
- 3.29.2 Upload Source Maintenance

### 3.29.1 Upload Source Summary

The summary screen provides a list of configured source code. You can upload a source code using the Upload Source Maintenance. To process this screen, perform the following steps:

- 1. From Home screen, click Core Maintenance. Under Core Maintenance, click Upload Source.
- 2. Under Upload Source, click View Upload Source.

→ The View Upload Source screen is displayed.

3. Provide the details in the relevant data fields. Mandatory data fields are indicated accordingly. For more information on menus, refer to Table 62: Create Upload Source – Field Description.

Field	Description
Source Code	Specify the source code details.
Source Description	Specify additional information of the source code.
Base Data from Flexcube	By default, this is disabled. If selected, indicates the base data is from FLEXCUBE.
System Authorization Required	By default, this is disabled. If selected, indicates the system requires authorization.

#### Table 62: Create Upload Source – Field Description

4. Click Save. You can view the configured upload source details in the Upload Source Summary.

# 3.30 Upload Source Preference

You can configure upload source preference.

This section contains following subsections:

- 3.30.1 Upload Source Preference Summary
- 3.30.2 Upload Source Preference Maintenance

## 3.30.1 Upload Source Preference Summary

The summary screen provides a list of configured upload source preferences. You can configure an upload source preference using the Upload Source Preference Maintenance. To process this screen, perform the following steps:

- 1. From Home screen, click Core Maintenance. Under Core Maintenance, click Upload Source Preference.
- 2. Under Upload Source Preference, click View Upload Source Preference.
  - → The View Upload Source Preference screen is displayed.

Figure 62: View Upload Source Preference

For more information on menus, refer to Table 63: View Upload Source Preference – Field Description.

#### Table 63: View Upload Source Preference – Field Description

Field	Description	
Source Code	Displays the code of the source.	
Status	Displays the status of the post upload.	
Purge Days	Displays the number of purge days.	
Status	Displays the status of the record.	

## 3.30.2 Upload Source Preference Maintenance

The maintenance screen allows you to configure upload source preference. To process this screen, perform the following steps:

- 1. From Home screen, click Core Maintenance. Under Core Maintenance, click Upload Source Preference.
- 2. Under Upload Source Preference, click Create Upload Source Preference.
  - → The Create Upload Source Preference screen is displayed.

 Provide the details in the relevant data fields. Mandatory data fields are indicated accordingly. For more information on menus, refer to Table 64: Create Upload Source Preference – Field Description.

Field	Description
Source Code	Search and select the required source code.
Error Handling	Specify the error handling details.
On Error	Select an error from the drop-down list.
On Override	Select an override from the drop-down list.
On Repairable Exception	Select the repairable exception from the drop-down list.
On Queue Exception	Select the queue exception from the drop-down list.
Post Upload	Specify the post upload details.

Table 64: Create Upload Source Preference – Field Description

Field	Description
Status	Select a status from the dropdown list.
Purge Days	Specify the purging days if you want to maintain any days to be purged while processing interface.
Allow Deferred Processing	By default, this is disabled. If selected, defers process the upload source preference.
Allow EOD with Deferred	By default, this is disabled. If selected, processes the EOD with deferred.
Deletion Allowed	By default, this is disabled. If selected, deletes the upload source preferences.
Reverse Allowed	By default, this is disabled. If selected, reverses the upload source preferences.
Amend Allowed	By default, this is disabled. If selected, amends the upload source preferences.
Proceed with EOD	By default, this is disabled. If selected, proceeds with the EOD.

4. Click **Save**. You can view the configured upload source preference details in the Upload Source Preference Summary.

# 3.31 Pricing Source System

You can configure the pricing source system.

This section contains following subsections:

- 3.31.1 Pricing Source System Summary
- 3.31.2 Pricing Source System Maintenance

## 3.31.1 Pricing Source System Summary

The summary screen provides a list of configured Pricing Source system. You can configure the pricing source system details using the Pricing Source System Maintenance. To process this screen, perform the following steps:

- 1. From Home screen, click Core Maintenance. Under Core Maintenance, click Pricing Source System.
- 2. Under Pricing Source System, click View Pricing Source System.
  - → The View Pricing Source System screen is displayed.

## 3.32.2.2 Headers

External product processor might require some standard headers to be passed along with the request.

User can specify the headers which are required by service endpoints for its all implementations but not present in swagger file.

These headers can be configured in OBRH using the steps given below.

#### Figure 81: Headers

## 3.32.2.4 WSDL

The Web Services Description Language (WSDL) is an XML-based interface description language that is used for describing the functionality offered by a web service. Currently, non-SSL WSDL URL is only supported.

**NOTE:** In case there is a change in wsdl file, then same wsdl file need to be imported again in order to update the provided service information in routing hub.

## 3.32.2.5 SWAGGER

Swagger is an Interface Description Language for describing RESTful APIs expressed using JSON. Currently, Swagger 2.0 & OpenAPI 3.0 both are supported.

**NOTE:** In case there is a change in swagger file, then same swagger file need to be imported again in order to update the provided service information in routing hub.

## 3.32.2.6 Import

User can create a service provider by importing the JSON file. Navigation: **Service Providers -> Import**

# 3.32.4 Troubleshooting

# 3.32.4.1 OFLO issues faced during cmc-obcbs-service and cmc-obrh-services integration

Experian password expired

The password for the Experian account had expired

The solution is to login to the Experian website and reset the password. The new password is generated via mail and you can configure in OBRH for token generation.

## 3.32.4.2 Unable to connect to external server

The OBRH server is unable to connect to the experian server. The proxy is not configured The VM arguments were added for OBRH's managed server.

