ORACLE

1. Preface

1.1 Background

This document provides an overview of configuring SOA suite for Oracle FLEXCUBE Investor Servicing BPEL process deployment.

Refer to the Oracle documentation for HA and other configuration patterns.

1.2 Audience

The audience for this document will be the development groups of BPEL/BPM process flows Oracle FLEXCUBE Investor Servicing.

1.3 Organization

This manual is organized as follows:

• The document helps in download and installation of Oracle SOA 12c.

1.4 Acronyms and Abbreviations

Acronym/Abbreviation	Description
BPEL	Business Process Execution Language
НА	High Availability

2. Installing the JDK, WebLogic, RCU, SOA and Domain Creation

2.1 Introduction

The download of software can be done from the oracle edelivery portal

https://edelivery.oracle.com

Refer to the Oracle certification matrix for qualified databases.

2.2 List of downloaded files

Latest Oracle JDK 8 Update for Linux x86-64

Search: Oracle Fusion Middleware 12c Infrastructure 12.2.1.2.0 (WebLogic Installation)

V78156-01.zip- Oracle Fusion Middleware 12c (12.2.1.2.0) Infrastructure

Search: Oracle Business Process Management 12.2.1.0.0 (BPM/BPEL)

V78169-01.zip– Oracle Fusion Middleware 12c (12.2.1.2.0) SOA Suite and Business Process Management

List of platform which can be selected based on the installation platform

HP-UX Itanium
IBM AIX on POWER Systems (64-bit)
IBM z/OS on System z
IBM: Linux on System z
Linux x86-64
Microsoft Windows (32-bit)
Microsoft Windows x64 (64-bit)
Oracle Solaris on SPARC (32-bit)
Oracle Solaris on SPARC (64-bit)
Oracle Solaris on x86-64 (64-bit)

Selected Item	Platform	
Release: Oracle SOA Suite 12.2.1.0.0 🞇	Linux x86-64	
Release: Oracle Business Process Management 12.2.1.0.0 🗱	Linux x86-64	

NOTE (Doc ID 1904280.1): As part of the new Release of SOA 12c, you need to get WebLogic 12c through the Oracle Fusion Middleware Infrastructure installation, which contains all required components for SOA. The standard WebLogic 12.2.1.0.0 Installer i.e. fmw_12.2.1.0.0_wls.jar, does not have the required JRF templates.

2.3 Install JDK

Login to WebLogic server host upload and install JDK package. Refer to the release certificate for the version of java JDK.

2.4 Installing WebLogic Server Software

[oracle@wls12c-node1 ~]\$ cd /scratch/app/fmwTemp1221/ [oracle@wls12c-node1 fmwTemp1221]\$ unzip V78156-01.zip Archive: V78156-01.zip inflating: fmw_12.2.1_infrastructure.jar [oracle@wls12c-node1 fmwTemp1221]\$ java -jar fmw_12.2.1 _infrastructure.jar

Step 1:

Step 2:

Option need to be selected based on the requirement:

If you don't want the auto updates, select the first option.

If you are applying patches, select the second option.

Step 8:

2.6 Creating Product Schemas in Oracle Database

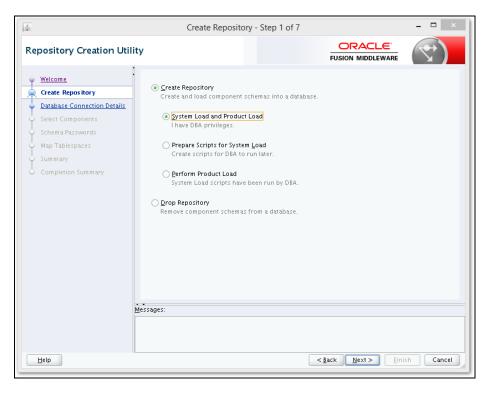

The Repository Creation Utility (RCU) is the tool used to create schemas in a database. This tool is available once we've installed the Oracle Fusion Middleware Infrastructure software (Point 2).

Refer to <u>Oracle Fusion Middleware Creating Schemas with the Repository Creation Utility</u> for more information about the Repository Creation Utility.

- [oracle@wls12c-node1 fmwTemp1221]\$ cd /scratch/app/fmwTemp1221/Oracle/Middleware/Oracle_Home/bin/
- [oracle@wls12c-node1 bin]\$./rcu

Step 1:

0	Welcome - Step 1 of 8 _ X
Welcome	
Verconne Verconne Create Repository Database Connection Details Select Components Schema Passwords Map Tablespaces Summary Completion Summary	Welcome to Repository Creation Utility 12.2.1.0.0 for Oracle Fusion Middleware. The Repository Creation Utility enables you to create and drop database schemas that are required for Oracle Fusion Middleware products.
Help	Copyright © 1996,2015, Oracle and/or its affiliates. All rights reserved.

Step 2: Define the host name port username and password for creating the RCU schemas in the database. The sys user required to create the rcu schemas.

Help			< Back Next > Einish	Cancel

Step 15:

2.8 Remote Setup Configuration

Remote setup means SOA is installed in different machine and EAR is running in different machine.

