

Installer EAR Building  
Oracle FLEXCUBE Universal Banking

Release 14.5.4.0.0

Part No. F52800-01

[February] [2022]

---

# Table of Contents

1. BUILDING APPLICATION FOR SETUP ..... 1-1

# 1. Building Application for Setup

The process of building EAR files includes the following steps:

- Obtain the fcubs.properties (Refer [FCUBS Property File Creation.pdf](#)) file generated by the GUI Installer which is saved in the required path.
- fcubs.properties file will be used for building the ear. This will be created as part of the initial property file creation
- env.properties file parameters gets updated during every property file creation (like FCUBS, Gateway, Scheduler etc). After Property file creation, proceed with respective EAR build and then proceed with other components property file creations and build.
- Run the respective EAR bat (Windows) or respective EAR.sh (Linux) file.
- The command window closes after the EAR is generated
- The EAR will be generated in the EAR destination path provided during property file creation
- JS and UIXML will also be generated in the EAR destination path if external JS/UIXML is selected during property file creation.
- The external path for JS/UIXML and EAR destination path can be referred in env.properties file
- Manually copy the JS/UIXML generated in the EAR destination path, to external JS/UIXML path

Maintain the following Application Type accordingly for building respective EARs:

| Product Type  | Application Type | EAR Name          | BAT/sh file to be run                                    | Property file to be used        |
|---------------|------------------|-------------------|--|---------------------------------|
| ROFC          | FCUBS            | Any Distinct Name | ROFCEarRun.bat or<br>ROFCEarRun.sh                       | fcubs.properties                |
| GW-Integrated | INTEGRATED       | Any Distinct Name | ROFCGatewayEarRun.b<br>at or<br>ROFCGatewayEarRun.s<br>h | GW_WS_Prop.prop<br>erties       |
| GW-Individual | INDIVIDUAL       | Not Required      | ROFCGatewayEarRun.b<br>at or<br>ROFCGatewayEarRun.s<br>h | GW_WS_Prop.pprop<br>erties      |
| GW-REST       | INDIVIDUAL       | Any Distinct      | ROFCGatewayRestEar<br>Run.bat or                         | GW_REST_Prop.pr<br>operties and |

|           |         |                   |  |                            |
|-----------|---------|-------------------|--|----------------------------|
|           |         | Name              | ROFCGatewayRestEarRun.sh                     | GW_RESTEJB_Prop.properties |
| GW-MDB    | GATEWAY | Any Distinct Name | GWMDBEarRun.bat<br>GWMDBEarRun.sh            | GW_MDB_Prop.properties     |
| GW-HTTP   | GATEWAY | Any Distinct Name | GWHTTPEarRun.bat<br>GWHTTPEarRun.sh          | GW_HTTP_Prop.properties    |
| GW- EJB   | GATEWAY | Any Distinct Name | GWEJBEarRun.bat or<br>GWEJBEarRun            | GW_ EJB_Prop.properties    |
| Scheduler | SCHDLR  | Any Distinct Name | SchedulerEarRun.bat or<br>SchedulerEarRun.sh | Scheduler.properties       |
| ODT       | ODT     | Any Distinct Name | ODTWarRun.bat or<br>ODTWarRun.sh             | ODT.properties             |

This table shows the BAT/sh scripts that need to be run individually for each EAR creation. The env.properties will have the appropriate application type set.

1. Goto **INSTALLER\SOFT** path and execute the **<Product Type>EarRun** bat file for EAR build.  
  
For Example : <Product Type>EarRun.bat :- ROFCEarRun.bat (ROFCEarRun.sh for running in Linux machine) for ROFC and so on.  
  
EAR file will be generated in the mentioned destination path. Similarly for all the EAR Build follow the same steps.
2. For Gateway EAR, execute <Product Name>GatewayEarRun.bat (<Product Name>GatewayEarRun.sh)
3. For EJB, MDB and HTTP gateways , run the respective bat files i.e. GWEJBEarRun.bat (GWEJBEarRun.sh), GWMDBEarRun.bat (GWMDBEarRun.sh) and GWHTTPEarRun.bat (GWHTTPEarRun.sh).
4. For ODT, execute ODTWarRun.bat in Windows (ODTWarRun.sh in Linux) after building odt.properties.
5. For STAND ALONE SCHEDULER, execute SchedulerEarRun.bat in Windows (SchedulerEarRun.sh in Linux).

After this deploy the EAR in the application console.

Note: Please ensure the necessary resources are created in the application server as mentioned in the Resources\_To\_Be\_Created.docx
