## 2 Credit Card Origination Process Management

This document provides an overview of the credit card origination process and takes you through the various steps involved in handling all the necessary activities in the life cycle of a credit card origination process.

The document is designed to help you create following types of credit card:

- Retail Credit Card

### 3 Overview of Credit Card Origination Process

Oracle Banking Origination is the middle office banking solution with a comprehensive coverage of Retail Banking Origination processes for Savings Account, Current Account, Term Deposit, Credit Card and Loans comprising of Home Loan, Personal Loan, Education Loan and Vehicle Loan. It is a Host-Agnostic solution.

It enables banks to deliver the improved user experience for various bank personas such as Sales Officers, Relationship Manager, Account Opening Officers, Branch Supervisor/Managers, Loan Officers, and Credit Officers and so on, handling defined functions in the lifecycle of the various product origination.

The convenience of configuring appropriate stages and the respective data segments within each of these stages, which can be business driven, is hosted and architected by our new platform solution. The random access navigation between data segments within a given stage with appropriate validations, helps enable the business user to capture apt information anytime during the origination request before the Credit Card Account is created in the Host. The new workflow also supports capturing of relevant documents, stage wise, and generation of advices and notifications dynamically.

This user guide explains the reference workflow for the Credit Card Origination process and further details the data that needs to be captured in the data segment linked to the specific stages.

The pre-defined process flow for Credit Card origination process is as follows:

- [4.2 Credit Card Application Entry Stage](#)
- [4.3 Credit Card Underwriting Stage](#)
- [4.4 Credit Card Assessment Stage](#)
- [4.5 Supervisor Approval Stage](#)

## 4 Credit Card Origination Process

This chapter includes following sections:

- [4.1 Credit Card Account](#)
- [4.2 Credit Card Application Entry Stage](#)
- [4.3 Credit Card Underwriting Stage](#)
- [4.4 Credit Card Assessment Stage](#)
- [4.5 Supervisor Approval Stage](#)
- [4.6 Action Tabs](#)
- [4.7 Request Clarification](#)
- [4.8 Reference and Feedback](#)

### 4.1 Credit Card Account

The initiation request for a credit card can be originated by authorized branch users or relationship managers or by approved bank agents, either through the traditional branch channel or through dedicated protocol services made available on digital devices like tablets or mobiles. The initiation of credit card request can be made for both new and existing customer types. Also, the platform supports processing of the credit card request from the customer which are directly received from the Self-Service Banking Channel (Oracle Banking Digital Experience) through the REST based service APIs.

The selection of the relevant credit card product on which the credit card is required can be initiated using this process, provided the user has the required access rights.

Please refer to the detailed setup and operation workflows for both asset and liability products initiation made available in the **Operations** user guide.

## 4.2 Credit Card Application Entry Stage

As detailed in the **Operations** user guide, all the product originations are initiated in the Application Initiation stage from the product catalogue. The cart operation in product catalogue allows to originate single or multiple product initiation. Once the Credit Card origination process is initiated either as a single product origination or as part of the multiple product selection, process orchestrator generates the credit card process reference number on submit of the Application Initiation stage. Process orchestrator also updates the record in the Free Task process for the 'Application Entry' stage also referred as 'Task' from orchestrator perspective.

The Application Entry stage is the first stage in the Credit Card Account Open process. After the initiate process is completed successfully, the application can be acquired by the user who has the access rights for the given stage and progress with the data capture.

### Prerequisite

Specify **User Id** and **Password**, and login to **Home screen**.

1. From **Home screen**, click **Tasks**. Under **Tasks**, click **Free Tasks**.

The system successfully moves the Application Reference Number along with the process reference numbers [Credit Card Account] to the Credit Card Application Underwriting stage. This application will be available in the FREE TASKS list. The user who has the access rights will be able to acquire and proceed with the next processing stage of the application.

**NOTE:**

- If an application is returned to the Application Entry stage from any other subsequent stages, Oracle Banking Origination will not allow amending details in the Customer Information and Financial Details data segment, once a customer onboarding process has been triggered in the Application Entry Stage and CIF creation is still in progress.
- In case the party amendment request is rejected by Oracle Banking Party, the specified error message is shown to the user while submitting the Application Entry stage. The user has an option to go back and resolve the error or proceed with the stage submission by disregarding the amendment request.

