Oracle Banking Trade Finance Process Management

Welcome to the Oracle Banking Trade Finance Process Management (OBTFPM) User Guide. This guide provides an overview on the OBTFPM application and takes you through the various steps involved in creating and processing Trade Finance transactions.

This document will take you through following activities in OBTFPM:

- To create and handle Trade Finance transaction.
- Help users to conveniently create and process Trade Finance transaction

Overview

OBTFPM is a Trade Finance middle office platform, which enables bank to streamline the Trade Finance operations. OBTFPM enables the customers to send request for new Trade Finance transaction either by visiting the branch (offline channels) or through SWIFT/Trade Portal/other external systems (online channels).

Benefits

OBTFPM helps banks to manage Trade Finance operations across the globe in different currencies. OBTFPM allows you to:

- Handle all Trade Finance transactions in a single platform.
- Provides support for limit verification and limit earmarking.
- Provide amount block support for customer account.
- Provides acknowledgement to customers.
- Enables the user to upload related documents during transaction.
- Enables to Integrate with back end applications for tracking limits, creating limit earmarks, amount blocks, checking KYC, AML and Sanction checks status.
- Create, track and close exceptions for the above checks.
- Enables to use customer specific templates for fast and easy processing of trade transactions that reoccur periodically.

Key Features

- Stand-alone system that can be paired with any back end application.
- Minimum changes required to integrate with bank's existing core systems.
- Faster time to market.
- Capable to interface with corporate ERP and SWIFT to Corporate.
- Highly configurable based on bank specific needs.
- Flexibility in modifying processes.

Guarantee Advice

As part of Guarantee Advice the advising bank advises a guarantee received from the issuing bank to the beneficiary of the guarantee.

The various stages involved in OBTFPM during advising of a guarantee are:

- Receive and verify guarantee (non-online channel) - Registration stage
- Input application details
- Upload of related mandatory and non mandatory documents
- Verify documents and capture details
- Input/Modify Details of LC - Data Enrichment Stage
- Check for sanctions & KYC status
- Capture remarks for other users to check and act
- Hand off request to back office

.In the following sections, let's look at the details for Guarantee Advising process:

This section contains the following topics:

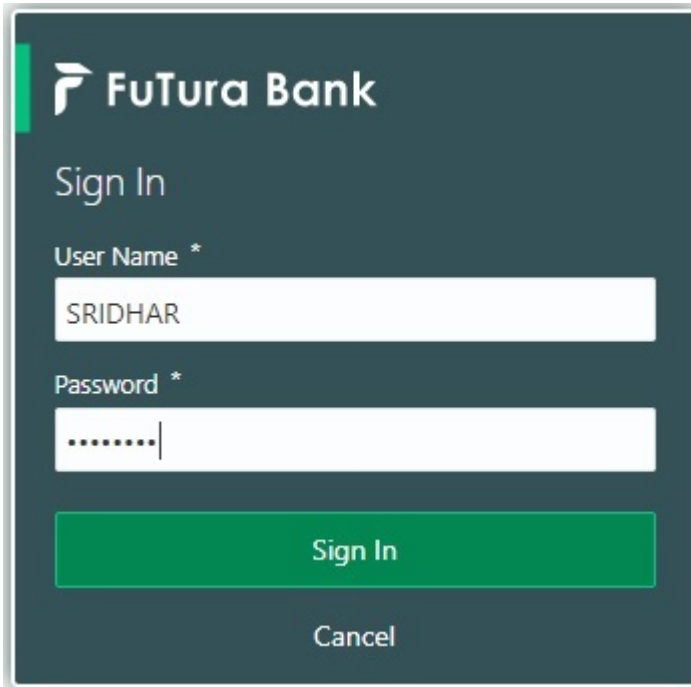

| | |
|--------------------------------------|---------------------------------|
| Registration | Scrutiny |
| Data Enrichment | Exceptions |
| Multi Level Approval | Reject Approval |

Registration

As a Registration user, you can register a Guarantee Advice request, also can upload relevant documents and verify checklist items. If Guarantee to be advised is received as physical instrument, the Guarantee Advice process starts from the Registration Stage.

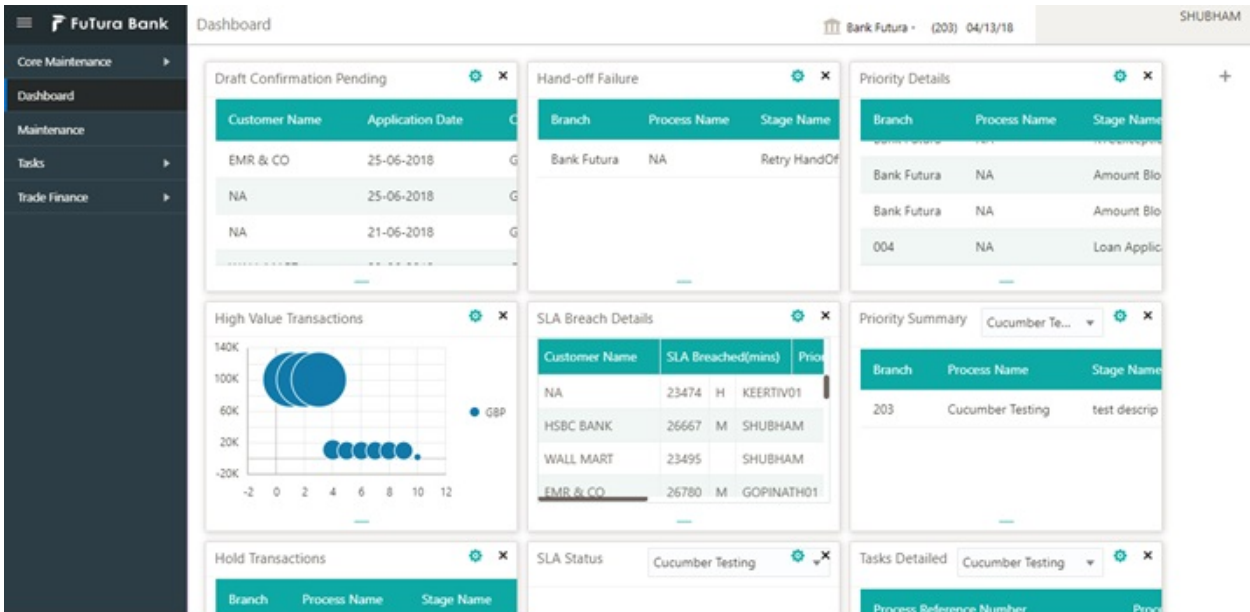

During Registration stage, user can capture the basic details, check the signature of the authorized signatory of the Guarantee Issuing Bank and upload the guarantee. It also enables the user to capture some additional product related details as an option. On submit, the request will be available for an Guarantee Advice expert to handle the request in the next stage

1. Using the entitled login credentials for Registration stage, login to the OBTFPM application.

The image shows the login interface for FuTura Bank. It features a dark blue header with the FuTura Bank logo and the text 'Sign In'. Below this, there are two input fields: 'User Name *' containing the text 'SRIDHAR' and 'Password *' which is masked with dots. At the bottom, there are two buttons: a green 'Sign In' button and a white 'Cancel' button.

2. On login, user must be able to view the dashboard screen with widgets as mapped to the user.

The image shows a screenshot of the FuTura Bank dashboard. The dashboard is titled 'Dashboard' and includes a navigation menu on the left with options like 'Core Maintenance', 'Dashboard', 'Maintenance', 'Tasks', and 'Trade Finance'. The main content area displays several widgets:

- Draft Confirmation Pending:** A table with columns 'Customer Name' and 'Application Date'. Data rows include 'EMR & CO' (25-06-2018), 'NA' (25-06-2018), and 'NA' (21-06-2018).
- Hand-off Failure:** A table with columns 'Branch', 'Process Name', and 'Stage Name'. Data row: 'Bank Futura', 'NA', 'Retry HandOf'.
- Priority Details:** A table with columns 'Branch', 'Process Name', and 'Stage Name'. Data rows include 'Bank Futura', 'NA', 'Amount Blo', and '004', 'NA', 'Loan Applic'.
- High Value Transactions:** A bubble chart showing transaction values for 'GBP'.
- SLA Breach Details:** A table with columns 'Customer Name', 'SLA Breached(mins)', and 'Prio'. Data rows include 'NA' (23474, H, KEERTIV01), 'HSBC BANK' (26667, M, SHUBHAM), 'WALL MART' (23495, SHUBHAM), and 'EMR & CO' (26780, M, GOPINATH01).
- Priority Summary:** A table with columns 'Branch', 'Process Name', and 'Stage Name'. Data row: '203', 'Cucumber Testing', 'test descrip'.
- Hold Transactions:** A table with columns 'Branch', 'Process Name', and 'Stage Name'.
- SLA Status:** A widget showing 'Cucumber Testing'.
- Tasks Detailed:** A widget showing 'Cucumber Testing'.