-Dhttps.proxyHost=www-proxy-idc.in.oracle.com

-Dhttps.proxyPort=80

https://confluence.oraclecorp.com/confluence/pages/viewpage.action?pageId=2863487960

## 3.32.4.3 OBRH environment variable value not found

The environment variable for the CBS product processor is improper. (\$.headers["bureauType"][0]) The correct path was provided(\$.headers["bureauType"][0]

# 3.33 Oracle Bureau Service (OBS)

## 3.33.1 Overview

Oracle Bureau Service (OBS) facilitates you to send requests to the credit bureau agencies for credit bureau reports of customers. It also facilitates you to view such reports received from the credit bureau agencies.

A credit bureau report presents the credit information of an individual or a company, which is fetched by credit bureau agencies from various financial institutions. It is a detailed report, which contains the history of borrowings, repayment routine, defaults, and delays. This report contains vital information about a customer's credit score, personal information, employment details, contact information, and details of accounts in various banks of a given geographical region.

The objective of this report is to present the financial history of an individual or a company, which further helps a bank to take a decision on granting loan based on the credit score of a company or an individual.

For requesting and receiving the credit bureau reports, OBS is integrated with the product processor of the bank. The product processor requests for the credit bureau reports using OBS. It provides the required information of the customer for which the credit bureau report is requested. The information is sent to the credit bureau agency by OBS. Once the credit bureau report is received from the credit bureau agency, it is displayed in both OBS and the product processor.

OBS maintains aging for bureau response for an applicant. History service allows to store and pull existing credit bureau report of an individual customer. OBS retrieves bureau response from history for those applicants if subsequent call to same bureau is made within defined time frame, beyond which a new bureau report is called. Existing credit bureau responses from history are sent back to the product processor.

In case of multiple applicant, product processor originates a lending application with multiple applicants and sends details to OBS to fetch credit bureau details for all the applicants, based on the evaluation of criteria. OBS consolidates all the bureau responses into one and send it to the product processor.

The Oracle Banking Routing Hub (OBRH) routes the information from the product processor to OBS and from credit bureau agency to OBS. When a credit bureau report request is sent by the product processor, OBRH verifies that all mandatory information is present as per the defined template and routes the request to OBS. Once OBS receives the request, it stores the data and processes the data based on various criteria. The criteria used by OBS contains the rules and facts of the product processor that are maintained in the Rules Engine, based on which the credit bureau agency to which the request is to be sent is identified. Once the credit bureau agency is identified, OBS sends the request to OBRH. OBRH transforms the data and sends the request to the respective credit bureau agency. The credit bureau agency processes the request and sends the report to OBRH. OBRH receives the data, and transforms the report as per the defined template and sends it to OBS. Once the report is received, OBS displays the credit bureau report and sends the same to the product processor as well through OBRH.

The below flow diagram depicts how OBS works with the integrated product processor and interfaces with Oracle Banking Routing Hub (OBRH) for fetching and displaying the credit bureau reports:

The following flowchart depicts a high-level flow of information in OBS:

# 3.33.2 Symbols

# 3.33.3 Basic Actions

Most of the screens contain buttons to perform all or few of the basic actions.

The table below gives a snapshot of them:

Table	77:	Basic	Actions
I GOIO		Babio	/ 10110110

Actions	Description	
New	Click to add a new record. When you click New, system displays a new record enabling you to specify the required data. It is mandatory to specify details for the fields marked with '*' symbol.	
	This button is displayed during any of the following scenarios:	
	<ul> <li>Lookup and Criteria created successfully.</li> </ul>	
	<ul> <li>After you, click a widget in the View Lookup and View Criteria screen.</li> </ul>	
Save	Click to save the details entered or selected in the screen.	
Unlock	Click to update the details of an existing lookup or criteria. System displays an existing record in editable mode.	
	This button is displayed after any of the following scenarios:	
	<ul> <li>Lookup and Criteria created successfully.</li> </ul>	
	<ul> <li>After you, click a widget in the View Lookup and View Criteria screen.</li> </ul>	

Actions	Description
Authorize	Click to authorize the lookup, criteria created. A maker of the screen is not allowed to authorize the lookup, criteria. Only a checker can authorize a model, created by a maker.
	This button is displayed after any of the following scenarios:
	<ul> <li>Lookup and Criteria created successfully.</li> </ul>
	• After you, click a widget in the View Lookup and View Criteria screen.
	For more information on the process, see Authorization Process.
Approve	Click to approve the initiated lookup and criteria.
	This button is displayed, once you click <b>Authorize.</b>
Audit	Click to view the maker details, checker details, and lookup, criteria status.
	This button is displayed after any of the following scenarios:
	Lookup, Criteria created successfully.
	<ul> <li>After you, click a widget in the View Lookup, View Criteria screen.</li> </ul>
Close	Click to close a record. This action is available only when a lookup, criteria is created.
Confirm	Click to confirm the action you performed.
Cancel	Click to cancel the action you performed.
Compare	Click to view the comparison through the field values of old record and the current record.
	This button is displayed in the widget, once you click <b>Authorize.</b>
View	Click to view the lookup, criteria details in a particular modification stage.
	This button is displayed in the widget, once you click <b>Authorize.</b>
View Difference only	Click to view a comparison through the field element values of old record and the current record, which has undergone changes.
	This button is displayed, once you click <b>Compare</b> .

Actions	Description	
Expand All	Click to expand and view all the details in the sections.	
	This button is displayed, once you click <b>Compare.</b>	
Collapse All	Click to hide the details in the sections.	
	This button is displayed, once you click <b>Compare.</b>	
ок	Click to confirm the details in the screen.	

