This software and related documentation are provided under a license agreement containing restrictions on use and disclosure and are protected by intellectual property laws. Except as expressly permitted in your license agreement or allowed by law, you may not use, copy, reproduce, translate, broadcast, modify, license, transmit, distribute, exhibit, perform, publish, or display any part, in any form, or by any means. Reverse engineering, disassembly, or decompilation of this software, unless required by law for interoperability, is prohibited.

The information contained herein is subject to change without notice and is not warranted to be error-free. If you find any errors, please report them to us in writing.

If this is software or related documentation that is delivered to the U.S. Government or anyone licensing it on behalf of the U.S. Government, then the following notice is applicable:

U.S. GOVERNMENT END USERS: Oracle programs, including any operating system, integrated software, any programs installed on the hardware, and/or documentation, delivered to U.S. Government end users are "commercial computer software" pursuant to the applicable Federal Acquisition Regulation and agency-specific supplemental regulations. As such, use, duplication, disclosure, modification, and adaptation of the programs, including any operating system, integrated software, any programs installed on the hardware, and/or documentation, shall be subject to license terms and license restrictions applicable to the programs. No other rights are granted to the U.S. Government.

This software or hardware is developed for general use in a variety of information management applications. It is not developed or intended for use in any inherently dangerous applications, including applications that may create a risk of personal injury. If you use this software or hardware in dangerous applications, then you shall be responsible to take all appropriate fail-safe, backup, redundancy, and other measures to ensure its safe use. Oracle Corporation and its affiliates disclaim any liability for any damages caused by use of this software or hardware in dangerous applications.

Oracle and Java are registered trademarks of Oracle and/or its affiliates. Other names may be trademarks of their respective owners.

Intel and Intel Xeon are trademarks or registered trademarks of Intel Corporation. All SPARC trademarks are used under license and are trademarks or registered trademarks of SPARC International, Inc. AMD, Opteron, the AMD logo, and the AMD Opteron logo are trademarks or registered trademarks of Advanced Micro Devices. UNIX is a registered trademark of The Open Group.

This software or hardware and documentation may provide access to or information about content, products, and services from third parties. Oracle Corporation and its affiliates are not responsible for and expressly disclaim all warranties of any kind with respect to third-party content, products, and services unless otherwise set forth in an applicable agreement between you and Oracle. Oracle Corporation and its affiliates will not be responsible for any loss, costs, or damages incurred due to your access to or use of third-party content, products, or services, except as set forth in an applicable agreement between you and Oracle.

CAUTION: Use only the Upgrade procedure included in the Upgrade Kit.

Before upgrading any system, please access My Oracle Support (MOS) (<https://support.oracle.com>) and review any Technical Service Bulletins (TSBs) that relate to this upgrade.

My Oracle Support (MOS) (<https://support.oracle.com>) is your initial point of contact for all product support and training needs. A representative at Customer Access Support (CAS) can assist you with MOS registration.

Call the CAS main number at 1-800-223-1711 (toll-free in the US), or call the Oracle Support hotline for your local country from the list at <http://www.oracle.com/us/support/contact/index.html>.

See more information on My Oracle Support (MOS).

1. Introduction

This document defines the procedure that is executed to activate the DCA feature (or beyond) network element (NE). This procedure may be run either 1) As part of a new DSR installation, after the standard installation is complete but before the NE is in service, or 2) on an in-service DSR NE, where the DCA feature is activated during a planned maintenance window to minimize the impact to network traffic.

This document also provides a procedure to deactivate DCA framework and applications after it has been activated. Refer to Section 6 for a discussion of deactivation.

No additional software installation is required prior to executing this procedure. The standard DSR installation procedure has loaded all of the required software, even if the DCA feature is activated at a later time.

1.2 Acronyms

An alphabetized list of acronyms used in the document.

Table 1. Acronyms

Acronym	Definition
BNS	Broadband Networking Solutions
DCA	Diameter Custom Applications
CAPM	Computer-Aided Policy Making
DA-MP	Diameter Agent Message Processor
DB	Database
DSR	Diameter Signaling Router
FOA	First Office Application
GUI	Graphical User Interface
HA	High Availability
IMI	Internal Management Interface
IP	Internet Protocol
MP	Message Processing or Message Processor
NE	Network Element
NO	Network OAM
NOAM	Network OAM
OAM	Operations, Administration and Maintenance
SSH	Secure Shell
UI	User Interface
VIP	Virtual IP

Acronym	Definition
VPN	Virtual Private Network
XMI	External Management Interface

1.3 Terminology

Table 2. Terminology

Term	Definition
NOAM	Network Operations and Maintenance
SOAM	System Operations and Maintenance

1.4 General Procedure Step Format

Figure 1 illustrates the general format of procedure steps as they appear in this document. Where it is necessary to explicitly identify the server on which a particular step is to be taken, the server name is given in the title box for the step (e.g., **ServerX** in Figure 1).

Each step has a checkbox for every command within the step that the technician should check to keep track of the progress of the procedure.