3. Click Trade Finance> Bank Guarantee Advice> Guarantee Advise.

The Registration stage has two sections Application Details and Guarantee Details. Let's look at the Registration stage:

| Checklist | Make sure that the details in the checklist are completed and acknowledge. | |

Scrutiny

On successful completion of Registration of an Guarantee advice request, the request moves to Scrutiny stage.

Non-Online Channel - Guarantee Advice requests that were received at the desk will move to Scrutiny stage post successful Registration. The request will have the details entered during the Registration stage.

Online Channel - Requests that are received via SWIFT are available directly for further processing from Scrutiny stage and available data for all data segments from Application stage to Data Enrichment stage would be auto populated.

Do the following steps to acquire a task currently at Scrutiny stage:

1. Using the entitled login credentials for Scrutiny stage, login to the OBTFPM application.

The screenshot displays the login interface for FuTura Bank. It features a dark teal background with the bank's logo and name in white. The 'Sign In' section includes two text input fields. The first field, labeled 'User Name *', contains the text 'SRIDHAR'. The second field, labeled 'Password *', contains masked characters represented by seven dots. A prominent green button labeled 'Sign In' is positioned at the bottom of the form.

2. On login, user must be able to view the dashboard screen with widgets as mapped to the user.

The dashboard for FuTura Bank displays several widgets. On the left is a navigation menu with options like Core Maintenance, Dashboard, Maintenance, Tasks, and Trade Finance. The main area contains:

- Draft Confirmation Pending:** A table with columns Customer Name, Application Date, and Status. Rows include EMR & CO (25-06-2018), NA (25-06-2018), and NA (21-06-2018).
- Hand-off Failure:** A table with columns Branch, Process Name, and Stage Name. Row: Bank Futura, NA, Retry HandOf.
- Priority Details:** A table with columns Branch, Process Name, Stage Name, and Amount. Rows include Bank Futura (NA, Amount Blo) and 004 (NA, Loan Applic).
- High Value Transactions:** A bubble chart showing transaction values for GBP.
- SLA Breach Details:** A table with columns Customer Name, SLA Breached(mins), and Priority. Rows include NA (23474, H, KEERTIVO1), HSBC BANK (26667, M, SHUBHAM), WALL MART (23495, SHUBHAM), and EMR & CO (26780, M, GOPINATH01).
- Priority Summary:** A table with columns Branch, Process Name, and Stage Name. Row: 203, Cucumber Testing, test descrip.
- Hold Transactions:** A table with columns Branch, Process Name, and Stage Name.
- SLA Status:** A dropdown menu currently set to Cucumber Testing.
- Tasks Detailed:** A dropdown menu currently set to Cucumber Testing.

3. Click Trade Finance> Tasks> Free Tasks.

The Oracle Free Tasks page shows a table of tasks. The 'Free Tasks' option in the left navigation menu is highlighted. The table has the following data:

| Action | Priority | Process Name | Process Reference Number | Application Number | Stage | Application Date | Branch | CI |

4. Select the appropriate task and click Acquire & Edit to edit the task or click Acquire to edit the task from My Tasks.

This screenshot is identical to the previous one, but the 'Acquire & Edit' button for the first task (Guarantee Advice) is highlighted with a red box. The 'Free Tasks' option in the left navigation menu is also highlighted with a red box.

5. The acquired task will be available in **My Tasks** tab. Click **Edit** to scrutinize the registered task.

The screenshot shows the Oracle 'My Tasks' interface. On the left is a navigation menu with 'My Tasks' highlighted in red. The main area displays a table of tasks. The first row has an 'Edit' button highlighted in red. Below the table is a pagination control showing 'Page 1 of 1 (1 - 5 of 5 items)'.

The Scrutiny stage has three sections as follows:

- Main Details
- Guarantee Preferences
- Documents and Instructions
- Additional Fields
- Additional Details
- Summary

Let's look at the details for Scrutiny stage. User can enter/update the following fields. Some of the fields that are already having value from Registration/online channels may not be editable.

