Oracle Banking Trade Finance Process Management

Welcome to the Oracle Banking Trade Finance Process Management (OBTfPM) User Guide. This guide provides an overview on the OBTfPM application and takes you through the various steps involved in creating and processing trade finance transactions.

This document will take you through following activities in OBTfPM:

- To create and handle Trade Finance transaction.
- Help users to conveniently create and process Trade Finance transaction

Overview

OBTfPM is a Trade Finance middle office platform, which enables bank to streamline the trade finance operations. OBTfPM enables the customers to send request for new Trade Finance transaction either by visiting the branch (offline channels) or through SWIFT/Trade Portal/other external systems (online channels).

Benefits

OBTfPM helps banks to manage Trade Finance operations across the globe in different currencies. OBTfPM allows you to:

- Handle all Trade Finance transactions in a single platform.
- Provides support for limit verification and limit earmarking.
- Provide amount block support for customer account.
- Provides acknowledgement to customers.
- Enables the user to upload related documents during transaction.
- Enables to Integrate with back end applications for tracking limits, creating limit earmarks, amount blocks, checking KYC, AML and Sanction checks status.
- Create, track and close exceptions for the above checks.
- Enables to use customer specific templates for fast and easy processing of trade transactions that reoccur periodically.

Key Features

- Stand-alone system that can be paired with any back end application.
- Minimum changes required to integrate with bank's existing core systems.
- Faster time to market.
- Capable to interface with corporate ERP and SWIFT to Corporate.
- Highly configurable based on bank specific needs.
- Flexibility in modifying processes.

Export Documentary Collection Update

Export Documentary collection Update process involves update of an existing documentary collection under Export LC.

This section contains the following topics:

Common Initiation Stage	Reject Approval
Registration	Data Enrichment
Exceptions	Multi Level Approval

Common Initiation Stage

The user can initiate the new export documentary collection update request from the common Initiate Task screen.

1. Using the entitled login credentials, login to the OBTFPM application.
2. Click **Trade Finance > Initiate Task**.

Provide the details based on the description in the following table:

Field	Description
Process Name	Select the process name to initiate the task.
Documentary Collection Number	Select the Documentary Collection Number.
Branch	Select the branch.

Action Buttons

Use action buttons based on the description in the following table:

Field	Description
Proceed	Task will get initiated to next logical stage.
Clear	The user can clear the contents update and can input values again.

Registration

The process starts from Registration stage, on registering the task in OBTFPM, user can capture the basic details of the transaction and upload related documents. On submit, the request will be available for an collection expert to handle the request in the next stage.

1. Using the entitled login credentials for Registration stage, login to the OBTFPM application.

A screenshot of the FuTura Bank Sign In interface. The background is dark teal. At the top left is the FuTura Bank logo, which consists of a stylized 'F' icon followed by the text 'FuTura Bank'. Below the logo, the text 'Sign In' is displayed. There are two input fields: 'User Name *' with the text 'SRIDHAR' entered, and 'Password *' with masked characters '.....'. Below the password field is a green 'Sign In' button. At the bottom of the form is a 'Cancel' link.

2. On login, user must be able to view the dashboard screen with widgets as mapped to the user profiles.

3. Click **Trade Finance> Export - Documentary Collection> Export Documentary Collection Update.**

The registration stage has two sections Application Details and Collection Details. Let's look at the details of registration screens below:

Provide the Miscellaneous Details based on the description in the following table:

Field	Description	Sample Values
Documents	Upload the documents received under the Documentary Collection.	
Remarks	Provide any additional information regarding the collection. This information can be viewed by other users handling the request.	
Customer Instructions	Click to view/ input the following Standard Instructions – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this. Transaction Level Instructions – In this section, OBTFPM user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions.	
Common Group Message	Click Common Group Message button, to send MT799 and MT999 messages from within the task.	
Checklist	Make sure that the details in the checklist are completed and acknowledge. If mandatory checklist items are not marked, system will display an error on submit.aqsw \\	

Action Buttons

Field	Description	Sample Values
Submit	On submit, task will move to next logical stage of Import Documentary Collection Booking. If mandatory fields have not been captured, system will display an error message until the mandatory fields data are provided.	
Save & Close	Save the information provided and holds the task in 'My Task' queue for working later. This option will not submit the request.	
Cancel	Cancels the Import Documentary Collection Booking Task. Details entered will not be saved and the task will be removed.	
Hold	The details provided will be saved and status will be on hold. User must update the remarks on the reason for holding the task. This option is used, if there are any pending information yet to be received from applicant.	

