1. About this Manual

1.1 Introduction

This manual is designed to help you to quickly get familiar with the Oracle Banking Payments. It takes you through the various stages of Instruments, Instrument Clearing and Positive Pay processing.

You can further obtain information specific to a particular field by placing the cursor on the relevant field and striking <F1> on the keyboard.

1.2 Audience

This manual is intended for the following User/User Roles:

Role	Function
Front Office Operators	DD/Manager's Check issue and payment transactions except authorization
Back Office Operators	Instrument related maintenances/Instrument Transaction Input functions except Authorization
Instrument Department Officers	Instrument Maintenance/ Transaction Authorization

1.3 Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc>.

1.4 Organization

This manual is organized into the following chapters.:

Chapter	Description
Chapter 1	<i>About this Manual</i> gives information on the intended audience. It also lists the various chapters covered in this User Manual.
Chapter 2	<i>Instruments</i> provides information on Instruments.
Chapter 3	<i>Instrument Clearing</i> provides information on Instrument Clearing.
Chapter 4	<i>Positive Pay</i> provides information on Positive Pay.
Chapter 3	<i>Function ID Glossary</i> has alphabetical listing of Function/Screen ID's used in the module with page references for quick navigation.

1.5 Glossary of Icons

This User Manual may refer to all or some of the following icons:

Icons	Function
	Exit
	Add row
	Delete row
	Option List

2. Instruments

For customers requesting for issue of Demand Draft/ Manager's Cheque, Oracle Banking Payments has a provision to capture the details of the instrument to be issued and allocate a unique instrument number for the same.

When the instrument is presented for payment, the receiving bank presents the same in local clearing to the bank which issued the instrument. The payment of the instrument can also be effected by internal transfer the proceeds to Beneficiary's account held with the issuing bank itself.

2.1 Instrument Maintenances

Instrument related maintenances helps in defining various parameters as required by the bank, for processing Instrument issuance and payments.

This chapter contains the following section:

- [Section 2.1.1, "Instrument Code"](#)
- [Section 2.1.2, "Instrument Inventory"](#)
- [Section 2.1.3, "Instrument Preferences"](#)
- [Section 2.1.4, "Foreign Currency Instrument Issuer"](#)

2.1.1 Instrument Code

You can define the instrument codes through this screen.

You can invoke 'Instrument Code Detailed' screen by typing 'PGDINSCD' in the field at the top right corner of the Application tool bar and clicking on the adjoining arrow button.

Instrument Code Detailed

New Enter Query

Host Code *
Instrument Code *
Code Description
Instrument type Demand Draft
Instrument Currency
Instrument Validation Internal
Issuer Code

Stale Period
Months
Days

Revalidation Details
Revalidation Allowed Yes
Revalidation Period in Months
Revalidation Period in Days

Maker Date Time: Mod No Record Status
Checker Date Time: Authorization Status

Exit

You can specify the following fields:

Host Code

The system indicates the Host Code of transaction branch on clicking 'New'.

Instrument Code

Specify the Instrument Code.

Code Description

Specify the description of the Instrument Code.

Instrument Type

Select the type of Instrument Type from below values:

- Cheque
- Demand Draft
- Managers Cheque
- Demand Draft-FCY
- Remittance-Outward
- Remittance-Inward
- Traveller's Cheque

Instrument Currency

All valid currencies are listed. Choose the relevant instrument currency for the code maintained.

Instrument Validation

Select the option from values listed - Internal/External. Instrument Validations can be done both internally and externally.

- Internal - Inventory Validation within the system is done on selecting Internal.
- External - All the validations for the instruments are done by the external system.

Issuer Code

Specify the Issuer Code from the list of values. This field is disabled for instrument types 'Demand Draft-FCY' and 'Cheque'.

For other Instrument types, this field is mandatory and system validate the same on save.

Stale Period

This the period till when the instruments code is valid from the day it is created.

Month

Specify the period in number of months.

Days

Specify the period in number of days.

Note

- You are allowed to maintain the stale period either in months or in days not as a combination of months and days.
 - Stale period specified here is validated when the instrument transaction is booked. System validates the instrument date and the date, the transaction is booked. If it is more than the period defined, error message is displayed.
-

Revalidation Details

Revalidation Allowed

Select the Revalidation Allowed between Yes or No.

Revalidation Period in Months

Specify the Revalidation Period in Months.

Revalidation Period in Days

Specify the Revalidation Period in Days.

2.1.1.1 Instrument Code Summary

You can search for records in the Instrument Code Summary Screen. You can invoke 'Instrument Code Summary' screen by typing 'PGSINSCD' in the field at the top right corner of the Application tool bar and clicking on the adjoining arrow button.

The screenshot shows the 'Instrument Code Summary' application window. It includes a search bar with options for 'Search', 'Advanced Search', 'Reset', and 'Clear All'. Below the search bar, there are several filter fields: 'Case Sensitive', 'Authorization Status', 'Host Code', 'Instrument type', 'Instrument Validation', 'Record Status', 'Instrument Code', and 'Instrument Currency'. A table below these fields shows columns for 'Authorization Status', 'Record Status', 'Host Code', 'Instrument Code', 'Code Description', 'Instrument type', 'Months', 'Days', 'Instrument Currency', and 'Instrument Validation'. The table is currently empty. At the bottom right, there is an 'Exit' button.

You can search using one or more of the following parameters:

- Authorization Status
- Host Code
- Instrument Type
- Instrument Validation
- Record Status
- Instrument Code
- Instrument Currency

Once you have specified the search parameters, click 'Search' button. The system displays the records that match the search criteria.

Double click a record or select a record and click on 'Details' button to view the detailed maintenance screen.

2.1.2 Instrument Inventory

You can maintain valid range of numbers per Instrument Type. This maintenance is branch-wise.

You can invoke 'Instrument Inventory Maintenance' screen by typing 'PIDINSNO' in the field at the top right corner of the Application tool bar and clicking on the adjoining arrow button.

The screenshot shows the 'Instrument Inventory Detailed' application window. The window title is 'Instrument Inventory Detailed'. The interface includes a 'New' button and an 'Enter Query' field at the top left. The main area contains several input fields: 'Host Code *', 'Instrument Code *', 'Instrument Branch * HEL', 'Issue Date * YYYY-MM-DD', 'Start Number *', and 'End Number *'. On the right side, there are 'Code Description', 'Instrument type' (a dropdown menu), and 'Sequence Number' fields. At the bottom, there are labels for 'Maker', 'Checker', 'Date Time', 'Mod No', 'Record Status', 'Authorization Status', and an 'Exit' button.

You can specify the following fields:

Host Code

The system indicates the Host Code of transaction branch on clicking 'New'.

Instrument Code

All valid Instrument codes of instrument type 'Demand Draft' and 'Manager's Cheque' are listed. Select the appropriate code.

Instrument Branch

User's logged in branch is displayed in this field.

Issue Date

System defaults the current date in this field on clicking 'New' button.

Start Number

Specify the Starting Number of the range of inventory numbers to be maintained.

End Number

Specify the End Number of the range of inventory numbers to be maintained

Code Description

System defaults the Code Description of the Instrument Code selected.

Instrument type

System defaults the Instrument Type based on the Instrument Code selected.

Sequence Number

System generates the Sequence Number automatically. It is generated based on the number of times the same Instrument Code is created. When same instrument code is created multiple times, the Sequence number for that code gets incremented.

Note

While allocating inventory number for a processing completed inventory issue transaction, FIFO rule will be followed.

2.1.2.1 Instrument Inventory Summary

You can search for instrument inventory records in this screen. You can invoke 'Instrument Inventory Summary' screen by typing 'PISINSNO' in the field at the top right corner of the Application tool bar and clicking on the adjoining arrow button.

The screenshot shows the 'Instrument Inventory Maintenance Summary' application window. At the top, there are search options: 'Search', 'Advanced Search', 'Reset', and 'Clear All'. Below this is a 'Case Sensitive' checkbox and two dropdown menus for 'Authorization Status' and 'Record Status'. A navigation bar indicates 'Records per page' is 15, '1 Of 1' records are shown, and there is a 'Go' button and 'Lock Columns' set to 0. The main area contains a table with the following columns: Authorization Status, Record Status, Host Code, Instrument type, Instrument Branch, Code Description, Instrument Code, and Start Number. The table is currently empty. An 'Exit' button is located in the bottom right corner.

You can search using one or more of the following parameters:

- Authorization Status
- Instrument Type
- Instrument Code
- End Number
- Record Status
- Instrument Branch
- Start Number

Once you have specified the search parameters, click 'Search' button. The system displays the records that match the search criteria.

Double click a record or select a record and click on 'Details' button to view the detailed maintenance screen.

2.1.3 Instrument Preferences

This maintenance is provided for maintaining preferences for an instrument code. This maintenance is applicable to Instruments of type Demand Draft and Manager's cheque only.

You can invoke 'Instrument Preferences Detailed' screen by typing 'PIDINPRF' in the field at the top right corner of the Application tool bar and clicking on the adjoining arrow button.

You can specify the following fields:

Host Code

The system indicates the Host Code of transaction branch on clicking 'New'.

Instrument Code

All valid Instrument codes of instrument type 'Demand Draft' and 'Manager's Cheque' are listed. Choose the appropriate code from the LOV.

Code Description

System defaults the Description of the Code based on the Instrument Code selected.

Instrument Currency

System defaults the Instrument Currency based on the Instrument Code selected.

Instrument type

The system Instrument Type based on the Instrument Code selected.

Instrument Preferences

Instrument Payable GL/Account

This field lists all the valid GL's and Nostro accounts.

Payable GL is fetched as credit account during Instrument issue and Debit account during Instrument liquidation through any payment mode clearing, transfer or cancellation. All valid liability type GLs are listed for this field.

Nostro accounts which are linked to a correspondent BIC in, Currency correspondent maintenance for the Instrument currency will be allowed for the screen if the instrument type is Demand Draft –FCY.

Authorization rekey Required

Check this box to enable authorization in the transaction screens for the fields specified in Authorization Rekey fields. System validates the authorization fields in instrument screens based on this.

Drawee BIC

System defaults the Drawee BIC based on the Nostro account selected in Instrument Payable GL/Account. This field will be null and disabled, when a GL is selected.

Instrument Number Generation

Select the Instrument Number Generation between Auto or Manual.

Instrument Number Length

If the Instrument Number Generation is maintained as 'Manual' you can specify the Instrument Number Length.

Price Code

Instrument Issue

Specify the price code for Instrument Issue.

Instrument Stop Pay

Specify the price code for Instrument Stop Pay.

Instrument Cancel

Specify the price code for Instrument Cancel.

Instrument Revalidation

Specify the Instrument Revalidation from the list of values. All valid price code are listed. This field can be maintained if revalidation is allowed for the instrument.

Duplicate Instrument issue

Specify the Duplicate Instrument issue from the list of values.

Accounting Codes for Instrument Issues

Debit Liquidation

Accounting template codes are maintained for instrument issue. Specify the accounting code for DRLQ event.

Credit Liquidation

Specify the accounting code for CRLQ event.

Accounting Codes for Instrument Payment

Debit Liquidation

Accounting template codes are maintained for instrument payment. Specify the accounting code for DRLQ event.

Credit Liquidation

Specify the accounting code for CRLQ event.

Accounting codes maintained in this careen are applicable to payments initiated from Instrument Issue / payment screens. For instruments received for payment in clearing accounting code applicable for clearing is used.

Foreign Currency Instrument Preferences

Generate MT 110

Check this box for foreign currency drafts. User can issue Foreign currency drafts, only if this option is enabled.

FX Preferences

FX Rate Type

Select the FX Rate Type from the list of values. All valid rate type is listed.

Rate Override Variance

Specify the override variance allowed for FX Rate.

Rate Stop Variance

Specify the stop variance allowed for FX rate.

Note

If exchange rate is manually provided from queue screens, override/stop variance check is done by the system.

Small FX Limit Currency

Select the FX Limit Currency from the list of values. Currency other than EUR also can be selected, for cross currency transactions.

Small FX Limit Amount

Specify the FX Limit Amount. Internal and external rates picked are based on the limit maintained here.

Note

- If Small FX limit is defined, then auto rate pick up happens only if the transfer amount is within the limit. The Transfer Amount is converted to Limit Currency maintained using midrate of FX rate type linked and limit check is done.
 - If Small FX limit is not maintained, then auto rate pick up is done from internal rates maintained, for all cross currency payment transactions without any limit check.
-

External Exchange Rate Applicable

Check this box to apply external exchange rate, when the transfer amount is more than the FX Limit specified. System validates the breach amount and checks for External Exchange rate.

Note

- If external system is available, then the transaction details are sent, to receive the exchange rate.
- Instrument transactions are moved to Exchange Rate exception queue if the response is rejected/timed out.
- Valid error message is displayed, when Small FX limit is breached and when there is no Exchange Rate system.

Authorization Rekey Fields

You can define the authorization rekey fields here, which is validated during the transaction authorization.

Rekey Field Name

Select the Rekey fields from the list of values. The field name values are factory-shipped. Following are the Rekey fields available for instrument:

- BENEf_NAME (Beneficiary Name)
- CR_AC_NO (Credit Account Number)
- DR_AC_NO (Debit Account Number)
- INSTRUMENT_AMOUNT (Instrument Amount)
- INSTRUMENT_CCY (Instrument Currency)
- PAYABLE_BRN_CODE (Payable Branch Code)

Description

System defaults the description of the Rekey Field name selected.

Transaction Type

Select the Transaction type from the options listed - Instrument Issue/ Instrument Payment.

2.1.3.1 Instrument Preference Summary

You can search for records in the Instrument Preference Summary Screen. You can invoke 'Instrument Preference Summary' screen by typing 'PISINPRF' in the field at the top right corner of the Application tool bar and clicking on the adjoining arrow button.

The screenshot shows a web-based application window titled "Instrument Preferences Summary". At the top, there are search options: "Search", "Advanced Search", "Reset", and "Clear All". Below this, there are two dropdown menus: "Authorization Status" and "Record Status". A search bar contains the text "Instrument Code". Below the search bar, there is a table with the following columns: "Authorization Status", "Record Status", "Instrument Code", "Code Description", "Instrument Payable GL/Account", "Instrument Issue", "Instrument Stop Pay", "Instrument Cancel", and "Debit Liquidation". The table is currently empty. At the bottom right of the window, there is an "Exit" button.

You can search using one or more of the following parameters:

- Authorization Status
- Record Status
- Instrument Code

Once you have specified the search parameters, click 'Search' button. The system displays the records that match the search criteria.

2.1.4 Foreign Currency Instrument Issuer

This maintenance is applicable when the bank is acting as a drawee bank for foreign currency demand drafts.

You can invoke 'Foreign Currency Instrument Issuer Details screen by typing 'PIDFCISR' in the field at the top right corner of the Application tool bar and clicking on the adjoining arrow button.

Foreign Currency Instrument Issuer Details

New Enter Query

Host Code *

Instrument Code *

Code Description

Instrument Currency

1 Of 1

Issuer BIC Code *	Issuer Bank Name	Direct Correspondent	Account Number	Correspondent Bank BIC	Correspondent Account
-------------------	------------------	----------------------	----------------	------------------------	-----------------------

Maker Date Time: Mod No Record Status

Checker Date Time: Authorization Status

Exit

Specify the following fields:

Host Code

Host Code for user's logged in branch is defaulted in this screen.

Instrument code

All valid instrument codes of type 'Demand Draft-FCY' are available in the list. Select the required instrument code.

Code Description

This is defaulted based on the instrument code selected.

Instrument currency

The value is defaulted based on the instrument code selected.

Issuer BIC

All valid BICs are available for this field. Select the required BIC.

Issuer Bank Name

This field is defaulted based on the issuer BIC selected.

Direct correspondent flag

Check this flag if there is a direct correspondent relation with the issuer bank.

Account Number

It is mandatory to maintain the account number if 'Direct Correspondent' flag is checked. All accounts of type OUR/THEIR maintained for the issuer BIC (11 digit BIC if not available 8 digit BIC+XXX) in currency correspondent maintenance for the issuer BIC are listed. 2-7.

Correspondent Bank BIC

It is mandatory to maintain Correspondent Bank BIC if 'Direct Correspondent' flag is not checked. All valid BICs that are available in currency correspondent maintenance are available for Correspondent Bank BIC field.

Correspondent Bank Account

All valid BICs that are available in currency correspondent maintenance are listed for Correspondent Bank BIC field. All accounts of type OUR/THEIR maintained for the correspondent bank BIC in currency correspondent maintenance are available in correspondent bank account field.

Correspondent Bank Name

This disabled field is auto-populated based on the correspondent BIC selected.

Mapping of MT 110 fields

The system does a straight through processing of the message and builds demand draft record with the message details upon receiving the MT 110.

Validations & upload of MT110

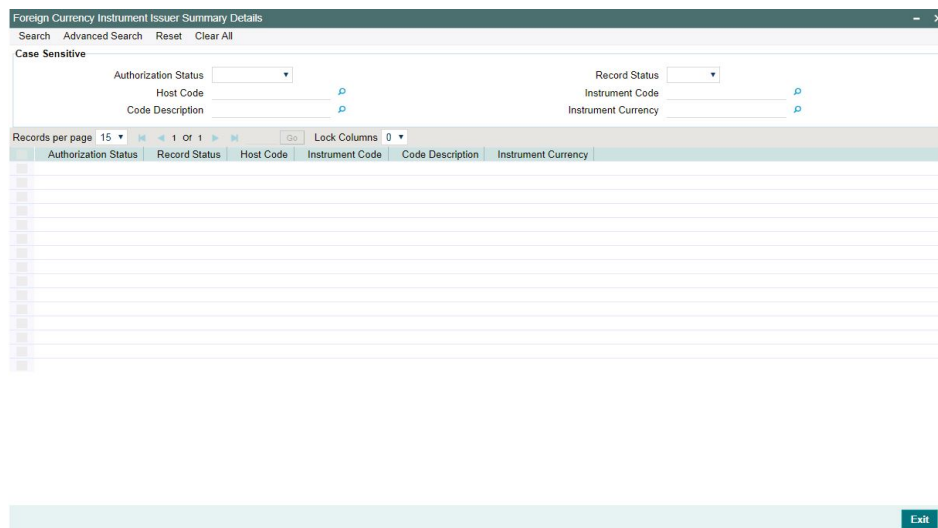

- The messages which were not uploaded because of DD issue transaction will be pending in Incoming Message Browser in repair status. It is possible to repair and to upload the message again.
- The message is marked as repair if field 54 is present.
- System does D2A conversion and bank re-direction for fields 53 & 52.
- Accounting entries are passed by debiting the Vostro/Nostro account of the correspondent bank (issuer bank itself or its correspondent bank, as the case may be and crediting the DD Payable GL.
- The message is marked as repair if the debit account could not be derived or if the incoming message has field 54 details.
- It is possible to initiate the foreign DD payment through the payment screen or through clearing.

Upload of MT 111

- MT111 is processed only if there is a foreign currency instrument in Active status with issuer BIC as drawer BIC (if available), else sender BIC. The instrument currency, amount & Payee in the message matches with issued instrument currency and amount.
- The incoming message is linked to the corresponding instrument issue transaction and stop pay of the instrument is processed. You can view the incoming message from the view message sub-screen of the Instrument view screen with message direction status as 'In'.
- The message upload fails and message remains in In-browser with the error code & details if the instrument number is not available. If the instrument is in liquidated, cancelled or payment stopped status, the system links the message to the transaction. However, if no straight through processing happen, message remains in the in browser with the related exception details. You must manually generate MT 112 response message in this case.
- The Sending Bank BIC field gets populated.
- The stop pay record is now available in unauthorized status with upload user as the maker. On authorization, record status is Payment stopped.

2.1.4.1 Foreign Currency Instrument Issuer Summary

You can search for records in the Foreign Currency Instrument Issuer Summary Details Screen. You can invoke the Foreign Currency Instrument Issuer Summary Details screen by typing 'PISFCISR' in the field at the top right corner of the Application tool bar and clicking on the adjoining arrow button.

You can search using one or more of the following parameters:

- Authorization Status
- Record Status
- Host Code
- Instrument Code
- Code Description
- Instrument Currency

Once you have specified the search parameters, click 'Search' button. The system displays the records that match the search criteria.

Double click a record or select a record and click on 'Details' button to view the detailed maintenance screen.

2.1.5 Instrument External Bank Code Maintenance

This maintenance is applicable for issue of Instruments of type 'Demand Draft', 'Banker's Cheque' and 'Remittance-Outward' and Remittance-Inward'. This maintenance allows the list other banks /branches on behalf of which these instruments are allowed to be issued/paid.

You can invoke 'Instrument External Bank Code Maintenance' screen by typing 'PIDEXTBK' in the field at the top right corner of the Application tool bar and clicking on the adjoining arrow button.

You can specify the following fields:

Host Code

The system indicates the Host Code of transaction branch on clicking 'New'.

Instrument Code

Specify the Instrument Code from the list of values. All valid Instrument Codes maintained with Instrument type as 'Demand Draft', 'Banker's Cheque' and 'Remittance-Outward' and 'Remittance-Inward' are listed.

External Bank Code

For instrument codes of Instrument type 'Demand Draft', 'Banker's cheque' and 'Remittance Inward' this field is defaulted as the issuer code linked to the instrument code and disabled.

For Instrument codes of type 'Remittance-outward' all valid Bank codes maintained in PMDBNKCD are listed.

Bank Name

System defaults the Bank Name based on the Bank Code selected.

Instrument type

System defaults the Instrument Type based on the Instrument Code selected.

Instrument Description

System defaults the Instrument Description based on the Instrument Code selected.

Instrument Currency

System defaults the Instrument Currency based on the Instrument Code selected.

Payable Account or GL

Specify the Payable Account or GL from the list of values. Lists all external GLs of type 'Liability' /'Asset' available in External Chart of Accounts and all valid accounts (Normal/ Nostro) with account currency as Instrument currency. System uses this GL/Account in accounting based on this maintenance.

Account Branch

This field is defaulted and disabled as the Account Branch of the selected account. If GL is selected, this field is enabled and lists all valid branch codes of the Host. It is optional to select a branch. If a Branch is selected, this branch is defaulted as the account branch irrespective of the Transaction Branch. If this branch is not selected then transaction branch is defaulted as Account Branch for the GL during accounting.

Branch Code

System defaults the Branch Code of the Account Branch selected.

Branch Name

System defaults the Branch Name of the Account Branch selected.

Limit Amount

Specify the Limit Amount in instrument currency upto which the instrument can be issued.

2.1.5.1 Instrument External Bank Code Summary

You can invoke 'Instrument External Bank Code Summary' screen by typing 'PISEXTBK' in the field at the top right corner of the Application tool bar and clicking on the adjoining arrow button.

Authorization Status	Record Status	External Bank Code	Host Code	Instrument Code	Instrument type	Instrument Currency	Payable Account or GL
----------------------	---------------	--------------------	-----------	-----------------	-----------------	---------------------	-----------------------

You can search using one or more of the following parameters:

- Authorization Status
- External Bank Code
- Instrument Code
- Record Status
- Host Code

Once you have specified the search parameters, click 'Search' button. The system displays the records that match the search criteria.

Double click a record or select a record and click on 'Details' button to view the detailed maintenance screen.

2.1.6 Denomination Code for Traveller's Cheques

You can maintain the denomination code of TCs through this screen.

You can invoke 'Instrument Code Detailed' screen by typing 'PIDDENOM' in the field at the top right corner of the Application tool bar and clicking on the adjoining arrow button.

The screenshot shows a web application window titled "Denomination Code for Traveller's Cheques". The interface includes a top navigation bar with "New" and "Enter Query" options. Below this, there are several input fields: "Host Code *", "Instrument Code *", and "Code Description". To the right of these fields are three dropdown menus labeled "Instrument type", "Instrument Currency", and "Issuer Code". A section titled "Denomination Details" contains a table with three columns: "Denomination Code *", "Code Description", and "Denomination Value". The table is currently empty. At the bottom of the window, there are fields for "Maker", "Checker", "Date Time", "Mod No", "Record Status", and "Authorization Status", along with an "Exit" button.

You can specify the following fields:

Host Code

The system indicates the host code that is linked to the transaction branch of the customer.

Instrument Code

Specify the Instrument Code from the list of values. All valid Instrument Codes of type TC (Traveller's Cheque) are listed.

Code Description

Specify the Description of the Instrument Code.

Instrument Type

System defaults the Instrument Type based on the Instrument Code selected.

Instrument Currency

System defaults the Instrument Currency based on the Instrument Code selected.

Issuer Code

System defaults the Issuer Code based on the Instrument Code selected.

Denomination Details

This the period till when the instruments code is valid from the day it is created.

Denomination Code

Specify the Denomination Code.

Code Description

Specify the Code Description.

Denomination Value

Specify the Denomination Value.

2.1.6.1 Denomination Code for Traveller's Cheques Summary

You can search for records in the Instrument Code Summary Screen. You can invoke 'Denomination Code for Traveller's Cheques Summary' screen by typing 'PISDENOM' in the field at the top right corner of the Application tool bar and clicking on the adjoining arrow button.

The screenshot shows a web application window titled "Denomination Code for Traveller's Cheques Summary". The interface includes a search bar with options for "Search", "Advanced Search", "Reset", and "Clear All". Below the search bar, there are two dropdown menus: "Authorization Status" and "Record Status". A text input field for "Instrument Code" is also present. The main area displays a table with columns: Authorization Status, Record Status, Host Code, Instrument Currency, Instrument Code, Code Description, Instrument type, and Issuer Code. The table is currently empty. At the bottom right, there is an "Exit" button.

You can search using one or more of the following parameters:

- Authorization Status
- Host Code
- Instrument Code

Once you have specified the search parameters, click 'Search' button. The system displays the records that match the search criteria.

Double click a record or select a record and click on 'Details' button to view the detailed maintenance screen.

2.1.7 Traveller's Cheque Inventory Maintenance

You can invoke 'Traveller's Cheque Inventory Maintenance' screen by typing 'PIDTCINV' in the field at the top right corner of the Application tool bar and clicking on the adjoining arrow button.

The screenshot shows the 'Traveller's Cheque Inventory Maintenance' application window. The window has a title bar with 'Traveller's Cheque Inventory Maintenance' and standard window controls. Below the title bar, there are two buttons: 'New' and 'Enter Query'. The main content area contains several input fields with red asterisks indicating required fields: 'Host Code *', 'Instrument Code *', 'Denomination Code *', 'Instrument Branch *', 'Issue Date *' (with a date picker showing 'YYYY-MM-DD'), 'Start Number *', and 'End Number *'. On the right side, there are two dropdown menus: 'Instrument type' and 'Instrument Currency', and a text field for 'Series Sequence Number'. At the bottom of the window, there are several fields: 'Maker' and 'Checker', 'Date Time:' (twice), 'Mod No', 'Record Status', and 'Authorization Status'. An 'EXIT' button is located in the bottom right corner.

You can specify the following fields:

Host Code

The system indicates the Host Code of transaction branch on clicking 'New'.

Instrument Code

Specify the Instrument Code from the list of values. All valid Instrument Codes of type TC (Traveller's Cheque) are listed.

Instrument Type

System defaults the Instrument Type based on the Instrument Code selected.

Instrument Currency

System defaults the Instrument Currency based on the Instrument Code selected.

Denomination Code

Specify the Denomination Code from the list of values. All denomination codes maintained for the instrument code in PIDDENOM are listed

Series Sequence Number

System generates Sequence Number of type Number (22).

Instrument Branch

Specify the Instrument Branch from the list of values. All valid branches of the Host are listed.

Issue Date

This field is defaulted as Current Date.

Start Number

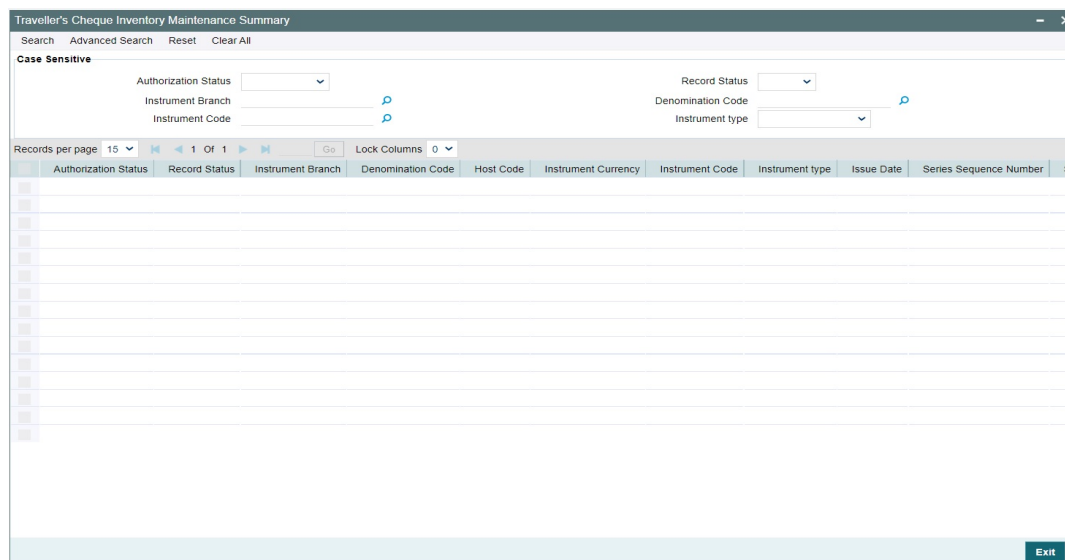

Specify the Start Number.

End Number

Specify the End Number. End number should be greater than Start Number.

2.1.7.1 Traveller's Cheque Inventory Maintenance Summary

You can search for records in the Instrument Code Summary Screen. You can invoke 'Traveller's Cheque Inventory Maintenance Summary' screen by typing 'PISTCINV' in the field at the top right corner of the Application tool bar and clicking on the adjoining arrow button.

You can search using one or more of the following parameters:

- Authorization Status
- Instrument Branch
- Instrument Code
- Record Status
- Denomination Code
- Instrument type

Once you have specified the search parameters, click 'Search' button. The system displays the records that match the search criteria.

Double click a record or select a record and click on 'Details' button to view the detailed maintenance screen.

2.2 Instrument Transactions

Instrument issuance, payment, stopping of the instrument payments can be done through the Instruments transaction screens.

2.2.1 Instrument Issue

You can provide details of issue of instruments in this maintenance. You can also send the instrument issue request through channels.

You can invoke 'Instrument Issue' screen by typing 'PIDINSIS' in the field at the top right corner of the Application tool bar and clicking on the adjoining arrow button.

You can specify the following fields:

Transaction Branch

The system indicates the Transaction Branch on clicking 'New'.

Transaction Reference Number

The system populates the Transaction Reference Number.

Host Code

This field is defaulted as user's logged in Host.

Instrument Number

This field is populated by system upon successfully completing the instrument issue processing. The new instrument number is allocated based on the branch and instrument code and available inventory in FIFO order.

Source Code

This field is defaulted as 'MANL'.

Instrument type

Based on the Instrument Code selected, Instrument Type gets auto-populated.

Instrument Code

All valid Instrument codes of instrument type 'Demand Draft' and 'Manager's Cheque' are listed. Select the appropriate code.

Code Description

Based on the Instrument Code selected, Code Description gets auto-populated.

Prefunded GL

You can select the value between Yes or No. If the Prefunded GL is 'Yes' Debit Account can be a valid GL. In other cases, system defaults the Prefunded GL maintained in Source code maintenance as the debit account while posting the accounting.

Test key

Specify the Test Key, if the transaction is for instrument type 'Remittance Inward'.

2.2.1.1 Main Tab

Click **Main** tab from the Instrument Issue screen.

The screenshot shows the Oracle Instrument Issue screen, Main Tab. The interface is divided into several sections:

- Debit Details:** Fields for Debit Account/GL, Account Currency, Account Branch, Account/GL Name, Debit Amount, Customer Number, and Customer Service Model.
- Instrument Details:** Fields for Booking Date (2018-06-07), Instruction Date (2018-06-07), Issue Date (YYYY-MM-DD), Instrument Currency, Instrument Amount, Exchange Rate, and FX Reference Number. An 'Enrich' button is located below the FX Reference Number field.
- Beneficiary Details:** Field for Beneficiary Name and an 'Additional Details' button.
- Status Bar:** Fields for Maker Id, Date Time, Checker Id, Date Time, Authorization Status (Authorized), and a 'Cancel' button.

You can specify the following fields:

Debit Details

Debit Account/GL

You can select the purchaser details. You can select a valid customer account.

Account Currency

The system indicates the Account Currency.

Account Branch

The system indicates the Branch of Account.

Account/GL Name

The system indicates the name of the Account or the GL name depending on your selection.

Debit Amount

Specify the Debit Amount to be issued.

Customer Number

The system indicates the unique Customer Number that is tagged to the account.

Customer Service Model

The system indicates the Customer Service Model for the account. For example, GOLD and PLATINUM.

Instrument Details

Booking Date

The system defaults the current date on clicking 'New'.

Instruction Date

Specify the request date obtained from the customer. This is defaulted as current date. You can change this to a back date or forward date.

Issue Date

The system specifies the Issue Date. If request date is a back dated, issue date will be set as the current date. Instrument Date is the same as Issue Date.

Note

System does holiday check using local holidays maintained for branch, when future dated request is placed. The request is processed with the following possibilities:

- If customer preference is available for Instruction date movement, then issue date is moved forward or backward to a business day.
 - If no customer preference is available it is always moved forward to next business day.
-

Instrument Currency

This is defaulted by the system based on the Instrument Code selected.

Instrument Amount

Specify the Instrument Amount for transfer. This is a mandatory field.

Exchange Rate

Specify the Exchange Rate if debit account currency is different from the transfer currency. The system retains the input value and validates the same against override and stop variances maintained in the Network preference.

If exchange rate is not specified, then the system populates the exchange rate on enrich or save, if the transfer amount is less than small FX limit maintained. If transfer amount is more than small FX limit and, if external exchange rate is applicable, then rate pick up will happen during transaction processing.

FX Reference Number

Specify the Foreign Exchange reference.

Enrich

Click this button to trigger computation of Charges and populate the Charges in the **Pricing** tab.

Beneficiary Details**Beneficiary Name**

Specify the Account Name of the beneficiary. This is a mandatory field.

Payable Branch Code

This is optional based on the Instrument Type. Select the required Branch Code from the list of values.

Payable Branch Name

This is defaulted by the system based on the Payable Branch Name selected.

Remarks

Specify internal remarks, if any.

Issuer Bank Details**Bank Code**

Specify the Bank Code from the list of values.

Bank Name

This is defaulted by the system based on the Bank Code selected.

Branch Code

Specify the Branch Code from the list of values.

Branch Name

This is defaulted by the system based on the Branch Code selected.

Payable Bank Details

Bank Code

Specify the Bank Code from the list of values.

Bank Name

This is defaulted by the system based on the Bank Code selected.

Branch Code

Specify the Branch Code from the list of values.

Branch Name

This is defaulted by the system based on the Branch Code selected.

2.2.1.2 Additional details

You can specify the additional beneficiary details by clicking the 'Additional Details' button.

Additional Details sub screen consist of two tabs:

- Additional Details
- TC Denomination Details

The screenshot shows a window titled 'Additional Details' with a close button (X) in the top right corner. The window contains several input fields and sections:

- Transaction Reference Number (text field)
- Activation Date (text field with mask 'yyyy-MM-dd')
- Host Code (text field)
- Instrument Currency (text field)
- A tabbed interface with 'Additional Details' selected (highlighted in red).
- TC Denomination Details (text field)
- Debtor Details section with fields: Account /Party Identifier, Bank Identifier Code, Name and Address 1, Address Line 2, Address Line 3, Address Line 4, Phone Number, Debtor Identifier.
- Phone Number (text field)
- Beneficiary Account section with fields: Beneficiary Account, Name and Address 1, Address Line 2, Address Line 3, Address Line 4, Phone Number, Beneficiary Identifier.
- Sender To Receiver Information section with fields: Line 1, Line 2, Line 3, Line 4, Line 5, Line 6.
- Buttons 'OK' and 'Exit' at the bottom right.

You can specify the Following details:

Debtor Identifier

Account/Party Identifier

Specify the Account/Party Identifier.

Bank Identifier Code

Select the BIC from the list of values. All the valid BIC codes are listed here.

Name and Address1

Specify the Name and Address.

Address 2-4

Specify the Addresses.

Phone Number and Debtor Identifier

Specify the Phone Number and Debtor Identifier.

Payee Details

Beneficiary Account

Specify the Beneficiary Account.

Name and Address1

Specify the Name and Address.

Address 2-4

Specify the Addresses.

Phone Number and Debtor Identifier

Specify the Phone Number and Identifier of the Payee.

Sender to Receiver Information

Line 1-6

Specify the lines.

Note

System lists the standard code words such as /ACC/, /INT/, /INS/. The code word /REC/ is not listed in the LOV as per SWIFT 2019 change.

2.2.1.3 TC Denomination details

You can specify the TC Denomination details..

The screenshot shows a software window titled "Additional Details" with a close button (X) in the top right corner. At the top, there are input fields for "Transaction Reference Number", "Activation Date" (with a date mask "yyyy-MM-dd"), "Host Code", and "Instrument Currency". Below these fields, a tab labeled "TC Denomination Details" is selected and highlighted in red. Underneath the tab is a table with a header row containing the following columns: "Serial Number", "Denomination Code", "Code Description", "Denomination Value", "Units Issued", "Series Start Number", and "End Number". The table body is currently empty. At the bottom right of the window, there are "OK" and "Exit" buttons.

Denomination details tab is enabled only if the instrument type is TC

You can specify the Following details:

Serial Number

System generates the Serial Number.

Denomination Code

Specify the Denomination Code from the list of values. Lists all the codes maintained for the instrument code in PIDDENOM.

Code Description

Code Description is defaulted based on the Denomination Code selected.

Denomination Value

Denomination Value is defaulted based on the Denomination Code selected.

Units Issued

Specify the Issued Units.

Series Start Number

If the instrument number generation is 'Auto', then Start Series Number is populated by system. You can manually enter the Series Start Number if the instrument generation is manual.

End Number

Based on the Units Issued, End Number is populated. You can manually enter the Series End Number if the instrument generation is manual.

Total Value

Total Value is calculated by the system by multiplying the Denomination value with the units issued.

2.2.1.4 Pricing Tab

Click the **Pricing** tab from the Instrument Issue screen:

The screenshot shows the 'Instrument Issue' application window. At the top, there are 'New' and 'Enter Query' buttons. Below are several input fields with red asterisks indicating required fields: 'Transaction Branch Code *', 'Host Code *', 'Source Code *', 'Instrument Code *', 'Transaction reference no *', 'Instrument Number', 'Instrument type', and 'Code Description'. A 'Main' menu is visible with the 'Pricing' tab selected. Below the input fields is a table with the following columns: 'Component Name', 'Pricing Currency', 'Pricing Code', 'Waived', 'Amount', and 'Debtor Account Currency'. The table is currently empty. At the bottom of the window, there are fields for 'Maker ID', 'Checker ID', 'Authorization Status', and 'Date Time' (under both Maker ID and Checker ID). An 'Exit' button is located in the bottom right corner.

Note

- On clicking the Enrich button, system would compute the Charges, and Tax on Charges if applicable, based on the maintenance for Pricing Code specified in Instrument Preferences (PIDINPRF).
- There may be one or more applicable Charge and Tax components as defined in the Pricing Code maintenance. For each Charge and/or Tax component, the fixed

amount or rate would be fetched from Pricing Value Maintenance screen (PPDV-LMNT).

You can specify the following fields:

Component Name

The system displays the name of the applicable Charge component.

Pricing Currency

The system displays the Pricing Currency of the component from the Pricing Code Maintenance.

Pricing Code

The system displays the Pricing Code of the component from the Pricing Code Maintenance.

Waived

Check this box to select the charge component to waive the associated charges.

Note

- If a particular Charge component is waived by you, then system would automatically also check the Waiver check box for the associated Tax component (identified from the Pricing code maintenance) if displayed in this grid.
 - If charge/tax component is already waived in the Pricing Value maintenance, this component would still be displayed with the value and the waiver flag checked. This flag would not be allowed to be unchecked.
-

Amount

The system displays the fixed or calculated charge amount using the Pricing Value Maintenance. You can edit this field to a non-zero value.

Debit Account Currency

The system displays the Currency of the selected Debit Account.

Note

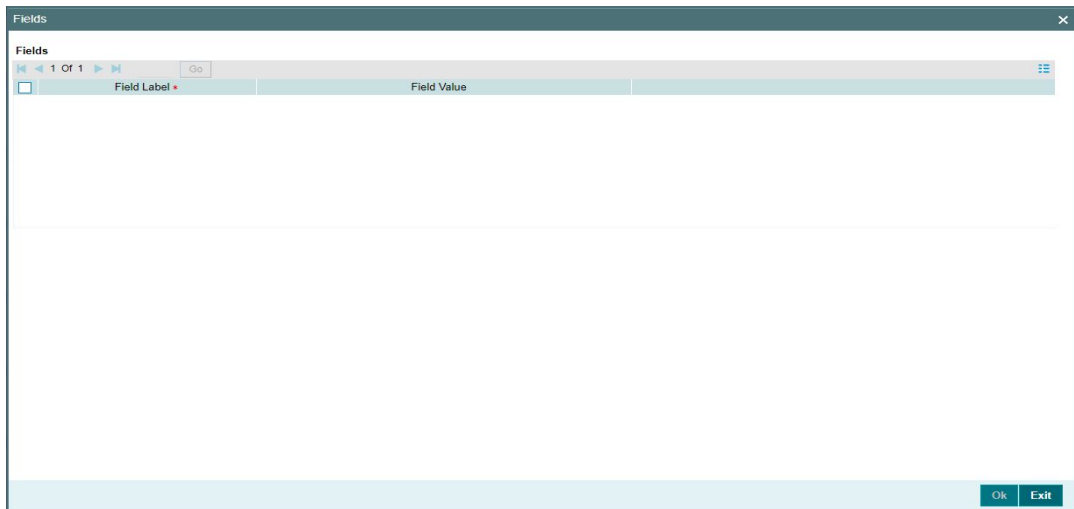

Debit Currency is the same as Pricing Currency.