Main Details

Main details section has three sub section as follows:

- Application Details
- Guarantee Details

Application Details

All fields displayed under Application details section, would be read only except for the **Priority** field. Refer to [Application Details](#) for more information of the fields.

Charge Details

If default charges are available under the product, they should be defaulted here with values. If customer or customer group specific charges are maintained, then the same will be defaulted from back end system.

Provide the Charge Details based on the description provided in the following table:

| Component | Currency | Amount | Modified | Billing | Defer | Waive | Charge Party | Settlement Account |
|---------------------|----------|--------|----------|---------|-------|-------|--------------|--------------------|
| No data to display. | | | | | | | | |

| Field | Description | Sample Values |
|--------------------|--|---------------|
| Component | Charge Component type. | |
| Currency | Defaults the currency in which the charges have to be collected. | |
| Amount | An amount that is maintained under the product code gets defaulted in this field. User can edit the value, if required. | |
| Modified Amount | From the default value, if the rate is changed or the amount is changed, the value gets updated in the modified amount field. | |
| Billing | If charges are handled by separate billing engine, then by selecting billing the details to be available for billing engine for further processing. | |
| Defer | <p>If charges have to be deferred and collected at any future step, this check box has to be selected.</p> <p>On simulation of charges/commission from Back Office, if any of the Charges/Commission component for the customer is AR-AP tracking enabled, 'Defer' toggle for that component should be automatically checked in OBTFPM.</p> <p>The user can select/de-select the check box. On de-selection the user has to click on 'Recalculate' charges button for re-simulation.</p> | |
| Waive | <p>If charges have to be waived, this check box has to be selected.</p> <p>Based on the customer maintenance, the charges should be marked for Billing or for Defer.</p> <p>This field is disabled, if 'Defer' toggle is enabled.</p> | |
| Charge Party | Charge party will be beneficiary by default. You can change the value to applicant | |
| Settlement Account | Details of the settlement account. | |

Provide the Commission Details based on the description provided in the following table:

| Component | Rate | Currency | Amount | Modified | Defer | Waive | Charge Party | Settlement Account |
|---------------------|------|----------|--------|----------|-------|-------|--------------|--------------------|
| No data to display. | | | | | | | | |

| Field | Description | Sample Values |
|--------------------|--|---------------|
| Component | Select the commission component | |
| Rate | Defaults from product. User can change the rate, if required. | |
| Currency | Defaults the currency in which the commission needs to be collected | |
| Amount | An amount that is maintained under the product code defaults in this field. User can modify the value, if required. | |
| Modified Amount | From the default value, if the rate or amount is changed, the modified value gets updated in the modified amount field. | |
| Billing | If charges/commission is handled by separate billing engine, then by selecting billing the details to be available for billing engine for further processing. | |
| Defer | <p>Select the check box, if charges/commissions has to be deferred and collected at any future step.</p> <p>On simulation of charges/commission from Back Office, if any of the Charges/Commission component for the customer is 'Billing' enabled, 'Billing' toggle for that component should be automatically checked in OBTFPM.</p> <p>The user can not select/de-select the check box if it is de-selected by default.</p> | |
| Waive | <p>Select the check box to waive charges/commission.</p> <p>Based on the customer maintenance, the charges/commission can be marked for Billing or Defer.</p> <p>If the defaulted Commission is changed to defer or billing or waive, system must capture the user details and the modification details in the 'Remarks' place holder.</p> <p>This field is disabled, if 'Defer' toggle is enabled.</p> | |
| Charge Party | Charge party will be 'Beneficiary' by Default. You can change the value to Applicant. | |
| Settlement Account | Details of the Settlement Account. | |

The tax component is calculated based on the commission. The tax component defaults if maintained in the product level. Tax detail cannot be updated by you and any change in Tax amount on account of modification of charges/ commission will be available on click of Re-Calculate button or on hand off to back-end system.

Provide the Tax Details based on the information in the following table:

| Component | Currency | Amount | Settlement Account |
|---------------------|----------|--------|--------------------|
| No data to display. | | | |

| Field | Description | Sample Values |
|--------------------------|--|---------------|
| Component | Tax Component type | |
| Currency | The tax currency is the same as the commission. | |
| Amount | The tax amount defaults based on the percentage of commission maintained. You can edit the same. | |
| Settlement Account | Details of the settlement Account. | |
| Charges from Beneficiary | Input the amount to be collected from beneficiary on account of this transaction. | |

Select a Reject code and give a Reject Description. This reject reason will be available in the remarks window throughout the process. | |

Data Enrichment

As part of Data Enrichment, you can enter/update basic details of the incoming request.