Document Linkage

The user can link an existing uploaded document in any of the process stages.

In OBTFPM, system should display Document Ids available in the DMS system. In DMS system, the documents can be Uploaded and stored for future access. Every document stored in DMS will have a unique document id along with other Metadata. The uploaded Document image in the DMS should be available/queried in the Process flow stage screens to link with the task by using the Document ID.

System displays the Documents ids which is not linked with any of the task. Mid office should allow either upload the document or link the document during task processing. The Mid office should allow to Link the same Document in multiple tasks.

1. Navigate to the Registration screen.
2. On the header of **Registration** screen, click **Documents** button. The Document pop-up screen appears.

Document Description	Specify the document description.	
Remarks	Specify the remarks.	
Document Expiry Date	Select the document expiry date.	
Link Document	The link to link the existing uploaded documents from DMS to the workflow task.	

4. Select the document to be uploaded or linked and click the **Link Document** link. The link Document pop up appears.

The value selected in Document Type and Document code of Document screen are defaulted in the Link Document Search screen.

- Click **Fetch** to retrieve the details from DMS. System Displays all the documents available for the given Document Type and Document Code for the Customer.

Field	Description	Sample Values
Customer ID	This field displays the transaction Customer ID.	
Document ID	Specify the document Id.	
Document Type	Select the document type from list.	
Document Code	Select the document code from list.	
Search Result		
Document ID	This field displays the document Code from meta data.	
Customer ID	This field displays the transaction Customer ID.	
Document Type	This field displays the document type from meta data.	
Document Code	This field displays the document code from meta data.	
Link Document	The link to link the existing uploaded documents from DMS to the workflow task.	

6. Click **Link** to link the particular document required for the current transaction.

The screenshot shows a 'Documents' window with a 'Document Status' dropdown set to 'All'. There are three document cards: 'Letter of Credit' and 'Pro-forma Invoice' (grouped together), 'Letter of Credit' and 'Application Form' (grouped together), and a file named 'wqwq.png'. Each card has an upload icon. The 'wqwq.png' card also shows 'Created - 2022-06-28' and 'By - PERI01' with a thumbnail image. At the bottom right is a 'Close' button.

Post linking the document, the user can View, Edit and Download the document.

7. Click Edit icon to edit the documents. The Edit Documents

The 'Edit Document' form contains the following fields: Document Id (2400), Application Reference Number (PK2ILCI000019041), Document Type Id (TFPM_DOCTYPE001), Remarks (empty text area), Document Title (wqwq), Entity Reference Number (PK2ILCI000019041), Document Description (empty text area), and Document Expiry Date (Jun 29, 2022 with a calendar icon). Below these is a dashed box with the text 'Drop files here or click to select' and 'Current selected files: []'. At the bottom right are 'Update' and 'Cancel' buttons.

Data Enrichment

On successful completion of Registration of an Export Documentary Collection Update, the task moves to Data Enrichment stage. At this stage the gathered information during registration are validated.

For expired line of limits, the task moves to “Limit Exception” stage under Free Tasks, on ‘Submit’ of DE Stage with the reason for exception as “Limit Expired”.

Do the following steps to acquire a task currently at Data Enrichment stage:

1. Using the entitled login credentials for Data Enrichment stage, login to the OBTFPM application.

The image shows the login screen for FuTura Bank. It has a dark blue header with the FuTura Bank logo. Below the header, the text "Sign In" is displayed. There are two input fields: "User Name *" with the value "SRIDHAR" and "Password *" with masked characters. A green "Sign In" button is at the bottom.

2. On login, user must be able to view the dashboard screen with widgets as mapped to the user.

3. Click Trade Finance> Tasks> Free Tasks.

Exchange Rate	Provide the Exchange Rate.	
Liquidation Date	Provide the liquidation date.	
Liquidation Amount	Provide the bill amount.	
Action	Click Edit icon to edit the tenor record. Click Delete icon to delete the tenor record.	

