ORACLE®

Oracle Banking Trade Finance Process Management

Welcome to the Oracle Banking Trade Finance Process Management (OBTFPM) User Guide. This guide provides an overview on the OBTFPM application and takes you through the various steps involved in creating and processing Trade Finance transactions.

This document will take you through following activities in OBTFPM:
- To create and handle Trade Finance transaction.
- Help users to conveniently create and process Trade Finance transaction.

Overview

OBTFPM is a trade finance middle office platform, which enables bank to streamline the trade finance operations. OBTFPM enables the customers to send request for new trade finance transaction either by visiting the branch (offline channels) or through SWIFT/Trade Portal/other external systems (online channels).

Benefits

OBTFPM helps banks to manage Trade Finance operations across the globe in different currencies. OBTFPM allows you to:
- Handle all Trade Finance transactions in a single platform.
- Provides support for limit verification and limit earmarking.
- Provide amount block support for customer account.
- Provides acknowledgement to customers.
- Enables the user to upload related documents during transaction.
- Enables to Integrate with back end applications for tracking limits, creating limit earmarks, amount blocks, checking KYC, AML and Sanction checks status.
- Create, track and close exceptions for the above checks.
- Enables to use customer specific templates for fast and easy processing of trade transactions that reoccur periodically.

Key Features

- Stand-alone system that can be paired with any back end application.
- Minimum changes required to integrate with bank's existing core systems.
- Faster time to market.
- Capable to interface with corporate ERP and SWIFT to Corporate.
- Highly configurable based on bank specific needs.
- Flexibility in modifying processes.

ORACLE®

Claim Lodged Under Guarantee Issued - Islamic

The beneficiary of the Guarantee/SBLC can raise a claim under the Guarantee/SBLC within the validity period of Guarantee/SBLC.

The various stages involved for Claim under Guarantees Issued process are:

- Receive and verify documents (Non Online Channel) - Registration stage
- Input application details
- Upload of related mandatory and non-mandatory documents
- Verify documents and capture details (Online/Non Online Channels)- Scrutiny stage
- Input/Modify details of Claim - Data Enrichment stage
- Check balance availability for amount block
- Check for sanctions & KYC status
- Create amount block for charges
- Capture remarks for other users to check and act
- Hand off request to back office

The design, development and functionality of the Islamic Guarantee Issuance Lodge Claim process flow is similar to that of conventional Guarantee issuance process flow.

In the subsequent sections, let's look at the details for Islamic Lodge Claim - Guarantee Issuance process:

This section contains the following topics:

Common Initiation Stage	Registration
Data Enrichment	Scrutiny
Multi Level Approval	

Common Initiation Stage

The user can initiate the new claim under Islamic Guarantee Issued request from the common Initiate Task screen.

1. Using the entitled login credentials, login to the OBTFPM application.

2. Click **Trade Finance > Initiate Task.**

ORACLE®
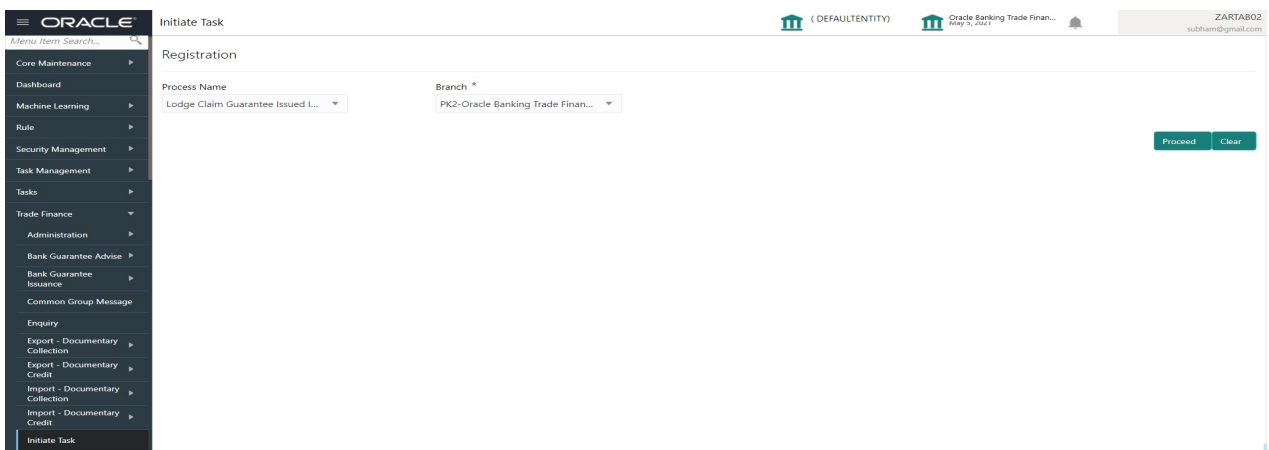

Provide the details based on the description in the following table:

Field	Description
Process Name	Select the process name to initiate the task.
Branch	Select the branch.

Action Buttons

Use action buttons based on the description in the following table:
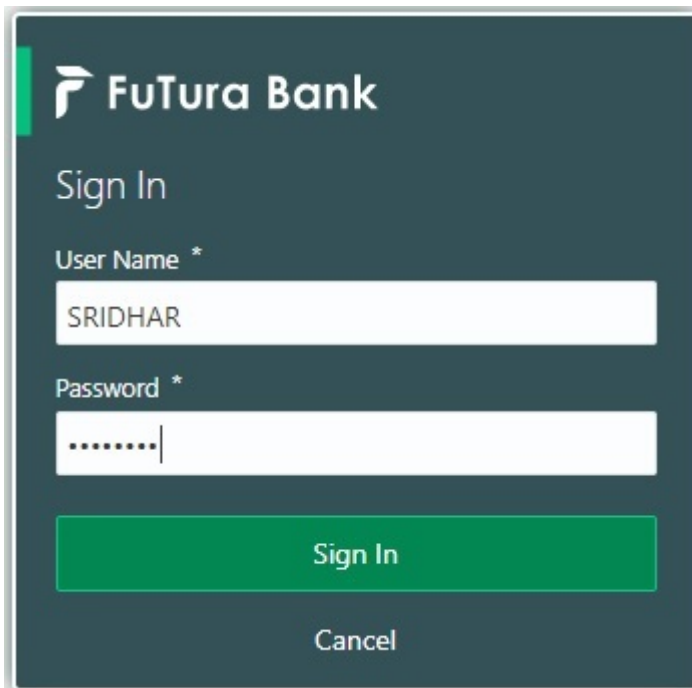

Field	Description
Proceed	Task will get initiated to next logical stage.
Clear	The user can clear the contents update and can input values again.

Registration

During the Registration stage, the user can register a claim request against the Islamic Guarantee/SBLC issued.

The user can capture the basic details of the application, check the signature of the applicant and upload the related documents of the applicant.

1. Using the entitled login credentials for registration stage, login to the OBTFPM application.

ORACLE®

2. On login, user must be able to view the dashboard screen with widgets as mapped to the user.

3. Click **Trade Finance - Islamic > Bank Guarantee Issuance > Lodge Claim - Guarantee Issued Islamic.**

The Registration stage has two sections Application Details and Guarantee Details. Let's look at the registration screens below:

Cancel	Cancels the Guarantee Issuance Registration stage input.	
Hold	The details provided will be registered and status will be on hold. This option is used, if there are any pending information yet to be received from applicant.	
Checklist	Make sure that the details in the checklist are completed and acknowledge. If mandatory checklist items are not marked, system will display an error on submit. 1. Signatures on Claim verified 2. Documents are verified and uploaded	

Scrutiny

On successful completion of Registration of a claim Islamic Guarantee issuance request, the request moves to scrutiny stage. At this stage the gathered information during Registration stage and claim request are scrutinized. As part of scrutiny, the bank user can update the various claim fields. For claims initiated through Registration stage, the user can verify/update details in scrutiny stage. For Claims received through MT 765 upload, the message will be parsed and uploaded directly to Scrutiny stage for further processingDo the following steps to acquire a task currently at Scrutiny stage:

ORACLE®

1. Using the entitled login credentials for scrutiny stage, login to the OBTFPM application.

2. On login, user must be able to view the dashboard screen with widgets as mapped to the user.

3. Click **Tasks> Free Tasks.**

ORACLE®

4. Select the appropriate task and click **Acquire & Edit** to edit the task or click **Acquire** to edit the task from **My Tasks**.

5. The acquired task will be available in **My Tasks** tab. Click **Edit** to provide input for data enrichment stage.

The Scrutiny stage has five sections as follows:

- Main Details
- Claim Details
- Document Details
- Additional Fields
- Advices
- Additional Details
- Settlement Details
- Summary

Let's look at the details for scrutiny stage. User can enter/update the following fields as part of claim under Guarantee/SBLC - Scrutiny Stage. Some of the fields that are already having value from registration/online channels may not be editable.

In case of requests received through SWIFT MT765, the task will be created in Scrutiny stage directly and the fields will be populated based on the incoming request.

Main Details

Main details section has three sub section as follows:

- Application Details

- Guarantee Details

Application Details

This reject reason will be available in the remarks window throughout the process.	
Refer	On click of Refer, user will be able to refer the task back to the Data Enrichment user. User must select a Refer Reason from the values displayed by the system. Refer Codes: • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others.	
Hold	The details provided will be on hold. This option is used, if there are any pending information yet to be received from applicant.	
Cancel	Cancel the Guarantee Advice Scrutiny inputs.	
Next	Task will get moved to next logical stage of Guarantee Amendment Advise. If mandatory fields have not been captured, system will display an error message until the mandatory fields data are provided.	