Do the following steps to acquire a task which completed the Registration and Scrutiny and currently at Data enrichment stage:

1. Using the entitled login credentials for Scrutiny stage, login to the OBTFPM application.

2. On login, user must be able to view the dashboard screen with widgets as mapped to the user.

The dashboard displays several widgets for monitoring and managing tasks:

- Draft Confirmation Pending:** Table with columns: Customer Name, Application Date, Status.
- Hand-off Failure:** Table with columns: Branch, Process Name, Stage Name.
- Priority Details:** Table with columns: Branch, Process Name, Stage Name.
- High Value Transactions:** A bubble chart showing transaction values for different branches.
- SLA Breach Details:** Table with columns: Customer Name, SLA Breached (mins), Priority.
- Priority Summary:** Table with columns: Branch, Process Name, Stage Name.
- Hold Transactions:** Table with columns: Branch, Process Name, Stage Name.
- SLA Status:** A dropdown menu currently set to 'Cucumber Testing'.
- Tasks Detailed:** Table with columns: Process Reference Number, Process Name.

3. Click **Trade Finance > Tasks > Free Tasks**.

The 'Free Tasks' page displays a list of tasks with the following columns: Action, Priority, Process Name, Process Reference Number, Application Number, Stage, Application Date, Branch, and Cl. The 'Free Tasks' menu item in the left sidebar is highlighted with a red box.

| Action | Priority | Process Name | Process Reference Number | Application Number | Stage | Application Date | Branch | Cl |

The Data Enrichment stage has four sections as follows:

- Main Details
- Guarantee Preferences
- Acknowledgement Details
- Documents and Instructions
- Additional Fields
- Advices
- Additional Details
- Settlement Details
- Summary

In the subsequent sub sections, let's look at the details for Data Enrichment stage. You should be able to enter/update the following fields. Some of the fields that are already having value from Scrutiny/Online channels may not be editable.

Main Details

Refer to [Main Details](#).

Guarantee Details

Refer to [Guarantee Details](#).

Guarantee Preferences

Refer to [Guarantee preferences](#).

Acknowledgement Details

An acknowledgment in format MT 768 is sent by advising bank to the issuing for Guarantee Advising. The user can input the details required for issuing bank as part of MT 768.

Provide the Acknowledgment Details based on the information in the following table:

| Field | Description | Sample Values |
|--------------------------------|---|---------------|
| Issuing Bank Reference | This field specifies the issuing bank reference. | |
| Account Identification | This field identifies, where necessary, the account which is used for settlement of charges. | |
| Date of Acknowledgement | This field specifies the date on which the message being acknowledged was sent. System displays the Branch Date. If the task is approved on a later date, then the date should be updated as the branch date as on approval. | |
| Charges to be Claimed | This field specifies the currency code and total amount of charges claimed by the advising bank. If the Sender services an account for the Receiver in the currency of the charges, and this System should default the Date of Debit as the branch date as on approval. | |
| Account with Bank | This field specifies the bank at which the Sender wishes to receive credit for charges claimed. | |
| Charges | The user should be able to input more details about the charges | |
| Sender to Receiver Information | This field should be available for the user to enter any additional information the advising bank sends to the Issuing bank. This can be maintained as an FFT | |
| Narrative | Narrative if applicable. | |

| Field | Description | Sample Values |
|---------------------|---|---------------|
| File Identification | This field is used to identify the delivery channel. This is applicable only from 1 Nov 2021. | |

