 - 1.2 SETTING UP DSN ENTRIES 1-1

1. DSN Entries Utility

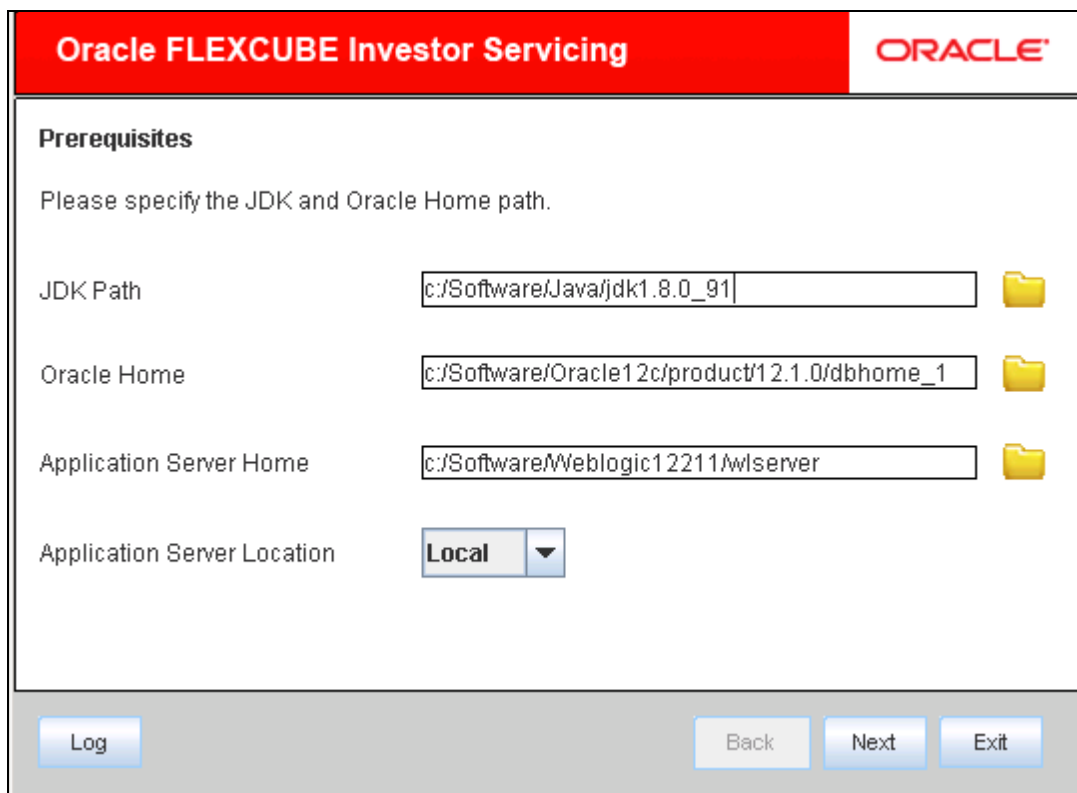

1.1 Introduction

This chapter explains the steps to set up the reports DSN entries using Oracle FLEXCUBE Investor Servicing Installer.

1.2 Setting up DSN Entries

In order to setup the DSN entries, follow the steps given below.

Start Oracle FLEXCUBE Investor Servicing Installer.

The screenshot shows the 'Oracle FLEXCUBE Investor Servicing' window with the 'Prerequisites' section. It contains the following fields and controls:

- JDK Path:** A text box containing 'c:/Software/Java/jdk1.8.0_91' and a folder icon to its right.
- Oracle Home:** A text box containing 'c:/Software/Oracle12c/product/12.1.0/dbhome_1' and a folder icon to its right.
- Application Server Home:** A text box containing 'c:/Software/Weblogic12211/wlserver' and a folder icon to its right.
- Application Server Location:** A dropdown menu with 'Local' selected.

At the bottom of the window, there are four buttons: 'Log', 'Back', 'Next', and 'Exit'.

Specify the following details:

JDK Path

Specify the location of the JDK. You can use the directory button to browse to the JDK location.

Oracle Home

Specify the location of the Oracle Home installation. You can use the directory button to browse to the location.

Application Server Home

Specify the location of the application server.

Note: In case any of the selected directories is incorrect, the Installer will display an appropriate error message. In that case, you need to correct the directory path and proceed.

Click 'Next'. The following screen is displayed.

Select 'DSN Entries' and click 'Next'.

The following screen is displayed.

Specify the following schema details:

User Name

Specify the user name to access the schema.

Password

Enter the schema password.

Service Name

Provide service name of Database.

TNS Connect Descriptor

Specify a valid connect string that contains the details for database connectivity.

IP Address

Specify the IP address of the system where the database schema is installed.

Port

Specify the port number.

Once you have entered the details, you can test the database schema connection using 'Test Connection' button.