Debit Amount

The system displays the Debit Amount.

2.2.1.5 UDF Tab

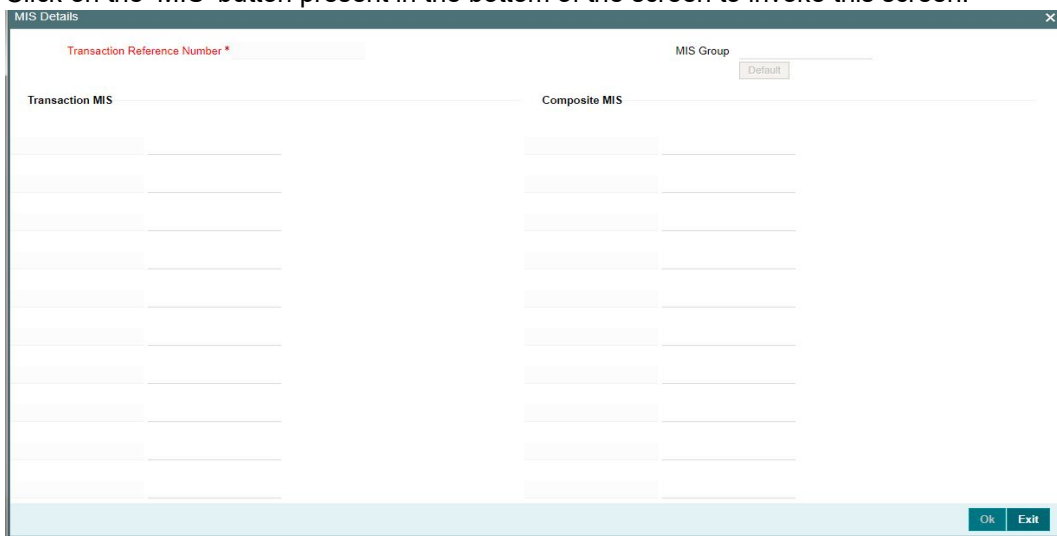

Click on the 'UDF' button present in the bottom of the screen to invoke this screen.

You can specify user defined fields for each transaction.

2.2.1.6 MIS Tab

Click on the 'MIS' button present in the bottom of the screen to invoke this screen.

You can specify the MIS details in this sub-screen.

2.2.1.7 Instrument Issue Summary

You can search for instruments issued records in the summary screen. You can invoke 'Instrument Issue Summary' screen by typing 'PISINSIS' in the field at the top right corner of the Application tool bar and clicking on the adjoining arrow button.

The screenshot shows the 'Instrument Issue Summary' application window. The window title is 'Instrument Issue Summary'. At the top, there is a search bar with buttons for 'Search', 'Advanced Search', 'Reset', and 'Clear All'. Below the search bar, there are several input fields for search criteria: 'Transaction Reference Number', 'Instrument Code', 'Instrument type', 'Authorization Status', 'Issue Date' (with a date picker), 'Instrument Amount', 'Debit Account/GL', 'Instrument Number', and 'Customer Number'. Each field has a magnifying glass icon to its right. Below the search fields, there is a table with columns: 'Transaction Reference Number', 'Host Code', 'Instrument Amount', 'Instrument Code', 'Debit Amount', 'Instrument Currency', 'Beneficiary Address 2', 'Customer Service Model', and 'Beneficia'. The table is currently empty. At the bottom right of the window, there is an 'Exit' button.

You can search using one or more of the following parameters:

- Transaction Reference Number
- Instrument Amount
- Instrument Code
- Debit Account/GL
- Instrument Type
- Instrument Number
- Authorization Status
- Customer Number
- Issue Date

Once you have specified the search parameters, click 'Search' button. The system displays the records that match the search criteria.

Double click a record to view the detailed maintenance screen.

2.2.2 Instrument Issue View

You can view the complete details of the instrument issued in this screen.

You can invoke 'Instrument Issue View Detailed' screen by typing 'PIDINSVW' in the field at the top right corner of the Application tool bar and clicking on the adjoining arrow button. Click New button on the Application toolbar.

- From this screen, click Enter Query. The Transaction Reference field gets enabled, for the user to specify the Reference Number.
- Along with the transaction details in the Main and Pricing tabs user can also view the Status details for the following:
 - Transaction Status
 - External System Status
 - Exception Queue Details
 - Stop Pay details
- Click Execute Query to populate the details of the transaction in the Instrument Issue View Detailed screen.

For more details on Main and Pricing tabs refer to 'PIDINSIS' screen details above.

2.2.2.1 Transaction Details

You can invoke this screen by clicking '*Transaction Details*' tab in the Instrument Issue Detailed View screen:

You can view the below status for the instrument issued from Transaction Details tab:

- Transaction status

- CRLQ status - indicates the credit accounting liquidation status
- DRLQ status - indicates the debit accounting liquidation status
- Sanction Seizure

Status of the following External System checks with its respective Reference number are displayed:

- Sanction Check Status
- External Credit Approval Status
- External Exchange Rate Status

And 'Exception Queue, Liquidation Details, Duplicate Issue Details and Expiry Details are also available.

2.2.2.2 Stop Pay Details

Stop payment details, if initiated for the transaction, the respective details are displayed here. Click on 'Stop Pay Details' to view the screen.

Following details are displayed in the Stop pay details screen:

- Stop Payment Date
- Stop Payment revoked On
- Stop Pay Reason
- Stop Pay Reference
- Beneficiary Name and also you can view the message for the stop pay initiated by clicking 'View Message' button.

2.2.2.3 Foreign Currency Instrument Details

You can view Issuer Bank BIC and Bank Name fields.

Main | Pricing | Transaction Details | Stop Pay Details | **Foreign Currency Instrument Details**

Issuer Bank BIC
Bank Name

UDF | MIS | View Queue Action | Payment Details | All Messages | Clearing Details | Accounting Entries

Maker Id Checker ID Authorization Status **Exit**
Date Time Date Time

2.2.2.4 UDF Tab

You can invoke this screen by clicking 'UDF' tab in the screen.

Fields

Field Label *	Field Value
---------------	-------------

Ok Exit

2.2.2.5 MIS Tab

You can invoke this screen by clicking 'MIS' tab in the screen.

MIS Details

Transaction Reference Number * MIS Group Default

Transaction MIS	Composite MIS
<input type="text"/>	<input type="text"/>
<input type="text"/>	<input type="text"/>

2.2.2.6 View Queue Action Log

You can view all the queue actions for the respective transaction initiated. You can invoke this screen by clicking the 'View Queue Action' button in View screen, where the Transaction Reference Number is auto populated and related details are displayed.

The screenshot shows a web application window titled "View Queue Action Log". At the top, there is a search bar labeled "Enter Query" with two input fields: "Transaction Reference Number" and "Network Code". Below the search bar is a pagination control showing "1 Of 1" and a "Go" button. A table with the following columns is displayed: Transaction Reference Number, Action, Remarks, Queue Code, Authorization Status, Maker Id, and Maker Date Stamp. At the bottom of the window, there are two buttons: "View Request Message" and "View Response Message", and an "Exit" button in the bottom right corner.

Following details are displayed:

- Transaction Reference Number
- Network Code
- Action
- Remarks
- Queue Code
- Authorization Status
- Maker ID
- Maker Date Stamp
- Checker ID
- Checker Date Stamp
- Queue Status
- Queue Reference No
- Primary External Status
- Secondary External Status
- External Reference Number

You can view the request sent and the corresponding response received for each row in Queue Action Log.

Also, you can view the request sent to and the response received from external systems for the following:

- Sanction screening
- External credit approval
- External Account Check

- External FX fetch
- External price fetch
- Accounting system

2.2.2.7 Payment Details

You can invoke this screen by clicking 'Payment Details' tab in the screen.

On clicking this, system launches the Instrument Payment view screen, which displays all the details pertaining to Instrument Payment. For more details on Instrument payment view, refer to section - 2.2.6.

2.2.2.8 Clearing Details

Click on Clearing details to open the Inward Clearing View (PGDIVIEW) screen for the instrument, if the payment of the instrument is done through clearing.

2.2.2.9 All Messages

You can invoke the "All Messages" screen by clicking the "All Messages" tab in the transaction screen to view the advices generated, if any.

Specify the Transaction Reference Number and click on Execute Query to obtain the Message details.

By default, the following attributes of the **Message Details** tab are displayed.

- DCN
- Message Type
- Message Format
- SWIFT Message Type
- Swift MX Type
- Direction
- Value Date
- Message Status
- Delivery Status
- Authorization Status
- Acknowledgement Status
- Funding Status
- Media
- Receiver or Sender
- PDE Flag
- Suppressed

2.2.2.10 **Accounting Entries Tab**

By default, the following attributes of the **Accounting Entries** tab are displayed:

- Event Code
- Transaction Date
- Value Date
- Account
- Account Branch
- TRN Code
- Dr/Cr

- Amount Tag
- Account Currency
- Transaction Amount
- Netting
- Offset Account
- Offset Account Branch
- Offset TRN Code
- Offset Amount Tag
- Offset Currency
- Offset Amount
- Offset Netting
- Handoff Status

2.2.2.11 Instrument Issue View Summary

You can invoke the 'Instruments Issue View Summary' screen by typing 'PISINSVW' in the field at the top right corner of the application toolbar and clicking the adjoining arrow button.

You can search using one or more of the following parameters:

- Transaction Reference Number
- Instrument Amount
- Instrument Code
- Debit Account/GL
- Instrument Type
- Instrument Number
- Source Code
- Authorization Status
- Customer No
- Issue Date

- Transaction Status
- Queue Code
- Source Reference Number.

Once you have specified the search parameters, click 'Execute Query' button. The system displays the records that match the search criteria.

Double click a record or select a record and click on 'Details' button to view the detailed maintenance screen.

You can perform the following actions on this summary screen:

Revalidate

On selecting an instrument from the View screen that allows revalidation, Revalidation (Function ID: PIDREVAL) screen is opened with the selected Instrument details.

Issue Duplicate

On selecting an instrument from the View screen that allows duplicate issue, Instrument Duplicate Issue (Function ID: PIDISDUP) screen is opened with the selected Instrument details.

2.2.3 Instrument Payment

Instrument issues can be liquidated by specifying the instrument Number through this screen. Liquidation can be initiated from the channels as well. Instrument can be liquidated to own bank account, GL or can be received as part of local clearing.

You can invoke 'Instrument Payment' screen by typing 'PIDINSPY' in the field at the top right corner of the Application tool bar and clicking on the adjoining arrow button.

The screenshot shows the 'Instrument Payment' application window. At the top, there are 'New' and 'Enter Query' buttons. The main area is divided into several sections:

- Host Code ***: Text input field.
- Payment Branch ***: Text input field with '000' entered.
- Source ***: Text input field.
- Payment Mode**: Dropdown menu with 'Transfer' selected.
- Instrument Code ***: Text input field.
- Instrument Number ***: Text input field.
- Payment Reference ***: Text input field.
- Payment Date**: Text input field with 'yyyy-MM-dd' placeholder.
- Code Description**: Text input field.
- Instrument Type**: Dropdown menu.
- Test key**: Text input field.

Below these fields, there are two tabs: 'Main' (selected) and 'Price'. The 'Main' tab is further divided into:

- Credit Details**:
 - Creditor Account Number / GL
 - Account Currency
 - Account Branch
 - Account/GL Name
 - Credit Amount
 - Customer Number
 - Customer Service Model
- Instrument Details**:
 - Issue Date
 - Instrument Currency
 - Instrument Amount
 - Exchange Rate
 - FX Reference Number
 - Issuer Bank Code
 - Bank Name
 - Issuer Branch Code

At the bottom, there is a status bar with 'MIS | UDF' and fields for 'Maker Id', 'Checker Id', 'Authorization Status', 'Maker Date Stamp', and 'Checker Date Stamp'. An 'Exit' button is located in the bottom right corner.

You can specify the following fields:

Host Code

The system indicates the Host Code of transaction branch on clicking 'New'.

Payment Branch

Payment Branch is defaulted as the logged in branch of the customer.

Source

The source is defaulted as MANL.

Payment Mode

Payment mode can be 'Transfer' or 'Cancel'. If payment is done by transferring the amount to another account Transfer mode has to be chosen. If purchaser is cancelling the instrument, cancel option to be chosen.

Instrument Code

Select the Instrument Code.

Instrument Number

Select the Instrument Number to be paid. All instruments outstanding for the instrument code which are in 'Active' status are listed.

Payment Reference

The system populates the Payment Reference number.

Payment Date

Payment date is defaulted as current date.

Code Description & Instrument Type

Instrument code description and Instrument type are defaulted based on Instrument code selected.

Test Key

Specify the Test Key.

2.2.3.1 Main Tab

Click **Main** tab from the Instrument Payment screen.

MIS | UDF

Maker Id	Checker Id	Authorization Status	Authorized
Maker Date Stamp	Checker Date Stamp		

Cancel

You can specify the following fields:

Credit Details

Creditor Account Number/GL

Specify the Creditor Account Number from the list of values. If Payment mode is Cancel, system defaults the debit account used for the instrument issue in this field.

Account Currency

This field is defaulted based on account number selected.

Account Branch

This field is defaulted as the account branch of account number selected.

Account/GL Name

The system indicates the name of the Account depending on your account selection.

Credit Amount

Based on the Instrument amount and account currency this amount is computed and populated by the system.

Customer Number

The system indicates the unique customer number that is tagged to the account.

Customer Service Model

The system indicates the Customer Service Model linked to the customer.

Instrument Details

Instrument details are defaulted based on the instrument number selected. The following fields are displayed on the screen:

- Issue Date
- Instrument Currency
- Instrument Amount
- Exchange Rate

Exchange Rate

Based on the instrument currency and account currency and exchange rate related maintenances, exchange rate is computed by the system.

FX Reference Number

Specify the FX Reference Number.

Issuer Bank Code

Specify the Bank Code from the list of values.

Bank Name

This is defaulted by the system based on the Bank Code selected.

Issuer Branch Code

Specify the Branch Code from the list of values.

Branch Name

This is defaulted by the system based on the Branch Code selected.

Beneficiary Details**Beneficiary Name**

Based on the Instrument Number selected, this field is defaulted.

Beneficiary Address - Address 2

Based on the instrument number selected, beneficiary address is defaulted.

Beneficiary Identifier

Based on the Instrument Number selected, this field is defaulted.

Remarks

This is a free text field and specify Remarks, if any.

Enrich

Click this button to trigger computation of Charges and details in the **Main** and **Pricing** tab.

Instrument Status

Instrument Status

The status of the instrument is displayed.

2.2.3.2 Price Tab

Click the **Price** tab from the Instrument Payment screen. For more details on Pricing fields, refer to section 2.2.1.3:

The screenshot shows the 'Instrument Payment' window with the 'Price' tab selected. The window title is 'Instrument Payment' and it has 'New' and 'Enter Query' buttons. The form contains several fields: 'Host Code *', 'Payment Branch * ZAG', 'Source *', 'Payment Mode' (set to 'Transfer'), 'Instrument Code *', and 'Instrument Number *'. On the right side, there are fields for 'Payment Reference *', 'Source Reference Number', 'Payment Date' (format: YYYYMMDD), 'Code Description', and 'Instrument Type'. Below the form, there are two tabs: 'Main' and 'Price', with 'Price' being the active tab. A table is visible below the tabs with columns: 'Pricing Currency', 'Pricing Code', 'Component Name', 'Waiver', 'Amount', and 'Debtor Account'. The table shows '1 Of 1' records. At the bottom of the window, there are fields for 'MIS | UDF', 'Maker ID', 'Checker ID', 'Authorization Status', 'Maker Date Stamp', 'Checker Date Stamp', and an 'Exit' button.

2.2.3.3 MIS Tab

You can invoke this screen by clicking 'MIS' tab in the screen.

The screenshot shows the 'MIS Details' window. The window title is 'MIS Details'. It contains a 'Transaction Reference Number *' field and a 'MIS Group' dropdown menu set to 'Default'. Below these, there are two columns: 'Transaction MIS' and 'Composite MIS'. Each column contains a list of empty rows for data entry. At the bottom right, there are 'Ok' and 'Exit' buttons.

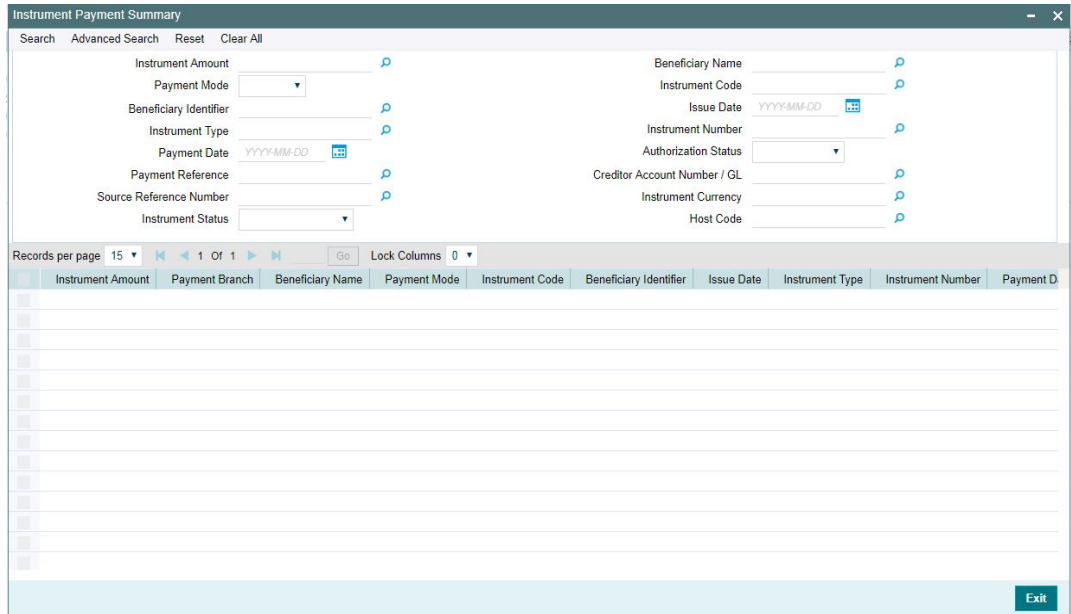

2.2.3.4 UDF Tab

You can invoke this screen by clicking 'UDF' tab in the screen.

2.2.3.5 Instrument Payment Summary

You can search for records in the Instrument Payment Summary Screen. You can invoke 'Instrument Issue Summary' screen by typing 'PISINSPY' in the field at the top right corner of the Application tool bar and clicking on the adjoining arrow button.

You can search using one or more of the following parameters:

- Instrument Amount
- Beneficiary Name
- Payment Mode
- Instrument Code
- Beneficiary Identifier
- Issue Date
- Instrument Type
- Instrument Number

- Payment Date
- Authorization Status
- Payment Reference
- Creditor Account Number/GL
- Source Reference Number
- Instrument Currency
- Host Code

Once you have specified the search parameters, click 'Search' button. The system displays the records that match the search criteria.

Double click a record or select a record and click on 'Details' button to view the detailed maintenance screen.

2.2.4 Instrument Liquidation Process Flow

Instrument can be liquidated to own bank account, or can be received as part of local clearing.

- On initiating the instrument liquidation, the following processing steps are followed by the system:
 - **Initial Validations:** System should perform mandatory field checks and reference information checks. System validates whether account record is open and authorized.
 - **Instrument Validation:** Instrument status should be 'Active'. It should not be in any other status for example, liquidated, cancelled, and stale or payment stopped. If a valid Instrument is found, instrument details currency, amount and issue date are matched with instrument issue record. If the instrument is payable by a particular branch, then the liquidation can be initiated by that branch only.

Note

For instrument liquidations initiated from user interface, system throws an error for any validation exception.

- **Sanction Check:** If Sanction screening is required for instrument payment, then it should be possible to send the clearing party details to the external sanction system for verification.
- **Exchange Rate Pickup:** Based on instrument currency and credit account currency exchange rate is picked up. This can be internal/external rate.
- **External Account Check:** If the instrument is getting credited to an account with the same bank, credit account status check to be done with DDA system. This processing step is not applicable for GLs.
- **Accounting Handoff:** Accounting entries are handed off to external accounting system.

