3.10.58 Consolidation Main Details

Under this Datasegment user will be able to capture the basic details of the transaction detailed below.

Tranche Reference No

Display the tranche detail which was selected in initiate screen.

Value date

Parameter for selecting the drawdowns for consolidation is the value date. In effect, this date refers to the maturity date of the child drawdowns that have to be consolidated as part of rollover. In addition to the same combination of counterparty, product, and currency, the child drawdowns should also have the same maturity date for consolidation to occur.

Counterparty

You have to select the counterparty of the drawdowns that have to be consolidated as part of rollover. The option list displays the list of all active customers of the branch.

Contract Currency

You have to select the currency of the drawdowns that have to be consolidated as part of rollover. The option list displays the allowable currencies for the tranche. Select a currency from this list.

Product Code

You have to select the drawdown product based on which the system selects the drawdowns for consolidation. This option list the drawdown products associated with the tranche product under which the selected tranche is processed

Rollover Type

You have to indicate the type of rollover you wish to perform. The available options are:

- (a)Consolidated In this case, all selected drawdowns with the same combination of Tranche + Drawdown Product + Counterparty + Currency + Maturity Date is consolidated into a single contract upon rollover.
- (b)Consolidated + Split In this case, the system first consolidates the selected drawdowns as per the consolidation instructions and then splits the net result of consolidation as per the split instructions.

Rollover Amount

User can select Principal or Principal + Interest

Rollover Mode

Here use can select an one option among the available to option (a)Auto: The transaction will be automatically handed over to back office. (b) Manual: Application will be waiting under a stage "Manual Handover stage".

Maturity Date

You can capture the maturity date of the rolled over drawdown here. If you do not specify the maturity date, the system arrives at the maturity date based on the 'Roll By' value and the 'Maturity Days' specified for the drawdown.

Maturity Days

User can input the number of days that is to be added to the value date of the new split Drawdown to arrive at the maturity date of the drawdown.

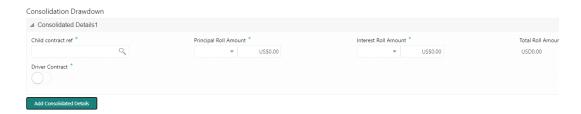

Roll By

Indicate the tenor basis upon which the maturity days specified for the rolled-over contract will be derived. The options are:

Days, Months, Quarters, Semi-annuals, Years

3.10.59 Consolidation Drawdown Details

Child Contract Ref No

You have to select the child drawdowns that have to be consolidated as part of rollover. The option list displays all drawdowns with the same combination of counterparty, product, currency and maturity date that you select. Select a drawdown from this list.

Click the 'Add Consolidation Details' button to select the next drawdown from the list.

Principal Roll Amount

The system displays the outstanding principal that can be rolled over for each child drawdown. You can amend the outstanding principal, if required. This amount can be either greater than or lesser than the outstanding principal amount. The system treats this as a special amount rollover.

Interest Roll Amount

In addition to displaying the outstanding principal, the system displays the interest to be capitalized for each drawdown in the 'Interest Roll Amt' field. You cannot amend this amount.

Total Roll Amount

Sum of Principal Roll amount and Interest Roll amount

Driver Contract

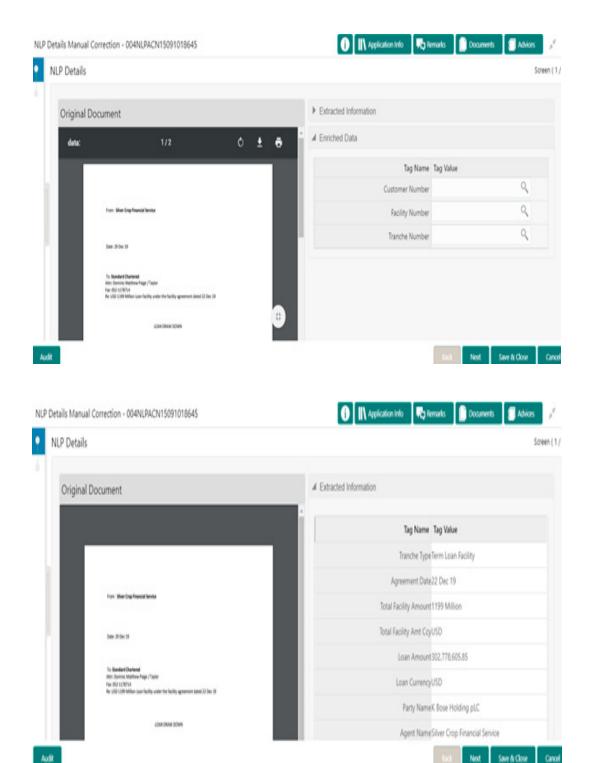

From the list of child drawdowns selected for consolidation, you have to designate one of them as the 'Driver Contract'. The consolidated drawdown (generated upon rollover) inherits the preferences (information such as settlement details, schedules, MIS details and so on) of the driver contract you select here.
