Advice

You can configure various BIP advices that are available for the process.

View Advice

The summary screen provides a list of configured advice. You can configure an advice for a process using the [Create Advice](#).

How to reach here:

Core Maintenance > Advice > View Advice

Advice Name	Advice Description	Micro Service Name	Status
GTEEREJ	GTEEREJ		Authorized
CAGRE	Collateral Agree...		Authorized
LoanApproval	Loan Approval Adv...	loanapplication-se...	Authorized
COAGR	COAGR		Authorized
CFPM1	CFPM1		Authorized
CFP7	CFP7		Authorized
LoanRejection	Loan Rejection Adv...	loanapplication-se...	Authorized
CF03	CF03		Authorized

Field	Description
Advice Name	Displays the name of the advice.
Advice Description	Displays information about the advice.
Micro Service Name	Displays the name of the micro service.
Status	Displays the status of the record.

Create Advice

The maintenance screen allows you to configure advices.

How to add an advice:

- In the **Create Advice** screen, provide the required details:
 - Advice Name: Enter a name for the advice.
 - Advice Description: Enter additional information about the advice.
 - Micro Service Name: Enter the micro service name generating the advice.

- Swift Micro Service: Enter the information about the swift micro service.
- Micro Service Endpoint: Enter an endpoint micro service.
- Application Name: Enter an application name for which advice is generated.
- Application Description: Enter additional information about the application.

Media Details

By default, fields that require an media details appear. You can click **+** to add multiple media details and click **-** to remove a media details.

- Media: Click **Search** to view and select the required media.
- Branch: Click **Search** to view and select a branch.
- Currency: Click **Search** to view and select a currency.
- Report Locale: Enter a locale report details.
- Report Absolute Path: Enter a report absolute path.
- Format: Select a download file format for an advice from the dropdown list. The formats available are, PDF, PPTX, HTML, XLS, and RTF.
- Swift Endpoint: Enter a swift endpoint.

2. Click **Save**. You can view the confirmation advice details in the [View Advice](#).

Amount Text Language

You can configure an amount text language.

View Amount Text Language

The summary screen provides a list of configured amount text language. You can configure an amount text language using the [Create Amount Text Language](#).

How to reach here:

How to add an amount text language:

1. In the **Create Amount Text Language** screen, provide the required details:
 - Language Code: Click **Search** to view and select the required language code.

Amount Word Currency List

2. Click + to add a row and provide the required details:
 - CCY Symbol: Enter the CCY symbols.
 - Decimals As Fraction: Select a decimals as fraction value from the dropdown list.
 - Final Text: Enter the final text for the amount word currency list.
 - CCY: Click **Search** to view and select the CCY.
 - Post Decimal: Enter the post decimal details.
 - Pre Decimal: Enter the pre decimal details.
 - Text Before: Select an option for the before text.
 - Text Between: Enter the text that must appear between the amount word currency list.

Amount Word Text List

3. Click + to add a row and provide the required details.
 - Amount: Select the amount details.
 - One Flag: Select an option for the amount word text list.
 - Text: Enter a text for the amount word.
4. Click **Save**. You can view the configured amount text language details in the [View Amount Text Language](#).

BIC Directory

As part of setting up basic information, you must maintain Bank Identifier Codes (BIC). You can configure the BIC directory for a customer.

View BIC Directory

The summary screen provides a list of configured BIC directory. You can configure the BIC directory using the [Create BIC Directory](#).

How to reach here:

Core Maintenance > BIC Directory > View BIC Directory

Customer Number	Sub Type Code	BIC Code	Bank Name	Status
00093594		IOBAINBBA63	FUTURA BANK	Authorized

How to add a BIC directory:

1. In the **Create BIC Directory** screen, provide the required details:

- BIC Code: Enter a unique BIC Code by which the bank is identified by SWIFT.
- Bank Name: Enter a name for the bank.
- Customer Number: Click **Search** to view and select the required customer number.
- Customer Name: Based on the Customer Number selected, the information is auto-populated.
- Bank Address 1-3: Based on the Customer Number selected, the information is auto-populated.
- SWIFT Key: Enter a unique SWIFT key for the BIC directory.
- Telex Key: Enter a unique telex key for the BIC directory.
- SWIFT Key Arrangement: Select a SWIFT key arrangement from the dropdown list,
- Relationship: Select one of the following options:
 - No: If selected, indicates that the BIC Entity is not a customer of your bank
 - Mail: If selected, the BIC entity is not a recognized SWIFT entity but an address internal to your bank. In such cases, all correspondence directed to the particular BIC entity is sent as mail messages.
 - Keys: If selected, a SWIFT/Telex connectivity exists between your bank and the bank for which you are maintaining details. Subsequently, you must specify the SWIFT/Telex Key in the adjacent field.
- Sub-type Code: Click **Search** to view and select the required sub-type code.
- BEI Indicator: Based on the Sub-type Code selected, the information is auto-populated.
- ADB Member: Select an ADB member from the dropdown list.

Payment Message

- MT103+ Preferred: By default, this is disabled. If selected, indicates the counter party whose BIC code details you are capturing capacitate to receive payment messages in the MT 103 format.
- Blacklisted: By default, this is disabled. If selected, indicates the BIC entity is blacklisted.
- CUG Member: By default, this is disabled. If selected, indicates the BIC entity is a closed user group member.
- Remit Member: By default, this is disabled. If selected, indicates the customer is registered with MT 103 extended remittance information multiple user group.
- Update During Upload: By default, this is disabled. If selected, updated the BIC directory during an upload.

Multi-Customer Credit Transfer

- Multi-Customer Credit Transfer: By default, this is disabled. If selected, indicates multiple credit transfer feature [MT102 support] exists between the bank and the BIC entity.
- Generate 102+: By default, this is disabled. If selected, generates 102+ message.
- Maximum Size in Bytes: Enter the maximum size.

Request for Transfer

- Generate MT101: By default, this is disabled. If selected, indicates MT101 can be sent/received from this BIC. Select to generate MT101 message.
- Number of Transactions Per Page: Enter the number of transactions to view per page. If you do not specify a value it is defaulted to 10.
- Real Customer Number: Click **Search** to view and select the required real customer number.
- Real Customer Name: Based on the Real Customer Number selected, the information is auto-populated.

2. Click **Save**. You can view the configure BIC directory in the [View BIC Directory](#).

Branch EOD

You can invoke End of Day (EOD) to indicate that all the activities for the day are complete. Activities can be performed on the system only after the system date is changed to the next working day and authorized.

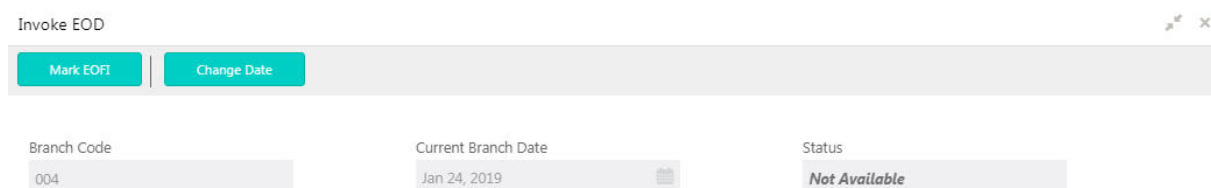

Most of the automated functions are part of the beginning of day operations. Thereafter, some of them must be executed when the system is in the EOTI (End of Transaction Input) stage.

Invoke EOD

The maintenance screen allows you to invoke the branch EOD details.

How to reach here:

Core Maintenance > Branch EOD > Invoke EOD

Branch Code	Current Branch Date	Status
004	Jan 24, 2019	Not Available

How to invoke a branch EOD:

- In the **Invoke EOD** screen, you can perform the following actions:
 - Mark EOFI (End of Financial Input): Click to initiate the EOD process.
 - Change Date: Click to change the current application date to next working day.
 - Branch Code: Displays the branch code that is associated with the logged in user.
 - Current Branch Date: Displays the logged in application date.
 - Status: Based on the operation performed the status is updated.

Note

Use the **Reset** option to reset all the configured details to current application's configured details.

Country Code

You can configure a country code.

View Country Code

The summary screen provides a list of configured country code. You can configure a country code using the [Create Country Code](#).