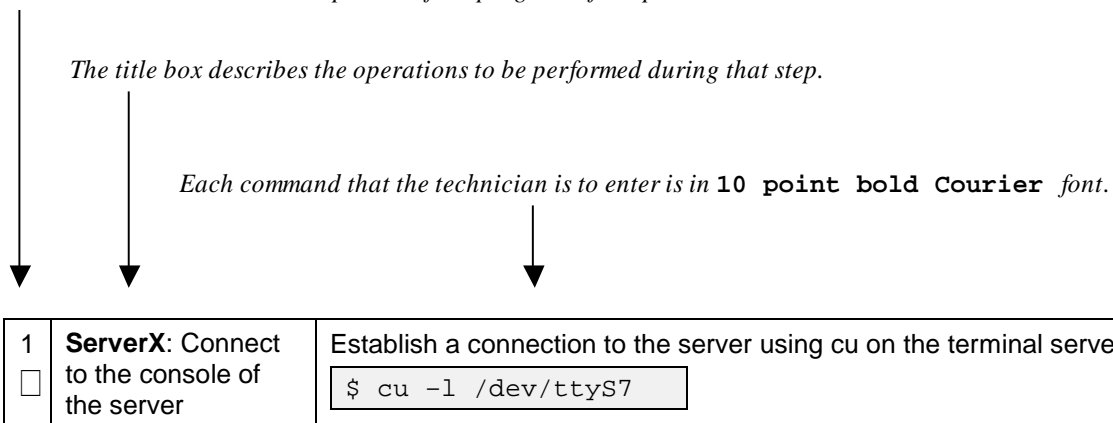

Figure 1. Example of a Procedure Step

2. Feature Activation Overview

This section lists the required materials and information needed to execute the feature activation. In addition, Table 4 through Table 11 provide estimates of the time required to execute the procedure. These tables can be used to estimate the total time necessary to complete the feature activation. The timing values shown are estimates only – use these tables to plan the timing of the activation, **not** to execute the procedure. The detailed procedure steps to be executed begin in Section 4.

2.1 Definition of Activation for the DCA Feature

The precise meaning of activation varies from feature to feature. This section briefly defines what activation means with respect to the DCA feature.

All software required to run DCA is available by default as part of a DSR installation or upgrade. The process of activating the feature simply makes proper use of software elements and file system files that are already present, to change the behavior of the DSR NE.

Table 3. Behavior of DCA Framework and Application Activation and Deactivation

SL No	DCA	Behavior
1	DCA Framework Activation	Section 5.2.1
2	DCA Application Activation	Section 5.2.2
3	DCA Application Deactivation	Section 6.2.1
4	DCA Framework Deactivation	Section 6.2.2

2.2 Feature Activation Overview

2.2.1 Pre-Feature Activation Overview

The pre-activation procedures shown in the following table may be executed outside a maintenance window if desired. Procedure completion times shown here are estimates. Times may vary due to differences in database size, network configuration and loading, user experience, and user preparation.

Table 4. Pre-Feature Activation Overview

Procedure	Elapsed Time (Hours:Minutes)		Activity Feature Activation Preparation
	This Step	Cum.	
System Topology Check (Procedure 1)	0:10-0:30	0:20-1:00	<ul style="list-style-type: none"> Verify network element configuration data Verify system group configuration data
Perform Health Check (Procedure 2)	0:01-0:05	0:21-1:05	<ul style="list-style-type: none"> Verify DSR release Verify server status Log all current alarms

2.2.2 Feature Activation Execution Overview

The procedures shown in the following table are executed inside a single maintenance window. Procedure completion times shown here are estimates. Times may vary due to differences in database size, network configuration and loading, user experience, and user preparation.

Table 5. DCA Framework Activation Execution Overview

Procedure	Elapsed Time (Hours:Minutes)		Activity Feature Activation Execution	Impact
	This Step	Cum.		
Perform Health Check (Procedure 3)	0:01-0:05	0:01-0:05	<ul style="list-style-type: none"> Verify DSR release Verify proper DCA state Verify server status Log all current alarms 	None
DCA Framework Activation (Procedure 4)	0:10-0:30	0:11-0:35	<ul style="list-style-type: none"> Log out of NOAM GUI SSH to Active NO Change to the feature activation directory Execute the feature activation script Log into active NOAM and SOAM GUI Verify the DCA framework folder Close SSH connections to both NOAMs 	DCA framework is activated on DSR

The procedures shown in the following table are executed inside a single maintenance window. Procedure completion times shown here are estimates. Times may vary due to differences in database size, network configuration and loading, user experience, and user preparation.

Table 6. DCA Application Activation Execution Overview

Procedure	Elapsed Time (Hours:Minutes)		Activity Feature Activation Execution	Impact
	This Step	Cum.		
DCA Application Activation (Procedure 5)	0:10-0:30	0:11-0:35	<ul style="list-style-type: none"> Log out of NOAM GUI SSH to active NO Change to the feature activation directory Execute the feature activation script Log into active NOAM and SOAM GUI Verify the DCA application folder Close SSH connections to both NOAMs 	DCA application is activated on DSR

2.2.3 Post-Feature Activation Overview

The procedures shown in the following table are executed inside a maintenance window. Procedure completion times shown here are estimates. Times may vary due to differences in database size, network configuration and loading, user experience, and user preparation.