Action Buttons

Use action buttons based on the description in the following table:

| Field | Description | Sample Values |
|-----------------------|--|---------------|
| Clarification Details | Clicking the button opens a detailed screen, user can see the clarification details in the window and the status will be Clarification Requested. | |
| Documents | <p>Click the Documents icon to View/Upload the required documents.</p> <p>Application will display the mandatory and optional documents.</p> <p>The user can view and input/view application details simultaneously.</p> <p>When a user clicks on the uploaded document, Document window get opened and on clicking the view icon of the uploaded document, Application screen should get split into two. The one side of the document allows to view and on the other side allows to input/view the details in the application.</p> | |
| Remarks | Click the Remarks icon to view the remarks captured as part of Registration stage and also can input Remarks, which can be seen by other users. | |
| Overrides | Click to view overrides, if any. | |
| Next | On click of Next, system should validate if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment. | |
| Back | On click of Back, system moves back to the previous step. | |
| Save & Close | <p>Save the information provided and holds the task in you queue for working later.</p> <p>This option will not submit the request</p> | |
| Cancel | Cancel the Scrutiny Stage Inputs. | |
| Hold | <p>The details provided will be registered and status will be on hold.</p> <p>This option is used, if there are any pending information yet to be received from applicant.</p> | |

| Field | Description | Sample Values |
|-----------------------|---|---------------|
| Refer | <p>On click of Refer, user will be able to refer the task back to the Data Enrichment user. User must select a Refer Reason from the values displayed by the system.</p> <p>Refer Codes:</p> <ul style="list-style-type: none"> ● R1- Documents missing ● R2- Signature Missing ● R3- Input Error ● R4- Insufficient Balance/Limits ● R5 - Others. | |
| Reject | <p>On click of Reject, user must select a Reject Reason from a list displayed by the system.</p> <p>Reject Codes:</p> <ul style="list-style-type: none"> ● R1- Documents missing ● R2- Signature Missing ● R3- Input Error ● R4- Insufficient Balance/Limits ● R5 - Others. <p>Select a Reject code and give a Reject Description.</p> <p>This reject reason will be available in the remarks window throughout the process.</p> | |
| Request Clarification | <p>On click the Request Clarification button the user can request for an Online clarification from customer. Clicking the button opens a detailed screen to capture the clarification details.</p> | |

Documents and Instructions

Refer to [Document and Instructions](#).

Additional Fields

Refer to [Additional Fields](#).

Advices

Advices menu displays the advices from the back office as tiles. User can edit the fields in the tile, if required.

For the Guarantee Advising MT 760, Payment message, Guarantee Instrument (Mail advise), Acknowledgement (MT 768) appears.

The user can also suppress the Advice, if required.

| Field | Description | Sample Values |
|-----------------|--|---------------|
| Suppress Advice | <p>Toggle on: Switch on the toggle if advice is suppressed.</p> <p>Toggle off: Switch off the toggle if suppress advice is not required for the amendments</p> | |
| Advice Name | User can select the instruction code as a part of free text. | |
| Medium | The medium of advices is defaulted from the system. User can update if required. | |

| Field | Description | Sample Values |
|---|--|---------------|
| Advice Party | Value be defaulted from Guarantee /SBLC Issuance. User can update if required. | |
| Party ID | Value be defaulted from Guarantee /SBLC Issuance. User can update if required. | |
| Party Name | Read only field. Value be defaulted from Guarantee /SBLC Issuance. | |
| Free Format Text | | |
| FFT Code | User can select the FFT code as a part of free text. | |
| FFT Description | FFT description is populated based on the FFT code selected. | |
|  | Click plus icon to add new FFT code. | |
|  | Click minus icon to remove any existing FFT code. | |
| Instruction Details | | |
| Instruction Code | User can select the instruction code as a part of free text. | |
| Instruction Description | Instruction description is populated based on the FFT code selected. | |
|  | Click plus icon to add new instruction code. | |
|  | Click minus icon to remove any existing instruction code. | |

| Settlement Account | Select the settlement account for the collateral. | |
| Settlement Account Branch | Settlement Account Branch will be auto-populated based on the Settlement Account selection. | |
| Settlement Account Currency | Select the Settlement Account Currency. | |
| Account Available Amount | Account Available Amount will be auto-populated based on the Settlement Account selection. | |

| Field | Description | Sample Values |
|------------------|--|---------------|
| Response | Response can be 'Success' or 'Amount not Available'. | |
| Response Message | Detailed Response message. | |

Charge Details

If default charges are available under the product, they should be defaulted here with values. If customer or customer group specific charges are maintained, then the same will be defaulted from back end system.

For Guarantee Advising MT 760, charge details is simulated from back office, user can change the values.