2.2.5 Instrument Payment View

You can view the complete details of the instrument payment in this screen.

You can invoke 'Instrument Payment View' screen by typing 'PIDISPVW' in the field at the top right corner of the Application tool bar and clicking on the adjoining arrow button. Click new button on the Application toolbar.

- From this screen, click Enter Query. The Payment Reference field gets enabled, for the user to specify the Reference Number.
- Along with the transaction details in the Main and Pricing tabs user can also view the Status details for the following:
 - Transaction Status
 - External System Status
 - Exception Queue Details
- Click Execute Query to populate the details of the transaction in the Instrument Issue View Detailed screen.

For more details on Main and Pricing tabs refer to 'PIDINSPY' screen details above.

2.2.5.1 Transaction Details

You can invoke this screen by clicking 'Transaction Details' tab in the Instrument Issue Detailed View screen:

You can view the below status for the instrument issued from Transaction Details tab:

- Transaction status
- CRLQ status - indicates the credit accounting liquidation status
- DRLQ status – indicates the debit accounting liquidation status

- Sanction Seizure

Status of the following External System checks with its respective Reference number are displayed

- Sanction Check Status
- External Credit Approval Status
- External Exchange Rate Status

And 'Exception Queue code, Transaction Error code and Repair Reason details are available under *Exception Queue* status.

2.2.5.2 **Exception**

You can invoke the "Exception" screen by clicking the "Exception" tab in the transaction screen.

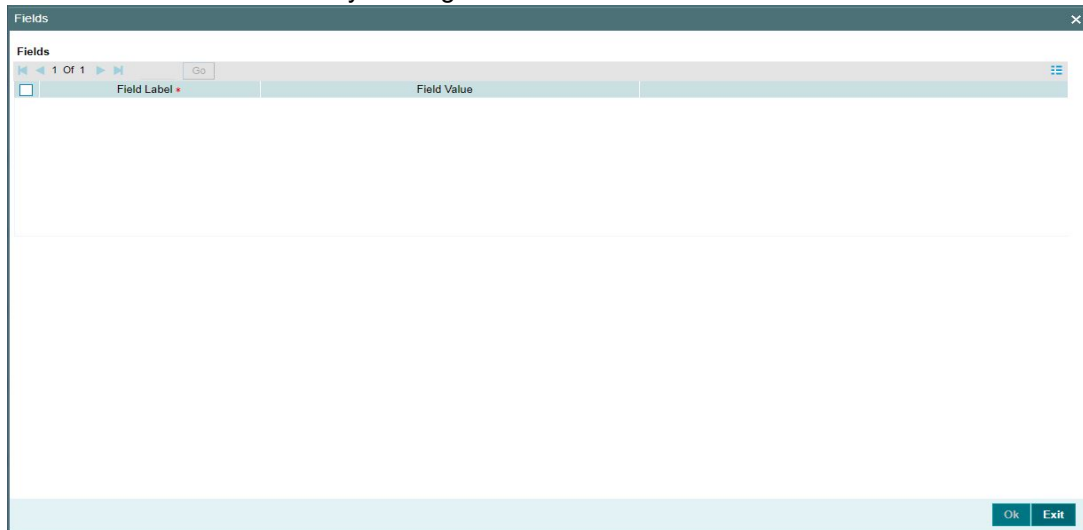

You can view Reversal Details in this sub screen.

2.2.5.3 **MIS Tab**

You can invoke this screen by clicking 'MIS' tab in the screen.

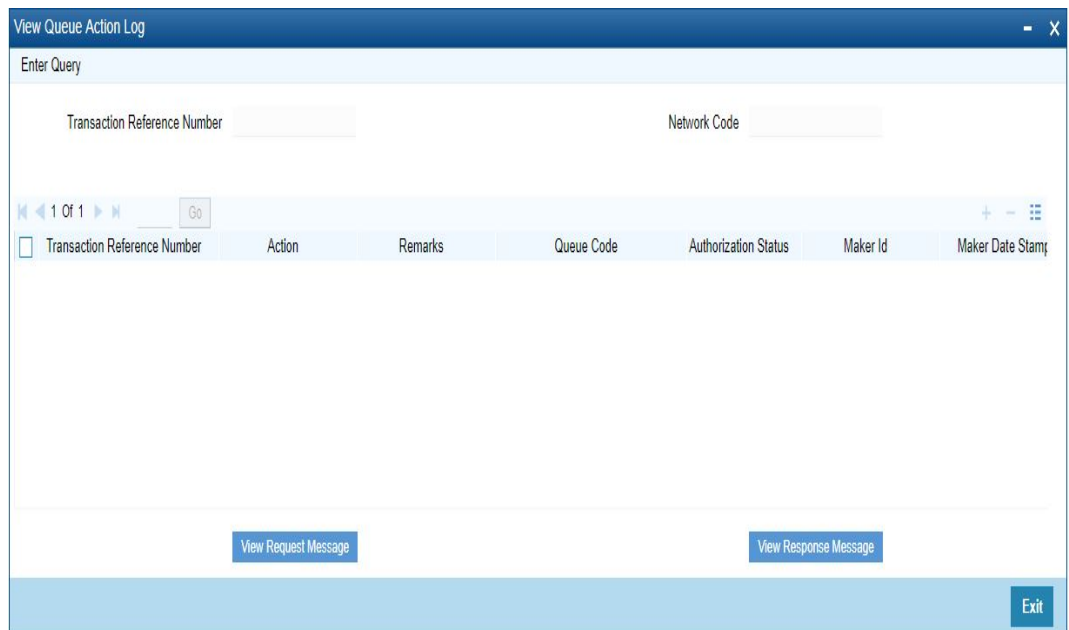

2.2.5.4 UDF Tab

You can invoke this screen by clicking 'UDF' tab in the screen.

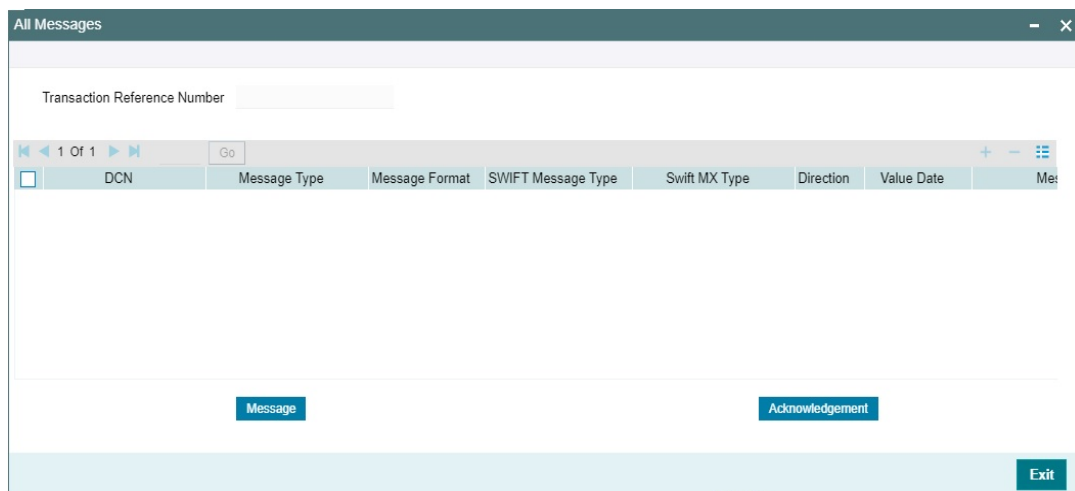

2.2.5.5 View Queue Action Log

You can view all the queue actions for the respective transaction initiated. You can invoke this screen by clicking the 'View Queue Action' button in View screen, where the Transaction Reference Number is auto populated and related details are displayed. Refer to section 2.2.2.6 for more details on fields

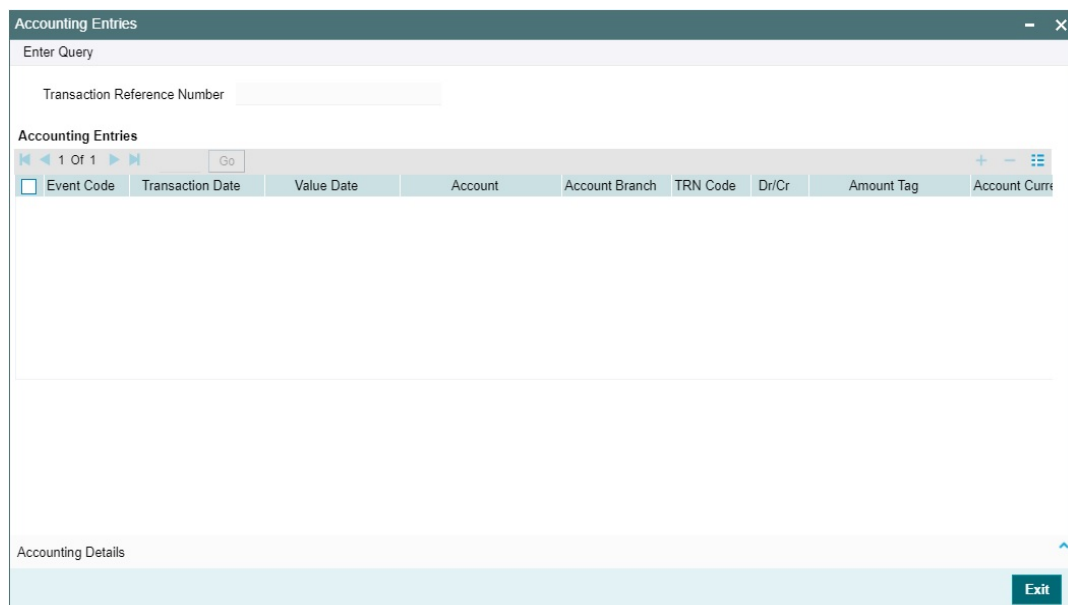

2.2.5.6 All Messages

You can invoke the “All Messages” screen by clicking the “All Messages” tab in the transaction screen.

2.2.5.7 Accounting Entries Tab

Click the Accounting Entries tab and view the accounting entries for the transaction initiated. For more details on this, refer to section 2.2.2.1.

2.2.5.8 Instrument Payment View Summary

You can invoke the 'Instrument Payment View Summary' screen by typing 'PISISPWW' in the field at the top right corner of the application toolbar and clicking the adjoining arrow button.

The screenshot shows the 'Instrument Payment View Summary' application window. At the top, there is a search bar with options for 'Search', 'Advanced Search', 'Reset', and 'Clear All'. Below this is a 'Case Sensitive' checkbox. The main area contains search filters for various fields: Instrument Amount, Payment Mode (dropdown), Beneficiary Identifier, Instrument Type, Payment Date (YYYY-MM-DD), Beneficiary Name, Instrument Code, Issue Date (YYYY-MM-DD), Instrument Number, Authorization Status (dropdown), and Creditor Account Number / GL. Below the filters is a table with columns: Instrument Amount, Payment Branch, Beneficiary Name, Payment Mode, Instrument Code, Beneficiary Identifier, Issue Date, Instrument Type, and Inst. The table currently shows one record. At the bottom, there is a 'Reversal Request' section and an 'Exit' button.

You can search using one or more of the following parameters:

- Instrument Amount
- Beneficiary Name
- Payment Mode
- Instrument Code
- Beneficiary Identifier
- Issue Date
- Instrument Type
- Instrument Number
- Payment Date
- Authorization Status
- Payment Reference
- Creditor Account Number/GL
- Source Reference Number
- Instrument Currency
- Instrument Status
- Transaction Status
- Queue Code
- Host Code

Once you have specified the search parameters, click 'Execute Query' button. The system displays the records that match the search criteria.

Double click a record or select a record and click on 'Details' button to view the detailed maintenance screen.

You can perform the following actions on this summary screen:

Reversal Request

On selecting an instrument from the View screen that allows reversal, Reversal of Instrument Payment" screen (Function ID: PIDREVSL) is opened with the selected Instrument details.

2.2.6 Instrument Stop Payment

You can mark stop payment of an instrument and also revoke the stop payment. You can also collect charges for stop payment from the purchaser. Instrument status is marked as 'Payment Stopped' on authorizing the stop payment. When the stop payment is revoked, the instrument status is moved back to previous status (Active) provided the validity period is not over, else the status is marked as stale.

Payment can be stopped for an instrument which is not in liquidated / cancelled /stale status. You can invoke 'Instrument Stop Pay' screen by typing 'PIDSTPAY' in the field at the top right corner of the Application tool bar and clicking on the adjoining arrow button.

You can specify the following fields:

Host Code

The system indicates the Host Code of transaction branch on clicking 'New'.

Branch

The system indicates the Transaction Branch of the customer.

Source Code

System defaults the Source Code as 'MANL'.

Instrument Code

Specify the Instrument Code.

Instrument Number

Specify the Instrument Number for which stop payment to be marked. Instrument Number field lists instruments for the instrument codes selected which are in Active status.

Stop Pay Reference

System generates the Stop Pay Reference on clicking 'New' button.

Source Reference Number

Source Reference Number is disabled for stop payment through UI. For Gateway, this field is enabled and user can specify the number.

Code Description

The system indicates the Instrument code description based on the Instrument code selected.

Instrument type

The system indicates the type of Instrument.

2.2.6.1 Main Tab

You can specify the following field details in the Main tab:

Stop Pay Date

This field is displayed as current date.

Stop Pay Reason

Specify a reason to issue the Stop Pay.

Query (Field 75)

Specify the query, if any.

Beneficiary Name

The system indicates the name of the beneficiary as mentioned in the instrument.

Instrument Currency

The system indicates the Instrument Currency.

Instrument Amount

The system indicates the Instrument Amount.

Issue Date

The system indicates the date on which the instrument was issued.

Stop Pay revoked on

You can revoke the stop pay by invoking the 'Revoke' action. The date on which the Stop Pay revoked is displayed in this field.

Generate MT 111

Check this box, when a SWIFT message is to be generated for stop payment request sent for Foreign currency-Demand Draft instrument.

This is applicable only for foreign CCY-Demand Draft. When this is not checked, SWIFT message is not generated.

Sending Bank BIC

This field is disabled, when stop payment is done through UI. For upload, this field is displayed with respective BIC.

Enrich button

Click the Enrich button to populate charge/tax amounts.

If charge pick up fails, system throws an error. You can then provide the required values and proceed with the transaction.

2.2.6.2 Price Tab

Click the **Price** tab from the Instrument Payment screen. For more details on Pricing fields, refer to section 2.2.1.3:

The screenshot shows the 'Instrument Stop Pay Detailed' window with the 'Price' tab selected. The form contains several input fields: Host Code, Branch Code, Source Code, Instrument Code, Instrument Number, Stop Pay Reference, Source Reference Number, Code Description, and Instrument type. Below the form is a table with columns: Pricing Currency, Pricing Code, Component Name, Waived, Amount, Debtor Account Currency, and Debit Amount. The table is currently empty.

2.2.6.3 Instrument Stop Pay Summary

You can search for records in the Instrument Stop Pay Summary Screen. You can invoke "Instrument Stop Pay Summary" screen by typing 'PISSTPAY' in the field at the top right corner of the Application tool bar and clicking on the adjoining arrow button..

The screenshot shows the 'Instrument Stop Pay Summary' window. It features a search bar at the top with options for 'Search', 'Advanced Search', 'Reset', and 'Clear All'. Below the search bar are several search criteria: Stop Pay Date (YYYY-MM-DD), Stop Pay revoked on (YYYY-MM-DD), Authorization Status, Instrument Number, Record Status, and Stop Pay Reference. The main area is a table with columns: Stop Pay Date, Instrument type, Host Code, Instrument Code, Instrument Currency, Instrument Number, Instrument Amount, Issue Date, Stop Pay revoked on, and Branch Code. The table is currently empty. At the bottom right, there is an 'Exit' button.

You can search using the following parameter:

- Stop Pay Date
- Instrument Number
- Stop Pay revoked on
- Record Status
- Authorization Status
- Stop Pay Reference

Once you have specified the above parameter, click 'Search' button. The system displays the records that match the search criteria.

Double click a record or select a record and click on 'Details' button to view the detailed maintenance screen.

2.2.7 Instrument Revalidation Detailed

You can initiate the Revalidation of expired instruments, using this screen.

You can invoke “Instrument Revalidation Detailed” screen by typing ‘PIDREVAL’ in the field at the top right corner of the Application tool bar and clicking on the adjoining arrow button.

You can specify the following fields:

Host Code

The system defaults the Host Code of transaction branch on clicking ‘New’.

Revalidation Branch

The system defaults the Revalidation Branch of transaction branch on clicking ‘New’.

Source

Specify the Source from the list of values. All valid source codes for the Host are listed.

Instrument Code

Specify the Instrument Code from the list of values. All instrument codes of validation type ‘Internal’ are listed if Revalidation Allowed is ‘Yes’.

Instrument Number

Specify the Instrument Number from the list of values. All instruments issued for the selected Instrument Code are listed if

- Instrument status is Active
- Expiry date is reached based on the Stale period maintained for the instrument

Revalidation Reference

System generates the Revalidation Reference on clicking ‘New’ button.

Revalidation Date

Revalidation date is defaulted as Current Date.

Source Reference Number

This is an optional field for UI input. For Channel requests this is mandatory.

Code Description

System defaults the Code Description of the Instrument Code selected.

Instrument Type

System defaults the Instrument Type of the Instrument Code selected.

2.2.7.1 Main Tab**Revalidation Period****Days**

Specify the Number of Days.

Months

Specify the Number of Months.

New Expiry Date

This is populated when the revalidation period is populated/modified. System recalculates the new Expiry date on save again. New expiry Date is derived as existing Expiry Date with addition of Revalidation Period.

Remarks

Specify the Remarks, if any.

Charge Account

This field is defaulted as the Charge Account on Instrument issue. You can change the Charge account if required to another account/GL. Charges are force posted.

Account Description

System defaults the Account Description of the Charge Account selected.

Populate Charges

This Field populates the charges based on the Price code maintained for revalidation in Network Preferences for the instrument. The charge is converted to Charge account currency in STANDARD mid-rate if cross currency is involved. You can modify/waive the charges.

Instrument Details

The following fields are auto populated on the Instrument Number selected:

- Issue Branch
- Issue Date
- Instrument Currency
- Instrument Amount
- Original Expiry Date

Debtor Details**Account No\ GL Code**

The Account No\ GL Code field is auto populated on the Instrument Number selected:

Account No\ GL Code Description

The Account No\ GL Code Description field is auto populated on the Instrument Number selected.

Beneficiary Details

Beneficiary Name

The Beneficiary Name field is auto populated on the Instrument Number selected.

2.2.7.2 Price Tab

Click the **Price** tab from the screen.:

The screenshot shows a web application interface for the 'Price' tab. At the top, there is a header with 'Main' and 'Price' (the latter is highlighted in red). Below the header is a navigation bar with a 'Go' button and a '1 Of 1' indicator. The main area contains a table with the following columns: Component Name, Pricing Currency, Pricing Code, Waived, Amount, Debtor Account Currency, and Debit Amount. The table is currently empty. At the bottom of the interface, there is a footer with 'MIS | Accounting Entries' and an 'Exit' button. Below the footer, there are several fields: Maker Id, Checker ID, Authorization Status, Maker Date Stamp, and Checker Date Stamp.

You can specify the following fields:

Component Name

The system displays the name of the applicable Charge component.

Pricing Currency

The system displays the Pricing Currency of the component from the Pricing Code Maintenance.

Pricing Code

The system displays the Pricing Code of the component from the Pricing Code Maintenance.

Waived

Check this box to select the charge component to waive the associated charges.

Amount

The system displays the fixed or calculated charge amount using the Pricing Value Maintenance. You can edit this field to a non-zero value.

Debit Account Currency

The system displays the currency of the selected debit account.

Debit Amount

The system displays the debit amount.

2.2.7.3 MIS

You can maintain the MIS information for the Transaction. If the MIS details are not entered for the Transaction the same is defaulted from the product maintenance. Click the 'MIS' link to invoke the 'MIS' sub-screen.

2.2.7.4 Accounting Details

Click the Accounting Details and view the accounting entries for the transaction initiated.

By default, the following attributes of the **Accounting Entries** tab are displayed:

- Event Code
- Transaction Date
- Value Date
- Account
- Account Branch
- TRN Code
- Dr/Cr

- Amount Tag
- Account Currency
- Transaction Amount
- Netting
- Offset Account
- Offset Account Branch
- Offset TRN Code
- Offset Amount Tag
- Offset Currency
- Offset Amount
- Offset Netting
- Handoff Status

2.2.7.5 Instrument Revalidation Summary

You can search for records in the Instrument Stop Pay Summary Screen. You can invoke “Instrument Revalidation Summary” screen by typing ‘PISREVAL’ in the field at the top right corner of the Application tool bar and clicking on the adjoining arrow button..