Table 7. Post-Feature Activation Overview

Procedure	Elapsed Time (Hours:Minutes)		Activity Feature Activation Execution	Impact
	This Step	Cum.		
Perform Health Check (Procedure 7)	0:01-0:05	0:01-0:05	<ul style="list-style-type: none"> • Verify Server status • Log all current alarms 	DCA has been activated on DSR

3. Feature Deactivation Overview

3.1 Pre-Feature Deactivation Overview

The procedures shown in the following table are executed inside a maintenance window. Deactivation procedure times are only estimates as the reason to execute a deactivation has a direct impact on any additional deactivation preparation that must be done. Times may vary due to differences in database size, network configuration and loading, user experience, and user preparation.

Table 8. Pre-Feature Deactivation Overview

Procedure	Elapsed Time (Hours:Minutes)		Activity Feature Activation Execution	Impact
	This Step	Cum.		
Perform Health Check (Procedure 8)	0:01- 0:05	0:01-0:05	<ul style="list-style-type: none"> • Verify DSR release • Verify proper DCA state • Verify server status • Log current alarms 	None

3.2 Feature Deactivation Execution Overview

The procedures shown in the following table are executed inside a maintenance window. Deactivation procedure times are only estimates as the reason to execute a deactivation has a direct impact on any additional deactivation preparation that must be done. Times may vary due to differences in database size, network configuration and loading, user experience, and user preparation.

Table 9. DCA Application Deactivation Overview

Procedure	Elapsed Time (Hours:Minutes)		Activity Feature Activation Execution	Impact
	This Step	Cum.		
Deactivation Setup	0:10-0:30	0:10-0:30	The reason to deactivate has a direct impact on any additional backout preparation that must be done. Since all possible reasons cannot be predicted ahead of time, only estimates are given here. Execution time varies.	None
Deactivation (Procedure 9)	00:10-00:20	0:20-0:50	<ul style="list-style-type: none"> • Log out of active NOAM GUI • SSH into active NO • Change directory • Execute the feature deactivation script • Log into active NOAM and SOAM GUI • Verify the DCA application folder • Close SSH connections to both NOAMs 	DCA application is deactivated on DSR.

Table 10. DCA Framework Deactivation Overview

Procedure	Elapsed Time (Hours:Minutes)		Activity Feature Activation Execution	Impact
	This Step	Cum.		
Deactivation Setup	0:10-0:30	0:10-0:30	The reason to deactivate has a direct impact on any additional backout preparation that must be done. Since all possible reasons cannot be predicted ahead of time, only estimates are given here. Execution time varies.	None
Deactivation (Procedure 10)	00:10-00:20	0:20-0:50	<ul style="list-style-type: none"> • Log out of active NOAM GUI • SSH into active NO • Change directory • Execute the feature deactivation script • Log into active NOAM and SOAM GUI • Verify the DCA folder • Close SSH connections to NOAM 	DCA framework is deactivated on DSR

3.3 Post-Feature Deactivation Overview

The procedures shown in the following table are executed inside a maintenance window. Deactivation procedure times are only estimates as the reason to execute a deactivation has a direct impact on any additional deactivation preparation that must be done. Times may vary due to differences in database size, network configuration and loading, user experience, and user preparation.

Table 11. Post-Feature Deactivation Overview

Procedure	Elapsed Time (Hours:Minutes)		Activity Feature Activation Execution
	This Step	Cum.	
Perform Health Check (Procedure 11)	0:01-0:05	0:01-0:05	<ul style="list-style-type: none"> • Verify server status. • Log all current alarms.

4. Feature Activation Preparation

It is expected that Oracle personnel following this Feature Activation Procedure document will activate the DCA framework first on a customer's DSR, then activate the DCA application as required for that customer.

This section provides detailed procedures to prepare a system for DCA feature activation. These procedures are executed outside a maintenance window.

4.1 System Topology Check

This procedure is part of feature activation preparation and is used to verify the system topology of the DSR network and servers.

Procedure 1: System Topology Check

STEP #	Procedure	Description
<p>This procedure verifies system topology.</p> <p>Check off (✓) each step as it is completed. Boxes have been provided for this purpose under each step number.</p> <p>If this procedure fails, contact My Oracle Support (MOS) and ask for assistance.</p>		
<p>1.</p> <p><input type="checkbox"/></p>	<p>NOAM VIP GUI: Login</p>	<p>Establish a GUI session on the NOAM server by using the VIP address of the NOAM server. Open the web browser and enter a URL of:</p> <div style="border: 1px solid black; padding: 2px; margin: 5px 0;"> <p>http://<Primary_NOAM_VIP_IP_Address></p> </div> <p>Login as the guiadmin user:</p> 