In case of multi tenor, user can provide multiple maturity details by clicking the plus icon.

Field	Description	Sample Values
Interest From Date	Update the interest From date. The interest from date cannot be earlier than branch date and later than maturity date.	
Interest To Date	Update the interest To date. The interest from date cannot be earlier than branch date and later than maturity date.	
Accept Commission From Date	Provide the accept commission from date.	
Accept Commission To Date	Provide the accept commission to date.	

Additional Fields

Banks can configure user defined fields as per their requirement in the Additional Fields Screen.

The screenshot shows the Oracle International Payments - Fas... interface. The top bar includes the Oracle logo, 'Free Tasks', and user information (SRIDHAR01, subham@gmail.com). The main header displays 'Export Documentary Update Booking - DataEnrichment :: Application No: 300EDCU000030956'. The left sidebar lists navigation options: Main Details, Consolidated Update, Updated Details, Additional Fields (selected), Advices, Additional Details, Settlement Details, and Summary. The main content area is titled 'Additional Fields' and shows a message: 'No Additional fields configured!'. At the bottom, there are buttons for 'Audit', 'Reject', 'Refer', 'Hold', 'Cancel', 'Save & Close', 'Back', and 'Next'.

Advices

Advices menu displays the advices from the back office as tiles. User can edit the fields in the tile, if required.

In case of Operation Type is FOP, Advice should be generated for the Drawer (Mail Advice) and the Collecting Bank (MT499). In Advices, SWIFT 499 – FREEOFFPAYMENT_ADVICE user should attach the FOP instruction and system should validate the same.

This section displays the commission details:

Field	Description	Sample Values
Event	Read only field. This field displays the event name.	
Event Description	Read only field. This field displays the description of the event.	
Component	This field displays the commission component.	

Field	Description	Sample Values
Rate	Defaults from product. The commission rate, if available in Back Office defaults in OBTFPM. The user is able to change the rate. If flat commission is applicable, then commission amount defaulted from back office is modifiable by the user. Rate field will be blank and the user cannot modify the Rate field.	
Modified Rate	From the default value, if the rate or amount is changed, the modified value gets updated in the modified amount field.	
Currency	Defaults the currency in which the commission needs to be collected	
Amount	An amount that is maintained under the product code defaults in this field. The commission rate, if available in Back Office defaults in OBTFPM. The user is able to change the rate, but not the commission amount directly. The amount gets modified based on the rate changed and the new amount is calculated in back office based on the new rate and is populated in OBTFPM. If flat commission is applicable, then commission amount defaulted from back office is modifiable by the user. Rate field will be blank and the user cannot modify the Rate field.	
Modified	From the default value, if the rate or amount is changed, the modified value gets updated in the modified amount field.	
Defer	If check box is selected, charges/commissions has to be deferred and collected at any future step.	
Waive	Based on the customer maintenance, the charges/commission can be marked for Billing or Defer. If the defaulted Commission is changed to defer or billing or waive, system must capture the user details and the modification details in the 'Remarks' place holder.	
Charge Party	Charge party will be 'Applicant' by Default. You can change the value to Beneficiary	
Settlement Account	Details of the Settlement Account.	

Charge Details

Field	Description	Sample Values
Component	Charge Component type.	
Tag Currency	Defaults the tag currency in which the charges have to be collected.	
Tag Amount	Defaults the tag amount that is maintained under the product code gets defaulted in this field. User can edit the value, if required.	
Currency	Defaults the currency in which the charges have to be collected.	
Amount	An amount that is maintained under the product code gets defaulted in this field.	
Modified	From the default value, if the rate is changed or the amount is changed, the value gets updated in the modified amount field.	
Billing	If charges are handled by separate billing engine, then by selecting billing the details to be available for billing engine for further processing. On simulation of charges/commission from Back Office, if any of the Charges/Commission component for the customer is 'Billing' enabled, 'Billing' toggle for that component should be automatically checked in OBTFPM. The user can not select/de-select the check box if it is de-selected by default. This field is disabled, if 'Defer' toggle is enabled.	
Defer	If charges have to be deferred and collected at any future step, this check box has to be selected. On simulation of charges/commission from Back Office, if any of the Charges/Commission component for the customer is AR-AP tracking enabled, 'Defer' toggle for that component should be automatically checked in OBTFPM. The user can select/de-select the check box. On de-selection the user has to click on 'Recalculate' charges button for re-simulation.	
Waive	If charges have to be waived, this check box has to be selected. Based on the customer maintenance, the charges should be marked for Billing or for Defer. This field is disabled, if 'Defer' toggle is enabled.	
Charge Party	Charge party will be applicant by default. You can change the value to beneficiary	
Settlement Account	Details of the settlement account.	