How to reach here:

Core Maintenance > Country Code > View Country Code

View Country Code

Country Code:	Country Name:	ISO Numeric Code:	Status
USA	United States	USA	Authorized Open

How to add a country code:

- In the **Create Country Code** screen, provide the required details:
 - Country Code: Enter the country code.
 - Country Name: Enter the name of the country.
 - Alternate Country Code: Enter an alternate country code.
 - Region Code: Enter the region code.
 - ISO Country Code: Enter the ISO country code.
 - ISO Code: Enter the ISO code.
 - Limit Currency: Enter the limit currency.

- Overall Limit: Enter an overall limit.
- Blacklist: By default, this is disabled. If selected, indicates the country is blacklisted.
- EU Member: By default, this is disabled. If selected, indicates the country is recognized by Swift as a part of the Intra European countries.
- Generate 205: By default, this is disabled. If selected, indicates the cover message 205COV or 205 need to be generated for transactions involving this country. If you do not select this option, RTGS, 202 or 202COV message is generated.
- IBAN Check Required: By default, this is disabled. If selected, indicates check required for an IBAN is mandatory.
- BIC Clearing Code: By default, this is disabled. If selected, indicates the National ID in the BIC plus file is the clearing code. During upload of clearing codes from BIC plus file, the records belong to countries against which this box is selected.
- Intra European: By default, this is disabled. If selected, indicates the country is an intra European country.

2. Click **Save**. You can view the configured country code details in the [View Country Code](#).

Currency Definition

You can define the attributes of the currencies in which the bank can deal. For each currency, you can define attributes such as, the SWIFT code for the currency, the country the currency belongs, the interest method, the spot days, the settlement days, and so on.

Currencies can be maintained only at the Head Office. The list of currencies are available to the branches based on the currencies defined for the country linked to the branch.

View Currency Definition

The summary screen provides a list of defined currency. You can define a currency using the [Create Currency Definition](#).

How to reach here:

Core Maintenance > Currency Definition > View Currency Definition

The screenshot shows a web application window titled "View Currency Definition". It contains a list of currency cards. Each card displays the Currency Code, Currency Name, Alternate Currency Code, Country, and Maintenance Country. Below the details, there are icons for "Authorized" and "Open" (or "Unauthorized" and "Closed").

Currency Code	Currency Name	Alternate Currency Code	Country	Maintenance Country	Status
LDP			SG	GB	Authorized, Open
LOP			GB	GB	Authorized, Open
USD	United States Dollar	USD	USA	GB	Authorized, Open
SLK			GB	GB	Authorized, Open
KLO	mob		IN	GB	Authorized, Open
GBP	Pound	EURO	GB	GB	Unauthorized, Closed

Field	Description
Currency Code	Displays the code of the currency.

Field	Description
Currency Name	Displays the name of the currency.
Alternate Currency Code	Displays the code of the alternate currency.
Country	Displays the country associated with the currency.
Maintenance Country	Displays the maintenance country.
Status	Displays the status of the record.

Create Currency Definition

The maintenance screen allows you to define currency.

How to reach here:

Core Maintenance > Currency Definition > Create Currency Definition

How to define a currency:

1. In the **Create Current Definition** screen, provide the required details:
 - Currency Code: Enter the currency code.
 - Maintenance Country: Click **Search** to view and select the required maintenance country.
 - Currency Name: Enter the name of the currency.

- Alternate Currency Code: Enter the code of the alternate currency.
- Currency Type: Enter the currency type.
- ISO Numerical Currency Code: Enter the International Standardization Organization numerical currency code.
- Currency Country: Click **Search** to view and select the required currency country.
- Currency Decimals: Select the currency decimals.
- Currency Interest Method: Select the currency interest method from the dropdown list.
- Currency Spot Days: Select the number of spot working days applicable for the currency.
- Foreign Exchange Netting Days: Select the number of days for the foreign exchange netting.
- Settlement Message Days: Select the settlement message days.
- Position GL: Click **Search** to view and select the required position GL.
- Position Equivalent GL: Click **Search** to view and select the required position equivalent GL.
- Currency Tolerance Limit: Enter the currency tolerance limit.
- Index Base Currency: Click **Search** to view and select the required index base currency.
- Commodity Code: By default, this is disabled. If selected, enables a commodity code.