#### Authorization process

To authorize and approve lookup, criteria you need to perform the following actions:

- 1. Navigate to the required screen.
- 2. Click Authorize. The lookup, criteria pending for authorization are displayed.
- 3. Select the required lookup, criteria and click **Approve.** The lookup, criteria details are displayed in a widget. If you have modified the lookup, criteria twice, system displays two widgets with respective modification number along with the modified details.
- 4. Enter remarks for approving the lookup, criteria in the **Remarks** field.
- 5. Click **Confirm** and authorize the lookup, criteria. The lookup, criteria are authorized successfully.

# 3.34 Credit Bureau Display

The Credit Bureau Display screen facilitates to view the reports received from the credit bureau agency. The report includes credit history details of the customer and the credit score of the customer based on these details.

# 3.34.1 View Credit Bureau Report

You can view the credit bureau report based on the various filter options provided.

#### To view a credit bureau report:

1. Click Credit Bureau > Operations > Credit Bureau Display.

→ The Credit Bureau Display screen is displayed.

# 3.35 Lookup

Lookup are the service for mapping of keys and values that is used to enrich the description of the data displayed to the user. The lookup screen facilitates to define the contents for drop-down or list of value fields. Lookup fields is used throughout the system. The identified fields will only accept entries stored in this screen. Below are some examples of the lookup fields.

- Static/Enumeration values
  - Credit Bureau: Equifax, Transunion, Experian.
  - o Comparison Operator: Equals, Greater than.
- Dependent lookups based on another selection
  - o Based on Country, State should have different values in the lookup.
  - Based on Country, Currency should have different values in the lookup.

## 3.35.1 Create Lookup

You can create lookup definitions by updating various details.

#### To create lookup:

- 1. Click Credit Bureau > Maintenance > Lookup > Create Lookup.
  - → The **Create Lookup** screen is displayed.

#### Figure 98 : Create Lookup

Create Lookup					$\mu_{\eta_{i}} \times$

A brief description of the field is given below:

#### Table 84: View Lookup – Search Option – Field Description

Field	Description	
The following fields are displayed, once you click		
Lookup Type	Displays the lookup type.	
Authorization Status	Select the authorization status of the lookup.	
	The options are:	
	Authorized	
	Unauthorized	
Record Status	Select the record status of the lookup.	
	The options are:	
	• Open	
	Close: Availabe only for Authorized lookup.	

5. Click the widget to view the uploaded lookup details. The details are displayed in the Lookup Maintenance screen.

A brief description of the fields is given below:

#### Table 85: Lookup Maintenance – Field Description.

Field	Description	
The following fields are displayed, in widget.		
Lookup Type         Displays the lookup type.		
Description	Displays the description of the lookup.	

6. After viewing the details, you can perform any action on a lookup mentioned in the Basic Actions section.

#### **Modify Fields**

Click **Unlock**, to modify the following fields in Lookup Codes tab:

- Lookup Code
- Description
- Sort Order
- Dependent Identifier
- Enable

Sort Order	Displays the sort order for the uploaded lookup.
Dependent Identifier	Displays the dependent identifier for the uploaded lookup.
Enable	Displays the lookup code if enabled for the uploaded lookup.

# 3.36 Criteria

The Criteria screen facilitates to setup criteria definition, which are used in evaluating request and response criteria (business rules) to identify which bureau is to be called for the request.

## Examples:

- 1. Call credit bureau Experian, for personal loan product, and call credit bureau Experian and Equifax for home loan products.
- 2. Call credit bureau Experian if zip code of the applicant is between 70000 80000 and call credit bureau Equifax zip code of the applicant is between 30000 40000.
- 3. Call credit bureau Transunion if score from credit bureau is less than 600.

## 3.36.1 Create Bureau Criteria

You can create bureau criteria by updating various details.

#### To create bureau criteria:

1. Click Credit Bureau > Criteria > Create Bureau Criteria.

→ The Create Bureau Criteria screen is displayed.

#### Figure 103 : Create Bureau Criteria Screen

reate Bureau Crite	ria					1

A brief description of the fields is given below:

Field	Description	
Rule ID	Enter the rule ID.	
Description	Displays the description of the rule ID selected, it is auto-populated.	
Priority	Enter the priority of the criteria.	
Call All Bureau	Click the toggle status to call all bureaus.	
Enable	Click the toggle status to enable the rule criteria.	
The below fields appears if <b>Call All Bureau</b> toggle status is not clicked, to add the child rule the parent rule.		
Rule ID	Select the rule ID from the drop-down list.	
Description	Displays the description of the rule ID selected it is auto-populated.	
Priority	Enter the priority of the criteria.	
Enable	Click the toggle status to enable the rule criteria.	

## Table 88: Create Bureau Criteria – Field Description.

#### 5. Click Save.

The criteria is successfully created and can be viewed using the View Criteria screen.

## 3.36.2 View Criteria

Using this screen, you can view the criteria created using the **Create Bureau Criteria** screen. The status of the uploaded criteria is displayed as **Unauthorized** and **Open**. Once the checker authorizes the lookup, the status is updated to **Authorized** and **Open**.

#### To view an uploaded criteria:

1. Click Credit Bureau > Criteria > View Criteria.

→ The View Criteria screen is displayed.

# 4 NLP Framework

This section of the user guide is designed to help you quickly get acquainted with the Machine Learning, Natural Language Processing (NLP) framework.

### Pre-requisites

Specify User Id and Password, and login to Home screen.

This section contains the following topics:

- 4.1 Toolkit
- 4.2 Operation
- 4.3 3P Service Integration

# 4.1 Toolkit

The Toolkit is used to design and train NLP/Named Entity Recognition (NER) Model(s).

This section contains following subsections:

- 4.1.1 Use Case Definition
  - 4.1.1.1 Use Case Definition Summary
  - 4.1.1.2 Use Case Definition Maintenance
- 4.1.2 Annotator
- 4.1.3 Model Training
- 4.1.4 Model Management
  - 4.1.4.1 Model Management Summary
  - 4.1.4.2 Model Management Maintenance

## 4.1.1 Use Case Definition

Use cases are defined by the business domain. The information that is required to be extracted from documents are driven by business consideration against the context of the use case being defined.