## 4.3 Credit Card Underwriting Stage

The underwriting process of the lender bank or credit bureau is set to determine if an applicant's credit card application is an acceptable risk. It is a process to assess the applicant's ability to repay the credit card balance based on an analysis of their credit and financial capacity provided by the applicant.

The Credit Card Underwriting stage is the next representative stage in the Credit Card Account Open process. After the Credit Card Application Entry stage is completed successfully, the application can be acquired by the user who has to access rights for the given stage and progress with the data capture. The user can acquire the application from FREE TASK.

The Credit Card Underwriting stage has the following reference data segments:

- [4.3.1 Credit Rating Details](#)
- [4.3.2 Qualitative Scorecard](#)
- [4.3.3 Summary](#)

### 4.3.1 Credit Rating Details

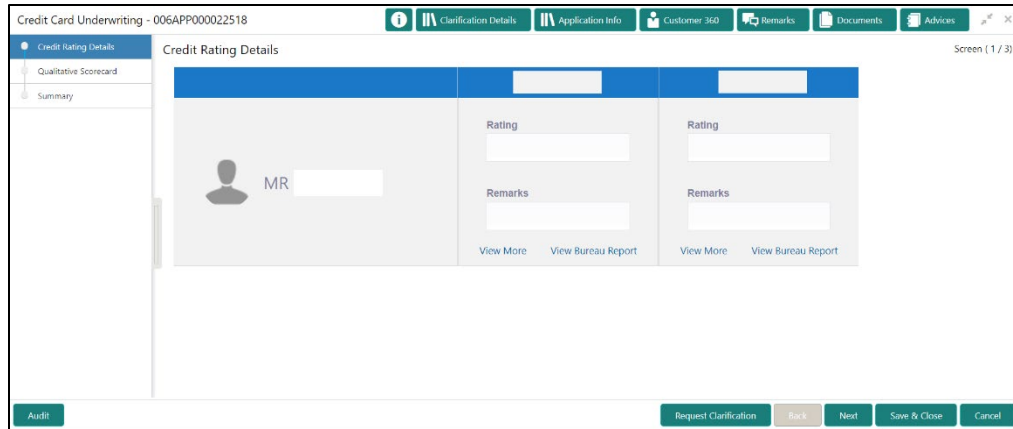

Credit Rating Details is the first data segment of Credit Card Underwriting stage. The user can acquire the application from Free Tasks list. This data segment will provide the information on the External Rating Agencies Rating / Scores for the Credit Card Applicant. The interface with external rating agencies will be provided.

Oracle Banking Origination is now integrated with Bureau Integration Service to fetch the details of the Rating for the given applicant(s).

1. Click **Acquire & Edit** in the Free Tasks screen of the previous stage – Credit Card Application Entry stage.

**Figure 27: Free Tasks**

The image shows a screenshot of the "Free Tasks" screen in a web application. At the top, there are navigation tabs for "Refresh", "Acquire", and "Flow Diagram". Below the tabs is a table with the following columns: Action, Priority, Process Name, Process Reference Number, Application Number, Stage, Application Date, Branch, and Customer Num. The table contains several rows of application tasks, including "CcOriginationProcess", "Retail Onboarding", "INSTANTACCOUNT", "INSTANTACCOUNT", "Retail Party Amendment", "Retail Onboarding", "INSTANTACCOUNT", "INSTANTACCOUNT", "Retail Loan Origination", "INSTANTACCOUNT", "INSTANTACCOUNT", and "Retail Onboarding". At the bottom of the table, there is a pagination bar showing "Page 1 of 173 (1 - 20 of 3455 items)".

The system successfully moves the Application Reference Number along with the process reference numbers [Credit Card Account] to the Credit Card Assessment stage. This application will be available in the FREE TASK list. The user who has the access rights will be able to acquire and proceed with the next processing stage of the application.