STEP #	Procedure	Description
<p>2. □</p>	<p>NOAM VIP GUI: Verify network configuration data</p>	<p>Navigate to Configuration -> Networking -> Networks.</p>  <p>Click Report.</p> <p><input type="button" value="Insert"/> <input type="button" value="Delete"/> <input type="button" value="Export"/> <input type="button" value="Report"/></p> <p>Verify the configuration data is correct for your network. Save or Print this report to keep copies for future reference.</p> <p><input type="button" value="Print"/> <input type="button" value="Save"/> <input type="button" value="Back"/></p>
<p>3. □</p>	<p>NOAM VIP GUI: Verify server configuration</p>	<p>Navigate to Configuration -> Server Groups.</p>  <p>Click Report.</p> <p><input type="button" value="Insert"/> <input type="button" value="Edit"/> <input type="button" value="Delete"/> <input type="button" value="Report"/></p> <p>Verify the configuration data is correct for your network. Save or Print this report to keep copies for future reference.</p> <p><input type="button" value="Print"/> <input type="button" value="Save"/> <input type="button" value="Back"/></p>

4.2 Perform Health Check

This procedure is part of feature activation preparation and is used to determine the health and status of the DSR network and servers. This may be executed multiple times but must also be executed at least once within the time frame of 24-36 hours before the start of the maintenance window in which the feature activation will take place.

Procedure 2: Perform Health Check

STEP #	Procedure	Description
<p>This procedure provides steps to perform needed health checks. Check off (✓) each step as it is completed. Boxes have been provided for this purpose under each step number. If this procedure fails, contact My Oracle Support (MOS) and ask for assistance.</p>		
<p>1. <input type="checkbox"/></p>	<p>NOAM VIP GUI: Login</p>	<p>Establish a GUI session on the NOAM server by using the VIP address of the NOAM server. Open the web browser and enter a URL of:</p> <div style="border: 1px solid gray; padding: 2px; width: fit-content; margin: 5px 0;"> <p>http://<Primary_NOAM_VIP_IP_Address></p> </div> <p>Login as the guidadmin user:</p> 
<p>2. <input type="checkbox"/></p>	<p>NOAM VIP GUI: Verify DSR release</p>	<p>Navigate to Administration -> Software Versions to verify the Eagle XG DSR RPM version shows version 8.0.0 or greater.</p>

STEP #	Procedure	Description																				
<p>3.</p> <p><input type="checkbox"/></p>	<p>NOAM VIP GUI: Verify server status</p>	<p>Navigate to Status & Manage -> Server.</p>  <p>Verify all Server Status is Normal (Norm) for: Alarm (Alm), Database (DB), Reporting Status, and Processes (Proc).</p> <table border="1" data-bbox="505 653 1442 808"> <thead> <tr> <th>AppI State</th> <th>Alm</th> <th>DB</th> <th>Reporting Status</th> <th>Proc</th> </tr> </thead> <tbody> <tr> <td>Enabled</td> <td>Norm</td> <td>Norm</td> <td>Norm</td> <td>Norm</td> </tr> <tr> <td>Enabled</td> <td>Norm</td> <td>Norm</td> <td>Norm</td> <td>Norm</td> </tr> <tr> <td>Enabled</td> <td>Norm</td> <td>Norm</td> <td>Norm</td> <td>Norm</td> </tr> </tbody> </table> <p>Do not proceed to feature activation if any of the above states are not Norm. If any of these are not Norm, corrective action should be taken to restore the non-Norm status to Norm before proceeding with the feature activation.</p> <p>If the Alarm (Alm) status is not Norm but only Minor alarms are present, it is acceptable to proceed with the feature activation. If there are Major or Critical alarms present, these alarms should be analyzed before proceeding with the feature activation. The activation may be able to proceed in the presence of certain Major or Critical alarms. Contact My Oracle Support (MOS) for assistance as necessary.</p>	AppI State	Alm	DB	Reporting Status	Proc	Enabled	Norm	Norm	Norm	Norm	Enabled	Norm	Norm	Norm	Norm	Enabled	Norm	Norm	Norm	Norm
AppI State	Alm	DB	Reporting Status	Proc

Enabled	Norm	Norm	Norm	Norm																		
Enabled	Norm	Norm	Norm	Norm																		
<p>4.</p> <p><input type="checkbox"/></p>	<p>NOAM VIP GUI: Log current alarms</p>	<p>Navigate to Alarms & Events -> View Active.</p>  <p>Click Report.</p>  <p>Save or Print this report to keep copies for future reference.</p> 																				

STEP #	Procedure	Description
5. <input type="checkbox"/>	NOAM VIP GUI: Log alarm history	Navigate to Alarms & Events -> View History . Click Report . <div style="border: 1px solid #ccc; padding: 5px; margin: 10px 0;"> Export Report Clear Selections </div> Save or Print this report to keep copies for future reference. <div style="margin-top: 10px;"> Print Save Back </div>

5. Feature Activation

Before feature activation, perform the system health check in Section 4.2. This check ensures the system is ready for feature activation. Performing the system health check determines which alarms are present in the system and if feature activation can proceed with alarms.

***** WARNING *****

If there are servers in the system, which are not in Normal state, these servers should be brought to the Normal or the Application Disabled state before the feature activation process is started.