Note:

- If the connection is established, the installer displays a message 'Connection Successful'.
- If there is an error in establishing the connection, the system displays the message 'Invalid DB Credentials'.
- If the TNS entry is not proper, the installer displays the message 'TNS entries are not proper'.

After testing the connection successfully, click 'Next'. The following screen is displayed.

Oracle FLEXCUBE Universal Installer

Oracle FLEXCUBE Investor Servicing ORACLE

DSN Entries
Enter the DSN entries.

Symmetric Key oraclefinancialsolutions

DSN Name BIP_DSN **Details**

JNDI Name

| No. | Name | Value |
|-----|-----------------|-------|
| 1 | Database Type | |
| 2 | Database Driver | |
| 3 | Database Name | |
| 4 | IP Address | |
| 5 | Port | |

Log Back Next Exit

Specify the following details:

Symmetric key

Specify the Symmetric key.

DSN Name

Specify the DSN name.

JNDI Name

Specify the JNDI name.

Database Type

Specify the database type.

Database Driver

Specify the database driver.

Database Name

Specify the name of the database.

IP Address

Specify the IP address of the system where the database schema is installed.

Port

Specify the port number.

Database User Name

Specify the user name to access the database.

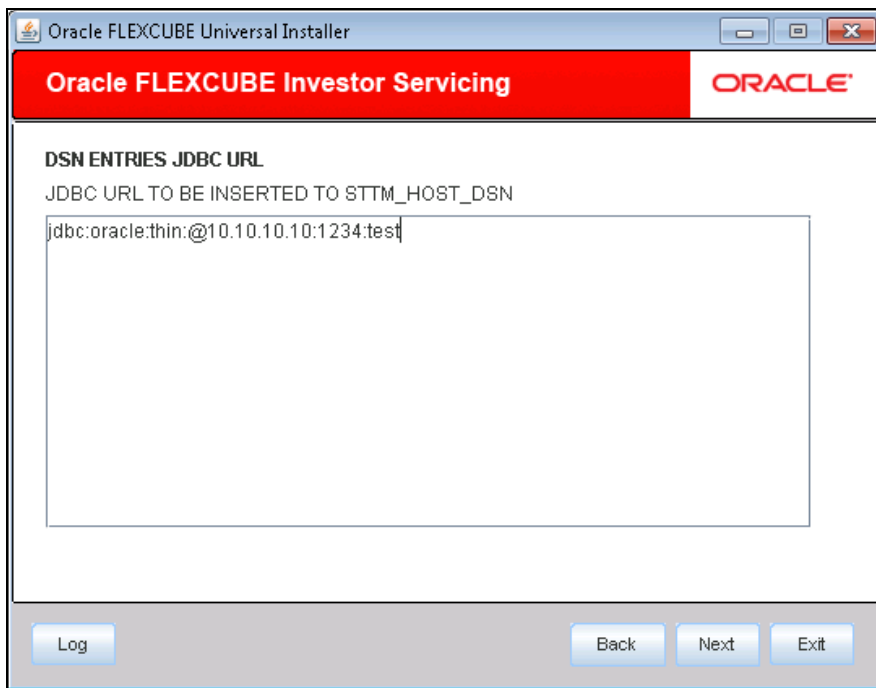

Database Password

Specify the password to access the database.

Once the details are inserted click next .The following screen is displayed.

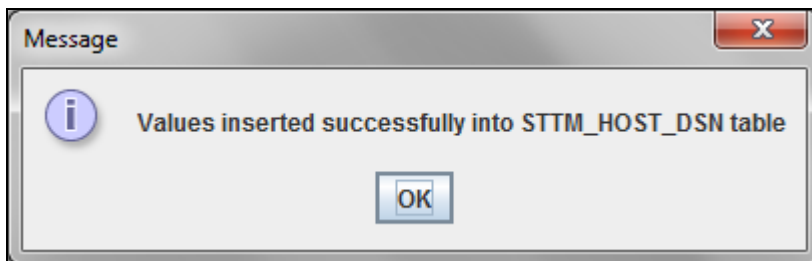

If it's an existing entry then, click on Get Details button. The values are shown and the same can be updated.

If a new entry is given then, it will be an INSERT. If existing, it's UPDATE.

The screenshot shows a window titled "Oracle FLEXCUBE Universal Installer". The window has a red header bar with "Oracle FLEXCUBE Investor Servicing" on the left and the "ORACLE" logo on the right. Below the header, the text "DSN ENTRIES JDBC URL" is displayed. Underneath, it says "JDBC URL TO BE INSERTED TO STTM_HOST_DSN". A text input field contains the value "jdbc:oracle:thin:@10.10.10.10:1234:test". At the bottom of the window, there are four buttons: "Log", "Back", "Next", and "Exit".

For the RAC data source the JDBC URL needs to be manually edited. Up on Clicking Next below Message will be shown.

Click Ok then below confirmation dialog will be shown

If Yes is chosen, it would come from the schema details screen for additional entries to be added.