Tax Details

The tax component is calculated based on the commission and defaults if maintained at product level. User cannot update tax details and any change in tax amount on account of modification of charges/ commission will be available on click of Re-Calculate button or on hand off to back-end system.

This section displays the tax details:

Field	Description	Sample Values
Component	Tax Component type	
Type	Type of tax Component.	
Value Date	This field displays the value date of tax component.	
Currency	The tax currency is the same as the commission.	
Amount	The tax amount defaults based on the percentage of commission maintained. User can edit the tax amount, if required.	
Billing	If taxes are handled by separate billing engine, then by selecting billing the details to be available for billing engine for further processing. This field is disabled, if 'Defer' toggle is enabled.	
Defer	If taxes have to be deferred and collected at any future step, this option has to be enabled. The user can enable/disable the option the check box. On de-selection the user has to click on 'Recalculate' charges button for re-simulation.	
Settlement Account	Details of the settlement account.

Preferences

Select the preferences options based on the description in the following table:

Field	Description	Sample Values
Auto Liquidate	Select Auto Liquidate check box, if required. Auto Liquidation enables liquidation of the bill on the due date automatically from the back office system.	
Allow Roll over	Select Allow Rollover check box, if required.	
Protest Date	Select the Protest Date.	
Auto Change from Acceptance to Advance	Select Auto Change from Acceptance to Advance, if required. This flag indicates whether an Acceptance type of bill should be automatically converted into an Advance type of bill on its liquidation date.  Note This option is applicable only for the bills that are co-accepted by the bank.	

Field	Description	Sample Values
Split Settlement	Toggle On: Enables the user to select more than one account for settlement (Split Settlement) for the liquidation of an import or export drawing or collection bill Toggle Off: Disables the user to select more than one account for settlement (Split Settlement) for the liquidation of an import or export drawing or collection bill	Disable
Split Settlement		
Component	Components gets defaulted based on the product selected.	
Currency	Application displays the default currency for the component.	
Amount	Amount for each component. This is populated from the transaction details of the drawing.	
Split Settlement Details		
Select	Check box to select the record	
Sequence	Sequence of the settlement details.	
Amount	Amount for the split settlement.	
Settlement Account	Account for the split settlement.	
Account Customer	Customer account.	
Account Currency	Currency of the account.	
Account Branch	Branch of the customer's account.	
Exchange Rate	Exchange rate for the split settlement.	
Action	Click Edit icon to edit the split settlement details record. Click Delete icon to delete the split settlement details record.	

Cash Collateral Details

Select the cash collateral details options based on the description in the following table:

Note

Cash collateral is applicable only for the bills which are co-accepted by the bank.

Field	Description	Sample Values
Liquidate using Collateral	Select Liquidate using Collateral check box, if required.	

Field	Description	Sample Values
Outstanding Collateral Amount	Select Auto Liquidate check box, if required. Auto Liquidation enables liquidation of the bill on the due date automatically from the back office system.	

FX Linkage

This section enables the user to link the existing FX contract(s) to the Bill. User can link one or more FX deals to a bill. The linked value of an FX deal(s) must not exceed the value of the bill.

FX contract linkage with the Bill booking can happen only for immediate liquidation of sight payment or for Usance. For manual sight payment, the user needs to link the FX contract on the date of liquidation of the bill.

Following are the features of FX Linkage in BC.

- FX linkage cannot be linked at Bills at initial stage.
- When a bill is drawn under LC, the details of forward contract linked as a part of the LC, will be defaulted at bill.
- Linked amount will be defaulted against the corresponding FX sequentially.
- User can delink or modify the defaulted FX details at in the Bill.
- Bill maturity date should be greater than or equal to FX Value date.
- Sum of Linked amount will not be greater than Bill contract amount.
- Linked amount will not be greater than the available amount for linkage.
- Current Utilized amount will display the liquidated/purchased/discounted/negotiated amount of Bill contract. It cannot go beyond the linked FX amount.
- When a bill is drawn under LC, delink of FX at BC is allowed only if the linked FX is not utilized by the bill.
- Multiple forward FX contract could be linked and exchange rate of FX contract vary from each. Hence, effective exchange rate for bill would be arrived using weighted average method and it is utilized during purchase/negotiation/discount or liquidation of the bill. The same will be populated in the Average FX Rate.

Provide the FX linkage detail based on the description in the following table:

FX Linkage

FX Linkage

FX Reference Number	Bought Currency	SOLD Currency	Available Contract Amount	Rate	Linked Amount	Current Utilized Amount	Total Utilized Amount	FX Expiry Date	Action
PK2FXF1200760501	EUR	GBP	US\$10,000.00	1.33	US\$10,000.00			28-Jun-2020

Cancel

Field	Description	Sample Values
FX Reference Number	Select the FX contract reference number from the LOV. On select and save and close, system defaults the available amount, bot currency, sold currency and rate. Forward FX Linkage available for selection at bill would be as follows, - Counterparty of the FX contract should be the counterparty of the Bill contract. - Active Forward FX transactions authorized not marked for auto liquidation. Bill contract currency should be BOT currency of the FX transaction in case of an export Bill or the SOLD currency in case of an Import Bill.	
Bought Currency	This field displays the currency from the linked FX contract.	
Sold Currency	This field displays the currency from the linked FX contract.	
Available Contract Amount	Available amount will be FX contract amount minus the linked amount. Available amount for linkage should be greater than Zero.	
Rate	This field displays the rate at which the contract is booked.	
Linked Amount	Sum of Linked amount will not be greater than LC contract amount. Linked amount will not be greater than the available amount for linkage.	
Current Utilized amount	This field displays the liquidated /purchased / discounted /negotiated amount of BC contract. It cannot go beyond the linked FX amount.	
Total Utilized amount	This field displays the total amount utilized against the corresponding linked FX. On query, both Utilized and Total Utilized amount holds the amount of latest version.	
Amount in Contract Currency	This field displays the amount in contract currency converted from FX currency.	
FX Expiry Date	This field displays the expiry date from the linked FX contract.	
FX Delivery Period - From	This field displays the date from which the contract is valid for utilization.	
FX Delivery Period - To	This field displays the date to which the contract is valid for utilization.	

Field	Description	Sample Values
Action	Click the Edit icon to modify the FX details. Click the Delete icon to delete the FX details.	
Average FX Rate	Multiple forward FX contract could be linked, and exchange rate of FX contract vary from each. Hence, effective exchange rate for bill would be arrived using weighted average method and it is utilized during purchase/negotiation/discount or liquidation of the bill. This will be populated in the Average FX Rate.	

Pre-Shipment Credit

Liquidation of pre-shipment credit is applicable only if the operation type is PUR or DIS. Provide the pre-shipment credit details based on the description in the following table:

Field	Description	Sample Values
Pre-Shipment Credit Number	Provide the Pre-Shipment Credit Number. Alternatively, user can search the Pre-Shipment Credit Number in the LOV.  Note If there are any pre-shipment credits available for the selected pre-shipment credit number, application will display message: There are earlier pre-shipment credit/s. Do you want to continue?	
Currency	Read only field. Application defaults the currency based on the selected pre-shipment credit number.	
Outstanding Amount	Read only field. Application defaults the outstanding amount based on the selected pre-shipment credit number.	
Repayment Amount	Provide the repayment amount for the respective pre-shipment credit number.	

Tracers

This section enables the user to view the default Tracer details from back end application. It also allows the user to add new Tracer details. Add new Tracer details based on the description in the following table:

Field	Description	Sample Values
Component	This field displays the component maintained in the back office.	
Component Description	This description of the component.	
Rate Type	System defaults the rate type maintained for the component in back office. Value can be: • Fixed Floating • Special	
Rate Code	This field displays the rate code applicable for the Component.	
Min Spread	This field displays the minimum spread applicable for the Rate Code. This field have value only if the Rate Type is Floating .	
Max Spread	This field displays the maximum spread applicable for the Rate Code. This field have value only if the Rate Type is Floating .	
Spread	This field displays the spread applicable for the Component in case of Floating Rate Component. User can change the defaulted value. System validates whether the spread input is within the Minimum to Maximum Spread.	
Min Rate	This field displays the minimum rate applicable for the Rate Code.	
Max Rate	This field displays the maximum rate applicable for the Rate Code.	
Rate	This field displays the value applicable for the Rate Code. User can change the value if the Rate Type is Fixed . System validates whether the Rate input is between the Minimum and Maximum Rate.	
Modified Rate	This field displays the modified rate.	

Field	Description	Sample Values
Special Pricing Reference Number	User can capture the Special Pricing Reference Number, when there is a special Interest rate to be provided for that customer against the interest component (Main Component). Special Pricing Reference is not applicable for Penal Interest components. For transactions initiated from OBDX, the Special Pricing Reference Number will be populated from OBDX and user cannot edit the same. Note System shows an override as “Special Pricing Applicable”, on clicking “Save” in the Interest Details screen, if Special Pricing Reference number has been provided.	
Currency	System defaults the Interest currency in this field.	
Amount	User can input the interest amount, in case the Rate Type is Special , else user can not be able to input the amount. In such cases, the amount will be calculated by back office immediately only if the Interest is collected in Advance or if Back Dated Interest is collected. In that scenario, the Amount will be populated on Re-simulation from back office. Otherwise Interest will be calculated only in the batch as maintained.	
Waive	User can waive the Interest applicable. System displays an override, if the user has waived the Interest.	
Charge Party	System displays the Charge Party based on the type of transaction. In case of Export Transactions, Drawer should be the defaulted Charge Party for Collection Bills and Beneficiary for the LC Bills. In case of Import Transactions, Drawee should be the Charge Party for Collection and Applicant for the LC Bills..	
Settlement Account	System defaults the Settlement Account of the Charge Party for debit of Interest. User can change the value. System should display an error if a different customer is chosen. If different account of the Charge Party is selected, system should display a override. In case the user modifies the Interest Rate, the user should click on Recalculate button to get the modified amount from the back office and display the new Amount.(Recalculation is done in back office and not in OBTFPM).

View Collection	Enables the user to view the latest collection values displayed in the respective fields.	
Submit	Task will move to next logical stage of Export Documentary Collection Update. If mandatory fields have not been captured, system will display an error message highlighting that the mandatory fields have to be updated. In case of duplicate documents' system will terminate the process after handing off the details to back office.	
Save & Close	Save the details provided and holds the task in 'My Task' queue for further update. This option will not submit the request.	
Cancel	Cancel the Data Enrichment stage inputs. The details updated in this stage are not saved. The task will be available in 'My Task' queue.	
Hold	The details provided will be saved and status will be on hold. User must update the remarks on the reason for holding the task. This option is used, if there are any pending information yet to be received from applicant.	
Reject	On click of Reject, user must select a Reject Reason from a list displayed by the system. Reject Codes: • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others. Select a Reject code and give a Reject Description. This reject reason will be available in the remarks window throughout the process.	
Refer	User must select a Refer Reason from the values displayed by the system. Refer Codes: • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others.	

Exceptions

The Export Collection Update request, before the task moves to the approval stage, the application will validate the Amount Block, KYC and AML. A failure in validation of any of them, the task will reach exception stage for further approval for the exceptions.

Exception - Amount Block

As part of amount block validation, application will check if sufficient balance is available in the account to create an amount block. On hand-off, system will debit the blocked account to the extent earmark and credit charges/ commission account in case of charges block or credit the amount in suspense account for earmarks created for collateral.

The transactions that have failed amount block due to non-availability of amount in respective account will reach the amount block exception stage.

Log in into OBTFPM application, amount block exception queue. Amount block validation failed tasks for trade transactions will be listed in the queue. Open the task to view summary of updated available fields with values.

Exception is created when sufficient balance is not available for blocking the settlement account and the same can be addressed by the approver in the following ways:

Approve:

- Settlement amount will be funded (outside of this process)
- Allow account to be overdrawn during hand-off

Refer:

- Refer back to DE providing alternate settlement account to be used for block.
- Different collateral to be mapped or utilize lines in place of collateral.

Reject:

Reject the transaction due to non-availability of sufficient balance in settlement account

Amount Block Exception

This section will display the amount block exception details.

Summary

Tiles Displayed in Summary:

- Main Details - User can view and modify details about application details and LC details, if required.
- Party Details - User can view and modify party details like beneficiary, advising bank etc., if required
- Limits and Collaterals - User can view and modify limits and collateral details, if required.
- Charge Details - User can view and modify details provided for charges, if required.

Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Reject	On click of reject, user must select a Reject Reason from a list displayed by the system. Reject Codes: • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others. Select a Reject code and give a Reject Description. This reject reason will be available in the remarks window throughout the process.	
Hold	The details provided will be registered and status will be on hold. This option is used, if there are any pending information yet to be received from applicant.	
Refer	User will be able to refer the task back to the Data Enrichment user. User must select a Refer Reason from the values displayed by the system. Refer Codes: • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance- Limits • R5 - Others	
Cancel	Cancel the Export Collection Update Amount Block Exception check.	
Approve	On approve, application must validate for all mandatory field values, and task must move to the next logical stage.	
Back	Task moves to previous logical step.	

Exception - Know Your Customer (KYC)

As part of KYC validation, application will check if necessary KYC documents are available and valid for the applicant. The transactions that have failed KYC due to non-availability / expired KYC verification will reach KYC exception stage.

Log in into OBTFPM application, KYC exception queue. KYC exception failed tasks for trade finance transactions will be listed in your queue. Open the task, to see summary tiles that display a summary of available updated fields with values.

On Approval of the exception task, system should validate the Limit Availability, Limit Expiry Date in the Limit System and create Earmark in the ELCM system. In case if the Limit is not available or the Limit is expired, then system should display an error message and should not allow the user to approve and proceed.

On Approval, system should not release the Amount Block against each applicable account and system should handoff the "Amount Block Reference Number" to the back office. On successful handoff, back office will make use of these "Amount Block.

Reference Number" to release the Amount Block done in the mid office (OBTFPM) and should debit the CASA account from the Back office. If multiple accounts are applicable, Amount Block.

Reference for all accounts to be passed to the back office.

User can pick up a transaction and do the following actions:

Approve

- After changing the KYC status in the back end application (outside this process).
- Without changing the KYC status in the back end application.
- Reject (with appropriate reject reason).

- Preview Messages - User can view and modify preview details, if required.
- Compliance - User can view compliance details. The status must be verified for KYC and to be initiated for AML and Sanction Checks.

Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Reject	On click of Reject, user must select a Reject Reason from a list displayed by the system. Reject Codes: • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others. Select a Reject code and give a Reject Description. This reject reason will be available in the remarks window throughout the process.	

Field	Description	Sample Values
Hold	The details provided will be registered and status will be on hold. This option is used, if there are any pending information yet to be received from applicant.	
Refer	User will be able to refer the task back to the Data Enrichment user. User must select a Refer Reason from the values displayed by the system. Refer Codes: • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance- Limits • R5 - Others	
Cancel	Cancel the Export Collection Booking Limit exception check.	
Approve	On approve, application must validate for all mandatory field values, and task must move to the next logical stage.	
Back	Task moves to previous logical step.	

Multi Level Approval

Log in into OBTFPM application and acquire the task available in the approval stage in free task queue. Authorization User can acquire the task for approving.

Note

The user can simulate/recalculate charge details and during calling the handoff, if handoff is failed with error the OBTFM displays the Handoff failure error during the Approval of the task.