Provide the Charge Details based on the description provided in the following table:

| Charge Details | | | | | | | | |
|---------------------|----------|--------|----------|---------|-------|-------|--------------|--------------------|
| Component | Currency | Amount | Modified | Billing | Defer | Waive | Charge Party | Settlement Account |
| No data to display. | | | | | | | | |

| Field | Description | Sample Values |
|-----------------|---|---------------|
| Component | Charge Component type. | |
| Currency | Defaults the currency in which the charges have to be collected. | |
| Amount | An amount that is maintained under the product code gets defaulted in this field. User can edit the value, if required. | |
| Modified Amount | From the default value, if the rate is changed or the amount is changed, the value gets updated in the modified amount field. | |
| Billing | <p>If charges are handled by separate billing engine, then by selecting billing the details to be available for billing engine for further processing.</p> <p>On simulation of charges/commission from Back Office, if any of the Charges/Commission component for the customer is 'Billing' enabled, 'Billing' toggle for that component should be automatically checked in OBTFPM.</p> <p>The user can not select/de-select the check box if it is de-selected by default.</p> <p>This field is disabled, if 'Defer' toggle is enabled.</p> | |

| Field | Description | Sample Values |
|--------------------|--|---------------|
| Defer | <p>If charges have to be deferred and collected at any future step, this check box has to be selected.</p> <p>On simulation of charges/commission from Back Office, if any of the Charges/Commission component for the customer is AR-AP tracking enabled, 'Defer' toggle for that component should be automatically checked in OBTFPM.</p> <p>The user can select/de-select the check box. On de-selection the user has to click on 'Recalculate' charges button for re-simulation.</p> | |
| Waive | <p>If charges have to be waived, this check box has to be selected.</p> <p>Based on the customer maintenance, the charges should be marked for Billing or for Defer. This field is disabled, if 'Defer' toggle is enabled.</p> | |
| Charge Party | Charge party will be beneficiary by default. You can change the value to applicant. | |
| Settlement Account | Details of the settlement account. | |

Provide the Commission Details based on the description provided in the following table:

| Commission Details | | | | | | | | |
|---------------------|------|----------|--------|----------|-------|-------|--------------|--------------------|
| Component | Rate | Currency | Amount | Modified | Defer | Waive | Charge Party | Settlement Account |
| No data to display. | | | | | | | | |

| Field | Description | Sample Values |
|-----------------|---|---------------|
| Component | Select the commission component | |
| Rate | Defaults from product. User can change the rate, if required. | |
| Currency | Defaults the currency in which the commission needs to be collected | |
| Amount | An amount that is maintained under the product code defaults in this field. User can modify the value, if required. | |
| Modified Amount | From the default value, if the rate or amount is changed, the modified value gets updated in the modified amount field. | |
| Billing | If charges/commission is handled by separate billing engine, then by selecting billing the details to be available for billing engine for further processing. | |
| Defer | Select the check box, if charges/commissions has to be deferred and collected at any future step. | |

| Field | Description | Sample Values |
|--------------------|--|---------------|
| Waive | Select the check box to waive charges/ commission. Based on the customer maintenance, the charges/commission can be marked for Billing or Defer. If the defaulted Commission is changed to defer or billing or waive, system must capture the user details and the modification details in the 'Remarks' place holder. | |
| Charge Party | Charge party will be 'Applicant' by Default. You can change the value to Beneficiary | |
| Settlement Account | Details of the Settlement Account. | |

The tax component is calculated based on the commission. The tax component defaults if maintained in the product level. Tax detail cannot be updated by you and any change in Tax amount on account of modification of charges/ commission will be available on click of Re-Calculate button or on hand off to back-end system.

Provide the Tax Details based on the information in the following table:

| Tax Details | | | |
|---------------------|----------|--------|--------------------|
| Component | Currency | Amount | Settlement Account |
| No data to display. | | | |

| Field | Description | Sample Values |
|--------------------------|--|---------------|
| Component | Tax Component type | |
| Currency | The tax currency is the same as the commission. | |
| Amount | The tax amount defaults based on the percentage of commission maintained. You can edit the same. | |

Exceptions

The Guarantee Advice request, before it reaches the approval stage, the application will validate the Amount Block, KYC and AML. If any of these failed in validation will reach exception stage for further clearance for the exceptions.

Exception - Amount Block

As part of amount block validation, application will check if sufficient balance is available in the account to create the block. On hand-off, system will debit the blocked account to the extent of block and credit charges/ commission account in case of charges block or credit the amount in suspense account for blocks created for collateral.

The transactions that have failed amount block due to non-availability of amount in respective account will reach the amount block exception stage.