Cut Off Time

Refers to the time by which all transactions involving a currency should be generated. For a currency, you can indicate the cut-off hour and minute. This time should be expressed in the local time of the bank.

The maintenance of a cut-off time for a currency has particular reference to outgoing funds transfers involving it.

Example: The value date of a funds transfer transaction (incoming payment) involving USD, is 3rd June 2018. The number of cut-off days specified for the currency is 2. This means that the payment must be received on or before 1st June 2018. If the payment is received on 1st June, it must be received before the cut-off time specified for USD.

If the USD cut-off time is 1200 hrs, if the payment is received on 1st June 2018, it must be received before 1200 hrs.

- Cut Off Days: Select the cut off days for the payment transaction involving the currency.
- Cut Off Hour: Select the hour of the day for the cut off.
- Cut Off Min: Select the minute of the hour for the cut off.
- CLS Currency: By default, this is disabled. If selected, allow customers of your bank to settle their FX deals via the CLS (Continuous Linked Settlements) Bank, you can identify the currency to be a CLS Currency. FX deals in the CLS currency is only eligible to be routed through the CLS bank.
- Generate 103+: By default, this is disabled. If selected, generate outgoing MT 103 messages in the MT 103 + format.
- Index Flag: By default, this is disabled. If selected, derives index rate of the currency.
- Euro Conversion Required: By default, this is disabled. If selected, indicates the Euro conversion is required.
- New Cover Message Format Required: By default, this is disabled. If selected, indicates a new cover message format is required.
- Validate Tag-50F: By default, this is disabled. If selected, indicates validations must be performed for the 50F details captured for the ordering customer during contract input.

Rounding

- Currency Round Rule: Select the currency round rule from the dropdown list.
- Currency Round Unit: Select the currency round unit.

Currency Format Mask

- Select one of the currency format.

Euro Type

- Currency Euro Type: Select one of the currency Euro type.

Auto Exchange Rate

- Credit Auto Exchange Rate Limit: Enter the credit automatic exchange rate limit.
- Debit Auto Exchange Rate Limit: Enter the debit automatic exchange rate limit.

Currency Country Mapping

2. Click + to add a row and provide the required details:

- Country Code: Click **Search** to view and select the required country code.
- Country Name: Enter the name of the country.
- Currency Code: Click **Search** to view and select the required currency code.

3. Click **Save**. You can view the defined currency in the [View Currency Definition](#).

Currency Exchange Rate

You can maintain exchange rates for a currency pair, the rates at which you buy and sell one currency for another. A bank determines its buy and sell rate for a currency pair by applying a spread (that is, its profit margin) to the mid-rate of the currency pair. Mid rate is the basic rate at which a currency pair is exchanged.

The spread applied for a currency pair varies with the transaction type, while the mid-rate usually remains constant. Consequently, different rates are applicable to different transaction types. For instance dollars in currency are purchased at a certain rate, while USD traveller's checks are bought at a different rate. You can define a rate type which you would like to associate with a transaction type example: CASH, TRAVCHKS, and so on.

You can define the mid-rate, buy and sell spread applicable to each rate type; the buy and sell exchange rates are computed by the system. Buy rates and sell rates can either be maintained by individual branches or can be input by the HO and propagated to all the branches.

If the branch for which the rate is being uploaded or maintained is the head office branch, then the rate would be copied to all those branches that have the same country code as the head office branch.

If the branch for which the rate is being uploaded or maintained is not the head office branch, but it has the same country code as the head office branch, then the rate being uploaded or maintained would be specific to the branch and would not be copied to any other branch.

If the branch for which the rate is being uploaded or maintained is not the head office branch and also does not have the same country code as the head office branch, then the rate being maintained would be copied to all the branches that has the same country code linked as the branch for which the rate is being maintained or uploaded.

View Currency Exchange Rate

The summary screen provides a list of configured currency exchange rates. You can configure a currency exchange rate using the [Create Currency Exchange Rate](#).

