

Custom RAD Extensibility Maintenance Screens

Oracle Banking Payments

Release 14.5.3.0.0

[Dec 2021]

Contents

1	Preface.....	3
2	Approach.....	4

1 Preface

This document is a step by step guide to demonstrate how to make additions to an existing Maintenance screen/function Id.

2 Approach

For demo purpose, we will be taking a Maintenance screen: PMDHSTPR (Host Parameters). We will create a demo table, add it to the RAD with 3 fields and then Save/query the record.

Select Options -> User Preferences

Select the Custom release

Select the environment

And then click ok

Select the function generation

Select the RAD file to be uploaded (Using PWDOTONL for Demo purpose)

Creating a new table for Demo purpose- CUSTOM_TEST:

Added a new data source in the data source list and added fields for it. New table name CUSTOM_TEST

Points to note:

1. Here Field1 is used only for mapping with parent table. It must be part of Data Block and a fieldset (although it could be made invisible, but it has to be present in one of the fieldsets).

2. Relationship given:

STTMS_HOST_PARAM.HOST_CODE=CUSTOM_TEST.FIELD1

Added new Data Block- CUSTOM_TEST and then added three fields to it- Field1 (PK field, and to be used for entity/table mapping), Field2 and Field3. Make sure the PK is mentioned in Block PK fields.

Field2 and Field3 are visible, Field1 is made invisible.

Created a new Field set FST_CUSTOM_TEST and added all the three fields to it. Added it in the Body section.

Generated files:

1. Using the RAD utility (local sources)

2. Using RADTOOL:

a. Step 1: Check Java functions in preferences

b. Step 2: While generating, check Java Classes.

Generated folders

Points to Note:

1. The generated artifacts need to be added to the project.
2. Common Files and Entity files will replace existing kernel files. Others will be of different names, e.g., HstParamCustomSys.java (instead of HstParamSys.java as in case of Kernel files).
3. These files extend kernel files, and hence all kernel functionality would be retained and additional code can be added in these Custom files as need be.
4. Please note that any additional business logic/validations can be added in <MasterBlockName>Custom.java file (for example, in this case, HstParamCustom.java).

After deploying the java files, UIXML and JS the screen (Blue Circled are the Custom fields)

Creating a new record:

The screenshot displays the Oracle Banking Payments Custom RAD Extensibility Maintenance Screens. The main window is titled "Host Parameters" and contains a "Save" button. The form fields are as follows:

- Host Code: * HOSTTEST
- Field 3: SHUBHAM
- Field 2: GUPTA

Below these fields is a section titled "External Systems" with the following entries:

- Sanction Check System
- Sanction Retry Days
- External Exchange Rate System
- External Pricing System
- External Accounting System

At the bottom of the dialog, there is a status bar with the following information:

- Maker: Checker
- Date Time: Date Time
- Mod No: 2
- Record Status: Open
- Authorization Status: Authorization Status

A "Cancel" button is located at the bottom right of the dialog.

Record saved

The screenshot displays the PL/SQL Developer application window. The title bar indicates the current session is 'PL/SQL Developer - FCU\BIO\THEPS@OOL - SQL Window - select * from custn_test; select to_char(171811112293E15) from dual;'. The menu bar includes File, Project, Edit, Session, Debug, Tools, Macro, Documents, Reports, Window, and Help. The toolbar contains various icons for file operations, editing, and execution. The left-hand pane shows a project tree with several SQL files, including 'SQL Window - aa.sql' and 'SQL Window - aaaaaaa.sql'. The main workspace is divided into two tabs: 'SQL' and 'Output'. The 'SQL' tab is active, showing a query: `select * from custom_test;`. Below the query, a table of results is displayed with columns FIELD1, FIELD2, FIELD3, FIELD4, FIELD5, and NUM1. The first row contains the values 'HOSTTEST', 'GUPTA', 'SHUBHAM', and empty cells for FIELD4, FIELD5, and NUM1. The status bar at the bottom indicates '2:1' and '1 row selected in 0.047 seconds'.

FIELD1	FIELD2	FIELD3	FIELD4	FIELD5	NUM1