Tags/entities are required for annotating or tagging of information in the source document in order to create training files for a use case model training. These tags or entities will always be driven by business considerations for a particular use case.

The use case definition maintenance screen allows the user to define use case(s) and maintain specific list of tags for the use case.

## 4.1.1.1 Use Case Definition Summary

The summary screen displays the list of defined use cases. To process this screen, perform the following steps:

- 1. From Home screen, click Machine Learning. Under Machine Learning, click NLP Toolkit.
- 2. Under NLP Toolkit, click Use Case Definition.
  - → The Use Case Definition screen is displayed.

#### Figure 108: Use Case Definition

For more information on menus, refer to Table 92: Use Case Definition - Field Description.

#### Table 92: Use Case Definition – Field Description

Field	Description			
Usecase Name	Displays the name of the use case			
Mod No	Displays the modification number			
Authorized Status	Displays the Authorized or Unauthorized status			
Record Status	Displays the status of the record.			

## 4.1.1.2 Use Case Definition Maintenance

The maintenance screen allows you to define use cases and maintain entities/tags for the use case.

Figure 109: Use Case Definition Maintenance

	(1-5 of at least 30 items) K < 1 2 3	456> >>					
Audit e Case Definition	on 🕜 Tag Maintenance 📝						

Provide the details in the relevant data fields. Mandatory data fields are indicated accordingly. For more information on menus, refer to Table 93: Tag Maintenance – Field Description.

Field	Description
Use Case Name	Unique use case name. It gets populated on Save, from the last folder name from the "Training Corpus Path (DOC)"
Description	Use Case Description
Mod No	Automatic Modification Number
Straight Through Processing	yes = Unattended / No = Attended
Use Case Tags/Entities	Specifies the use case tags entities.
Tag Display Sequence	The sequence in which the tags get displayed.
Tag Screen Display	Business Name of the Tag
Tag Name	Technical Name of the Tag
Annotation Tag	To identify tags to be used in Training
Default Value	Default value for tags not used for training

Table 93: Tag Maintenance – Field Description

## 4.1.2 Annotator

Annotation is the process of identifying information within a document content and tagging them as a specific type of information. Of course, each use case defined, will have their own relevant maintained list of tags/entities, which will be used to annotate source documents for a use case.

#### Figure 110: Annotator

						Amou	nt		

Annotator helps you to perform the annotations on a source document for a use case. To process this screen, perform the following steps:

- 1. From Home screen, click Machine Learning. Under Machine Learning, click NLP Toolkit.
- 2. Under NLP Toolkit, click Annotator.
  - → The Annotator screen is displayed.

#### Figure 111: Annotator

10. After all the tags are assigned relevant information click **Create Annotated** File to create the annotated file and end the process.

## 4.1.3 Model Training

Model training is done on the annotated training corpus. The annotated training corpus is a collection of annotated training files created using the annotator.

Model training is iterative and is carried out over increasing corpus size depending on the model parameters.

Each defined use case will have its own training corpus available in the path set up in the use case definition. To process this screen, perform the following steps:

- 1. From Home screen, click Machine Learning. Under Machine Learning, click NLP Toolkit.
- 2. Under NLP Toolkit, click Model Training.
  - → The Model Training screen is displayed.

#### Figure 121: Model Training

Model Training				$_{\mu}^{\mu}$ $\times$

	CHEQUE LEAVES	0.982	0.9561	0.9689
				Train Model Save Model

#### Training NER Models:

- 3. Select the Model Type as NLP(NER).
- 4. Choose the use case name.
- 5. Click Train Model.

Each model for a use case is identified by a unique run reference.

### **Training Document Classifier Model:**

- 6. Select the Model Type as Document Classification.
- 7. Click Train Model.

If you find the model parameters acceptable, you may want to save the model by clicking Model Save.

The alternative is to add more annotated training files for the use case and repeat model training, till satisfactory parameters are achieved.

# 4.1.4 Model Management

All the run reference of models saved from model training for a use case can be seen here. For each model run reference, you can view the parameters for the model as well as individual tag/entities

You may choose the active model run reference to be used as part of business processing.

This section contains following subsections:

- 4.1.4.1 Model Management Summary
- 4.1.4.2 Model Management Maintenance

## 4.1.4.1 Model Management Summary

The summary screen displays the list of use case models. To process this screen, perform the following steps:

- 1. From Home screen, click Machine Learning. Under Machine Learning, click NLP Toolkit.
- 2. Under NLP Toolkit, click Model Management.

→ The Model Management screen is displayed.

Figure 122: Model Management Summary

For more information on menus, refer to Table 95: Model Management Summary – Field Description.

#### Table 95: Model Management Summary – Field Description

Field	Description
Use Case Name	Displays the name of the Use Case.
Mod No	Displays the number of modifications.
Authorized Status	Displays the status as Authorized or Unauthorized.
Record Status	Displays the record status as Open or Closed.

## 4.1.4.2 Model Management Maintenance

This is where you may unlock and choose the active model run reference to be used as part of business processing. To process this screen, perform the following steps:

- 1. From Home screen, click Machine Learning. Under Machine Learning, click NLP Toolkit.
- 2. Under NLP Toolkit, click Model Management.

→ The Model Management screen is displayed.

#### Figure 123: Model Management Maintenance

w Unlock Cla	se				
Case Name				Model Type NER	
Run Reference	Precision	Recall	F1 score	Active	
SK8555bTO	0.909	0.733	0.811		Tag Parameters

FMdLc4994	0.814	0.667	0.733		Tag Parameters
A1GwazZl	0.94	0.788	0.857		Tag Parameters

 Provide the details in the relevant data fields. Mandatory data fields are indicated accordingly. For more information on menus, refer to Table 96: Model Management Maintenance – Field Description.