Authorization Re-Key (Non-Online Channel)

For non online channel, application will request approver for few critical field values as an authorization step. If the values captured match with the values available in the screen, system will allow user to open the transaction screens for further verification. If the re-key values are different from the values captured, then application will display an error message.

Open the task and re-key some of the critical field values from the request in the Re-key screen. Some of the fields below will dynamically be available for re-key.:

- Drawee Name
- Drawer Name
- Bill Currency
- Bill Amount

Re-key is applicable to the first approver in case of multiple approvers. All approvers will however be able to see the summary tiles and the details in the screen by drill down from tiles.

The screenshot shows the 'Free Tasks' section of the FuTura Bank interface. A modal window titled 'Approval Rekey' is displayed, allowing users to rekey an application. The modal contains fields for 'Applicant Party' (000262) and 'Application Date' (Feb 1, 2019). The background shows a list of tasks with columns for Action, Priority, Application Number, Process Name, Stage, and Back Office Ref No.

Summary

The screenshot shows the 'Summary' screen for an 'Export Documentary Collection Booking Update'. The screen displays a grid of summary tiles for various details including Main Details, Maturity Details, Additional Fields, Advices, Limits and Collaterals, Commission, Charges and Taxes, Preview Messages, Payment Details, Tracer Details, FX Linkage, Settlement Details, Updated Details, Parties Details, Compliance details, Linked Loan Details, and Accounting Details.

Tiles Displayed in Summary:

- Main Details - User can view details about application details and LC details.
- Party Details - User can view party details like applicant, advising bank etc.
- Maturity Details - User can view the maturity details.
- Documents - User can view the document details.
- Draft Details - User can view the draft details.
- Shipment Details - User can view the shipment details.
- Limits and Collaterals - User can view limits and collateral details
- Additional Fields - User can view the additional fields.
- Advice Details - User can view the advice details.
- Payment Details - User can view the Payment details.
- Settlement Details - User can view the settlement details.

- Preview Message - User can view the preview message.
- Pre-shipment Finance - User can view the pre-shipment finance details.
- Charges - User can view charge details.
- Tracers - User can view the tracer details.
- FX Linkage - User can view the details of FX Linkage.

Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Reject	On click of Reject, user must select a Reject Reason from a list displayed by the system. Reject Codes: • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others. Select a Reject code and give a Reject Description. This reject reason will be available in the remarks window throughout the process.	
Hold	The details provided will be registered and status will be on hold. This option is used, if there are any pending information yet to be received from applicant.	
Refer	User will be able to refer the task back to the Data Enrichment user. User must select a Refer Reason from the values displayed by the system. Refer Codes: • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance- Limits • R5 - Others	
Cancel	Cancel the approval.	
Approve	On approve, application must validate for all mandatory field values, and task must move to the next logical stage. If there are more approvers, task will move to the next approver for approval. If there are no more approvers, the transaction is handed off to the back end system for posting.	

Reject Approval

As a Reject approver, user can review a transaction rejected and waiting for reject confirmation.

Log in into OBTFPM application to view the reject approval tasks for Import Documentary Collection Booking available in queue. On opening the task, you will see summary tiles. The tiles will display a list of important fields with values.

The screen from which the reject was initiated can be seen highlighted in the tile view.

User can drill down from reject summary tiles into respective data segments to verify the details of all fields under the data segment.

Summary

The screen up to which data was captured before reject will be available for the user to view in the summary tile. Other fields will be blank when verified from summary tile.

The data segment in which the task was rejected will have the tiles highlighted in a different colour (red).

- Main Details - User can view details about application details and document under collection.
- Party Details - User can view party details like applicant, Remitting Bank etc.
- Document Details - User can view document details.
- Shipment Details - User can view shipment details.
- Charges - User can view charge details.
- Maturity Details - User can view the maturity details.
- Message Preview - User can view the preview of the simulating message to the remitting bank.

Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Reject Approve	On click of Reject Approve, the transaction is rejected.	
Reject Decline	On click of Reject Decline, the task moves back to the stage where it was rejected. User can update the reason for reject decline in remarks.	
Hold	User can put the transaction on 'Hold'. Task will remain in Pending state.	
Cancel	Cancel the Reject Approval.
