# **Oracle Banking Trade Finance Process Management**

Welcome to the Oracle Banking Trade Finance Process Management (OBTFPM) User Guide. This guide provides an overview on the OBTFPM application and takes you through the various steps involved in creating and processing trade finance transactions.

This document will take you through following activities in OBTFPM:

- To create and handle Trade Finance transaction.
- Help users to conveniently create and process Trade Finance transaction

#### Overview

OBTFPM is a Trade Finance Middle Office platform, which enables Bank to streamline the Trade Finance operations. OBTFPM enables the customers to send request for new trade finance transaction either by visiting the branch (offline channels) or through SWIFT/Trade Portal/other external systems (online channels).

#### **Benefits**

OBTFPM helps banks to manage trade finance operations across the globe in different currencies. OBTFPM allows you to:

- Handle all trade finance transactions in a single platform.
- Provides support for limit verification and limit earmarking.
- Provide amount block support for customer account.
- Provides acknowledgement to customers.
- Enables the user to upload related documents during transaction.
- Enables to Integrate with back end applications for tracking limits, creating limit earmarks, amount blocks, checking KYC, AML and Sanction checks status.
- Create, track and close exceptions for the above checks.
- Enables to use customer specific templates for fast and easy processing of trade transactions that reoccur periodically.

#### **Key Features**

- Stand-alone system that can be paired with any back end application.
- Minimum changes required to integrate with bank's existing core systems.
- Faster time to market.
- Capable to interface with corporate ERP and SWIFT to Corporate.
- Highly configurable based on bank specific needs.
- Flexibility in modifying processes.

# **Limit Tree**

Corporates usually have multiple limits as part of the credit facilities enjoyed by them with the bank. The facilities can be Fund based or Non-Fund based.

Limit Tree process enable the user to view all the facilities (Limits) linked to a customer in a single page in tree structure.

The first level of parent limit line is displayed, on Customer id Search. On clicking of any Limit tile, the corresponding next level Limit/Sub limit is displayed. Each Node displays the Line Id, Limit Amount, Available Amount, and Line Currency.

The available amount is highlighted with Green/Red colour code. The number of sub nodes is displayed as icon. Comprehensive Line details should be displayed if the user clicks on the Line ID link in any Node.

On clicking on the Line ID link, the separate screen should pop up and displays all the Limit details as read only. On expansion of final Node, Line structure should be in Tree view.

In the subsequent steps, let's see the steps to make an enquiry for the contracts available in back office and mid office:

### Limit Tree - Main menu

1. Using the entitled login credentials for Registration stage, login to the OBTFPM application.

Provide the Limit Details based on the description in the following table:

Field	Description	Sample Values
Customer Id	Provide the Customer Id. Alternatively, user can search the Customer Id using LOV.	
	In the LOV, user can input Customer Number, Customer Name, Liability No to fetch the limit details. Based on the search result, select the applicable <b>Customer</b> for viewing the limit tree.	
Customer Name	Customer Name will be populated based on the selected Customer Id from the LOV.	EMR & CO
Liability No	Liability No will be populated based on the selected Customer Id from the LOV.	

4. On successful selection of the liability id from the LOV result, the line associated with the Customer Liability should be queried from the ELCM system and display only the first level node of the limit structure. On clicking on the each Node tiles, the corresponding child nodes is displayed.