#### Table 96: Model Management Maintenance – Field Description

Field	Description
Use Case Name	Displays the name of the Use Case.
Model Type	Displays the NER or Classification type of Model.
Run Reference	Unique Model Version Identifier.
Precision	Value between 0 to 1. Closer to 1 is better.
Recall	Value between 0 to 1. Closer to 1 is better.
F1 Score	Value between 0 to 1. Closer to 1 is better.
Active	The model run reference that is currently active.

For each model run reference you could view the individual tag parameters.

### Figure 124: Tag Parameters

Unlock Case Name	Close Tag Parameters Detail				×	1
inv	Model Name corpinv	Model Type NER		Run Reference 2fWj2xtLB		^
un Reference	Tag Name	Precision	Recall	F1 Score		
vPqbQzjq	supplierName	0.954	0.932	0.943	^	Tag Parameters

O7S6p7ov	noNumber	0 070	0.919	0.880		Tag Parameters
1eCuuwk8e					Close	Tag Parameters

At this stage you have defined a new use case with the tags/entities to be recognized by the model and trained and exported the use case model to be used by business.

# 4.2 Operation

This is where the trained models are consumed for business processing.

This section contains following subsections:

- 4.2.1 Document Upload
- 4.2.2 Transaction Log

## 4.2.1 Document Upload

This is the screen where you upload the source document which is consumed by the NLP model and defined tags/entities are recognized.

The information that is extracted by the model is seamlessly used in further business processing. To process this screen, perform the following steps:

- 1. From Home screen, click Machine Learning. Under Machine Learning, click Operation.
- 2. Under Operation, click Document Upload.
  - → The **Document Upload** screen is displayed.

### Figure 125: Document Upload

- 4. Chose the Document Type from the pick list.
- 5. Click **Upload** to initiate business process.

# 4.2.2 Transaction Log

This is the screen where you can see all the uploaded transactions that has been interpreted by the NLP models.

You can filter the displayed transactions based on the following:

- Document Type
- Status

To process this screen, perform the following steps:

- 1. From Home screen, click Machine Learning. Under Machine Learning, click Operation.
- 2. Under Operation, click Transaction Log.

 $\rightarrow$  The **Transaction Log** screen is displayed.

#### Figure 126: Transaction Log

# 4.3 3P Service Integration

Any model execution or training service(s) built using any 3P NLP library can be integrated in the NLP framework.

The only requirement being the REST services must confirm to the payload definition detailed in the following section.

Building model training and execution services using other 3P NLP libraries would involve consulting effort.

This section contains following subsections:

- 4.3.1 Classification Training Service
- 4.3.2 NER Training Service
- 4.3.3 Classification Processing Service
- 4.3.4 NER Processing Service
- 4.3.5 Service Mapping
- 4.3.6 Business Service Mapping

## 4.3.1 Classification Training Service

This section elaborates the payload details for document classification model training service.

### Input Payload

#### Table 98: Input Payload

name	in	type	required	Remarks
trainCorpusPath	formData	string	true	Training Corpus path
modelType	formData	File	true	Type of model being trained
runRef	formData	string	true	Unique running reference number

MltbNerKeyValExtractedObjDTO: type: object properties: tagName: type: string value: type: string start\_index: type: number

end\_index: type: number

# 4.3.5 Service Mapping

After creation of the model services, entries must be made into the table CMC\_TM\_ML\_SERVICE\_DEFN to enable the NLP framework to use these services.

## Existing use case:

Update the highlighted column in table CMC\_TM\_ML\_SERVICE\_DEFN with the new service API.

Column name	Remarks	Model Training	Model Processing
ID	Unique ID		
USECASE_NAME	Use Case Name	<existing case="" use=""></existing>	<existing case="" use=""></existing>
DESCRIPTION	Use Case Description		
SERVICE_TYPE	Service Type	Training	Processing
SERVICE_DEFN	Mapped Service API	<new api="" service=""></new>	<new api="" service=""></new>
METHOD_TYPE	Method Type	POST	POST
APP_ID	Sub Domain ID		
RECORD_STAT	Record Status	0	0
AUTH_STAT	Authorized Status	А	А
MOD_NO	Modification Number	1	1
ONCE_AUTH	Once Authorized	Y	Y
MAKER_ID	Maker Name	SYSTEM	SYSTEM
MAKER_DT_STAMP	Maker Date stamp	<application date=""></application>	<application date=""></application>
CHECKER_ID	Authorizer Name	SYSTEM	SYSTEM
CHECKER_DT_STAM	Authorizer Date stamp	<application date=""></application>	<application date=""></application>

## Table 102: Existing Use Case

### New use case

Insert a new record into the table CMC\_TM\_ML\_SERVICE\_DEFN.

### Table 103: New Use Case

Column name	Description	Remarks for Data
ID	Unique ID	Ensure a Unique ID
USECASE_NAME	Use Case Name	Must be one of the usecase_name from the table CMC_TM_ML_NER_TAG_MAS
DESCRIPTION	Use Case Description	

Column name	Description	Remarks for Data	
		'Training'	Use this value for model Training Service
SERVICE_TYPE	Service Type	'Processing'	Use this value for model execution Service
		'Business'	Use this value for business Service
SERVICE_DEFN	Mapped Service API	<the 3p="" created="" i<="" newly="" td=""><td>NLP service API&gt;</td></the>	NLP service API>
METHOD_TYPE	Method Type	POST	
APP_ID	Sub Domain ID	NULL	
RECORD_STAT	Record Status	0	
AUTH_STAT	Authorized Status	A	
MOD_NO	Modification Number	1	
ONCE_AUTH	Once Authorized	Y	
MAKER_ID	Maker Name	SYSTEM

CHECKER_ID	Authorizer Name	SYSTEM	
CHECKER_DT_STAMP	Authorizer Date stamp	<application date=""></application>	

# 4.3.6 Business Service Mapping

If straight through processing is enabled in use case definition, then entries must be made into the table CMC\_TM\_ML\_BUS\_SERVICE\_DEFN to enable the NLP framework to call the Business Service.