You can search using the following parameter:

- Revalidation Reference
- Instrument Code
- Revalidation Date
- Issue Date
- Source Reference Number
- Instrument Number
- Instrument type
- Source

Once you have specified the above parameter, click ‘Search’ button. The system displays the records that match the search criteria.

Double click a record or select a record and click on ‘Details’ button to view the detailed maintenance screen.

2.2.8 Instrument Duplicate Issue Detailed

You can issue the Duplicate Instrument, using this screen. You can invoke “Instrument Duplicate Issue Detailed” screen by typing ‘PIDISDUP’ in the field at the top right corner of the Application tool bar and clicking on the adjoining arrow button..

You can specify the following fields:

Host Code

The system defaults the Host Code of transaction branch on clicking ‘New’.

Transaction Branch

The system defaults the Revalidation Branch of transaction branch on clicking ‘New’.

Source

Specify the Source from the list of values. All valid source codes for the Host are listed.

Instrument Code

Specify the Instrument Code from the list of values. All instrument codes of validation type 'Internal' are listed if Revalidation Allowed is 'Yes'.

Instrument Number

Specify the Instrument Number from the list of values.

Duplicate Issue Reference

System generates the Duplicate Issue Reference on clicking ‘New’ button.

Duplicate Issue Date

Duplicate Issue Date is defaulted as Current Date.

Source Reference Number

This is an optional field for UI input. For Channel requests this is mandatory.

Code Description

System defaults the Code Description of the Instrument Code selected.

Instrument Type

System defaults the Instrument Type of the Instrument Code selected.

2.2.8.1 Main Tab

Duplicate Issue Details

New Instrument Number

You can specify the New Instrument Number, if Instrument Number Generation is maintained as 'Manual' in Network preference for Instruments (Function ID: PIDINPRF).

If instrument number generation is 'Auto', then system defaults the instrument number.

Remarks

Specify the Remarks, if any.

Charge Account

This field is defaulted as the Charge Account on Instrument issue. You can change the Charge account if required to another account/GL. Charges are force posted.

Account Description

System defaults the Account Description of the Charge Account selected.

Populate Charges

This Field populates the charges based on the Price code maintained for revalidation in Network Preferences for the instrument. The charge is converted to Charge account currency in STANDARD mid-rate if cross currency is involved. You can modify/waive the charges.

Instrument Details

The following fields are auto populated on the Instrument Number selected:

- Issue Branch
- Issue Date
- Instrument Currency
- Instrument Amount
- Original Expiry Date

Debtor Details

Account No\ GL Code

The Account No\ GL Code field is auto populated on the Instrument Number selected.

Account No\ GL Code Description

The Account No\ GL Code Description field is auto populated on the Instrument Number selected:

Beneficiary Details

Beneficiary Name

The Beneficiary Name field is auto populated on the Instrument Number selected.

2.2.8.2 **Price Tab**

Click the **Price** tab from the screen.:

The screenshot displays a software interface for the 'Price' tab. At the top, there is a header with 'Main' and 'Price' (the latter in a red box). Below the header is a navigation bar with '1 Of 1' and a 'Go' button. The main area contains a table with the following columns: Component Name, Pricing Currency, Pricing Code, Waived, Amount, Debtor Account Currency, and Debit Amount. The table is currently empty. At the bottom of the interface, there is a 'MIS' section with several input fields: 'Maker Id', 'Checker ID', 'Authorization Status' (a dropdown menu), 'Maker Date Stamp', and 'Checker Date Stamp'. A 'Cancel' button is located in the bottom right corner of this section.

You can specify the following fields:

Component Name

The system displays the name of the applicable Charge component.

Pricing Currency

The system displays the pricing currency of the component from the Pricing Code Maintenance.

Pricing Code

The system displays the pricing code of the component from the Pricing Code Maintenance.

Waived

Check this box to select the charge component to waive the associated charges.

Amount

The system displays the fixed or calculated charge amount using the Pricing Value Maintenance. You can edit this field to a non-zero value.

Debit Account Currency

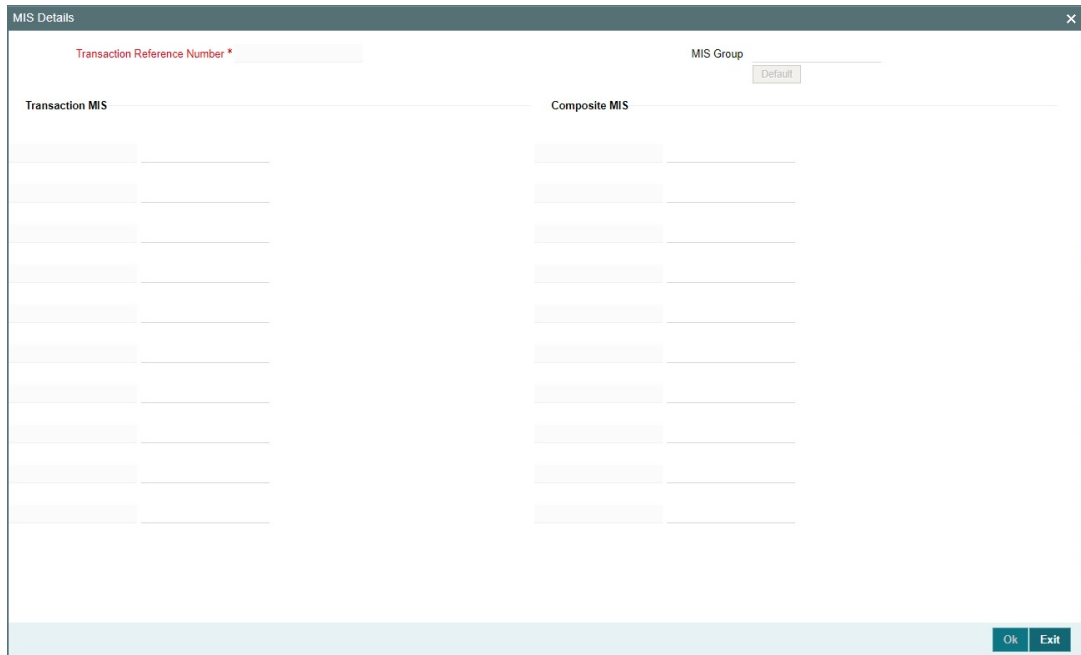

The system displays the currency of the selected debit account.

Debit Amount

The system displays the debit amount.

2.2.8.3 **MIS**

You can maintain the MIS information for the Transaction. If the MIS details are not entered for the Transaction the same is defaulted from the product maintenance. Click the 'MIS' link to invoke the 'MIS' sub-screen.

2.2.8.4 Instrument Duplicate Issue Summary

You can search for records in the Instrument Stop Pay Summary Screen. You can invoke “Instrument Duplicate Issue Summary” screen by typing ‘PISISDUP’ in the field at the top right corner of the Application tool bar and clicking on the adjoining arrow button.

You can search using the following parameter:

- Duplicate Issue Reference
- Instrument Code
- Instrument type
- New Instrument Number
- Authorization Status
- Source Reference Number
- Instrument Number
- Source

- Duplicate Issue Date

Once you have specified the above parameter, click 'Search' button. The system displays the records that match the search criteria.

Double click a record or select a record and click on 'Details' button to view the detailed maintenance screen.

2.2.9 Reversal of Instrument Payment

You can do the reversal of instrument payments, using this screen.

You can invoke "Reversal of Instrument Payment" screen by typing 'PIDREVSL' in the field at the top right corner of the Application tool bar and clicking on the adjoining arrow button..

You can specify the following fields:

Host Code

The system defaults the Host Code of transaction branch on clicking 'New'.

Transaction Branch

The system defaults the Revalidation Branch of transaction branch on clicking 'New'.

Source

Specify the Source from the list of values. All valid source codes for the Host are listed.

Instrument Code

Specify the Instrument Code from the list of values. All valid instrument codes are listed.

Instrument Number

Specify the Instrument Number from the list of values. All instrument numbers for which the payment is in 'Processed' status through Instrument payment are listed in the Reversal screen.

Reversal Reference

System generates the Revalidation Reference on clicking 'New' button.

Reversal Date

Revalidation date is defaulted as Current Date.

Source Reference

This is an optional field for UI input. For Channel requests this is mandatory.

Code Description

System defaults the Code Description of the Instrument Code selected.

Instrument Type

System defaults the Instrument Type of the Instrument Code selected.

Payment Reference

System defaults the Payment Reference of the Instrument Code selected.

Payment Date

System defaults the Payment Date of the Instrument Code selected.

Remarks

Specify the Remarks, if any.

Instrument Details

The following fields are auto populated on the Instrument Number selected:

- Issue Branch
- Issue Date
- Instrument Currency
- Instrument Amount
- Original Expiry Date

Debtor Details**Account No\ GL Code**

The Account No\ GL Code field is auto populated on the Instrument Number selected:

Account No\ GL Code Description

The Account No\ GL Code Description field is auto populated on the Instrument Number selected:

Beneficiary Details**Beneficiary Name**

The Beneficiary Name field is auto populated on the Instrument Number selected.

2.2.9.1 MIS

You can maintain the MIS information for the Transaction. If the MIS details are not entered for the Transaction the same is defaulted from the product maintenance. Click the 'MIS' link to invoke the 'MIS' sub-screen.

2.2.9.2 Accounting Details

Click the Accounting Details and view the accounting entries for the transaction initiated.

By default, the following attributes of the **Accounting Entries** tab are displayed:

- Event Code
- Transaction Date
- Value Date
- Account
- Account Branch
- TRN Code
- Dr/Cr

- Amount Tag
- Account Currency
- Transaction Amount
- Netting
- Offset Account
- Offset Account Branch
- Offset TRN Code
- Offset Amount Tag
- Offset Currency
- Offset Amount
- Offset Netting
- Handoff Status

2.2.9.3 Reversal of Instrument Payment Summary

You can search for records in the Instrument Stop Pay Summary Screen. You can invoke “Reversal of Instrument Payment Summary” screen by typing ‘PISREVSL’ in the field at the top right corner of the Application tool bar and clicking on the adjoining arrow button..

You can search using the following parameter:

- Reversal Reference
- Instrument Code
- Authorization Status
- Reversal Date
- Instrument Number
- Source
- Account Number / GL
- Transaction Branch

Once you have specified the above parameter, click ‘Search’ button. The system displays the records that match the search criteria.

Double click a record or select a record and click on ‘Details’ button to view the detailed maintenance screen.

2.2.10 Processing Remittances

It is possible to process

- Inter-Branch Remittance - within same bank
- Inter- Bank Remittance - to other Correspondent Banks / Branch
- Support for test key generation is available for outward Inter-Bank remittances. Instrument type for Outward Remittance is 'Remittance-outward' (RO)
- It is possible to register the Inward remittance details received from Correspondent banks validating the Test Keys received. The payment of such remittances is supported from the designated payable branch. Instrument Type Remittance-Inward (RI) is to be used for registration of Inward remittances.

2.2.10.1 Test Key Maintenance

You can generate a Test Key for outward Inter-Bank remittances. Test key can be maintained and validated while receiving an inward remittance for registration.

You can invoke “Test Key Maintenance” screen by typing ‘PMDTSTKY’ in the field at the top right corner of the Application tool bar and clicking on the adjoining arrow button.

The screenshot shows the 'Test Key Maintenance' application window. The window title is 'Test Key Maintenance'. It features a 'New' button and an 'Enter Query' field. The form contains several input fields: 'Host Code *', 'Instrument Code *', 'External Bank Code *', 'Test Key Parameter *', and 'Test key Sub-parameter *' (with a dropdown menu set to 'Not Applicable'). On the right side, there are dropdown menus for 'Instrument type', 'Code Description', 'Bank Name', and 'Instrument Currency'. Below the form is a 'Code Details' section with a table header showing 'Actual value *' and 'Code Value *'. The table is currently empty. At the bottom of the window, there are fields for 'Maker', 'Checker', 'Date Time', 'Mod No', 'Record Status', and 'Authorization Status', along with an 'Exit' button.

You can specify the following fields:

Host Code

The system defaults the Host Code of transaction branch on clicking 'New'.

Instrument Code

Specify the Instrument Code from the list of values. All valid instrument codes defined for the Host of instrument type 'Remittance Outward'/'Remittance Inward' are listed.

External Bank Code

All External bank codes maintained for the Instrument code are listed from Instrument External Bank Codes Maintenance.

Test Key Parameter

Specify the Test Key Parameter from the list of values. Lists following parameters:

- Amount
- Amount Range
- Currency
- Date
- Issue Branch
- Month
- Payable Branch
- Serial Number
- Year

Test key Sub-parameter

This field is defaulted to Not Applicable and will be disabled for all parameters except 'Date' and 'Amount'.

For the parameter Date the following sub-parameters are applicable:

- Not applicable
- Sunday
- Monday
- Tuesday
- Wednesday
- Thursday
- Friday
- Saturday

For the parameter Amount the sub-parameters applicable are:

- Amount Modulo 10
- Amount Modulo100

Note

Amount MOD 100 is used to resolve the code for first 2 units (Ones and Tens) of the Amount, where individual code value are maintained from 1, 2, to ... 99. From 100 onwards MOD 10 is applied.

Amount MOD 10 is used to resolve the code for first 1 units (Ones) of the Amount, where individual code value is maintained from 1, 2, to ... 9. From 10 onwards MOD 10 is applied.

Only one record is allowed for the same combination of Host, External Bank code and Parameter Amount (either Amount Modulo 10 OR Amount Modulo 100).

Code Details

Actual value

Specify the Actual Value.

Code Value

Specify the Code Value.

2.2.10.2 Test Key Summary

You can search for records in the Instrument Stop Pay Summary Screen. You can invoke “Test Key Summary” screen by typing ‘PMSTSTKY’ in the field at the top right corner of the Application tool bar and clicking on the adjoining arrow button.

The screenshot shows the 'Test Key Summary' application window. At the top, there is a search bar with options for 'Search', 'Advanced Search', 'Reset', and 'Clear All'. Below this, there are several search criteria fields: 'Authorization Status' (a dropdown menu), 'Host Code', 'Instrument Code', 'Record Status' (a dropdown menu), 'External Bank Code', and 'Test Key Parameter'. Below the search fields, there is a table with the following columns: 'Authorization Status', 'Record Status', 'Host Code', 'External Bank Code', 'Instrument Code', 'Code Description', 'Instrument type', 'Instrument Currency', 'Bank Name', 'Test Key Parameter', and 'Test key S'. The table is currently empty. At the bottom right of the window, there is an 'Exit' button.

You can search using the following parameter:

- Authorization Status
- Host Code
- Instrument Code
- Record Status
- External Bank Code
- Test Key Parameter

Once you have specified the above parameter, click 'Search' button. The system displays the records that match the search criteria. Double click a record or select a record to view the detailed maintenance screen.

2.2.10.3 Test Key Generation

The Test Key generated is sum of all the code value of the parameters maintained for the Instrument code and External Bank code (Inter-bank remittances). If no Test key maintenance is available, test key generation is skipped.

Test key generation is done upfront. The External Banks for which Test Key Maintenance is present, the Outward Remittance is not saved without the Test Key being generated.

The Test Key generation fails for Outward Remittance, if the corresponding code value of the (any) parameter is not maintained.

2.2.10.4 Test Key Validation

For a Remittance -inward registration, the Test Key received is the sum of all the code value of the parameters Maintained for the Instrument Code and External Bank code (Inter-bank remittances).If no Test key maintenance is available, test key validation is skipped.

The External Banks for which Test Key Maintenance is present for the instrument code and issuer code, the Remittance-Inward is not saved without the Test Key being validated.

The Test Key validation fails for Remittance Inward, if the corresponding code value of the (any) parameter is not maintained.

2.2.10.5 Remittance -Outward Processing

Remittance-outward instrument type is used for entering an inter-branch or inter-bank remittance.

The following are changes are applicable to the instrument issue process flow for supporting Remittance-outward:

Initial Validations

In addition to the normal instrument issue validations, the below additional validations are:

- The issuer branch and transaction branch are same.
- Payable Bank Code and Payable branch are mandatory.

Instrument number Generation

The system generates next serial number for the instrument code and populate as instrument number. The serial number starts with 1 preceded with zeroes.

Test Key Generation

System checks whether Test key maintenance is available for the Instrument Code and Payable bank code in Test Key maintenance.

If Test key maintenance is available, system generates the Test Key and populate the same for the Remittance-outward issue transaction. If the Test Key generation fails, the transaction is moved to process exception queue. You can retry or cancel the transaction from PE queue.

Accounting Changes

If the instrument type is Remittance outward, the Payable GL pick up is based on the external Bank Code maintenance PIDEXTBK. If GL is maintained in the maintenance PIDEXTBK, without account branch, then in accounting GL branch is populated as transaction branch.

2.2.10.6 Registration of Remittance -Inward

Remittance-inward instrument type is used for entering Inter-bank remittances received. A Remittance- inward record can be paid later when the beneficiary approaches the bank for payment.

The following additional steps are applicable to the instrument issue process flow for supporting Remittance-Inward:

Initial Validations

Additional mandatory validations for Remittance -Inward:

- Issuer Bank Code is defaulted based Instrument code. Issuer Branch is mandatory and should be one of the Branch maintained for issuer bank code in PIDEXTBK.
- Payable Bank Code is own bank code and Payable branch is one of valid branch codes of the Host. If the values are received in the request system validates the same. If the values are not available system defaults the own Bank code as Payable Bank Code and Branch code as transaction branch.

- Instrument Number (Serial number) is mandatory and should be unique for the instrument code derived.
- Debit account is fetched as the account/GL maintained for the issuer bank code in PIDEXTMT.

Test Key Validation

System checks whether Test key maintenance is available for the Issuer bank code and the Instrument Code in Test Key maintenance.

If Test key maintenance is available, system validates the Test Key. If the Test Key is not available or if the validation fails, the transaction is rejected.

3. Instrument Clearing

Highlights of Instrument Clearing

- Life cycle processing of instruments received for outward clearing
- Straight through processing of inward clearing record
- Processing of cheque returns

3.1 Clearing Maintenances

Clearing related maintenances helps in defining various parameters as required by the bank, for processing inbound /outbound clearing transactions.

3.1.1 Clearing Network

You can capture Network details for Instrument Clearing exclusively in this screen.

You can invoke 'Clearing Network Maintenance' screen by typing "PGDNWMNT" in the field at the top right corner of the Application tool bar and clicking on the adjoining arrow button.

The screenshot shows the 'Clearing Network Maintenance' application window. The window title is 'Clearing Network Maintenance'. The interface includes a menu bar with 'New' and 'Enter Query' options. The main area contains several input fields: 'Clearing Network Code *', 'Clearing Network Description', 'Host Code *', 'Payment Type', 'Default Clearing Branch *', 'Routing Mask', 'Time Zone Offset', 'Dispatch Days', 'Return Days', and 'IBAN Validation Required' (with a dropdown menu set to 'Yes'). Below these are two sections for time: 'Network Cutoff Time' (with 'Hour' and 'Minute' fields) and 'Return Cut off Time' (with 'Return Cut off Hour' and 'Return Cut off Minute' fields). At the bottom, there are fields for 'Maker', 'Checker', 'Date Time', 'Mod No', 'Record Status', and 'Authorization Status'. 'Ok' and 'Exit' buttons are located in the bottom right corner.

You can specify the following fields:

Clearing Network Code

Clearing Network Code can be captured in this field. For each clearing servicing centre of the bank, a different network needs to be maintained.

Clearing Network Description

Network Code description can be maintained in this field.

Host Code

Host code is defaulted based on user's logged in branch.

Payment Type

The networks created using this screen will have default Payment type as 'Clearing'

Default Clearing Branch

Specify the Default Clearing Branch from the list of values.

Routing Mask

Routing mask applicable for the network can be captured in this field.

Time Zone Offset

Time zone is defaulted based on the host.

Dispatch Days

This denotes the number of working days before clearing value date, the clearing record has to be generated and dispatched to the Network. Both branch & Network holidays will be considered to find the dispatch date.

Return Days

This denotes the number of working days after clearing value date, the return transactions to be dispatched to Network for an incoming clearing. For an Outbound clearing, the return transaction details should be received within the number of network working days after clearing value date.

IBAN Validation Required

This flag can be checked if IBAN validation is required for Credit/Debit accounts and banks identifiers.

Network Cutoff Time**Hour**

Clearing Network cutoff time can be maintained. Specify the hour in HH format that is lesser than 24.

Minute

Clearing Network cutoff time can be maintained. Specify the hour in MM format that is lesser than 60.

