1. About this Manual

1.1 Introduction

This manual is designed to help acquaint you with the Oracle Banking Cash Management (OBCM).

It provides an overview of the system and guides you, through the various steps involved in setting up and providing the cash management services for the customers of your bank.

1.2 Audience

This manual is intended for the following User/User Roles:

Role	Function
Back office executive	Input functions for transactions
Back office managers/officers	Authorization functions
Product Managers	Product definition and authorization

1.3 Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at http://www.oracle.com/us/corporate/accessibility/index.html.

1.4 Document Structure

This manual is organized into the following chapters:

Chapter	Description			
Chapter 1	About this manual: This chapter gives information on the intended audience, abbreviations, icons, and summary of chapters covered in this user manual.			
Chapter 2	The Collections module - an overview: This chapter lists the benefits and functionalities provided by Collections module.			
Chapter 3	Setting up or maintaining reference data for system.			
Chapter 4	Instrument Collection			
Chapter 5	Cash Transaction Management			
Chapter 6	Instrument Management			
Chapter 7 Managing Files				
Chapter 8	Performing inquiries			

1.5 Abbreviations

_	Abbreviation	Detailed Description
	OBCM	Oracle Banking Cash Management
_	FIFO	First In First Out

Abbreviation	Detailed Description
LIFO	Last In First Out
CIF	Customer Information File
CMS	Cash Management System
PDC	Post Dated Cheque
CDC	Current Dated Cheque

1.6 Glossary of Icons

This User Manual may refer to all or some of the following icons:

2. Collections

2.1 Overview

Oracle Banking Cash Management (OBCM) services enables a financial institution to manage the account receivables and account payables of their corporate customers. OBCM provides a technology platform capable of capturing account receivables and account payables of corporates across disparate accounts and locations. It also has a comprehensive collection features such as local, up-country, and correspondent bank cheque collection by minimizing the float time. This in turn enables better management of working capital for the corporate.

2.2 Benefits

- Cost Reduction Increased visibility of transactions and provides easy reconciliation thus helping corporates manage and control their cash flow and reduce costs.
- Integrated Payables & Receivables Facilitate efficient working capital management whilst enhancing straight-through processing speed.
- Early Credit Arrangement credit feature enables user to provide cheque collection credit to corporate before realization of the cheque.
- Accurate Forecasting Manage accurate forecasting by consolidating forecast collection inputs through seamless integration with internal systems.
- Regulatory Environment Leverage flexible configuration to launch quickly, respond to regulatory changes and expand into new geographies.

2.3 Functionality

- Dashboard
- Collections
 - Paper Based Collections
 - Pricing

2.4 Home: Dashboard

Successfully signing into the OBCM application displays the Dashboard as your home screen. Dashboard displays a gist/summary that is internal to the bank. It is a collection of various portlets that are displayed based on your role and access rights. Dashboard enables you to perform various analytical functions. You can drag and move different portlets, resize, auto adjust the size, and expand/collapse the portlet.

On starting the Oracle Banking Cash Management system, below login screen is displayed:

ORACL	E	
Sign In		
User Name *		9
Password *		
	Sign In	
	Cancel	

- 1. Enter your **User Name** and **Password** to access the application.
- 2. Click **Sign In** to log into application and display the **Dashboard** screen.

OBCM Dashboard currently consist of the below mentioned portlet for receivable management.

- Unrealized Instrument Aging: Unrealized Instrument Aging graph displays the doughnut chart with number of cheques/instruments, which are unrealized for aging bucket (number of day). You can click on bar graph icon at the top-right of the portlet to change the view from doughnut (default) to bar graph. Landing page displays the number of unrealized cheques/instruments split as per aging buckets which are configurable. Maximum of seven ranges can be defined.
- Cash Transaction Volume and Trend: This portlet displays a bar graph depicting the amounts in branch currency that have been collected and withdrawn on a monthly-basis, within the specified time frame. The Cash Withdrawal and Cash Collection bars are colorcoded for aiding quick visual analysis. You can alter the 'From Date' and 'To Date' by clicking the Filter icon and selecting the required dates.
- **Instrument Status:** The Instrument Status portlet displays the status wise total count and total value of the instruments for the period selected between From Date and To Date

(Deposit from and To Date). By default, the date period is from 'current date-1' to 'current date'. The statuses displayed in the portlet are Lodged, Hold, Return, and Realized.

- Facility Utilization: The Facility Utilization widget classifies all facilities into three categories i.e., nearing breach, breached, and under-utilized. The drilldown allows the user to view these details at an entity level. There is an option to search and filter the details for a specific entity also.
 - Nearing Breach: When utilized amount is more than 85% of the sanctioned amount.
 - Breached: When utilized amount equals to the sanctioned amount.
 - Under Utilized: When utilized amount is less than 20% of the sanctioned amount.
- **Facilities Expiring:** The Facility Expiring widget lists all facilities nearing expiry or expired and offers a drilldown at each entity level.
- **Facilities Expiring (Count):** This portlet lists the number of facilities expiring at a granular level i.e., anchor, product, program and spoke within a defined timeframe of one month from current business day. This timeframe can be changed using the filter option, if required.
- **Top 5 Corporate Cash Collection:** This portlet displays a jet-bar chart with the top 5 corporate parties with high-value cash collection in branch currency, within the specified time frame. You can alter the 'From Date' and 'To Date' by clicking the Filter icon and selecting the required dates. Flip the portlet using the arrow on the side to view the top 5 corporates high-value cash withdrawal in branch currency, within the specified time frame.
- **Top 5 Corporates:** This portlet displays information of the top five customers; w.r.t. their total Receivables and Payables. On clicking the table icon at the top-right, the graph populates the business volume data of the same top 5 customers in tabular format.
- Aging of Invoices: Aging graph displays invoice aging information in the form of doughnut. There are two views of the graph, 2nd view can be navigated by flipping the portlet, click the graph on the top-right corner to change the view from doughnut (default) to bar chart. Front view of the graph displays the invoice amount volume split as per aging buckets which are configurable at the time of implementation i.e. 0-30 days; 30-60 days etc. Range criteria can be defined with a maximum of 6 ranges. On clicking any of the range bucket, graph displays the list of corporates whose invoices are due for that ageing bucket. Clicking on the '+' (expand) icon against each corporate; launches invoice Due Date From', 'Invoice Due Date To'.
- Product-wise Instrument Collection Flow Value: This portlet displays a line graph representing the collection amount flow in branch currency, within a specified time frame, for all Products that are associated with 'paper-based' category. Each product has a specific color code. You can alter the 'From Date' and 'To Date' by clicking the Filter icon and selecting the required dates. Flip the portlet using the arrow on the side to view the count of instruments for each of the Products, for the specified time frame.
- **Top Defaulters:** Top defaulters widget shows list of top defaulters for the previous and current month.
- **Transaction Status Details:** Transactions are grouped product-wise into groups disbursed, partially settled, or fully settled for a specific date range, which is editable. The user can select on any product to view further details of transaction for the product.

- Invoices Raised: This portlet displays the data for Invoices on monthly basis as a bar graph. On clicking the table icon on the top-right corner, same data is displayed in tabular format with invoices grouped into monthly buckets. On clicking the bar graph, the screen will popup with corporate name and aggregated invoice amount and further clicking on the '+' (expand) icon beside corporate name launches the Invoice Inquiry screen with data of supplier name; 'To Date' and 'From Date' as per the selected date.
- Business Volume Trends: This chart displays the business trends of previous six months including current month based on historic data. The trend line is plotted based on the highs/peak.
- Reconciliation Details: Reconciliation Details widget provides a snapshot of reconciliation details of payments against the entity selected, i.e., invoice, cashflow, or allocation. There is an option to view these details as a donut or in a line-graph. The filter option allows the user to select a specific customer and/or modify the date range.
- 3. You can perform following actions on the dashboard screen:
 - To add more portlets, click the Add (+) icon located at the top-right corner of the Dashboard.
 - \circ To remove a portlet, click the Remove (x) icon located at the portlet's top-right corner.
 - To configure the portlet, click the Configure Tile (?) located at the portlet's top-left corner.
 - To flip the portlet view, click the Flip Forward (<) or Flip Back (>) icon.
 - To change the portlet's position, click and hold the 'Drag to reorder' (.....) icon at the portlet's bottom-center and then move portlet to the desired position.
 - To apply filter on the portlet's data, click the Filter () icon to view the pop-up select filter values.

3. Data Maintenance

3.1 Introduction

To enable the collections related functionalities, there is certain amount of reference data that needs to be set up on day zero.