Insert a new record into the table CMC\_TM\_ML\_BUS\_SERVICE\_DEFN for each use-case with straight through processing enabled.

Table	104:	For	Each	Use	Case

Column name	Description	Remarks for Data	
ID	Unique ID	Ensure a Unique ID	
USECASE_NAME	Use Case Name	Must be one of the usecase_name from the table CMC_TM_ML_NER_TAG_MAS	
DESCRIPTION	Use Case Description		
SERVICE_TYPE	Service Type	'Business'	Use this value for business Service
ADAPTER_CLASS	Fully qualified name of the adapter class	Use oracle.fsgbu.cmc.nlp.pipeline.services.adapto ricAdaptor for all the business service calls Use oracle.fsgbu.cmc.nlp.pipeline.services.adapto HAdaptor if you want to call business service OBRH	
SERVICE_DEFN	Mapped Service API	API, which will be called for Business service execution	
HEADERS	EADERS Comma separated headers key value separated by colon (:)		Code : 000
METHOD_TYPE	Method Type	POST	
APP_ID	Sub Domain ID	NULL	
RECORD_STAT	Record Status	0	

Column name	Description	Remarks for Data
AUTH_STAT	Authorized Status	A
MOD_NO	Modification Number	1
ONCE_AUTH	Once Authorized	Y
MAKER_ID	Maker Name	SYSTEM
MAKER_DT_STAMP	Maker Date stamp	<application date=""></application>
CHECKER_ID	Authorizer Name	SYSTEM
CHECKER_DT_STAMP	Authorizer Date stamp	<application date=""></application>

If you are Integrating Business Service via OBRH then in service definition column, you need to provide URL of OBRH dispatch API and the additional headers in headers column.

Since there are some common headers, which are required for calling OBRH as well (like appld, branchCode, uderId) and to avoid the conflict for these headers, the ML\_ prefix is appended in header keys by OBRH adaptor. You need to configure transformation logic of these headers in OBRH.

# 5 Error Codes and Messages

This topic contains the error codes and messages:

Error Codes	Messages
CC-01015	Default BIC Is Checked For More Than One BIC
CC-01016	Swift Address is Mandatory
CC-01017	Default BIC Is Not Checked For any BIC
CC-01018	Same Swift Address is present more than once
CC-01019	Mismatch in bank code
CC-ACC-002	Currency should be null for Multi-Currency Account
CC-ACC-102	Record already exist for Source Branch and Source Account No combination
CC-ACC-169	Reopen not allowed for a closed Customer No
CC-BIC-010	Bic code is being used in branch maintenance. Close not allowed.
CC-BIC02	The BIC code does not conform to SWIFT standards
CC-BIC05	Record already maintained for the customer no
CC-BNK-001	Branch code is in Open status. Close not allowed.
CC-BNK-002	Reopen not allowed for a closed Branch Code
CC-BNK-003	Only one Bank Code is allowed.
CC-BRN-101	Active account / accounts exist for the branch code. Close not allowed.
CC-BRN-102	This is HO branch. Close not allowed.
CC-BRN-103	Record for Source Branch Code already exists
CC-C00100	Relationship cannot be No for a Customer Linked BIC Code

Error Codes	Messages
CC-CUS-167	Record already exist for customer no and source_system_cust_no combination
CC-CUS-169	Active account/accounts exist for the customer no
CC-CUS-17	Kindly Enter a Valid Walkin Customer
CC-EC-002	Record already exist for Account IBAN
CC-ECA-001	Active \$1 exist for the Source System
CC-HST-001	Active \$1 exist for the Host Code
CC-MOD-001	\$1 cannot be modified
CC-MOD-INV	\$1 is invalid
CC-NUL-001	\$1 cannot be null
CC-TXN-001	\$1 is closed. Reopen not allowed.
CMC-ACC-FOR01	Cannot reopen forgotten account
CMC-ACC-PII01	User doesnt have access to PII data, cannot perform create or modify operations
CMC-ACC-SUBAC01	No SubAccounts available for Multi-Currency Account
CMC-ACC-SUBAC02	Exactly one account should be primary account
CMC-ACC-SUBAC03	Sub Accounts should have unique currency code
CMC-BRN-018	Exception occurred in ICFlipDate
CMC-BRN-019	Unable to get branch date
CMC-BRN-020	Branch code is null
CMC-BRN-100	Branch Status retrieved Successfully
CMC-BRN-101	Branch doesnot exist
CMC-BRN-CD01	Date changed successfully
CMC-BRN-CD02	Failed to change date, holiday list not maintained properly