Return Cutoff Time**Return Cut off Hour**

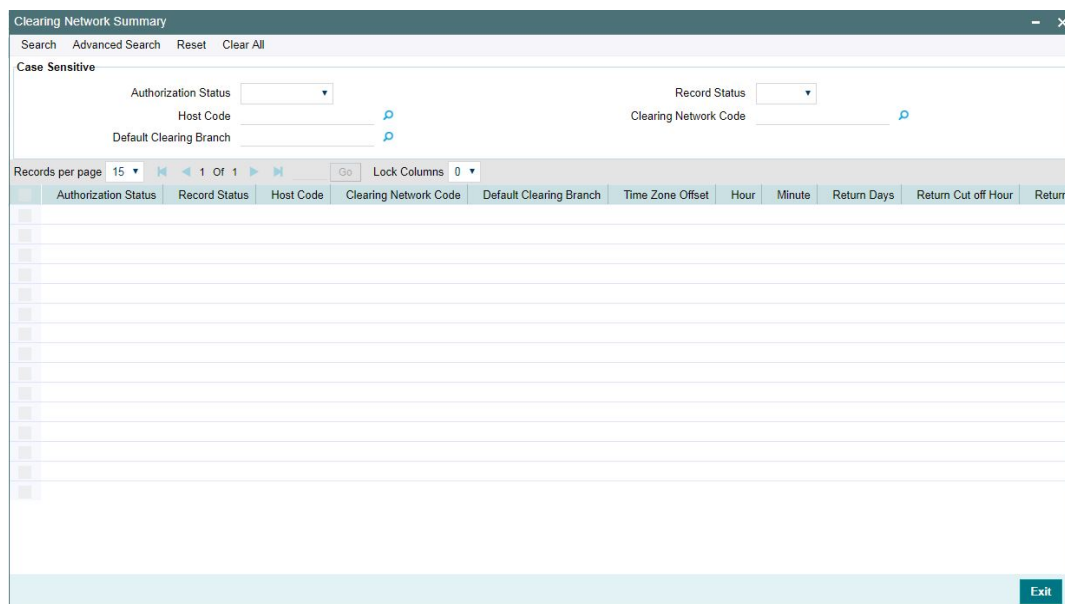

Cutoff time for return transactions in hours can be maintained, if applicable.

Return Cut off Minute

Return cutoff time in minutes can be maintained, if applicable.

3.1.1.1 Clearing Network Summary

You can search for records in the Clearing Network Summary Screen. You can invoke 'Clearing Network Summary' screen by typing "PGSNWMNT" in the field at the top right corner of the Application tool bar and clicking on the adjoining arrow button..

You can search using one or more of the following parameters:

- Authorization Status
- Record Status
- Host Code
- Clearing Network Code
- Default Clearing Branch

Once you have specified the search parameters, click 'Search' button. The system displays the records that match the search criteria.

Double click a record to view the detailed maintenance screen.

3.1.2 Clearing Bank Directory

You can capture the Bank codes and related Branch codes for a Clearing Network in this screen.

The Routing details for every branch of a bank which is participating in the clearing needs to be captured in this screen.

You can invoke 'Clearing Bank Directory Detailed' screen by typing 'PGDBANKD' in the field at the top right corner of the Application tool bar and clicking on the adjoining arrow button.

The screenshot shows the 'Clearing Bank Directory Detailed' application window. It has a search bar at the top with 'New' and 'Enter Query' options. Below the search bar are input fields for 'Clearing Network *', 'Host Code *', 'Bank Code *', and 'Bank Name'. To the right are fields for 'Network Description' and 'Network Type Description'. A 'Clearing Participation' section contains a table with columns: Branch Code, Branch Description, Sector Code, Routing Number, Customer Float Days, and Bank Float Days. The table shows 1 of 1 records. At the bottom, there are fields for 'Maker', 'Date Time', 'Mod No', 'Record Status', 'Checker', 'Date Time', and 'Authorization Status', along with an 'Exit' button.

You can specify the following fields:

Clearing Network

Specify the Clearing Network Code from the list of values of valid clearing networks available for the Host.

Host Code

The system specifies the host code of the logged in user.

Bank Code

Specify the bank code.

Bank Name

Specify the name of the bank

Network Code Description

System defaults the Description on the Clearing Network selected.

Network Type Description

System defaults the Network Type Description on the Clearing Network selected.

Clearing Participation

Branch Code

Specify every bank's Branch, with which clearing transaction needs to be settled.

Branch Description

Specify the description of the branch.

Sector Code

Specify the Sector Code from the list of values.

Routing Number

Specify the Routing Number. This field is Alphanumeric. The length of the mask is validated with the Routing mask maintained in Clearing Network Maintenance.

Customer Float Days

Specify the Customer Float Days. Upto 2 digits are allowed.

Bank Float Days

Specify the Bank Float Days. Upto 2 digits are allowed.

3.1.2.1 Clearing Bank Directory Summary

You can invoke 'Clearing Bank Directory Summary' screen by typing 'PGSBANKD' in the field at the top right corner of the Application tool bar and clicking on the adjoining arrow button..

The screenshot shows a web application window titled "Clearing Bank Directory Summary". At the top, there is a search bar with buttons for "Search", "Advanced Search", "Reset", and "Clear All". Below the search bar, there are several input fields: "Case Sensitive" (checkbox), "Authorization Status" (dropdown), "Clearing Network" (text field), "Record Status" (dropdown), and "Bank Code" (text field). Below these fields is a table with columns: "Authorization Status", "Record Status", "Clearing Network", "Bank Code", "Bank Name", and "Host Code". The table is currently empty. At the bottom right of the window, there is an "Exit" button.

You can search using one or more of the following parameters:

- Authorization Status
- Record Status
- Clearing Network
- Bank Code

Once you have specified the search parameters, click 'Search' button. The system displays the records that match the search criteria.

Double click a record to view the detailed maintenance screen.

3.1.3 Clearing Branch

- You can capture the following details for each branch of the Bank:
 - Clearing Branch Code
 - Routing Number
- Branches under the same host will only be allowed to be mapped as a clearing branch.

You can invoke 'Clearing Branch Detailed' screen by typing 'PGDBRANH' in the field at the top right corner of the Application tool bar and clicking on the adjoining arrow button.

The screenshot shows a web-based application window titled "Clearing Branch Detailed". At the top, there is a menu bar with "New" and "Enter Query" options. Below the menu bar, there are four input fields with red asterisks indicating they are required: "Host Code*", "Branch Code*", "Clearing Branch*", and "Routing Number". The bottom of the window has a status bar with several fields: "Maker", "Checker", "Date Time:", "Mod No", "Record Status", and "Authorization Status". An "Exit" button is located in the bottom right corner of the status bar.

You can specify the following fields:

Host Code

The system indicates the Host Code of transaction branch on clicking 'New'.

Branch Code

The system displays the logged in Branch Code by default when you click **New** button.

Clearing Branch

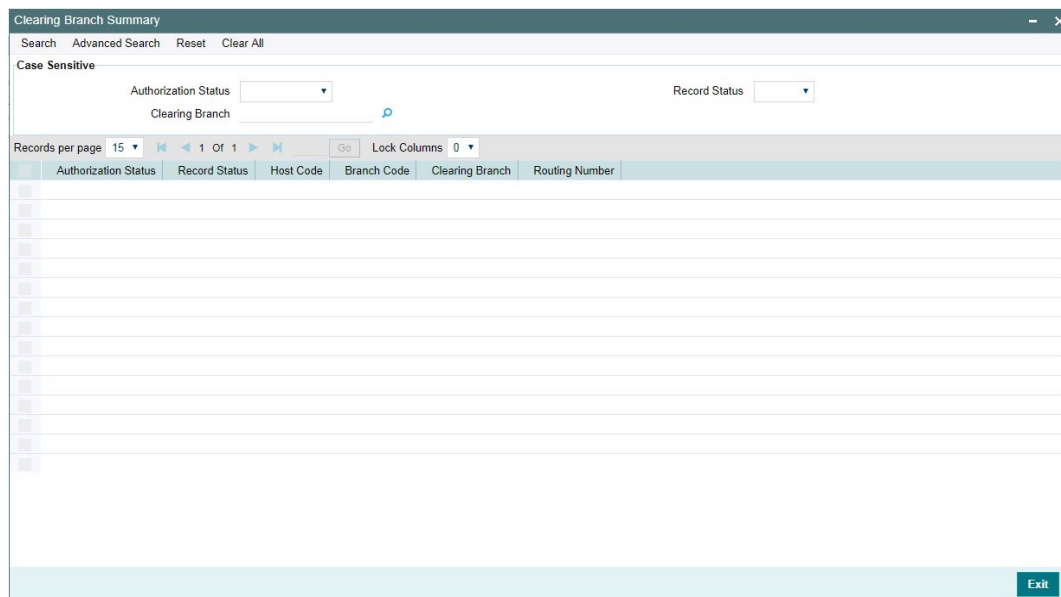

All valid Branch Codes for the Host are listed.

Routing Number

Specify the Routing Number. The length of the mask is validated with the Routing mask maintained in Clearing Network Maintenance.

3.1.3.1 Clearing Branch Summary

You can search for records in the Clearing Branch summary Screen. You can invoke 'Clearing Branch Summary' screen by typing 'PGSBRANH' in the field at the top right corner of the Application tool bar and clicking on the adjoining arrow button.

You can search using one or more of the following parameters:

- Authorization Status
- Record Status
- Clearing branch

Once you have specified the search parameters, click 'Search' button. The system displays the records that match the search criteria.

Double click a record to view the detailed maintenance screen.

3.1.4 Clearing Network Currency Preference

You can capture Clearing Network Currency Preference. For a combination of Network, direction, Clearing currency & Instrument code clearing preferences can be maintained in this screen.

You can invoke 'Network Currency Preference' screen by typing 'PGDNCYPR' in the field at the top right corner of the Application tool bar and clicking on the adjoining arrow button.

You can specify the following fields:

Clearing Network Code

You can select the Clearing Network for which preferences are to be maintained. All valid clearing network codes maintained for the Host will be listed.

Network Description

Network description is defaulted based on the Network selected.

Host Code

This field is defaulted with the Host Code linked to user's logged in branch.

Transaction Type

Transaction type can be Incoming or outgoing. Select any one.

Transaction currency

You can select the currency for which clearing preferences are to be maintained.

Common Preferences

Min Transaction Limit Amount

Minimum instrument amount allowed for the clearing Network is maintained in this field.

Max Transaction Limit Amount

Maximum limit of instrument amount allowed for the clearing Network is maintained.

Bank Float Days

You can maintain the Bank settlement days for the clearing. Working days is counted considering the Network holidays. Clearing settlement date will be Clearing date + Bank float days.

Customer Float Days

Clearing float days for clearing settlement will be maintained in this field. Working days is counted considering the Network holidays. Clearing value date will be Activation date + Bank float days

Accounting Details

Debit Liquidation Code

Specify the Accounting code for Debit Liquidation from the list of values.

Credit Liquidation Code

Specify the Accounting code for Credit Liquidation from the list of values.

Return Accounting Details

Debit Liquidation Code

Specify the Accounting code for Debit Liquidation from the list of values.

Credit Liquidation Code

Specify the Accounting code for Credit Liquidation from the list of values.

Return GL

Specify the Return GL from the list of values. This field is used for return accounting of Inward clearing, when auto /manual return is processed from Exception Queues.

If Return GL is maintained, original transaction entries are posted to Return GL and then reversed. If Return GL is not maintained, no accounting is posted on return processing from exception queues.

Pricing Details

Pricing Code

If pricing required flag is checked, then maintaining pricing code is mandatory. Pricing codes specific to clearing is listed here.

Pricing Required

Check this box to indicate that charge/tax application is required for a clearing return transaction.

Return Pricing Details

Return Pricing Code

Specify the Return Pricing Code from the list of values. If 'Return Pricing required' flag is checked, then maintaining Return pricing code is mandatory

Return Pricing Required

Check this box to maintain Return Pricing Code for a clearing return transaction.

FX Preferences

FX Rate Type

Specify the FX Rate Type from the list of values.

Rate Override Variance

Specify the Override Variance.

Small FX Limit Currency

Specify the Small FX Limit Currency from the list of values.

Small FX Limit Amount

Specify the Small FX Limit Amount.

External Exchange Rate Applicable

Check this box, if External Exchange Rate is applicable.

Instrument Details

Instrument Code

Specify the Instrument Code from the list of values.

3.1.4.1 Clearing Network Currency Preferences Summary

You can invoke 'Clearing Network Currency Preferences Summary' screen by typing 'PGSNKYPR' in the field at the top right corner of the Application tool bar and clicking on the adjoining arrow button..

The screenshot shows a web application window titled "Clearing Network Currency Preferences Summary". At the top, there is a search bar containing the text "PGSNKYPR" and a magnifying glass icon. To the right of the search bar are buttons for "Search", "Advanced Search", "Reset", and "Clear All". Below the search bar, there are several filter fields: "Case Sensitive", "Authorization Status", "Clearing Network Code", "Transaction currency", "Record Status", and "Transaction Type". Below these filters is a table with the following columns: "Authorization Status", "Record Status", "Clearing Network Code", "Host Code", "Transaction Type", "Transaction currency", "Debit Liquidation Code", "Credit Liquidation Code", and "Min Transaction". The table is currently empty. At the bottom right of the window, there is an "Exit" button.

You can search using one or more of the following parameters:

- Authorization Status
- Record Status
- Clearing Code Network
- Transaction Type
- Transaction Currency

Once you have specified the search parameters, click 'Search' button. The system displays the records that match the search criteria.

Double click a record or select a record and click on 'Details' button to view the detailed maintenance screen.

3.1.5 Customer Clearing Float Days Maintenance

You can maintain float days for Customer

You can invoke 'Customer Clearing Float Days Maintenance' screen by typing 'PGDFTCST' in the field at the top right corner of the Application tool bar and clicking on the adjoining arrow button.

3.1.7 Sector level Clearing Float Days Maintenance

You can maintain float days for Sector Code

You can invoke 'Sector level Clearing Float Days Maintenance' screen by typing 'PGDFTSEC' in the field at the top right corner of the Application tool bar and clicking on the adjoining arrow button.

The screenshot shows a web-based application window titled "Sector level Clearing Float Days Maintenance". The window has a standard header with "New" and "Enter Query" options. The main content area is divided into two columns of input fields. The left column contains: "Host Code *", "Clearing Network Code *", "Clearing Branch *", "Sector Code *", "Customer Float Days *", and "Bank Float Days *". The right column contains: "Host Code Description", "Network Code Description", and "Sector Code Description". At the bottom of the window, there is a status bar with fields for "Maker", "Checker", "Date Time", "Mod No", "Record Status", and "Authorization Status", and an "Exit" button.

You can specify the following fields:

Host Code

This field is defaulted with the Host Code linked to user's logged in branch.

Host Code Description

Network description is defaulted based on the Network selected.

Clearing Network Code

Specify the Clearing Network from the list of values. All valid clearing Network codes as defined in PGDNWMNT are listed.

Clearing Branch

Based on the Clearing Network selected, the Clearing Branch of the Network is defaulted.

Sector Code

Specify the Sector Code from the list of values. All valid sector codes are listed.

Sector Code Description

Sector Code description is defaulted based on the Sector Code selected.

Customer Service Model

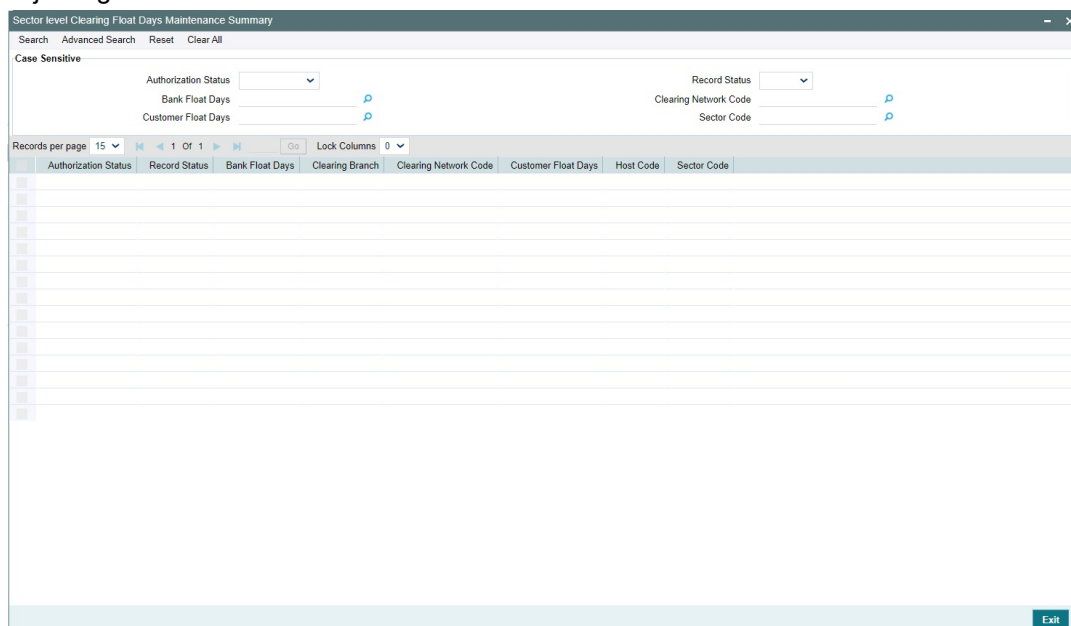

Specify the Customer No from the list of values. All valid CSMs are listed.

Bank Float Days

Specify the Bank Float Days. Number upto 2 digits are allowed.

3.1.7.1 Sector level Clearing Float Days Maintenance Summary

You can invoke 'Sector level Clearing Float Days Maintenance Summary' screen by typing 'PGSFTSEC' in the field at the top right corner of the Application tool bar and clicking on the adjoining arrow button.

You can search using one or more of the following parameters:

- Authorization Status
- Record Status
- Host Code
- Bank Float Days
- Clearing Network Code
- Customer Float Days
- Sector Code

Once you have specified the search parameters, click 'Search' button. The system displays the records that match the search criteria.

Double click a record or select a record and click on 'Details' button to view the detailed maintenance screen.

3.2 Clearing Transactions

Bulk and single inbound/outbound clearing and return of inbound clearing can be done through the Clearing transaction screens.

3.2.1 Outbound Clearing

Outbound Clearing screen allows you to book a Transaction by capturing details of the outgoing clearing instrument.

You can invoke 'Outbound Clearing Transaction Input' by typing 'PGDOTONL' in the field at the top right corner of the Application tool bar and clicking on the adjoining arrow button.

You can specify the following fields:

Transaction Branch

The system displays the logged in user's logged in Branch code.

Host Code

The system displays the logged in host code.

Source Code

The displays the source code as MANL.

Network Code

Specify the network code. Alternatively you can select the network code from the option list. The list displays all valid clearing networks maintained for the Host.

If only once Network is available, that network will be auto populated on initiating New action

Credit to GL

You can select the value between Yes or No. If Credit to GL is Yes, Credit account can be a valid GL. In other cases, system defaults Credit account as the default GL maintained in Source code maintenance while doing the accounting posting.

Transaction Reference Number

The system displays the auto-generated Transaction reference number.

User Reference

The system defaults the User number here. You can modify if required.

Source Reference Number

Source Reference Number is disabled for Clearing transaction through UI. For Gateway, this field is enabled and user can specify the number.

Image Reference Number

The image reference for the image is specified here.

Image Reference Number is disabled for Clearing transaction through UI. For Gateway, this field is enabled and user can specify the number.

3.2.1.1 Main Tab

The screenshot displays a software interface with a top navigation bar containing 'Main' and 'Pricing'. Below this, the interface is divided into four main sections: 'Credit Details', 'Instrument Details', 'Drawer Details', and 'Processing Details'. 'Credit Details' includes fields for Creditor Account Number, Account IBAN, Account Currency, Account Branch, Account/GL Name, Credit Amount, Customer Number, and Customer Service Model. 'Instrument Details' includes Instrument Date, Instrument Code, Instrument Number, Instrument Currency, and Instrument Amount, with an 'Enrich' button below. 'Drawer Details' includes Drawer Account, Account IBAN, Drawer Name, Bank Routing Number, Bank Name, Branch Name, and Remarks. 'Processing Details' includes Booking Date, Clearing Value Date, Credit Value Date, Debit Value Date, Dispatch Date, Return by Date, Clearing Branch, Routing Number, Exchange Rate, and FX Reference Number. At the bottom, there is a status bar with 'UDF | MIS', 'Maker Id' and 'Date Time', 'Checker Id' and 'Date Time', 'Authorization Status', and an 'Exit' button.

You can specify the following details here:

Credit Details

Creditor Account Number

Specify the Account number. Alternatively, you can select the account number from the option list. The list displays all the valid account numbers maintained in the system.

Account IBAN

The system displays the account IBAN based on the account selected.

Account Currency

The system displays the account currency based on the account selected.

Account Branch

The system displays the account branch based on the account selected.

Account/GL Name

The system displays the account name based on the account selected.

Credit Amount

System populates the credit amount based on the instrument account specified.

Customer Number

The system displays the customer number based on the account selected.