If alarms are present on the server, contact My Oracle Support (MOS) to diagnose those alarms and determine whether they need to be addressed or if it is safe to proceed with the feature activation.

Read the following notes on feature activation procedures:

- Where possible, command response outputs are shown as accurately as possible. EXCEPTIONS are as follows:
 - Session banner information such as time and date.
 - System-specific configuration information such as hardware locations, IP addresses, and hostnames.
 - ANY information marked with “XXXX” or “YYYY” where appropriate, instructions are provided to determine what output should be expected in place of “XXXX or YYYY”
 - Aesthetic differences unrelated to functionality such as browser attributes: window size, colors, toolbars, and button layouts.
- After completing each step and at each point where data is recorded from the screen, the technician performing the feature activation must initial each step. A check box should be provided. For procedures which are executed multiple times, the check box can be skipped, but the technician must initial each iteration the step is executed. The space on either side of the step number can be used (margin on left side or column on right side).
- Captured data is required for future support reference.

5.1 Pre-Activation Procedure — Perform Health Check

This procedure is used to determine the health and status of the network and servers. This must be executed at the start of every maintenance window.

Note: The Health Check procedure below is the same as the Health Check procedure described in Section 4.2 when preparing for feature activation, but it is repeated here to emphasize that it is being re-executed if Section 4.2 was performed outside the maintenance window.

Procedure 3: Perform Health Check (Pre-Feature Activation)

STEP #	Procedure	Description
		This procedure performs needed health checks.
		Check off (√) each step as it is completed. Boxes have been provided for this purpose under each step number.
		If this procedure fails, contact My Oracle Support (MOS) and ask for assistance.

STEP #	Procedure	Description
<p>1. <input type="checkbox"/></p>	<p>NOAM VIP GUI: Login</p>	<p>Establish a GUI session on the NOAM server by using the VIP address of the NOAM server. 5.2 Activation Procedures

This section provides the detailed procedure steps of the feature activation execution. These procedures are executed inside a maintenance window.

5.2.1 DCA Framework Activation

Procedure 4: DCA Framework Activation

STEP #	Procedure	Description
<p>This procedure verifies that the feature activation steps have been completed.</p> <p>Check off (✓) each step as it is completed. Boxes have been provided for this purpose under each step number.</p> <p>If this procedure fails, contact My Oracle Support (MOS) and ask for assistance.</p>		
1. <input type="checkbox"/>	NOAM VIP GUI: Logout	Log out of any active NOAM GUI sessions.
2. <input type="checkbox"/>	Establish a secure shell session on the active NOAM	<p>Establish a secure shell session on the active NOAM by using the XMI VIP address. Login as the admusr.</p> <p>Use your SSH client to connect to the server (ex. Putty).</p> <p>Note: You must consult your own software client's documentation to learn how to launch a connection. For example:</p> <pre># ssh <active NO XMI VIP Address></pre>
3. <input type="checkbox"/>	DCA Activation: Change directory	<p>Change to the following directory:</p> <pre>\$ cd /usr/TKLc/dsr/prod/maint/loaders/activate</pre>
4. <input type="checkbox"/>	DCA Activation: Execute the DCA activation script	<p>Run the DCA activation script by executing the following command:</p> <pre># ./featureActivateDeactivate</pre> <p>Choose Activate and DCA Framework options.</p> <p>There is an option to choose to activate this feature on all SOAMs or on a specific SOAM. It is recommended to select Activate on all SOAM.</p> <p>Note: If a new site is added or if a SOAM site framework was not activated, the activation script can be executed again to add the application on new sites. The script does not have any impact on the sites on which the framework is already active.</p> <p>Verify the screen output is similar to Appendix A.</p>
5. <input type="checkbox"/>	NOAM VIP and SOAM VIP GUIs: Login	Log into the active NOAM and SOAM GUIs.

STEP #	Procedure	Description
6. <input type="checkbox"/>	NOAM VIP and SOAM VIP GUIs: Verify the DCA Framework folder and Configuration sub-menu	On NOAM, verify the DCA Framework folder displays under the DSR Main Menu with Configuration as a sub-menu. On SOAM, verify the DCA Framework folder displays under the DSR Main Menu with Configuration as a sub-menu.
7. <input type="checkbox"/>	Close SSH connection to active NOAMs	Log out of the active NOAM login shell and close the SSH connections by executing the following command: <pre># exit</pre> Close the SSH connection

5.2.2 DCA Application Activation

DCA framework must be activated before any application can be activated.