How to reach here:

Core Maintenance > Currency Exchange Rate > View Currency Exchange Rate

Branch code:	Currency1:	Currency2:	Status
861	LDP	GBP	Authorized, Open
003	USD	SGD	Unauthorized, Open
000	MNP	GBP	Unauthorized, Open
003	MNP	GBP	Unauthorized, Open
000	USD	SGD	Authorized, Closed
000	USD	GBP	Authorized, Open
861	USD	SGD	Unauthorized, Closed
000	LDP	GBP	Authorized, Open

Field	Description
Branch Code	Displays the code of the branch.
Currency 1-2	Displays the currency associated with the branch code
Status	Displays the status of the record.

Create Currency Exchange Rate

The maintenance screen allows you to configure a currency exchange rate.

How to reach here:

Core Maintenance > Currency Exchange Rate > Create Currency Exchange Rate

How to add a currency exchange rate:

- In the **Create Currency Exchange Rate** screen, provide the required details:
 - Branch Code: Click **Search** to view and select the required branch code.
 - Currency 1: Click **Search** to view and select the required currency.
 - Currency 2: Click **Search** to view and select the required currency.

Currency Rate

- Click **+** to add a row and provide the required details.
 - Rate Type: Select a rate type from the dropdown list.

- Buy Rate: Enter the buy rate details.
 - Buy Spread: Enter the buy spread details.
 - Mid Rate: Enter the mid rate details.
 - Sale Spread: Enter the sale spread details.
 - Sale Rate: Enter the sale rate details.
 - Rate Date: Select a rate date from the dropdown calendar.
3. Click **Save**. You can view the configured currency exchange rate details in the [View Currency Exchange Rate](#).

Currency Holiday Master

You can configure a yearly list of holidays, for the currencies, defined in the currency screen. The system uses the information maintained to check if any settlement involving a foreign currency (in the foreign Exchange, Money market, Funds Transfer, Loans and Deposit modules) falls on that currency's holiday. If yes, the system displays a message stating and ask the user for an override.

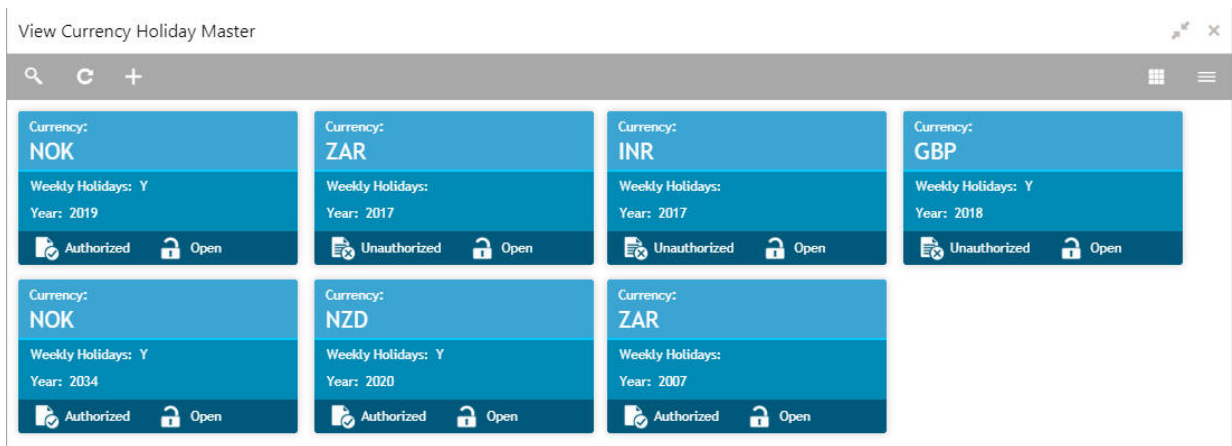

For any schedule or contract maturing at a future date, five years hence, you can input the future date, only if the calendar for that year is maintained. The currency holiday is maintained at the bank level by the Head Office.

View Currency Holiday Master

The summary screen provides a list of configured currency holiday. You can configure a currency holiday using the [Create Currency Holiday Master](#).

How to reach here:

Core Maintenance > Currency Holiday Master > View Currency Holiday Master

Field	Description
Currency	Displays the currency details.
Weekly Holidays	Displays the weekly holidays associated with the currency.
Status	Displays the status of the record.

Create Currency Holiday Master

The maintenance screen allows you to configure a currency holiday.

How to reach here:

Core Maintenance > Currency Holiday Master > Create Currency Holiday Master

The screenshot shows the 'Create Currency Holiday Master' interface. It includes a 'New' button, input fields for 'Currency' (with a search icon), 'Year' (marked with an asterisk), and a 'Weekly Holidays' toggle switch. The central part of the interface is a calendar for the year 2019, displaying months from January to August. The date 26 in February is highlighted with a blue circle. At the bottom right, there are 'Save' and 'Cancel' buttons.

How to add a currency holiday

1. In the **Create Currency Holiday Master** screen, provide the required details:
 - Currency: Click **Search** to view and select the required currency.
 - Year: Enter the year details.
 - Weekly Holidays: By default, this is disabled. If selected, indicates the weekly holidays.
2. Select the dates using the calendar. The selected dates appear in blue highlighted circle.
3. Click **Save**. You can view the configured currency holidays in the [View Currency Holiday Master](#).

Currency Pair Definition

In the foreign exchange markets, the exchange rates for some currency pairs such as the USD-GBP or USD-JPY are easily obtainable, since these are frequently traded. The exchange rates of other currencies such as the ZAR-INR (South African Rand - Indian Rupee), which is not traded very often, is determined through a third currency. The third currency is usually the US dollar, since the US dollar is quoted in all trading centres.

You can define the static attributes of currency pairs for which a regular market quote is readily available. For other pairs, which do not have a regular market quote, you need to specify the third currency through which the system should compute the exchange rate. The currency pair is maintained at the bank level by the Head Office branch.

View Currency Pair Definition

The summary screen provides a list of define a currency pair. You can define a currency pair using the [Create Currency Pair Definition](#).

How to reach here:

Core Maintenance > Currency Pair Definition > View Currency Pair Definition

Maintenance Country:	Number of Units:	Currency 1:	Currency 2:	Status
USA		LLS	LKJ	Authorized, Open

Field	Description
Maintenance Country	Displays the maintenance country details.
Number of Units	Displays the number of units.
Currency 1-2	Displays the currency associated with the country.
Status	Displays the status of the record.

Create Currency Pair Definition

The maintenance screen allows you to define currency pair.

How to reach here:

Core Maintenance > Currency Pair Definition > Create Currency Pair Definition

How to define a currency pair:

- In the **Create Currency Pair Definition** screen, provide the required details:
 - Currency 1-2:** Click **Search** to view and select the required currency. A currency pair (specified as currency 1 and currency 2, in the currency pair) represents the two currencies for which you need to maintain exchange rates.
To specify the pair, choose from the list provided against Currency 1. Select the pair for which you want to maintain parameters. The pair must be selected according to the quotation method followed by the market, which can be direct or indirect. Exchange rates can be defined for currency 1 against currency 2 or currency 2 against currency 1.
 - Maintenance Country:** Click **Search** to view and select the required maintenance country.
 - Check through Currency:** By default, this is disabled. If selected, indicates a check through currency.

- Through Currency: Click **Search** to view and select the required through currency for which the exchange rate between the currencies must be calculated.
- Number of Units: Select one of the number of units.
- Points Multiplier: Select the points multiplier.
- Quotation: Select one of the required quotation:
 - Direct method the exchange rate for the currency pair is quoted as follows:
 Buy rate = mid rate - buy spread
 Sell rate = mid rate + sell spread
 Ccy 1 = Rate x Ccy 2
 - Indirect method the exchange rate for the currency pair is quoted as follows:
 Buy rate = mid rate + buy spread
 Sell rate = mid rate - sell spread
 Ccy 2 = Rate x Ccy 1
- Spread Definition: Select one spread definition. The effective spread can be calculated using any of the following two methods:
 - Percentage: Spread/100 x mid rate
 - Points: Spread x points multiplier

The method of spread definition that you specify applies to two instances:

- While maintaining exchange rates for the currency pair
- While maintaining customer spread for the currency pair

2. Click **Save**. You can view the defined currency pair details in the [View Currency Pair Definition](#).

Currency Rate Type

You can configure a currency rate type.

View Currency Rate Type

The summary screen provides a list of configured currency rate type. You can configure a currency rate type using the [Create Currency Rate Type](#).

861		2018	Authorized
000		2002	Unauthorized

Field	Description
Branch Code	Displays the code of the branch.
Unexpected Holiday	Indicates if the record is an unexpected holiday.
Year	Displays the year of the holiday.
Status	Displays the status of the record.

Create Local Holidays

The maintenance screen allows you to configure local holidays.

How to reach here:

Core Maintenance > Local Holiday > Create Local Holiday

How to add a local holiday:

1. In the **Create Local Holiday** screen, provide the required details:
 - Branch Code: Click **Search** to view and select the required branch code.
 - Year: Enter the year details.
 - Weekly Holidays: By default, this is disabled. If selected, you can define weekly holidays.
 - Unexpected Holidays: By default, this is disabled. If selected, you can define unexpected holidays.
2. Select the dates using the calendar. The selected dates appear in pink highlighted circle.
3. Click **Save**. You can view the configured local holiday details in the [View Local Holiday](#).

Media

You can configure media information.

View Media

The summary screen provides a list of configured media. You can configure a media using the [Create Media](#).

How to reach here:

Core Maintenance > Media > View Media

Field	Description
Media	Displays the name of the media.
Media Number	Displays the number of the media.
Status	Displays the status of the record.

Create Media

The maintenance screen allows you to configure media.

How to reach here:

Core Maintenance > Media > Create Media

The screenshot shows the 'Create Media' form. It has a title bar 'Create Media' with a close button. Below the title bar is a 'New' button. The form contains several input fields and toggles: 'Media Code' (text field), 'Media Description' (text field), 'Media Number' (text field), 'Message Terminator' (text field), 'Message Suffix' (text field), 'Stop Process' (toggle switch), 'Padding Required' (toggle switch), 'TW Required Status' (toggle switch), 'Media Priority' (spin box), 'No Of Character' (spin box), and a section for 'Compatible Media' with its own 'Media Code' (text field) and 'Compatible Media' (toggle switch). At the bottom right are 'Save' and 'Cancel' buttons.

How to add media:

1. In the **Create Media** screen, provide the required details:
 - **Media Code:** Enter a unique media code to identify while associating with an advice.
 - **Media Description:** Enter additional information about the media.
 - **Media Number:** Enter a unique number for the media type.
 - **Message Terminator:** Enter the padded characters to mark the end of an incoming messages.
 - **Message Suffix:** Enter the padding characters to mark the end of an outgoing messages.
 - **Stop Process:** By default, this option is disabled. If selected, halts the processing of incoming and outgoing messages.
 - **Padding Required:** By default, this option is disabled. If selected, pads the characters in every outgoing messages.
 - **TW (Test Word) Required Status:** By default, this option is disabled. If selected, enables the option for word testing.
 - **Media Priority:** Select a media priority from the spin box. When a message is dispatched to the customers, the media type used for sending the messages will be the one that is on high priority.
 - **Number of Character:** Select a number the padding characters should be repeated for the advice from the spin box.

Media Details

By default, fields that require an media details appear. You can click + to add multiple media details and click - to remove a media details.

- Media Code: Enter a unique media code to identify while associating with an advice.
- Compatible Media: By default, this option is disabled. If selected, indicates the media is compatible.

2. Click **Save**. You can view the configured media details in the [View Media](#).

System Dates

You can view the system date details.

View System Dates

The summary screen provides a list of configured system date.

How to reach here:

Core Maintenance > System Dates > View System Dates

The screenshot shows a web application window titled 'View System Dates'. It contains four data cards, each representing a different branch code. Each card displays the branch code, today's date, today's date in text, and a status (Authorized or Open).

Branch Code	Today's Date	Today's Date in Text	Status
018	2018-06-21		Authorized
861	2018-06-21		Authorized
AT2	2018-07-02		Authorized
242	2018-06-24		Open

Field	Description
Branch Code	Displays the code of the branch.
Today's Date	Displays system's current date.
Today's Date in Text	Displays the system's current date in words.
Status	Displays the status of the record.

Transaction Code

You can configure the transaction code.

View Transaction Code

The summary screen provides a list of configured transaction code. You can configure a transaction code using the [Create Transaction Code](#).