Error Codes	Messages
CMC-BRN-EOD01	Branch Status not in TI, cannot initiate EOD
CMC-BRN-EOD02	EOD invoked for the branch
CMC-BRN-EOD03	Invalid Branch Code
CMC-BRN-EOD04	Eod Requested on Date is not Branch's Today
CMC-BRN-EOD05	EOD cannot be invoked on a holiday
CMC-BRN-EOD06	Date changed successfully
CMC-BRN-EOD07	EOD not invoked, cannot initiate change date
CMC-BRN-EOD08	EOFI job not completed, cannot initiate change date
CMC-BRN-EOD09	EOD not invoked, cannot initiate mark TI
CMC-BRN-EOD10	Date Change job not completed, cannot initiate TI for next day
CMC-BRN-EOD11	Mark TI successful
CMC-BRN-EOD12	Branch status not in TI, cannot initiate Mark EOFI
CMC-BRN-EOD13	Branch status not in EOFI, cannot change Date
CMC-BRN-EOD14	Branch status for next working date update to BOD
CMC-BRN-EOD15	Branch status not in BOD, cannot mark TI
CMC-BRN-EOD16	Branch status for next working date update to TI
CMC-BRN-EOD17	Branch Status Changed to EOFI
CMC-BRN-EOD18	Invoke Mark TI failed
CMC-BRN-EOD19	Date change completed cannot retrigger
CMC-BRN-EOD20	Mark TI completed cannot retrigger
CMC-BRN-EOD21	Date changed failed
CMC-BRN-EOD30	Invalid requested date, failed to parse
CMC-BRN-EOD31	Mark Eoti retry intiated

Error Codes	Messages
CMC-BRN-EOD32	Cannot retry Mark EOFI which has not failed
CMC-BRN-EOD33	Date Changed successfully. \$1
CMC-BRN-EOD34	BOD Batches completed successfully.
CMC-BRN-EOD35	BOD Batches retriggered successfully. \$1
CMC-BRN-EOD36	\$1. Hence EOFI Failed.
CMC-BRN-EOD37	Failed in getting current date
CMC-CCY-001	Duplicate records exists in Amount word currency Mapping
CMC-CCY-002	Duplicate records exists in Amount Text Mapping
CMC-CCY-003	Cannot change Currency Decimal for once authorized currencies
CMC-CCY-004	Cannot Change round unit if the round rule is Truncate (T)
CMC-CCY-005	Mandatory field Interest Method is not entered
CMC-CCY-006	Mandatory field Spot Days is not entered
CMC-CCY-007	Mandatory field Settlement Days is not entered
CMC-CCY-008	Mandatory field Country is not entered
CMC-CCY-009	Mandatory field Rule is not entered
CMC-CCY-010	Value should be in range of 0 and 999 for Settlement Days
CMC-CCY-011	Mandatory field Unit is not entered
CMC-CCY-012	Decimals/ Rounding Unit Mismatch
CMC-CCY-013	Numerator of Interest Method is not Actual
CMC-CCY-014	Duplicate Alternate Currency Code
CMC-CCY-015	Duplicate ISO Numeric Currency Code
CMC-CCY-016	Duplicate Euro currency

Error Codes	Messages
CMC-CCY-017	Euro Conversion required cannot be changed for the currency types out, Euro and Euro closed
CMC-CCY-018	Spot days is less than fx netting days
CMC-CCY-019	Currency Cut Off days cannot be greater than spot days for currency
CMC-CCY-020	Spot Days for currency cannot be lesser than cut off days for currency
CMC-CCY-021	Value should be in range of 1 and 99 for Cut Off Days
CMC-CCY-022	Value should be in range of 1 and 23 for Cut Off Hour
CMC-CCY-023	Value should be in range of 1 and 59 for Cut Off Min
CMC-CCY-024	Value cannot be less than .00000 for Currency Total limit
CMC-CCY-025	Value should be in range of 0 and 3 for Currency Decimal
CMC-CCY-026	Country Code is Mandatory
CMC-CCY-027	Duplicate records exists in Currency Country Mapping
CMC-CCY-028	Mandatory field Country is not entered in Currency Country Mapping
CMC-CCY-029	Currency Code is NULL
CMC-CCY-030	Date is NULL
CMC-CCY-031	Date is Invalid (should be in yyyy-mm-dd format)
CMC-CCY-032	No record found
CMC-CCY-033	Next/Previous indicator is NULL (should be either N or P)
CMC-CCY-034	Next/Previous indicator is Invalid (should be either N or P)
CMC-CCY-035	Lower Limit Date is Invalid (should be in yyyy-mm-dd format)
CMC-CCY-036	Upper Limit Date is Invalid (should be in yyyy-mm-dd format)
CMC-CCY-037	Offset is NULL
CMC-CCY-038	Offset is Invalid (should be > 0)

Error Codes	Messages
CMC-CCY-039	Input date should be between Upper limit date and Lower limit date
CMC-CCY-040	Duplicate records exists in CurrencyHolidays
CMC-CCY-041	Mandatory Through Currency Code is not entered
CMC-CCY-042	Cannot change spread definition option for through currency pair
CMC-CCY-043	Through currency should be blank if the through currency is unchecked
CMC-CCY-044	Through currency has to be of type Euro
CMC-CCY-045	Through Currency is not allowed for Euro In Currency Pair
CMC-CCY-046	Points multiplier should be in the range 0 - 1
CMC-CCY-047	MidRate is invalid
CMC-CCY-048	BuySpread is invalid
CMC-CCY-049	SaleSpread is invalid
CMC-CCY-050	Atleast one Currency Rate Should be Maintained
CMC-CCY-051	Duplicate records exists in Rate
CMC-CCY-052	Currency Code is NULL
CMC-CCY-053	Currency Code is Empty
CMC-CCY-054	Amount is NULL
CMC-CCY-055	Option is NULL
CMC-CCY-056	Option is Empty
CMC-CCY-057	Method is NULL
CMC-CCY-058	Method is Empty
CMC-CCY-059	Decimal is NULL
CMC-CCY-060	Units is NULL