ORACLE®

Field	Description	Sample Values
Save & Close	Save the information provided and holds the task in you queue for working later. This option will not submit the request	
Back	On clicking the Back, system should move the task to the previous segment.	
Incoming Message	Clicking this button allows the user should be able to see the message in case of STP of incoming MT 767.	

Summary

User can review the summary of details updated in Data Enrichment stage for claim logged under Islamic Guarantee / SBLC Issued request.

Log in to Oracle Banking Trade Finance Process Management (OBTFPM) system to see the Summary tiles. The tiles must display a list of important fields with values.

Tiles Displayed in Summary

- Main Details - User can view the application details and Guarantee/ Standby details. User can modify the details if required.

- Party Details - User can view the party details like beneficiary, advising bank etc.

- Claim Details - User can view the claim details.

- Documents Details- User can view the Document details.

- Additional Fields - User can view the additional fields.

- Limits and Collaterals - User can view the limits and collateral details. User can modify the details if required.

- Commission, tax and Charges - User can view the details provided for charges. User can modify the details if required.

- Preview Messages - User can drill down to view the message preview, legal verification and customer draft confirmation details. The message preview screen has the Legal Verification details.

- Settlement Details - User can view the settlement details.

ORACLE®

- Compliance - User can view compliance details. The status must be verified for KYC and to be initiated for AML and Sanction Checks.

Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Reject	On click of Reject, user must select a Reject Reason from a list displayed by the system. Reject Codes: • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others. Select a Reject code and give a Reject Description. This reject reason will be available in the remarks window throughout the process.	
Refer	On click of Refer, user will be able to refer the task back to the Data Enrichment user. User must select a Refer Reason from the values displayed by the system. Refer Codes: • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others.	
Hold	The details provided will be on hold. This option is used, if there are any pending information yet to be received from applicant.	
Cancel	Cancel the Guarantee Advice Scrutiny inputs.	
Next	Task will get moved to next logical stage of Guarantee Amendment Advise. If mandatory fields have not been captured, system will display an error message until the mandatory fields data are provided.	
Save & Close	Save the information provided and holds the task in you queue for working later. This option will not submit the request	
Incoming Message	Clicking this button allows the user should be able to see the message in case of STP of incoming MT 767.	

ORACLE®

Multi Level Approval

A User can view the summary of details updated in multilevel approval stage of Islamic Guarantee claim request.

This stage allows the approver user to approve a Claim Lodged under Guarantee Issued Transaction.

Log in into OBTFPM application and open the task to see the summary tiles. The tiles should display a list of important fields with values. User must be able to drill down from summary Tiles into respective data segments to verify the details of all fields under the data segment.

In case of MT 765, Approval stage processing is same as in Offline Processing for Guarantee Claim.

Re-Key Authorization

The application will request approver for few critical field values as an authorization step. If the values captured match with the values available in the screen, system will allow user to open the transaction screens for further verification. If the re-key values are different from the values captured, then application will display an error message.

Open the task and re-key some of the critical field values from the request in the Re-key screen. Some of the fields below will dynamically be available for re-key.:

- Applicant Name
- Beneficiary Name
- Undertaking Currency
- Undertaking
- Amount
- Expiry Date

Re-key is applicable to the first approver in case of multiple approvers. All approvers will however be able see the summary tiles and the details in the screen by drill down from tiles.

Summary

Tiles Displayed in Summary

- Main Details - User can view the application details and Guarantee/ Standby details. User can modify the details if required.

- Party Details - User can view the party details like beneficiary, advising bank etc.

- Claim Details - User can view the claim details.

- Documents Details- User can view the Document details.

- Additional Fields - User can view the additional fields.

- Limits and Collaterals - User can view the limits and collateral details. User can modify the details if required.

- Commission, tax and Charges - User can view the details provided for charges. User can modify the details if required.

- Preview Messages - User can drill down to view the message preview, legal verification and customer draft confirmation details. The message preview screen has the Legal Verification details.

- Settlement Details - User can view the settlement details.

- Compliance - User can view compliance details. The status must be verified for KYC and to be initiated for AML and Sanction Checks.

- Accounting Entries - User can view the accounting entries.

Note

When the Value Date is different from the Transaction Date for one or more accounting entries, system displays an Alert Message "Value Date is different from Transaction Date for one or more Accounting entries.

ORACLE®

Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Reject	On click of Reject, user must select a reject reason from a list displayed by the system. Reject Codes: • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others. Select a Reject code and give a reject description. This reject reason will be available in the remarks window throughout the process.