Configuring FLEXCUBE Application to point to remote BPEL instances

1. Following Jars has to be copied to <Weblogic_home>\<domain>\lib

Jar to be copied	Path where the jar is available in SOA Middleware	
bpm-services.jar	%Middleware Home%/soa/soa/modules/oracle.soa.workflow_11.1.1	
fabric-runtime.jar		
tracking-fabric.jar	%Middleware Home%/soa/soa/modules/oracle.soa.fabric_11.1.1	
tracking-api.jar		
jrf-api.jar	%Middleware Home%/oracle_common/modules/oracle.jrf	
orabpel-common.jar		
orabpel-thirdparty.jar	%Middleware Home%/soa/soa/modules/oracle.soa.bpel 11.1.1	
orabpel.jar		
soa-infra-mgmt.jar	%Middleware Home%/soa/soa/modules/oracle.soa.mgmt_11.1.1	
xml.jar	%Middleware	
xmlparserv2.jar	Home%/oracle_common/modules/oracle.xdk	
mdsrt.jar	%Middleware Home%/oracle_common/modules/oracle.mds	
com.oracle.webservices.fmw.wsc lient-rt-impl.jar	%Middleware Home%/oracle_common/modules	

2. Additionally if BPMN enabled

Jar to be copied	Path where the jar is available in SOA Middleware
oracle.bpm.bpm-services.client.jar oracle.bpm.bpm- services.interface.jar	%Middleware Home%/soa/soa/modules/oracle.bpm.client_11.1.1
oracle.bpm.project.draw.jar	%Middleware
oracle.bpm.project.model.jar	Home%/soa/soa/modules/oracle.bpm.project_11.1.1
oracle.bpm.core.jar	%Middleware Home%/soa/soa/modules/oracle.bpm.runtime_11.1.1
oracle.bpm.ui.jar	%Middleware Home%/soa/soa/modules/oracle.bpm.workspace_11.1.1
oracle.bpm.casemgmt.interface.jar	%Middleware Home%/soa/soa/modules/oracle.bpm.runtime_11.1.1

3. The jars copied have to be from same soa-suite version where BPEL processflows deployed. Ie, We cannot have jars from soa12.1.3.0.0 and BPEL deployed in soa12.2.1.0.0 It should be consistent.

4.	The properties file fcubs.prope	
	WORKFLOW_CLIENT_TYPE	=REMOTE
	java.naming.provider.url	=t3://10.184.74.143:8001/?partitionName=DOMAIN (Remote
	soa server provider url)	
	java.naming.security.principal	=weblogic (Remote bpel server userid)
	java.naming.security.credentials	s=RF2MRTP/MG8TB1T5QG6InQ== (Remote soa server
	password)	
	dedicated.connection	=true
	domain.name	=default (Remote soa server partition)
	domain.pwd	=RF2MRTP/MG8TB1T5QG6InQ== (Remote soa server
	password)	

5. Configure domain password same as for both fcj ear domain and remote BPEL domain and DowngradeUntrusted Principals has to be checked

縃 Security Interoperability Mode:		
-	default 💌	Specifies the security mode of the communication channel used for XA calls between servers that participate in a global transaction. All server instance in a domain must have the same security mode setting. More Info
Credential:	•••••	The credential for this WebLogic Server domain. When a domain is created, a unique credential is generated for the domain. If you want to establish trust between two or more domains, decide on a credential that will be shared by the domains, then specify it here and in the other domains. Mo Info
Confirm Credential:	•••••••	
NodeManager Username:	weblogic	The user name that the Administration Server uses to communicate with Node Manager when starting, stopping, or restarting Managed Servers. More Info
NodeManager Password:	••••••	The password that the Administration Server uses to communicate with Node Manager when starting, stopping, or restarting Managed Servers. More Info
Confirm NodeManager Password:	•••••	
👸 Web App Files Case Insensitive:	false	Specifies the case sensitive URL-pattern matching behavior for security- constraints, servlets, filters, virtual-hosts, etc. in the webapp container an external security policies. The valid values are cs, true, or false. More Info
🕑 🚓 Enforce Strict URL Pattern		Specifies whether the system should enforce strict URL pattern., " l " to represent the entire contents of a Web Application. More Info
🗹 🚰 Downgrade Untrusted Principals		Specifies whether to downgrade to anonymous principals that cannot be verified. More Info
🗌 🏀 Principal Equals Case Insensitive		Specifies whether the WebLogic Server principal name is compared using a case insensitive match when the equals method for the principal object is performed. More Info
🗌 ₆ Principal Equals Compare DN and GUID		Specifies whether the GUID and DN data in a WebLogic Server principal object are used when the equals method of that object is invoked. More Info
Compatibility Connection Filters Enabled		Specifies whether this WebLogic Server domain enables compatibility with previous connection filters. More ${\rm Info}\ldots$
Allow Security Management Operations if Non	n-dynamic Changes have been Made	Specifies whether security management operations are allowed if non-dynamic changes have been made and the Admin Server requires restart. More Info
Clear Text Credential Access Enabled		Returns true if allow access to credential in clear text. This can be overridden by the system property -Dweblogic.management.clearTextCredentialAccessEnabled More Info
	Confirm Credential: NodeManager Username: NodeManager Password: Confirm NodeManager Password: Confirm NodeManager Password: Imager Dessword: Imager Dessword: <t< td=""><td>Confirm Credential: </td></t<>	Confirm Credential:
