Oracle Banking Trade Finance Process Management

Welcome to the Oracle Banking Trade Finance Process Management (OBTfPM) User Guide. This guide provides an overview on the OBTfPM application and takes you through the various steps involved in creating and processing trade finance transactions.

This document will take you through following activities in OBTfPM:

- To create and handle trade finance transaction.

Overview

OBTfPM is a trade finance middle office platform, which enables bank to streamline the trade finance operations. OBTfPM enables the customers to send request for new trade finance transaction either by visiting the branch (offline channels) or through SWIFT/Trade Portal/other external systems (online channels).

Benefits

OBTfPM helps banks to manage trade finance operations across the globe in different currencies. OBTfPM allows you to:

- Handle all trade finance transactions in a single platform.
- Provides support for limit verification and limit earmarking.
- Provide amount block support for customer account.
- Provides acknowledgement to customers.
- Enables the user to upload related documents during transaction.
- Enables to Integrate with back end applications for tracking limits, creating limit earmarks, amount blocks, checking KYC, AML and Sanction checks status.
- Create, track and close exceptions for the above checks.
- Enables to use customer specific templates for fast and easy processing of trade transactions that reoccur periodically.

Key Features

- Stand-alone system that can be paired with any back end application.
- Minimum changes required to integrate with bank's existing core systems.
- Faster time to market.
- Capable to interface with corporate ERP and SWIFT to Corporate.
- Highly configurable based on bank specific needs.
- Flexibility in modifying processes.

Export LC Amendment Islamic

Conventional Export LC Amendment process enables the user to make an amendment to the LC which had been already advised.

The common amendments that are made to an Export LC are:

- Expiry date
- Latest Shipment Date
- Increase/Decrease in LC amount
- Tolerance percentage
- Confirmation instruction
- Available with bank
- Port of loading/discharge & Goods quantity
- Related documents to be submitted
- The amendments may need consent from the beneficiary of the amendment. In such scenarios, after the processing of amendment, the amended LC is parked awaiting beneficiary consent.

The various stages involved for Islamic Export LC Amendment are:

- Receive and verify documents (Non Online Channel)- Registration stage
- Input amendment application details
- Upload of related mandatory and non-mandatory documents
- Verify /capture details (SWIFT MT707, 708/Non Online Channels)- Scrutiny stage
- Input/Modify details of amendment of LC - Data Enrichment stage
- Check for limit availability if applicable
- Check balance availability for amount block
- Check for sanctions & KYC status
- Earmark limits/Create amount block for cash margin/charges if applicable
- Capture remarks for other users to check and act
- Hand off request to back office

The design, development and functionality of the Islamic Export LC Amendment process flow is similar to that of conventional Export LC Amendment process flow.

In the following sections, let's look at the details for Islamic Export LC amendment process.

This section contains the following topics:

Common Initiation Stage	Registration
Data Enrichment	Exceptions
Multi Level Approval	Reject Approval

Common Initiation Stage

The user can initiate the new shipping guarantee request from the common Initiate Task screen.

1. Using the entitled login credentials, login to the OBTFPM application.

2. Click Trade Finance > Initiate Task.

The screenshot shows the Oracle Trade Finance 'Initiate Task' registration form. On the left is a sidebar menu with options like Task Management, Tasks, Trade Finance, Administration, Bank Guarantee Advise, Bank Guarantee Issuance, Common Group Message, Enquiry, Export - Documentary Collection, Export - Documentary Credit, Import - Documentary Collection, Import - Documentary Credit, Initiate Task (highlighted), Maintenance, Process Initiation, Shipping Guarantee, Swift Processing, and Trade 360 Degree. The main form area is titled 'Registration' and contains three input fields: 'Process Name' with a dropdown menu showing 'Export LC Amendment - Islamic', 'LC Reference Number' with a text input field containing 'PK2ELAC211250012' and a search icon, and 'Branch' with a dropdown menu showing 'PK2-Oracle Banking Trade Finan...'. At the bottom right of the form are two buttons: 'Proceed' and 'Clear'. The top of the page shows the Oracle logo, the title 'Initiate Task', and user information including '(DEFAULTTENTITY)', 'Oracle Banking Trade Finan...', 'May 2, 2021', a notification bell, and 'ZARTAB02 subham@gmail.com'.

Provide the details based on the description in the following table:

Field	Description
Process Name	Select the process name to initiate the task.
LC Reference Number	Select the LC Reference Number.
Branch	Select the branch.

Action Buttons

Use action buttons based on the description in the following table:

Field	Description
Proceed	Task will get initiated to next logical stage.
Clear	The user can clear the contents update and can input values again.

Registration

User can register a request for an Islamic Export LC amendment received at the front desk through Mail/ Courier. During Registration stage, user can capture the basic details of the amendment application, check the signature of authorized signatory of the issuing bank, and then upload the related documents of the applicant. On submit of the request, the request will be available for an LC Amendment expert to handle the request in the next stage.

3. Using the entitled login credentials for Registration stage, login to the OBTFPM application.

The image shows the 'FuTura Bank' login interface. It features a dark blue header with the bank's logo and name. Below the header, the text 'Sign In' is displayed. There are two input fields: 'User Name *' with the value 'SRIDHAR' and 'Password *' with masked characters. A green 'Sign In' button and a 'Cancel' link are at the bottom.

4. On login, user must be able to view the dashboard screen with widgets as mapped to the user.

The image displays the 'FuTura Bank' dashboard for user SHUBHAM. The dashboard includes a sidebar menu with options like Core Maintenance, Dashboard, Maintenance, Tasks, and Trade Finance. The main area contains several widgets:

- Draft Confirmation Pending:** A table with columns Customer Name, Application Date, and Status. Data rows include EMR & CO (25-06-2018), NA (25-06-2018), and NA (21-06-2018).
- Hand-off Failure:** A table with columns Branch, Process Name, and Stage Name. Data row: Bank Futura, NA, Retry HandOff.
- Priority Details:** A table with columns Branch, Process Name, and Stage Name. Data rows include Bank Futura, NA, Amount Blo; Bank Futura, NA, Amount Blo; and 004, NA, Loan Applic.
- High Value Transactions:** A bubble chart showing transactions for GBP. The y-axis ranges from -20K to 140K, and the x-axis ranges from -2 to 12.
- SLA Breach Details:** A table with columns Customer Name, SLA Breached(mins), and Priority. Data rows include NA (23474, H, KEERTIV01), HSBC BANK (26667, M, SHUBHAM), WALL MART (23495, SHUBHAM), and EMR & CO (26780, M, GOPINATH01).
- Priority Summary:** A table with columns Branch, Process Name, and Stage Name. Data row: 203, Cucumber Testing, test descrip.
- Hold Transactions:** A table with columns Branch, Process Name, and Stage Name.
- SLA Status:** A dropdown menu showing 'Cucumber Testing'.
- Tasks Detailed:** A table with columns Process Reference Number and Process Name.

5. Click Trade Finance - Islamic > Export - Documentary Credit > Export LC Amendment Islamic.

The screenshot shows the Oracle Trade Finance - Islamic dashboard. The sidebar menu on the left includes options like Core Maintenance, Dashboard, Machine Learning, Security Management, Task Management, Tasks, Trade Finance, and Trade Finance - Islamic. The main area displays several summary cards: Priority Summary, % Oversight Corrections, Model Inference Time, High Priority Tasks, Pending Exception Approval, Hand-off Failure, Draft Confirmation Pending, and SLA Status Summary. Each card contains a table with columns like Branch, Process Name, Stage Name, and No of High Priority. The 'High Priority Tasks' card shows a table with columns: Process Reference Number, Branch, Process Name. The 'Draft Confirmation Pending' card shows a table with columns: Process Reference Number, Customer Id, Applicant.

The Registration stage has two sections Application Details and LC Amendment Details. Let's look at the details of Registration screens below:

Application Details

The screenshot shows the 'Export LC Amendment - Islamic' application details screen. It is divided into two main sections: Application Details and LC Details. The Application Details section includes fields for Internal Amendment, Amendment No, Amendment Date, Beneficiary Consent, Advising Bank Reference, Process Reference Number, Issuing Bank, Beneficiary ID, Priority, Non Bank Issuer, Branch, Submission Mode, and 20 - Documentary Credit Number. The LC Details section includes fields for LC Type, Product Code, Product Description, Advising Bank, 40A - Form of Documentary Credit, Contract Reference Number, 31C - Date of Issue, 40E - Applicable Rules, Date of Expiry, 31D - Place of Expiry, 51A - Applicant Bank, Applicant, Beneficiary, 32B - Currency Code, Amount, Amount In Local Currency, and 39A - Percentage Credit Amount Tolerance. There are buttons for Hold, Cancel, Save & Close, and Submit.

Provide the Application Details based on the description in the following table:

Field	Description	Sample Values
Internal Amendment	Read only field. Indicates if the amendment is internal.	

Field	Description	Sample Values
Advising Bank Reference Number	Provide the advising bank reference number. Alternatively, user can search the advising bank reference number using LOV. In the LOV, user can input Customer ID, Applicant, Currency, Amount and User Reference to fetch the Export LC details. Based on the search result, select the applicable Export LC to be amended.	
Beneficiary ID	Read only field. Beneficiary ID and Beneficiary Name will be auto-populated based on the selected Export LC from the LOV.	001344, EMR & CO
Branch	Read only field. Branch details will be auto-populated based on the selected Export LC from the LOV.	203-Bank Futura -Branch FZ1
Amendment No	Read only field. Amendment number will be auto-populated based on selected Export LC. Amendment number increases by 1 for each amendment.	
Process Reference Number	Unique sequence number for the transaction. This is auto generated by the system based on process name and branch code.	
Priority	System will default the Priority as Low/Medium/High based on maintenance.	High
Submission Mode	Select the submission mode of Export LC Amendment request. By default the submission mode will have the value as 'Desk'. User can change the defaulted priority. Desk- Request received through Desk Courier- Request received through Courier	Desk
Amendment Date	By default, the application will display branch's current date and enables the user to change the date to any back date.  Note Future date selection is not allowed.	04/13/2018
Issuing Bank	Read only field. Issuing Bank details will be auto-populated based on the selected LC from the LOV.	
Non Bank Issuer	Read only field. Non Bank Issuer details will be auto-populated based on the selected Export LC from the LOV.	

Field	Description	Sample Values
Cancel LC	Set the toggle as 'Yes', if Export LC amendment requires cancellation. Subsequent field will be read only and beneficiary consent is required for LC if toggle is set to Yes.	
Documentary Credit Number	Read only field. This field displays the Documentary Credit Number of the selected LC.	
Beneficiary Consent	Toggle On: beneficiary consent required. Toggle Off: beneficiary consent not required.	

LC Details

Details in this screen displays the data from the LC issued.

The screenshot shows the 'LC Details' screen with the following data:

- LC Type:** 40A - Form of Documentary Credit (IRREVOCABLE)
- Date of Expiry:** Dec 31, 2021
- Beneficiary:** 001044 GOODCARE PLC
- Product Code:** ERLI
- Contract Reference Number:** PK2ERLJ211250505
- 31D - Place of Expiry:** TEST
- 32B - Currency Code, Amount:** GBP £1,000.00
- Product Description:** Islamic Export LC - advising ATB
- 31C - Date of Issue:** May 5, 2021
- 51A - Applicant Bank:**
- Amount In Local Currency:** GBP £1,000.00
- Advising Bank:**
- 40E - Applicable Rules:** UCP LATEST VERSION
- Applicant:** 001043 MARKS AND SPI
- 39A - Percentage Credit Amount Tolerance:** /

Provide the LC Amendment Details based on the description in the following table:

Field	Description	Sample Values
LC Type	Read only field. LC type will be populated based on the selected Export LC.	
Product Code	Read only field. This field displays the product code of the selected Export LC.	
Product Description	Read only field. This field displays the description of the product as per the product code.	
Advising Bank	This field displays the advising bank details of the selected Export LC.	
40A - Form of Documentary Credit	Read only field. This field displays the form of documentary credit details of the selected Export LC.	
Contract Reference Number	Read only field. Contract Reference Number will be populated based on the selected Export LC.	

Field	Description	Sample Values
Date of Issue	Read only field. This field displays the LC issuance date.	
Applicable Rules	This field displays the rules of the selected Export LC.	
Date Of Expiry	This field displays the expiry date of the selected Export LC.  Note If amendment to the Expiry date (advancing the expiry date before expiry date of the underlying Import LC), system validates the amended value against the Back- to- Back LC value and display configurable override.	
Place of Expiry	This field displays the place of expiry of the selected Export LC.	
Applicant Bank	Read only field. This field displays the applicant bank details of the selected Export LC.	
Applicant	Read only field. This field displays the details of the applicant of the selected Export LC.	
Beneficiary	Read only field. This field displays the details of the beneficiary of the selected Export LC.	
Currency Code, Amount	This field displays the value of Export LC along with the currency details of the selected Export LC and user can amend if required.  Note If amendment to the Amount (reduction in amount), field in the Export LC, system validates the amended value against the Back- to- Back LC value and display configurable override.	
Amount In Local Currency	System fetches the local currency equivalent value for the LC amount from back office (with decimal places).	
Percentage Credit Amount Tolerance	This field displays the percentage credit amount tolerance details of the selected Export LC and user can amend if required.	

Field	Description	Sample Values
Additional Amount Covered	This field displays the details of additional amount covered of the selected Export LC and user can amend if required.

Provide the Miscellaneous Details based on the description in the following table:

Field	Description	Sample Values
Documents	Upload the required documents.	
Remarks	Provide any additional information regarding the amendment request. This information can be viewed by other users processing the request.	
View LC	Enables the user to view the latest LC values displayed in the respective fields. All fields displayed in LC details section are read only fields.	

Action Buttons

Submit	On submit, task will get moved to next logical stage of Export LC Amendment. If mandatory fields have not been captured, system will display an error message until the mandatory fields data are provided.	
Save & Close	Save the information provided and displays the task in you queue for working later. This option will not submit the request.	
Cancel	Cancels the Export LC Amendment Registration stage inputs.	

Field	Description	Sample Values
Hold	The details provided will be registered and status will be on hold. This option is used, if there are any pending information yet to be received from applicant and appropriate remarks must be provided.	
Checklist	Make sure that the details in the checklist are completed and acknowledge. If mandatory checklist items are not marked, system will display an error on submit. 	

Note

When an amendment to an Export LC which is linked to a Back to Back LC (Import LC) is initiated, system should display a message, the LC is linked to an Import LC.

Scrutiny

Scrutiny user can scrutinize a request for Islamic Export LC Amendment.

As part of scrutiny, user can enter/update basic details of the Islamic LC Amend request and can verify if the request can be progressed further. The task initiated from the online channel (SWIFT MT707, 708 parsing) should be created in the Scrutiny stage directly as in conventional process flow.

MT707/708 Parsing-Conventional and Islamic Trade finance is applicable

When parsing the MT707/708, OBTFPM should read the SWIFT message,

- If 57A tag (ATB) value is available in the message, the task should be created in the Conventional Export LC Amendment process.
- If 57A tag (ATB) value is not available in the message, based on the Advising Bank Ref found in Tag 21 Receiver reference number, system should identify the product code from the Tag21 and create the task in Conventional/Islamic Export LC amendment.

MT707/708 Parsing-where Islamic Trade finance is applicable

When parsing the MT707/708, OBTFPM should read the SWIFT message and all the tasks should be created in the Islamic Export LC amendment process.

If the incoming message is MT 707, requests that are received via online channels like trade portal, external system and SWIFT should be available directly for further processing in OBTFPM from Scrutiny stage.

Do the following steps to acquire a task currently at Scrutiny stage:

1. Using the entitled login credentials for Scrutiny stage, login to the OBTFPM application.

The image shows the login interface for FuTura Bank. It features a dark blue header with the bank's logo and name. Below the header, the text 'Sign In' is displayed. There are two input fields: 'User Name *' with the value 'SRIDHAR' and 'Password *' with masked characters. A green 'Sign In' button is located at the bottom of the form.

2. On login, user must be able to view the dashboard screen with widgets as mapped to the user.

3. Click **Trade Finance> Tasks> Free Tasks**.

Following are the fields which can be amended apart from the fields carried over from [LC Details](#) of [Registration](#). Provide the details for the amendable fields based on the description in the following table:

Field	Description	Sample Values
Applicable Rules	This field displays the rules of the selected Export LC and user can amend if required.	
Date of Expiry	This field displays the expiry date of the selected Export LC and user can amend if required.	

Field	Description	Sample Values
Place of Expiry	This field displays the place of expiry of the selected Export LC and user can amend if required.	
Currency/Amount	This field displays the value of LC along with the currency details of the selected Export LC.	
Percentage Credit Amount Tolerance	This field displays the percentage credit amount tolerance details of the selected Export LC.	
Purpose of message	Advice and Confirmation of the Credit Amendment - Select this option, if LC requires confirmation on the amendment. Advice of the Credit Amendment - Select this option, if LC does not require confirmation on the amendment.	
Additional Amounts Covered	This field displays the details of additional amount covered of the selected LC and user can amend if required.	

Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Documents	Upload the required documents. Application displays mandatory documents to be uploaded for amendment. Place holders are also available to upload additional documents submitted by the applicant. The user can view and input/view application details simultaneously. When a user clicks on the uploaded document, Document window get opened and on clicking the view icon of the uploaded document, Application screen should get split into two. The one side of the document allows to view and on the other side allows to input/view the details in the application.	
Remarks	Provide any additional information regarding the LC. This information can be viewed by other users processing the request.	
Overrides	Click to view the overrides accepted by the user.	

Field	Description	Sample Values
Customer Instructions	Click to view/ input the following • Standard Instructions – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this. • Transaction Level Instructions – In this section, OBTFPM user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions.	
Common Group Message	Click Common Group Message button, to send MT799 and MT999 messages from within the task.	
Incoming Message	Clicking this button allows the user to see the message in case of STP of incoming MT 767. Clicking this button allows parsing and processing MT 707 along with the MT708 messages.	
View LC	Enables the user to view the latest LC values displayed in the respective fields.	
Submit	Task will get moved to next logical stage of Export LC Amendment. If mandatory fields have not been captured, system will display an error message until the mandatory fields data are provided.	
Save & Close	Save the information provided and holds the task in you queue for working later. This option will not submit the request.	
Cancel	Cancel the Scrutiny stage inputs.	
Hold	The details provided will be on hold. This option is used, if there are any pending information yet to be received from applicant and appropriate remarks must be provided.	

Field	Description	Sample Values
Reject	On click of Reject, user must select a Reject Reason from a list displayed by the system. Reject Codes: • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others. Select a Reject code and give a Reject Description. This reject reason will be available in the remarks window throughout the process.	
Refer	User must select a Refer Reason from the values displayed by the system. Refer Codes: • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others.	
Next	On click of Next, system should validate if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment.	

Availability Shipment

As part of amendment, user can change the values available in the fields based on the description in the following table:

Field	Description	Sample Values
Available With	This field identifies the bank with which the credit is available. User must capture the bank details or any free text. - If the LC is restricted to any particular bank,, search the bank with SWIFT code (BIC) or Bank Name. Available With BIC Bank Name fetch BIC Bank Name No data to display. Page 1 (0 of 0 items) On selection of the record if SWIFT code is available, then SWIFT code will be defaulted. If SWIFT code is not available then the bank's name and address gets defaulted. - If the LC is not restricted to any bank, provide free text - (YOURSELVES, WITH ANY BANK etc.).	

Field	Description	Sample Values
Available By	This field displays the value of 'Available By' as per the issued LC. Choose one of the following values from drop down, if required. • BY ACCEPTANCE • BY DEF PAYMENT • BY MIXED PAYMENT • BY NEGOTIATION • BY PAYMENT Validation: 1) If By Mixed Payment option is selected, there must be a value in tag 42M- Mixed payment 2) If By deferred payment is selected, there must be a value in tag 42P- Deferred payment 3) If By payment is selected, payment at sight is applicable. It must be applicable for Sight Type of product only.	
Drafts At	This field displays the details of tenor of drafts to be drawn under the documentary credit as per the issued LC.	
Drawee	This field displays the Drawee value as per the issued LC. This field will have value only if 'Drafts at' field has values. Select the Drawee bank (Advising bank or Confirming bank). • Search the bank with SWIFT code (BIC) or Bank Name.  On selection of the record if SWIFT code is available, then SWIFT code will be defaulted. If SWIFT code is not available then the bank's name and address to be defaulted.  Note This field is mandatory if value is provided at Drafts At field.	
Tenor	This field displays the value of Tenor as per the issued LC and can be modified if required.	

Shipment Details

As part of amendment, user can change the values available in the fields based on the description in the following table:

Field	Description	Sample Values
Partial Shipments	This field displays the value of Partial Shipments as per the LC and can be modified if required. This field specifies whether or not partial shipments are allowed under the documentary credit. Select the appropriate value from the drop down. Available values are: • ALLOWED • CONDITIONAL • NOT ALLOWED	
Transshipment	This field displays the value of Transshipments as per the LC and can be modified if required. This field specifies whether or not transshipment is allowed under the documentary credit. Select the appropriate value from the drop down. Available values are: • ALLOWED • CONDITIONAL • NOT ALLOWED	
Place Of Taking In Charge	This field displays the value of place of taking in charge as per the LC and can be modified if required. This field specifies the place of taking in charge (in case of a multi-modal transport document), the place of receipt (in case of a road, rail or inland waterway transport document or a courier or expedited delivery service document), the place of dispatch or the place of shipment to be indicated on the transport document. Note This field is alternate to Port Of Loading. Any of these fields must have value and if both the fields has values, application will display an error message.	

Field	Description	Sample Values
Port Of Loading	This field displays the value of port of loading as per the LC and can be modified if required. This field specifies the port of discharge or airport of destination to be indicated on the transport document.  Note This field is alternate to Place Of Taking In Charge. Any of these fields must have value and if both the fields has values, application will display an error message.	
Port Of Discharge	This field displays the value of port of discharge as per the LC and can be modified if required. This field specifies the port of discharge or airport of destination to be indicated on the transport document.  Note This field is alternate to Place Of Final Destination. Any of these fields must have value and if both the fields has values, application will display an error message.	
Place Of Final Destination	This field displays the value of Place of Final Destination as per the LC and can be modified if required. This field specifies the final destination or place of delivery to be indicated on the transport document.  Note This field is alternate to Port Of Discharge. Any of these fields must have value and if both the fields has values, application will display an error message.	

Field	Description	Sample Values
Latest Date Of Shipment	This field displays the value of Latest Date of Shipment as per the LC and can be modified if required. This field is alternate to Shipment Period. Latest date of shipment or shipment period must have value and if both the fields has values, application will display an error message.  Note If amendment to the Shipment date (advancing the Latest Shipment Date before the Latest Shipment date of the underlying Import LC), system validates the amended value against the Back-to-Back LC value and display configurable override.	
Shipment Period	This field displays the value of shipment period as per the LC and can be modified if required.  Note This field is alternate to Latest Date Of Shipment. Latest date of shipment or shipment period must have value and if both the fields has values, application will display an error message.	

Description Of Goods And Or Services

This field contains a description of the goods and/or services of the issued LC and can be amended if required. Provide the Shipment Details based on the description in the following table:

Field	Description	Sample Values
INCO Terms	Select the appropriate INCO terms.	
INCO Term Description	The description of the INCO Term.	
+ Icon	Click + icon to add goods details.	
- Icon	Click - icon to remove goods details.	
Goods Code	Click look up icon to select the goods code.	
Goods Type	The goods type is auto populated depending on selected goods code.	
Goods Description	The goods description is auto populated depending on selected goods code.	

Field	Description	Sample Values
No of Units	Enter the number of units being imported or exported.	
Price per Unit	Enter the value for price per unit.	
Total Amount	System to calculate the total price In case of online request, the system should populate the total amount from incoming request. System should validate that the total amount is equal to the value of the transaction (LC/ Collection).	
Action	Click Edit icon to edit the goods detail. Click Delete icon to delete the goods detail.	

Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Documents	Upload the required documents.	
Remarks	Provide any additional information regarding the LC. This information can be viewed by other users processing the request.	
Overrides	Click to view the overrides accepted by the user.	
Incoming Message	Clicking this button allows the user to see the message in case of STP of incoming MT 767.	
View LC	Enables the user to view the latest LC values displayed in the respective fields.	
Save & Close	Save the information provided and holds the task in you queue for working later. This option will not submit the request.	
Cancel	Cancel the Export LC amendment Scrutiny stage inputs.	
Hold	The details provided will be registered and status will be on hold. This option is used, if there are any pending information yet to be received from applicant and appropriate remarks must be provided.	

Field	Description	Sample Values
Reject	On click of Reject, user must select a Reject Reason from a list displayed by the system. Reject Codes: • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others. Select a Reject code and give a Reject Description. This reject reason will be available in the remarks window throughout the process.	
Refer	User must select a Refer Reason from the values displayed by the system. Refer Codes: • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others.	
Next	On click of Next, system should validate if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment.	

Payment Details

A Scrutiny user can scrutinize the Payment Details request for Islamic Export LC Amendment.

Payment Details

As part of amendment, user can change the values available in the fields based on the description in the following table:

Field	Description	Sample Values
Special Payment conditions for beneficiary	This field displays the value of Spl Paymt Cond'n - Beneficiary as per the LC and can be modified if required. If any special payment condition has to be provided to beneficiary, the details for the same must be captured in this field.	
Special Payment conditions for receiving bank	This field displays the value of Spl Paymt Cond'n - Rec Bank as per the LC and can be modified if required. If any special payment condition has to be provided to receiving bank, the details for the same must be captured in this field. This field specifies special payment conditions applicable to the receiving bank without disclosure to the beneficiary, for example, post-financing request/ conditions for receiving bank only.	
Period for Presentation	This field displays the value of Period for Presentation as per the LC and can be modified if required. If the period of presentation is based on any event other than shipment, then you can capture the event name in text along with the number of days in number.	

Field	Description	Sample Values
Confirmation Instructions	This field displays the value of Confirmation Instructions as per the LC and can be modified if required. Select the confirmation instruction for the LC from the available LOV values – CONFIRM, MAY ADD, WITHOUT. Applicable only if field 49 - confirmation instruction is 'confirm' or 'may add'. You can search through LOV, Party type with banks should only be displayed in LOV. The system must display the following: a) SWIFT code (if available), b) Name and address of the bank On selection of the record, if SWIFT code is available then SWIFT code will be defaulted. If SWIFT code is not available then the bank's name and address to be defaulted.	
Partial Confirmation Allowed	Toggle On: Set the toggle 'On' to enable partial confirmation. Toggle Off: Set the toggle 'Off' to disable partial confirmation. Note This field is applicable only if Confirmation Instructions is set to Confirm.	
Silent Confirmation	This option when enabled: - Confirmation Percentage should default as 100 and Silent Confirmation Amount should display the full LC outstanding value. User should not be able to modify them. - All other confirmation fields to be blank and disabled. This field is added only for LC in which Issuing Bank does not request confirmation, This field is enabled, if Confirmation Instruction field has value Without or May Add.	

Field	Description	Sample Values
Confirmation%	Provide the confirmation percentage.  Note This field is applicable only if Confirmation Instructions is set to Confirm and Partial Confirmation Toggle is 'On'.  Note This field is alternate to 'Confirmation Amount'.	
Confirmation Amount	Provide the confirmation percentage.  Note This field is applicable only if Confirmation Instructions is set to Confirm and Partial Confirmation Toggle is 'On'.  Note This field is alternate to 'Confirmation Amount'.	
To be confirmed by Advising Bank	Toggle On: Set the toggle on to confirm by advising bank. Toggle Off: Set the toggle off for not to be confirmed by advising bank.	
Requested Confirmation Party	This field displays the value of Requested Confirmation Party as per the issued LC and can be modified if required.  Note This field is applicable only for LC Type - Confirmed LC.	

Field	Description	Sample Values
Confirmation Expiry Date	The user can select the Confirmation Expiry Date. This field indicates the date up to which the Confirmation is valid. When the underlying Confirmed LC is amended to have a new Expiry Date, the value will be populated in OBTFPM also. If new expiry date is to be confirmed, user can update the Confirmation Expiry Date to the new Expiry Date. If the new expiry date is not to be confirmed, user should not update the New Confirmation Expiry Date. System should validate that the value is only either the original expiry date or the new expiry date. In case Confirmation Expiry Date is to be extended, then on hand-off the related flag should be set to yes in back office system. In case Confirmation Expiry Date is not to be extended, then on hand off, related flag should be set to No in back office.	
Reimbursing Bank	This field displays the value of Reimbursing Bank as per the LC and can be modified if required. Search through LOV. Party type with banks will be displayed in LOV. • SWIFT code (if available), • Name and address of the bank On selection of the record if SWIFT code is available, then SWIFT code will be defaulted. If SWIFT code is not available then the bank's name and address to be defaulted.	

Field	Description	Sample Values
Advise Through Bank	Online Channel – User can update the details received. Non-Online Channel - Search through LOV. Party type with banks must be displayed in LOV. • SWIFT code (if available) • Name and address of the bank On selection of the record if SWIFT code is available, then SWIFT code will be defaulted. If SWIFT code is not available then the bank's name and address to be defaulted.  Note In case the selected Bank is not RMA Compliant, the system displays error message “RMA arrangement not available”. In case of SWIFT MT707 message, this field is empty.	
Instructions to P/A/N Bank	This field displays the value of Instructions to P/A/N Bank as per the LC and can be modified if required.	
Sender to Receiver Information	This field displays the value of Sender to Receiver Information (FFT Details) as per the LC and can be modified, if required.	
Charges	This field displays the charges and can be modified, if required.	
Amendment charges payable by	Select the party to pay the amendment charges: • Applicant • Beneficiary • Others	

Information to Issuing Bank

Provide MT730 - Information to Issuing Bank details based on the description in the following table:

Field	Description	Sample Values
Sender to Receiver Information	This field displays the additional information to receiver and can be modified, if required.	
Narrative	This field displays the additional information from the advising bank to the issuing bank and can be modified, if required.	

Field	Description	Sample Values
Issuing Bank Account Number	This field displays the issuing bank account number from the LOV and can be modified, if required.	
Charges to be Claimed	This field displays the FFT from the LOV for the charges to be claimed and can be modified, if required.	
Charges	This field displays the charge details for advising and can be modified, if required.

User can modify the defaulted collateral percentage, in which case system should display a override message "Defaulted Collateral Percentage modified.	
Settlement Account	Select the settlement account for then collateral.	
Settlement Account Branch	Settlement Account Branch will be auto-populated based on the Settlement Account selection.	

Field	Description	Sample Values
Settlement Account Currency	Select the Settlement Account Currency.	
Account Available Amount	Account Available Amount will be auto-populated based on the Settlement Account selection.	
Response	Response can be 'Success' or 'Amount not Available'.	
Response Message	Detailed Response message.	

Charge Details

On click of 'Next' in the previous screen, system will auto populate the charges, commission and tax components mapped to the product from the back office system.

Charge Details									
Edit	Component	Currency	Amount	Modified	Billing	Defer	Waive	Charge Party	Settlement Account
☒	LCCOURAMND	GBP	£50.00		☐	☐	☐		PK20010440017

Page 1 (1 of 1 items) ⏪ < 1 > ⏩

If default charges are available under the product, they should be defaulted here with values. If customer or customer group specific charges are maintained, then the same will be defaulted from back end system.