## 4.4 Credit Card Assessment Stage

After the application entry and underwriting data segment details are captured and verified, the application is sent for assessment. The Credit Card Assessment stage of the Credit Card account open process workflow will enable the Bank to analyze the details that have been captured in the Credit Card Application Entry / Credit Card Underwriting stages and decide whether the application met the acceptance criteria as specified by the Bank or Credit Bureau.

Oracle Banking Origination is now integrated with Decision Service to fetch the assessment details and system recommendation for the given applicant(s) based on the details captured in the previous stages.

In the Credit Card Assessment screen, provide the required details under each Data segment. The Credit Card Assessment stage has the following reference data segments:

- [4.3.1 Credit Rating Details](#) – View only as available in Underwriting stage
- [4.3.2 Qualitative Scorecard](#) – View only as available in Underwriting stage
- [4.4.1 Assessment Details](#)
- [4.4.2 Summary](#)

### 4.4.1 Assessment Details

Assessment Details is the first data segment of Credit Card Assessment stage. The user can acquire the application from FREE TASK. **Assessment Details** screen enables the user to understand the evaluation and view the system recommendation based on the following parameters.

- Logical Model
- Borrowing Capacity
- Qualitative Score
- Quantitative Score
- Decision & Grade

1. Click **Acquire & Edit** in the Free Tasks screen of the previous stage – Credit Card Underwriting Stage.

→ The **Assessment Details – Logical Model** screen is displayed.

**Figure 28: Assessment Details – Logical Model**

The screenshot displays the 'Assessment Details' screen for a credit card assessment. The interface includes a navigation menu on the left with options like 'Credit Rating Details', 'Qualitative Scorecard', 'Assessment Details', and 'Summary'. The main content area shows several key metrics:

- Requested Amount:** GBP 50000
- Rate Type:** Fixed
- Rate of Interest:** 5%
- Total Weighted Score:** 92
- Approved Amount:** GBP 50000
- Proposed Rate of Interest:** %
- Effective Rate:** % 5

**Figure 50: Outcome**

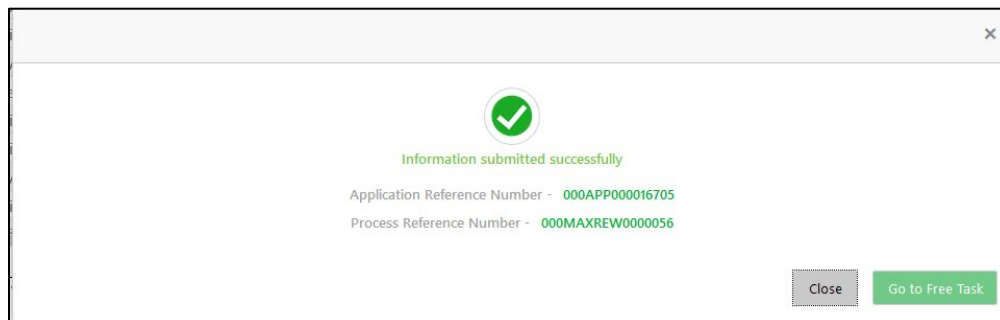

5. Select **Proceed** outcome from the drop-down list. Available options are:
  - Proceed
  - Reject By Bank
6. Select **Proceed** outcome from the drop-down list. It will logically complete the **Supervisor Approval** stage for the Credit Card Application. The Workflow Orchestrator will automatically move this application to the next processing stage, **Account Creation**.

The stage movement is driven by the business configuration for a given combination of **Process Code**, **Life Cycle** and **Business Product Code**.

7. Enter the remarks in **Remarks**.
8. Click **Submit**.

→ The **Confirmation** screen is displayed.

**Figure 51: Confirmation**

The following notification will be sent to the user, if application is initiated from assisted channel, and to the Oracle Banking Digital Experience customer, if application is initiated from self-service.

Reject by Bank will terminate the application and no further action will be allowed on this reference number.

After the Host creates the Credit Card Account successfully, the response is sent back to the Oracle Banking Origination with the Credit Card Account Number.

The details of all the applications which have logically completed all their stage movements, (Rejected / Account Created) will be made available in Completed tasks for query purpose only.

Refer to **Alerts and Dashboard User Guide** for the Dashboard details.