How to reach here:

Core Maintenance > Transaction Code > View Transaction Code

Source System	Transaction Code	Source Transaction Code	Status
EXTSYS	000	000	Authorized
FCUBS	103	AT1	Authorized
FCUBS	T68	AT1	Unauthorized
FCUBS	T73	AT1	Authorized
FCUBS	T74	AT1	Authorized
FCUBS	T75	AT1	Authorized
FCUBS	134	AT1	Authorized
FCUBS	T87	AT1	Authorized

Field	Description
Source System	Displays the source system details.
Transaction Code	Displays the transaction code details.
Source Transaction Code	Displays the source transaction code associated with the transaction code.
Status	Displays the status of the record,

Create Transaction Code

The maintenance screen allows you to configure transaction code details.

How to reach here:

Core Maintenance > Transaction Code > Create Transaction Code

How to add a transaction code:

- In the **Create Transaction Code** screen, provide the required details:
 - Transaction Code: Enter the transaction code details.
 - Description: Enter additional information about the transaction code.
 - Source System: Click **Search** to view and select the required source system.
 - Source Transaction Code: Enter the source transaction code details.
- Click **Save**. You can view the configured transaction code details in the [View Transaction Code](#).

Upload Source

You can upload a source code.

View Upload Source

The summary screen provides a list of configured source code. You can upload a source code using the [Create Upload Source](#).

How to reach here:

Core Maintenance > Upload Source > View Upload Source

The screenshot shows a window titled "View Upload Source" with a search bar and a grid of eight source code entries. Each entry is a blue card with the following information:

- Upload Source:** (Name)
- Source Description:** (Description)
- Status:** (Authorized, Open)

Upload Source	Source Description	Status
EXTSYS	External System	Authorized, Open
KIS005	INDIVIDUAL ACCOU...	Authorized, Open
VAM194	Virtual Accounts Cr...	Authorized, Open
VAM1127	Virtual Accounts Cr...	Authorized, Open
VAM152	Virtual Accounts Cr...	Authorized, Open
VAM192	Virtual Accounts Cr...	Authorized, Open
VAM1110	Virtual Accounts Cr...	Authorized, Open
VAM1138	Virtual Accounts Cr...	Authorized, Open

Field	Description
Upload Source	Displays the upload source details.
Source Description	Displays information about the source code.
Status	Displays the status of the record.

Create Upload Source

The maintenance screen allows you to upload source.

How to reach here:

Core Maintenance > Upload Source > Create Upload Source

The screenshot shows a window titled "Create Upload Source" with the following fields and controls:

- Source Code:** A text input field.
- Source Description:** A text input field.
- Base Data From Flexcube:** A toggle switch.
- System Authorization Required:** A toggle switch.
- Buttons:** "New", "Save", and "Cancel".

How to upload source:

1. In the **Create Upload Source** screen, provide the required details:
 - **Source Code:** Enter the source code details.

- Source Description: Enter additional information of the source code.
- Base Data from Flexcube: By default, this is disabled. If selected, indicates the base data is from Flexcube.
- System Authorization Required: By default, this is disabled. If selected, indicates the system requires authorization.

2. Click **Save**. You can view the configured upload source details in the [View Upload Source](#).

Upload Source Preference

You can configure upload source preference.

View Upload Source Preference

The summary screen provides a list of configured upload source preferences. You can configure an upload source preference using the [Create Upload Source Preference](#).

How to reach here:

Core Maintenance > Upload Source Preference > View Upload Source Preference

Field	Description
Source Code	Displays the code of the source.
Status	Displays the status of the post upload.
Purge Days	Displays the number of purge days.
Status	Displays the status of the record.

Create Upload Source Preference

The maintenance screen allows you to configure upload source preference.

How to reach here:

Core Maintenance > Upload Source Preference > Create Upload Source Preference

How to add an upload source preference:

1. In the **Create Upload Source Preference** screen, provide the required details:

- Source Code: Click **Search** to view and select the required source code.

Error Handling

- On Error: Select an error from the dropdown list.
- On Override: Select an override from the dropdown list.
- On Repairable Exception: Select a repairable exception from the dropdown list.
- On Queue Exception: Select a queue exception from the dropdown list.