Procedure 5: DCA Application Activation

STEP #	Procedure	Description
<p>This procedure verifies that the global admin has been enabled..</p> <p>Check off (✓) each step as it is completed. Boxes have been provided for this purpose under each step number.</p> <p>If this procedure fails, contact My Oracle Support (MOS) and ask for assistance.</p>		
1. <input type="checkbox"/>	NOAM VIP GUI: Logout	Log out of any active NOAM GUI sessions.
2. <input type="checkbox"/>	Establish a secure shell session on the active NOAM	Establish a secure shell session on the active NOAM by using the XMI VIP address. Login as the admusr . Use your SSH client to connect to the server (ex. Putty). Note: You must consult your own software client's documentation to learn how to launch a connection. For example: <pre># ssh <active NO XMI VIP Address></pre>
3. <input type="checkbox"/>	Change to the DCA activation directory	<pre># cd /usr/TKLC/dsr/prod/maint/loaders/</pre>

STEP #	Procedure	Description
4. <input type="checkbox"/>	Execute the DCA activation script	<p>Execute the feature activation script: # ./featureActivateDeactivate</p> <p>Choose Activate and DCA Application. When asked, select Activate a DCA Application.</p> <p>Note: The above option is not asked the DCA is not active on the system. The script goes directly to Activate a DCA Application mode.</p> <p>When asked, Enter the long name for the DCA application. Note: The DCA long name should consist of a combination of letters, numbers, and spaces and should not begin with a space. It has a maximum of 32 characters.</p> <p>When asked, Enter the short name for the DCA application. Note: The DCA short name should consist of a combination of letters and numbers. It has a maximum of 6 characters.</p> <p>Verify the screen looks similar to Appendix C. Navigate to Status & Manage -> Server to restart the DSR MP.</p>
5. <input type="checkbox"/>	NOAM VIP and SOAM VIP GUIs: Login	Log into the active NOAM and SOAM GUIs.
6. <input type="checkbox"/>	NOAM VIP and SOAM VIP GUIs: Verify the DCA Application folder and sub-menus	<p>On NOAM, verify the DCA folder with the name provided in step 4 displays under the DCA Framework menu. Sub-menus should include: General Options, Trial MP assignment, and Application Control.</p> <p>On SOAM, verify the DCA folder with the name provided in step 4 displays under the DCA Framework menu. Sub-menus should include: General Options, Trial MP assignment, Application Control, and System Options.</p>
7. <input type="checkbox"/>	Close SSH connection to active NOAMs	<p>Log out of the active NOAM login shell and close the SSH connections by executing the following command: # exit</p> <p>Close the SSH connection</p>

5.2.3 DCA Application Reactivation

DCA Feature reactivation option is executed mainly during Disaster Recovery. It allows reactivating all the activated DCA Application in the system after Disaster Recovery procedure is executed. Detailed steps are given in the procedure below.

Procedure 6: DCA Application Reactivation

STEP#	Procedure	Description
		<p>This procedure verifies that the global admin has been enabled..</p> <p>Check off (✓) each step as it is completed. Boxes have been provided for this purpose under each step number.</p> <p>If this procedure fails, contact My Oracle Support (MOS) and ask for assistance.</p>

STEP#	Procedure	Description
1. <input type="checkbox"/>	NOAM VIP GUI: Logout	Log out of any active NOAM GUI sessions.
2. <input type="checkbox"/>	Establish a secure shell session on the active NOAM	Establish a secure shell session on the active NOAM by using the XMI VIP address. Login as the admusr . Use your SSH client to connect to the server (ex. Putty). Note: You must consult your own software client's documentation to learn how to launch a connection. For example: <pre># ssh <active NO XMI VIP Address></pre>
3. <input type="checkbox"/>	Change to the DCA activation directory	<pre># cd /usr/TKLC/dsr/prod/maint/loaders/</pre>
4. <input type="checkbox"/>	Execute the DCA activation script	Execute the feature activation script: <pre># ./featureActivateDeactivate</pre> Choose Activate and DCA Application . When asked, select Activate a DCA Application . Note: The above option is not asked the DCA is not active on the system. The script goes directly to Activate a DCA Application mode. When asked, Enter the long name for the DCA application . Note: The DCA long name should consist of a combination of letters, numbers, and spaces and should not begin with a space. It has a maximum of 32 characters. When asked, Enter the short name for the DCA application . Note: The DCA short name should consist of a combination of letters and numbers. It has a maximum of 6 characters. Verify the screen looks similar to Appendix C. Navigate to Status & Manage -> Server to restart the DSR MP.
5. <input type="checkbox"/>	NOAM VIP and SOAM VIP GUIs: Login	Log into the active NOAM and SOAM GUIs.
6. <input type="checkbox"/>	NOAM VIP and SOAM VIP GUIs: Verify the DCA Application folder and sub-menus	On NOAM, verify the DCA folder with the name provided in step 4 displays under the DCA Framework menu. Sub-menus should include: General Options, Trial MP assignment, and Application Control. On SOAM, verify the DCA folder with the name provided in step 4 displays under the DCA Framework menu. Sub-menus should include: General Options, Trial MP assignment, Application Control, and System Options.
7. <input type="checkbox"/>	Close SSH connection to active NOAMs	Log out of the active NOAM login shell and close the SSH connections by executing the following command: <pre># exit</pre> Close the SSH connection

5.3 Post-Activation Procedures

5.3.1 Perform Health Check

This procedure is used to determine the health and status of the DSR network and servers.