Field	Description	Sample Values
Edit Icon	Click edit link to edit any existing Charge Details.	
Component	Charge Component type.	
Currency	Defaults the currency in which the charges have to be collected.	
Amount	An amount that is maintained under the product code gets defaulted in this field. User can edit the value, if required.	
Modified Amount	From the default value, if the rate is changed or the amount is changed, the value gets updated in the modified amount field.	
Billing	If charges are handled by separate billing engine, then by selecting billing the details to be available for billing engine for further processing. On simulation of charges/commission from Back Office, if any of the Charges/Commission component for the customer is 'Billing' enabled, 'Billing' toggle for that component should be automatically checked in OBTFPM. The user can not select/de-select the check box if it is de-selected by default. This field is disabled, if 'Defer' toggle is enabled.	

Field	Description	Sample Values
Defer	If charges have to be deferred and collected at any future step, this check box has to be selected. On simulation of charges/commission from Back Office, if any of the Charges/Commission component for the customer is AR-AP tracking enabled, 'Defer' toggle for that component should be automatically checked in OBTFPM. The user can select/de-select the check box. On de-selection the user has to click on 'Recalculate' charges button for re-simulation.	
Waive	If charges have to be waived, this check box has to be selected. Based on the customer maintenance, the charges should be marked for Billing or for Defer. This field is disabled, if 'Defer' toggle is enabled.	
Charge Party	Charge party will be beneficiary by default. You can change the value to applicant	
Settlement Account	Details of the settlement account.	

Provide the Commission Details based on the description provided in the following table:

Commission Details

Component	Rate	Modified	Currency	Amount	Modified	Defer	Waive	Charge Party
No data to display.								
Page 1 (0 of 0 items)   1  								

Field	Description	Sample Values
Edit Link 	Click edit link to edit any existing commission Details.	
Component	Select the commission component	
Rate	Defaults from product. The commission rate, if available in Back Office defaults in OBTFPM. The user is able to change the rate. If flat commission is applicable, then commission amount defaulted from back office is modifiable by the user. Rate field will be blank and the user cannot modify the Rate field.	
Currency	Defaults the currency in which the commission needs to be collected	

Field	Description	Sample Values
Amount	An amount that is maintained under the product code defaults in this field. The commission rate, if available in Back Office defaults in OBTFPM. The user is able to change the rate, but not the commission amount directly. The amount gets modified based on the rate changed and the new amount is calculated in back office based on the new rate and is populated in OBTFPM. If flat commission is applicable, then commission amount defaulted from back office is modifiable by the user. Rate field will be blank and the user cannot modify the Rate field.	
Modified Amount	From the default value, if the rate or amount is changed, the modified value gets updated in the modified amount field.	
Billing	If charges/commission is handled by separate billing engine, then by selecting billing the details to be available for billing engine for further processing.	
Defer	Select the check box, if charges/commissions has to be deferred and collected at any future step.	
Waive	Select the check box to waive charges/ commission. Based on the customer maintenance, the charges/commission can be marked for Billing or Defer. If the defaulted Commission is changed to defer or billing or waive, system must capture the user details and the modification details in the 'Remarks' place holder.	
Charge Party	Charge party will be 'Applicant' by Default. You can change the value to Beneficiary	
Settlement Account	Details of the Settlement Account.	

The tax component is calculated based on the commission and defaults if maintained at product level. User cannot update tax details and any change in tax amount on account of modification of charges/ commission will be available on click of Re-Calculate button or on hand off to back-end system.

Tax details are defaulted from the back-end system.

▲ Tax Details

Component	Currency	Amount	Billing	Defer	Settlement Account
No data to display.					

Field	Description	Sample Values
Component	Tax Component type	
Currency	The tax currency is the same as the commission.	
Amount	The tax amount defaults based on the percentage of commission maintained. User can edit the tax amount, if required.	
Settlement Account	Details of the settlement account.	

Assignment of Proceeds

In this tile, assignment details for the applicable processes is displayed. Proceeds can be assigned only if the parties have been assigned during drawing or update drawing process.

Assignment of Proceeds

Assignee Details

Sequence	Assignee Id & Assignee Details	Assignment %	Currency	Assigned Amount	Assignee Bank Details	Account With Institution
☐ 1	001204 test internal	25	GBP	\$25,000.00		001204
☐ 2	001204 testing	30	GBP	\$30,000.00		001204

Save & Close Cancel

Field	Description	Sample Values
Assignment Paid By Importer	Slide the toggle if assignment is paid by importer.	
Sequence	User can update the sequence number.	
Assignee ID & Assignee Details	User can select the assignee id. Assignee details appear based on selected assignee ID. User can add multiple assignees to a single Bill under LC with the assignment amount or assignment percentage of parent LC.  Note WALKIN customers is allowed as assignee.	

Field	Description	Sample Values
Assignment %	User can input the percentage of LC amount that has be assigned to the assignee. Once the user updates the rate, the system has to calculate the amount as per assigned rate and default in the assigned amount field. If the user directly captures the assigned amount then the assigned percentage has to calculate the percentage and the same to be populated in the screen. If contribution is more than 100%, system to display an alert message. Once contribution % is input system will default the amount. System to validate that Limit Contribution percentage plus Collateral percentage is equal to 100. Otherwise system to provide override.The assignment percentage should be rounded to two decimal places	
Currency	User can select the account currency of the settlement account of the assignee. Only the currencies for which the settlement account is available, only those currency will be displayed.	
Assigned Amount	User can input the amount that has to be assigned to the assignee. If the user has already inputted the assignment percentage, system to calculate the amount and populate the value	
Assignee Bank Details	User can select the assignee bank.	
Account with Institution	User can select the account number of the Account with Institution.	

FX Linkage Details

This section enables the user to link the existing FX contract(s) to the LC transactions. User can link multiple forward FX contracts.FX contract linkage with the Bill booking can happen only for immediate liquidation of sight payment or for Usance. For manual sight payment, the user needs to link the FX contract on the date of liquidation of the Bill.