Error Codes	Messages
CMC-CCY-061	Maintenance Country is NULL
CMC-CCY-062	Maintenance Country is Empty
CMC-CCY-063	Currency1/Currency2/branch Code is NULL
CMC-CCY-065	Error in conversion
CMC-CCY-066	Rate is not handled for currency1 and currency2
CMC-CCY-067	Rate is not handled for currency2 and currency1
CMC-CCY-068	Error in Amount rounding
CMC-CCY-069	Currency definition is not maintaned for given currency and maintenance country
CMC-CCY-070	Error in getting branch currency and country
CMC-CCY-071	Error in getting currency pair for currency1 and currency2
CMC-CCY-072	Error in getting Premium points for currency1 and currency2
CMC-CCY-073	Error in getting rate with through currency
CMC-CCY-074	Error in getting Rate
CMC-CCY-075	Rate History is not handled for currency1 and currency2
CMC-CCY-076	Rate History is not handled for currency2 and currency1
CMC-CCY-077	Currency Pair is not maintained
CMC-CCY-078	Error in purging
CMC-CCY-079	Data inadequate in currency Pair Definition
CMC-CCY-080	Currency Pair already exists for the given Maintenance Country
CMC-CCY-081	MidRate is mandatory
CMC-CCY-082	Either buySpread/buyRate are mandatory
CMC-CCY-083	Either saleSpread/saleRate are mandatory

Error Codes	Messages
CMC-CUS-FOR01	Record successfully deleted
CMC-CUS-PII01	User doesnt have access to PII data, cannot perform create or modify operations
CMC-EOD-001	Invoked EOD successfully
CMC-EOD-002	Failed while resolving current date
CMC-EOD-003	EOD flow is not maintained for \$1 branch
CMC-EOD-004	EOD already invoked for today
CMC-EOD-005	Unable to invoke EOD
CMC-EOD-006	Retried EOD successfully
CMC-EOD-007	Failed to retry EOD
CMC-EOD-008	Pending maintenances exist. Failed to start EOD
CMC-EOD-009	Failed during pending maintenance check
CMC-EOD-010	Pending transactions exist. Failed to start EOD
CMC-EOD-011	Failed during pending transaction check
CMC-EOD-012	Marked cutoff for the branch successfully
CMC-EOD-013	Branch not in Transaction Input. Cannot mark cutoff
CMC-EOD-014	Branch not in BOD stage. Cannot release cutoff
CMC-EOD-015	Released cutoff for the branch successfully
CMC-EOD-016	Branch cutoff not released. Cannot mark Transaction Input
CMC-EOD-017	Branch cutoff not marked. Cannot mark End of Transaction Input
CMC-FORC-001	Request is null, not valid.
CMC-FORC-002	Forget customers request created successfully.
CMC-FORC-003	Failed to create forget entities request.

Error Codes	Messages
CMC-FORC-004	Invalid id sent, id null
CMC-FORC-005	Already authorized
CMC-FORC-006	Authorized successfully
CMC-FORC-007	Record not found, invalid id.
CMC-FORC-008	Cannot delete authorized record
CMC-FORC-009	Record successfully deleted
CMC-FORC-010	Invalid Customer \$1 added, customer should be valid and in closed and authorized state without pending maintenance
CMC-FORC-011	Invalid request. Duplicate requests for customer number \$1
CMC-INDBML-001	Usecase already exists with a same name
CMC-INDBML-002	Target Column cannot be null
CMC-INDBML-003	Unique Case Identifier Column cannot be null
CMC-INDBML-004	Invalid Partition column value
CMC-INDBML-005	Duplicate Column Values
CMC-INDBML-006	Partition Columns cannot be same as either of target, usecase identifier or prediction column.
CMC-LOV-001	Invalid Source Code
CMC-LOV-002	Invalid Currency
CMC-LOV-003	Cannot Close the record for which rates are maintained
CMC-LOV-004	Invalid Language Code
CMC-LOV-005	Invalid Country
CMC-LOV-006	Invalid GLCode
CMC-LOV-007	Invalid Limit Currency
CMC-LOV-008	Invalid Year

Error Codes	Messages
CMC-LOV-009	Invalid Month
CMC-LOV-010	Amount Limit Exceeds
CMC-LOV-011	Invalid Version
CMC-LOV-012	Rate Type \$1 is invalid
CMC-NLP-000	System is unable to process the request
CMC-NLP-001	Training File created successfully
CMC-NLP-002	Training File creation failed
CMC-NLP-003	Service definition not found for \$1 for use case \$2
CMC-NLP-004	Unsupported file type uploaded please upload supported file type
CMC-NLP-005	You don't have sufficient number of training files for use case \$1 to train the model
CMC-NLP-006	Invalid training files are present in the training corpus
CMC-NLP-007	Error in processing step \$1
CMC-NLP-008	Successfully completed the processing of process \$1
CMC-OBRH-001	Record already exists.

# 6 Glossary

This section provides a glossary of all terms and abbreviations used in the user manual.

#### Accounts

Continuing financial relationship between a bank and a customer, in which deposits and debts are held and processed within a framework of established rules and procedures.

### Reports

A page containing information organized in a narrative, graphic, or tabular format, prepared on ad-hoc, periodic, recurring, regular, or as required basis. Reports may refer to specific periods, events, occurrences, or subjects.

#### **Pareto Chart**

It is a type of chart that consists of both bars and a line graph, where individual values are represented in descending order by bars, and the cumulative total is represented by the line.

#### Sunburst Chart

It is a type of chart that is ideal for displaying hierarchical data. Each level of the hierarchy is represented by one ring or circle with the innermost circle as the top of the hierarchy. A sunburst chart without any hierarchical data (one level of categories), looks similar to a doughnut chart.

#### **Virtual Account**

Virtual accounts are provided to a corporate by its banking partner. Each account is a subsidiary or subaccount of the client's own physical account with the bank; they cannot exist outside of the immediate relationship; hence they are virtual.

### Virtual Identifier

Virtual identifier serves to segregate any funds from any other funds in the same main account and yet is inextricably linked to the virtual account.