Procedure 7: Perform Health Check (Post-Feature Activation)

STEP#	Procedure	Description
<p>This procedure performs a Health Check. Check off (✓) each step as it is completed. Boxes have been provided for this purpose under each step number. If this procedure fails, contact My Oracle Support (MOS) and ask for assistance.</p>		
<p>1. <input type="checkbox"/></p>	<p>NOAM VIP GUI: Login</p>	<p>Establish a GUI session on the NOAM server by using the VIP address of the NOAM server. Open the web browser and enter a URL of:</p> <div style="border: 1px solid black; padding: 2px; margin: 5px 0;"> <p>http://<Primary_NOAM_VIP_IP_Address></p> </div> <p>Login as the guiadmin user:</p> <div style="text-align: center; margin: 10px 0;">  </div> <div style="text-align: center; margin: 10px 0;"> <p>Oracle System Login Mon Jul 11 13:59:37 2016 EDT</p> <hr style="width: 50%; margin: 0 auto;"/> </div> <div style="border: 1px solid gray; padding: 10px; width: fit-content; margin: 10px auto;"> <p style="text-align: center;">Log In</p> <p style="text-align: center;">Enter your username and password to log in</p> <p style="text-align: center;">Username: <input style="width: 100px;" type="text"/></p> <p style="text-align: center;">Password: <input style="width: 100px;" type="password"/></p> <p style="text-align: center;"><input type="checkbox"/> Change password</p> <p style="text-align: center;"><input type="button" value="Log In"/></p> </div> <p style="text-align: center; margin: 10px 0;">Welcome to the Oracle System Login.</p> <p style="font-size: small; text-align: center;">This application is designed to work with most modern HTML5 compliant browsers and uses both JavaScript and cookies. 6.2 Deactivation Procedures

6.2.1 DCA Application Deactivation

Procedure 9: DCA Application Deactivation

STEP #	Procedure	Decription
<p>This procedure verifies that the feature deactivation steps have been completed .</p> <p>Check off (✓) each step as it is completed. Boxes have been provided for this purpose under each step number.</p> <p>If this procedure fails, contact My Oracle Support (MOS) and ask for assistance.</p>		
1. <input type="checkbox"/>	NOAM VIP GUI: Logout	Log out of any active NOAM GUI sessions.
2. <input type="checkbox"/>	Establish a secure shell session on the active NOAM	<p>Establish a secure shell session on the active NOAM by using the XMI VIP address. Login as the admusr.</p> <p>Use your SSH client to connect to the server (ex. Putty).</p> <p>Note: You must consult your own software client's documentation to learn how to launch a connection. For example:</p> <pre># ssh <active NO XMI VIP Address></pre>

STEP #	Procedure	Description
3. <input type="checkbox"/>	Change to the DCA activation directory	# cd /usr/TKLC/dsr/prod/maint/loaders/
4. <input type="checkbox"/>	Execute the DCA activation script	Execute the feature activation script: # ./featureActivateDeactivate Choose Deactivate and DCA Application . When asked, Enter the name for the DCA application to be deactivated . Verify the screen looks similar to Appendix D. Navigate to Status & Manage -> Server to restart the DSR MP.
5. <input type="checkbox"/>	NOAM VIP and SOAM VIP GUIs: Login	Log into the active NOAM and SOAM GUIs.
6. <input type="checkbox"/>	NOAM VIP and SOAM VIP GUIs: Verify the DCA Application folder and sub-menus	On NOAM, navigate to Diameter -> DCA Framework and verify the DCA Application folder no longer exists. On SOAM, navigate to Diameter -> DCA Framework and verify the DCA Application folder no longer exists.
7. <input type="checkbox"/>	Close SSH connection to active NOAMs	Log out of the active NOAM login shell and close the SSH connections by executing the following command: # exit Close the SSH connection

6.2.2 DCA Framework Deactivation

All DCA applications must be deactivated before executing the following procedure.

Procedure 10: DCA Framework Deactivation

STEP #	Procedure	Description
<p>This procedure verifies that the DCA Framework has been disabled.</p> <p>Check off (✓) each step as it is completed. Boxes have been provided for this purpose under each step number.</p> <p>If this procedure fails, contact My Oracle Support (MOS) and ask for assistance.</p>		
1. <input type="checkbox"/>	NOAM VIP GUI: Logout	Log out of any active NOAM GUI sessions.
2. <input type="checkbox"/>	Establish a secure shell session on the active NOAM	Establish a secure shell session on the active NOAM by using the XMI VIP address. Login as the admusr . Use your SSH client to connect to the server (ex. Putty). Note: You must consult your own software client's documentation to learn how to launch a connection. For example: # ssh <active NO XMI VIP Address>

STEP #	Procedure	Description
3. <input type="checkbox"/>	Change to the DCA activation directory	# cd /usr/TKLC/dsr/prod/maint/loaders/
4. <input type="checkbox"/>	Execute the DCA activation script	Execute the feature activation script: # ./featureActivateDeactivate Choose Deactivate and DCA Application . Note: For Tier 3 SOAM, this feature can be deactivated on all SOAMs or a specific SOAM. Verify the screen looks similar to Appendix E.
5. <input type="checkbox"/>	Log into Active NOAM and SOAM GUI	Log into the Active NOAM and SOAM GUI.
6. <input type="checkbox"/>	Verify the DCA Framework folder	Verify the DCA Framework folder no longer exists under the Diameter menu.
7. <input type="checkbox"/>	Close SSH connection to active NOAMs	Log out of the active NOAM login shell and close the SSH connections by executing the following command: # exit Close the SSH connection

6.3 Post-Deactivation Procedures

To complete a deactivation, complete the Post-Deactivation procedure below.