Customer Service Model

The system displays the customer service model applicable to the customer like Gold, Platinum, Elite etc.

Drawer Details

Drawer Account

Specify the drawer account number.

Account IBAN

Specify the account IBAN.

Drawer Name

Specify the name of the drawer.

Note

Drawer details are optional fields.

Bank Routing Number

Specify the routing number of the bank on which the instrument is drawn. Alternatively, you can select the routing number from the option list. The list displays all the all bank branches participating in the same clearing network.

Bank Name

The system displays the bank name based on the routing number selected.

Branch Name

The system displays the branch name based on the routing number selected.

Remarks

This is a free text field. Any internal remarks related to the clearing transaction can be entered in this field.

Instrument Details

Instrument Date

Select the Instrument date. Current date and Future date is accepted as Instrument Date.

Instrument Code

Specify the instrument code. Alternatively, you can select the instrument code from the option list. The list displays all the all valid instrument codes for the host.

Instrument Number

Specify the instrument number.

Instrument Currency

The system displays the instrument currency based on the instrument selected.

Instrument Amount

Specify the instrument amount.

Processing Dates

Booking Date

The system displays the current date as booking date and cannot be edited.

Clearing Value Date

The system defaults the clearing same as the instruction date if its a working day for the branch and network. In case of a holiday, this will be moved to the next working day.

Credit Value Date

The system calculates the credit value date as below:

Clearing Date + Credit float days

Working days based on Network holidays maintained will be considered

Debit value date

The system calculates the debit value date as below:

Clearing Date + Bank Float Days

Working days based on Network holidays maintained will be considered. This is the settlement date for clearing.

Dispatch Date

The system calculates the dispatch date as below:

Clearing date – Dispatch days

Working days based on Network holidays maintained will be considered. If dispatch date arrived at by system is a back date, then it will be set as current date and clearing date will be moved forward.

Return by Date

The system calculates the return by date as below:

Clearing Date + Return days based on Network Working Days

Clearing Branch

The system defaults the clearing branch to which the transaction branch is linked based on the clearing branch linkage available.

Routing Number

The system displays the routing number based on the clearing branch selected.

Exchange Rate

Specify the exchange rate if credit account currency is different from the transfer currency. The system retains the input value and validates the same against override and stop variances maintained in the Network preference.

If exchange rate is not specified, then the system populates the exchange rate on enrich or save, if the transfer amount is less than small FX limit maintained. If transfer amount is more than small FX limit and, if external exchange rate is applicable, then rate pick up will happen during transaction processing.

FX Reference Number

Specify the foreign exchange reference

3.2.1.2 Pricing Tab

You can view the charge amount computed by the system for each of the Pricing components of the Pricing code linked to the network code of the transaction. Click the “Pricing” tab.

The screenshot shows the 'Outward Clearing' application window. The 'Pricing' tab is selected. The window contains several input fields for search criteria: Transaction Branch *, Host Code *, Source Code *, Network Code, Transaction reference no *, and User Reference. Below the input fields is a table with the following columns: Component Name, Pricing Currency, Amount, Waived, Debit Currency, and Debit Amount. The table shows '1 Of 1' records. At the bottom of the window, there are fields for Maker ID, Date Time, Checker ID, Date Time, Authorization Status, and an Exit button.

Specify the following details:

Component Name

The system displays each Pricing component of the Pricing code from the Pricing Code maintenance.

Pricing Currency

The system displays the Pricing currency of each Pricing component of the Pricing code.

Amount

The system displays the calculated Charge amount for each Pricing component of the Pricing code.

Waived

The system displays if charges for any Pricing component are waived in the Pricing maintenance.

Debit Currency

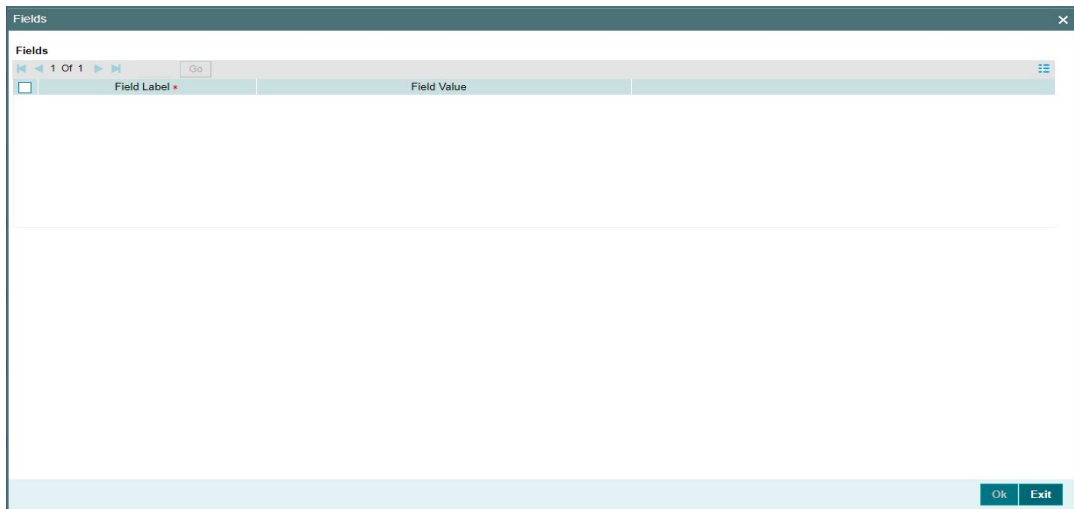

The system displays the currency of the Charge account to be debited for the charges.

Debit Amount

The system displays the amount for each Pricing component debited to the charge account in Debit currency. If the Pricing currency is different from the Debit currency the calculated charges are converted to the Debit currency and populated in this field.

3.2.1.3 **UDF Tab**

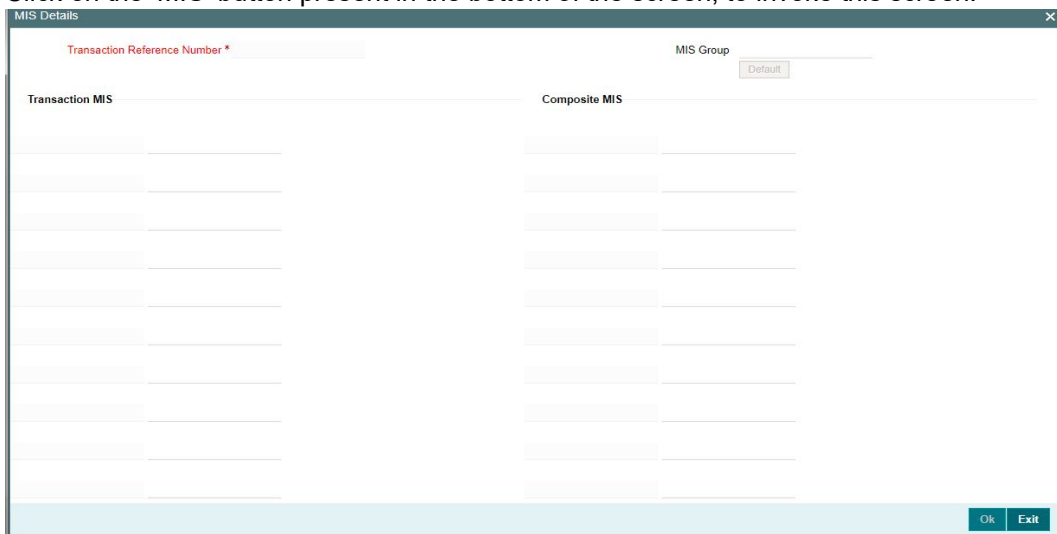

Click on the 'UDF' button present in the bottom of the screen to invoke this screen.

You can specify user defined fields for each transaction.

3.2.1.4 **MIS Tab**

Click on the 'MIS' button present in the bottom of the screen, to invoke this screen.

You can specify the MIS details in this sub-screen.

Saving of Clearing transaction

On saving the transaction from UI initial validations are executed

- Referential checks
- Network limits , Network allowed currencies
- Instrument date checks (stale period/future date)
- Account Validity check
- Holiday checks
- Error message is displayed, in case of invalid details.

When the transaction is received through channels, it goes as auto authorized. On authorization of an Outgoing Clearing transaction, the following steps clearing process flow:

- Initial validations
 - Account/Bank re-direction
 - Referential checks
 - Network limits , Network allowed currencies
 - Instrument date checks (stale period/future date)
 - Account Validity check
 - Holiday checks
- Duplicate check
- Sanction Check
- Charge computation
- Exchange rate processing
- EAC & Accounting –On clearing date

3.2.1.5 Outbound Clearing Transaction Summary

You can search for outbound clearing transactions in the summary screen. You can invoke 'Outbound Clearing Transaction Summary' screen by typing 'PGSOTONL' in the field at the top right corner of the Application tool bar and clicking on the adjoining arrow button.

Transaction Reference Number	Booking Date	Transaction Status	Queue Code	Network Code	Instrument Currency	Creditor Account Number	Instrument Number	CRLQ Status
------------------------------	--------------	--------------------	------------	--------------	---------------------	-------------------------	-------------------	-------------

You can search using one or more of the following parameters:

- Transaction Reference Number
- Transaction Status
- Network Code
- Instrument Currency
- Credit Account Number
- Instrument Number
- Authorization Status

- Account IBAN
- Instrument Issue Date
- Transaction Value Date

Once you have specified the search parameters, click 'Search' button. The system displays the records that match the search criteria.

Double click a record or select a record and click on 'Details' button to view the detailed maintenance screen.

3.2.2 Outbound Clearing View

You can view the complete outbound Clearing transaction details in this screen

You can invoke 'Outbound Clearing View' screen by typing 'PGDOVIEW' in the field at the top right corner of the Application tool bar and clicking on the adjoining arrow button

- From this screen, click Enter Query. The Transaction Reference field gets enabled which opens an LOV screen.
- Click the Fetch button and select the required value.
- All details of the transaction, including the accounting entry posted / reversed, its dispatch status & return status can be viewed on this screen
- Along with the transaction details in the Main and Pricing tabs user can also view the Status details for the following:
 - External System Status
 - Transaction Status
- Click Execute Query to populate the details of the transaction in the Outbound Clearing View screen.

For more details on Main, Pricing tabs refer to 'PGDOTONL' screen details above.

3.2.2.1 **Accounting Tab**

Click the Accounting tab and view the accounting entries for the transaction initiated.

Event Code	Transaction Date	Value Date	Transaction Account	Transaction Account Branch	Transaction Code	Dr/Cr	Amount
------------	------------------	------------	---------------------	----------------------------	------------------	-------	--------

By default, the following attributes of the **Accounting Entries** tab are displayed:

- Event Code
- Transaction Date
- Value Date
- Transaction Account
- Transaction Account Branch
- Transaction Code
- Dr/Cr
- Amount Tag
- Transaction Currency
- Transaction Amount
- Netting
- Offset Account
- Offset Account Branch
- Offset Transaction Code
- Offset Amount Tag
- Offset Currency
- Offset Amount
- Offset Netting

For an outbound clearing transaction, following entries are posted, upon successful liquidation: Dr. Customer Account/Instrument Payable GL and Cr. Intermediary Clearing Suspense GL.

On credit value date, - Dr. Intermediary Clearing Suspense GI and Cr. Customer Account.

For all the transactions, the entry date is marked as Clearing Date and Value date is marked as Debit Value Date and Credit Value Date for respective Dr/Cr liquidations

3.2.2.2 **Exception Tab**

Click the Exception tab and view the Return details, if any for the transaction initiated.

UDF | MIS | View Queue Action

- External Reference Number

User can view the request sent and the corresponding response received for each row in Queue Action Log.

Also user can view the request sent to and the response received from external systems for the following:

- Sanction screening
- External credit approval
- External Account Check
- External FX fetch
- External price fetch
- Accounting system

3.2.2.6 Outbound Clearing View Summary

You can invoke the 'Outbound Clearing View Summary' screen by typing 'PGSOVIEW' in the field at the top right corner of the application toolbar and clicking the adjoining arrow button.

You can search using one or more of the following parameters:

- Transaction Reference Number
- Instrument Issue Date
- Transaction Value Date
- Booking Date
- Network Code
- Instrument Currency

- Credit Account Number
- Instrument Number
- Instrument Amount
- Authorization Status
- Account IBAN
- Batch Reference Number

Once you have specified the search parameters, click 'Search' button. The system displays the records that match the search criteria.

Double click a record or select a record and click on 'Details' button to view the detailed maintenance screen.

3.2.3 Outbound Bulk Clearing

An outward bulk input screen is provided for capturing the outward clearing cheque details which are to be credited to same account. User can enter details of multiple outgoing clearing details for the same customer account provided.

You can invoke 'Outward Bulk Clearing Transaction Input' Screen by typing 'PGDOBULK' in the field at the top right corner of the Application tool bar and clicking on the adjoining arrow button

You can specify the following details:

Host Code

The system displays the logged in user's host code.

Transaction Branch

The system displays the logged in user's Branch code.

Network Code

Select a Network Code from the list of values. All valid codes are displayed in the list.

Batch Reference Number

The system displays the auto-generated Batch reference number.

Credit Details

Account Number

Specify the Account number. Alternatively, you can select the account number from the option list. The list displays all the valid account numbers maintained in the system.

Account Description

The system displays the account description based on the account selected.

Account IBAN

The system displays the account IBAN based on the account selected.

Customer Number

The system displays the customer number based on the account selected.

Customer Service Model

The system displays the customer service model applicable to the customer like Gold, Platinum, Elite etc.

Booking Date

Select the booking date. Both current date and future date is accepted.

Account Currency

The system displays the account currency based on the account selected.

Account Branch

The system displays the account branch based on the account selected.

Total Credit Amount

System populates the total credit amount on adding new rows in Outward clearing details.

Routing Number

Specify the Routing number. Alternatively, you can select the routing number from the option list.

Outward Clearing Details

Drawer Account

Specify the Drawer/debtor account here.

Drawer Name

Drawer/Debtor name of the account is specified.

Bank Routing Number

Select the Banking Routing Number from the list of values.

Bank Name

Drawer's Bank Name based on the routing number available as part of transaction is displayed

Branch Name

Drawer's Bank Branch Name based on the routing number available as part of transaction is displayed.

Instrument Code

Select the Instrument Code from the list of values.

Instrument Number

Specify the Instrument number.

Instrument Amount

Specify the instrument amount.

Instrument Currency

Select the Instrument currency from the list of values.

Instrument Date

Select the Instrument date.

External Reference

Specify the External reference here

Transaction Reference Number

Specify the Transaction Reference number.

3.2.3.1 UDF Tab

You can invoke this screen by clicking 'UDF' tab in the screen.

3.2.3.2 MIS Tab

You can invoke this screen by clicking 'MIS' tab in the screen.

3.2.3.3 Outbound Bulk Clearing Transaction Summary

You can search for outbound bulk clearing transactions in this screen. You can invoke 'Outbound Bulk Clearing Transaction Summary' screen by typing 'PGSOBULK' in the field at the top right corner of the Application tool bar and clicking on the adjoining arrow button.

3.2.5 Outbound Clearing Transaction Float Extension

You can invoke 'Outbound Clearing Transaction Float Extension' screen by typing 'PGDFLTXN' in the field at the top right corner of the Application tool bar and clicking on the adjoining arrow button.

You can specify the following fields:

Host Code

Host code is defaulted based on user's logged in branch.

Clearing Transaction Reference

Specify the Clearing Transaction Reference from the list of values. Lists outward clearing transactions in 'Processed' status.

Clearing Value Date

Based on the Clearing Transaction Reference selected, Clearing Value Date is defaulted.

Float Extension (In Days)

Specify the Float Days. Number upto 2 digits are allowed.

Populate Value Dates

It is mandatory to populate the value dates based on the Float extension maintained. Once the Value dates are populated, Float extension field becomes disabled.

New Credit Value Date

New credit value date is derived by adding the float extension days counted as Network working day to the existing dates.

New Debit Value Date

New Debit value date is derived by adding the float extension days counted as Network working day to the existing dates.

Extension Reference

Extension Reference is defaulted based on user's logged in branch.

Extension Done on

Extension Done On Date is defaulted to current date.

Customer Account

Based on the Clearing Transaction Reference selected, Customer Account is defaulted.

Account Description

Based on the Clearing Transaction Reference selected, Account Description is defaulted.

Instrument Number

Based on the Clearing Transaction Reference selected, Instrument Number is defaulted.

Instrument Currency

Based on the Clearing Transaction Reference selected, Instrument Currency is defaulted.

Instrument Amount

Based on the Clearing Transaction Reference selected, Instrument Amount is defaulted.

Debtor Bank Routing Number

Based on the Clearing Transaction Reference selected, Debtor Bank Routing Number is defaulted.

Bank Name

Based on the Clearing Transaction Reference selected, Bank Name is defaulted.

3.2.5.1 Outbound Clearing Transaction Float Extension Summary

You can invoke 'Outbound Clearing Transaction Float Extension Summary' screen by typing 'PGSFLTXN' in the field at the top right corner of the Application tool bar and clicking on the adjoining arrow button..

The screenshot displays the 'Outbound Clearing Transaction Float Extension Summary' application window. At the top, there is a search bar with the text 'Case Sensitive' and buttons for 'Search', 'Advanced Search', 'Reset', and 'Clear All'. Below the search bar, there are several input fields: 'Clearing Transaction Reference', 'Extension Done on', 'Host Code', 'Extension Reference', 'Clearing Value Date', and 'Authorization Status'. Each input field has a small blue arrow icon to its right. Below the input fields, there is a table with the following columns: 'Clearing Transaction Reference', 'Extension Reference', 'Extension Done on', 'Clearing Value Date', 'Host Code', 'Authorization Status', 'Account No', 'Customer Account Description', 'Debtor Bank Routing Number', and 'Instrument Numit'. The table is currently empty. At the bottom right of the window, there is an 'Exit' button.

You can search using one or more of the following parameters:

- Clearing Transaction Reference
- Extension Done on
- Host Code
- Extension Reference
- Clearing Value Date
- Authorization Status

Once you have specified the search parameters, click 'Search' button. The system displays the records that match the search criteria. Double click a record to view the detailed maintenance screen.

3.2.5.2 Float Extension Value Date Derivation & Accounting

New credit value date and Debit value date are derived by adding the float extension days counted as Network working day to the existing dates.

For example, existing credit Value Date is 1st Dec 2021 and float extension is 1 and 2nd Dec 2021 is a Holiday.

New Credit Value Date derived will be 3rd Dec 2021.

- The original accounting entries are reversed with negative amounts and new accounting is posted with the same transaction Reference & extended Debit Value Date and Credit Value Date.

3.2.6 Inbound Clearing

Inward Clearing screen allows you to book an inward Clearing Transaction by capturing details of the inward clearing instrument.

You can invoke 'Inward Clearing Transaction Input' Screen by typing 'PGDITONL' in the field at the top right corner of the Application tool bar and clicking on the adjoining arrow button

The screenshot displays the 'Inbound Clearing Transaction Input' application window. The interface includes a top navigation bar with 'New' and 'Enter Query' options. The main content area is organized into several sections:

- Transaction Branch:** Fields for Host Code*, Source Code*, and Network Code*.
- Transaction Reference Number:** Fields for File Reference Number, Source Reference Number, User Reference Number, and Image Reference Number.
- Main Pricing:** A sub-section containing:
 - Debit Details:** Fields for Debit Account Number, Account IBAN, Account Currency, Account Branch, Account/GL Name, Debit Amount, Customer Number, and Customer Service Model.
 - Instrument Details:** Fields for Instrument Date* (YYYY-MM-DD), Instrument Code*, Instrument Number*, Instrument Currency*, and Instrument Amount*, with an 'Enrich' button.
 - Beneficiary Details:** Fields for Account Number, Account IBAN, Account Name, Bank Routing Number*, Bank Name, Branch Name, and Remarks.
 - Processing Details:** Fields for Booking Date (YYYY-MM-DD), Clearing Date (YYYY-MM-DD), Debit Value Date (YYYY-MM-DD), Credit Value Date (YYYY-MM-DD), Return by Date (YYYY-MM-DD), Clearing Branch, and Routing Number.

The bottom status bar includes fields for Maker ID, Checker ID, Date Time, and Authorization Status, along with an 'Exit' button.

You can specify the following fields:

Transaction Branch

The system displays the logged in user's Branch code.

Host Code

The system displays the logged in user's host code.

Source Code

The displays the source code as MANL.

Network Code

Specify the network code. Alternatively you can select the network code from the option list. The list displays all valid clearing networks maintained for the Host.

If only once Network is available, that network will be auto populated on initiating New action

Transaction Reference Number

The system displays the auto-generated Transaction reference number.

Source Reference Number

Source Reference Number is disabled for Clearing transaction through UI. For Gateway, this field is enabled and user can specify the number.

User Reference

The system defaults the User number. You can modify if required.