Following are the conditions of FX Linkage:

- If any LC Amendment is pending for beneficiary confirmation with FX changes, then the system, will not allow another amendment on this contract further.
- FX request will be processed in external system, only after successful amendment confirmation has been done.
- Sum of Linked amount will not be greater than LC contract amount. Linked amount will not be greater than the available amount for linkage.
- Delink of linked FX or Reduction of linked amount from the LC is allowed if the same is not attached to any Bills.

- Reduction of LC contract amount with FX, through LC amendment will be restricted, when the contract amount goes below the FX linkage amount. User will be intimated with the message.

Field	Description	Sample Values
FX Reference Number	Select the FX contract reference number from the LOV. On selection, system defaults date, available amount, bought currency, sold currency and rate. Forward FX Linkage available for selection at bill would be as follows, - Counterparty of the FX contract should be the counterparty of the Bill contract. - Active Forward FX transactions authorized not marked for auto liquidation. - Bill contract currency should be BOT currency of the FX transaction in case of an export Bill or the SOLD currency in case of an Import Bill.	

Field	Description	Sample Values
Currency	System defaults from the linked FX contract.	
Bought Currency	System defaults from the linked FX contract.	
Sold Currency	System defaults from the linked FX contract.	
Available Contract Amount	Available amount will be FX contract amount minus the linked amount. Available amount for linkage should be greater than Zero.	
Rate	Exchange rate is defaulted from the linked FX contract.	
Linked Amount	Sum of Linked amount will not be greater than Bill/LC contract amount. Linked amount will not be greater than the available amount for linkage.	
Current Utilized Amount	Current Utilized amount displays the liquidated / purchased /discounted /negotiated amount of BC contract. It cannot go beyond the linked FX amount.	
Total Utilized Amount	Total Utilized amount displays the total amount utilized against the corresponding linked FX. On query, both Utilized and Total Utilized amount holds the amount of latest version.	
FX Expiry Date	System defaults expiry date from the linked FX contract.	
FX Delivery Period From	Displays the FX delivery start date.	
FX Delivery Period To	Displays the FX delivery end date.	
Action	Click the Edit icon to edit the FX linkage details. Click the Delete icon to delete the FX linkage details.	
Average FX Rate	Multiple forward FX contract could be linked, and exchange rate of FX contract vary from each. Hence, effective exchange rate for bill would be arrived using weighted average method and it is utilized during purchase/negotiation/discount or liquidation of the bill. This will be populated in the Average FX Rate.	

Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Documents	Upload the required documents.	

Field	Description	Sample Values
Remarks	Provide any additional information regarding the LC. This information can be viewed by other users processing the request.	
Overrides	Click to view the overrides accepted by the user.	
Incoming Message	Clicking this button allows the user to see the message in case of STP of incoming MT 767.	
View LC	Enables the user to view the latest LC values displayed in the respective fields.	
Save & Close	Save the information provided and holds the task in you queue for working later. This option will not submit the request	
Cancel	Cancel the Scrutiny stage inputs.	
Hold	The details provided will be registered and status will be on hold. This option is used, if there are any pending information yet to be received from applicant and appropriate remarks must be provided.	
Reject	On click of Reject, user must select a Reject Reason from a list displayed by the system. Reject Codes: • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others. Select a Reject code and give a Reject Description. This reject reason will be available in the remarks window throughout the process.	
Refer	User must select a Refer Reason from the values displayed by the system. Refer Codes: • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others.	
Next	On click of Next, system should validate if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment.	

Summary

User can review the summary of details updated in Scrutiny Islamic Export LC Amendment request.

Log in to Oracle Banking Trade Finance Process Management (OBTfPM) system to see the summary tiles. The tiles must display a list of important fields with values. User can drill down from summary Tiles into respective data segments.

Documents Required

Documents required section displays the list of documents required as per the issued LC and can be modified if required.

Online Channel - System will default the details received in the Description column. Based on the details populated, user can pick corresponding values for document code, originals and copy.

Non Online Channel - User can further edit (add or remove) the documents or document description as per requirement. Application will display an alert message, if both 'Bill Of lading' and 'Airway Bill' are chosen.

Based on the 'Product' selected, Application will default the documents required under the LC. User can edit the details, delete an existing document and also add additional documents to the defaulted list.

Additional Conditions

Additional Conditions section displays the conditions of the issued LC and can be amended if required.

Online Channel - System will default the details received in the description column. System will parse the additional conditions required field into multiple line items based on line de-limiter (+) and shall populate each line item as a separate description. User can read the description and make any changes required to the description, also must be able to add more conditions.

Non Online Channel - User can use FFT to capture additional conditions and can edit the description populated from FFT. You should also be able to add additional FFT.

Field	Description	Sample Values
Edit Link	Click edit link to edit any existing Collateral Details.	
Plus Icon 	Click plus icon to add new Collateral Details.	
Minus Icon 	Click minus icon to remove any existing Collateral Details.	
Collateral Type	Cash Collateral (CASA) will be the default value available as collateral type. User can select either Cash Collateral or Deposits. The collateral % maintained for the customer is defaulted into the Collateral Details screen. If collateral % is not maintained for the customer, then system should default the collateral % maintained for the product. User can modify the defaulted collateral percentage, in which case system should display a override message "Defaulted Collateral Percentage modified."	

Field	Description	Sample Values
Collateral%	User must enter the percentage of collateral to be linked to this transaction. If the value is more than 100% system will display an alert message. The collateral % maintained for the customer is defaulted into the Collateral Details screen. If collateral % is not maintained for the customer, then system should default the collateral % maintained for the product. User can modify the defaulted collateral percentage, in which case system should display a override message "Defaulted Collateral Percentage modified.	
Currency	The LC currency will get defaulted in this field.	
Contribution Amount	Collateral contribution amount will get defaulted in this field. The collateral % maintained for the customer is defaulted into the Collateral Details screen. If collateral % is not maintained for the customer, then system should default the collateral % maintained for the product. User can modify the defaulted collateral percentage, in which case system should display a override message "Defaulted Collateral Percentage modified.	
Settlement Account	Select the settlement account for then collateral.	
Settlement Account Branch	Settlement Account Branch will be auto-populated based on the Settlement Account selection.	
Settlement Account Currency	Select the Settlement Account Currency.	
Account Available Amount	Account Available Amount will be auto-populated based on the Settlement Account selection.	
Response	Response can be 'Success' or 'Amount not Available'.	
Response Message	Detailed Response message.	

Charge Details

On click of 'Next' in the previous screen, system will auto populate the charges, commission and tax components mapped to the product from the back office system.