6.3.1 Perform Health Check

This procedure is used to determine the health and status of the DSR network and servers.

Procedure 11: Perform Health Check (Post-Feature Deactivation)

STEP #	Procedure	Description
<p>This procedure performs a Health Check. Check off (✓) each step as it is completed. Boxes have been provided for this purpose under each step number. If this procedure fails, contact My Oracle Support (MOS) and ask for assistance.</p>		
<p>1. <input type="checkbox"/></p>	<p>NOAM VIP GUI: Login</p>	<p>Establish a GUI session on the NOAM server by using the VIP address of the NOAM server. Open the web browser and enter a URL of:</p> <div style="border: 1px solid black; padding: 2px; margin: 5px 0;"> <p>http://<Primary_NOAM_VIP_IP_Address></p> </div> <p>Login as the guiadmin user:</p> <div style="text-align: center; margin: 10px 0;">  </div> <div style="display: flex; justify-content: space-between; align-items: center;"> <div data-bbox="565 961 786 989"> <p>Oracle System Login</p> </div> <div data-bbox="1166 982 1398 1003"> <p>Mon Jul 11 13:59:37 2016 EDT</p> </div> </div> <div style="border: 1px solid gray; padding: 10px; margin: 10px auto; width: 80%;"> <p style="text-align: center;">Log In</p> <p style="text-align: center;">Enter your username and password to log in</p> <p style="text-align: center;">Username: <input style="width: 100px;" type="text"/></p> <p style="text-align: center;">Password: <input style="width: 100px;" type="password"/></p> <p style="text-align: center;"><input type="checkbox"/> Change password</p> <p style="text-align: center;"><input type="button" value="Log In"/></p> </div> <p style="text-align: center; margin-top: 5px;">Welcome to the Oracle System Login.</p> <p style="font-size: small; margin-top: 10px;">This application is designed to work with most modern HTML5 compliant browsers and uses both JavaScript and cookies. Appendix F. My Oracle Support (MOS)

MOS (<https://support.oracle.com>) is your initial point of contact for all product support and training needs. A representative at Customer Access Support (CAS) can assist you with MOS registration.

Call the CAS main number at **1-800-223-1711** (toll-free in the US), or call the Oracle Support hotline for your local country from the list at <http://www.oracle.com/us/support/contact/index.html>. When calling, make the selections in the sequence shown below on the Support telephone menu:

1. Select 2 for New Service Request.
2. Select 3 for Hardware, Networking and Solaris Operating System Support.
3. Select one of the following options:

For technical issues such as creating a new Service Request (SR), select 1.

For non-technical issues such as registration or assistance with MOS, select 2.

You are connected to a live agent who can assist you with MOS registration and opening a support ticket. MOS is available 24 hours a day, 7 days a week, 365 days a year.

Appendix G. Emergency Response

In the event of a critical service situation, emergency response is offered by the CAS main number at 1-800-223-1711 (toll-free in the US), or by calling the Oracle Support hotline for your local country from the list at <http://www.oracle.com/us/support/contact/index.html>. The emergency response provides immediate coverage, automatic escalation, and other features to ensure that the critical situation is resolved as rapidly as possible.

A critical situation is defined as a problem with the installed equipment that severely affects service, traffic, or maintenance capabilities, and requires immediate corrective action. Critical situations affect service and/or system operation resulting in one or several of these situations:

- A total system failure that results in loss of all transaction processing capability
- Significant reduction in system capacity or traffic handling capability
- Loss of the system's ability to perform automatic system reconfiguration
- Inability to restart a processor or the system
- Corruption of system databases that requires service affecting corrective actions
- Loss of access for maintenance or recovery operations
- Loss of the system ability to provide any required critical or major trouble notification

Any other problem severely affecting service, capacity/traffic, billing, and maintenance capabilities may be defined as critical by prior discussion and agreement with Oracle.

Appendix H. Locate Product Documentation on the Oracle Help Center

Oracle Communications customer documentation is available on the web at the Oracle Help Center (OHC) site, <http://docs.oracle.com>. You do not have to register to access these documents. Viewing these files requires Adobe Acrobat Reader, which can be downloaded at <http://www.adobe.com>.

1. Access the Oracle Help Center site at <http://docs.oracle.com>.
2. Click Industries.
3. Under the Oracle Communications subheading, click the Oracle Communications documentation link. The Communications Documentation page appears. Most products covered by these documentation sets will appear under the headings “Network Session Delivery and Control Infrastructure” or “Platforms.”
4. Click on your Product and then the Release Number. A list of the entire documentation set for the selected product and release appears.
5. To download a file to your location, right-click the PDF link, select Save target as (or similar command based on your browser), and save to a local folder.