Image Reference Number

The image reference for the image file uploaded is specified here.

Image Reference Number is disabled for Clearing transaction through UI. For Gateway, this field is enabled and user can specify the number.

3.2.6.1 Main Tab

The screenshot displays a web-based form interface for a 'Main' tab. The form is organized into four main sections:

- Debit Details:** Includes fields for Debit Account Number, Account IBAN, Account Currency, Account Branch, Account/GL Name, Debit Amount, Customer Number, and Customer Service Model.
- Instrument Details:** Includes fields for Instrument Date (YYYYMMDD), Instrument Code, Instrument Number, Instrument Currency, and Instrument Amount. An 'Emit' button is located below these fields.
- Beneficiary Details:** Includes fields for Account Number, Account IBAN, Account Name, Bank Routing Number (marked with a red asterisk), Bank Name, Branch Name, and Remarks.
- Processing Details:** Includes fields for Booking Date, Clearing Date, Debit Value Date, Credit Value Date, Return by Date, Clearing Branch, and Routing Number.

At the bottom of the form, there is a 'UDF | MIS' section with fields for Maker Id, Date Time, Checker ID, Date Time, and Authorization Status. An 'Exit' button is located in the bottom right corner.

You can specify the following details here:

Debit Details

Debit Account Number

Specify the Account / GL number. Alternatively, you can select the account number from the option list. The list displays all the valid account numbers maintained in the system.

Account IBAN

The system displays the account IBAN based on the account selected.

Account Currency

The system displays the account currency based on the account selected.

Account Branch

The system displays the account branch based on the account selected.

Account/GL Name

The system displays the account name based on the account selected.

Debit Amount

The system displays the Debit amount.

Customer Number

The system displays the customer number based on the account selected.

Customer Service Model

The system displays the Customer Service Model based on the account selected.

Beneficiary Details**Account Number**

Specify the Beneficiary account number.

Account IBAN

Specify the account IBAN.

Account Name

Specify the name of the Beneficiary.

Bank Routing Number

Specify the routing number of the bank on which the instrument is drawn. Alternatively, you can select the routing number from the option list. The list displays all the all bank branches participating in the same clearing network.

Bank Name

The system displays the bank name based on the routing number selected.

Branch Name

The system displays the branch name based on the routing number selected.

Remarks

Specify any internal remarks related to the clearing transaction.

Instrument Details**Instrument Date**

Select the Instrument date. Current date and Future date is accepted as Instrument Date.

Instrument Code

Specify the instrument code. Alternatively, you can select the instrument code from the option list. The list displays all the all valid instrument codes for the host.

Instrument Number

Specify the instrument number.

Instrument Currency

The system displays the instrument currency based on the instrument selected.

Instrument Amount

Specify the instrument amount.

Processing Details**Booking Date**

The system displays the current date as booking date and cannot be edited.

Clearing Date

The system defaults the clearing same as the instruction date if its a working day for the branch and network. In case of a holiday, this will be moved to the next working day.

Debit value date

The system calculates the debit value date as below:

Clearing Date+ Bank Float Days

Working days based on Network holidays maintained will be considered. This is the settlement date for clearing.

Credit Value Date

The system calculates the credit value date as below:

Clearing Date+ Credit float days

Working days based on Network holidays maintained will be considered

Return by Date

The system calculates the return by date as below:

Clearing Date+ Return days based on Network Working Days

Clearing Branch

The system defaults the clearing branch to which the transaction branch is linked based on the clearing branch linkage available.

Routing Number

The system displays the routing number based on the clearing branch selected.

3.2.6.2 Pricing Tab

You can view the charge amount computed by the system for each of the Pricing components of the Pricing code linked to the network code of the transaction. Click the “Pricing” tab.

The screenshot shows a software window titled "Inbound Clearing Transaction Input". At the top, there are tabs for "New" and "Enter Query". Below this, there are two columns of input fields. The left column includes "Transaction Branch*", "Host Code*", "Source Code*", and "Network Code*". The right column includes "Transaction Reference Number*", "File Reference Number", "Source Reference Number", "User Reference Number", and "Image Reference Number". Below the input fields, there are two tabs: "Main" and "Pricing", with "Pricing" being the active tab. Underneath the tabs is a table with a header row containing the following columns: "Component Name", "Pricing Currency", "Amount", "Waived", "Credit Currency", and "Credit Amount". The table body is currently empty. At the bottom of the window, there is a status bar with fields for "Maker ID", "Checker ID", "Date Time", and "Authorization Status", along with an "Exit" button.

Specify the following details:

Pricing Component

The system displays each Pricing component of the Pricing code from the Pricing Code maintenance.

Pricing Currency

The system displays the Pricing currency of each Pricing component of the Pricing code.

Pricing Amount

The system displays the calculated Charge amount for each Pricing component of the Pricing code.

Waived

The system displays if charges for any Pricing component are waived in the Pricing maintenance.

Debit Currency

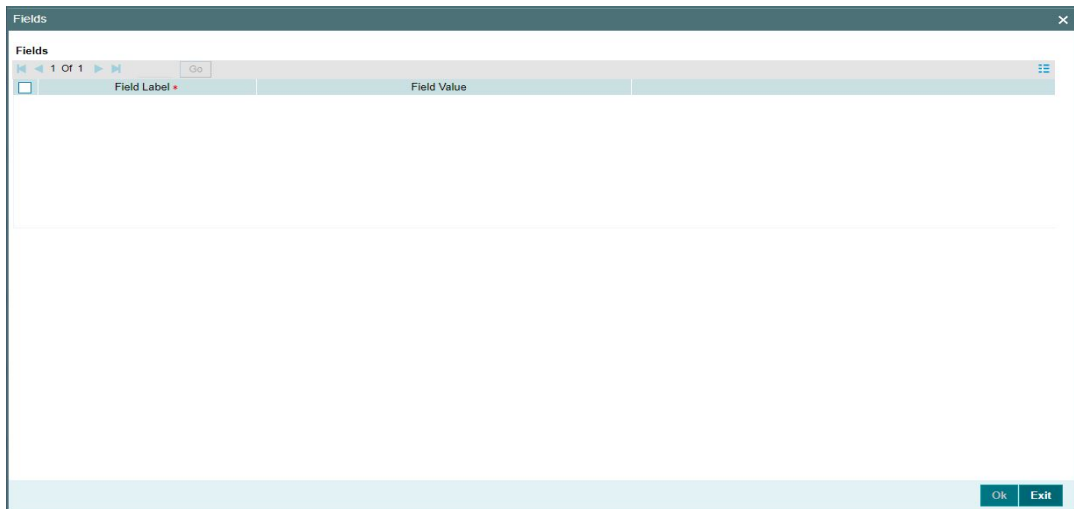

The system displays the currency of the Charge account to be debited for the charges.

Debit Amount

The system displays the Charge amount for each Pricing component debited to the charge account in Debit currency. If the Pricing currency is different from the Debit currency the calculated charges are converted to the Debit currency and populated in this field.

3.2.6.3 UDF Tab

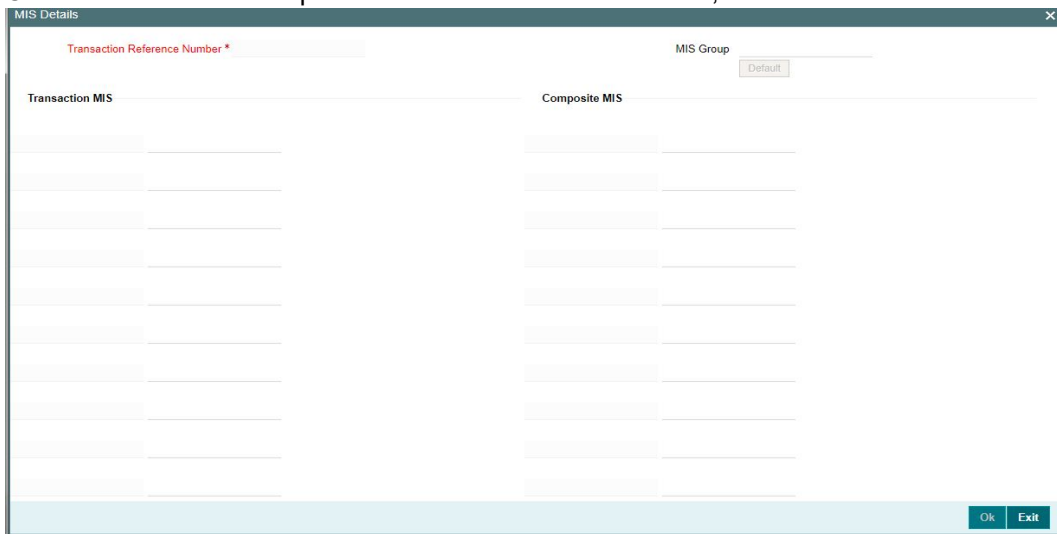

Click on the 'UDF' button present in the bottom of the screen to invoke this screen.

You can specify user defined fields for each transaction.

3.2.6.4 MIS Tab

Click on the 'MIS' button present in the bottom of the screen, to invoke this screen.

You can specify the MIS details in this sub-screen.

Saving of Clearing transaction

Click Save to save the transaction. On save, the initial validations will be executed. When the transaction is received through channels, it will be auto authorized.

For more details on the process while saving the transaction, refer to section 3.3.2.3.

3.2.6.5 Inbound Clearing Transaction Summary

You can search for outbound clearing transactions in the summary screen. You can invoke 'Inbound Clearing Transaction Summary' screen by typing 'PGSITONL' in the field at the top right corner of the Application tool bar and clicking on the adjoining arrow button.

The screenshot shows the 'Inbound Clearing Transaction Summary' application window. It includes a search bar with options for 'Search', 'Advanced Search', 'Reset', and 'Clear All'. Below the search bar, there is a 'Case Sensitive' checkbox. The main area contains two columns of search criteria: Transaction Reference Number, Instrument Number, Debtor Account Number, File Reference Number, Transaction Value Date (YYYYMM/DD), and Transaction Status on the left; and Instrument Amount, Instrument Issue Date (YYYYMM/DD), Account IBAN, Authorization Status, Network Code, and Instrument Currency on the right. Each field has a magnifying glass icon. Below the search criteria is a table with columns: Transaction Reference Number, Instrument Amount, Instrument Number, Instrument Issue Date, Debtor Account Number, Account IBAN, Source Reference Number, and File Reference I. The table is currently empty. At the bottom right, there is an 'Exit' button.

You can search using one or more of the following parameters:

- Transaction Reference Number
- Instrument Amount
- Instrument Number
- Instrument Issue Date
- Debit Account Number
- Account IBAN
- Authorization Status
- Transaction Value Date
- Network Code
- Transaction Status
- Instrument Currency

Once you have specified the search parameters, click 'Search' button. The system displays the records that match the search criteria.

Double click a record or select a record and click on 'Details' button to view the detailed maintenance screen.

3.2.7 Inward Clearing File Upload

File parameters maintenance is to be maintained with File type as 'Clearing' for Inward clearing files.

Inward clearing files are to be sent in the supported XML format with file envelope. In the File envelope details File type is to be 'Clearing'. File path can be mentioned in the File envelope details.

3.2.8 Inbound Clearing View

You can view the complete Inbound Clearing transaction details in this screen

You can invoke 'Inbound Clearing View' screen by typing 'PGDIVIEW' in the field at the top right corner of the Application tool bar and clicking on the adjoining arrow button

- From this screen, click Enter Query. The Transaction Reference field gets enabled which opens an LOV screen.
- Click the Fetch button and select the required value.
- All details of the transaction, including the accounting entry posted / reversed, its dispatch status & return status can be viewed on this screen
- Along with the transaction details in the Main and Pricing tabs user can also view the Status details for the following:
 - External System Status
 - Transaction Status
- Click Execute Query to populate the details of the transaction in the Outbound Clearing View screen.

For more details on Main, Pricing tabs refer to 'PGDITONL' screen details above.

3.2.8.1 Accounting Tab

Click the Accounting tab and view the accounting entries for the transaction initiated. For more details on accounting screen fields and function, refer to section 3.2.2.1

The screenshot shows a web application interface with a navigation bar at the top containing 'Main', 'Price', 'Accounting' (highlighted in red), and 'Exception'. Below the navigation bar is a 'Transaction Details' section with a 'Go' button and a '1 Of 1' indicator. A table with the following columns is displayed: Event Code, Transaction Date, Value Date, Transaction Account, Transaction Account Branch, Transaction Code, Dr/Cr, and Amount. The table is currently empty. At the bottom of the screen, there is a footer area with 'UDF | MIS | View Queue Action' and a status bar containing 'Maker Id', 'Checker Id', 'Authorization Status', and 'Date Time' fields, along with an 'Exit' button.

3.2.8.2 Exception Tab

Click the Exception tab and view the Return details, if any for the transaction initiated.

The screenshot shows a web application interface with a navigation bar at the top containing 'Main', 'Price', 'Accounting', and 'Exception Details' (highlighted in red). Below the navigation bar is a 'Return Details' section with the following fields: Return Reference, Return Date, Return Code, Return Reason, and Dispatch Status (a dropdown menu). At the bottom of the screen, there is a footer area with 'UDF | MIS | View Queue Action' and a status bar containing 'Maker Id', 'Checker ID', 'Authorization Status', and 'Date Time' fields, along with an 'Exit' button.

Following Return details are displayed in the exception screen:

- Return Reference
- Return Date
- Return Code
- Return Reason
- Dispatch Status

3.2.8.3 UDF Tab

You can invoke this screen by clicking 'UDF' tab in the screen.

3.2.8.4 MIS Tab

You can invoke this screen by clicking 'MIS' tab in the screen.

3.2.8.5 View Queue Action Log

You can view all the queue actions for the respective transaction initiated. You can invoke this screen by clicking the 'View Queue Action' button in View screen, where the Transaction

Reference Number is auto populated and related details are displayed. For more details on fields, refer to section 3.2.2.5:

3.2.8.6 Inbound Clearing View Summary

You can invoke the 'Inbound Clearing View Summary' screen by typing 'PGSIVIEW' in the field at the top right corner of the application toolbar and clicking the adjoining arrow button.

You can search using one or more of the following parameters:

- Transaction Reference Number
- Instrument Issue Date
- Debit Account Number
- Account IBAN
- Source Reference Number
- Authorization Status
- Transaction Value Date
- Booking Date

- Instrument Amount
- Transaction Status
- Instrument Number
- Batch Ref Number

Once you have specified the search parameters, click 'Search' button. The system displays the records that match the search criteria.

Double click a record or select a record and click on 'Details' button to view the detailed maintenance screen.

3.2.9 **Inbound Bulk Clearing**

An inbound bulk input screen is provided for capturing the inward clearing cheque details which are to be credited to same account. User can enter details of multiple inbound clearing details for the same customer account provided.

You can invoke 'Inbound Bulk Clearing Transaction Input' Screen by typing 'PGDIBULK' in the field at the top right corner of the Application tool bar and clicking on the adjoining arrow button

You can specify the following details:

Host Code

The system displays the logged in user's host code.

Transaction Branch

The system displays the logged in user's Branch code.

Network Code

Select a Network Code from the list of values. All valid codes are displayed in the list.

- Host Code

Once you have specified the search parameters, click 'Search' button. The system displays the records that match the search criteria.

Double click a record or select a record and click on 'Details' button to view the detailed maintenance screen.

4. Positive Pay

Corporate customers can provide the bank with 'Cheque Issue Details'. These Positive Pay details are matched against cheques received for payment in Inward clearing. If a cheque listed for Positive Pay has been lost or stolen or otherwise cannot be accounted for, customer can place a stop payment order on such cheque.

4.1 Positive Pay Maintenances

4.1.1 Positive Pay Preferences

This maintenance is a generic maintenance which is applicable to all customers. This maintenance is required when there is a threshold amount above which Positive Pay validations are applicable to all customers or if UDF group is to be attached to Positive Pay input.

You can invoke "Positive Pay Preferences Detailed" screen by typing 'PIDPPRF' in the field at the top right corner of the Application tool bar and clicking on the adjoining arrow button.

Threshold Currency

Specify the Threshold Currency from the list of values

Threshold Amount

Specify the cheque amount above which it is mandatory to have Positive Pay record for cheque payment.

Other Preferences

UDF Group

Specify the UDF Group from the list of values. All valid UDF groups are listed.

Beneficiary Name Validation Required

This preference flag indicates whether the Beneficiary name validation is required while process an inward positive pay transaction in clearing.

4.1.1.1 Positive Pay Preferences Summary

You can invoke “Positive Pay Preferences Summary” screen by typing ‘PISPPRF’ in the field at the top right corner of the Application tool bar and clicking on the adjoining arrow button.

The screenshot shows the 'Positive Pay Preferences Summary' application window. The window has a title bar with standard OS controls. Below the title bar, there is a search area with buttons for 'Search', 'Advanced Search', 'Reset', and 'Clear All'. Underneath, there are several input fields: 'Authorization Status' (a dropdown menu), 'Threshold Currency' (a text field with a magnifying glass icon), 'UDF Group' (a text field with a magnifying glass icon), 'Record Status' (a dropdown menu), and 'Threshold Amount' (a text field with a magnifying glass icon). Below these fields is a table with a header row containing the following columns: 'Authorization Status', 'Record Status', 'Threshold Currency', 'Threshold Amount', 'Host Code', 'Beneficiary Name Validation Required', and 'UDF Group'. The table body is currently empty. At the bottom right of the window, there is an 'Exit' button.

You can search using one or more of the following parameters:

- Authorization Status
- Record Status
- Threshold Currency
- Threshold Amount
- UDF Group

Once you have specified the search parameters, click ‘Search’ button. The system displays the records that match the search criteria.

4.1.2 Positive Pay Customer Account Preferences

You can maintain Positive Pay Customer Account Preferences (Function ID: PIDPPACC). If this maintenance is available, when a cheque is presented for payment, the instrument validation is done with the Positive Pay preferences available for the account.

You can invoke “Positive Pay Customer Account Preferences Detailed” screen by typing ‘PIDPPACC’ in the field at the top right corner of the Application tool bar and clicking on the adjoining arrow button.

This preference flag indicates whether the Beneficiary name validation is required while processing an inward positive pay transaction in clearing.

4.1.2.1 Positive Pay Customer Account Preferences Summary

You can invoke “Positive Pay Customer Account Preferences Summary” screen by typing ‘PISPPACC’ in the field at the top right corner of the Application tool bar and clicking on the adjoining arrow button.

The screenshot shows a web application window titled "Positive Pay Customer Account Preferences Summary". The interface includes a search bar with "Case Sensitive" checked. Below the search bar are four input fields: "Authorization Status", "Customer Account", "Record Status", and "Threshold cheque Amount". A table below the search fields has columns for "Authorization Status", "Record Status", "Customer Account", "Beneficiary Name Validation Required", "Account Currency", "Threshold cheque Amount", "Customer Number", "Host Code", and "Account Branch". The table is currently empty. At the bottom right of the window is an "Exit" button.

You can search using one or more of the following parameters:

- Authorization Status
- Record Status
- Customer Account
- Threshold cheque Amount

Once you have specified the search parameters, click ‘Search’ button. The system displays the records that match the search criteria.

4.2 Positive Pay Input

4.2.1 Positive Pay Instrument

You can specify multiple cheque details for the same Customer Account, using this screen.

You can invoke “Positive Pay Instrument Details Input” screen by typing ‘PIDPPONL’ in the field at the top right corner of the Application tool bar and clicking on the adjoining arrow button.

You can specify the following fields:

- Instrument Status
- Positive Pay Reference
- Batch Reference

Once you have specified the search parameters, click ‘Search’ button. The system displays the records that match the search criteria.

You can initiate Modify and Change Status actions from Summary screen.

4.3 Positive Pay Validation

Below listed validations are done for inward clearing, if the instrument type is 'Cheque':

- Whether Positive Pay Preferences is available for the Debit Account
- If no preference is available for the account, host level preference is available

If no preference is available at Account/Host level, no positive pay validation is done.

Based on the preference, system validates whether cheque amount is greater than the minimum amount. If yes, it is mandatory to have the instrument number in positive Pay Instrument maintenance with 'Active' status. If no valid Positive Pay Instrument record is found, the transaction is moved to Return Queue.

If Beneficiary Name match Required is maintained as 'Yes' in the preference the beneficiary Name of the cheque is matched with the name maintained in Positive Pay maintenance. If the name is not matched, transaction is moved to Return Queue.

4.4 Positive Pay Modification

4.4.1 Positive Pay Modification

This screen can be initiated from Positive Pay View summary screen. If a single record is selected and modify operation is initiated, the details of the selected record is defaulted in the Modification screen.

Modification screen functions as a standalone screen too. You can select a Positive Pay reference and default the details for modification.

You can invoke "Positive Pay Modification" screen by typing "PIDPPMOD" in the field at the top right corner of the Application tool bar and clicking on the adjoining arrow button.