Log in into OBTFPM application, amount block exception queue. Amount block validation failed tasks for trade transactions will be listed in the queue. Open the task to view summary of important fields with values.

Exception is created when sufficient balance is not available for blocking the settlement account and the same can be addressed by the approver in the following ways:

Approve:

- Settlement amount will be funded (outside of this process)
- Allow account to be overdrawn during hand-off

Refer:

- Refer back to DE providing alternate settlement account to be used for block.
- Different collateral to be mapped or utilize lines in place of collateral.

Reject:

Reject the transaction due to non-availability of sufficient balance in settlement account

Application

Refer to [Application Details](#).

Amount Bock Exception

This section will display the amount block exception details.

Summary

Tiles Displayed in Summary:

| Cancel | Cancel the Amount Block Exception Inputs. | |
| Approve | On approve, application must validate for all mandatory field values, and task must move to the next logical stage. | |
| Back | Task moves to previous logical step. | |

Exception - Know Your Customer (KYC)

As part of KYC validation, application will check if necessary KYC documents are available and valid for the applicant. The transactions that have failed KYC due to non-availability / expired KYC verification will reach KYC exception stage.

Log in into OBTFPM application, KYC exception queue. KYC exception failed tasks for Trade Finance transactions must be listed in your queue. Open the task, to see summary tiles that display a summary of important fields with values.

User can pick up a transaction and do the following actions:

Approve

- After changing the KYC status in the back end application (outside this process).
- Without changing the KYC status in the back end application.
- Reject (with appropriate reject reason).

Application

Refer to [Application Details](#).

| Cancel | Cancel the KYC Exception inputs. | |
| Approve | On approve, application must validate for all mandatory field values, and task must move to the next logical stage. | |
| Back | Task moves to previous logical step. | |

Exception - Limit Check/Credit

The transactions that have failed limit check due to non-availability of limits will be available in limit check exception queue for further handling.

Log in into OBTFPM application, limit check exception queue. Limit check exception failed tasks for Trade Finance transactions must be listed in your queue. Open the task, to see summary tiles that display a summary of important fields with values.

Limit check Exception approver can do the following actions:

Approve

- Limit enhanced in the back end (outside this process).
- Without enhancing limit in the back end.

Refer

- Refer back to DE providing alternate limit id to map
- Refer additional collateral to be mapped

Reject

The transaction due to non-availability of limits capturing reject reason.

Application

Refer to [Application Details](#).

| Cancel | Cancel the Limit check inputs. | |
| Approve | On approve, application must validate for all mandatory field values, and task must move to the next logical stage. | |
| Back | Task moves to previous logical step. | |

Multi Level Approval

Log in into OBTFPM application and open the task to see the summary tiles. The tiles should display a list of important fields with values. User must be able to drill down from summary Tiles into respective data segments to verify the details of all fields under the data segment.

Authorization Re-Key (Non-Online Channel)

For non-online channel, application will request approver for few critical field values as an authorization step. If the values captured match with the values available in the screen, system will allow user to open the transaction screens for further verification. If the re-key values are different from the values captured, then application will display an error message.

Open the task and re-key some of the critical field values from the request in the Re-key screen. Some of the fields below will dynamically be available for re-key.:

- Currency
- Amount
- Beneficiary Party
- Expiry Date
- Issuing Bank
- Validity

Re-key is applicable to the first approver in case of multiple approvers. All approvers will however be able to see the summary tiles and the details in the screen by drill down from tiles.

The screenshot displays the FuTura Bank interface. On the left is a navigation menu with categories like Core Maintenance, Dashboard, Maintenance, Tasks, Search, Completed Tasks, My Tasks, Free Tasks (selected), Hold Tasks, Supervisor Tasks, Virtual Account Manage..., Security Management, and Trade Finance. The main area shows a 'Free Tasks' table with columns for Action, Priority, and Application. A modal window titled 'Approval Rekey' is open, containing a 'Documents' icon, a 'Remarks' button, and several input fields: Currency (GBP), Amount (£15,000.00), Beneficiary Party (001624), Expiry Date (10/31/18), Issuing Bank (001602), and Validity (Limited). Each field has a green checkmark to its right. At the bottom of the modal are 'Proceed' and 'Cancel' buttons. In the background, a table with columns 'Amount', 'Process Name', and 'Stage' is visible, showing various transaction entries.