Charge Details									
Edit	Component	Currency	Amount	Modified	Billing	Defer	Waive	Charge Party	Settlement Account
☒	LCCOURAMND	GBP	£50.00		☐	☐	☐		PK20010440017

Page 1 (1 of 1 items) K < 1 > X

If default charges are available under the product, they should be defaulted here with values. If customer or customer group specific charges are maintained, then the same will be defaulted from back end system.

Field	Description	Sample Values
Component	Charge Component type.	
Currency	Defaults the currency in which the charges have to be collected.	
Amount	An amount that is maintained under the product code gets defaulted in this field. User can edit the value, if required.	
Modified Amount	From the default value, if the rate is changed or the amount is changed, the value gets updated in the modified amount field.	
Billing	If charges are handled by separate billing engine, then by selecting billing the details to be available for billing engine for further processing. On simulation of charges/commission from Back Office, if any of the Charges/Commission component for the customer is 'Billing' enabled, 'Billing' toggle for that component should be automatically checked in OBTFPM. The user can not select/de-select the check box if it is de-selected by default. This field is disabled, if 'Defer' toggle is enabled.	
Defer	If charges have to be deferred and collected at any future step, this check box has to be selected. On simulation of charges/commission from Back Office, if any of the Charges/Commission component for the customer is AR-AP tracking enabled, 'Defer' toggle for that component should be automatically checked in OBTFPM. The user can select/de-select the check box. On de-selection the user has to click on 'Recalculate' charges button for re-simulation.	
Waive	If charges have to be waived, this check box has to be selected. Based on the customer maintenance, the charges should be marked for Billing or for Defer. This field is disabled, if 'Defer' toggle is enabled.	
Charge Party	Charge party will be beneficiary by default. You can change the value to applicant.	
Settlement Account	Details of the settlement account.	

Provide the Commission Details based on the description provided in the following table:

Commission Details

Component	Rate	Modified	Currency	Amount	Modified	Defer	Waive	Charge Party
No data to display.								

Page 1 (0 of 0 items) < 1 >

Field	Description	Sample Values
Component	Select the commission component	
Rate	Defaults from product. The commission rate, if available in Back Office defaults in OBTFPM. The user is able to change the rate. If flat commission is applicable, then commission amount defaulted from back office is modifiable by the user. Rate field will be blank and the user cannot modify the Rate field.	
Currency	Defaults the currency in which the commission needs to be collected	
Amount	An amount that is maintained under the product code defaults in this field. The commission rate, if available in Back Office defaults in OBTFPM. The user is able to change the rate, but not the commission amount directly. The amount gets modified based on the rate changed and the new amount is calculated in back office based on the new rate and is populated in OBTFPM. If flat commission is applicable, then commission amount defaulted from back office is modifiable by the user. Rate field will be blank and the user cannot modify the Rate field.	
Modified Amount	From the default value, if the rate or amount is changed, the modified value gets updated in the modified amount field.	
Billing	If charges/commission is handled by separate billing engine, then by selecting billing the details to be available for billing engine for further processing.	
Defer	Select the check box, if charges/commissions has to be deferred and collected at any future step.	

Field	Description	Sample Values
Waive	Select the check box to waive charges/ commission. Based on the customer maintenance, the charges/commission can be marked for Billing or Defer. If the defaulted Commission is changed to defer or billing or waive, system must capture the user details and the modification details in the 'Remarks' place holder.	
Charge Party	Charge party will be 'Beneficiary' by Default. You can change the value to Applicant	
Settlement Account	Details of the Settlement Account.	

The tax component is calculated based on the commission and defaults if maintained at product level. User cannot update tax details and any change in tax amount on account of modification of charges/ commission will be available on click of Re-Calculate button or on hand off to back-end system.

Tax details are defaulted from the back-end system.

▲ Tax Details

Component	Currency	Amount	Billing	Defer	Settlement Account
No data to display.					

Field	Description	Sample Values
Component	Tax Component type	
Currency	The tax currency is the same as the commission.	
Amount	The tax amount defaults based on the percentage of commission maintained. User can edit the tax amount, if required.	
Settlement Account	Details of the settlement account.

When the Value Date is different from the Transaction Date for one or more accounting entries, system displays an Alert Message "Value Date is different from Transaction Date for one or more Accounting entries."

Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Submit	Task will get moved to next logical stage of Export LC Amendment. If mandatory fields have not been captured, system will display an error message until the mandatory fields data are provided.	

Field	Description	Sample Values
Save & Close	Save the information provided and holds the task in you queue for working later. This option will not submit the request	
Cancel	Cancel the Data Enrichment stage inputs.	
Hold	The details provided will be registered and status will be on hold. This option is used, if there are any pending information yet to be received from applicant and appropriate remarks must be provided.	
Reject	On click of Reject, user must select a Reject Reason from a list displayed by the system. Reject Codes: • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others. Select a Reject code and give a Reject Description. This reject reason will be available in the remarks window throughout the process.	

Exceptions

The Export LC Amendment request, before it reaches the approval stage, the application will validate the Amount Block, KYC and AML. If any of these failed in validation will reach exception stage for further clearance for the exceptions.

Exception - Amount Block

As part of amount block validation, application will check if sufficient balance is available in the account to create the block. On hand-off, system will debit the blocked account to the extent of block and credit charges/ commission account in case of charges block or credit the amount in suspense account for blocks created for collateral.

The transactions that have failed amount block due to non-availability of amount in respective account will reach the amount block exception stage.

Log in into OBTFPM application, amount block exception queue. Amount block validation failed tasks for trade transactions will be listed in the queue. Open the task to view summary of important fields with values. On Approval, system should not release the Amount Block against each applicable account and system should handoff the "Amount Block Reference Number" to the back office. On successful handoff, back office will make use of these "Amount Block

Reference Number" to release the Amount Block done in the mid office (OBTFPM) and should debit the CASA account from the Back office. If multiple accounts are applicable, Amount Block.

Reference for all accounts to be passed to the back office.

Exception is created when sufficient balance is not available for blocking the settlement account and the same can be addressed by the approver in the following ways:

Approve:

- Settlement amount will be funded (outside of this process)
- Allow account to be overdrawn during hand-off

Refer:

- Refer back to DE providing alternate settlement account to be used for block.
- Different collateral to be mapped or utilize lines in place of collateral.

Reject:

Reject the transaction due to non-availability of sufficient balance in settlement account

Amount Block Exception

This section will display the amount block exception details.