In the context of collections, for instance, you need to set up reference data like locations, product types, product mappings etc. This is the first step for initiating any transaction of collections.

You may also need to identify administrators among the officers of your bank to whom you could assign the administration of cash management system.

This section explains the maintenance of such reference information for the modules used for cash management.

3.1.1 Maintaining Core Reference Data

Your bank needs to set up certain core reference data for the cash management system to work such as list of country, currency, customer category, list of holidays, list of banks, branch, FX rates etc.

Refer to the 'Oracle Banking Common Core User Guide' for setting up core reference data.

3.2 Maintaining Accounting

One of the important part of setting reference data for Cash Management system is maintaining parameters for accounting such as account mapping, entry codes, roles, and accounting entries.

3.2.1 Accounting Roles

3.2.1.1 Create Accounting Role

This screen is used to create Account Roles.

Navigation Path: Collections > Maintenance > Accounting > Role > Create

Create			i Errors & Overrides	$_{\mu ^{k^{\prime }}}\times$
Accounting Role Code *	Accounting Role Description *			
			Save	Cancel

1. Refer the following table for specifying details in the above screen:

Note: Fields marked with '*' are mandatory.

Field Name	Description
Accounting Role Code *	Enter the unique code for role to create.
Accounting Role Description *	Enter the description to associate with the role.

2. Click **Save** to save the data and send for authorization (if applicable).

3.2.1.2 View Accounting Role

By using this screen, you can view, modify, delete, or authorize the accounting role.

```
Navigation Path: Collections > Maintenance > Accounting > Role > View
```

Accounting Role Code: i Charling Role Code: Charling Role C	:	=

3.3 Maintaining Arrangement Definitions

Arrangement Definition screen help the user to define various arrangement templates which is a group different arrangement parameter based on arrangement reference i.e.; on deposit or liquidation and further link the same to an arrangement party i.e.; Corporate or Correspondent bank in Arrangement Decisioning screen.

An arrangement defines the types of arrangement based on various parameter, which is linked to a corporate and accordingly the arrangement credit is passed to the account for the cheque deposition. Given below are some examples of arrangements in Collections module.

The arrangements reference for the Collection module in OBCM is based on below two parameters:

On Deposit Date:

For the arrangement based on deposit date, the bank provides the corporate an option of different arrangement days on which the corporate desires the payment of funds against instruments deposited by the corporate. The arrangement days depends on the charge, the corporate is willing to pay, and the desired liquidity. Thus, the bank pays amount to the corporate on the arrangement day or value date on presenting a cheque.

For example, if a corporate has opted for a 'Day + 1' arrangement with the bank, then the corporate will receive the funds 1 day after the instrument has been deposited regardless of the actual number of days required to clear the instrument.

On Realization Date:

For the arrangement based on realization date, the corporate receives credit only after the instrument has been marked as cleared in the system. If the instrument has been returned (for reasons such as insufficient funds in the drawer's account, discrepancy in the signature, etc.), then the corporate do not receive the funds. In such a case, the corporate account is debited and credited simultaneously.

3.3.1 Create Arrangement Definition

This screen is used to create an arrangement codes. Newly created arrangement codes takes effect once authorized and cannot be modified thereafter.

Navigation Path: Collections > Maintenance > Arrangement Definition > Create Arrangement Definition

Create Arrangement Definition			🧃 Errors & Overrides 🔰 💉 🗙
Arrangement Code * AR424DP346 Corporate Release Days	Arrangement Description * Arrangement defined for deposit date ! Extension Days - Instrument Lost	Arrangement Reference Basis * Deposit Date Extension Days - Certificate	Arrangement Days 10 Extension Days - Instrument Return
2	3	3	2
Credit Reversal Days	Credit Reversal From * Collections	Partial Credit Reversal	Bank Float Arrangement
Return Recovery From * Account Debit	Partial Return Recovery	Forced Debit for Recovery	
			Save Cancel

1. Refer to the following table for specifying details on the above screen:

Note: Fields marked with '*' are mandatory.

Field Name	Description
Arrangement Code *	Enter unique alphanumeric code to be created for arrangement. This code cannot be modified once authorized.
Arrangement Description *	Enter the description of the arrangement code. Enter a description of the arrangement to be defined. For example, for a corporate having arrangement day on deposit date, enter a description such as 'On Deposit Arrangement' and for corporate having an arrangement day on realization date then you can enter a description such as 'On Realization Arrangement'.

Field Name	Description
Arrangement Reference Basis *	Select the value to specify whether the arrangement is based on liquidation date or deposit date.
Arrangement Days	Enter the number of days on which the fund should be credited to the corporate on the basis of selected arrangement reference.
	For example; In case for a corporate, the user has selected 'Deposit date' in 'Arrangement Reference Basis' field and entered the arrangement day as 1, the amount will be credited to the corporate on the next day of the deposition.
	Maximum value can be 99. Default value is zero. Leaving this field blank considers default value.
Corporate Release Days	Enter the number of days post which the corporate can withdraw/utilize the funds, post the funds are released.
	Based on the arrangement, the corporate account will be credited. However, the amount will be blocked for the number of days entered in 'Corporate Release Days'.
	Maximum value can be 99. Default value is zero. Leaving this field blank considers default value.
Extension Days - Instrument Lost	In case the cheque is lost in transit, enter the number of days to be given as an extension to notify the corporate that the account will get debited.
Extension Days - Certificate	Enter the number of days to extend the line of credit (tenor) given to the corporate.
	For example, when the instrument does not get cleared within the scheduled time, the corporate can get a certificate from the drawer's bank. This is the form of a letter stating that the drawer's account balance is sufficient to make the payment to the corporate, or that the drawer's account has already been debited, thus indicating that the instrument has been cleared. However the correspondent bank/drawer bank might not have conveyed the same information to the system bank. In such case, giving an extension will extend the line of credit (tenor) given to the corporate as defined in the 'Certificate Extension Days' field. Maximum value can be 99. Default value is zero. Leaving this field blank considers default value.
Extension Days - Instrument Return	Enter the number of days to be given as an extension window for the corporate in case if the cheque is returned.
Credit Reversal Days	Enter the number of days post which the pooling job should initiate reversal of credit from the corporate's account.
Credit Reversal From *	Select the value to specify from where the recovery can be done in case if clearing fate is unknown for the instrument.
Partial Credit Reversal	Switch the toggle ON if recovery can be done in tranches i.e. even if the collections or CASA account balance is less than the total amount that needs to be reversed and until such time that multiple collections or multiple debits to CASA will nullify the credit amount.
	Else, credit reversal should only be done if and when the next collection's batch amount or CASA account balance is equal to or greater than the amount that needs to be recovered.

Field Name	Description
Bank Float Arrangement	Switch the toggle ON to utilize the processed instruments that are realized before arrangement credit to the corporate.
Return Recovery From *	Select the value to specify from where the recovery can be done in case of returned instrument.
Partial Return Recovery	Switch the toggle ON if recovery can be done in tranches i.e. even if the collections or account balance less than the total amount that needs to be recovered and until such time that multiple collections or account debits to CASA will then nullify the recovery amount.
	Else, credit reversal should only be done if and when the next collection's batch amount or CASA account balance is equal to or greater than the amount that needs to be recovered.
Forced Debit for Recovery	Switch the toggle ON to allow an entry with negative amount passed by core banking in case of reversal or recovery that needs to be done from a customer's bank account that has insufficient balance.

2. Click **Save** to save the record and send for authorization.

3.3.2 View Arrangement Definition

By using this screen, you can view, modify, delete, or authorize arrangement code details.

Navigation Path: Collections > Maintenance > Arrangement Definition > View Arrangement Definition

- **View** To view the arrangement code details.

3.4 Maintaining Arrangement Decisioning

Once the arrangement code is defined, Arrangement Decisioning screen helps to map such templates at the corporate level. The user can map the existing arrangement codes or define new arrangement settings for the Corporate/Drawee bank/Correspondent bank.

By using Arrangement Decisioning screen, you can maintain the mappings between arrangement codes and the corporates.

3.4.1 Create Arrangement Decisioning

This screen is used to link the existing arrangement codes with the arrangement party (Corporate/Correspondent bank) or define a new arrangement. The arrangement decisioning is driven by combination of following fields.

- Product
- Effective Date
- Arrangement Party
- Corporate/Drawee bank/Correspondent bank
- Payable at Location (if available)

Newly created mapping takes effect once authorized and cannot be modified thereafter.

Navigation Path: Collections > Maintenance > Arrangement Decisioning > Create Arrangement Decisioning

1. Refer to the following table for specifying details on the above screen:

Field Name	Description
Apply for All Products	Switch the toggle ON to apply the arrangement decisioning to all products.
Product *	Select the product to apply the arrangement decisioning onto.
Arrangement Party *	Select the arrangement party (Corporate/Correspondent bank) to specify for whom the existing arrangement is being linked or new arrangement is created. This field cannot be modified once authorized.
Filter Criteria *	 Select the value which indicate that either the setup is done for the Corporate/Correspondent bank at broad level or it is done with a combination of different field parameter along with the arrangement party. For example: If the arrangement party is 'Corporate' then the LoV shows following options:
	Corporate
	Corporate and Payable At Location
	Corporate and Drawee Bank
	Drawee Bank and Payable At Location
	Corporate and Drawee Bank and Payable At Location
	Default
	If the arrangement party is 'Correspondent bank' then the LoV shows following options:-
	Correspondent Bank

Note: Fields marked with "*' are mandatory.

Field Name	Description
	Correspondent Bank and Payable At Location
	Correspondent Bank and Drawee Bank and Payable At Location
	Default
	Basis on the above selected value in filter criteria, relevant additional fields get displayed on the screen. For example:
	In case of a 'Corporate and Payable at Location' value in filter criteria field, an additional field is displayed as 'Corporate and Payable Location'.
	The filter criteria cannot be modified once authorized.
Payable at Location *	Click the Search icon to select the location from where an amount can be paid.
	This field is displayed only if filter criteria contains 'Payable At Location'.
Drawee Bank *	Click the Search icon to select the bank on which the cheque is drawn.
	This field is enabled only for the below filter criteria:
	Corporate & Drawee Bank
	Corporate & Drawee Bank & Payable at Location
	Drawee Bank & Payable at Location
	Correspondent Bank & Drawee Bank & Payable at Location
Corporate */ Correspondent Bank *	Click the Search icon to select name of the corporate or correspondent bank.
	This field cannot be modified once authorized.
Effective Date *	Click the Calendar icon and select date from which the arrangement will be effective. By default, it is selected as branch date.
	This field cannot be modified once authorized.
Expiry Date *	Click the Calendar icon and select date on which the arrangement expires.
	In case the expiry date is same as branch date then on that days EOD; the arrangement decisioning status is marked as 'Close'.
Agreement Reference Number	Enter the alphanumeric agreement reference number. This is an agreement reference number and is stored as a placeholder only.
Inclusion of Holidays	Switch the toggle ON to include holidays in calculation of expected clearing date during transaction entry for Corporates/Correspondent bank/Drawee bank.
	This field cannot be modified once authorized.
Centralized Forwarding Schedule	Switch the toggle ON or Off to enable or disable the centralized forwarding schedule. If the switch is enabled for a correspondent bank as an arrangement party, the workflow process of centralized forwarding schedule is followed by the system for all the cheques payable at selected correspondent bank in OBCM.

Field Name	Description
	This field is enabled only if the 'Arrangement Party' is 'Correspondent Bank'.
Amount Based Arrangement	The 'Amount Based' switch is activated in case where the arrangement party (Corporate/Correspondent bank) need to have arrangement on the basis of 'From Amount' and 'To Amount' of the cheque. Enabling this field displays the grid to specify value for amount range, arrangement code etc. This field cannot be modified once authorized.
Currency	Select the currency of the amount.
Guirency	This field is displayed only if 'Amount Based Arrangement' field is enabled.
From Amount	Enter the value to specify the start of the amount range. The amount can contain up to two decimal values. For example: \$34,234,235,252,532,430,000,000,000.00. Default value is zero. This field is displayed only if 'Amount Based Arrangement' field is enabled.
To Amount	 Enter the value to specify the end of the amount range. The amount can contain up to two decimal values. For example: \$34,234,235,252,532,430,000,000,000.00. Blank value in the last row indicates the end of amount range as infinite. Default value is zero. This field is displayed only if 'Amount Based Arrangement' field is enabled.
Link Arrangement	Switch the toggle ON to select and link the existing arrangement code. On selecting the arrangement code, all its relevant fields are auto-populated and read only. This field cannot be modified once authorized.
Arrangement Code *	Click the Search icon to select the arrangement code.
	This field is displayed only if 'Link Arrangement' toggle is enabled.
Arrangement Reference Basis	This field cannot be modified if the 'Link Arrangement' toggle is enabled. Otherwise, select the value to specify whether the arrangement is based on 'Liquidation' or 'Deposit'
Arrangement Days	 based on 'Liquidation' or 'Deposit'. This field cannot be modified if the 'Link Arrangement' toggle is enabled. Otherwise, enter the number of days when the funds are channelized between banks, corporate, etc. Maximum value can be 99. Default value is zero. Leaving this field blank considers default value.
Corporate Release Days	Enter the number of days post which the corporate can withdraw/utilize the funds, post the funds are released. Based on the arrangement, the corporate account will be credited. However, the amount will be blocked for the number of days entered in 'Corporate Release Days'.

Field Name	Description
	Maximum value can be 99. Default value is zero. Leaving this field blank considers default value.
	This field cannot be modified if the 'Link Arrangement' toggle is enabled.
Extension Days - Instrument Lost	This field cannot be modified if the 'Link Arrangement' toggle is enabled.
	Otherwise, enter the number of days to be given as an extension to notify the corporate that the account will get debited, in case if cheque is lost in transit.
Extension Days - Instrument Return	This field cannot be modified if the 'Link Arrangement' toggle is enabled.
	Otherwise, enter the number of days to be given as an extension window for the corporate in case if the cheque is returned.
Extension Days - Certificate	Enter the number of days to extend the line of credit (tenor) given to the corporate.
	For example, when the instrument does not get cleared within the scheduled time, the corporate can get a certificate from the drawer's bank. This is the form of a letter stating that the drawer's account balance is sufficient to make the payment to the corporate, or that the drawer's account has already been debited, thus indicating that the instrument has been cleared. However the Correspondent bank/Drawer bank might not have conveyed the same information to the system bank. In such case, giving an extension will extend the line of credit (tenor) given to the corporate as defined in the 'Certificate Extension Days' field.
	Maximum value can be 99. Default value is zero. Leaving this field blank considers default value.
Credit Reversal Days	Enter the number of days post which the pooling job should initiate reversal of credit from the corporate's account.
Credit Reversal From *	Select the value to specify from where the recovery can be done in case if clearing fate is unknown for the instrument.
Partial Credit Reversal	Switch the toggle ON if recovery can be done in tranches i.e. even if the collections or CASA account balance is less than the total amount that needs to be reversed and until such time that multiple collections or multiple debits to CASA will nullify the credit amount.
	Else, credit reversal should only be done if and when the next collection's batch amount or CASA account balance is equal to or greater than the amount that needs to be recovered.
Bank Float Arrangement	Switch the toggle ON to utilize the processed instruments that are realized before arrangement credit to the corporate.
Return Recovery From *	Select the value to specify from where the recovery can be done in case of returned instrument.
Partial Return Recovery	Switch the toggle ON if recovery can be done in tranches i.e. even if the collections or account balance less than the total amount that needs to be recovered and until such time that multiple collections or account debits to CASA will then nullify the recovery amount.

Field Name	Description
	Else, credit reversal should only be done if and when the next collection's batch amount or CASA account balance is equal to or greater than the amount that needs to be recovered.
Forced Debit for Recovery	Switch the toggle ON to allow an entry with negative amount passed by core banking in case of reversal or recovery that needs to be done from a customer's bank account that has insufficient balance.
Location Name *	Click the Search icon to select the location applicable to corporate. This field cannot be modified once authorized.

Note: To modify records in the grid, click the Kabab icon ([‡]) under the 'Action' column and then click **Edit**.

- 2. Click **Add/Edit** to add more records in the grid or modify the selected records. If required, click **Reset** to clear the selected values.
- 3. Click **Save** to save the record and send for authorization.

3.4.2 View Arrangement Decisioning

By using this screen, you can view, modify, delete, or authorize arrangement decisioning details.

3.5 Maintaining Corporate Enrichment

In Collections, there are various parameters that cannot be set up at system level; instead these need to be maintained at the corporate level. Out of many such parameters, few are captured and maintained in 'Corporate Enrichment' screen wherein you can maintain corporate/customer specific data.

This screen allows you to map products that are available for the specific corporate. Once the product(s) are mapped, product level enrichment can be created at a deposit level or an instrument level. In case of maintaining enrichment at an instrument level, you can choose a specific product or 'All' products. There are additional fields that can be mapped for the product and applied at the time of transaction processing.

Pooling level information allows you to map the level at which the funds should be pooled i.e. 'Account', 'Division', or 'Location'.

Pick up point creation allows you to set up multiple pick-up points for the corporate.

The 'Corporate Enrichment' screen captures data in four tabs namely – 'Basic Information', 'Product Information', 'Corporate Pooling Setup', 'Pick Up Point Creation', and 'Delivery Point Creation'.

3.5.1 Create Corporate Enrichment

This screen is used to setup a new corporate enrichment details for collections.

Navigation Path: Collections > Maintenance > Corporate Enrichment > Create Corporate Enrichment

3.5.1.1 Corporate Information

You can map the products available for the corporate and other parameters which will be applied at the time of transaction capturing or processing. Multiple records can be added for product(s) by clicking on **Add/Edit** button. These products will then be available in the next tab for enrichment.

1. Refer to the following table for specifying details on above **Corporate Information** screen:

Field Name	Description
Corporate *	Enter the corporate Id or name to add the details for. Alternatively, click the Search icon to search and select the corporate. This field cannot be modified once authorized.
Division Code Info Mandatory	Switch the toggle ON, if providing division code details should be mandatory in transactions.
Drawer Info Mandatory	Switch the toggle ON, if providing drawer details in transaction should be mandatory.
Courier Service	Select the Pickup if pick up service is required by the corporate. If selected, the details on the 'Pick Up Point Creation' screen are mandatory. Select the Delivery if delivery service is required by the corporate. If selected, the details on the 'Delivery Point Creation' screen are mandatory.
Product Code *	Enter the product code or click the Search icon to search and select the products that should be available for enrichment and transactions.
Description	This is auto-populated based on the selected product code.
Status *	Select the product status. The status can be toggled from 'Active' to the 'Closed' and vice-versa. Once selected as 'Closed', the product will not be available for transaction and further enrichment. However, already initiated transactions for the product will be allowed to complete.

Note: Fields marked with '*' are mandatory.

2. Perform the following actions on the **Corporate Information** screen:

a. Click **Add/Edit** to add more records in the grid or modify the selected records. If required, click **Reset** to clear the selected values.

OR

For grid record, under the **Actions** column, click the Kabab icon ([‡]) and then click **Edit** or **Delete** to edit or remove the record respectively.

b. Click Next to move to the Product Information screen.

OR

Click **Save & Close** to save the record and close the window. The record is sent for authorization.

OR

Click **Cancel** to close the window without saving data.

3.5.1.2 Product Information

Once the products that should be available for the Corporate are selected; this screen is used to create a customized enrichment labels. These will be used and validated while processing the transactions.

Corporate Information	Product Information							Screen (
	Level Of Enrichment		Product Code *		Enrichment Label		Data Type	
Corporate Pooling Setup	Instrument	×	All	*	InstNum		Alphanumeric	×
Pick Up Point Creation	Field Length		Validations		-			
Delivery Point Creation	10		Unique × Mandat	ory ×	Add/Edit	Reset		
	Level Of Enrichment	Product Category	Product	Enrichment Label	Data Type	Date Format/Field Length	Validations	Action
	Instrument	Paper Based Instru	uments ALL	InstNum	Alphanumeric	10	UNIQUE, MANDATORY	1
	Deposit	Paper Based Instru	uments	Amt	Numeric	12	MANDATORY, MINIMUM	1
	Deposit	Paper Based Instru	uments	DateAndTime	Date and Time	yyyy-MM-dd HH:mm:SS		:

3. Refer to the following table for specifying details on above **Product Information** screen:

Note: I leide mained with	
Field Name	Description
Level of Enrichment **	Select the value to specify that the enrichment is at 'Deposit' or 'Instrument' level.
Product Code **	This field is enabled only for 'Instrument' level enrichment. Select the product for enrichment.

Note: Fields marked with '*' are mandatory and '**' are conditionally mandatory.

Field Name	Description			
Product Category **	This field is enabled only for 'Deposit' level enrichment.			
	Select the product for enrichment as 'Paper Based Instrument' or 'Cash'.			
Enrichment Label **	Enter the name of an attribute to configure.			
Data Type **	Select one of the following data type for the attribute:			
	Alphabetical – For only alphabets.			
	Alphanumeric – For alphabets and numbers.			
	Date – For only date format.			
	Numeric – For only number format.			
	• Time – For time format.			
	• Date and Time – For date as well as time format.			
Field length **	Enter the length of the field to be validated.			
	This field is hidden for data type that includes date/time.			
Validations	Select any of the following values:			
	Unique – If the attribute value should be unique.			
	• Mandatory – If selecting the value for attribute is mandatory.			
	• Exact Length – If an attribute should be of specified field length.			
	• Minimum Length – Specify the minimum length of an attribute in the textbox.			
Date Format **	The date format is defaulted to the 'yyyy-mm-dd'.			
Time	The date format is defaulted to the 'HH-MM-SS'.			

- 4. Perform the following actions on the **Product information** screen:
 - a. Click **Add/Edit** to add more records in the grid or modify the selected records. If required, click **Reset** to clear the selected values.

OR

For grid record, under the **Actions** column, click the Kabab icon ([‡]) and then click **Edit** or **Delete** to edit or remove the record respectively.

b. Click **Back** to move to the **Corporate Information** screen.

OR

Click Next to move to the Corporate Pooling Setup screen.

OR

Click **Save & Close** to save the record and close the window. The record is sent for authorization.

OR

Click **Cancel** to close the window without saving data.

3.5.1.3 Corporate Pooling Setup

Corporate Information	Corporate Pooling Setup						Screen (3
Product Information	Product Category *		Pooling Level *	Credit	Consolidation Level *	Percentage Pooling

7. Refer to the following table for specifying details on above **Pick Up Point Creation** screen:

Field Name	Description
Copy Existing Delivery Point	Click this link to select the delivery point details existing in the system to auto-populate the data.
Location **	Click the Search icon or enter the pick-up location code.
	This field is mandatory only if 'Pick Up' is selected for 'Courier Service' on Corporate Information screen.
Pick Up Point Code **	Enter unique alphanumeric pick-up point code to create.
	This field cannot be modified once authorized.
Pick Up Point **	Enter the name or description for the pick-up point code.
Contact Person	Enter name of the contact person of pick-up point.
Pick Up Service For **	Select 'Cheque' or 'Cash' for which the pick-up point is configured.
Pick Up Type **	Select the type of pick-up as 'Ad-hoc/On-call', or 'Scheduled'.
Courier **	Click the Search icon and select the courier maintained in the system.
Agreement Date	Click the Calendar icon and select the start date of the pick-up service. By default, current branch date is the agreement date.
Address Line 1 **	Enter first line of the address of pick-up location.
Address Line 2	Enter second line of the address of pick-up location.
Address Line 3	Enter third line of the address of pick-up location.
Address Line 4	Enter fourth line of the address of pick-up location.
Country **	Click the Search icon and select the country to which pick-up location belongs to.

Note: Fields marked with '*' are mandatory and '**' are conditionally mandatory.

Field Name	Description
Postal Code *	Enter the postal code of the location.
Primary Phone Number	Enter the primary phone number of a pick-up contact person.
Secondary Phone Number	Enter the secondary phone number of a pick-up contact person.
Primary Email Address	Enter the primary email address for the pick-up location.
Secondary Email Address	Enter the secondary email address for the pick-up location.
Fax No.	Enter the Fax number of the pick-up location, if any.
Pick Up Time Slot	Enter the time slot in HH:MM:SS format within which pick-up should be done. Whereas, HH stands for hour, MM stands for minutes, and SS stands for seconds of the time.
Frequency **	This field is mandatory only for 'Scheduled' type of pick-up. Select the value to specify how frequently pick-up should be done.
Day of the Week **	Select day(s) on which the pick-up should be done. This field is not applicable for 'Daily' frequency.
Pickup on Holidays	Switch the toggle ON, if pick-up can be done on holidays.
Cheque Return Dispatch	Select any one value where return should be dispatched. This field is displayed only when 'Cheque' or 'Both' is selected as 'Pick Up Service For' field.
Address Line 1	Enter the line 1 of address where cheque should be returned. This field is displayed only when 'Other' is selected for 'Cheque Return Dispatch' field.
Address Line 2	Enter the line 2 of address where cheque should be returned. This field is displayed only when 'Other' is selected for 'Cheque Return Dispatch' field.
Address Line 3	Enter the line 3 of address where cheque should be returned. This field is displayed only when 'Other' is selected for 'Cheque Return Dispatch' field.
Address Line 4	Enter the line 4 of address where cheque should be returned. This field is displayed only when 'Other' is selected for 'Cheque Return Dispatch' field.

- 8. Perform the following actions on the **Pick Up Point Creation** screen:
 - a. Click **Add/Edit** to add more records in the grid or modify the selected records. If required, click **Reset** to clear the selected values.

OR

For grid record, under the **Actions** column, click the Kabab icon (*) and then click **Edit** or **Delete** to edit or remove the record respectively. You can also click **Copy** to copy the details for adding slightly different record.

b. Click Back to move to the Corporate Pooling Setup screen.

OR

Click Next to move to the Delivery Point Creation screen.

OR

Click **Save & Close** to save the record and close the window. The record is sent for authorization.

OR

Click **Cancel** to close the window without saving data.

3.5.1.5 Delivery Point Creation

 - b. Click **Proceed** to delete the record.

- Copy To copy the corporate enrichment details for creating a new record.
- View To view the corporate enrichment details.

3.6 Maintaining Charges

Banks can levy charges on services extended to corporates with respect to managing and financing receivables and payables, like documentation charges, handling charges and so on. These charges can be configured at default/global level for specific products or parties. The levying of the charges can be triggered by specific events such as auto-debit, EOD, etc. Once configured, the charges would get levied for manual as well as auto processing mode for transactions.

Charge pricing is determined by configuring various pricing methods such as fixed amount, fixed percentage, slab based pricing, count based pricing and so on. The frequency of calculation and collection, such as, daily/weekly/monthly/yearly, can also be defined for a charge.

Banks are also empowered to configure flexible and preferential pricing as per corporate risk profile and assessment.

3.6.3 Charge Decisioning

Using this screen, the charge rule and charge code created in the earlier screens, can be mapped to a specific product for instrument collections (both cash and cheques). The charge party (buyer/supplier/insurance company) can also be defined. The calculation and collection frequencies for the charge can be defined as well.

Charges are not levied for instruments that are returned due to technical reasons on the bank's end. Such instruments are not charged for re-lodging either.

3.6.3.1 Create Charge Decisioning

1. Refer to the following table for specifying details on the above screen:

Field Name	Description
Event *	Select the event on the occurrence of which, the charge should be applied.
Filter Criteria *	Select the appropriate filter criteria on which the charge is required to be calculated and debited.
	The options are:
	 Instrument Type Instrument Status based
	 Instrument Type Instrument Status Product-based
	Instrument Type Credit/Debit Status based
	Instrument Type Credit/Debit Status Product-based
	• Default
Instrument Type *	Select the instrument type for which the charge is to be mapped.
	This field appears if the selected filter criteria contains 'Instrument Type'.
	This list displays values based on the option selected in the Filter Criteria, as follows:

Note: Fields marked with '*' are mandatory.

Field Name	Description
	 For Instrument Type Instrument Status based, the options displayed are: PDC Collection and CDC Collection.
	 For Instrument Type Instrument Status Product-based, the options displayed are: PDC Collection and CDC Collection.
	 For Instrument Type Credit/Debit Status based, the options displayed are: CDC Collection, Cash Deposit, and Cash Withdrawal.
_	 For Instrument Type Credit/Debit Status Product-based, the option displayed is: CDC Collection.
Credit/Debit Status *	Select the credit or debit status of the instrument to map the charge with. This field appears if the selected filter criteria contains 'Credit/Debit Status'.
	The options available for CDC Collection: Credited, Reversed, Partially Reversed.
	The option available for Cash Deposit: Credited.
	The option available for Cash Withdrawal: Debited.
Instrument Status *	 Select the relevant status of the instrument based on which the charge would get levied. Different charges and pricing can be configured for combination of instruments and their status. This field appears if the selected filter criteria contains 'Instrument Status'. Status options for CDC Collection: Booked
	Hold
	Returned
	Realized
	Status option for PDC Collection:
	Booked
Product *	Select the relevant product to map the charge to. This field appears if the selected filter criteria contains 'Product-based'.
Inherit Charges *	Specify if default charges should be inherited as set up for default filter criteria or should be overridden as well.
Charge Code *	Select the charge code for which decisioning is to be configured.
Charge Sharing	Switch the toggle On if charge sharing is applicable.
Sharing Percentage Allocation *	Click the link to open the pop-up window for specifying sharing percentage for each party. This link is displayed only if you enable charge sharing.

	Instrument AmountSlip Amount
Reference Tenor Start Date *	Specify which date should be considered to calculate the start of charge tenor duration. The options displayed depend on the selected Instrument Type.
Reference Tenor End Date *	Specify which date should be considered to calculate the end of charge tenor duration. The options displayed depend on the selected Instrument Type.
Effective Date *	Click the Calendar icon to select the start date of the charge decisioning validity.
Expiry Date *	Click the Calendar icon to select the end date of the charge decisioning validity.
Auto Waive	Switch the toggle On to enable automatic charge waiving at the time of transaction processing.
	This field is displayed only if filter criteria is selected as 'Instrument Type Status Based'.
Allow Waive	Switch the toggle On to enable manual charge waiving at the time of transaction processing.
	If Auto Waive toggle is switched on, then this toggle is switched off and disabled by default.
Allow Pricing Modification	Switch the toggle On to allow pricing rule modification at the time of transaction processing.
	If Auto Waive toggle is switched on, then this toggle is switched off and disabled by default.
Allow Override	Switch the toggle On to enable overriding of charge amount at the time of transaction processing.
	If Auto Waive toggle is switched on, then this toggle is switched off and disabled by default.
	Collection Parameters
Collection Type *	 Specify how the charge should be collected. The available options are: Batch Online
	If the selected event is EOD, then only 'Batch' option is available for selection.
Frequency	Specify the frequency for charge collection. This field is displayed only when the collection type is batch.
Reference Period	Specify when the collection should take place for the selected frequency.
	For monthly or half-yearly frequency, the collection can take place either at the beginning of the period (BOP) or end of the period (EOP).

Field Name	Description
	For weekly frequency, the collection can happen on a specific day of the week,
	This field is displayed only when the collection type is batch.
Units	This field specifies whether the charge collection should take place as per units of specified frequency. If monthly frequency is specified and no. of units is 2, then the charge would be collected once in two months.
	This field is displayed only when the collection type is batch.
	Calculation Parameters
Calculation Type *	Specify how the charge should be calculated. The available options are:
	Batch
	Online
	If the selected event is EOD, then only 'Batch' option is available for selection.
Frequency	Specify the frequency for charge calculation.
	This field is displayed only when the calculation type is batch.
Reference Period	Specify when the calculation should take place for the selected frequency.
	For monthly or half-yearly frequency, the calculation can take place either at the beginning of the period (BOP) or end of the period (EOP). For weekly frequency, the calculation can happen on a specific day of the week.
	This field is displayed only when the calculation type is batch.
Units	This field specifies whether the charge collection should take place as per units of specified frequency. If monthly frequency is specified and no. of units is 2, then the charge would be collected once in two months. This field is displayed only when the calculation type is batch.
Add/Override Charges grid	The details of new charges added, appears in this grid.
Default Charges grid	The default charges configured for the selected event, appear in this grid, if you select the Inherit Default Charges option from the Inherit Charges list. These charges cannot be modified.

2. If required, click **Reset** to clear the selected values.

3. Click **Add** to add details in the grid.

3.7 Maintaining Cash Denomination

Denomination is a proper description of a currency amount, usually for coins or banknotes; it is a unit of value given to physical currencies like coins and notes. Denomination detail differ currency to currency. The bank user can maintain the denomination value for each currency that bank deals with for cash collection/withdrawal.

By using 'Cash Denomination' screen, you can maintain the denominations for cash transactions of various currencies.

3.7.1 Create Cash Denomination

This screen is used to create master maintenance of cash denominations that the bank's branch is using. User can maintain denominations per currency / per unit. Newly created currency denominations take effect once authorized.

anch *	Currency * Main Un		Main Unit *	Sub Unit			
04-LM BRANCH	USD	×	Dollar		Cent		
							+
Denomination Type		Denomination Value		Description		Action	
Coin	(Y)	50		Half Dollar = 50 Cents			
Note	Υ.	1		1 USD	1 USD		
Coin		1		1 Cent = 0.01 USD			
Coin	×	5		Nikel = 5 Cents		1	
Coin	¥	10		Dime = 10 Cents		2	
Page 1 of 1 (1-5 of 5 items) 🔣 < 🗍] > э						

Navigation Path: Collections > Maintenance > Cash Denomination > Create Cash Denomination

1. Refer to the following table for specifying details on the above screen:

Note: Fields marked with '*' are mandatory.	
---	--

Field Name	Description
Branch *	Select the branch to create the cash denomination for. Changing the branch requires access rights for the selected branch.
Currency *	Select the currency code to maintain denominations for.
Main Unit *	Enter name of the main unit in which the currency denominations are measured. For example: Dollar, Rupee, Pound etc.
Sub Unit	Enter name of the sub unit of the currency. For example: Cent, Paisa, Penny etc.

- 2. To add a row for a denomination, click the Add icon (¹¹) and perform following steps:
 - a. Under the 'Action' column, click the Edit icon (\square).
 - b. In the **Denomination Type** list, specify whether the denomination is a coin or a note.
 - c. In the **Denomination Value** field, enter the market value of a coin or a note.
 - d. In the **Description** field, enter more details about the denomination.

OR

To delete a row of denomination, click the Remove icon (a) under the 'Action' column.

3. Click **Save** to save the record and send for authorization.

3.7.2 View Cash Denomination

By using this screen, you can view, modify, delete, or authorize cash denomination details.

3.9 Maintaining Location

As a bank user, you can define various clearing parameters for a specific location, based on all locations where banks intends to offer CMS services. You can also link Correspondent bank to those locations where bank has a correspondent-banking tie up, or can link an outside network banks to locations where bank does not have a branch as well as no correspondent banking arrangement.

For a specific location code, you can define clearing parameters like location cluster, high value cut-off amount as well as supported clearing networks like HOME, MICR (Magnetic Ink Character Recognition), NON-MICR (Non-Magnetic Ink Character Recognition), ICCS (Image Cheque Clearing System).

3.9.1 Create Location

This screen is used to map the locations with the location cluster, clearing network, and link Correspondent bank and outside network bank for clearing tie-up. Newly created location code takes effect once authorized and cannot be modified thereafter.

Navigation Path: Collections > Maintenance > Location > Create Location

3.9.1.1 Location Details

Create Location					i Errors & Overrides	$_{\mu}^{\mu}$ \times
	Location Details		Correspondent Banks		Outside Network Banks	
Location Code *		Location Description *	Location Cluster		High Value Cutoff Amount	
UK	Q	United Kingdom	LC01	Q	USD 🔻 \$100,000.00	
Clearing Network *						
MICR ×						
					Save	Cancel

1. Refer to the following table for specifying details on the above screen:

Note: Fields marked with '*' are mandatory.

Field Name	Description			
Location Code *	Click the Search icon to select the location code.			
Location Description *	Description of the selected location is displayed.			
Location Cluster	Click the Search icon to select the location cluster to be mapped with location.			
High Value Cutoff Amount	Select the currency and then enter an amount to specify the maximum limit of instrument that can be processed from the selected location.			
Clearing Network *	Select any of the following clearing network in which the location participate for cheque clearing:			
	MICR – Magnetic Ink Character Recognition			
	NON MICR – NON Magnetic Ink Character Recognition			
	ICCS – Image Cheque Clearing System			
	HOME – Home Network			

2. Click **Save** to save the data to be sent for authorization.

3.9.1.2 Correspondent Banks

Location where bank does not have any branch, however intend to offer CMS services by having an arrangement with other bank are maintained under 'Correspondent Banks' tab.

In the location maintenance, user can map the Correspondent bank and its controlling branch with priority.

eate Location						i Errors &	Overrides 🕺
	Location Details		Corre	espondent Banks		Outside Network Banks	
ink *		Priority *		Controlling Branch *			
	٩		~ ^		۹	Add/Edit Reset	
Bank	Priority		Controlling Br	ranch		Action	
M BANK	1		LM BRANCH			1	

Note: Fields marked with '*' are mandatory and with '**' are conditionally mandatory.

Field Name	Description
Bank *	Click the Search icon to select the correspondent bank code to map with the location.
Priority **	Specify the priority for the correspondent bank for cheque collection and clearing at the mapped location.
	Two or more correspondent bank linked with the same location cannot have same priority.
Controlling Branch *	Click the Search icon and select a controlling branch of the correspondent bank for processing of the cheque.

Note: To modify records in the grid, click the Kabab icon ([‡]) under the 'Action' column and then click **Edit**.

- 3. Click **Add/Edit** to add more records in the grid or modify the selected records. If required, click **Reset** to clear the selected values.
- 4. Click **Save** to save the record and send for authorization.

3.9.1.3 Outside Network Banks

System bank can have tie-up with few bank for outside network cheque clearance for the location where system bank neither have any branch nor have an arrangement or tieup with the correspondent bank.

In location maintenance, you can map the outside network bank and its controlling branch with proirity.

Create Location						i Errors & Overrides	$_{\mu^{k}}$ \times

3.11 Maintaining PDC Vault Box

As part of the collection services; when the corporates sometimes handover the postdated instruments to the bank. It is bank's need to safely keep the instruments in a secured vault box till the instrument is due for presentation, clearing, withdrawal etc. This screen allows you to create/maintain vault boxes that can be used for storing the PDC instruments. User can also parameterize options, maximum number of instruments to be allocated to a vault box, etc.

3.11.1Create Vault Maintenance

This screen is used to create vault box for warehousing the PDC instrument on the basis of the Presentation Month, Presentation From and To days.

Navigation Path: Collections > Maintenance > PDC Vault Maintenance > Create Vault Maintenance

OBCM 14.5.4.0.0 | Collections User Guide

Create Vault Maintenance							i Errors & Overrides	$_{\mu ^{n^{\prime }}}\times$
Vault Box Number *		Vault Box Description *		Vault Branch *		Vault Location		
VB78356		For Cust 78356		005-Sana Antonio Branch	×	Houston		
Vault Activation Date *		Vault Expiry Date *		Number Of Instrument *		Presentation Month		
Dec 30, 2019	 	Dec 30, 2024	±	10	~ ^	Select		
Presentation From Day *		Presentation To Day *						
4 ~	^	6	~ ^					
							Save	Cancel

1. Refer to the following table for specifying details on the above screen:

Field Name	Description
Vault Box Number *	Enter the unique vault box number.
	This field represents a unique number allocated to each vault box that will be used for warehousing the PDC Instruments.
Vault Box Description *	Enter the description for the vault box.
Vault Branch *	Select the branch where the vault box is located. By default, branch of the logged-in user is selected.
Vault Location	The location of the vault box is auto-populated based on selected branch.
Vault Activation Date *	Click the Calendar icon to select the date from which the vault will be operational.
Vault Expiry Date *	Click the Calendar icon to select the date after which the vault will not be operational. Leaving this field blank keeps the vault operational till the time it is manually deactivated.
	The expiry date should be equal to or greater than the activation date
Number Of Instrument *	Enter the maximum number of instruments that can be stored in the vault.
Presentation Month	Select the month for which the PDC instrument is due for presentation.
Presentation From Day *	Instruments are store in order of their presentation date. Enter the number to specify the first presentation date for the vault. The specified number should be between first and last date of the respective month.

Note: Fields marked with '*' are mandatory.

Field Name	Description
	Presentation on From Days cannot be greater than Presentation on To Date
Presentation To Day *	Instruments are store in order of their presentation date. Enter the number to specify the last presentation date for the vault. Formula: First Presentation Date =< Presentation To Day <= last date of the respective month. Presentation on To Days cannot be less than Presentation on From Date

2. Click **Save** to save the record and send for authorization.

3.11.2View Vault Maintenance

4.2 Deposit Slip Details

This screen helps you to input the information related to the deposit slip. When the record is sent for authorization, data in field such as 'Deposit Slip Amount' will be validated with 'Batch Amount' (if captured). 'No. of Instruments' and 'Deposit Slip Amount' is also checked before submission for authorization.

You can input default details such as 'Corporate', 'Credit Account Number', and 'Division' which can be applied to all instruments for the said deposit slip.

3. Refer to the following table for specifying details in the 'Deposit Slip Details' section of the above screen:

Note:

- Fields marked with '*' are mandatory and '**' are conditionally mandatory.
- Double clicking on the deposit in the left pane auto-populated associated instrument details.

Field Name	Description
External Reference Number	Click the Search icon and select the reference number generated by an external application. All the deposit slip request for instrument collection of the selected external reference number are listed in the left pane. OR Click the search icon and select the deposit slips associated with the external reference number.

Field Name	Description
	Double click on the deposit slip displayed in this pane to auto- populate the data.
Deposit Slip Number *	Enter new deposit slip number or click the Search icon to select an existing deposit slip number. The search result fetches the available and saved deposit slip(s) entered for the batch. This field cannot be modified once authorized.
Corporate *	Click the Search icon to select the corporate for whom the instrument collection entry is being made. This field cannot be modified once authorized.
Credit Account No.	Click the search icon to select the real/virtual credit account number where the fund should be credited at deposit slip level. This field cannot be modified once authorized.
Deposit Slip Date *	Click the Calendar icon to select the date mentioned on deposit slip. This field cannot be modified once authorized.
Pickup Location *	Click the Search icon to select the location from where the deposit slip was collected by the courier agency or the branch location where the instrument is deposited by the corporate. This field cannot be modified once authorized.
Pickup Point *	Click the Search icon to select an exact pick-up point of the Corporate from where the deposit slip along with the physical instrument is being picked up by the courier agency. This field cannot be modified once authorized.
Pickup Date *	Click the Calendar icon to select the date on which the deposit slip or instrument was collected. This field cannot be modified once authorized.
No. of Instruments *	Enter the total number of instruments collected with deposit slip. This field cannot be modified once authorized.
Deposit Slip Amount	Enter total amount of all the instruments attached to the deposit slip. The currency value is auto-populated as selected in the Basic Info tab.
Division Code **	Click the Search icon to select the division code in case if the 'Division Code' is mandatory in Corporate Enrichment screen else leave blank. The selected division code can be used for MIS purpose or for pooling of funds to the specific Division code. This field cannot be modified once authorized.
Deposit Slip Count	Displays the total number of deposit slips added.
Total Deposit Value	Displays the sum amount of all the deposit slips.
Pooling Account Details	Click this link to view the pooling account details maintained for the corporate.
User Defined Fields section	Click the Add icon (🛨) to add user defined fields.

Field Name	Description
	Note: If the instrument collections record creation request has come from an external channel, and if there is pre- defined data in these user defined fields, then this data is retained only if the Product Type value is 'All' for Paper- Based product category. If the Product Type is any other value, then the user defined data fields are reset to blank. The data will then need to be manually added.
Miscellaneous Fields section	In the 'No. Of Miscellaneous Fields', enter the number to specify how many fields are required. In the each miscellaneous field box, enter name of the field.

4. Expand the 'Instrument Details' section of the above screen, click the Add icon (**±**) to open the 'Instrument Details' pop-up for adding the instrument details manually:

5. Specify the following details on the 'Instrument Details' pop-up window:

Note: Fields marked with '*' are mandatory and '**' are conditionally mandatory.					
Field Name	Description				
Cheque Date *	Click 'Current' or 'Post Dated' to specify the date of the cheque.				

Field Name	Description
Instrument Number *	Enter the instrument reference number. For example: Cheque number. This field cannot be modified once authorized.
Instrument Date *	Click the Calendar icon to select the date mentioned on instrument. This field cannot be modified once authorized.
Instrument Type *	Select the type of Instrument added in the deposit slip. This field cannot be modified once authorized.
Instrument Amount *	Enter the amount mentioned on the instrument. Currency is defaulted to the one from Basic Info screen. This field cannot be modified once authorized.
Routing Number *	Click the Search icon to select the Routing number. Selecting this field auto-populates value for 'Drawee Bank' and 'Drawee Branch'. This field cannot be modified once authorized.
Drawn On Bank Name *	The name of bank on which instrument is drawn. This field cannot be modified once authorized.
Drawn On Branch Name *	The branch name of the selected bank. This field cannot be modified once authorized.
Clearing Location *	Displays the clearing location maintained in the system based on selected drawee bank. This field cannot be modified once authorized.
Location Cluster *	Displays the location cluster associated with the clearing location. This field cannot be modified once authorized.
Drawer **	 This field is mandatory if the 'Drawer Mandatory at Txn' is enabled on Corporate Enrichment screen. Enter the drawer name or click the Search icon to select the same. This field cannot be modified once authorized.
Drawer A/C No. *	Enter the bank account number of the drawer. This field cannot be modified once authorized.
Drawer A/C Name *	Enter the drawer account's name. This field cannot be modified once authorized.
Clearing Network *	Click the Search icon to select the network to be considered for clearing the instrument. This field cannot be modified once authorized.
Product *	Displays the applicable product based on selected instrument type, deposit location, payable at location, drawee bank, etc. If required, select the product of your choice. This field cannot be modified once authorized.
Arrangement Days	Displays the number of days based on selected product and corporate.

Field Name	Description
Vault Box Number *	This field is displayed only for 'Post Dated' cheque. This vault box number associated with the branch for the selected instrument date is auto-populated.
	In case of multiple vault boxes maintained with same presentation date, click the Search icon to select the appropriate vault box number.
Vault Box Description	This field is displayed only for 'Post Dated' cheque.
	The description of the selected vault box number is auto-populated.
Vault Branch	This field is displayed only for 'Post Dated' cheque.
	The branch of the selected vault box number is auto-populated.
Presentation Date	This field is displayed only for 'Post Dated' cheque.
	The presentation date is auto-calculated based on the instrument date and the system parameter set for the activation date.
Credit Account No.	If required, select the real/virtual account number in which amount should be credited else will be credited to the bank account number selected in the deposit slip details or to the default bank account.
Division Code	Click the Search icon to select the division code in case if the 'Division Code' is mandatory in Corporate Enrichment screen else leave blank.
	Selected division code can be used for MIS purpose or for pooling of funds to the specific division code.
	If the division code is available, the funds will be pooled and credited to the specific account mentioned for the division code else to the credit account number specified or default account.
	This field cannot be modified once authorized.
User Defined Fields section	Click the Add icon to add user defined fields.
Miscellaneous Fields section	In the 'No. Of Miscellaneous Fields', enter the number to specify how many fields are required.
	In the each miscellaneous field box, enter name of the field.

6. Click **Add** to add the instrument details. To add more instrument details, repeat the previous step.

- 9. Perform any of the following actions as per your requirement:
 - Click **Submit** to submit the record for authorization.
 - Click **Back** to move back to the **Deposit Slip Details** screen.
 - Click **Save & Close** to save populated data and close the window.
 - Click **Cancel** to discard the deposit slip creation and close the window.

5. Managing Cash Transactions

The **Cash Transaction** menu helps you to enter the data about the cash deposited/withdrawn by the corporate/customer. It has two separate sub-menus for entering data of cash deposit and cash withdrawal.

5.1 Deposit Entry

There are two channels through which the cash is being deposited by the Corporate ie; Branch or Courier.

- Branch: Cash is deposited directly at the branch by the Corporate/Customer.
- Courier: Corporate avails a doorstep banking service in which the courier person picks up the cash and deposits at the branch.

Navigation Path: Collections > Cash Transaction > Deposit Entry

5.1.1 Basic Info

This screen helps you to input batch related information i.e. whether it is single deposit entry or multiple deposit entry (from multiple deposit slips), channel of receipt etc. The branch is defaulted as per login Id and can be changed to another branch based on access right.

1. Refer to the following table for specifying details on the above screen:

Note: Fields marked with '*' are mandatory and '**' are conditionally mandatory.

Field Name	Description
Reference Number *	Click 'Create' to auto-generate the reference number or click 'Draft' to select the existing reference number.

Field Name	Description
Reference Number **	Click the Search icon to select an existing reference number. This field is displayed only when 'Existing' toggle is selected.
Branch *	Select the bank branch where the cash is deposited. This field displays values based on your access rights.
	This field cannot be modified once authorized.
Deposit Channel *	Select the deposit channel i.e.; 'Courier' or 'Branch', this indicates whether the cash is picked up by a courier agency or the corporate/customer has deposited the cash in branch. Field relevant to the selected channel are displayed.
	This field cannot be modified once authorized.
Financial Posting	Switch the toggle ON if accounting entries needs to be posted.
Processing Date *	By default, it is current branch date and cannot be beyond the same.
	You can manually select the processing date only if 'Financial Posting' toggle is switched OFF. Click the Calendar icon to select the date on which the cash is deposited.
	This field cannot be modified once authorized.
Deposit Location *	This field is auto populated based on the selected branch.
Acknowledgment Receipt Number	Enter the acknowledgment number, if any.
Bag Weight (in kg)	Enter weight of the package in kilograms when it was received.
Initiator Reference Number	Enter the reference number assigned for receiving the package, if any.
Deposit Slips	Enter the total number of deposit slips to be processed. This field displayed only when 'Deposit Channel' is selected as' Branch'.
Depositor Name **	Enter name of the person who deposits the cash. This field is mandatory and appears only when 'Deposit Channel' is selected as' Branch'.
ID Proof Type **	Select the type of ID proof displayed/submitted by the depositor. This field is mandatory and appears only when 'Deposit Channel' is selected as' Branch'.
ID Proof Detail **	Enter the ID proof details of the depositor. This field is mandatory and appears only when 'Deposit Channel' is selected as' Branch'.
Contact Number	Enter the contact number of the depositor. This field displayed only when 'Deposit Channel' is selected as' Branch'.
Courier **	Click the Search icon to select the courier company. This field will be mandatory and appears only when 'Deposit Channel' is selected as 'Courier'.

Field Name	Description
Consignment Number	Enter the consignment number allocated by the courier company. This field appears only when 'Deposit Channel' is selected as 'Courier'. This field cannot be modified once authorized.
Consignment Date	Click the Calendar icon to select the date on which consignment
	is received. This field appears only when 'Deposit Channel' is selected as 'Courier'.
	This field cannot be modified once authorized.

- 2. Optional: Click **Save & Close** to save the data and close the window. Click **Cancel** to close the window without saving the data.
- 3. Click Next to save the data and move to the Deposit Slip Details screen.

5.1.2 Deposit Slip Details

This screen helps you to input the information related to the deposit slip. When the record is sent for authorization, data in field such as 'Denomination detail', 'Deposit Slip Amount' will be validated with 'Batch Amount' (if captured). Additionally, you can select the external reference number to enrich the data received through external channel and send for processing.

You can input default details such as 'Corporate', 'Credit Account Number', 'Division', 'Total Denomination Count', and 'Slip Amount' which can be applied to the deposit slips.

5.2 Withdrawal Entry

This screen is a data entry screen for the user to capture cash withdrawal details. User can either manually enter the data of withdrawal entry or can fetch the data by selecting the external reference number which auto-populates the data on the screen. There can be two cash recipients for the cash withdrawal entry as 'Corporate' and 'Courier'.

- Corporate: On the Withdrawal date, the cash is directly collected by the corporate, the bank user will capture the cash withdrawal request.
- Courier: On withdrawal date, the courier agency having tie-up for cash delivery collects the cash from the branch and delivers to the Corporate Delivery point specified in the withdrawal request.

Navigation Path: Collections > Cash Transaction > Withdrawal Entry

3. In the 'Denomination Details' section, click the Add icon (¹⁾) to add a row of denomination and specify the following details:

OR

Copyright @ 2022 All Rights Reserved

In the 'Action' column of the grid, click the edit icon (\square) edit the denomination record or click the delete icon (\square) to remove denomination record.

- a. In the **Denomination Type** list, select the denomination type as 'Note' or 'Coin'.
- b. In the **Denomination Value** field, enter total value of the selected denomination.
- c. In the Count field, enter the number of denomination count
- d. The **Denomination Amount** is auto-calculated based on the specified value multiplied with the count.
- 4. In the 'Miscellaneous Details' section, perform the following steps:
 - a. In the **No. of Miscellaneous Fields** box, enter the number to specify how many fields are required.
 - b. In the each Miscellaneous Field box, enter name of the field.
- 5. Click **Save** to save the record and send for authorization. The request to block/lien the withdrawal amount is sent to the core system.

6. Managing Instruments

Instrument Management allows you to manage cheques received for collection basis the action to be performed on the instruments. You can search for the cheques by using several search criteria. Processing date is defaulted to the current business date. You can also take an action on multiple records at once.

Navigation Path: Collections > Instrument Management

Instrument Management							, ¹²
Instrument Details							
Branch *	anch * Cheque Date			Action *		Processing Date *	
004-LM BRANCH	*	Current	Post Dated	Select	-	Dec 19, 2019	Proceed

You can manage both current as well as post-dated cheques in order to take various actions on them.

6.1 Manage Current Dated Cheques

On the 'Instrument Management' screen, perform the following actions:

- 1. In the **Branch** list, select the branch for which the cheque is to be managed. By default, branch of the logged-in user is selected.
- 2. In the Cheque Date toggle, select the 'Current'.
- 3. In the **Action** list, select any one of the following:
 - o Credit advancement/postponement
 - o Generate schedule
 - o Mark schedule receipt
 - o Mark return receipt
 - o Mark instrument status
- 4. Click **Proceed** to view the search parameters.

6.1.1 Credit Advancement/Postponement

This action of instrument management can be used in case the customer requests for an early credit or to postpone the credit of the instrument. The advancement can be used to prepone the instrument credit date and postponement can be used to postpone the instrument credit date. Only those instrument which are due for arrangement credit for Guaranteed Arrangement Corporate will be displayed in search result.

Perform the following steps to apply credit advancement/postponement on instruments:

- 1. On clicking the **Proceed**, relevant cheque records are fetched under 'List of Instruments' section.
- 2. Optional: Click the Filter icon (\mathbf{T}) to filter the list of instruments.

Arrangement Credit Date *		Currency *		Product Type		Product	
Jan 10, 2020	**	GBP	Ŧ	Select	-	Select	*

9. Click **Submit** to confirm the records of credit advancement/postponement and send for authorization.

6.1.2 Generate Schedule

Bank user need to generate a forwarding schedule in case where clearing is to be routed through partner banks or for upcountry clearing a schedule is to be generated for the instruments. A forwarding schedule is essentially a covering letter, which comprises the details of the instruments dispatched to the concerned bank's branch for clearing. This covering letter is sent along with the physical instruments.

Perform the following steps to generate schedule for instruments:

1. On clicking the **Proceed**, the 'Filter Parameters' section is displayed.

Filter Parameters

- 5. If required, click **Undo** to revert back the applied changes.
- 6. Select the updated records from the grid and then click **Submit** to send for authorization.

6.2.6 Mark Replacement & Withdrawal

This action can be used in below two scenarios:

- **Replacement:** When the buyer wants to provide fresh instruments in order to avoid the deteriorating physical condition of the provided cheques, which might have gone through wear and tear.
- Withdrawal: In case the buyer has provided PDCs for periodic payment of a loan and repays the entire loan amount before tenure ends. Hence, the PDCs of remaining tenure are required to be withdrawn from the system.

Only PDC instruments that are due for activation and not activated for presentation will reflect in the Mark Replacement screen

Perform the following steps to mark the instrument for replacement & withdrawal:

- 1. In the search result, select the instruments to be marked. On selecting the records the 'Total Instrument Amount' and 'Total Instrument Count' will be displayed in the summary box.
- 2. Optional: In the Instrument Number column, click the number to view more details about it.

7. Managing Files

The **File Management** functionality helps you to upload files in a pre-defined format. These files are auto-processed by the system based on its type and set rules. The process is mainly divided into two screens, i.e. 'File Upload' to feed the data into the system and 'View File Upload Status' to manage the uploaded files.

7.1 Upload Files

This screen is used to upload files for auto-processing the instrument collection data into system. The uploaded files are not processed until it is approved. The file can contain data records of cheque details such as instrument number, deposit slip number, amounts etc. The file format accepted by the system includes ".csv" files.

Supported files and fields:

Instrument Collection file

9. Batch Jobs

There are several activities required to be performed on a daily basis in the system. These activities are run by the system as a batch jobs at the beginning and/or end of the day. This chapter includes the events that are part of Beginning of Day (BOD) and End of Day (EOD) batch jobs run by the system on daily basis.

9.1 EOD Batch

Refer to the section 3.5 of the Oracle Banking Common Core User Guide to Configure, Invoke, and View the EOD batch jobs.

Sr. No.	Event Name	Description
1	Unhold Post Dated Cheque	This event updates the status of post-dated cheque as Unhold that are currently in Hold status.
2	Post Dated Cheque Cancellation	This event updates the status of post-dated cheque as Cancelled.
3	Arrangement Cdt	This event processes the arrangements as per configuration set in the system.
4	Auto Debit Instrument	This event processes auto debits for instrument as per configurations set in the system.
5	Cash Pooling	This event processes the cash flow pooling accounts as per configuration set in the system.
6	Credit Reversal	This event processes credit reversals.
7	Return Recovery	This event updates the status of return recovery processed for the instruments.
8	Vault Master Record Status	This event updates the statuses in the vault master.
9	Pooling	This event processes the pooling job for instrument collections.
10	Realization	This event processes the realization job for instrument collections.
11	Withdrawal Cancel Eca	This event cancels the ECA block amount request for which no action is taken or withdrawal date is surpassed.
12	OBCM Clearing Request	This event triggers OBCM outward clearing request job to send outward clearing request to OBPM.

Note: Events marked with * are always executed.

Sr. No.	Event Name	Description
13	Cheque Charges	This event triggers the charge application job for instrument collections.
14	Cash Charges	This event triggers the charge application job for cash deposits.
